Important Safety Information

RF Energy Exposure and Product Safety Guide for Portable Two-Way Radios

ATTENTION!

This radio is restricted to Occupational use only. Before using the radio, read the RF Energy Exposure and Product Safety Guide for Portable Two-Way Radios which contains important operating instructions for safe usage and RF energy awareness and control for Compliance with applicable standards and Regulations.

For a list of Motorola Solutions-approved antennas, batteries, and other accessories, visit the following website:

http://www.motorolasolutions.com

This page intentionally left blank.

Software Version

All the features described in the following sections are supported by the software version **R02.08.05.0000** or later.

See Checking Firmware and Codeplug Versions on page 177 to determine the software version of your radio.

Check with your dealer or system administrator for more information.

MOTOROLA, MOTO, MOTOROLA SOLUTIONS, and the Stylized M Logo are trademarks or registered trademarks of Motorola Trademark Holdings, LLC and are used under license. All other trademarks are the property of their respective owners.

European Union (EU) Waste of Electrical and Electronic Equipment (WEEE) directive

The European Union's WEEE directive requires that products sold into EU countries must have the crossed out trash bin label on the product (or the package in some cases).

As defined by the WEEE directive, this cross-out trash bin label means that customers and end-users in EU countries

should not dispose of electronic and electrical equipment or accessories in household waste.

Customers or end-users in EU countries should contact their local equipment supplier representative or service centre for information about the waste collection system in their country.

Computer Software Copyrights

The Motorola Solutions products described in this manual may include copyrighted Motorola Solutions computer programs stored in semiconductor memories or other media. Laws in the United States and other countries preserve for Motorola Solutions certain exclusive rights for copyrighted computer programs including, but not limited to, the exclusive right to copy or reproduce in any form the copyrighted computer program. Accordingly, any copyrighted Motorola Solutions computer programs contained in the Motorola Solutions products described in this manual may not be copied, reproduced, modified, reverse-engineered, or distributed in any manner without the express written permission of Motorola Solutions. Furthermore, the purchase of Motorola Solutions products shall not be deemed to grant either directly or by implication, estoppel, or otherwise, any license under the copyrights, patents or patent applications of Motorola Solutions, except for the normal non-exclusive license to use that arises by operation of law in the sale of a product.

The AMBE+2™ voice coding Technology embodied in this product is protected by intellectual property rights including patent rights, copyrights and trade secrets of Digital Voice Systems, Inc.

This voice coding Technology is licensed solely for use within this Communications Equipment. The user of this Technology is explicitly prohibited from attempting to decompile, reverse engineer, or disassemble the Object Code, or in any other way convert the Object Code into a human-readable form.

Handling Precautions

The MOTOTRBO Series Digital Portable radio meets IP67 specifications, allowing your radio to withstand adverse field conditions such as being submersed in water. This section describes some basic handling precautions.

CAUTION:
Do not disassemble your radio. This could damage radio seals and result in leak paths into the radio. Radio maintenance should only be done in service depot that is equipped to test and replace the seal on the radio.

- If your radio has been submersed in water, shake your radio well to remove any water that may be trapped inside the speaker grille and microphone port. Trapped water could cause decreased audio performance.
- If your radio's battery contact area has been exposed to water, clean and dry battery contacts on both your radio and the battery before attaching the battery to radio. The residual water could short-circuit the radio.
- If your radio has been submersed in a corrosive substance (for example, saltwater), rinse radio and battery in fresh water then dry radio and battery.
- To clean the exterior surfaces of your radio, use a diluted solution of mild dishwashing detergent and fresh water (for example, one teaspoon of detergent to one gallon of water).
- Never poke the vent (hole) located on the radio chassis below the battery contact. This vent allows for pressure equalization in the radio. Doing so may create a leak path into radio and your radio's submersibility may be lost.
- Never obstruct or cover the vent, even with a label.
- Ensure that no oily substances come in contact with the vent.
- Your radio with antenna attached properly is designed to be submersible to a maximum depth of 1 m (3.28 ft) and a maximum submersion time of 30 minutes. Exceeding either maximum limit or use without antenna may result in damage to your radio.
- When cleaning your radio, do not use a high pressure jet spray on radio as this will exceed the 1 m depth pressure and may cause water to leak into your radio.

This page intentionally left blank.

Introduction

This user guide covers the operation of your radios.

Your dealer or system administrator may have customized your radio for your specific needs. Check with your dealer or system administrator for more information.

You can consult your dealer or system administrator about the following:

- Is your radio programmed with any preset conventional channels?
- Which buttons have been programmed to access other features?
- What optional accessories may suit your needs?
- What are the best radio usage practices for effective communication?
- What maintenance procedures that helps promote longer radio life?

Icon Information

Throughout this publication, the icons described are used to indicate features supported in either the conventional analog or conventional digital mode.

Indicates a conventional **Analog Mode-Only** feature.

Indicates a conventional **Digital Mode-Only** feature.

For features that are available in **both** conventional analog and digital modes, both icons are **not** shown.

Conventional Analog and Digital Modes

Each channel in your radio can be configured as a conventional analog or conventional digital channel.

Certain features are unavailable when switching from digital to analog mode. The icons for digital features reflect this change by appearing “grayed out”. The disabled features are hidden in the menu.

Your radio also has features available in both analog and digital modes. The minor differences in the way each feature works do **not** affect the performance of your radio.

NOTICE:
Your radio also switches between digital and analog modes during a dual mode scan. See Scan on page 343 for more information.

IP Site Connect

This feature allows your radio to extend conventional communication beyond the reach of a single site by connecting to different available sites by using an Internet Protocol (IP) network. This is a conventional multi-site mode.

When the radio moves out of range from one site and into the range of another, the radio connects to the repeater of the new site to send or receive calls or data transmissions. This is done either automatically or manually depending on your settings.

In an automatic site search, the radio scans through all available sites when the signal from the current site is weak or when the radio is unable to detect any signal from the current site. The radio then locks on to the repeater with the strongest Received Signal Strength Indicator (RSSI) value.

In a manual site search, the radio searches for the next site in the roam list that is currently in range but which may not have the strongest signal and locks on to the repeater.

NOTICE:
Each channel can only have either Scan or Roam enabled, not both at the same time.

Channels with this feature enabled can be added to a particular roam list. The radio searches the channels in the roam list during the automatic roam operation to locate the best site. A roam list supports a maximum of 16 channels, including the selected channel.

NOTICE:
You cannot manually add or delete an entry in the roam list. Check with your dealer or system administrator for more information.

Capacity Plus

Capacity Plus is an entry-level trunked system for single and multiple sites. The single and multi-site dynamic trunking offers better capacity and coverage.

Capacity Plus–Single-Site

Capacity Plus–Single-Site is a single-site trunking configuration of the MOTOTRBO radio system, which uses a pool of channels to support hundreds of users and up to 254 Groups. This feature allows your radio to efficiently utilize the available number of programmed channels while in Repeater Mode.

You hear a negative indicator tone if you try to access a feature not applicable to Capacity Plus–Single-Site by using a programmable button press.

Your radio also has features that are available in conventional digital mode, IP Site Connect, and Capacity Plus. However, the minor differences in the way each feature works does not affect the performance of your radio.

Check with your dealer or system administrator for more information on this configuration.

Capacity Plus–Multi-Site

Capacity Plus–Multi-Site is a multi-channel trunking configuration of the MOTOTRBO radio system, combining the best of both Capacity Plus and IP Site Connect configurations.

Capacity Plus–Multi-Site allows your radio to extend trunking communication beyond the reach of a single site, by connecting to different available sites which are connected with an IP network. It also provides an increase in capacity by efficiently utilizing the combined available number of programmed channels supported by each of the available sites.

When the radio moves out of range from one site and into the range of another, it connects to the repeater of the new site to send or receive calls/data transmissions. Depending on your settings, this is done automatically or manually.

If the radio is set to do this automatically, it scans through all available sites when the signal from the current site is weak or when the radio is unable to detect any signal from the current site. It then locks on to the repeater with the strongest RSSI value.

In a manual site search, the radio searches for the next site in the roam list that is currently in range (but which may not have the strongest signal) and locks on to it.

Any channel with Capacity Plus–Multi-Site enabled can be added to a particular roam list. The radio searches these channels during the automatic roam operation to locate the best site.

NOTICE:
You cannot manually add or delete an entry to the roam list. Check with your dealer or system administrator for more information.

Similar to Capacity Plus–Single Site, icons of features not applicable to Capacity Plus–Multi-Site are not available in the menu. You hear a negative indicator tone if you try to access a feature not applicable to Capacity Plus–Multi-Site by using a programmable button press.

Basic Operations

This chapter explains the operations to get you started on using the radio.

Charging the Battery

Your radio is powered by a Nickel Metal-Hydride (NiMH) or Lithium-Ion (Li-Ion) battery.

- To comply with warranty terms and avoid damages, charge the battery using a Motorola Solutions charger exactly as described in the charger user guide.

  All chargers can charge only Motorola Solutions authorized batteries. Other batteries may not charge. Motorola Solutions recommends that your radio remains powered off while charging.
- Charge your IMPRES™ battery with an IMPRES charger for optimized battery life and valuable battery data. IMPRES batteries charged exclusively with IMPRES chargers receive a 6-month capacity warranty extension over the standard Motorola Solutions Premium battery warranty duration.
- Charge a new battery 14 to 16 hours before initial use for best performance.

Attaching the Battery

Follow the procedure to attach the battery to your radio.

This battery mismatch alert feature is only applicable for IMPRES battery and Non-IMPRES battery with kit number programmed in Erasable Programmable Read Only Memory (EPROM).

When the radio is attached with the wrong battery, a low pitched warning tone sounds, the LED blinks in red, display shows `Wrong Battery` and the Voice Announcement/ Text-to-Speech sounds Wrong Battery if the Voice Announcement/Text-to-Speech is loaded by using CPS.

The certification of the radio is voided if you attach a UL battery to an FM approved radio or vice versa. Your radio can be preprogrammed in CPS to alert you if this battery mismatch occurs. Check with your dealer or system administrator to determine how your radio has been programmed.

1. Align the battery with the rails on the back of the radio.

2 Press the battery firmly, and slide upwards until the latch snaps into place.

3 Slide battery latch into lock position.

4 To remove the battery, turn the radio off. Move the battery latch marked **A** into unlock position and hold, and slide the battery down and off the rails.

Attaching the Antenna

Follow the procedure to attach the antenna to your radio.

Ensure that the radio is turned off.

Set the antenna in the receptacle and turn clockwise.

NOTICE:
To remove the antenna, turn the antenna counterclockwise.

CAUTION:
If the antenna must be replaced, ensure that only MOTOTRBO antennas are used. Neglecting this damages your radio.

Attaching the Carry Holster

Follow the procedure to attach the carry holster to your radio.

1 Align the rails on the carry holster with the grooves on the battery.

2 Press downwards until you hear a click.

Attaching the Universal Connector Cover (Dust Cover)

The universal connector is located on the antenna side of the radio. It is used to connect MOTOTRBO accessories to the radio. Follow the procedure to attach the dust cover to your radio.

Replace the dust cover when the universal connector is not in use.

1 Insert the slanted end of the cover into the slots above the universal connector.

2 Press downwards on the cover to seat the dust cover properly on the universal connector.

3 Secure the connector cover to the radio by turning the thumbscrew clockwise.

Cleaning the Universal Connector Cover (Dust Cover)

If the radio is exposed to water, dry the universal connector before attaching an accessory or replacing the dust cover. If the radio is exposed to salt water or contaminants, perform the following cleaning procedure.

1 Mix one tablespoon of mild dishwashing detergent with one gallon of water to produce a 0.5 percent solution.

2 Clean only the external surfaces of the radio with the solution. Apply the solution sparingly with a stiff, nonmetallic, short-bristled brush.

3 Dry the radio thoroughly with a soft and lint-free cloth. Ensure the contact surface of the universal connector is clean and dry.

4 Apply Deoxit Gold Cleaner or Lubricant Pen (Manufacturer CAIG Labs, Part number G100P) on the contact surface of the universal connector.

5 Attach an accessory to the universal connector to test the connectivity.

NOTICE:
Do not submerge the radio in water. Ensure excess detergent does not get trapped in between the universal connector, controls, or crevices.

Clean the radio once a month for maintenance. For a harsher environment such as in petrochemical plants or in a high salt density marine environment, clean the radio more often.

Removing the Universal Connector Cover (Dust Cover)

Follow the procedure to remove the dust cover from your radio.

1. Push the latch downwards.
2. Lift the cover up and slide down the dust cover from the universal connector to remove it.

Replace the dust cover when the universal connector is not in use.

Powering Up the Radio

Follow the procedure to power up your radio.

Rotate the **On/Off/Volume Control Knob** clockwise until a click sounds.

If successful:

- A tone sounds.
- The green LED lights up.
- The display shows `MOTOTRBO (TM)`, followed by a welcome message or image.
- The Home screen lights up.

If the Tones/Alerts function is disabled, there is no tone upon powering up.

NOTICE:
During the initial power-up after a software version update to **R02.07.00.0000** or later, a GNSS firmware upgrade takes place for 20 seconds. After the upgrade, the radio resets and turns on. This firmware upgrade is only applicable for portable models with the latest software and hardware.

Check your battery if your radio does not power up. Make sure that it is charged and properly attached. Contact your dealer if your radio still does not power up.

Powering Off the Radio

Follow the procedure to power off your radio.

Rotate the **On/Off/Volume Control Knob** counterclockwise until a click sounds.

The display shows `Powering Down`.

Adjusting the Volume

Follow the procedure to change the volume level of your radio.

Do one of the following:

- Turn the **On/Off/Volume Control Knob** clockwise to increase the volume.
- Turn the **On/Off/Volume Control Knob** counterclockwise to decrease the volume.

NOTICE:
Your radio can be programmed to have a minimum volume offset where the volume level cannot be lowered past the programmed minimum volume. Check with your dealer or system administrator for more information.

Radio Controls

This chapter explains the buttons and functions to control the radio.

1 Channel Selector Knob

2 On/Off/Volume Control Knob

3 LED Indicator

4 Side Button 1[1]

5 Push-to-Talk (PTT) Button

6 Side Button 2[1]

7 Side Button 3[1]

8 Front Button P1[1]

9 Menu/OK Button

10 4-Way Navigation Button

11 Back/Home Button

12 Front Button P2[1]

13 Display

14 Microphone

15 Speaker

16 Universal Connector for Accessories

17 Emergency Button[1]

18 Antenna

[1] These buttons are programmable.

Using the 4–Way Navigation Button

You can use the 4–way navigation button, , to scroll through options, increase/decrease values, and navigate vertically.

Category	Direction	
	▲ or ▼	◀ or ▶
Menu	Vertical Navigation	-
Lists	Vertical Navigation	-
View Details	Vertical Navigation	Previous/Next Item

You can use the 4–way navigation button, , as a number, alias, or free form text editor.

Editor Category	Direction	
	▲ or ▼	◀ or ▶
Number	-	Left : Delete last digit Right : -
Alias	-	-
Free Form Text	Move cursor up/down	Move cursor one character right/left
Numeric Values	Increase/Decrease	Move cursor one character right/left

Table continued…

WAVE

Wide Area Voice Environment (WAVE™) provides a new method of making calls between two radios.

This feature also supports calls between radios and other devices with WAVE capabilities. However, a WAVE channel must be set up to use this feature.

When in a WAVE channel, the radio is unable to receive calls from other systems and can only receive WAVE calls.

If the radio is in a WAVE channel, the radio enables Wi-Fi automatically and proceeds to log into the WAVE server. WAVE calls are made when the radio is connected to an IP network through Wi-Fi.

NOTICE:
This feature is applicable to DP4601e only.

Table 1: WAVE Display Icons

The following icons appear momentarily on the display when WAVE is enabled.

	WAVE Connected WAVE is connected.

Table continued…

	WAVE Disconnected WAVE is disconnected.

Setting Active WAVE Channel

WAVE channels are configured through CPS. Follow the procedure to select the required WAVE channel.

1. Press OK to access the menu.
2. Press ▲ or ▼ to `WAVE Channels`. Press OK to select.
3. Press ▲ or ▼ to the required WAVE channel.

   Press OK to select.
4. Press ▲ or ▼ to `Set As Active`. Press OK to select.

The display shows ✓ beside the selected channel.

Viewing WAVE Channel Information

Follow the procedure to view WAVE channel information.

1 Do one of the following:
   - Press the programmed **WAVE Channel List** button. Skip the following steps.
   - Press OK to access the menu.

2 Press ▲ or ▼ to `WAVE Channels`. Press OK to select.

3 Press ▲ or ▼ to the required WAVE channel.

   Press OK to select.

4 Press ▲ or ▼ to `View Details`. Press OK to select.

The display shows the WAVE channel details.

Viewing WAVE Endpoints Information

Follow the procedure to view WAVE Endpoints information.

1 Do one of the following:
   - Press the programmed **Contact** button. Skip to step 3.
   - Press OK to access the menu.

2 Press ▲ or ▼ to `Endpoints`. Press OK to select.

3 Press ▲ or ▼ to the required WAVE Endpoint.

   Press OK to select.

4 Press OK to select `View Details`.

The display shows the WAVE Endpoint details.

Making Group Calls

Follow the procedure to make group calls on a WAVE Channel.

1 Select the WAVE channel with the required group alias or ID.

2 Press the **PTT** button to make the call.

The green LED lights up. The first text line displays the **Group Call** icon and alias. The second text line displays the WAVE group alias.

3 Do one of the following:

- Wait for the Talk Permit Tone to end and speak clearly into the microphone if enabled.
- Wait for the **PTT** Sidetone to end and speak clearly into the microphone if enabled

4 Release the **PTT** button to listen.

The green LED lights up when the target radio responds.The display shows the **Group Call** icon, and alias or ID, and the transmitting radio alias or ID.

5 If the Channel Free Indication feature is enabled, you hear a short alert tone the moment the transmitting radio releases the **PTT** button, indicating the channel is free for you to respond. Press the **PTT** button to respond to the call.

The call ends when there is no voice activity for a predetermined period. The radio returns to the screen you were on prior to initiating the call.

This page intentionally left blank.

Capacity Max Operations

Capacity Max is a control channel-based trunked radio system. Features that are available to the radio users under this system are available in this chapter.

Push-To-Talk Button

The Push-to-Talk **(PTT)** button serves two basic purposes:

- While a call is in progress, the **PTT** button allows the radio to transmit to other radios in the call. The microphone is activated when the **PTT** button is pressed.
- While a call is not in progress, the **PTT** button is used to make a new call.

Long press the **PTT** button to talk. Release the **PTT** button to listen.

If the Talk Permit Tone is enabled, wait until the short alert tone ends before talking.

Programmable Buttons

Depending on the duration of a button press, your dealer can program the programmable buttons as shortcuts to radio functions.

Short press
Pressing and releasing rapidly.

Long press
Pressing and holding for the programmed duration.

NOTICE:
See Emergency Operation on page 363 for more information on the programmed duration of the **Emergency** button.

Assignable Radio Functions

The following radio functions can be assigned to the programmable buttons by your dealer or system administrator.

Audio Profiles
Allows the user to select the preferred audio profile.

Audio Routing
Toggles audio routing between internal and external speakers.

Audio Toggle
Toggles audio routing between the internal radio speaker and the speaker of a wired accessory.

Bluetooth® Audio Switch
Toggles audio routing between internal radio speaker and external Bluetooth-enabled accessory.

Bluetooth Connect
Initiates a Bluetooth find-and-connect operation.

Bluetooth Disconnect
Terminates all existing Bluetooth connections between your radio and any Bluetooth-enabled devices.

Bluetooth Discoverable
Enables your radio to enter Bluetooth Discoverable Mode.

Contacts
Provides direct access to the Contacts list.

Call Alert
Provides direct access to the contacts list for you to select a contact to whom a Call Alert can be sent.

Call Log
Selects the call log list.

Emergency
Depending on the programming, initiates or cancels an emergency.

Indoor Location
Toggles Indoor Location on or off.

Intelligent Audio
Toggles intelligent audio on or off.

Manual Dial
Initiates a Private Call by keying in any subscriber ID.

Manual Site Roam
Starts the manual site search.

Mic AGC
Toggles the internal microphone automatic gain control (AGC) on or off.

Notifications
Provides direct access to the Notifications list.

One Touch Access
Directly initiates a predefined Broadcast, Private, Phone or Group Call, a Call Alert, or a Quick Text message.

Option Board Feature
Toggles option board feature(s) on or off for option board-enabled channels.

Phone
Provides direct access to the Phone Contacts list.

Privacy
Toggles privacy on or off.

Radio Alias and ID
Provides radio alias and ID.

Remote Monitor
Turns on the microphone of a target radio without it giving any indicators.

Reset Home Channel
Sets a new home channel.

Silence Home Channel Reminder
Mutes the Home Channel Reminder.

Site Info
Displays the current Capacity Max site name and ID.

Plays site announcement voice messages for the current site when Voice Announcement is enabled.

Site Lock
When toggled on, the radio searches the current site only. When toggled off, the radio searches other sites in addition to the current site.

Status
Selects the status list menu.

Telemetry Control
Controls the Output Pin on a local or remote radio.

Text Message
Selects the text message menu.

Trill Enhancement
Toggles trill enhancement on or off.

Voice Announcement On/Off
Toggles voice announcement on or off.

Wi-Fi
Toggles Wi-Fi on or off.

Zone Selection
Allows selection from a list of zones.

Assignable Settings or Utility Functions

The following radio settings or utility functions can be assigned to the programmable buttons.

Tones/Alerts
Toggles all tones and alerts on or off.

Backlight
Toggles display backlight on or off.

Backlight Brightness
Adjusts the brightness level.

Power Level
Toggles transmit power level between high and low.

Accessing Programmed Functions

Follow the procedure to access programmed functions in your radio.

1 Do one of the following:
   - Press the programmed button. Proceed to step 3.
   - Press OK to access the menu.

2 Press ▲ or ▼ to the menu function, and press OK to select a function or enter a sub-menu.

3 Do one of the following:
   - Press ↩ to return to the previous screen.
   - Long press ↩ to return to the Home screen.

Your radio automatically exits the menu after a period of inactivity and returns to the Home screen.

Status Indicators

This chapter explains the status indicators and audio tones used in the radio.

Icons

The radio display shows radio status, text entries, and menu entries. The following are the icons that appear on the radio display.

Table 2: Display Icons

The following icons appear on the status bar at the top of the radio display. The icons are arranged left most in order of appearance or usage, and are channel-specific.

	Battery The number of bars (0–4) shown indicates the charge remaining in the battery. The icon blinks when the battery is low.

Table continued…

	Bluetooth Connected The Bluetooth feature is enabled. The icon stays lit when a remote Bluetooth device is connected.
	Bluetooth Not Connected The Bluetooth feature is enabled but there is no remote Bluetooth device connected.
	Emergency Radio is in Emergency mode.
	GNSS Available GNSS feature is enabled. The icon stays lit when a position fix is available.
	GNSS Not Available GNSS feature is enabled but is not receiving data from the satellite.

Table continued…

	High Volume Data Radio is receiving high volume data and channel is busy.
	Indoor Location Available [2] Indoor location status is on and available.
	Indoor Location Unavailable[2] Indoor location status is on but unavailable due to Bluetooth disabled or Beacons Scan suspended by Bluetooth.
	Mute Mode Mute Mode is enabled and speaker is muted.
	Notification Notification List has one or more missed events.

Table continued…

[2] Only applicable for models with the latest software and hardware.

	Option Board The Option Board is enabled. (Option board enabled models only)
	Option Board Non-Function The Option Board is disabled.
5	**Over-the-Air Programming Delay Timer** Indicates time left before automatic restart of radio.
L or H	**Power Level** Radio is set at Low power or Radio is set at High power.
1	**Priority 1** Indicates Priority Talkgroup 1.
2	**Priority 2** Indicates Priority Talkgroup 2.

Table continued…

	Received Signal Strength Indicator (RSSI) The number of bars displayed represents the radio signal strength. Four bars indicate the strongest signal. This icon is only displayed while receiving.
	Response Inhibit Response Inhibit is enabled.
	Ring Only Ringing mode is enabled.
	Secure The Privacy feature is enabled.
	Silent Ring Silent ring mode is enabled.
	Site Roaming The site roaming feature is enabled.
	Status Indicates a new status message.

Table continued…

	Tones Disable Tones are turned off.
	Unsecure The Privacy feature is disabled.
	Vibrate Vibrate mode is enabled.
	Vibrate and Ring Vibrate and Ring mode is enabled.
	Wi-Fi Excellent [3] Wi-Fi signal is excellent.
	Wi-Fi Good[3] Wi-Fi signal is good.
	Wi-Fi Average[3] Wi-Fi signal is average
	Wi-Fi Poor[3] Wi-Fi signal is poor.

Table continued…

	Wi-Fi Unavailable[3] Wi-Fi signal is unavailable.

Table 3: Advance Menu Icons

The following icons appear beside menu items that offer a choice between two options or as an indication that there is a sub-menu offering two options.

	Checkbox (Checked) Indicates that the option is selected.
	Checkbox (Empty) Indicates that the option is not selected.
	Solid Black Box Indicates that the option selected for the menu item with a sub-menu.

[3] Only applicable for DP4601e

Table 4: Bluetooth Device Icons

The following icons appear next to items in the list of Bluetooth-enabled devices available to indicate the device type.

	Bluetooth Audio Device Bluetooth-enabled audio device, such as a headset.
	Bluetooth Data Device Bluetooth-enabled data device, such as a scanner.
	Bluetooth PTT Device Bluetooth-enabled PTT device, such as a PTT-Only Device (POD).

Table 5: Call Icons

The following icons appear on the display during a call. These icons also appear in the Contacts list to indicate alias or ID type.

	Bluetooth PC Call Indicates a Bluetooth PC Call in progress. In the Contacts list, it indicates a Bluetooth PC Call alias (name) or ID (number).
	Dispatch Call The Dispatch Call contact type is used to send a text message to a dispatcher PC through a third-party Text Message Server.
	Group Call/All Call Indicates a Group Call or All Call in progress. In the Contacts list, it indicates a group alias (name) or ID (number).
	Non-IP Peripheral Individual call Indicates a Non-IP Peripheral individual call in progress. In the Contacts list, it indicates a subscriber alias (name) or ID (number).
	Non-IP Peripheral Group call Indicates a Non-IP Peripheral group call in progress.

Table continued…

Table continued…

	In the Contacts list, it indicates a group alias (name) or ID (number).
	Option Board Individual Call Indicates an Option Board individual call in progress. In the Contacts list, it indicates a subscriber alias (name) or ID (number).
	Option Board Group Call Indicates an Option Board group call in progress. In the Contacts list, it indicates a group alias (name) or ID (number).
	Phone Call as Group/All Call Indicates a Phone Call as Group Call or All Call in progress. In the Contacts list, it indicates a group alias (name) or ID (number).
	Phone Call as Private Call Indicates a Phone Call as Private Call in progress. In the Contacts list, it indicates a phone alias (name) or ID (number).
	Private Call Indicates a Private Call in progress. In the Contacts list, it indicates a subscriber alias (name) or ID (number).

Table continued…

Table 6: Mini Notice Icons

The following icons appear momentarily on the display after an action to perform a task is taken.

	Failed Transmission (Negative) Failed action taken.
	Successful Transmission (Positive) Successful action taken.
	Transmission in Progress (Transitional) Transmitting. This is seen before indication for Successful Transmission or Failed Transmission.

Table 7: Sent Items Icons

The following icons appear at the top right corner of the display in the Sent Items folder.

or	**In Progress** The text message to a subscriber alias or ID is pending transmission, followed by waiting for acknowledgement. The text message to a group alias or ID is pending transmission.
or	**Individual or Group Message Read** The text message has been read.
or	**Individual or Group Message Unread** The text message has not been read.

Table continued…

or	**Send Failed** The text message cannot be sent.
or	**Sent Successfully** The text message has been successfully sent.

LED Indicator

The LED indicator shows the operational status of your radio.

Blinking Red

Radio has failed the self-test upon powering up.

Radio is receiving an emergency transmission.

Radio is transmitting in low battery state.

Radio has moved out of range if Auto-Range Transponder System is configured.

Mute Mode is enabled.

Solid Green

Radio is powering up.

Radio is transmitting.

Radio is sending a Call Alert or an emergency transmission.

Blinking Green

Radio is receiving a call or data.

Radio is retrieving Over-the-Air Programming transmissions over the air.

Radio is detecting activity over the air.

NOTICE:
This activity may or may not affect the programmed channel of the radio due to the nature of the digital protocol.

Double Blinking Green

Radio is receiving a privacy-enabled call or data.

Solid Yellow

Radio is in Bluetooth Discoverable Mode.

Blinking Yellow

Radio has yet to respond to a Call Alert.

Double Blinking Yellow

Radio has Auto Roaming enabled.

Radio is actively searching for a new site.

Radio has yet to respond to a Group Call Alert.

Radio is locked.

Tones

The following are the tones that sound through on the radio speaker.

High Pitched Tone

Low Pitched Tone

Audio Tones

Audio tones provide you with audible indications of the status, or response to data received on the radio.

Continuous Tone

A monotone sound. Sounds continuously until termination.

Periodic Tone

Sounds periodically depending on the duration set by the radio. Tone starts, stops, and repeats itself.

Repetitive Tone

A single tone that repeats itself until it is terminated by the user.

Momentary Tone

Sounds once for a short duration set by the radio.

Indicator Tones

Indicator tones provide you with audible indications of the status after an action to perform a task is taken.

Positive Indicator Tone

Negative Indicator Tone

Registration

There are a number of registration-related messages that you may receive.

Registering

Typically, registration is sent to the system during power-up, Talkgroup change, or during site roaming. If a radio fails registration on a site, the radio automatically attempts to roam to another site. The radio temporarily removes the site where registration was attempted from the roaming list.

The indication means that the radio is busy searching for a site to roam, or that the radio has found a site successfully but is waiting for a response to the registration messages from the radio.

When `Registering` is displayed on the radio, a tone sounds and the yellow LED double flashes to indicate a site search.

If the indications persist, the user should change locations or if allowed, manually roam to another site.

Out of Range

A radio is deemed to be out of range when the radio is unable to detect a signal from the system or from the current site. Typically, this indication means that the radio is outside of the geographic outbound radio frequency (RF) coverage range.

When `Out of Range` is displayed on the radio, a repetitive tone sounds and the red LED flashes.

Contact your dealer or system administrator if the radio still receives out of range indications while being in an area with good RF coverage.

Talkgroup Affiliation Failed

A radio tries to affiliate to the Talkgroup specified in the channels or Unified Knob Position (UKP) during registration.

A radio that is in affiliation fail state is unable to make or receive calls from the Talkgroup that the radio is trying to affiliate to.

When a radio fails to affiliate with a Talkgroup, `UKP Alias` is displayed in the home screen with a highlighted background.

Contact your dealer or system administrator if the radio receives affiliation failure indications.

Register Denied

Registration denied indicators are received when the registration with the system is not accepted.

The radio does not indicate to the radio user the specific reason the registration was denied. Normally, a registration is denied when the system operator has disabled the access of the radio to the system.

When a radio is denied registration, `Register Denied` is displayed on the radio and the yellow LED double flashes to indicate a site search.

Zone and Channel Selections

This chapter explains the operations to select a zone or channel on your radio.

The radio can be programmed with a maximum of 250 Capacity Max Zones with a maximum of 160 Channels per zone. Each Capacity Max zone contains a maximum of 16 assignable positions.

Selecting Zones

Follow the procedure to select the required zone on your radio.

1 Do one of the following:

- Press the programmed **Zone Selection** button. Proceed to step 3.
- Press OK to access the menu.

2 Press ▲ or ▼ to `Zone`. Press OK to select.

The display shows ✓ and the current zone.

3 Press ▲ or ▼ to the required zone. Press OK to select.

The display shows `<Zone> Selected` momentarily and returns to the selected zone screen.

Selecting a Call Type

Use the Channel Selector Knob to select a call type. This can be a Group Call, Broadcast Call, All Call, or Private Call, depending on how your radio is programmed. If you change the Channel Selector Knob to a different position (that has a call type assigned to it), this causes the radio to re-register with the Capacity Max System. The radio registers with the Talkgroup ID that has been programmed for the new Channel Selector Knob position call type.

Your radio does not operate when selected to an unprogrammed channel, use the Channel Selector Knob to select a programmed channel instead.

Once the required zone is displayed (if you have multiple zones in your radio), turn the programmed Channel Selector Knob to select the call type.

Selecting a Site

A site provides coverage for a specific area. In a multi-site network, the Capacity Max radio will automatically search for a new site when the signal level from the current site drops to an unacceptable level.

The Capacity Max system can support up to 250 sites.

Roam Request

A Roam Request tells the radio to search for a different site, even if the signal from the current site is acceptable.

If there are no sites available:

- The radio display shows `Searching` and continues to search through the list of sites.
- The radio will return to the previous site, if the previous site is still available.

NOTICE:
This is programmed by your dealer.

Press the programmed **Manual Site Roam** button.

You hear a tone, indicating the radio has switched to a new site. The display shows `Site ID <Site Number>`.

Site Lock On/Off

When toggled on, the radio searches the current site only. When toggled off, the radio searches other sites in addition to the current site.

Press the programmed **Site Lock** button.

If the **Site Lock** function is toggled on:

- You hear a positive indicator tone, indicating the radio has locked to the current site.
- The display shows `Site Locked`.

If the **Site Lock** function is toggled off:

- You hear a negative indicator tone, indicating the radio is unlocked.
- The display shows `Site Unlocked`.

Site Restriction

In Capacity Max system, your radio administrator has the ability to decide which network sites your radio is and is not allowed to use.

The radio does not have to be reprogrammed to change the list of allowed and disallowed sites. If your radio attempts to register at a disallowed site, your radio receives indication that the site is denied. The radio then searches for a different network site.

When experiencing site restrictions, your radio displays `Register Denied` and the yellow LED double flashes to indicate a site search.

Site Trunking

A site must be able to communicate with the Trunk Controller to be considered as System Trunking.

If the site cannot communicate with the Trunk Controller in the system, a radio enters Site Trunking mode. While in Site Trunking, the radio provides a periodic audible and visual indication to the user to inform the user of their limited functionality.

When a radio is in Site Trunking, the radio displays `Site Trunking` and a repetitive tone sounds.

The radios in Site Trunking are still able to make group and individual voice calls as well as send text messages to other radios within the same site. Voice consoles, logging recorders, phone gateways, and data applications cannot communicate to the radios at the site.

Once in Site Trunking, a radio that is involved in calls across multiple sites will only be able to communicate with other radios within the same site. Communication to and from other sites would be lost.

NOTICE:
If there are multiple sites that cover the current location of the radio and one of the sites enters Site Trunking, the radio roams to another site if within coverage.

Calls

This chapter explains the operations to receive, respond to, make, and stop calls.

You can select a subscriber alias or ID, or group alias or ID after you have selected a channel by using one of these features:

Alias Search
This method is used for Group, Private, and All Calls only with a keypad microphone.

Contacts List
This method provides direct access to the Contacts list.

Manual Dial (by using Contacts)
This method is used for Private and Phone Calls only with a keypad microphone.

Programmed Number Keys
This method is used for Group, Private, and All Calls only with a keypad microphone.

NOTICE:
You can only have one alias or ID assigned to a number key, but you can have more than one number key associated to an alias or ID. All the number keys on a keypad microphone can be assigned. See Assigning Entries to Programmable Number Keys on page 348 for more information.

Programmed One Touch Access Button
This method is used for Group, Private, and Phone Calls only.

You can only have one ID assigned to a **One Touch Access** button with a short or long programmable button press. Your radio can have multiple **One Touch Access** buttons programmed.

Programmable Button
This method is used for Phone Calls only.

Group Calls

Your radio must be configured as part of a group to receive a call from or make a call to the group of users.

Making Group Calls

Follow the procedure to make Group Calls on your radio.

1 Do one of the following:

- Select a channel with the active group alias or ID. See Selecting a Call Type on page 64.
- Press the programmed **One Touch Access** button.

2 Press the **PTT** button to make the call.

The green LED lights up. The first text line shows the **Group Call** icon and alias.

3 Do one of the following:

- Wait for the Talk Permit Tone to end and speak clearly into the microphone if enabled.
- Wait for the **PTT** Sidetone to end and speak clearly into the microphone if enabled.

4 Release the **PTT** button to listen.

The green LED lights up when the target radio responds. The display shows the **Group Call** icon, and alias or ID, and the transmitting radio alias or ID.

5 If the Channel Free Indication feature is enabled, you hear a short alert tone the moment the transmitting radio releases the **PTT** button, indicating the channel is free for you to respond. Press the **PTT** button to respond to the call.

The call ends when there is no voice activity for a predetermined period.

The call initiator can press to end a Group Call.

Making Group Calls by Using the Contacts List

Follow the procedure to make Group Calls on your radio by using the Contacts list.

1 Press OK to access the menu.

2 Press ▲ or ▼ to `Contacts`. Press OK to select.

3 Press ▲ or ▼ to the required alias or ID. Press OK to select.

4 Press the **PTT** button to make the call.

The green LED lights up.
The first line displays the subscriber alias or ID. The second line displays `Group Call` and the **Group Call** icon.

5 Do one of the following:

- Wait for the Talk Permit Tone to end and speak clearly into the microphone if enabled.
- Wait for the **PTT** Sidetone to end and speak clearly into the microphone if enabled.

6 Release the **PTT** button to listen.

The green LED lights up when the target radio responds. The display shows the **Group Call** icon, and alias or ID, and the transmitting radio alias or ID.

7 If the Channel Free Indication feature is enabled, you hear a short alert tone the moment the transmitting radio releases the **PTT** button, indicating the channel is free for you to respond. Press the **PTT** button to respond to the call.

The call ends when there is no voice activity for a predetermined period.

The call initiator can press ⮌ to end the Group Call.

You hear a short tone. The display shows `Call Ended`.

Responding to Group Calls

Follow the procedure to respond to Group Calls on your radio.

When you receive a Group Call:

- The green LED blinks.
- The display shows the **Group Call** icon at the top right corner.
- The first text line shows the caller alias.

- The second text line displays the group call alias.
- Your radio unmutes and the incoming call sounds through the speaker.

1 Do one of the following:
   - If the Channel Free Indication feature is enabled, you hear a short alert tone the moment the transmitting radio releases the **PTT** button, indicating the channel is free for you to respond. Press the **PTT** button to respond to the call.
   - If the Voice Interrupt feature is enabled, press the **PTT** button to interrupt the audio from the transmitting radio and free the channel for you to respond.

   The green LED lights up.

2 Do one of the following:
   - Wait for the Talk Permit Tone to end and speak clearly into the microphone if enabled.
   - Wait for the **PTT** Sidetone to end and speak clearly into the microphone if enabled.

3 Release the **PTT** button to listen.

The call ends when there is no voice activity for a predetermined period.

Broadcast Call

A Broadcast Call is a one-way voice call from any user to an entire talkgroup.

The Broadcast Call feature allows only the call initiating user to transmit to the talkgroup, while the recipients of the call cannot respond.

The broadcast initiator can also end the broadcast call. To receive a call from a group of users, or to call a group of users, the radio must be configured as part of a group.

Making Broadcast Calls

Follow the procedure to make Broadcast Calls on your radio.

1 Do one of the following:
   - Select a channel with the active group alias or ID. See Selecting a Call Type on page 64.
   - Press the programmed **One Touch Access** button.

2 Press the **PTT** button to make the call.

The green LED lights up. The display shows the **Group Call** icon and alias.

3 Do one of the following:

- Wait for the Talk Permit Tone to end and speak clearly into the microphone if enabled.
- Wait for the **PTT** Sidetone to end and speak clearly into the microphone if enabled.

The call initiator can press to end the Broadcast Call.

Making Broadcast Calls Using the Contact List

Follow the procedure to make Broadcast Calls on your radio using the Contacts list.

1 Press OK to access the menu.

2 Press ▲ or ▼ to `Contacts`. Press OK to select.

3 Press ▲ or ▼ to the required alias or ID. Press OK to select.

4 Press the **PTT** button to make the call.

The green LED blinks.
The first line displays the subscriber alias or ID. The second line displays `Group Call` and the **Group Call** icon.

5 Do one of the following:

- Wait for the Talk Permit Tone to end and speak clearly into the microphone if enabled.
- Wait for the **PTT** Sidetone to end and speak clearly into the microphone if enabled.

The call initiator can press to end the Broadcast Call.

Receiving Broadcast Calls

Follow the procedure to receive a Broadcast Call on your radio.

When you receive a Broadcast Call:

- The green LED blinks.
- The display shows the **Group Call** icon at the top right corner.
- The first text line shows the caller alias.
- The second text line displays the group call alias.
- Your radio unmutes and the incoming call sounds through the speaker.

NOTICE:
Recipient users are not allowed to Talkback during a Broadcast Call. The display shows `Talkback Prohibit`. The Talkback Prohibit Tone will sound momentarily if the **PTT** button is pressed during a Broadcast Call.

Private Call

A Private Call is a call from an individual radio to another individual radio.

There are two ways to set up a Private Call.

- The first call type is called Off Air Call Set-Up (OACSU). OACSU sets up the call after performing a radio presence check and completes the call automatically.
- The second type is called Full Off Air Call Set-Up (FOACSU). FOACSU also sets up the call after performing a radio presence check. However, FOACSU calls require user acknowledgment to complete the call and allows the user to either Accept or Decline the call.

The type of call is configured by the system administrator.

If the target radio is not available prior to setting up the Private Call, the following occur:

- A tone sounds.
- The display shows a negative mini notice.
- The radio returns to the menu prior to initiating the radio presence check.

NOTICE:
Both the call initiator and recipient are able to terminate an on-going Private Call by pressing .

Making Private Calls

Your radio must be programmed for you to initiate a Private Call. If this feature is not enabled, you hear a negative indicator tone when you initiate the call. Follow the procedure to make Private Calls on your radio. If the target radio is not available, a short tone sounds and the display show `Party Not Available`.

1 Do one of the following:
   - Select a channel with the active subscriber alias or ID. See Selecting a Call Type on page 64.
   - Press the programmed **One Touch Access** button.

2 Press the **PTT** button to make the call.

   The green LED lights up. The display shows the **Private Call** icon, the subscriber alias, and call status.

3 Wait for the Talk Permit Tone to end and speak clearly into the microphone if enabled.

4 Release the **PTT** button to listen.

   The green LED lights up when the target radio responds.

5 The call ends when there is no voice activity for a predetermined period. You will hear a short tone. The display shows `Call Ended`.

   Both the call initiator and recipient are able to terminate an on-going Private Call by pressing .

Making a Private Call with a One Touch Call Button

The One Touch Call feature allows you to easily make a Private Call to a pre-defined Private Call alias or ID. This feature can be assigned to a short or long programmable button press.

You can only have one alias or ID assigned to a One Touch Call button. Your radio can have multiple One Touch Call buttons programmed.

1 Press the programmed **One Touch Call** button to make a Private Call to the pre-defined Private Call alias or ID.

2 Press the **PTT** button to make the call.

The LED lights up solid green.

The display shows the Private Call alias or ID.

3 Wait for the Talk Permit Tone to finish (if enabled) and speak clearly into the microphone.

4 Release the **PTT** button to listen.

When the target radio responds, the LED blinks green.

If there is no voice activity for a predetermined period of time, the call ends.

Both the call initiator and recipient are able to terminate an on-going Private Call by pressing .

Making Private Calls by Using the Manual Dial

Follow the procedure to make Private Calls on your radio by using the manual dial.

1 Press OK to access the menu.

2 Press ▲ or ▼ to `Contacts`. Press OK to select.

3 Press ▲ or ▼ to `Manual Dial`. Press OK to select.

4 Press ▲ or ▼ to `Radio Number`. Press OK to select.

5 Do one of the following:

- Enter the subscriber ID, and press OK to proceed.

- Edit the previously dialed subscriber ID, and press OK to proceed.

6 Press the **PTT** button to make the call.

The green LED lights up. The display shows the destination alias.

7 Wait for the Talk Permit Tone to end and speak clearly into the microphone if enabled.

8 Release the **PTT** button to listen.

The green LED lights up when the target radio responds. The display shows the transmitting user alias or ID.

9 If the Channel Free Indication feature is enabled, you hear a short alert tone the moment the transmitting radio releases the **PTT** button, indicating the channel is free for you to respond. Press the **PTT** button to respond to the call.

The call ends when there is no voice activity for a predetermined period. A tone sounds. The display shows `Call Ended`.

Receiving Private Calls

When you receive Private Calls configured as Off Air Call Set-Up (OACSU):

- The green LED blinks.
- The **Private Call** icon appears in the top right corner.
- The first text line shows the caller alias.
- Your radio unmutes and the incoming call sounds through the speaker.

NOTICE:
Depending on how your radio is configured, either OACSU or Full Off Air Call Set-Up (FOACSU), responding to Private Calls may or may not require user acknowledgment.

For the OACSU configuration, your radio unmutes and the call connects automatically.

Accepting Private Calls

When you receive Private Calls configured as Full Off Air Call Set-Up (FOACSU):

- The green LED blinks.
- The **Private Call** icon appears in the top right corner.

- The first text line shows the caller alias.

1 To accept a Private Call configured as FOACSU, do one of the following:

   - Press ▲ or ▼ to `Accept` and press OK to answer a Private Call.
   - Press the **PTT** button on any entry.

   The green LED lights up.

2 Wait for the Talk Permit Tone to end and speak clearly into the microphone if enabled.

3 Release the **PTT** button to listen.

   The call ends when there is no voice activity for a predetermined period. A tone sounds. The display shows `Call Ended`.

   NOTICE:
   Both the call initiator and recipient are able to terminate an on-going Private Call by pressing .

Declining Private Calls

When you receive Private Calls configured as Full Off Air Call Set-Up (FOACSU):

- The green LED blinks.
- The **Private Call** icon appears in the top right corner.
- The first text line shows the caller alias.

To decline a Private Call configured as FOACSU, do one of the following:

- Press ▲ or ▼ to `Reject` and press OK to decline a Private Call.
- Press to decline a Private Call.

All Calls

An All Call is a call from an individual radio to every radio on the site or every radio at a group of sites, depending on system configuration.

An All Call is used to make important announcements, requiring full attention from the user. The users on the system cannot respond to an All Call.

Capacity Max supports Site All Call and Multi-site All Call. The system administrator may configure one or both of these in your radio.

NOTICE:
Subscribers can support System-Wide All Calls but Motorola Solutions infrastructure does not support System-Wide All Calls.

Making All Calls

Your radio must be programmed for you to make an All Call. Follow the procedure to make All Calls on your radio.

1. Select a channel with the active All Call group alias or ID. See Selecting a Call Type on page 64.
2. Press the **PTT** button to make the call.

   The green LED lights up.The display shows the **Group Call** icon and either `All Call`, `Site All Call`, or `Multi Site Call` depending on the type of configuration.
3. Do one of the following:
   - Wait for the Talk Permit Tone to end and speak clearly into the microphone if enabled.
   - Wait for the **PTT** Sidetone to end and speak clearly into the microphone if enabled.

   Users on the channel cannot respond to an All Call.

   The call initiator can press to end the All Call.

Receiving All Calls

When you receive an All Call, the following occur:

- A tone sounds.
- The green LED blinks.
- The display shows the **Group Call** icon at the top right corner.
- The first text line shows the caller alias ID.
- The second text line displays either `All Call`, `Site All Call`, or `Multi Site Call` depending on the type of configuration.
- Your radio unmutes and the incoming call sounds through the speaker.

The radio returns to the screen before receiving the All Call when the call ends.

If the Channel Free Indication feature is enabled, you hear a short alert tone when the transmitting radio releases the **PTT** button, indicating the channel is free for you to use. You cannot respond to an All Call.

NOTICE:
The radio stops receiving the All Call if you switch to a different channel while receiving the call. You are not able to continue with any menu navigation or editing until the call ends during an All Call.

Phone Calls

A Phone Call is a call from an individual radio to a telephone.

In Capacity Max, your radio is able to receive calls and talkback even if the Phone Call capability is disabled.

The Phone Call capability can be enabled by assigning and setting up phone numbers on the system. Check with your system administrator to determine how your radio has been programmed.

Making Phone Calls with the Programmable Phone Button

Follow the procedure to make a phone call with the programmable phone button.

1 Press the programmed **Phone** button to enter into the Phone Entry list.

2 Press ▲ or ▼ to the required alias or ID. Press OK to select.

- The green LED lights up. The **Phone Call** icon appears in the top right corner. The first text line shows the subscriber alias. The second text line displays the call status.
- If the call-setup is successful, the Dual Tone Multi Frequency (DTMF) tone sounds. You hear the dialing tone of the telephone user. The first text line shows the subscriber alias. The **Phone Call** icon remains in the top right corner. The second text line displays the call status.
- If call-setup is unsuccessful, a tone sounds and the display shows `Phone Call Failed`. Your radio returns to the Access Code input screen. If

the access code was preconfigured in the Contacts list, the radio returns to the screen you were on prior to initiating the call.

3 Press the **PTT** button to talk. Release the **PTT** button to listen.

4 Press to end the call.

- The Dual Tone Multi Frequency (DTMF) tone sounds and the display shows `Ending Phone Call`.
- If the end-call-setup is successful, a tone sounds and the display shows `Call Ended` .
- If the end-call-setup is unsuccessful, your radio returns to the Phone Call screen. Repeat step 3 and step 4 or wait for the telephone user to end the call.
- When you press **PTT** button while in the Phone Contacts screen, a tone sounds and the display shows `Press OK to Place Phone Call`.
- When the telephone user ends the call, a tone sounds and the display shows `Phone Call Ended`.

NOTICE:

During channel access, press to dismiss the call attempt and a tone sounds.

During the call, when you press **One Touch Access** button with the deaccess code preconfigured or enter the deaccess code as the input for extra digits, your radio attempts to end the call.

Responding to Phone Calls as Group Calls

Follow the procedure to respond to Phone Calls as Group Calls on your radio.

When you receive a Phone Call as a Group Call:

- The display shows the **Phone Call** icon at the top right corner.
- The display shows `Phone Call`.

- The green LED blinks.
- Your radio unmutes and the incoming call sounds through the speaker.

1 Press the **PTT** button to respond to the call.

2 Release the **PTT** button to listen.

3 Press to end the call.

The display shows `Ending Phone Call`.

NOTICE:
If Phone Call capability is not enabled in your radio, the radio is not able to terminate a phone call as a group call. The telephone user must end the call. The recipient user is only allowed to talkback during the call.

If the call ends successfully:

- A tone sounds.
- The display shows `Call Ended`.

If the call fails to end, the radio returns to the Phone Call screen. Repeat step 3 or wait for the telephone user to end the call.

Responding to Phone Calls as All Calls

When you receive a Phone Call as an All Call, the receiving radio is unable to talkback or respond. The recipient user is also not allowed to end the All Call.

When you receive a Phone Call as an All Call:

- The display shows the **Phone Call** icon at the top right corner.
- The display shows either `All Call`, `Site All Call`, or `Multi Site Call` depending on the type of configuration and `Phone Call`.
- The green LED blinks.

- Your radio unmutes and the incoming call sounds through the speaker.

Responding to Phone Calls as Private Calls

Follow the procedure to respond to Phone Calls as Private Calls on your radio.

When you receive a Phone Call as a Private Call:

- The display shows the **Phone Call** icon at the top right corner.
- The display shows `Phone Call`.
- The green LED blinks.
- Your radio unmutes and the incoming call sounds through the speaker.

1. Press the **PTT** button to respond to the call.
2. Release the **PTT** button to listen.
3. Press to end the call.

   The display shows `Ending Phone Call`.

NOTICE:
If Phone Call capability is not enabled in your radio, the radio is not able to terminate a phone call as a private call. The telephone user must end the call. The recipient user is only allowed to talkback during the call.

If the call ends successfully:

- A tone sounds.
- The display shows `Call Ended`.

If the call fails to end, the radio returns to the Phone Call screen. Repeat step 3 or wait for the telephone user to end the call.

Call Preemption

Call Preemption allows a radio to stop any in-progress voice transmission and initiate a priority transmission.

With the Call Preemption feature, the system interrupts and preempts ongoing calls in instances where trunked channels are unavailable.

Higher priority calls such as an Emergency Call or an All Call preempt the transmitting radio to accommodate the higher priority call. If no other Radio Frequency (RF)

channels are available, an Emergency Call preempts an All Call as well.

Voice Interrupt

Voice Interrupt allows the user to shut down an in-progress voice transmission.

This feature uses reverse channel signaling to stop the in-progress voice transmission of a radio, if the interrupting radio is configured to Voice Interrupt, and the transmitting radio is configured to be Voice Call Interruptible. The interrupting radio is then allowed to make a voice transmission to the participant in the stopped call.

The Voice Interrupt feature significantly improves the probability of successfully delivering a new transmission to the intended parties when a call is in progress.

Voice Interrupt is accessible to the user only if this feature has been set up in the radio. Check with your dealer or system administrator for more information.

Enabling Voice Interrupt

Follow the procedure to initiate Voice Interrupt on your radio.

Your radio must be programmed to allow you to use this feature. Check with your dealer or system administrator for more information.

1. To interrupt the transmission during an on-going call, press the **PTT** button.

   On the interrupted radio, the display shows `Call Interrupted`. The radio sounds a negative indicator tone until the **PTT** button is released.

2. Wait for acknowledgment.

   If successful:

   - A positive indicator tone sounds.

   If unsuccessful:

   - A negative indicator tone sounds.

3. Do one of the following:

   - Wait for the Talk Permit Tone to end and speak clearly into the microphone if enabled.
   - Wait for the **PTT** Sidetone to end and speak clearly into the microphone if enabled.

Advanced Features

This chapter explains the operations of the features available in your radio.

Your dealer or system administrator may have customized your radio for your specific needs. Check with your dealer or system administrator for more information.

Call Queue

When there are no resources available to process a call, Call Queue enables the call request to be placed in the system queue for the next available resources.

You hear a Call Queue Tone after pressing the **PTT** button indicating that the radio has entered Call Queue State. The **PTT** button may be released once the Call Queue Tone is heard.

If the call setup is successful, the following occur:

- The green LED blinks.
- If enabled, the Talk Permit Tone sounds.
- The display shows the call type icon, ID or alias.
- The radio user has up to 4 seconds to press the **PTT** button to begin voice transmission.

If the call setup is unsuccessful, the following occur:

- If enabled, the Reject Tone sounds.
- The display shows the failure notice screen momentarily.
- The call is terminated and the radio exits the call setup.

Talkgroup Scan

This feature allows your radio to monitor and join calls for groups defined by a Receive Group List.

When scan is enabled, the scan icon appears on the status bar and the LED blinks yellow. Your radio unmutes to any member in its Receive Group List.

When scan is disabled, your radio does not receive transmission from any members of the Receive Group List, except for All Call and the selected Talkgroup.

NOTICE:
Talkgroup Scan can be configured by using CPS. Check with your system administrator to determine how your radio has been programmed.

Turning Talkgroup Scan On or Off

Follow the procedure to turn Talkgroup Scan on or off on your radio.

1. Press OK to access the menu.
2. Press ▲ or ▼ to `Scan`. Press OK to select.
3. Do one of the following:
   - Press ▲ or ▼ to `Turn On`. Press OK to select.
   - Press ▲ or ▼ to `Turn Off`. Press OK to select.

If scan is enabled:

- The display shows `Scan On` and **Scan** icon.
- The yellow LED blinks.
- A positive indicator tone sounds.

If scan is disabled:

- The display shows `Scan Off`.
- The **Scan** icon disappears.
- The LED turns off.
- A negative indicator tone sounds.

Receive Group List

Receive Group List is a feature that allows you to create and assign members on the talkgroup scan list.

This list is created when your radio is programmed and it determines which groups can be scanned. Your radio can support a maximum of 16 members in this list.

If your radio has been programmed to edit the scan list, you can:

- Add/remove talkgroups.
- Add, remove, and/or edit priority for talkgroups. Refer to Editing Priority for a Talkgroup on page 85.
- Add, remove, and/or edit affiliation talkgroups. Refer to Adding Talkgroup Affiliation on page 86 and Removing Talkgroup Affiliation on page 87.
- Replace the existing scan list with a new scan list.

IMPORTANT:
To add member into the list, the talkgroup must first be configured in the radio.

NOTICE:
Receive Group List is programmed by the system administrator. Check with your dealer or system administrator for more information.

Priority Monitor

The Priority Monitor feature allows the radio to automatically receive transmission from talkgroups with higher priority even when radio is in a talkgroup call.

Radio leaves lower priority talkgroup call for higher priority talkgroup call.

NOTICE:
This feature can only be accessed when Talkgroup Scan feature is enabled.

Priority Monitor feature applies only to members in the Receive Group List. There are two Priority Talkgroups: Priority 1 (P1) and Priority 2 (P2). P1 has higher priority than P2. In Capacity Max system, the radio receives transmission according to the priority order below:

1. Emergency Call for P1 Talkgroup
2. Emergency Call for P2 Talkgroup
3. Emergency Call for non-priority Talkgroups in the Receive Group List
4. All Call
5. P1 Talkgroup Call
6. P2 Talkgroup Call
7. Non-priority Talkgroups in the Receive Group List

See Editing Priority for a Talkgroup on page 85 for more information on how to add, remove, and/or edit the priority of the talkgroups in the scan list.

NOTICE:
This feature is programmed by the system administrator. Check with your dealer or system administrator for more information.

Editing Priority for a Talkgroup

In the Talkgroup Scan Menu, you can view or edit the priority of a talkgroup.

1. Press OK to access the menu.

2 Press ▲ or ▼ to Scan. Press OK to select.

3 Press ▲ or ▼ to View/Edit List. Press OK to select.

4 Press ▲ or ▼ to the required talkgroup. Press OK to select.

The current priority is indicated by a **Priority 1** or **Priority 2** icon beside the talkgroup.

5 Press ▲ or ▼ to Edit Priority. Press OK to select.

6 Press ▲ or ▼ to the required priority level. Press OK to select.

If another talkgroup has been assigned to Priority 1 or Priority 2, you can choose to overwrite the current priority. When the display shows Overwrite Existing?, press ▲ or ▼ to the following options:

- No to return to the previous step.
- Yes to overwrite.

The display shows positive mini notice before returning to the previous screen. The priority icon appears beside the talkgroup.

Multi-Talkgroup Affiliation

In a Capacity Max system, your radio can be configured for up to seven talkgroups at a site.

Of the 16 talkgroups in the Receive Group List, up to seven talkgroups can be assigned as affiliation talkgroups. The selected talkgroup and the priority talkgroups are automatically affiliated.

NOTICE:
This feature is programmed by the system administrator. Check with your dealer or system administrator for more information.

Adding Talkgroup Affiliation

Follow the procedure to add a talkgroup affiliation.

1 Press OK to access the menu.

2 Press ▲ or ▼ to Scan. Press OK to select.

3 Press ▲ or ▼ to View/Edit List. Press OK to select.

4 Press ▲ or ▼ to the required talkgroup ID or alias. Press OK to select.

The affiliation status is displayed at the View/Edit List. The display shows ● beside the selected talkgroup ID or alias.

5 Press ▲ or ▼ to Edit Affiliation. Press OK to select.

6 Do one of the following:

- Press ▲ or ▼ to On. Press OK to select.
- Press ▲ or ▼ to Off. Press OK to select.

When On is selected, ● appears beside the talkgroup ID or alias.

If affiliation is successful, the display shows ✓ beside the selected talkgroup ID or alias.

If affiliation is unsuccessful, ● remains beside the talkgroup ID or alias.

NOTICE:
The radio displays List Full when a maximum of seven talkgroups are selected for affiliation in the scan list. To select a new talkgroup for affiliation, remove an existing affiliated talkgroup to make way for the new addition. See Removing Talkgroup Affiliation on page 87 for more information.

Removing Talkgroup Affiliation

When the affiliation list is full and you want to select a new talkgroup for affiliation, remove an existing affiliated talkgroup to make way for the new addition. Follow the procedure to remove a talkgroup affiliation.

1 Press OK to access the menu.

2 Press ▲ or ▼ to Scan. Press OK to select.

3 Press ▲ or ▼ to View/Edit List. Press OK to select.

4 Press ▲ or ▼ to the required talkgroup ID or alias. Press OK to select.

The affiliation status is displayed at the View/Edit List. The display shows ● beside the selected talkgroup ID or alias.

5 Press ▲ or ▼ to Edit Affiliation. Press OK to select.

6 Press ▲ or ▼ to Off. Press OK to select.

When Off is selected, ● disappears from beside the talkgroup ID or alias.

Talkback

The Talkback feature allows you to respond to a transmission while scanning.

If your radio scans into a call from the selectable group scan list, and if the **PTT** button is pressed during the scanned call, the operation of the radio depends on whether Talkback was enabled or disabled during radio programming. Check with your dealer or system administrator for more information.

Talkback Disabled

The radio leaves the scanned call and attempts to transmit on the contact for the currently selected channel position. After the Call Hang Time on the currently selected contact expires, the radio returns to the home channel and starts the Scan Hang Time Timer. The radio resumes group scan after its Scan Hang Time Timer expires.

Talkback Enabled

If the **PTT** button is pressed during the Group Hang Time of the scanned call, the radio attempts to transmit to the scanned group.

NOTICE:
If you scan into a call for a group that is not assigned to a channel position in the currently selected zone and the call ends, switch to the proper zone and then select the channel position of the group to talk back to that group.

Bluetooth

This feature allows you to use your radio with a Bluetooth-enabled device (accessory) through a Bluetooth connection. Your radio supports both Motorola Solutions and Commercially available Off-The-Shelf (COTS) Bluetooth-enabled devices.

Bluetooth operates within a range of 10 m (32 ft) line of sight. This is an unobstructed path between your radio and your Bluetooth-enabled device. For high degree of reliability, Motorola Solutions recommends to not separate the radio and the accessory.

At the fringe areas of reception, both voice and tone quality start to sound "garbled" or "broken". To correct this problem, position your radio and Bluetooth-enabled device closer to each other (within the 10 m defined range) to re-establish clear audio reception. The Bluetooth function of your radio has maximum power of 2.5 mW (4 dBm) at the 10 m range.

Your radio can support up to three simultaneous Bluetooth connections with Bluetooth-enabled devices of unique types. For example, a headset, a scanner, and a PTT-Only Device (POD). Multiple connections with Bluetooth-enabled devices of the same type are not supported.

Refer to the user manual of your respective Bluetooth-enabled device for more details on the full capabilities of your Bluetooth-enabled device.

Your radio connects to the Bluetooth-enabled device within range with either the strongest signal strength, or to one which it has connected to before in a prior session. Do not turn off your Bluetooth-enabled device or press the home back button during the finding and connecting operation as this cancels the operation.

Turning Bluetooth On and Off

Follow the procedure to turn Bluetooth on and off.

1 Press OK to access the menu.

2 Press ▲ or ▼ to Bluetooth. Press OK to select.

3 Press ▲ or ▼ to My Status. Press OK to select.

The display shows On and Off. The current status is indicated by a ✓ .

4 Do one of the following:

- Press ▲ or ▼ to On. Press OK to select. The display shows ✓ beside On.
- Press ▲ or ▼ to Off. Press OK to select. The display shows ✓ beside Off.

Connecting to Bluetooth Devices

Follow the procedure to connect to Bluetooth devices.

Turn on your Bluetooth-enabled device and place it in pairing mode.

1 Press OK to access the menu.

2 Press ▲ or ▼ to Bluetooth. Press OK to select.

3 Press ▲ or ▼ to Devices. Press OK to select.

4 Do one of the following:

- Press ▲ or ▼ to the required device. Press OK to select.
- Press ▲ or ▼ to Find Devices to locate available devices. Press ▲ or ▼ to the required device. Press OK to select.

5 Press ▲ or ▼ to Connect. Press OK to select.

Your Bluetooth-enabled device may require additional steps to complete the pairing. Refer to the user manual of your Bluetooth-enabled device.

The display shows `Connecting to <Device>`.

Wait for acknowledgment.
If successful:

- A positive indicator tone sounds.
- The display shows `<Device> Connected` and the **Bluetooth Connected** icon.
- The display shows ✓ beside the connected device.

If unsuccessful:

- A negative indicator tone sounds.
- The display shows `Connecting Failed`.

Connecting to Bluetooth Devices in Discoverable Mode

Follow the procedure to connect to Bluetooth devices in discoverable mode.

Turn on your Bluetooth-enabled device and place it in pairing mode.

1. Press OK to access the menu.
2. Press ▲ or ▼ to `Bluetooth`. Press OK to select.
3. Press ▲ or ▼ to `Find Me`. Press OK to select.
   The radio can now be found by other Bluetooth-enabled devices for a programmed duration. This is called Discoverable Mode.

Wait for acknowledgment.
If successful:

- A positive indicator tone sounds.
- The display shows `<Device> Connected` and the **Bluetooth Connected** icon.
- The display shows ✓ beside the connected device.

If unsuccessful:

- A negative indicator tone sounds.
- The display shows `Connecting Failed`.

Disconnecting from Bluetooth Devices

Follow the procedure to disconnect from Bluetooth devices.

1. Press OK to access the menu.
2. Press ▲ or ▼ to `Bluetooth`. Press OK to select.
3. Press ▲ or ▼ to `Devices`. Press OK to select.
4. Press ▲ or ▼ to the required device. Press OK to select.
5. Press ▲ or ▼ to `Disconnect`. Press OK to select.

   The display shows `Disconnecting from <Device>`.

Wait for acknowledgment.

- A tone sounds.
- The display shows `<Device> Disconnected` and the **Bluetooth Connected** icon disappears.
- The ✓ disappears beside the connected device.

Switching Audio Route between Internal Radio Speaker and Bluetooth Device

Follow the procedure to toggle audio routing between internal radio speaker and external Bluetooth device.

Press the programmed **Bluetooth Audio Switch** button.

The display shows one of the following results:

- A tone sounds. The display shows `Route Audio to Radio`.
- A tone sounds. The display shows `Route Audio to Bluetooth`.

Viewing Device Details

Follow the procedure to view device details on your radio.

1 Press OK to access the menu.

2 Press ▲ or ▼ to `Bluetooth`. Press OK to select.

3 Press ▲ or ▼ to `Devices`. Press OK to select.

4 Press ▲ or ▼ to the required device. Press OK to select.

5 Press ▲ or ▼ to `View Details`. Press OK to select.

Deleting Device Name

You can remove a disconnected device from the list of Bluetooth-enabled devices.

1 Press OK to access the menu.

2 Press ▲ or ▼ to `Bluetooth`. Press OK to select.

3 Press ▲ or ▼ to `Devices`. Press OK to select.

4 Press ▲ or ▼ to the required device. Press OK to select.

5 Press ▲ or ▼ to `Delete`. Press OK to select. The display shows `Device Deleted`.

Adjusting Bluetooth Mic Gain Values

Allows control of microphone gain value in connected Bluetooth-enabled devices.

1 Press OK to access the menu.

2 Press ▲ or ▼ to `Bluetooth`. Press OK to select.

3 Press ▲ or ▼ to `BT Mic Gain`. Press OK to select.

4 Press ▲ or ▼ to the BT Mic Gain type and the current values. To edit values, press OK to select.

5 Press ▲ or ▼ to increase or to decrease values. Press OK to select.

Permanent Bluetooth Discoverable Mode

The Permanent Bluetooth Discoverable Mode must be enabled by the dealer or system administrator.

NOTICE:
If enabled, `Bluetooth` is **not** displayed in the Menu and you cannot use any Bluetooth programmable button features.

Other Bluetooth-enabled devices can locate your radio, but the devices cannot connect to the radio. The Permanent Bluetooth Discoverable Mode enables dedicated devices to use your radio position in the process of Bluetooth-based location.

Indoor Location

NOTICE:
Indoor Location feature is applicable for models with the latest software and hardware. Check with your dealer or system administrator for more information.

Indoor Location is be used to keep track of the location of radio users. When Indoor Location is activated, the radio is in a limited discoverable mode. Dedicated beacons are used to locate the radio and determine its position.

Turning Indoor Location On or Off

You can turn on or turn off Indoor Location by performing one of the following actions.

- Access this feature through the menu.

  a. Press OK to access the menu.

  b. Press ▲ or ▼ to `Bluetooth` and press OK to select.

c. Press ▲ or ▼ to `Indoor Location` and press OK to select.

d. Press OK to turn on Indoor Location.

The display shows `Indoor Location On`. You hear a positive indicator tone.
One of the following scenarios occurs.

- If successful, the Indoor Location Available icon appears on the Home screen display.
- If unsuccessful, the display shows `Turning On Failed`. You hear a negative indicator tone.

e. Press OK to turn off Indoor Location.

The display shows `Indoor Location Off`. You hear a positive indicator tone.
One of the following scenarios occurs.

- If successful, the Indoor Location Available icon disappears on the Home screen display.
- If unsuccessful, the display shows `Turning Off Failed`. You hear a negative indicator tone.

- Access this feature by using the programmed button.

a. Long press the programmed **Indoor Location** button to turn on Indoor Location.

The display shows `Indoor Location On`. You hear a positive indicator tone.
One of the following scenarios occurs.

- If successful, the Indoor Location Available icon appears on the Home screen display.
- If unsuccessful, the display shows `Turning On Failed`. If unsuccessful, you hear a negative indicator tone.

b. Press the programmed **Indoor Location** button to turn off Indoor Location.

The display shows `Indoor Location Off`. You hear a positive indicator tone.
One of the following scenarios occurs.

- If successful, the Indoor Location Available icon disappears on the Home screen display.

- If unsuccessful, the display shows `Turning Off Failed`. If unsuccessful, you hear a negative indicator tone.

Accessing Indoor Location Beacons Information

Follow the procedure to access Indoor Location beacons information.

1. Press OK to access the menu.
2. Press ▲ or ▼ to `Bluetooth` and press OK to select.
3. Press ▲ or ▼ to `Indoor Location` and press OK to select.
4. Press ▲ or ▼ to `Beacons` and press OK to select.

The display shows the beacons information.

Multi-Site Controls

These features are applicable when your current radio channel is configured to a Capacity Max system.

Starting Manual Site Search

Follow the procedure to start manual site search when the received signal strength is poor in order to attempt to find a site with better signal.

1. Do one of the following:
   - Press the programmed **Manual Site Roam** button. Skip the following steps.
   - Press OK to access the menu.
2. Press ▲ or ▼ to `Utilities`. Press OK to select.

3 Press ▲ or ▼ to `Radio Settings`. Press OK to select.

4 Press ▲ or ▼ to `Site Roaming`. Press OK to select.

5 Press ▲ or ▼ to `Active Search`. Press OK to select.

A tone sounds.The green LED blinks.The display shows `Finding Site`.

If the radio finds a new site:

- A positive indicator tone sounds.
- The LED turns off.
- The display shows `Site <Alias> Found`.

If the radio fails to find a new site:

- A negative indicator tone sounds.
- The LED turns off.
- The display shows `Out of Range`.

If a new site is within range, but the radio is unable to connect to it:

- A negative indicator tone sounds.
- The LED turns off.
- The display shows `Channel Busy`.

Site Lock On/Off

When toggled on, the radio searches the current site only. When toggled off, the radio searches other sites in addition to the current site.

Press the programmed **Site Lock** button.

If the **Site Lock** function is toggled on:

- You hear a positive indicator tone, indicating the radio has locked to the current site.
- The display shows `Site Locked`.

If the **Site Lock** function is toggled off:

- You hear a negative indicator tone, indicating the radio is unlocked.
- The display shows `Site Unlocked`.

Accessing Neighbor Sites List

This feature allows the user to check the adjacent sites list of the current home site. Follow the procedure to access the Neighbor Sites List:

1. Press OK to access the menu.
2. Press ▲ or ▼ to `Utilities`. Press OK to select.
3. Press ▲ or ▼ to `Radio Info`. Press OK to select.
4. Press ▲ or ▼ to `Neighbor Sites`. Press OK to select.

Home Channel Reminder

This feature provides a reminder when the radio is not set to the home channel for a period of time.

If this feature is enabled when your radio is not set to the home channel for a period of time, the following occurs periodically:

- The Home Channel Reminder tone and announcement sound.
- The first line of the display shows `Non`.
- The second line shows `Home Channel`.

Muting the Home Channel Reminder

When the Home Channel Reminder sounds, you can temporarily mute the reminder.

Press the **Silence Home Channel Reminder** programmable button.

The first line of the display shows `HCR` and the second line shows `Silenced`.

Setting New Home Channels

When the Home Channel Reminder occurs, you can set a new home channel.

1. Do one of the following:

- Press the **Reset Home Channel** programmable button to set the current channel as the new Home Channel. Skip the following steps.
  The first line of the display shows the channel alias and the second line shows `New Home Ch`.
- Press OK to access the menu.

2 Press ▲ or ▼ to `Utilities`. Press OK to select.

3 Press ▲ or ▼ to `Radio Settings`. Press OK to select.

4 Press ▲ or ▼ to `Home Channel`. Press OK to select.

5 Press ▲ or ▼ to the desired new home channel alias. Press OK to select.

The display shows ✓ beside the selected home channel alias.

Remote Monitor

This feature is used to turn on the microphone of a target radio with a subscriber alias or ID. You can use this feature to remotely monitor any audible activity surrounding the target radio.

Both your radio and the target radio must be programmed to allow you to use this feature.

If initiated, the green LED blinks once on the target radio. This feature automatically stops after a programmed duration or when there is any user operation on the target radio.

Initiating Remote Monitor

Follow the procedure to initiate Remote Monitor on your radio.

1 Press the programmed **Remote Monitor** button.

2 Press ▲ or ▼ to the required alias or ID. Press OK to select.

The display shows a transitional mini notice, indicating the request is in progress. The green LED lights up.

3 Wait for acknowledgment.

If successful:

- A positive indicator tone sounds.
- The display shows a positive mini notice.
- The audio from the monitored radio starts playing for a programmed duration, and the display shows `Rem. Monitor`. Once the timer expires, an alert tone sounds, and the LED turns off.

If unsuccessful:

- A negative indicator tone sounds.
- The display shows a negative mini notice.

Initiating Remote Monitor by Using the Contacts List

Follow the procedure to initiate Remote Monitor on your radio by using the Contacts list.

1 Press OK to access the menu.

2 Press ▲ or ▼ to `Contacts`. Press OK to select.

3 Press ▲ or ▼ to the required alias or ID. Press OK to select.

4 Press ▲ or ▼ to `Remote Mon.`. Press OK to select.

The display shows a transitional mini notice, indicating the request is in progress. The green LED lights up.

5 Wait for acknowledgment.

If successful:

- A positive indicator tone sounds.
- The display shows a positive mini notice.
- The audio from the monitored radio starts playing for a programmed duration, and the display shows `Rem. Monitor`. Once the timer expires, an alert tone sounds, and the LED turns off.

If unsuccessful:

- A negative indicator tone sounds.
- The display shows a negative mini notice.

Initiating Remote Monitors by Using the Manual Dial

Follow the procedure to initiate Remote Monitor on your radio by using the manual dial.

1. Press OK to access the menu.
2. Press ▲ or ▼ to `Contacts`. Press OK to select.
3. Press ▲ or ▼ to `Manual Dial`. Press OK to select.
4. Press ▲ or ▼ to `Radio Number`. Press OK to select.
5. Do one of the following:
   - Enter the subscriber alias or ID, and press OK to proceed.
   - Edit the previously dialed ID, and press OK to proceed.
6. Press ▲ or ▼ to `Remote Mon.`. Press OK to select.

   The display shows a transitional mini notice, indicating the request is in progress. The green LED lights up.

7 Wait for acknowledgment.

If successful:

- A positive indicator tone sounds.
- The display shows a positive mini notice.
- The audio from the monitored radio starts playing for a programmed duration, and the display shows `Rem. Monitor`. Once the timer expires, an alert tone sounds, and the LED turns off.

If unsuccessful:

- A negative indicator tone sounds.
- The display shows a negative mini notice.

Contacts Settings

Contacts provides address book capabilities on your radio. Each entry corresponds to an alias or ID that you use to initiate a call. The entries are alphabetically sorted.

Each entry, depending on context, associates with the different call types: Group Call, Private Call, Broadcast Call, Site All Call, Multi-site All Call, PC Call, or Dispatch Call.

PC Call and Dispatch Call are data-related. They are only available with the applications. Refer to the data applications documentation for further details.

Additionally, Contacts menu allows you to assign each entry to a programmable number key or more on a keypad microphone. If an entry is assigned to a number key, your radio can perform a quick dial on the entry.

NOTICE:
You see a checkmark before each number key that is assigned to an entry. If the checkmark is before `Empty`, you have not assign a number key to the entry.

Each entry within Contacts displays the following information:

- Call Type
- Call Alias
- Call ID

NOTICE:
If the Privacy feature is enabled on a channel, you can make privacy-enabled Group Calls, Private Calls, All Calls, and Phone Calls on that channel. Only target radios with the same Privacy Key, or the same Key Value and Key ID as your radio will be able to decrypt the transmission.

Assigning Entries to Programmable Number Keys

Follow the procedure to assign entries to programmable number keys on your radio.

1 Press OK to access the menu.

2 Press ▲ or ▼ to `Contacts`. Press OK to select.

3 Press ▲ or ▼ to the required alias or ID. Press OK to select.

4 Press ▲ or ▼ to `Program Key`. Press OK to select.

5 Do one of the following:

- If the desired number key has not been assigned to an entry, press ▲ or ▼ to the desired number key. Press OK to select.
- If the desired number key has been assigned to an entry, the display shows `The Key is Already Assigned` and then, the first text line shows `Overwrite?`. Do one of the following:

  Press ▲ or ▼ to `Yes`. Press OK to select.

  The radio sounds a positive indicator tone and the display shows `Contact Saved` and a positive mini notice.

  Press ▲ or ▼ to `No` to return to the previous step.

Removing Associations Between Entries and Programmable Number Keys

Follow the procedure to remove the associations between entries and programmable number keys on your radio.

1 Do one of the following:

- Long press the programmed number key to the required alias or ID. Proceed to step 4.

- Press OK to access the menu.

2 Press ▲ or ▼ to `Contacts`. Press OK to select.

3 Press ▲ or ▼ to the required alias or ID. Press OK to select.

4 Press ▲ or ▼ to `Program Key`. Press OK to select.

5 Press ▲ or ▼ to `Empty`. Press OK to select.

The first text line shows `Clear from all keys`.

6 Press ▲ or ▼ to `Yes`. Press OK to select.

NOTICE:
When an entry is deleted, the association between the entry and its programmed number key(s) is removed.

A positive indicator tone sounds. The display shows `Contact Saved`.
The screen automatically returns to the previous menu.

Adding New Contacts

Follow the procedure to add new contacts on your radio.

1 Press OK to access the menu.

2 Press ▲ or ▼ to `Contacts`. Press OK to select.

3 Press ▲ or ▼ to `New Contact`. Press OK to select.

4 Press ▲ or ▼ to select contact type `Radio Contact` or `Phone Contact`. Press OK to select.

5 Enter the contact number with the keypad, and press OK to proceed.

6 Enter the contact name with the keypad, and press OK to proceed.

7 Press ▲ or ▼ to the required ringer type. Press OK to select.

A positive indicator tone sounds. The display shows a positive mini notice.

Call Indicator Settings

This feature allows the radio users to configure call or text message ringing tones.

Activating or Deactivating Call Ringers for Private Calls

Follow the procedure to activate or deactivate call ringers for Private Calls on your radio.

1 Press OK to access the menu.

2 Press ▲ or ▼ to `Utilities`. Press OK to select.

3 Press ▲ or ▼ to `Radio Settings`. Press OK to select.

4 Press ▲ or ▼ to `Tones/Alerts`. Press OK to select.

5 Press ▲ or ▼ to `Call Ringers`. Press OK to select.

6 Press ▲ or ▼ to `Private Call`. Press OK to select.

7 Do one of the following:

- Press ▲ or ▼ to the required tone. Press OK to select.
  The display shows ✓ and the selected tone.
- Press ▲ or ▼ to `Off`. Press OK to select.
  If the ringing tones were earlier enabled, the display shows ✓ beside `Off`.

  If the ringing tones were earlier disabled, the display does not show ✓ beside `Off`.

Activating or Deactivating Call Ringers for Text Messages

Follow the procedure to activate or deactivate call ringers for text messages on your radio.

1 Press OK to access the menu.

2 Press ▲ or ▼ to `Utilities`. Press OK to select.

3 Press ▲ or ▼ to `Radio Settings`. Press OK to select.

4 Press ▲ or ▼ to `Tones/Alerts`. Press OK to select.

5 Press ▲ or ▼ to `Call Ringers`. Press OK to select.

6 Press ▲ or ▼ to `Text Message`. Press OK to select.

The display shows ✓ and the current tone.

7 Do one of the following:

- Press ▲ or ▼ to the required tone. Press OK to select.
  The display shows ✓ and the selected tone.
- Press ▲ or ▼ to `Off`. Press OK to select.
  If the ringing tones were earlier enabled, the display shows ✓ beside `Off`.

  If the ringing tones were earlier disabled, the display does not show ✓ beside `Off`.

Activating or Deactivating Call Ringers for Call Alerts

Follow the procedure to activate or deactivate call ringers for Call Alerts on your radio.

1 Press OK to access the menu.

2 Press ▲ or ▼ to `Utilities`. Press OK to select.

3 Press ▲ or ▼ to `Radio Settings`. Press OK to select.

4 Press ▲ or ▼ to `Tones/Alert`. Press OK to select.

5 Press ▲ or ▼ to `Call Ringers`. Press OK to select.

6 Press ▲ or ▼ to `Call Alert`. Press OK to select.

7 Do one of the following:

- Press ▲ or ▼ to the required tone. Press OK to select.

The display shows ✓ and the selected tone.

- Press ▲ or ▼ to `Off`. Press OK to select.
  If the ringing tones were earlier enabled, the display shows ✓ beside `Off`.

  If the ringing tones were earlier disabled, the display does not show ✓ beside `Off`.

Activating or Deactivating Call Ringers for Telemetry Status with Text

Follow the procedure to activate or deactivate call ringers for telemetry status with text on your radio.

1. Press OK to access the menu.
2. Press ▲ or ▼ to `Utilities`. Press OK to select.
3. Press ▲ or ▼ to `Radio Settings`. Press OK to select.
4. Press ▲ or ▼ to `Tones/Alert`. Press OK to select.
5. Press ▲ or ▼ to `Call Ringers`. Press OK to select.
6. Press ▲ or ▼ to `Telemetry`. Press OK to select.

   The current tone is indicated by a ✓ .
7. Do one of the following:
   - Press ▲ or ▼ to the preferred tone. Press OK to select.
     The display shows `Tone <Number> Selected` and a ✓ appears left of the selected tone.
   - Press ▲ or ▼ to `Turn Off`. Press OK to select.
     The display shows `Telemetry Ringer Off` and a ✓ appears left of `Turn Off`.

Assigning Ring Styles

The radio can be programmed to sound one of ten predefined ringing tones when receiving a Call Alert or a Text Message from a particular contact. The radio sounds out each ring style as you navigate through the list. Follow the procedure to assign ring styles on your radio.

1. Press OK to access the menu.
2. Press ▲ or ▼ to `Contacts`. Press OK to select.

   The entries are alphabetically sorted.
3. Press ▲ or ▼ to the required alias or ID. Press OK to select.
4. Press ▲ or ▼ to `Edit`. Press OK to select.
5. Press OK until display shows `Edit Ringtone` menu.

   A ✓ indicates the current selected tone.
6. Press ▲ or ▼ to the required tone. Press OK to select.

   The display shows a positive mini notice.

Selecting a Ring Alert Type

NOTICE:
The programmed **Ring Alert Type** button is assigned by your dealer or system administrator. Check with your dealer or system administrator to determine how your radio has been programmed.

You can program the radio calls to one predetermined vibrate call. If All Tones status is disabled, the radio displays the All Tone Mute icon. If All Tones status is enabled, the related ring alert type is displayed.

The radio vibrates once if it is a momentary ring style. The radio vibrates repetitively if it is a repetitive ring style. When

set to Ring and Vibrate, the radio sounds a specific ring tone if there is any incoming radio transaction (for example, Call Alert or Message). It sounds like a positive indicator tone or missed call.

For radios with batteries that support the vibrate feature and are attached to a vibrating belt clip, the available Ring Alert Type options are Silent, Ring, Vibrate, and Ring and Vibrate.

For radios with batteries that do not support the vibrate feature and are not attached to a vibrating belt clip, Ring Alert Type is automatically set to Ring. The available Ring Alert Type options are Silent and Ring.

You can select a Ring Alert Type by performing one of the following actions.

- Press the programmed **Ring Alert Type** button to access the Ring Alert Type menu.
  a. Press ▲ or ▼ to `Ring`, `Vibrate`, `Ring & Vibrate` or `Silent` and press OK to select.
- Access this feature through the menu.
  a. Press OK to access the menu.
  b. Press ▲ or ▼ to `Utilities` and press OK to select.
  c. Press ▲ or ▼ to `Radio Settings` and press OK to select.
  d. Press ▲ or ▼ to `Tones/Alerts` and press OK to select.
  e. Press ▲ or ▼ to `Ring Alert Type` and press OK to select.
  f. Press ▲ or ▼ to `Ring`, `Vibrate`, `Ring & Vibrate` or `Silent` and press OK to select.

Configuring Vibrate Style

NOTICE:
The programmed **Vibrate Style** button is assigned by your dealer or system administrator. Check with your dealer or system administrator to determine how your radio has been programmed.

Vibrate Style is enabled when the Vibrating Belt Clip is attached to the radio with a battery that supports the vibrate feature.

You can configure the vibrate style by performing one of the following actions.

- Press the programmed **Vibrate Style** button to access the Vibrate Style menu.
  a. Press ▲ or ▼ to `Short`, `Medium`, or `Long` and press OK to select.
- Access this feature via the menu.
  a. Press OK to access the menu.
  b. Press ▲ or ▼ to `Utilities` and press OK to select.
  c. Press ▲ or ▼ to `Radio Settings` and press OK to select.
  d. Press ▲ or ▼ to `Tones/Alerts` and press OK to select.
  e. Press ▲ or ▼ to `Vibrate Style` and press OK to select.
  f. Press ▲ or ▼ to `Short`, `Medium`, or `Long` and press OK to select.

Escalating Alarm Tone Volume

The radio can be programmed to continually alert, when a radio call remains unanswered. This is done by automatically increasing the alarm tone volume over time. This feature is known as Escalert. Follow the procedure to escalate alarm tone volume on your radio.

Call Log Features

Your radio keeps track of all recent outgoing, answered, and missed Private Calls. The call log feature is used to view and manage recent calls.

Missed Call Alerts may be included in the call logs, depending on the system configuration on your radio. You can perform the following tasks in each of your call lists:

- Store Alias or ID to Contacts

- Delete Call
- View Details

Viewing Recent Calls

Follow the procedure to view recent calls on your radio.

1. Press OK to access the menu.
2. Press ▲ or ▼ to `Call Log`. Press OK to select.
3. Press ▲ or ▼ to the preferred list. The options are `Missed`, `Answered`, and `Outgoing` lists.

   Press OK to select.

   The display shows the most recent entry.
4. Press ▲ or ▼ to view the list.

   You can start a Private Call with the alias or ID the display is currently showing by pressing the **PTT** button.

Storing Aliases or IDs from the Call List

Follow the procedure to store aliases or IDs on your radio from the Call list.

1. Press OK to access the menu.
2. Press ▲ or ▼ to `Call Log`. Press OK to select.
3. Press ▲ or ▼ to the required list. Press OK to select.
4. Press ▲ or ▼ to the required alias or ID. Press OK to select.
5. Press ▲ or ▼ to `Store`. Press OK to select.

   The display shows a blinking cursor.
6. Enter the rest of the characters of the required alias.

   Press OK to select.

You can store an ID without an alias.

The display shows a positive mini notice.

Deleting Calls from the Call List

Follow the procedure to delete calls on your radio from the Call list.

1 Press OK to access the menu.

2 Press ▲ or ▼ to `Call Log`. Press OK to select.

3 Press ▲ or ▼ to the required list. Press OK to select.

If the list is empty:

- A tone sounds.
- The display shows `List Empty`.

4 Press ▲ or ▼ to the required alias or ID. Press OK to select.

5 Press ▲ or ▼ to `Delete Entry?`. Press OK to select.

6 Do one of the following:

- Press OK to select `Yes` to delete the entry. The display shows `Entry Deleted`.
- Press ▲ or ▼ to `No`. Press OK to select. The radio returns to the previous screen.

Viewing Details from the Call List

Follow the procedure to view details on your radio from the Call list.

1 Press OK to access the menu.

2 Press ▲ or ▼ to `Call Log`. Press OK to select.

3 Press ▲ or ▼ to the required list. Press OK to select.

4 Press ▲ or ▼ to the required alias or ID. Press OK to select.

5 Press ▲ or ▼ to `View Details`. Press OK to select.

The display shows the details.

Call Alert Operation

Call Alert paging enables you to alert a specific radio user to call you back when they are able to do so.

This feature is applicable for subscriber aliases or IDs only and is accessible through the menu by using Contacts or a programmed **One Touch Access** button.

In Capacity Max, the Call Alert feature allows a radio user or a dispatcher to send an alert to another radio user requesting the radio user to call back the initiating radio user when available. Voice communication is not involved in this feature.

The Call Alert Operation can be configured by the dealer or the system administrator in two ways:

- The radio is configured to allow the user to press the **PTT** button to respond directly to the call initiator by making a Private Call.
- The radio is configured to allow the user to press the **PTT** button and continue with other Talkgroup communication. Pressing the **PTT** button on the call alert entry will not allow the user to respond to the call initiator. The user must navigate to the Missed Call Log option at the Call Log menu and respond to the Call Alert from there.

An Off Air Call Set-Up (OACSU) private call allows the user to respond immediately while a Full Off Air Call Set-Up (FOACSU) private call requires user acknowledgment for the call. OACSU type calls are therefore, recommended being used for the call alert feature. See Private Call on page 72.

Making Call Alerts

Follow the procedure to make Call Alerts on your radio.

1. Press the programmed **One Touch Access** button.

   The display shows `Call Alert` and the subscriber alias or ID. The green LED lights up.

2. Wait for acknowledgment.

   If the Call Alert acknowledgment is received, the display shows a positive mini notice.

   If the Call Alert acknowledgment is not received, the display shows a negative mini notice.

Making Call Alerts by Using the Contacts List

Follow the procedure to make Call Alerts on your radio by using the Contacts list.

1. Press OK to access the menu.

2. Press ▲ or ▼ to `Contacts`. Press OK to select.

3. Press ▲ or ▼ to the required alias or ID. Press OK to select.

4. Press ▲ or ▼ to `Call Alert`. Press OK to select.

   The display shows `Call Alert` and the subscriber alias or ID. The green LED lights up.

5. Wait for acknowledgment.

   - If the Call Alert acknowledgment is received, the display shows a positive mini notice.
   - If the Call Alert acknowledgment is not received, the display shows a negative mini notice.

Responding to Call Alerts

Follow the procedure to respond to Call Alerts on your radio.

When you receive a Call Alert:

- A repetitive tone sounds.
- The yellow LED blinks.
- The display shows the notification list listing a Call Alert with the alias or ID of the calling radio.

  Depending on the configuration by your dealer or system administrator, you can respond to a Call Alert by doing one of the following:

  - Press the **PTT** button and respond with a Private Call directly to the caller.
  - Press the **PTT** button to continue normal talkgroup communication.
    The Call Alert is moved to the Missed Call option at the Call Log menu. You can respond to the caller from the Missed Called log.

See Notification List on page 150 and Call Log Features on page 111 for more information.

Mute Mode

Mute Mode provides an option to the user to silence all audio indicators of the radio.

Once Mute Mode feature is initiated, all audio indicators are muted except higher priority features such as Emergency operations.

When Mute Mode is exited, the radio resumes playing ongoing tones and audio transmissions.

NOTICE:
This is a purchasable feature. Check with your dealer or system administrator for more information.

Turning On Mute Mode

Follow the procedure to turn on Mute Mode.

Do one of the following:

- Access this feature by using the programmed **Mute Mode** button.
- Access this feature by placing the radio in a face-down position momentarily.

Depending on radio model, the Face Down feature can be enabled either through the radio menu or by your system administrator. Check with your dealer or system administrator for more information.

IMPORTANT:
User can only enable either Man Down or Face Down at a time. Both features cannot be enabled together.

NOTICE:
Face Down feature is applicable to DP4601e only.

The following occurs when Mute mode is enabled:

- Positive Indicator Tone sounds.
- Display shows `Mute Mode On`.
- The red LED light starts blinking and remains blinking until Mute Mode is exited.
- Display shows **Mute Mode** icon on home screen.
- Radio is muted.
- Mute Mode Timer begins counting down the duration that is configured.

Setting Mute Mode Timer

Mute Mode feature can be enabled for a pre-configured amount of time by setting the Mute Mode Timer. The timer duration is configured in the radio menu and can range between 0.5–6 hours. Mute Mode is exited once the timer expires.

If the timer is left at 0, the radio remains in Mute mode for an indefinite period until the radio is moved to a face-up position or the programmed **Mute Mode** button is pressed.

NOTICE:
Face Down feature is applicable to DP4601e only.

1. Press OK to access the menu.
2. Press ▲ or ▼ to `Utilities`. Press OK to select.
3. Press ▲ or ▼ to `Radio Settings`. Press OK to select.
4. Press ▲ or ▼ to `Mute Timer`. Press OK to select.
5. Press ▲ or ▼ to edit the numeric value of each digit, and press OK.

Exiting Mute Mode

This feature can be exited automatically once the Mute Mode Timer expires.

Do one of the following to exit Mute mode manually:

- Press the programmed **Mute Mode** button.
- Press the **PTT** button on any entry.
- Place the radio in a face-up position momentarily.

NOTICE:
Face Down feature is applicable to DP4601e only.

The following occurs when Mute mode is disabled:

- Negative Indicator Tone sounds.
- Display shows `Mute Mode Off`.
- The blinking red LED turns off.
- **Mute Mode** icon disappears from home screen.
- Your radio unmutes and speaker state is restored.
- If the timer has not expired, Mute mode timer is stopped.

NOTICE:
Mute Mode is also exited if the user transmits voice or switches to an unprogrammed channel.

Emergency Operation

An Emergency Alarm is used to indicate a critical situation. You are able to initiate an Emergency at any time even when there is activity on the current channel.

In Capacity Max, the receiving radio can only support a single Emergency Alarm at a time. If initiated, a second Emergency Alarm will override the first alarm.

When an Emergency Alarm is received, the recipient may choose to either delete the alarm and exit the Alarm List, or respond to the Emergency Alarm by pressing the **PTT** button and transmitting non-emergency voice.

Your dealer or system administrator can set the duration of a button press for the programmed **Emergency** button, except for long press, which is similar with all other buttons:

Short Press
Duration between 0.05 seconds and 0.75 seconds.

Long Press
Duration between 1.00 second and 3.75 seconds.

The **Emergency** button is assigned with the Emergency On/Off feature. Check with your dealer for the assigned operation of the **Emergency** button.

NOTICE:
If short press the **Emergency** button is assigned to turn on the Emergency mode, then long press the **Emergency** button is assigned to exit the Emergency mode.

If long press the **Emergency** button is assigned to turn on the Emergency mode, then short press the **Emergency** button is assigned to exit the Emergency mode.

Your radio supports three Emergency Alarms:

- Emergency Alarm
- Emergency Alarm with Call
- Emergency Alarm with Voice to Follow

In addition, each alarm has the following types:

Regular
Radio transmits an alarm signal and shows audio and/or visual indicators.

Silent
Radio transmits an alarm signal without any audio or visual indicators. Radio receives calls without any sound through the speaker, until the programmed *hot mic* transmission period is over and/or you press the **PTT** button.

Silent with Voice
Radio transmits an alarm signal without any audio or visual indicators, but allow incoming calls to sound through the speaker. If *hot mic* is enabled, the incoming calls sound through the speaker after the programmed *hot mic* transmission period is over. The indicators only appear once you press the **PTT** button.

NOTICE:
Only one of the Emergency Alarms above can be assigned to the programmed **Emergency** button.

Sending Emergency Alarms

This feature allows you to send an Emergency Alarm, a non-voice signal, which triggers an alert indication on a group of radios. Follow the procedure to send Emergency Alarms on your radio.

Your radio does not display any audio or visual indicators during Emergency mode when it is set to Silent.

1 Press the programmed **Emergency On** button.

You see one of these results:

- The display shows `Tx Alarms` and the destination alias.
- The display shows `Tx Telegram` and the destination alias.

The green LED lights up. The **Emergency** icon appears.

NOTICE:
If programmed, the Emergency Search tone sounds. This tone is muted when the radio transmits or receives voice, and stops when the radio exits Emergency mode. The Emergency Search tone can be programmed by the dealer or system administrator.

2 Wait for acknowledgment.

If successful:

- The Emergency tone sounds.
- The green LED blinks.
- The display shows `Alarm Sent`.

If unsuccessful after all retries have been exhausted:

- A tone sounds.
- The display shows `Alarm Failed`.

The radio exits the Emergency Alarm mode and returns to the Home screen.

NOTICE:
When configured for Emergency Alarm only, the emergency process consists only of the Emergency Alarm delivery. The emergency ends when an acknowledgment is received from the system, or when channel access attempts have been exhausted.

No voice call is associated with the sending of an Emergency Alarm when operating as Emergency Alarm Only.

Sending Emergency Alarms with Call

This feature allows you to send an Emergency Alarm with Call to a group of radios or a dispatcher. Upon acknowledgment by the infrastructure within the group, a group of radios can communicate over a programmed Emergency channel.

The radio must be configured for Emergency Alarm and Call to perform an emergency call after the alarm process.

1 Press the programmed **Emergency On** button.

The display shows `Tx Alarm` and the destination alias. The **Emergency** icon appears.The green LED lights up.

NOTICE:
If programmed, the Emergency Search tone sounds. This tone is muted when the radio transmits or receives voice, and stops when the radio exits Emergency mode.

If an Emergency Alarm acknowledgment is successfully received:

- The Emergency tone sounds.
- The green LED blinks.
- The display shows `Alarm Sent`.
- Your radio enters the Emergency call mode when the display shows `Emergency` and the destination group alias.

If an Emergency Alarm acknowledgment is not successfully received:

- All retries are exhausted.
- A low-pitched tone sounds.
- The display shows `Alarm Failed`.
- The radio exits the Emergency Alarm mode.

2 Press the **PTT** button to initiate a voice transmission.

The green LED lights up.The display shows the **Group Call** icon.

3 Do one of the following:

- Wait for the Talk Permit Tone to end and speak clearly into the microphone if enabled.
- Wait for the **PTT** Sidetone to end and speak clearly into the microphone if enabled.

4 Release the **PTT** button to listen.

The display shows the caller and group aliases.

5 If the Channel Free Indication feature is enabled, you hear a short alert tone the moment the transmitting radio releases the **PTT** button, indicating the channel is free for you to respond. Press the **PTT** button to respond to the call.

6 Press the **Emergency Off** button to exit the Emergency mode.

The radio returns to the Home screen.

NOTICE:
Depending on how your radio is programmed, you may or may not hear a Talk Permit tone. Your radio dealer or system administrator can provide more information on how your radio has been programmed for Emergency.

The Emergency Call initiator may press to end an on-going emergency call. The radio returns to a call idle state but the emergency call screen remains open.

Sending Emergency Alarms with Voice to Follow

This feature allows you to send an Emergency Alarm with Voice to Follow to a group of radios. Your radio microphone is automatically activated, allowing you to communicate with the group of radios without pressing the **PTT** button. This activated microphone state is also known as *hot mic*.

If your radio has Emergency Cycle Mode enabled, repetitions of *hot mic* and receiving period are made for a programmed duration. During Emergency Cycle Mode, received calls sound through the speaker.

If you press the **PTT** button during the programmed receiving period, you hear a prohibit tone, indicating that you should release the **PTT** button. The radio ignores the **PTT** button press and remains in Emergency mode.

If you press the **PTT** button during *hot mic*, and continue to press it after the *hot mic* duration expires, the radio continues to transmit until you release the **PTT** button.

If the Emergency Alarm request fails, the radio does not retry to send the request, and enters the *hot mic* state directly.

NOTICE:
Some accessories may not support *hot mic*. Check with your dealer or system administrator for more information.

Follow the procedure to send Emergency Alarms with voice to follow on your radio.

1 Press the programmed **Emergency On** button.

You see one of these results:

- The display shows `Tx Alarm` and the destination alias.
- The display shows `Tx Telegram` and the destination alias.

The green LED lights up. The **Emergency** icon appears.

2 Once the display shows `Alarm Sent`, speak clearly into the microphone.

The radio automatically stops transmitting when:

- The cycling duration between *hot mic* and receiving calls expires, if Emergency Cycle Mode is enabled.
- The *hot mic* duration expires, if Emergency Cycle Mode is disabled.

3 Press the **Emergency Off** button to exit the Emergency mode.

The radio returns to the Home screen.

Receiving Emergency Alarms

The receiving radio can only support a single Emergency Alarm at a time. If initiated, a second Emergency Alarm will override the first alarm. Follow the procedure to receive and view Emergency Alarms on your radio.

When you receive an Emergency Alarm:

- A tone sounds.
- The red LED blinks.
- The display shows the Emergency Alarm List, the Emergency Talkgroup ID or alias, and the ID or alias of the transmitting radio.

1 Press OK to view the alarm.

2 Press OK to view the action options and details of the entry in the Alarm List.

3 Press and select Yes to exit the Alarm list.

The radio returns to the home screen with an **Emergency Icon** displayed at the top, indicating the unresolved Emergency Alarm. The **Emergency Icon** disappears once the entry in the Alarm List is deleted.

4 Press OK to access the menu.

5 Select Alarm List to revisit the Alarm list.

Responding to Emergency Alarms

When an Emergency Alarm is received, the recipient may choose to either delete the alarm and exit the Alarm List, or respond to the Emergency Alarm by pressing the **PTT** button and transmitting non-emergency voice. Follow the procedure to respond to Emergency Alarms on your radio.

1 If the Emergency Alarm Indication is enabled, the Emergency Alarm List appears when the radio receives an Emergency Alarm. Press ▲ or ▼ to the required alias or ID.

2 If the Channel Free Indication feature is enabled, you hear a short alert tone the moment the transmitting radio releases the **PTT** button, indicating the channel is free for you to respond. Press the **PTT** button to transmit non-emergency voice to the same group the Emergency Alarm targeted.

The green LED lights up.

3 Do one of the following:

- Wait for the Talk Permit Tone to end and speak clearly into the microphone if enabled.
- Wait for the **PTT** Sidetone to end and speak clearly into the microphone if enabled.

4 Release the **PTT** button to listen.

When the emergency initiating radio responds:

- The red LED blinks.
- The display shows the **Emergency Call** icon, the Emergency Talkgroup ID or alias, and the ID or alias of the transmitting radio.

NOTICE:
If the Emergency Call Indication is not enabled, the display shows the **Group Call** icon, Emergency Talkgroup ID or alias, and the ID or alias of the transmitting radio.

Responding to Emergency Alarms with Call

Follow the procedure to respond to Emergency Alarms with Call on your radio.

When you receive an Emergency Call:

- The Emergency Call Tone sounds if the Emergency Call Indication and Emergency Call Decode Tone is enabled. The Emergency Call Tone will not sound if only the Emergency Call Indication is enabled.
- The display shows the **Emergency Call** icon at the top right corner.
- The text line shows the Emergency Talkgroup ID or alias, and the ID or alias of the transmitting radio.
- Your radio unmutes and the incoming call sounds through the speaker.

1. If the Channel Free Indication feature is enabled, you hear a short alert tone the moment the transmitting radio releases the **PTT** button, indicating the channel is free for you to respond. Press the **PTT** button to respond to the call.

   The green LED lights up.

2. Wait for the Talk Permit Tone to end and speak clearly into the microphone if enabled.

3. Release the **PTT** button to listen.

   When the emergency initiating radio responds:

   - The red LED blinks.
   - The display shows the **Emergency Call** icon, the Emergency Talkgroup ID or alias, and the ID or alias of the transmitting radio.

NOTICE:
If the Emergency Call Indication is not enabled, the display shows the **Group Call** icon, Emergency Talkgroup ID or alias, and the ID or alias of the transmitting radio.

Status Message

This feature allows the user to send status messages to other radios.

The Quick Status list is configured by using CPS-RM and comprises up to a maximum of 99 statuses.

The maximum length for each status message is 16 characters.

NOTICE:
Every status has a corresponding digital value ranging from 0–99. An alias can be specified to each status for ease of reference.

Sending Status Messages

Follow the procedure below to send a status message.

1 Do one of the following:

- Press the programmed **One Touch Access** button. Skip the following steps.
- Press OK to access the menu.

2 Press ▲ or ▼ to `Status`. Press OK to select.

3 Press ▲ or ▼ to `Quick Status`. Press OK to select.

4 Press ▲ or ▼ to the required status message. Press OK to select.

5 Press ▲ or ▼ to the required subscriber alias or ID, or group alias or ID. Press OK to select.

If successful:

- A positive indicator tone sounds.
- The LED turns off.
- The display shows a positive mini notice momentarily before returning to the `Quick Status` screen.

- The display shows ✓ beside the sent status message.

If unsuccessful:

- A negative indicator tone sounds.
- The LED turns off.
- The display shows the failure notice momentarily before returning to the `Quick Status` screen.

Sending Status Message by Using Programmable Button

Follow the procedure to send a status message by using the programmable button.

1. Press the programmed **Status Message** button.
2. Press ▲ or ▼ to the required status message.

   Press OK to select. The contact list is displayed.
3. Press ▲ or ▼ to the required subscriber alias or ID, or group alias or ID. Press OK to select.

If successful:

- A positive indicator tone sounds.
- The LED turns off.
- The display shows a positive mini notice momentarily before returning to the `Quick Status` screen.
- The display shows ✓ beside the sent status message.

If unsuccessful:

- A negative indicator tone sounds.
- The LED turns off.
- The display shows the failure notice momentarily before returning to the `Quick Status` screen.

Sending a Status Message by Using the Contacts List

Follow the procedure to send a status message by using the contacts list.

1. Press OK to access the menu.
2. Press ▲ or ▼ to `Contacts`. Press OK to select.

3 Press ▲ or ▼ to the required subscriber alias or ID, or group alias or ID. Press OK to select.

4 Press ▲ or ▼ to `Send Status`. Press OK to select.

5 Press ▲ or ▼ to the required status message. Press OK to select.

If successful:

- A positive indicator tone sounds.
- The LED turns off.
- The display shows a positive mini notice momentarily before returning to the `Quick Status` screen.
- The display shows ✓ beside the sent status message.

If unsuccessful:

- A negative indicator tone sounds.
- The LED turns off.
- The display shows the failure notice momentarily before returning to the `Quick Status` screen.

Sending Status Message by Using Manual Dial

Follow the procedure to send a status message by using the manual dial.

1 Press OK to access the menu.

2 Press ▲ or ▼ to `Contacts`. Press OK to select.

3 Press ▲ or ▼ to `Manual Dial`. Press OK to select.

4 Press ▲ or ▼ to `Radio Number`. Press OK to select.

5 Enter the required subscriber alias or ID, or group alias or ID, and press OK to proceed.

6 Press ▲ or ▼ to `Send Status`. Press OK to select.

7 Press ▲ or ▼ to the required status message.

Press OK to select.

If successful:

- A positive indicator tone sounds.
- The LED turns off.
- The display shows a positive mini notice momentarily before returning to the `Quick Status` screen.
- The display shows ✓ beside the sent status message.

If unsuccessful:

- A negative indicator tone sounds.
- The LED turns off.
- The display shows the failure notice momentarily before returning to the `Quick Status` screen.

Viewing Status Messages

Follow the procedure to view status messages.

1 Press OK to access the menu.

2 Press ▲ or ▼ to `Status`. Press OK to select.

3 Press ▲ or ▼ to `Inbox`. Press OK to select.

4 Press ▲ or ▼ to the required status message.

Press OK to select.

The content of the status message is displayed to the radio user.

Received status messages can also be viewed by accessing the Notification List. See Notification List on page 150 for more information.

Responding to Status Messages

Follow the procedure to reply status messages.

1 Press OK to access the menu.

2 Press ▲ or ▼ to Status. Press OK to select.

3 Press ▲ or ▼ to Inbox. Press OK to select.

4 Press ▲ or ▼ to the required status message.

Press OK to select.

5 The content of the status is displayed. Press OK to select.

6 Press ▲ or ▼ to Reply. Press OK to select.

7 Press ▲ or ▼ to the required status message.

Press OK to select.

If successful:

- A positive indicator tone sounds.
- The LED turns off.
- The display shows a positive mini notice before returning to the Inbox screen.
- The display shows ✓ beside the sent status message.

If unsuccessful:

- A negative indicator tone sounds.
- The LED turns off.
- The display shows the failure notice momentarily before returning to the Inbox screen.

Deleting a Status Message

Follow the procedure to delete a status message from your radio.

1 Press OK to access the menu.

2 Press ▲ or ▼ to Status. Press OK to select.

3 Press ▲ or ▼ to Inbox. Press OK to select.

4 Press ▲ or ▼ to the required status message. Press OK to select.

5 The content of the status is displayed. Press OK to select.

6 Press ▲ or ▼ to `Delete`. Press OK to select.

7 Press ▲ or ▼ to `Yes`. Press OK to select.

- The display shows a positive mini notice before returning to the `Inbox` screen.

Deleting All Status Messages

Follow the procedure to delete all status messages from your radio.

1 Press OK to access the menu.

2 Press ▲ or ▼ to `Status`. Press OK to select.

3 Press ▲ or ▼ to `Inbox`. Press OK to select.

4 Press ▲ or ▼ to `Delete All`. Press OK to select.

5 Press ▲ or ▼ to `Yes`. Press OK to select.

- The display shows `List Empty`.

Text Messaging

Your radio is able to receive data, for example a text message, from another radio or a text message application.

There are two types of text messages, Digital Mobile Radio (DMR) Short Text Message and text message. The maximum length of a DMR Short Text Message is 23 characters. The maximum length of a text message is 280 characters, including the subject line. The subject line only appears when you receive messages from e-mail applications.

NOTICE:
The maximum character length is only applicable for models with the latest software and hardware. For radio models with older software and hardware, the maximum length of a text message is 140 characters. Check with your dealer or system administrator for more information.

For the Arabic language, the text entry orientation is from right to left.

Text Messages

The text messages are stored in an Inbox, and sorted according to the most recently received.

The radio exits the current screen once the inactivity timer expires. Long press at any time to return to the Home screen.

Viewing Text Messages

Follow the procedure to view text messages on your radio.

1. Press OK to access the menu.
2. Press ▲ or ▼ to `Messages`. Press OK to select.
3. Press ▲ or ▼ to `Inbox`. Press OK to select.

   If the Inbox is empty:

   - The display shows `List Empty`.
   - A tone sounds, if the Keypad Tone is turned on.
4. Press ▲ or ▼ to the required message. Press OK to select.

   The display shows a subject line if the message is from an e-mail application.

Viewing Telemetry Status Text Messages

Follow the procedure to view a telemetry status text message from the inbox.

1. Press OK to access the menu.

2 Press ▲ or ▼ to `Messages`. Press OK to select.

3 Press ▲ or ▼ to `Inbox`. Press OK to select.

4 Press ▲ or ▼ to the required message. Press OK to select.

You cannot reply to a Telemetry Status text message.

The display shows `Telemetry: <Status Text Message>`.

5 Long press ⌂ to return to the Home screen.

Viewing Saved Text Messages

Follow the procedure to view saved text message on your radio.

1 Do one of the following:

- Press the programmed **Text Message** button. Proceed to step 3.
- Press OK to access the menu.

2 Press ▲ or ▼ to `Messages`. Press OK to select.

3 Press ▲ or ▼ to `Drafts`. Press OK to select.

4 Press ▲ or ▼ to the required message. Press OK to select.

Responding to Text Messages

Follow the procedure to respond to text messages on your radio.

When you receive a text message:

- The display shows the Notification list with the alias or ID of the sender.
- The display shows the **Message** icon.

NOTICE:
The radio exits the Text Message alert screen and sets up a Private or Group Call to the sender of the message if the **PTT** button is pressed.

1 Do one of the following:

- Press ▲ or ▼ to `Read`. Press OK to select.
  The display shows the text message. The display shows a subject line if the message is from an e-mail application.
- Press ▲ or ▼ to `Read Later`. Press OK to select.
  The radio returns to the screen you were on prior to receiving the text message.
- Press ▲ or ▼ to `Delete`. Press OK to select.

2 Press ↩ to return to the Inbox.

Responding to Text Messages with Quick Text

1 Do one of the following:

- Press the programmed **Text Message** button. Proceed to Step 3.
- Press OK to access the menu.

2 Press ▲ or ▼ to `Messages`. Press OK to select.

3 Press ▲ or ▼ to `Inbox`. Press OK to select.

4 Press ▲ or ▼ to the required message. Press OK to select.
The display shows a subject line if the message is from an e-mail application.

5 Press OK to access the sub-menu.

6 Do one of the following:

- Press ▲ or ▼ to `Reply`. Press OK to select.

- Press ▲ or ▼ to `Quick Reply`. Press OK to select.

A blinking cursor appears. You can write or edit your message, if required.

7 Press OK once message is composed.

The display shows a transitional mini notice, confirming the message is being sent.

8 Wait for acknowledgment.

If successful:

- A tone sounds.
- The display shows a positive mini notice.

If unsuccessful:

- A tone sounds.
- The display shows a negative mini notice.
- The radio returns to the `Resend` option screen.

Forwarding Text Messages

Follow the procedure to forward text messages on your radio.

When you are at the `Resend` option screen:

1 Press ▲ or ▼ to `Forward`, and press OK to send the same message to another subscriber or group alias or ID.

2 Press ▲ or ▼ to the required alias or ID. Press OK to select.

The display shows a transitional mini notice, confirming your message is being sent.

3 Wait for acknowledgment.

If successful:

- A tone sounds.
- The display shows a positive mini notice.

If unsuccessful:

- A tone sounds.

- The display shows a negative mini notice.

Resending Text Messages

Follow the procedure to resend text messages on your radio.

When you are at the `Resend` option screen:

Press OK to resend the same message to the same subscriber or group alias or ID.

If successful:

- A positive indicator tone sounds.
- The display shows a positive mini notice.

If unsuccessful:

- A negative indicator tone sounds.
- The display shows a negative mini notice.
- The radio returns to the `Resend` option screen.

Deleting All Text Messages from the Inbox

Follow the procedure to delete all text messages from the Inbox on your radio.

1 Do one of the following:

- Press the programmed **Text Message** button. Proceed to step 3.
- Press OK to access the menu.

2 Press ▲ or ▼ to `Messages`. Press OK to select.

3 Press ▲ or ▼ to `Inbox`. Press OK to select.

If the Inbox is empty:

- The display shows `List Empty`.
- A tone sounds.

4 Press ▲ or ▼ to `Delete All`. Press OK to select.

5 Press ▲ or ▼ to Yes. Press OK to select.

The display shows a positive mini notice.

Deleting Saved Text Messages from the Drafts Folder

Follow the procedure to delete saved text message from drafts on your radio.

1 Do one of the following:

- Press the programmed **Text Message** button. Proceed to step 3.
- Press OK to access the menu.

2 Press ▲ or ▼ to Messages. Press OK to select.

3 Press ▲ or ▼ to Drafts. Press OK to select.

4 Press ▲ or ▼ to the required message. Press OK to select.

5 Press ▲ or ▼ to Delete. Press OK to delete the text message.

Sent Text Messages

Once a message is sent to another radio, it is saved in Sent Items folder. The most recent sent text message is always added to the top of the Sent Items folder. You can resend, forward or delete a Sent text message.

The Sent Items folder is capable of storing a maximum of 30 last sent messages. When the folder is full, the next sent text message automatically replaces the oldest text message in the folder.

If you exit the message sending screen while the message is being sent, the radio updates the status of the message in the Sent Items folder without providing any indication in the display or via sound.

If the radio changes mode or powers down before the status of the message in Sent Items folder is updated, the

radio cannot complete any In-Progress messages and automatically marks it with a **Send Failed** icon.

The radio supports a maximum of five In-Progress messages at one time. During this period, the radio cannot send any new message and automatically marks it with a **Send Failed** icon.

If you long press at any time, the radio returns to the Home screen.

NOTICE:
If the channel type, for example a conventional digital or Capacity Plus channel, is not a match, you can only edit, forward, or delete a Sent message.

Viewing Sent Text Messages

Follow the procedure to view sent text messages on your radio.

1 Do one of the following:
   - Press the programmed **Text Message** button. Proceed to step 3.
   - Press OK to access the menu.

2 Press ▲ or ▼ to `Messages`. Press OK to select.

3 Press ▲ or ▼ to `Sent Items`. Press OK to select.

   If the Sent Items folder is empty:
   - The display shows `List Empty`.
   - A low tone sounds, if the Keypad Tone is turned on.

4 Press ▲ or ▼ to the required message. Press OK to select.

   The display shows a subject line if the message is from an e-mail application.

Sending Sent Text Messages

Follow the procedure to send a sent text messages on your radio.

When you are viewing a Sent message:

1 Press OK .

2 Press ▲ or ▼ to Resend. Press OK to select.

The display shows a transitional mini notice, confirming your message is being sent.

3 Wait for acknowledgment.

If successful:

- A tone sounds.
- The display shows a positive mini notice.

If unsuccessful:

- A tone sounds.
- The display shows a negative mini notice.
- The radio proceeds to the Resend option screen. See Resending Text Messages on page 136 for more information.

Deleting All Sent Text Messages from the Sent Items Folder

Follow the procedure to delete all sent text messages from the Sent Items folder on your radio.

1 Do one of the following:

- Press the programmed **Text Message** button. Proceed to step 3.
- Press OK to access the menu.

2 Press ▲ or ▼ to Messages. Press OK to select.

3 Press ▲ or ▼ to Sent Items. Press OK to select.

If the Sent Items folder is empty:

- The display shows List Empty.
- A tone sounds.

4 Press ▲ or ▼ to Delete All. Press OK to select.

5 Do one of the following:

- Press ▲ or ▼ to Yes. Press OK to select. The display shows a positive mini notice.
- Press ▲ or ▼ to No. Press OK to select. The radio returns to the previous screen.

Quick Text Messages

Sending Quick Text Messages

Follow the procedure to send predefined Quick Text messages on your radio to a predefined alias.

1 Press the programmed **One Touch Access** button.

The display shows a transitional mini notice, confirming the message is being sent.

2 Wait for acknowledgment.

If successful:

- A positive indicator tone sounds.
- The display shows a positive mini notice.

If unsuccessful:

- A negative indicator tone sounds.
- The display shows a negative mini notice.
- The radio proceeds to the Resend option screen. See Resending Text Messages on page 136 for more information.

Privacy

This feature helps to prevent eavesdropping by unauthorized users on a channel by the use of a software-based scrambling solution. The signaling and user identification portions of a transmission are not scrambled.

Your radio must have privacy enabled on the channel to send a privacy-enabled transmission, although this is not a necessary requirement for receiving a transmission. While on a privacy-enabled channel, the radio is still able to receive clear or unscrambled transmissions.

Your radio supports Enhanced Privacy.

To unscramble a privacy-enabled call or data transmission, your radio must be programmed to have the same Key Value and Key ID for Privacy as the transmitting radio.

If your radio receives a scrambled call that is of a different Key Value and Key ID, you hear nothing at all for Enhanced Privacy.

On a privacy-enabled channel, your radio is able to receive clear or unscrambled calls, depending on how your radio is programmed. In addition, your radio may play a warning tone or not, depending on how it is programmed.

NOTICE:
This feature is not applicable in Citizens Band channels that are in the same frequency.

The green LED lights up when the radio is transmitting, and blinks rapidly when the radio is receiving an ongoing privacy-enabled transmission.

NOTICE:
Some radio models may not offer this Privacy feature, or may have a different configuration. Check with your dealer or system administrator for more information.

Turning Privacy On or Off

Follow the procedure to turn privacy on or off on your radio.

1. Do one of the following:
   - Press the programmed **Privacy** button. Skip the steps below.
   - Press OK to access the menu.
2. Press ▲ or ▼ to `Utilities`. Press OK to select.
3. Press ▲ or ▼ to `Radio Settings`. Press OK to select.
4. Press ▲ or ▼ to `Privacy`. Press OK to select.
5. Do one of the following:
   - Press ▲ or ▼ to `On`. Press OK to select. The display shows ✓ beside `On`.

- Press ▲ or ▼ to `Off`. Press OK to select. The display shows ✓ beside `Off`.

Response Inhibit

This feature helps prevent your radio from responding to any incoming transmissions.

NOTICE:
This is a purchasable feature. Check with your dealer or system administrator to determine how your radio has been programmed.

If enabled, your radio does not generate any outgoing transmissions in respond to incoming transmissions, such as Radio Check, Call Alert, Radio Disable, Remote Monitor, Automatic Registration Service (ARS), Responding to Private Messages, and Sending GNSS location reports. Your radio cannot receive Confirmed Private Calls when this feature is enabled. However, your radio is able to manually send transmission.

Turning Response Inhibit On or Off

Follow the procedure to enable or disable Response Inhibit on your radio.

Press the programmed **Response Inhibit** button.

If successful:

- A positive indicator tone sounds.
- The display shows a momentary positive mini notice.

If unsuccessful:

- A negative indicator tone sounds.
- The display shows a momentary negative mini notice.

Stun/Revive

This feature allows you to enable or disable any radio in the system. For example, the dealer or system administrator may want to disable a stolen radio to prevent unauthorized users from using it, and enable the radio when it is recovered.

A radio can be disabled (stunned) or enabled (revived) either through the console or through a command initiated by another radio.

Once a radio is disabled, the radio sounds a negative indicator tone and the home screen shows `Channel Denied`.

When a radio is stunned, the radio cannot request nor receive any user initiated services on the system that performed the Stun procedure. However, the radio can switch to another system. The radio continues to send GNSS location reports and can be monitored remotely when it was stunned.

NOTICE:
The dealer or system administrator may permanently disable a radio. See Radio Kill on page 147 for more information.

Stunning a Radio

Follow the procedure to disable a radio.

1. Press the programmed **Radio Disable** button.
2. Press ▲ or ▼ to the required alias or ID. Press OK to select.

   The display shows `Radio Disable: <Subscriber Alias or ID>`. The green LED blinks.
3. Wait for acknowledgment.

   If successful:

   - A positive indicator tone sounds.
   - The display shows a positive mini notice.

   If unsuccessful:

   - A negative indicator tone sounds.
   - The display shows a negative mini notice.

Stunning a Radio by Using the Contacts List

Follow the procedure to disable a radio by using the Contacts List.

1. Press OK to access the menu.
2. Press ▲ or ▼ to `Contacts`. Press OK to select.
3. Press ▲ or ▼ to the required alias or ID. Press OK to select.

4 Press ▲ or ▼ to `Radio Disable`. Press OK to select.

The display shows `Radio Disable: <Subscriber Alias or ID>`. The green LED blinks.

5 Wait for acknowledgment.

If successful:

- A positive indicator tone sounds.
- The display shows a positive mini notice.

If unsuccessful:

- A negative indicator tone sounds.
- The display shows a negative mini notice.

Stunning a Radio by Using the Manual Dial

Follow the procedure to disable a radio by using the manual dial.

1 Press OK to access the menu.

2 Press ▲ or ▼ to `Contacts`. Press OK to select.

3 Press ▲ or ▼ to `Manual Dial`. Press OK to select.

4 Enter the subscriber ID, and press OK to proceed.

5 Press ▲ or ▼ to `Radio Disable`. Press OK to select.

The display shows a transitional mini notice, indicating the request is in progress. The green LED blinks.

6 Wait for acknowledgment.

If successful:

- A positive indicator tone sounds.
- The display shows a positive mini notice.

If unsuccessful:

- A negative indicator tone sounds.
- The display shows a negative mini notice.

Reviving a Radio

Follow the procedure to enable a radio.

1. Press the programmed **Radio Enable** button.
2. Press ▲ or ▼ to the required alias or ID. Press OK to select.

   The display shows `Radio Enable: <Subscriber Alias or ID>`. The green LED lights up.
3. Wait for acknowledgment.

   If successful:

   - A positive indicator tone sounds.
   - The display shows a positive mini notice.

   If unsuccessful:

   - A negative indicator tone sounds.
   - The display shows a negative mini notice.

Reviving a Radio by Using the Contacts List

Follow the procedure to enable a radio by using the Contacts List.

1. Press OK to access the menu.
2. Press ▲ or ▼ to `Contacts`. Press OK to select.
3. Press ▲ or ▼ to the required alias or ID. Press OK to select.

4 Press ▲ or ▼ to `Radio Enable`. Press OK to select.

The display shows `Radio Enable: <Subscriber Alias or ID>`. The green LED lights up.

5 Wait for acknowledgment.

If successful:

- A positive indicator tone sounds.
- The display shows a positive mini notice.

If unsuccessful:

- A negative indicator tone sounds.
- The display shows a negative mini notice.

Reviving a Radio by Using the Manual Dial

Follow the procedure to enable a radio by using the Manual Dial.

1 Press OK to access the menu.

2 Press ▲ or ▼ to `Contacts`. Press OK to select.

3 Press ▲ or ▼ to `Manual Dial`. Press OK to select.

4 Press ▲ or ▼ to `Private Call`. Press OK to select.

The first text line shows `Radio Number:`.

5 Enter the subscriber ID, and press OK to proceed.

6 Press ▲ or ▼ to `Radio Enable`. Press OK to select.

The green LED lights up.

Radio Kill

This feature is an enhanced security measure to restrict unauthorized access to a radio.

Radio Kill causes a radio to be rendered inoperable. For example, the dealer or system administrator may want to kill a stolen or misplaced radio to prevent unauthorized usage.

When powered on, a killed radio displays `Radio Killed` on the screen momentarily to indicate the killed state.

NOTICE:
A killed radio can only be revived at a Motorola Solutions service depot. Check with your dealer or system administrator for more information.

Lone Worker

This feature prompts an emergency to be raised if there is no user activity, such as any radio button press or activation of the channel selector, for a predefined time.

Following no user activity for a programmed duration, the radio pre-warns you using an audio indicator once the inactivity timer expires.

If there is still no acknowledgment by you before the predefined reminder timer expires, the radio initiates an emergency condition as programmed by the dealer or system administrator.

See Emergency Operation on page 118 for more information.

NOTICE:
Check with your dealer or system administrator for more information.

Password Lock Features

This feature allows you to restrict access to the radio by asking for a password when the device is turned on.

Accessing Radios by Using Passwords

Follow the procedure to access your radio by using a password.

1 Enter the current four-digit password.

- Press ▲ or ▼ to edit the numeric value of each digit, and press OK to enter and move to the next digit.

2 Press OK to enter the password.

If successful, the radio powers up.
If unsuccessful:

- After the first and second attempt, the display shows `Wrong Password`. Repeat step 1.
- After the third attempt, the display shows `Wrong Password` and then, `Radio Locked`. A tone sounds. The yellow LED double blinks. Your radio enters into locked state for 15 minutes.

NOTICE:
In locked state, your radio responds to inputs from the **On/Off/Volume Control Knob** and programmed **Backlight** button only.

Turning Password Lock On or Off

Follow the procedure to turn password lock on or off on your radio.

1 Press OK to access the menu.

2 Press ▲ or ▼ to `Utilities`. Press OK to select.

3 Press ▲ or ▼ to `Radio Settings`. Press OK to select.

4 Press ▲ or ▼ to `Passwd Lock`. Press OK to select.

5 Enter the current four-digit password.

- Use a keypad microphone.
- Press ▲ or ▼ to edit the numeric value of each digit, and press OK to enter and move to the next digit.

A positive indicator tone sounds for every digit pressed.

6 Press OK to enter the password.

If the password is incorrect, the display shows `Wrong Password` and automatically returns to the previous menu.

7 Do one of the following:

- Press ▲ or ▼ to `Turn On`. Press OK to select.
  The display shows ✓ beside `Turn On`.
- Press ▲ or ▼ to `Turn Off`. Press OK to select.
  The display shows ✓ beside `Turn Off`.

Unlocking Radios in Locked State

Your radio is unable to receive calls in locked state. Follow the procedure to unlock your radio in locked state.

Do one of the following:

- If the radio is powered on, wait for 15 minutes and then repeat the steps in Accessing Radios by Using Passwords on page 147 to access the radio.
- If the radio is powered off, power up the radio. Your radio restarts the 15-minute timer for locked state. A tone sounds. The yellow LED double blinks. The display shows `Radio Locked`.

  Wait for 15 minutes and then repeat the steps in Accessing Radios by Using Passwords on page 147 to access the radio.

Changing Passwords

Follow the procedure to change passwords on your radio.

1 Press OK to access the menu.

2 Press ▲ or ▼ to `Utilities`. Press OK to select.

3 Press ▲ or ▼ to `Radio Settings`. Press OK to select.

4 Press ▲ or ▼ to `Passwd Lock`. Press OK to select.

5 Enter the current four-digit password, and press OK to proceed.

If the password is incorrect, the display shows `Wrong Password` and automatically returns to the previous menu.

6 Press ▲ or ▼ to `Change PWD`. Press OK to select.

7 Enter a new four-digit password, and press OK to proceed.

8 Re-enter the new four-digit password, and press OK to proceed.

If successful, the display shows `Password Changed`. If unsuccessful, the display shows `Passwords Do Not Match`.

The screen automatically returns to the previous menu.

Notification List

Your radio has a Notification list that collects all your unread events on the channel, such as unread text messages, telemetry messages, missed calls, and call alerts.

The display shows the **Notification** icon when the Notification list has one or more events.

The list supports a maximum of 40 unread events. When the list is full, the next event automatically replaces the oldest event. After the events are read, they are removed from the Notification list.

For text messages, missed calls, and call alert events, the maximum number of notifications are 30 text messages and 10 missed calls or call alerts. This maximum number depends on individual feature (job tickets or text messages or missed calls or call alerts) list capability.

Accessing Notification List

Follow the procedure to access the Notification list on your radio.

1 Do one of the following:

- Press the programmed **Notification** button. Skip the steps below.
- Press OK to access the menu.

2 Press OK to access the menu.

3 Press ▲ or ▼ to `Notification`. Press OK to select.

4 Press ▲ or ▼ to the required event. Press OK to select.

Long press ⌂ to return to the Home screen.

Over-the-Air Programming

Your dealer can remotely update your radio by using Over-the-Air Programming (OTAP) without physical connection. Additionally, some settings can also be configured by using OTAP.

When your radio undergoes OTAP, the green LED blinks.

When your radio receives high volume data:

- The display shows the **High Volume Data** icon.
- The channel becomes busy.
- A negative tone sounds if you press the **PTT** button.

When OTAP completes, depending on the configuration:

- A tone sounds. The display shows `Updating Restarting`. Your radio restarts by powering off and on again.
- You can select `Restart Now` or `Postpone`. When you select `Postpone`, your radio returns to the previous screen. The display shows the **OTAP Delay Timer** icon until the automatic restart occurs.

When your radio powers up after automatic restart:

- If successful, the display shows `Sw Update Completed`.

- If unsuccessful, the display shows `Sw Update Failed`.

See Checking Software Update Information on page 178 for the updated software version.

Received Signal Strength Indicator

This feature allows you to view the Received Signal Strength Indicator (RSSI) values.

The display shows the **RSSI** icon at the top right corner. See Display Icons for more information on the **RSSI** icon.

Viewing RSSI Values

Follow the procedure to view RSSI values on your radio.

When you are at the Home screen:

1. Press ◀ three times and immediately press ▶, all in 5 seconds.

   The display shows the current RSSI values.

2. Long press ⌂ to return to the Home screen.

Front Panel Programming

You are able to customize certain feature parameters in Front Panel Programming (FPP) to enhance the use of your radio.

The following buttons are used as required while navigating through the feature parameters.

Up/Down Navigation Button

Press to navigate through options horizontally or vertically, or increase or decrease values.

Menu/OK Button

Press to select the option or enter a sub-menu.

Return/Home Button

Short press to return to the previous menu or exit the selection screen.

Long press at any time to return to the Home screen.

Entering Front Panel Programming Mode

Follow the procedure to enter front panel programming mode on your radio.

1 Press OK to access the menu.

2 Press ▲ or ▼ to `Utilities`. Press OK to select.

3 Press ▲ or ▼ to `Program Radio`. Press OK to select.

Editing FPP Mode Parameters

Use the following buttons as required while navigating through the feature parameters.

- ▲ , ▼ – Scroll through options, increase/decrease values, or navigate vertically.
- OK – Select the option or enter a sub-menu.
- – Short-press to return to previous menu or to exit the selection screen. Long-press to return to Home screen.

Wi-Fi Operation

Wi-Fi® is a registered trademark of Wi-Fi Alliance®.

NOTICE:
This feature is applicable to DP4601e only.

This feature allows you to setup and connect to a Wi-Fi network. Wi-Fi supports updates for radio firmware, codeplug, and resources such as language packs and voice announcement.

Turning Wi-Fi On or Off

The programmed **Wi-Fi On or Off** button is assigned by your dealer or system administrator. Check with your dealer or system administrator to determine how your radio has been programmed.

Voice Announcements for the programmed **Wi-Fi On or Off** button can be customized through CPS according to user requirements. Check with your dealer or system administrator for more information.

You can turn on or turn off Wi-Fi by performing one of the following actions.

- Press the programmed **Wi-Fi On or Off** button. Voice Announcement sounds Turning On Wi-Fi or Turning Off Wi-Fi.
- Access this feature using the menu.

  a. Press OK to access the menu.

  b. Press ▲ or ▼ to `WiFi` and press OK to select.

  c. Press ▲ or ▼ to `WiFi On` and press OK to select.

  Press OK to turn on Wi-Fi. The display shows ✓ beside `Enabled`.

  Press OK to turn off Wi-Fi. The ✓ disappears from beside `Enabled`.

Connecting to a Network Access Point

When you turn on Wi-Fi, the radio scans and connects to a network access point.

You can also connect to a network access point using the menu.

1. Press OK to access the menu.
2. Press ▲ or ▼ to `WiFi` and press OK to select.
3. Press ▲ or ▼ to `Networks` and press OK to select.
4. Press ▲ or ▼ to a network access point and press OK to select.

5 Press ▲ or ▼ to `Connect` and press OK to select.

When the connection is successful, the radio displays a notice and the network access point is saved into the profile list.

Checking Wi-Fi Connection Status

Follow the procedure to check the Wi-Fi Connection status.

Press the programmed **Wi-Fi Status Query** button for the connection status by using Voice Announcement. Voice Announcement sounds Wi-Fi is Off, Wi-Fi is On but No Connection, or Wi-Fi is On with Connection.

- The display shows `WiFi Off` when the Wi-Fi is turned off.
- The display shows `WiFi On, Connected` when the radio is connected to a network.
- The display shows `WiFi On, Disconnected` when the Wi-Fi is turned on but the radio is not connected to any network.

  Voice Announcements for the Wi-Fi status query results can be customized through CPS according to user requirements. Check with your dealer or system administrator for more information.

NOTICE:
The programmed **Wi-Fi Status Query** button is assigned by your dealer or system administrator. Check with your dealer or system administrator to determine how your radio has been programmed.

Refreshing the Network List

Follow the procedure to refresh the network list.

- Perform the following actions to refresh the network list through the menu.

  a. Press OK to access the menu.

  b. Press ▲ or ▼ to `WiFi` and press OK to select.

c. Press ▲ or ▼ to Networks and press OK to select.

When you enter the Networks menu, the radio automatically refreshes the network list.

- If you are already in the Networks menu, perform the following action to refresh the network list.

  Press ▲ or ▼ to Refresh and press OK to select.

  The radio refreshes and displays the latest network list.

Adding a Network

If a preferred network is not in the available network list, perform the following actions to add a network.

1. Press OK to access the menu.
2. Press ▲ or ▼ to WiFi and press OK to select.
3. Press ▲ or ▼ to Networks and press OK to select.
4. Press ▲ or ▼ to Add Network and press OK to select.
5. Enter the Service Set Identifier (SSID) and press OK .
6. Press ▲ or ▼ to Open and press OK to select.
7. Enter the password and press OK .

   The radio displays a positive mini notice to indicate that the network is successfully saved.

Viewing Details of Network Access Points

Follow the procedure to view details of network access points.

1. Press OK to access the menu.
2. Press ▲ or ▼ to WiFi and press OK to select.
3. Press ▲ or ▼ to Networks and press OK to select.
4. Press ▲ or ▼ to a network access point and press OK to select.
5. Press ▲ or ▼ to View Details and press OK to select.

   For a connected network access point, the Service Set Identifier (SSID), Security Mode, Media Access Control (MAC) address, and Internet Protocol (IP) address are displayed.

   For a non-connected network access point, the Service Set Identifier (SSID) and Security Mode are displayed.

Removing Network Access Points

Perform the following actions to remove network access points from the profile list.

1. Press OK to access the menu.
2. Press ▲ or ▼ to WiFi and press OK to select.
3. Press ▲ or ▼ to Networks and press OK to select.
4. Press ▲ or ▼ to the selected network access point and press OK to select.

5 Press ▲ or ▼ to `Remove` and press OK to select.

6 Press ▲ or ▼ to `Yes` and press OK to select.

The radio displays a positive mini notice to indicate that the selected network access point is successfully removed.

Utilities

This chapter explains the operations of the utility functions available in your radio.

Locking or Unlocking the Keypad

Follow the procedure to lock or unlock the keypad of your radio.

1 Press OK to access the menu.

2 Press ▲ or ▼ to `Utilities`. Press OK to select.

3 Press ▲ or ▼ to `Radio Settings`. Press OK to select.

4 Press ▲ or ▼ to `Keypad Lock`. Press OK to select.

- If the keypad is locked, the display shows `Keypad Locked`.
- If the keypad is unlocked, the display shows `Keypad Unlocked`.

The radio returns to the Home screen.

Identifying Cable Type

Do the following steps to select the type of cable your radio uses.

1 Press OK to access the menu.

2 Press ▲ or ▼ to `Utilities`. Press OK to select.

3 Press ▲ or ▼ to `Radio Settings`. Press OK to select.

4 Press ▲ or ▼ to `Cable Type`. Press OK to select.

5 Press ▲ or ▼ to change the selected option.

The current cable type is indicated by a ✓ .

Setting Menu Timer

You can set the time your radio stays in the menu before it automatically switches to the Home screen. Follow the procedure to set the menu timer.

1 Press OK to access the menu.

2 Press ▲ or ▼ to `Utilities`. Press OK to select.

3 Press ▲ or ▼ to `Radio Settings`. Press OK to select.

4 Press ▲ or ▼ to `Display`. Press OK to select.

5 Press ▲ or ▼ to `Menu Timer`. Press OK to select.

6 Press ▲ or ▼ to the required setting. Press OK to select.

Text-to-Speech

The Text-to-Speech feature can only be enabled by your dealer or system administrator. If Text-to-Speech is enabled, the Voice Announcement feature is automatically disabled. If Voice Announcement is enabled, then the Text-to-Speech feature is automatically disabled.

This feature enables the radio to audibly indicate the following features:

- Current Channel

- Current Zone
- Programmed button feature on or off
- Content of received text messages
- Content of received Job Tickets

This audio indicator can be customized per customer requirements. This feature is typically useful when the user is in a difficult condition to read the content shown on the display.

Setting Text-to-Speech

Follow the procedure to set the Text-to-Speech feature.

1 Press OK to access the menu.

2 Press ▲ or ▼ to `Utilities`. Press OK to select.

3 Press ▲ or ▼ to `Radio Settings`. Press OK to select.

4 Press ▲ or ▼ to `Voice Announcement`. Press OK to select.

5 Press ▲ or ▼ to any of the following features.

Press OK to select.

The available features are as follows:

- `All`
- `Messages`
- `Job Tickets`
- `Channel`
- `Zone`
- `Program Button`

✓ appears beside the selected setting.

Turning the Acoustic Feedback Suppressor Feature On or Off

This feature allows you to minimize acoustic feedback in received calls.

1. Press OK to access the menu.
2. Press ▲ or ▼ to `Utilities` and press OK to select.
3. Press ▲ or ▼ to `Radio Settings` and press OK to select.
4. Press ▲ or ▼ to `AF Suppressor` and press OK to select.

   You can also use ◀ or ▶ buttons to change the selected option.
5. Do one of the following.
   - Press OK to enable Acoustic Feedback Suppressor. The display shows ✓ beside `Enabled`.
   - Press OK to disable Acoustic Feedback Suppressor. The ✓ disappears from beside `Enabled`.

Turning Global Navigation Satellite System On or Off

Global Navigation Satellite System (GNSS) is a satellite navigation system that determines the radio precise location. GNSS includes Global Positioning System (GPS) and Global Navigation Satellite System (GLONASS).

NOTICE:
Selected radio models may offer GPS and GLONASS. GNSS constellation is configured by using CPS. Check with your dealer or system administrator to determine how your radio has been programmed.

1 Do one of the following steps to toggle GNSS on or off on your radio.

- Press the programmed **GNSS** button.
- Press OK to access the menu. Proceed to the next step.

2 Press ▲ or ▼ to `Utilities`. Press OK to select.

3 Press ▲ or ▼ to `Radio Settings`. Press OK to select.

4 Press ▲ or ▼ to `GNSS`. Press OK to select.

5 Press OK to enable or disable GNSS.

If enabled, ✓ appears beside `Enabled`.
If disabled, ✓ disappears beside `Enabled`.

Turning Introduction Screen On or Off

You can enable and disable the Introduction Screen by following the procedure.

1 Press OK to access the menu.

2 Press ▲ or ▼ to `Utilities`. Press OK to select.

3 Press ▲ or ▼ to `Radio Settings`. Press OK to select.

4 Press ▲ or ▼ to `Display`. Press OK to select.

5 Press ▲ or ▼ to `Intro Screen`. Press OK to select.

6 Press OK to enable or disable the Introduction Screen.

The display shows one of the following results:

- If enabled, ✓ appears beside `Enabled`.
- If disabled, ✓ disappears beside `Enabled`.

Turning Radio Tones/Alerts On or Off

You can enable and disable all radio tones and alerts, if needed, except for incoming Emergency alert tone . Follow the procedure to turn tones and alerts on or off on your radio.

1 Do one of the following:

- Press the programmed **Tones/Alerts** button. Skip the following steps.
- Press OK to access the menu.

2 Press ▲ or ▼ to `Utilities`. Press OK to select.

3 Press ▲ or ▼ to `Radio Settings`. Press OK to select.

4 Press ▲ or ▼ to `Tones/Alerts`. Press OK to select.

5 Press ▲ or ▼ to `All Tones`. Press OK to select.

6 Press OK to enable or disable all tones and alerts. The display shows one of the following results:

- If enabled, ✓ appears beside `Enabled`.
- If disabled, ✓ disappears beside `Enabled`.

Setting Tones/Alerts Volume Offset Levels

This feature adjusts the volume of the tones or alerts, allowing it to be higher or lower than the voice volume. Follow the procedure to set the tones and alerts volume offset levels on your radio.

1. Press OK to access the menu.
2. Press ▲ or ▼ to `Utilities`. Press OK to select.
3. Press ▲ or ▼ to `Radio Settings`. Press OK to select.
4. Press ▲ or ▼ to `Tones/Alerts`. Press OK to select.
5. Press ▲ or ▼ to `Vol. Offset`. Press OK to select.
6. Press ▲ or ▼ to the required volume offset level.

   A feedback tone sounds with each corresponding volume offset level.
7. Do one of the following:
   - Press OK to select. The required volume offset level is saved.
   - Press ↩ to exit. The changes are discarded.

Turning Talk Permit Tone On or Off

Follow the procedure to turn Talk Permit Tone on or off on your radio.

1. Press OK to access the menu.
2. Press ▲ or ▼ to `Utilities`. Press OK to select.

3 Press ▲ or ▼ to Radio Settings. Press OK to select.

4 Press ▲ or ▼ to Tones/Alerts. Press OK to select.

5 Press ▲ or ▼ to Talk Permit. Press OK to select.

6 Press OK to enable or disable the Talk Permit Tone.

The display shows one of the following results:

- If enabled, ✓ appears beside Enabled.
- If disabled, ✓ disappears beside Enabled.

Turning Power Up Tone On or Off

Follow the procedure to turn Power Up Tone on or off on your radio.

1 Press OK to access the menu.

2 Press ▲ or ▼ to Utilities. Press OK to select.

3 Press ▲ or ▼ to Radio Settings. Press OK to select.

4 Press ▲ or ▼ to Tones/Alerts. Press OK to select.

5 Press ▲ or ▼ to Power Up. Press OK to select.

6 Press OK to enable or disable the Power Up Tone. The display shows one of the following results:

- If enabled, ✓ appears beside Enabled.
- If disabled, ✓ disappears beside Enabled.

Setting Text Message Alert Tones

You can customize the text message alert tone for each entry in the Contacts list. Follow the procedure to set the text message alert tones on your radio.

1 Press OK to access the menu.

2 Press ▲ or ▼ to `Contacts`. Press OK to select.

3 Press ▲ or ▼ to the required alias or ID. Press OK to select.

4 Press ▲ or ▼ to `Message Alert`. Press OK to select.

5 Do one of the following:

- Press ▲ or ▼ to `Momentary`. Press OK to select.
  The display shows ✓ beside `Momentary`.
- Press ▲ or ▼ to `Repetitive`. Press OK to select.
  The display shows ✓ beside `Repetitive`.

Power Levels

You can customize the power setting to high or low for each channel.

High
This enables communication with radios located at a considerable distance from you.

Low
This enables communication with radios in closer proximity.

NOTICE:
This feature is not applicable in Citizens Band channels that are in the same frequency.

Setting Power Levels

Follow the procedure to set the power levels on your radio.

1 Do one of the following:

- Press the programmed **Power Level** button. Skip the steps below.
- Press OK to access the menu.

2 Press ▲ or ▼ to `Utilities`. Press OK to select.

3 Press ▲ or ▼ to `Radio Settings`. Press OK to select.

4 Press ▲ or ▼ to `Power`. Press OK to select.

5 Do one of the following:

- Press ▲ or ▼ to `High`. Press OK to select. The display shows ✓ beside `High`.
- Press ▲ or ▼ to `Low`. Press OK to select. The display shows ✓ beside `Low`.

6 Long press ↩ to return to the Home screen.

Adjusting Display Brightness

Follow the procedure to adjust the display brightness on your radio.

1 Do one of the following:

- Press the programmed **Brightness** button. Skip the following steps.
- Press OK to access the menu.

2 Press ▲ or ▼ to `Utilities`. Press OK to select.

3 Press ▲ or ▼ to `Radio Settings`. Press OK to select.

4 Press ▲ or ▼ to `Brightness`. Press OK to select.

The display shows the progress bar.

5 Press ▲ or ▼ to decrease or increase the display brightness. Press OK to select.

Setting Display Backlight Timer

You can set the display backlight timer of the radio as needed. The setting also affects the Menu Navigation Buttons and keypad backlighting accordingly. Follow the procedure to set the backlight timer on your radio.

1 Do one of the following:
- Press the programmed **Backlight** button. Skip the following steps.
- Press OK to access the menu.

2 Press ▲ or ▼ to `Utilities`. Press OK to select.

3 Press ▲ or ▼ to `Radio Settings`. Press OK to select.

4 Press ▲ or ▼ to `Display`. Press OK to select.

5 Press ▲ or ▼ to `Backlight Timer`. Press OK to select.

The display backlight and keypad backlighting are automatically turned off as the LED indicator is disabled. See Turning LED Indicators On or Off on page 169 for more information.

Turning Backlight Auto On or Off

You can enable and disable the backlight of the radio to turn on automatically as needed. If enabled, the backlight is turned on when the radio receives a call, Notification List event, or Emergency Alarm.

1 Press OK to access the menu.

2 Press ▲ or ▼ to `Utilities`. Press OK to select.

3 Press ▲ or ▼ to `Radio Settings`. Press OK to select.

4 Press ▲ or ▼ to `Backlight Auto`.

5 Press OK to enable or disable Backlight Auto.

The display shows one of the following results:

- If enabled, ✓ appears beside `Enabled`.
- If disabled, ✓ disappears beside `Enabled`.

Turning LED Indicators On or Off

Follow the procedure to turn the LED indicators on or off on your radio.

1 Press OK to access the menu.

2 Press ▲ or ▼ to `Utilities`. Press OK to select.

3 Press ▲ or ▼ to `Radio Settings`. Press OK to select.

4 Press ▲ or ▼ to `LED Indicator`. Press OK to select.

5 Press OK to enable or disable the LED indicator.

The display shows one of the following results:

- If enabled, ✓ appears beside `Enabled`.
- If disabled, ✓ disappears beside `Enabled`.

Setting Languages

Follow the procedure to set the languages on your radio.

1 Press OK to access the menu.

2 Press ▲ or ▼ to `Utilities`. Press OK to select.

3 Press ▲ or ▼ to `Radio Settings`. Press OK to select.

4 Press ▲ or ▼ to `Languages`. Press OK to select.

5 Press ▲ or ▼ to the required language. Press OK to select.

The display shows ✓ beside the selected language.

Turning Option Board On or Off

Option board capabilities within each channel can be assigned to programmable buttons. Follow the procedure to turn option board on or off on your radio.

Press the programmed **Option Board** button.

Turning Voice Announcement On or Off

This feature enables the radio to audibly indicate the current zone or channel the user has just assigned, or the programmable button the user has just pressed.
This is typically useful when the user has difficulty reading the content shown on the display.

This audio indicator can be customized according to customer requirements. Follow the procedure to turn Voice Announcement on or off on your radio.

1 Do one of the following:

- Press the programmed **Voice Announcement** button. Skip the following steps.
- Press OK to access the menu.

2 Press ▲ or ▼ to `Utilities`. Press OK to select.

3 Press ▲ or ▼ to `Radio Settings`. Press OK to select.

4 Press ▲ or ▼ to `Voice Announcement`. Press OK to select.

5 Press OK to enable or disable Voice Announcement.

- If enabled, ✓ appears beside `Enabled`.
- If disabled, ✓ disappears beside `Enabled`.

Turning Digital Microphone AGC On or Off

The Digital Microphone Automatic Gain Control (AGC) controls the microphone gain of the radio automatically while transmitting on a digital system.
This feature suppresses loud audio or boosts soft audio to a preset value in order to provide a consistent level of audio. Follow the procedure to turn Digital Microphone AGC on or off on your radio.

1 Press OK to access the menu.

2 Press ▲ or ▼ to `Utilities`. Press OK to select.

3 Press ▲ or ▼ to `Radio Settings`. Press OK to select.

4 Press ▲ or ▼ to `Mic AGC-D`. Press OK to select.

5 Press OK to enable or disable Digital Microphone AGC.

The display shows one of the following results:

- If enabled, ✓ appears beside `Enabled`.
- If disabled, ✓ disappears beside `Enabled`.

Switching Audio Route between Internal Radio Speaker and Wired Accessory

Follow the procedure to toggle audio routing between internal radio speaker and wired accessory.

You can toggle audio routing between the internal radio speaker and the speaker of a wired accessory with the condition that:

- The wired accessory with speaker is attached.
- The audio is not routed to an external Bluetooth accessory.

Press the programmed **Audio Toggle** button.

A tone sounds when the audio route has switched.

Powering down the radio or detaching the accessory resets the audio routing to the internal radio speaker.

Turning Intelligent Audio On or Off

Your radio automatically adjusts the audio volume to overcome current background noise in the environment, inclusive of both stationary and non-stationary noise sources. This is a receive-only feature and does not affect transmission audio. Follow the procedure to turn Intelligent Audio on or off on your radio.

NOTICE:
This feature is not applicable during a Bluetooth session.

1 Do one of the following:
   - Press the programmed **Intelligent Audio** button. Skip the steps below.
   - Press OK to access the menu.

2 Press ▲ or ▼ to `Utilities`. Press OK to select.

3 Press ▲ or ▼ to `Radio Settings`. Press OK to select.

4 Press ▲ or ▼ to `Intelligent Audio`. Press OK to select.

5 Do one of the following:

- Press ▲ or ▼ to On. Press OK to select. The display shows ✓ beside On.
- Press ▲ or ▼ to Off. Press OK to select. The display shows ✓ beside Off.

Turning Trill Enhancement On or Off

You can enable this feature when you are speaking in a language that contains many words with alveolar trill (rolling "R") pronunciations. Follow the procedure to turn Trill Enhancement on or off on your radio.

1 Do one of the following:

- Press the programmed **Trill Enhancement** button. Skip the steps below.
- Press OK to access the menu.

2 Press ▲ or ▼ to Utilities. Press OK to select.

3 Press ▲ or ▼ to Radio Settings. Press OK to select.

4 Press ▲ or ▼ to Trill Enhance. Press OK to select.

5 Do one of the following:

- Press ▲ or ▼ to On. Press OK to select. The display shows ✓ beside On.
- Press ▲ or ▼ to Off. Press OK to select. The display shows ✓ beside Off.

Turning the Microphone Dynamic Distortion Control Feature On or Off

This feature allows you to enable the radio to automatically monitor the microphone input and adjust the microphone gain value to avoid audio clipping.

1 Press OK to access the menu.

2 Press ▲ or ▼ to Utilities. Press OK to select.

3 Press ▲ or ▼ to Radio Settings. Press OK to select.

4 Press ▲ or ▼ to Mic Distortion. Press OK to select.

5 Do one of the following:

- Press OK to enable Microphone Dynamic Distortion Control. If enabled, ✓ appears beside Enabled.
- Press OK to disable Microphone Dynamic Distortion Control. If disabled, ✓ disappears beside Enabled.

Setting Audio Ambience

Follow the procedure to set the audio ambience on your radio according to your environment.

1 Press OK to access the menu.

2 Press ▲ or ▼ to Utilities. Press OK to select.

3 Press ▲ or ▼ to Radio Settings. Press OK to select.

4 Press ▲ or ▼ to Audio Ambience. Press OK to select.

5 Press ▲ or ▼ to the required setting. Press OK to select.

The settings are as follows.

- Choose Default for the default factory settings.

- Choose `Loud` to increase speaker loudness when using in noisy surroundings.
- Choose `Work Group` to reduce acoustic feedback when using with a group of radios that are near to each other.

The display shows ✓ beside the selected setting.

Setting Audio Profiles

Follow the procedure to set audio profiles on your radio.

1. Press OK to access the menu.
2. Press ▲ or ▼ to `Utilities`. Press OK to select.
3. Press ▲ or ▼ to `Radio Settings`. Press OK to select.
4. Press ▲ or ▼ to `Audio Profiles`. Press OK to select.
5. Press ▲ or ▼ to the required setting. Press OK to select.

   The settings are as follows.

   - Choose `Default` to disable the previously selected audio profile and return to the default factory settings.
   - Choose `Level 1`, `Level 2`, or `Level 3` for audio profiles intended to compensate for noise-induced hearing loss that is typical for adults over 40 years of age.
   - Choose `Treble Boost`, `Mid Boost`, or `Bass Boost` for audio profiles that align with your preference for tinnier, more nasal, or deeper sounds.

   The display shows ✓ beside the selected setting.

General Radio Information

Your radio contains information on various general parameters.

The general information of your radio is as follows:

- Battery information.
- Radio alias and ID.
- Firmware and Codeplug versions.
- Software update.
- GNSS information.
- Site information.
- Received Signal Strength Indicator.

NOTICE:

Press to return to the previous screen. Long press to return to the Home screen. The radio exits the current screen once the inactivity timer expires.

Accessing Battery Information

Displays information of your radio battery.

1 Press OK to access the menu.

2 Press ▲ or ▼ to `Utilities`. Press OK to select.

3 Press ▲ or ▼ to `Radio Info.` Press OK to select.

4 Press ▲ or ▼ to `Battery Info.` Press OK to select. The display shows the battery information.

NOTICE:
For **IMPRES** batteries only: The display reads `Recondition Battery` when the battery requires reconditioning in an IMPRES charger. After the reconditioning process, the display then shows the battery information.

Checking Radio Alias and ID

Follow the procedure to check the radio alias and ID on your radio.

1 Do one of the following:

- Press the programmed **Radio Alias and ID** button. Skip the following steps.

A positive indicator tone sounds.

You can press the programmed **Radio Alias and ID** button to return to the previous screen.

- Press OK to access the menu.

2 Press ▲ or ▼ to `Utilities`. Press OK to select.

3 Press ▲ or ▼ to `Radio Info`. Press OK to select.

4 Press ▲ or ▼ to `My ID`. Press OK to select.

The first text line shows the radio alias. The second text line shows the radio ID.

Checking Firmware and Codeplug Versions

Follow the procedure to check the firmware and codeplug versions on your radio.

1 Press OK to access the menu.

2 Press ▲ or ▼ to `Utilities`. Press OK to select.

3 Press ▲ or ▼ to `Radio Info`. Press OK to select.

4 Press ▲ or ▼ to `Versions`. Press OK to select.

The display shows the current firmware and codeplug versions.

Checking GNSS Information

Displays the GNSS information on your radio, such as values of:

- Latitude
- Longitude
- Altitude
- Direction

- Velocity
- Horizontal Dilution of Precision (HDOP)
- Satellites
- Version

1. Press OK to access the menu.
2. Press ▲ or ▼ to `Utilities`. Press OK to select.
3. Press ▲ or ▼ to `Radio Info`. Press OK to select.
4. Press ▲ or ▼ to `GNSS Info`. Press OK to select.
5. Press ▲ or ▼ to the required item. Press OK to select. The display shows the requested GNSS information.

Checking Software Update Information

This feature shows the date and time of the latest software update carried out through OTAP or Wi-Fi. Follow the procedure to check the software update information on your radio.

1. Press OK to access the menu.
2. Press ▲ or ▼ to `Utilities`. Press OK to select.
3. Press ▲ or ▼ to `Radio Info`. Press OK to select.
4. Press ▲ or ▼ to `SW Update`. Press OK to select.

   The display shows the date and time of the latest software update.

Software Update menu is only available after at least one successful OTAP or Wi-Fi session. See Over-the-Air Programming on page 397 for more information.

Displaying Site Information

Follow the procedure to display the current site name your radio is on.

1. Press OK to access the menu.
2. Press ▲ or ▼ to `Utilities`. Press OK to select.
3. Press ▲ or ▼ to `Radio Info`. Press OK to select.
4. Press ▲ or ▼ to `Site Info`. Press OK to select.

The display shows the current site name.

This page intentionally left blank.

Connect Plus Operations

Connect Plus is a full trunking solution based on DMR technology. Connect Plus uses a dedicated control channel for channel requests and allocations. Features that are available to the radio users under this system are available in this chapter.

Additional Radio Controls in Connect Plus Mode

This chapter explains the additional radio controls available to the radio user through preprogrammed means such as programmable buttons and assignable radio functions.

Push-To-Talk (PTT) Button

The **PTT** button on the side of the radio serves two basic purposes:

- While a call is in progress, the **PTT** button allows the radio to transmit to other radios in the call.

  Press and hold the **PTT** button to talk. Release the **PTT** button to listen.

  The microphone is activated when the **PTT** button is pressed.

- While a call is not in progress, the **PTT** button is used to make a new call (see Making a Radio Call on page 197).

If the Talk Permit Tone (see Turning the Talk Permit Tone On or Off on page 269) is enabled, wait until the short alert tone ends before talking.

Programmable Buttons

Your dealer can program the programmable buttons as shortcuts to radio functions depending on the duration of a button press:

Short press
Pressing and releasing rapidly.

Long press
Pressing and holding for the programmed duration.

NOTICE:
The programmed duration of a button press is applicable for all assignable radio/utility functions or settings. See Emergency Operation on page 227 for more information on the programmed duration of the *Emergency* button.

Assignable Radio Functions

Beacon On/Off
Toggles the Beacon feature on or off. Requires purchase of Connect Plus Man Down feature.

Beacon Reset
Resets (cancels) the Beacon tone, but it does not turn the Beacon feature off. Requires purchase of Connect Plus Man Down feature.

Bluetooth® Audio Switch
Toggles audio routing between internal radio speaker and external Bluetooth-enabled accessory.

Bluetooth Connect
Initiates a Bluetooth find-and-connect operation.

Bluetooth Disconnect
Terminates all existing Bluetooth connections between your radio and any Bluetooth-enabled devices.

Bluetooth Discoverable
Enables your radio to enter Bluetooth Discoverable Mode.

Busy Queue Cancellation
Exits the busy mode when a non-Emergency call in the Busy Queue was initiated. Emergency calls, once accepted into the Busy Queue, cannot be cancelled.

Call Log
Selects the call log list.

Channel Announcement
Plays zone and channel announcement voice messages for the current channel.

Contacts
Provides direct access to the Contacts list.

Emergency On/Off
Depending on the programming, initiates or cancels an emergency.

Indoor Location
Toggles Indoor Location on or off.

Intelligent Audio
Toggles intelligent audio on or off.

Man Down Alarms On/Off
Toggles all configured Man Down Alarms on or off. Requires purchase of Connect Plus Man Down feature.

Man Down Alarms Reset
If pressed while a Man Down feature Alert Tone is playing, the tone is cancelled and feature timers are reset, but it does not turn the Man Down Alarms off. Requires purchase of Man Down feature.

Manual Dial
Depending on the programming, initiates a Private or Phone Call by keying in any subscriber ID or phone number.

One Touch Access
Directly initiates a predefined Private Call, a Call Alert, a Quick Text message, or Home Revert.

Privacy
Toggles privacy on or off.

Radio Check
Determines if a radio is active in a system.

Radio Enable
Allows a target radio to be remotely enabled.

Radio Disable
Allows a target radio to be remotely disabled.

Remote Monitor
Turns on the microphone of a target radio without it giving any indicators.

Reset Home Channel
Sets a new home channel.

Ring Alert Type
Provides direct access to the Ring Alert Type Setting.

Roam Request
Requests to search for a different site.

Scan
Toggles scan on or off.

Silence Home Channel Reminder
Mutes the Home Channel Reminder.

Site Lock On/Off
When toggled on, the radio searches the current site only. When toggled off, the radio searches other sites in addition to the current site.

Text Message
Selects the text message menu.

Vibrate Style
Configures the vibrate style.

Voice Announcement On/Off
Toggles voice announcement on or off.

Wi-Fi
Toggles Wi-Fi on or off.

Zone
Allows selection from a list of zones.

Assignable Settings or Utility Functions

AF Suppressor
Toggles the Acoustic Feedback Suppressor feature on or off.

All Tones/Alerts
Toggles all tones and alerts on or off.

Backlight
Toggles display backlight on or off.

Backlight Brightness
Adjusts the brightness level.

Display Mode
Toggles the day/night display mode on or off.

Global Navigation Satellite System (GNSS)
Toggles the satellite navigation system on or off.

Power Level
Toggles transmit power level between high and low.

Unassigned
Indicates that the button function has not yet been assigned.

Identifying Status Indicators in Connect Plus Mode

The radio display shows radio status, text entries, and menu entries.

Display Icons

The following are icons that appear on the display of the radio. Icons are displayed on the status bar, arranged left-most in order of appearance/usage and are channel specific.

	Received Signal Strength Indicator (RSSI) The number of bars displayed represents the radio signal strength. Four bars indicate the strongest signal. This icon is only displayed while receiving.
	Bluetooth Not Connected The Bluetooth feature is enabled but there is no remote Bluetooth device connected.

Table continued…

	Bluetooth Connected The Bluetooth feature is enabled. The icon stays lit when a remote Bluetooth device is connected.
	High Volume Data Radio is receiving high volume data and channel is busy.
	Indoor Location Available [4] Indoor location status is on and available.
	Indoor Location Unavailable [4] Indoor location status is on but unavailable due to Bluetooth disabled or Beacons Scan suspended by Bluetooth.
	Mute Mode Mute Mode is enabled and speaker is muted.
	Notification

Table continued…

	Notification List has one or more missed events.
L or H	**Power Level** Radio is set at Low power or Radio is set at High power.
	Tones Disable Tones are turned off.
	Option Board The Option Board is enabled.
	Option Board Non-Function The Option Board is disabled.
	GNSS Available The GPS/GNSS feature is enabled. The icon stays lit when a position fix is available.
	GNSS Not Available/Out of Range

Table continued…

[4] Only applicable for models with the latest software and hardware

	The GPS/GNSS feature is enabled but is not receiving data from the satellite.
	Scan Scan feature is enabled.
	Emergency Radio is in Emergency mode.
	Secure The Privacy feature is enabled.
	Unsecure The Privacy feature is disabled.
	Site Roaming The site roaming feature is enabled.
	Battery The number of bars (0 – 4) shown indicates the charge remaining in the battery. Blinks when the battery is low.
	Contact

Table continued…

	Radio contact is available.
	Call Log Radio call log.
	Message Incoming message.
	Ring Only Ringing mode is enabled.
	Silent Ring Silent ring mode is enabled.
	Vibrate Vibrate mode is enabled.
	Vibrate and Ring Vibrate and Ring mode is enabled.
	Wi-Fi Excellent [5] Wi-Fi signal is excellent.

Table continued…

	Wi-Fi Good [5] Wi-Fi signal is good.
	Wi-Fi Average [5] Wi-Fi signal is average.
	Wi-Fi Poor [5] Wi-Fi signal is poor.
	Wi-Fi Unavailable [5] Wi-Fi signal is unavailable.

Call Icons

The following icons appear on your radio display during a call. These icons also appear in the Contacts list to indicate ID type.

	Private Call Indicates a Private Call in progress. In the Contacts list, it indicates a subscriber alias (name) or ID (number).
	Group Call/Site All Call Indicates a Group Call or Site All Call in progress. In the Contacts list, it indicates a group alias (name) or ID (number).
	Phone Call as Private Call Indicates a Phone Call as Private Call in progress.

Table continued…

Advanced Menu Icons

The following icons appear beside menu items that offer a choice between two options or as an indication that there is a sub-menu offering two options.

	Checkbox (Empty) Indicates the option is not selected.

Table continued…

[5] Only applicable for DP4601e

	Checkbox (Checked) Indicates the option is selected.
	Solid Black Box Indicates the option selected for the menu item with a sub-menu.

Sent Item Icons

The following icons appear at the top right corner of the radio display in the Sent Items folder.

OR	**Sent Successfully** The text message has been successfully sent.
OR	**Send Failed** The text message has not been sent.

Table continued…

OR	**In Progress** • The text message to a group alias or ID is pending transmission. • The text message to a subscriber alias or ID is pending transmission, followed by waiting for acknowledgement.
OR	**Individual or Group Message Read** The text message has been read.
OR	**Individual or Group Message Unread** The text message has not been read.

Bluetooth Device Icons

The following icons also appear next to items in the list of Bluetooth-enabled devices available to indicate the device type.

	Bluetooth Data Device Bluetooth-enabled data device, such as a scanner.
	Bluetooth Audio Device Bluetooth-enabled audio device, such as a headset.
	Bluetooth PTT Device Bluetooth-enabled PTT device, such as a PTT-Only Device (POD).

LED Indicator

The LED indicator shows the operational status of your radio.

Blinking red	Battery mismatch occurs or radio is transmitting at low battery condition, receiving an emergency transmission or has failed the self-test upon powering up, or has moved out of range if radio is configured with Auto-Range Transponder System. Mute Mode is enabled.
Rapidly blinking red	Radio is receiving over-the-air file transfer (Option Board firmware file, Network Frequency file or Option Board Codeplug file) or upgrading to a new Option Board firmware file.
Blinking green and yellow	Radio is receiving a Call Alert, received a text message or Scan is enabled and is receiving activity.
Solid yellow	Radio is in Bluetooth Discoverable Mode.
Double blinking yellow	Radio is actively searching for a new site.

Table continued…

Blinking yellow	Radio is receiving a Call Alert or Scan is enabled and is idle (radio will remain muted to any activity).
Solid green	Radio is powering up or transmitting.
Blinking green	Radio is powering up, receiving a call or data.
Double blinking green	Radio is receiving a privacy-enabled call.

Indicator Tones

The following are the tones that sound through the radio speaker.

High pitched tone ☐ Low pitched tone ■

Indicator tones provide you with audible indications of the status after an action to perform a task is taken.

■☐	Positive Indicator Tone
☐■	Negative Indicator Tone

Alert Tones

Alert tones provide you with audible indications of the status, or response to data received on the radio.

Continuous Tone ■	A monotone sound. Sounds continuously until termination.
Periodic Tone ☐ ☐	Sounds periodically depending on the duration set by the radio. Tone starts, stops, and repeats itself.
Repetitive Tone ☐	A single tone that repeats itself until it is terminated by the user.
Momentary Tone ■	Sounds only once for a short period of time defined by the radio.

Switching Between Connect Plus and Non-Connect Plus Modes

To switch to a non-Connect Plus mode, you must change to another zone, if programmed by your dealer or system administrator. Check with your dealer or system administrator to see if your radio has been programmed with non-Connect Plus zones, and what features are available while operating in non-Connect Plus zones.

Making and Receiving Calls in Connect Plus Mode

This section explains general radio operations and call features that are available in your radio.

Selecting a Site

A site provides coverage for a specific area. A Connect Plus site has a site controller and a maximum of 15 repeaters. In a multi-site network, the Connect Plus radio will automatically search for a new site when the signal level from the current site drops to an unacceptable level.

Roam Request

A Roam Request tells the radio to search for a different site, even if the signal from the current site is acceptable.

If there are no sites available:

- The radio displays `Searching` and `Selected Channel Alias` and continues to search through the list of sites.
- The radio will return to the previous site, if the previous site is still available.

NOTICE:
This is programmed by your dealer.

Press the programmed **Roam Request** button.

You hear a tone, indicating the radio has switched to a new site. The display shows `Site ID <Site Number>`.

Site Lock On/Off

When toggled on, the radio searches the current site only. When toggled off, the radio searches other sites in addition to the current site.

Press the programmed **Site Lock** button.

If the **Site Lock** function is toggled on:

- You hear a positive indicator tone, indicating the radio has locked to the current site.
- The display shows `Site Locked`.

If the **Site Lock** function is toggled off:

- You hear a negative indicator tone, indicating the radio is unlocked.
- The display shows `Site Unlocked`.

Site Restriction

Your Connect Plus radio system administrator has the ability to decide which network sites your radio is and is not allowed to use. Your radio does not need to be reprogrammed to change the list of allowed and disallowed sites. If your radio attempts to register at a disallowed site, you see a brief message stating: `Site <number given> Not Allowed`. The radio then searches for a different network site.

Selecting a Zone

The radio can be programmed with a maximum of 16 Connect Plus Zones and each Connect Plus zone contains a maximum of 16 assignable positions on the Channel Selector Knob.

Each assignable knob position can be used to start one of the following voice call types:

- Group Call
- Multi-group Call
- Site All Call
- Private Call

1 Access the Zone feature by performing the following:

Radio Controls	Steps
Programmed Zone Selection button	Press the programmed **Zone Selection** button.
Radio menu	**a** Press OK to access the menu. **b** Press ▲ or ▼ to `Zone` and press OK to select.

The current zone is displayed and indicated by a ✓ .

2 Select the required zone.

Radio Control	Steps
▲ **or** ▼	Press ▲ or ▼ and scroll to the required zone.

3 Press OK to select.

The display shows `<Zone> Selected` momentarily and returns to the selected zone screen.

Using Multiple Networks

If your radio has been programmed to use multiple Connect Plus networks, you can select a different network by switching to the Connect Plus zone that is assigned to the desired network. These network-to-zone assignments are configured by your dealer through radio programming.

Selecting a Call Type

Use the Channel Selector Knob to select a call type. This can be a Group Call, Multi-group Call, Site All Call or Private Call, depending on how your radio is programmed. If you change the Channel Selector Knob to a different position (that has a call type assigned to it), this causes the radio to re-register with the Connect Plus site. The radio registers with the Registration Group ID that has been programmed for the new Channel Selector Knob position call type.

If you select a position that has no call type assigned to it, your radio sounds a continuous tone and the display shows `Unprogrammed`. Your radio does not operate when selected to an unprogrammed channel, use the Channel Selector Knob to select a programmed channel instead.

Once the required zone is displayed (if you have multiple zones in your radio), turn the programmed Channel Selector Knob to select the call type.

Receiving and Responding to a Radio Call

Once the channel, subscriber ID or call type is displayed, you can proceed to receive and respond to calls.

The LED lights up solid green while the radio is transmitting and blinks green when the radio is receiving.

NOTICE:
The LED lights up solid green while the radio is transmitting and double blinks green when the radio is receiving a privacy-enabled call. To unscramble a privacy-enabled call, your radio must have the same Privacy Key, OR the same Key Value and Key ID (programmed by your dealer), as the transmitting radio (the radio you are receiving the call from).

See Privacy on page 247 for more information.

Receiving and Responding to a Group Call

To receive a call from a group of users, your radio must be configured as part of that group.

When you receive a Group Call (while on the Home screen), the LED blinks green.The Group Call icon appears in the top right corner. The first text line shows the caller alias. The second text line displays the group call alias.

Your radio unmutes and the incoming call sounds through the radio speaker.

1. Hold the radio vertically 1 to 2 inches (2.5 to 5.0 cm) from your mouth.

   The LED lights up solid green.

2. Wait for one of the Talk Permit Tone to finish (if enabled), and speak clearly into the microphone.

3. Release the **PTT** button to listen.

   If there is no voice activity for a predetermined period of time, the call ends.

NOTICE:
See Making a Group Call on page 197 for details on making a Group Call.

Receiving and Responding to a Private Call

A Private Call is a call from an individual radio to another individual radio.

When you receive a Private Call, the LED blinks green. The Private Call icon appears in the top right corner. The first text line shows the caller alias. Your radio unmutes and the incoming call sounds through the speaker of the radio.

1. Hold the radio vertically 1 to 2 inches (2.5 to 5.0 cm) from your mouth.

2. Press the **PTT** button to respond to the call.

   The LED lights up solid green.

3. Wait for the Talk Permit Tone to finish (if enabled), and speak clearly into the microphone.

4. Release the **PTT** button to listen.

If there is no voice activity for a predetermined period of time, the call ends.

You hear a short tone. The display shows `Call Ended`.

See Making a Private Call on page 198 for details on making a Private Call.

Receiving a Site All Call

A Site All Call is a call from an individual radio to every radio on the site. It is used to make important announcements requiring the user's full attention.

When you receive an Site All Call, a tone sounds and the LED blinks green.

The Group Call icon appears in the top right corner. The first text line shows the caller alias. The second text line displays `Site All Call`. Your radio unmutes and the incoming call sounds through the radio speaker.

Once the Site All Call ends, the radio returns to the previous screen before receiving the call. A Site All Call does not wait for a predetermined period of time before ending.

You cannot respond to a Site All Call.

NOTICE:
See Making a Site All Call on page 199 for details on making a Site All Call.

The radio stops receiving the Site All Call if you switch to a different channel while receiving the call. During a Site All Call, you will not be able to use any programmed button functions until the call ends.

Receiving an Inbound Private Phone Call

When you receive an Inbound Private Phone Call, the Phone Call as Private Call icon appears in the top right corner. The first text line shows `Phone Call`.

1. Press and hold the **PTT** button to answer and talk. Release the **PTT** button to listen.

2. Long press to end the call.

   The first line of the display shows `Ending`. The second line of the display shows `Phone Call....`. The display returns to the Phone Call screen. The display shows `Phone Call Ended`.

Receiving an Inbound Phone Talkgroup Call

When you receive an Inbound Phone Talkgroup Call, the Group Call icon appears in the top right corner. The first text line shows `Call1`.

Press the **PTT** button to talk and release it to listen.

Inbound Phone Multi-Group Call

When you receive an Inbound Phone Multi-Group Call, the Group Call icon appears in the top right corner. The first text line shows `Multigroup Call`. The radio unmutes and the incoming multi-group call sounds through the radio speaker.

Making a Radio Call

After selecting your channel, you can select a subscriber alias or ID, or group alias or ID by using:

- The Channel Selector Knob.
- A programmed **One Touch Access** button – The One Touch Access feature allows you to make a Private Call to a predefined ID easily. This feature can be assigned to a short or long programmable button press. You can only have one ID assigned to a **One Touch Access** button. Your radio can have multiple **One Touch Access** buttons programmed.
- The Contacts list (see Contacts Settings on page 214).

NOTICE:
Your radio must have the Privacy feature enabled on the channel to send a privacy-enabled transmission. Only target radios with the same Key Value and Key ID as your radio will be able to unscramble the transmission.

See Privacy on page 247 for more information.

Making a Call with the Channel Selector Knob

This feature allows the radio users to make different call types : Group Call, Private Call, Site All Call, Multi-group Call.

Making a Group Call

To make a call to a group of users, your radio must be configured as part of that group.

1 Select the channel with the active group alias or ID. See Selecting a Call Type on page 193.

2 Hold the radio vertically 1 to 2 inches (2.5 to 5.0 cm) from your mouth.

3 Press the **PTT** button to make the call.

The LED lights up solid green. The Group Call icon appears in the top right corner. The first text line shows the group call alias.

4 Wait for the Talk Permit Tone to finish (if enabled), and speak clearly into the microphone.

5 Release the **PTT** button to listen.

When the target radio responds, the LED blinks green, the radio unmutes and the response sounds through the radio speaker. You see the Group Call icon, the group alias or ID, and transmitting radio alias or ID on your display.

If there is no voice activity for a predetermined period of time, the call ends. Radio returns to the screen you were on prior to initiating the call.

Making a Private Call

While you can receive and/or respond to a Private Call initiated by an authorized individual radio, your radio must be programmed for you to initiate a Private Call.

You will hear a negative indicator tone, when you make a Private Call using the Contacts list, Call Log, **One Touch Access** button, or the Channel Selector Knob, if this feature is not enabled.

Use the Text Message or Call Alert features to contact an individual radio. See Text Messaging on page 131 or Call Alert Operation on page 222 for more information.

1 Do one of the following.

- Select the channel with the active subscriber alias or ID. See Selecting a Call Type on page 193.
- Press the programmed **One Touch Access** button.

2 Hold the radio vertically 1 to 2 inches (2.5 to 5.0 cm) from your mouth.

3 Press the **PTT** button to make the call.

The LED lights up solid green. The Private Call icon appears on the top right corner. The first text line shows the target subscriber alias. The second text line displays the call status.

4 Wait for the Talk Permit Tone to finish (if enabled), and speak clearly into the microphone.

5 Release the **PTT** button to listen.

When the target radio responds, the LED blinks green.

If there is no voice activity for a predetermined period of time, the call ends. You hear a short tone. The display shows `Call Ended`.

Your radio may be programmed to perform a radio presence check prior to setting up the Private Call. If the target radio is not available, you hear a short tone and see negative mini notice on the display.

Making a Site All Call

This feature allows you to transmit to all users on the site that are currently not engaged in another call. Your radio must be programmed to allow you to use this feature.

Users on the channel/site cannot respond to an Site All Call.

1 Select the channel with the active Site All Call group alias. See Selecting a Call Type on page 193.

2 Hold the radio vertically 1 to 2 inches (2.5 to 5.0 cm) from your mouth.

3 Press the **PTT** button to make the call.

The LED lights up solid green. The Group Call icon appears in the top right corner. The first text line shows `Site All Call`.

4 Wait for the Talk Permit Tone to finish (if enabled), and speak clearly into the microphone.

Making a Multi-group Call

This feature allows you to transmit to all users on multiple groups. Your radio must be programmed to allow you to use this feature.

NOTICE:
Users on the groups cannot respond to a Multi-group Call.

1. Turn the Channel Selector Knob to select the Multi-group alias or ID.
2. Press the **PTT** button to make the call.

   The LED lights up solid green. The display shows the Multi-group alias or ID.

   Wait for the Talk Permit Tone to finish (if enabled) and speak clearly into the microphone.

Making a Private Call with a One Touch Call Button

NOTICE:
Programmable buttons press must be initiated from the Home screen.

The One Touch Call feature allows you to easily make a Private Call to a pre-defined Private Call alias or ID. This feature can be assigned to a short or long programmable button press.

You can ONLY have one alias or ID assigned to a One Touch Call button. Your radio can have multiple One Touch Call buttons programmed.

1. Press the programmed **One Touch Call** button to make a Private Call to the pre-defined Private Call alias or ID.
2. Hold the radio vertically 1 to 2 inches (2.5 to 5.0 cm) from your mouth.
3. Press the **PTT** button to make the call.

   The LED lights up solid green.

   The display shows the Private Call alias or ID.
4. Wait for the Talk Permit Tone to finish (if enabled) and speak clearly into the microphone.
5. Release the **PTT** button to listen.

When the target radio responds, the LED blinks green.

If there is no voice activity for a predetermined period of time, the call ends.

Advanced Features in Connect Plus Mode

This chapter explains the operations of the features available in your radio.

Home Channel Reminder

This feature provides a reminder when the radio is not set to the home channel for a period of time.

If this feature is enabled by using the CPS, the Home Channel Reminder tone and announcement sound, the first line of the display shows `Non` and the second line shows `Home Channel` periodically when the radio is not set to the home channel for a period of time.

You can respond to the reminder by performing one of the following actions:

- Return to the home channel.
- Mute the reminder temporarily by using the programmable button.
- Set a new home channel by using the programmable button.

Muting the Home Channel Reminder

When the Home Channel Reminder occurs, you can temporarily mute the reminder by performing the following action.

Press the **Silence Home Channel Reminder** programmable button.

The first line of the display shows `HCR` and the second line shows `Silenced`.

Setting a New Home Channel

When the Home Channel Reminder occurs, you can set a new home channel by performing one of the following actions:

- Press the **Reset Home Channel** programmable button.

  The first line of the display shows the channel alias and the second line shows `New Home Ch`.

- Set a new home channel via the menu:

  a. Press OK to access the menu.

  b. Press ▲ or ▼ to `Utilities` and press OK to select.

  c. Press ▲ or ▼ to `Radio Settings` and press OK to select.

  d. Press ▲ or ▼ to `Home Channel` and press OK to select.

  e. Select from the list of valid channels.

  The display shows ✓ beside the selected home channel alias.

Auto Fallback

Auto Fallback is a system feature that allows you to continue to make and receive non-emergency calls on the selected Group Contact in the event of certain types of Connect Plus system failures.

If one of these failures occurs, your radio attempts to roam to a different Connect Plus site. This search process may result in your radio finding an operable Connect Plus site, or it may result in your radio finding a “Fallback Channel” (if your radio is enabled for Auto Fallback). A Fallback Channel is a repeater that is normally part of an operable Connect Plus site, but is currently unable to communicate with either its site controller or the Connect Plus network. In Fallback mode, the repeater operates as a single digital repeater. Auto Fallback Mode supports non-emergency Group Calls only. No other call types are supported in Fallback Mode.

Indications of Auto Fallback Mode

When your radio is using a Fallback channel, you hear the intermittent “Fallback Tone” approximately once every 15 seconds (except while transmitting). The display periodically shows a brief message, “Fallback Channel”. Your radio only permits PTT on the selected Group Contact (Group Call, Multigroup Call, or Site All Call). It does not allow you to make other types of calls.

Making/Receiving Calls in Fallback Mode

NOTICE:
Calls are heard only by radios that are monitoring the same Fallback channel and selected to the same Group. Calls are not networked to other sites or other repeaters.
Emergency voice calls or Emergency Alerts are not available in Fallback mode. If you press the emergency button in Fallback mode, the radio provides an invalid key press tone. Display-equipped radios also show the message, “Feature not available”.

Private (radio to radio) and Phone calls are not available in Fallback mode. If you attempt a call to a private contact, you will receive a denial tone. At this point you should select a desired group contact. Other non-supported calls include Remote Monitor, Call Alert, Radio Check, Radio Enable, Radio Disable, Text messaging, Location Updates, and packet data calls.

Enhanced Traffic Channel Access (ETCA) is not supported in Auto Fallback mode. If two or more radio users press **PTT** at the same time (or at

almost the same time), it is possible that both radios transmit until **PTT** is released. In this event, it is possible that none of the transmissions will be understood by receiving radios.

Making calls in Fallback mode is similar to normal functioning. Simply select the group contact you wish to use (using the radio's normal channel selection method), and then press the **PTT** to start your call. It is possible that the channel may be in use already by another group. If the channel is in use, you receive a busy tone and the display will say "Channel Busy". You may select Group, Multi-group or Site All Call contacts using your radio's normal channel selection method. While the radio is operating on the Fallback Channel, the Multigroup operates just like other Groups. It is only heard by radios that are currently selected to the same Multi-group.

Returning to Normal Operation

If the site returns to normal trunking operation while you are in range of your Fallback repeater, your radio automatically exits Auto Fallback mode. You hear a registration "beep" when the radio successfully registers. If you are in the range of an operable site (that is not in Fallback mode), you may press the Roam Request button (if programmed for your radio) to force your radio to search for and register on an available site. If no other site is available, your radio returns to Auto Fallback mode after searching is complete. If you drive out of coverage of your Fallback repeater, your radio enters Search mode (display indicates `Searching`).

Radio Check

If enabled, this feature allows you to determine if another radio is active in a system without disturbing the user of that radio. No audible or visual notification is shown on the target radio.

This feature is only applicable for subscriber aliases or IDs.

Sending a Radio Check

1 Access the Radio Check feature.

Radio Control	Steps
Programmed Radio Check button	**a** Press the programmed **Radio Check** button.

Radio Control	Steps
	b Press ▲ or ▼ to the required subscriber alias or ID and press OK to select.
Menu	**a** Press OK to access the menu. **b** Press ▲ or ▼ to `Contacts` and press OK to select. **c** Press ▲ or ▼ to the required subscriber alias or ID and press OK to select. **d** Press ▲ or ▼ to `Radio Check` and press OK to select.

The display shows the Target Alias, indicating the request is in progress. The LED lights up solid green.

2 Wait for acknowledgment.

If the target radio is active in the system, a tone sounds and the display briefly shows `Target Radio Available.`

If the target radio is not active in the system, a tone sounds and the display briefly shows `Target Radio Not Available.`

Radio returns to the subscriber alias or ID screen when initiated via Menu.

Radio returns to the Home Screen if initiated via the programmable button.

Remote Monitor

Use the Remote Monitor feature to turn on the microphone of a target radio (subscriber alias or IDs only). The green LED will blink once on the target subscriber. You can use this feature to monitor, remotely, any audible activity surrounding the target radio.

Your radio must be programmed to allow you to use this feature.

Initiating Remote Monitor

NOTICE:
Remote Monitor automatically stops after a programmed duration or when there is any attempt to initiate transmission, change channels or power down the radio.

1 Access the Remote Monitor feature.

Radio Control	Steps
Programmed Remote Monitor Button	**a** Press the programmed **Remote Monitor** button. **b** Press ▲ or ▼ to the required subscriber alias or ID and press OK to select.
Menu	**a** Press OK to access the menu. **b** Press ▲ or ▼ to `Contacts` and press OK to select. **c** Press ▲ or ▼ to the required subscriber alias or ID and press OK to select. **d** Press ▲ or ▼ to `Manual Dial` and press OK to select. **e** Press ▲ or ▼ to `Remote Mon.` and press OK to select.

The first text line shows `Rem. Monitor`. The second text line displays the Target Alias, indicating the request is in progress. The LED lights up blinking green.

2 Wait for acknowledgment.

If successful, a positive indicator tone sounds and the display momentarily shows `Rem. Monitor Successful`. Your radio starts playing audio from the monitored radio for a programmed duration and display shows `Rem. Monitor`, followed by target

alias. Once the timer expires, the radio sounds an alert tone and the LED turns off.

If unsuccessful, the radio sounds a negative indicator tone the display shows `Rem. Monitor Failed`.

Scan

This feature allows your radio to monitor and join calls for groups defined in a pre-programmed scan list. When scan is enabled, the scan icon appears on the status bar and the LED blinks yellow when idle.

Starting and Stopping Scan

NOTICE:
This procedure turns the Scan feature On or Off for all Connect Plus zones with the same Network ID as your currently selected zone. It is important to note that even when the Scan feature is turned on via this procedure, scan may still be disabled for some (or all) groups on your scan list. See Editing the Scan List on page 209 for more information.

You can start and stop scanning by pressing the programmed **Scan** button **OR** follow the procedure described next.

1. Press OK to access the menu.
2. Press ▲ or ▼ to `Scan` and press OK to select.
3. Press ▲ or ▼ to `Turn On` or `Turn Off` and press OK to select.
   - The display shows `Scan On` if scan is enabled.
   - The Scan menu shows `Turn Off` if scan is enabled.
   - The display shows `Scan Off` if scan is disabled.
   - The Scan menu shows `Turn On` if scan is disabled.

Responding to a Transmission During a Scan

During scanning, your radio stops on a group where activity is detected. The radio continuously listens for any member in the scan list when idle on the control channel.

1. Hold the radio vertically 1 to 2 inches (2.5 to 5.0 cm) from your mouth.
2. Press the **PTT** button during hang time.

   The LED lights up solid green.
3. Wait for the Talk Permit Tone to finish (if enabled), and speak clearly into the microphone.
4. Release the **PTT** button to listen.

   If you do not respond within the hang time, the radio returns to scanning other groups.

User Configurable Scan

If the Edit List menu is enabled, a user is able to Add and Remove the scan members from the Add Member menu. A Scan List member must be a regular Group Contact (for example, not Multi-group or Site All Call/Network Wide All Call) that is currently assigned to a Channel Selector position in a Connect Plus Zone with the same Network ID as the currently selected Zone. The Talkgroup alias must not match any Talkgroup that has been included in the current Zone Scan List.

Scan can be turned on or off from the menu or by pressing a programmed **Scan On/Off** button.

This feature functions only when the radio is not currently involved in a call. If you are presently listening to a call, your radio cannot scan for other group calls, and is therefore unaware they are in progress. Once your call is finished, your radio returns to the control channel time slot and is able to scan for groups that are in the scan list.

Editing the Scan List

NOTICE:
If the scan list entry happens to be the currently selected group, the radio listens for activity on this group regardless of whether the list entry currently shows a check mark or not. Whenever a radio is not in a call, the radio listens for activity on its Selected Group, Multi-group, the Site All Call, and its Default Emergency Revert Group (if configured for one). This operation cannot be disabled. If Scan is enabled the radio will also listen for activity on enabled Zone Scan List members.

Your scan list determines which groups can be scanned. The list is created when your radio is programmed. If your radio has been programmed to allow you to edit the scan list, you can:

- Enable/disable scan for individual groups on the list.
- Add and Remove the scan members from the Add Member menu. Refer to Add or Delete a Group via the Add Members Menu on page 210.

NOTICE:
A Scan List member must be a regular Group Contact (not Multi-group or Site All Call/Network Wide All Call) that is currently assigned to a Channel Selector position in a Connect Plus Zone with the same Network ID as the currently selected Zone.
The Talkgroup alias must not match any Talkgroup that has been included in the current Zone Scan List.

1. Press OK to access the menu.
2. Press ▲ or ▼ to `View/Edit List` and press OK to select.
3. Press ▲ or ▼ to the desired Group name.

   If a check mark precedes the Group name, then scan is currently enabled for this Group.

   If there is no check mark preceding the Group name, then scan is currently disabled for this Group.

4 OK to select the desired Group.

The display shows `Enable` if scan is currently disabled for the Group.

The display shows `Disable` if scan is currently enabled for the Group.

5 Select the displayed option (`Enable` or `Disable`) and press OK to select.

Depending on which option was selected, the radio momentarily displays `Scan Enabled` or `Scan Disabled` as confirmation.

The radio displays the Zone scan list again. If scan was enabled for the Group, the check mark displays before the Group name. If scan was disabled for the Group, the check mark is removed before the Group name.

Add or Delete a Group via the Add Members Menu

The Connect Plus radio does not allow a duplicate group number or a duplicate group alias to be placed on a zone scan list (or to be shown as a "scan candidate"). Thus, the list of "scan candidates" described in step 6 and step 7 sometimes changes after adding or deleting a group from the zone scan list.

If your radio has been programmed to allow you to edit the scan list, you can use the Add Members menu to add a group to the scan list of the currently selected zone, or to delete a group from the scan list of the currently selected zone.

1 Press OK to access the menu.

2 Press ▲ or ▼ to Scan option and press OK to select.

3 Press ▲ or ▼ to `<Add Members>` and press OK to select.

The display shows `Add Members from Zone n` (n = the Connect Plus zone number of the first Connect Plus zone in your radio with the same Network ID as your currently selected zone).

4 Do one of the following.

- If the group you want to add to the scan list is assigned to a channel selector position in that zone, go to step 6.
- If the group you want to add to the scan list is assigned to a channel selector position in a different Connect Plus zone, go to step 5.

5 Press ▲ or ▼ to scroll a list of Connect Plus zones that have the same Network ID as the currently selected zone.

6 After locating the Connect Plus zone where the desired group is assigned to a channel selector position, press OK to select.

Your radio displays the first entry in a list of groups assigned to a channel position in that zone. The groups on the list are called "scan candidates", because they can be added to the scan list of your currently selected zone (or they are already on the zone scan list).

If the zone does not have any groups that can be added to the scan list, the radio displays `No Candidates`.

7 Press ▲ or ▼ to scroll through the list of candidate groups.

If a plus sign (+) is displayed immediately before the group alias, this indicates the group is currently on the scan list for the selected zone.

If the plus sign (+) is not displayed immediately before the alias, the group is not currently on the scan list, but can be added.

8 Press OK when the desired group alias is displayed.

If this group is not currently on the scan list for the currently selected zone, the `Add` (Group Alias) message is displayed.

If this group is already on the scan list for the currently selected zone, the `Delete` (Group Alias) message is displayed.

9 Press OK to accept the displayed message (`Add` or `Delete`).

If deleting a group from the list, you will know the operation is successful because the plus sign (+) will no longer display immediately before the alias.

If adding a group to the list, you will know the operation is successful because the plus sign (+) will display before the alias.

If you are attempting to add a group, and the list is already full, the radio displays `List Full`. If this should occur, it will be necessary to delete a group from the scan list prior to adding a new one.

10 When finished, press as many times as necessary to return to the desired menu.

Understanding Scan Operation

NOTICE:
If the Radio joins a call for a Zone Scan List member from a different Zone and Call Hang Timer expires before you are able to respond, in order to respond, you must navigate to the Zone and Channel of the Scan List Member and start a new call.

There are some circumstances in which you can miss calls for groups that are in your scan list. When you miss a call for one of the following reasons, this does not indicate a problem with your radio. This is a normal scan operation for Connect Plus.

- Scan feature is not turned on (check for the scan icon on the display).
- Scan list member has been disabled via the menu (see Editing the Scan List on page 209).
- You are participating in a call already.
- No member of the scanned group is registered at your site (Multisite systems only).

Scan Talkback

If your radio scans into a call from the selectable group scan list, and if the **PTT** button is pressed during the scanned call, the operation of the radio depends on whether Scan Talkback was enabled or disabled during radio programming. Check with your dealer or system administrator for more information.

Scan Talkback Disabled

The radio leaves the scanned call and attempts to transmit on the contact for the currently selected channel position. After the Call Hang Time on the currently selected contact expires, the radio returns to the home channel and starts the Scan Hang Time Timer. The radio resumes group scan after its Scan Hang Time Timer expires.

Scan Talkback Enabled

If the **PTT** button is pressed during the Group Hang Time of the scanned call, the radio attempts to transmit to the scanned group.

NOTICE:
If you scan into a call for a group that is not assigned to a channel position in the currently selected zone and you miss the Hang Time of the call, switch to the proper zone and then select the channel position of the group to talk back to that group.

Editing Priority for a Talkgroup

The Priority Monitor feature allows the radio to automatically receive transmission from the talkgroup with higher priority when it is in another call. A tone sounds when the radio switches to the call with higher priority. There are two levels of priority for the talkgroups: `P1` and `P2`. `P1` has higher priority than `P2`.

NOTICE:
If Default Emergency Revert Group ID is configured in MOTOTRBO Connect Plus Option Board CPS, there are three levels of priority for talkgroups: P0, P1, and P2. P0 is the permanent Emergency Revert Group ID and the highest priority. Check with your dealer or system administrator for more information.

1 Press OK to access the menu.

2 Press ▲ or ▼ to `Scan` and press OK to select.

3 Press ▲ or ▼ to `View/Edit List` and press OK to select.

4 Press ▲ or ▼ to the required talkgroup and press OK to select.

5 Press ▲ or ▼ to `Edit Priority` and press OK to select.

6 Press ▲ or ▼ to the required priority level and press OK to select.

The display shows positive mini notice before returning to the previous screen. The priority icon appears on the left of the talkgroup.

Contacts Settings

NOTICE:
You can add, or edit subscriber IDs for Connect Plus Contacts. Deleting subscriber IDs can only be performed by your dealer.
If the Privacy feature is enabled on a channel, you can make a privacy-enabled voice call on that channel. Only target radios with the same Privacy Key, or the same Key Value and Key ID as your radio are able to unscramble the transmission.

Access to Contact Lists depends on the zone configuration:

- If only one zone is configured in the radio, the Contact List directly displays the list from the current selected zone.
- If multiple zones are configured in the radio, the Zone Contact Folder displays all zones with identical network

IDs as the current selected zone. The user can access the contacts in these zones.

Contacts provide “address-book” capabilities on your radio. Each entry corresponds to an alias or ID that you use to initiate a call.

Each zone provides a Contact List with up to 100 contacts. The following contact types are available:

- Private Call
- Group Call
- Multigroup Call
- Site All Call Voice
- Site All Call Text
- Dispatch Call

The Dispatch Call contact type is used to send a text message to a dispatcher PC through a third-party Text Message Server.

Making a Private Call from Contacts

1 Press OK to access the menu.

2 Press ▲ or ▼ to `Contacts` and press OK to select.

The entries are alphabetically sorted.

3 Hold the radio vertically 1 to 2 inches (2.5 to 5.0 cm) from your mouth.

4 Press the **PTT** button to make the call.

The LED lights up solid green. The display shows the destination alias.

5 Wait for the Talk Permit Tone to finish (if enabled), and speak clearly into the microphone.

6 Release the **PTT** button to listen.

When the target radio responds, the LED blinks green and the display shows the transmitting user's ID.

If there is no voice activity for a predetermined period of time, the call ends.

You hear a short tone. The display shows `Call Ended`.

Making a Call Alias Search

You can also use alias or alphanumeric search to retrieve the required subscriber alias.

This feature is only applicable while in Contacts.

1. Press OK to access the menu.
2. Press ▲ or ▼ to `Contacts` and press OK to select.

   The entries are alphabetically sorted.
3. Key in the first character of the required alias, and then press the ▲ or ▼ button to locate the required alias.
4. Hold the radio vertically 1 to 2 inches (2.5 to 5.0 cm) from your mouth.
5. Press the **PTT** button to make the call.

   The LED lights up solid green. The display shows the destination alias.
6. Wait for the Talk Permit Tone to finish (if enabled), and speak clearly into the microphone.
7. Release the **PTT** button to listen.

   When the target radio responds, the LED blinks green.

   If there is no voice activity for a predetermined period of time, the call ends.

   The display shows `Call Ended`.

Call Indicator Settings

This feature allows the radio users to configure call or text message ringing tones.

Activating and Deactivating Call Ringers for Call Alert

You can select, or turn on or off ringing tones for a received Call Alert.

1. Press OK to access the menu.

2 Press ▲ or ▼ to `Utilities` and press OK to select.

3 Press ▲ or ▼ to `Radio Settings` and press OK to select.

4 Press ▲ or ▼ to `Tones/Alert` and press OK to select.

5 Press ▲ or ▼ to `Call Ringers` and press OK to select.

6 Press ▲ or ▼ to `Call Alert` and press OK to select.

The current tone is indicated by a ✓ .

7 Press ▲ or ▼ to the required tone and press OK to select.

✓ appears beside selected tone.

Activating and Deactivating Call Ringers for Private Calls

You can turn on or off the ringing tones for a received Private Call.

1 Press OK to access the menu.

2 Press ▲ or ▼ to `Utilities` and press OK to select.

3 Press ▲ or ▼ to `Radio Settings` and press OK to select.

4 Press ▲ or ▼ to `Tones/Alerts` and press OK to select.

5 Press ▲ or ▼ to `Call Ringers` and press OK to select.

6 Press ▲ or ▼ to `Private Call` and press OK to select.

Activating and Deactivating Call Ringers for Text Message

You can turn on or off the ringing tones for a received Text Message.

1 Press OK to access the menu.

2 Press ▲ or ▼ to `Utilities` and press OK to select.

3 Press ▲ or ▼ to `Radio Settings` and press OK to select.

4 Press ▲ or ▼ to `Tones/Alerts` and press OK to select.

5 Press ▲ or ▼ to `Call Ringers` and press OK to select.

6 Press ▲ or ▼ to `Text Message` and press OK to select.

The current tone is indicated by a ✓ .

7 Press ▲ or ▼ to the required tone and press OK to select.

✓ appears beside selected tone.

Selecting a Ring Alert Type

NOTICE:
The programmed **Ring Alert Type** button is assigned by your dealer or system administrator. Check with your dealer or system administrator to determine how your radio has been programmed.

You can program the radio calls to one predetermined vibrate call. If All Tones status is disabled, the radio displays the All Tone Mute icon. If All Tones status is enabled, the related ring alert type is displayed.

The radio vibrates once if it is a momentary ring style. The radio vibrates repetitively if it is a repetitive ring style. When set to Ring and Vibrate, the radio sounds a specific ring tone if there is any incoming radio transaction (for example, Call Alert or Message). It sounds like a positive indicator tone or missed call.

For radios with batteries that support the vibrate feature and are attached to a vibrating belt clip, the available Ring Alert Type options are Silent, Ring, Vibrate, and Ring and Vibrate.

For radios with batteries that do not support the vibrate feature and are not attached to a vibrating belt clip, Ring Alert Type is automatically set to Ring. The available Ring Alert Type options are Silent and Ring.

You can select a Ring Alert Type by performing one of the following actions.

- Press the programmed **Ring Alert Type** button to access the Ring Alert Type menu.
  a. Press ▲ or ▼ to `Ring`, `Vibrate`, `Ring & Vibrate` or `Silent` and press OK to select.
- Access this feature through the menu.
  a. Press OK to access the menu.
  b. Press ▲ or ▼ to `Utilities` and press OK to select.
  c. Press ▲ or ▼ to `Radio Settings` and press OK to select.
  d. Press ▲ or ▼ to `Tones/Alerts` and press OK to select.
  e. Press ▲ or ▼ to `Ring Alert Type` and press OK to select.

f. Press ▲ or ▼ to Ring, Vibrate, Ring & Vibrate or Silent and press OK to select.

Configuring Vibrate Style

NOTICE:
The programmed **Vibrate Style** button is assigned by your dealer or system administrator. Check with your dealer or system administrator to determine how your radio has been programmed.

Vibrate Style is enabled when the Vibrating Belt Clip is attached to the radio with a battery that supports the vibrate feature.

You can configure the vibrate style by performing one of the following actions.

- Press the programmed **Vibrate Style** button to access the Vibrate Style menu.
  a. Press ▲ or ▼ to Short, Medium, or Long and press OK to select.
- Access this feature via the menu.
  a. Press OK to access the menu.
  b. Press ▲ or ▼ to Utilities and press OK to select.
  c. Press ▲ or ▼ to Radio Settings and press OK to select.
  d. Press ▲ or ▼ to Tones/Alerts and press OK to select.
  e. Press ▲ or ▼ to Vibrate Style and press OK to select.
  f. Press ▲ or ▼ to Short, Medium, or Long and press OK to select.

Escalating Alarm Tone Volume

You can program your radio to continually alert you when a radio call remains unanswered. This is done by

automatically increasing the alarm tone volume over time. This feature is known as Escalert.

Call Log Features

Your radio keeps track of all recent outgoing, answered, and missed Private Calls. Use the call log feature to view and manage recent calls.

You can perform the following tasks in each of your call lists:

- Delete
- View Details

Viewing Recent Calls

The lists are `Missed`, `Answered`, and `Outgoing`.

1. Press OK to access the menu.
2. Press ▲ or ▼ to `Call Log` and press OK to select.
3. Press ▲ or ▼ to preferred list and press OK to select.

   The display shows the most recent entry at the top of the list.
4. Press ▲ or ▼ to view the list.

   Press the **PTT** button to start a Private Call with the current selected alias or ID.

Deleting a Call from a Call List

1. Press OK to access the menu.
2. Press ▲ or ▼ to `Call Log` and press OK to select.
3. Press ▲ or ▼ to the required list and press OK to select.

When you select a call list and it contains no entries, the display shows `List Empty`.

4 Press ▲ or ▼ to the required alias or ID and press OK to select.

5 Press ▲ or ▼ to `Delete` and press OK to select.

6 Do one of the following:

- Press OK to select `Yes` to delete the entry. The display shows `Entry Deleted`.
- Press ▲ or ▼ to `No`, and press the OK button to return to the previous screen.

Viewing Details from a Call List

1 Press OK to access the menu.

2 Press ▲ or ▼ to `Call Log` and press OK to select.

3 Press ▲ or ▼ to the required list and press OK to select.

4 Press ▲ or ▼ to the required alias or ID and press OK to select.

5 Press ▲ or ▼ to `View Details` and press OK to select.

Display shows details of call list.

Call Alert Operation

Call Alert paging enables you to alert a specific radio user to call you back when they are able to do so.

This feature is accessible through the menu by using Contacts.

Responding to Call Alerts

Follow the procedure to respond to Call Alerts on your radio.

When you receive a Call Alert:

- A repetitive tone sounds.
- The yellow LED blinks.
- The display shows the notification list listing a Call Alert with the alias or ID of the calling radio.

Depending on the configuration by your dealer or system administrator, you can respond to a Call Alert by doing one of the following:

- Press the **PTT** button and respond with a Private Call directly to the caller.
- Press the **PTT** button to continue normal talkgroup communication.
  The Call Alert is moved to the Missed Call option at the Call Log menu. You can respond to the caller from the Missed Called log.

See Notification List on page 150 and Call Log Features on page 111 for more information.

Making a Call Alert from the Contact List

1. Press OK to access the menu.
2. Press ▲ or ▼ to `Contacts` and press OK to select.
3. Use one of the steps described next to select the required subscriber alias or ID:
   - select the subscriber alias directly
     - Press ▲ or ▼ to the required subscriber alias and press OK to select.
4. Press ▲ or ▼ to `Call Alert` and press OK to select.

   The display shows `Call Alert: <Subscriber Alias or ID>Call Alert` and the subscriber alias or ID, indicating that the Call Alert has been sent.

The LED lights up solid green when your radio is sending the Call Alert.

If the Call Alert acknowledgement is received, the display shows `Call Alert Successful`.

If the Call Alert acknowledgement is not received, the display shows `Call Alert Failed`.

Making a Call Alert with the One Touch Access Button

Press the programmed **One Touch Access** button to make a Call Alert to the predefined alias.

The display shows `Call Alert` and the subscriber alias or ID, indicating that the Call Alert has been sent.
The LED lights up solid green when your radio is sending the Call Alert.

If the Call Alert acknowledgement is received, the display shows `Call Alert Successful`.

If the Call Alert acknowledgement is not received, the display shows `Call Alert Failed`.

Mute Mode

Mute Mode provides an option to the user to silence all audio indicators of the radio.

Once Mute Mode feature is initiated, all audio indicators are muted except higher priority features such as Emergency operations.

When Mute Mode is exited, the radio resumes playing ongoing tones and audio transmissions.

NOTICE:
This is a purchasable feature. Check with your dealer or system administrator for more information.

Turning On Mute Mode

Follow the procedure to turn on Mute Mode.

Do one of the following:

- Access this feature by using the programmed **Mute Mode** button.
- Access this feature by placing the radio in a face-down position momentarily.

Depending on radio model, the Face Down feature can be enabled either through the radio menu or by

your system administrator. Check with your dealer or system administrator for more information.

IMPORTANT:
User can only enable either Man Down or Face Down at a time. Both features cannot be enabled together.

NOTICE:
Face Down feature is applicable to DP4601e only.

The following occurs when Mute mode is enabled:

- Positive Indicator Tone sounds.
- Display shows `Mute Mode On`.
- The red LED light starts blinking and remains blinking until Mute Mode is exited.
- Display shows **Mute Mode** icon on home screen.
- Radio is muted.
- Mute Mode Timer begins counting down the duration that is configured.

Setting Mute Mode Timer

Mute Mode feature can be enabled for a pre-configured amount of time by setting the Mute Mode Timer. The timer duration is configured in the radio menu and can range between 0.5–6 hours. Mute Mode is exited once the timer expires.

If the timer is left at 0, the radio remains in Mute mode for an indefinite period until the radio is moved to a face-up position or the programmed **Mute Mode** button is pressed.

NOTICE:
Face Down feature is applicable to DP4601e only.

1. Press OK to access the menu.
2. Press ▲ or ▼ to `Utilities`. Press OK to select.
3. Press ▲ or ▼ to `Radio Settings`. Press OK to select.

4 Press ▲ or ▼ to `Mute Timer`. Press OK to select.

5 Press ▲ or ▼ to edit the numeric value of each digit, and press OK.

Exiting Mute Mode

This feature can be exited automatically once the Mute Mode Timer expires.

Do one of the following to exit Mute mode manually:

- Press the programmed **Mute Mode** button.
- Press the **PTT** button on any entry.
- Place the radio in a face-up position momentarily.

NOTICE:
Face Down feature is applicable to DP4601e only.

The following occurs when Mute mode is disabled:

- Negative Indicator Tone sounds.
- Display shows `Mute Mode Off`.
- The blinking red LED turns off.
- **Mute Mode** icon disappears from home screen.
- Your radio unmutes and speaker state is restored.
- If the timer has not expired, Mute mode timer is stopped.

NOTICE:
Mute Mode is also exited if the user transmits voice or switches to an unprogrammed channel.

Emergency Operation

NOTICE:
If your radio is programmed for Silent or Silent with Voice emergency initiation, in most cases it automatically exits silent operation after the Emergency Call or Emergency Alert is finished. The exception to this rule is when Emergency Alert is the configured Emergency Mode and Silent is the configured Emergency Type. If your radio is programmed in this manner, the silent operation continues until you cancel silent operation by pressing **PTT** or the button configured for Emergency Off.

Emergency voice calls and Emergency Alerts are not supported when operating in Connect Plus Auto Fallback mode. For more information see the Auto Fallback on page 202.

An Emergency Alert is used to indicate a critical situation. You can initiate an Emergency at any time on any screen display, even when there is activity on the current channel. Pressing the **Emergency** button initiates the programmed Emergency mode. The programmed Emergency mode may also be initiated by triggering the optional Man Down feature. The Emergency feature may be disabled in your radio.

Your dealer can set the duration of a button press for the programmed **Emergency** button, except for long press, which is similar with all other buttons:

Short press
Between 0.05 seconds and 0.75 seconds.

Long press
Between 1.00 second and 3.75 seconds.

The **Emergency** button is assigned with the Emergency On/Off feature. Check with your dealer for the assigned operation of the **Emergency** button.

- If the short press for the **Emergency** button is assigned to turn on the Emergency mode, then the long press for the **Emergency** button is assigned to exit the Emergency mode.
- If the long press for the **Emergency** button is assigned to turn on the Emergency mode, then the short press for the **Emergency** button is assigned to exit the Emergency mode.

When your radio is selected to a Connect Plus zone, it supports three Emergency modes:

Emergency Call
You must press the **PTT** button to talk on the assigned emergency time slot.

Emergency Call with Voice to Follow

For the first transmission on the assigned emergency time slot, the microphone is automatically unmuted and you may talk without pressing the **PTT** button. The microphone stays “hot” in this fashion for a time period programmed into the radio. For subsequent transmissions in the same Emergency call, you must press the **PTT** button.

Emergency Alert

An Emergency Alert is not a voice call. It is an emergency notification that is sent to radios that are configured to receive these alerts. The radio sends an emergency alert by using the control channel of the currently registered site. The Emergency Alert is received by radios in the Connect Plus network that are programmed to receive them (no matter which network site they are registered to).

Only one of the Emergency Modes can be assigned to the Emergency button per zone. In addition, each Emergency mode has the following types:

Regular

Radio initiates an Emergency and shows audio and/or visual indicators.

Silent

Radio initiates an Emergency without any audio or visual indicators. The radio suppresses all audio or visual indications of the Emergency until you press the **PTT** button to start a voice transmission.

Silent with Voice

The same as Silent operation, except that the radio also unmutes for some voice transmissions.

Receiving an Incoming Emergency

Your radio may be programmed to sound an alert tone and also display information about the incoming Emergency. If so programmed, upon receiving the incoming Emergency, the display shows the Emergency Details screen with the emergency icon, the Alias or ID of the radio that requested the Emergency, the Group Contact being used for the Emergency, and one additional line of information. The additional information is the name of the zone that contains the Group Contact.

At the present time, the radio displays only the most recently decoded Emergency. If a new Emergency is received before the prior Emergency is cleared, the details for the new Emergency replace the details of the previous Emergency.

Depending on how your radio has been programmed, the Emergency Details screen (or Alarm List screen) will stay on your radio display even after the Emergency ends. You can save the emergency details to the Alarm List, or you can delete the emergency details as described in the following sections.

Saving the Emergency Details to the Alarm List

Saving the emergency details to the Alarm List allows you to view the details again at a later time by selecting Alarm List from the Main Menu.

1 While the Emergency Details (or Alarm List) screen is displayed, press .

The **Exit Alarm List** screen displays.

2 Perform one of the following actions:

- Select **Yes** and press OK to save the emergency details to the Alarm List, and to exit the Emergency Details (or Alarm List) screen.
- Select **No** and press OK to return to the Emergency Details (or Alarm List) screen.

Deleting the Emergency Details

1 While the Emergency Details screen is displayed, press .

The **Delete** screen displays.

2 Perform one of the following actions:

- Select **Yes** and press OK to delete the emergency details.
- Select **No** and press OK to return to the Emergency Details screen.

Responding to an Emergency Call

NOTICE:
If you do not respond to the Emergency Call within the time allotted for the Emergency Call Hang Time, the Emergency call will end. If you want to speak to the group after the Emergency Call Hang Time expires, you must first select the channel position assigned to the group (if not already selected). Then, press **PTT** to start a non-Emergency Call to the group.

1 When receiving an Emergency Call, press any button to stop all Emergency Call received indications.

2 Press the **PTT** button to initiate a voice transmission on the Emergency group.

All radios that are monitoring this group hear your transmission.

3 Wait for the Talk Permit Tone to finish (if enabled) and speak clearly into the microphone.

The LED lights up green.

4 Release the **PTT** button to listen.

When the emergency initiating radio responds, the LED blinks green. You see the Group Call icon, the group ID, and transmitting radio ID on your display.

Responding to an Emergency Alert

NOTICE:
The Group contact used for the Emergency Alert should not be used for voice communication. This could prevent other radios from sending and receiving Emergency Alerts on the same group.

An Emergency Alert from a radio indicates that the user is in an urgent situation. You may respond to the alert by initiating a private call to the radio who declared the emergency, initiating a group call to a designated talk group, sending the radio a Call Alert, initiating a Remote Monitor of that radio, etc. The proper response is determined by your organization and the individual situation.

Ignore Emergency Revert Call

This feature enhancement is to provide an option for the radio to ignore an active Emergency Revert Call.

To enable Ignore Emergency Revert Call, the radio must be configured at the Connect Plus Customer Programming Software (CPCPS).

When the feature is enabled, the radio does not display Emergency Call indications and does not receive any audio on the default Emergency Revert Group ID.

Check with your dealer or system administrator for more information.

Initiating an Emergency Call

NOTICE:
If your radio is set to Silent, it does not display any audio or visual indicators during Emergency mode until you press the **PTT** button to initiate a voice transmission.
If your radio is set to Silent with Voice, it does not initially display any audio or visual indicators that the radio is in Emergency mode. However, your radio unmutes for the transmissions of radios responding to your emergency. The emergency indicators only appear once you press the **PTT** button to initiate a voice transmission from your radio.

For both “Silent” and “Silent with Voice” operation, the radio automatically exits silent operation after the Emergency Call is finished.

1 Press the programmed **Emergency** button.

2 Press the **PTT** button to initiate a voice transmission on the Emergency group.

When you release the **PTT** button, the Emergency call continues for the time allotted for the Emergency Call Hang Time.

If you press the **PTT** button during this time, the Emergency call continues.

Initiating an Emergency Call with Voice to Follow

Your radio must be programmed for this type of operation.

When enabled for this operation, when you press the programmed **Emergency** button, and when your radio receives the time slot assignment, the microphone is automatically activated without pressing the **PTT** button. This activated microphone state is also known as "hot mic". The "hot mic" applies to the first voice transmission from your radio during the Emergency call. For subsequent transmissions in the same Emergency call, you must press the **PTT** button.

1. Press the programmed **Emergency** button.
2. The microphone remains active for the "hot mic" time specified in your radio codeplug programming.

   During this time, the LED lights up green.
3. Press and hold the **PTT** button to talk longer than the programmed duration.

Initiating an Emergency Alert

NOTICE:
If your radio is programmed for "Silent" or "Silent with Voice", it will not provide any audio or visual indications that it is sending an Emergency Alert. If programmed for "Silent", the silent operation continues indefinitely until you press PTT or the button configured for "Emergency Off". If programmed for "Silent with Voice", the radio automatically cancels silent operation when the site controller broadcasts the Emergency Alert.

Press the orange **Emergency** button.

Upon transmitting the Emergency Alert to the site controller, the radio display shows the Emergency icon, the Group contact used for the Emergency Alert, and `TX Alarm`.

Once the Emergency Alert is successfully sent and is being broadcast for other radios to hear, a positive indicator tone sounds and the radio displays `Alarm Sent`. If the

Emergency Alert is unsuccessful, a negative indicator tone sounds and the radio displays `Alarm Failed`.

Exiting Emergency Mode

NOTICE:
If the Emergency call ends due to the expiration of the Emergency Hang Time, but the emergency condition is not over, press the **Emergency** button again to restart the process.

If you initiate an Emergency Alert by pressing the programmed **Emergency** button, your radio automatically exits Emergency mode after receiving a response from the Connect Plus system.

If you initiate an Emergency call by pressing the programmed **Emergency** button, your radio will be assigned a channel automatically when one becomes available. Once your radio has transmitted a message indicating the emergency, you cannot cancel your Emergency call. However, if you pressed the button by accident or the emergency no longer exists, you may wish to say this over the assigned channel. When you release the **PTT** button, the Emergency call is discontinued after the Emergency Call Hang Time expires.

If your radio was configured for Emergency with Voice to Follow, use the “hot mic” period to explain your error, then press and release the **PTT** button to discontinue the transmission. The Emergency call is discontinued after the Emergency Call Hang Time expires.

Man Down Alarms

NOTICE:
This feature is applicable to DP4600e/DP4601e only.

Man Down Alarms are not supported when operating in Fallback mode. For more information see the Auto Fallback on page 202.

This section describes the Connect Plus Man Down Feature. This is a purchasable feature that may or may not apply to your radio.

Your Connect Plus portable radio can be enabled and programmed for one or more of the Man Down Alarms. Your dealer or radio system administrator can tell you whether or not this applies to your radio and which specific Man Down Alarms have been enabled and programmed.

If your radio has been programmed for one or more of the following Man Down Alarms, it is important for you to

understand how the Alarm works, what indication (tones) your radio provides, and the action you should take.

The purpose of the Man Down Alarms is to alert others when you might be in danger. This is accomplished by programming your radio to detect a certain angle of tilt, lack of movement, or movement, depending on which Man Down Alarm(s) is/are enabled. If your radio detects a disallowed movement type, and if the condition is not corrected in a certain period of time, the radio starts to play an Alert Tone (if so programmed). At this point you should immediately take one or more of the corrective actions discussed below, depending on which Man Down Alarm(s) has/have been enabled for your radio. If you do not take corrective action within a certain period of time, your radio automatically starts an Emergency (either an Emergency Call or Emergency Alert).

- **Tilt Alarm** – When your radio is tilted at or beyond a specified angle for a period of time, it plays an Alert Tone (if so programmed). To prevent the radio from automatically starting an Emergency Call or Emergency Alert, restore the radio to the vertical position immediately.
- **Anti-Movement Alarm** – When your radio is motionless for a period of time, it plays an Alert Tone (if so programmed). To prevent the radio from automatically starting an Emergency Call or Emergency Alert, move the radio immediately.
- **Movement Alarm** – When your radio is in motion for a period of time, it plays an Alert Tone (if so programmed). To prevent the radio from automatically starting an Emergency Call or Emergency Alert, stop the radio’s motion immediately.

Your dealer or radio system administrator can tell you which of the above alarms (if any) has been enabled through radio programming. It is possible to enable both the Tilt and Anti- Movement Alarms. In that case, the Alert Tone plays when the radio detects the first movement violation.

Instead of taking the corrective actions discussed above, you can also prevent the radio from starting the Emergency call or Emergency Alert by using a programmable button, if your radio has been configured in this manner. This is discussed in the next two sections.

Turning Man Down Alarms On and Off

NOTICE:
The programmed **Man Down** button and Man Down settings are configured using CPS. Check with your dealer or system administrator to determine how your radio has been programmed.

If you enable Man Down to maximum sensitivity and set Vibrate Style to high, the radio automatically restricts Vibrate Style to medium. This function prevents high Vibrate Style from initiating the Man Down emergency feature.

The procedure for turning the Man Down Alarms On and Off depends on how your radio is programmed. If programmed with a Man Down Alarms On/Off button, use the button to toggle the Man Down Alarms On and Off. This applies to all of the Man Down Alarms enabled for your radio.

When using the programmable button to toggle the Man Down Alarms On, your radio plays a tone that rises in pitch and displays a brief confirmation message.

In order to hear the tones described above when turning the Man Down Alarms On and Off, the MOTOTRBO radio and Connect Plus Option Board must both be enabled for keypad tones.

If your radio has been programmed so that Man Down Alarms can be turned On and Off using the menu, perform the following procedure.

1. Press OK to access the menu.
2. Press ▲ or ▼ to `Utilities` and press OK to select.
3. Press ▲ or ▼ to `Connect Plus` and press OK to select.
4. Press ▲ or ▼ to `Man Down Alarm` and press OK to select.

   If Man Down Alarm is currently disabled, the `Enable` option is shown.

   If Man Down Alarm is currently enabled, the `Disable` option is shown.

5 Press ▲ or ▼ to Enable or Disable and press OK to select.

Resetting the Man Down Alarms

If your radio has been programmed with either a Man Down Alarms Reset button, or the Man Down Alarms menu option, it is possible to reset the Man Down Alarms without turning them On or Off. This stops any Man Down Alert Tone that is currently playing, and it also resets the Alarm timers. However, it is still necessary to correct the movement violation by taking the appropriate corrective action described in the Man Down Alarms section. If the movement violation is not corrected within a period of time, the Alert Tone starts playing again.

The procedure for resetting the Man Down Alarms depends on how your radio is programmed. If programmed with a Man Down Alarms Reset button, use the button to Reset the Man Down Alarms. This applies to all of the Man Down Alarms enabled for your radio.

When using the programmable button to reset the Man Down Alarms, the radio shows a brief confirmation message.

If your radio has been programmed so that Man Down Alarms can be Reset via the menu, follow the procedure below.

1 Press OK to access the menu.

2 Press ▲ or ▼ to Utilities and press OK to select.

3 Press ▲ or ▼ to Connect Plus and press OK to select.

4 Press ▲ or ▼ to Man Down Alarm and press OK to select.

5 Press ▲ or ▼ to Reset and press OK to select.

The radio displays a brief confirmation message.

Beacon Feature

This section describes the Beacon feature. The Beacon feature is part of Connect Plus Man Down, a purchasable feature. Your dealer or Radio System Administrator can tell you if the Beacon feature applies to your radio.

If your radio has been enabled and programmed for one or more of the Man Down Alarms, it can also be enabled for the Beacon feature.

If your radio automatically starts an Emergency Call or Emergency Alert due to one of the Man Down Alarms, and if your radio is also enabled for the Beacon feature, the radio starts to periodically emit a high pitched tone approximately once every ten seconds. The interval can vary depending on whether you are talking on your radio. The purpose of the Beacon tone is to help searchers locate you. If your radio has also been enabled for the “Visual Beacon”, the radio’s backlight comes on for a few seconds every time the Beacon tone plays.

You can stop your radio from playing the Beacon tone by using a programmable button, if your radio has been configured in this manner. This is discussed in the next two sections. If your radio does not have the programmable button or menu option, you can stop the Beacon tone by turning the radio off and then on again, or by changing to a different zone (if your radio has been programmed for more than one zone).

Turning Beacon On and Off

The procedure for turning the Beacon On and Off depends on how your radio is programmed. If programmed with a Beacon On/Off button, use the button to toggle the Beacon On and Off.

- When using the programmable button to toggle the Beacon On, your radio plays a tone that rises in pitch and shows a brief confirmation message.
- When using the programmable button to toggle the Beacon Off, your radio plays a tone that falls in pitch and shows a brief confirmation message.

In order to hear the tones described above when turning the Beacon On and Off, the MOTOTRBO radio and Connect Plus Option Board must both be enabled for keypad tones. If your radio has been programmed so that the Beacon can be turned On and Off via the menu, follow the procedure below.

1 Press OK to access the menu.

2 Press ▲ or ▼ to Utilities and press OK to select.

3 Press ▲ or ▼ to Connect Plus and press OK to select.

4 Press ▲ or ▼ to Beacon and press OK to select.

If Beacon is currently disabled, the Enable option is shown.

If Beacon is currently enabled, the Disable option is shown.

5 Press ▲ or ▼ to Enable or Disable and press OK to select.

The radio shows a brief message to confirm that Man Down Beacon was enabled (or disabled).

Resetting the Beacon

If your radio has been programmed with either the Beacon Reset button, or the Beacon menu option, it is possible to reset the Beacon. This stops the Beacon Tone (and also the Visual Beacon) without turning the Beacon feature Off. The procedure for resetting the Beacon depends on how your radio is programmed. If programmed with a Beacon Reset button, use the button to Reset the Beacon. When using the programmable button to reset the Man Down Alarms, your radio shows a brief confirmation message. If your radio has been programmed so that the Beacon can be Reset via the menu, follow the procedure below.

1 Press OK to access the menu.

2 Press ▲ or ▼ to Utilities and press OK to select.

3 Press ▲ or ▼ to Connect Plus and press OK to select.

4 Press ▲ or ▼ to Beacon and press OK to select.

5 Press ▲ or ▼ to Reset and press OK to select.

The radio displays a brief confirmation message.

Text Messaging

Your radio is able to receive data, for example a text message, from another radio or a text message application.

There are two types of text messages, Digital Mobile Radio (DMR) Short Text Message and text message. The maximum length of a DMR Short Text Message is 23 characters. The maximum length of a text message is 280 characters, including the subject line. The subject line only appears when you receive messages from e-mail applications.

NOTICE:
The maximum character length is only applicable for models with the latest software and hardware. For radio models with older software and hardware, the maximum length of a text message is 140 characters. Check with your dealer or system administrator for more information.

For the Arabic language, the text entry orientation is from right to left.

Sending a Quick Text Message

Your radio supports a maximum of 10 Quick Text messages as programmed by your dealer.

While Quick Text messages are predefined, you can edit each message before sending it.

If you are sending the message, perform the following to select a recipient:

- Press ▲ or ▼ to the required alias and press OK to select.

- Press ▲ or ▼ to `Manual Dial`, and press OK to select. The first line of the display shows `Number:`. The second line of the display shows a blinking cursor. Key in the subscriber alias or ID and press OK .

The display shows `Sending Message`, confirming your message is being sent.

If the message is sent successfully, a tone sounds and the display shows `Message Sent`.

If the message cannot be sent, a low tone sounds and the display shows `Message Send Failed`.

If the text message fails to send, the radio returns you to the `Resend` option screen (see Managing Fail-to-Send Text Messages on page 240).

Sending a Quick Text Message with the One Touch Access Button

You can send Quick Text messages using the programmable button programmed by your dealer.

Press the programmed **One Touch Access** button to send a predefined Quick Text message to a predefined alias.

The display shows `Sending Message`, confirming your message is being sent.

If the message is sent, a tone sounds and the display shows `Message Sent` .

If the message cannot be sent, a low tone sounds and the display shows `Message Send Failed` .

If the text message fails to send, the radio returns you to the `Resend` option screen (see Managing Fail-to-Send Text Messages on page 240).

Managing Fail-to-Send Text Messages

You can select one of the following options while at the `Resend` option screen:

- Resend
- Forward

Resending a Text Message

Press OK to resend the same message to the same subscriber/group alias or ID.

If the message is sent successfully, a tone sounds and the display shows the positive mini notice.

If the message cannot be sent, the display shows the negative mini notice.

Forwarding a Text Message

Select `Forward` to send the message to another subscriber/group alias or ID.

1 Press ▲ or ▼ to `Forward` and press OK to select.

2 To select the message recipient, press ▲ or ▼ to the required alias or ID and press OK to select.

The display shows `Sending Message`, confirming your message is being sent.

If the message is sent successfully, a tone sounds and the display shows `Message Sent`.

If the message cannot be sent, a low tone sounds and the display shows `Message Send Failed`.

Managing Sent Text Messages

Once a message is sent to another radio, it is saved in Sent Items. The most recent sent text message is always added to the top of the Sent Items list.

The Sent Items folder is capable of storing a maximum of 30 last sent messages. When the folder is full, the next sent text message automatically replaces the oldest text message in the folder.

NOTICE:

Long press ↩ at any time to return to the Home screen.

Viewing a Sent Text Message

1 Access the **Text Message** feature.

Radio Controls	Steps
Programmed Text Message button	Press the programmed **Text Message** button.
Menu	**a** Press OK to access the menu. **b** Press ▲ or ▼ to `Messages` and press OK to select.

2 Press ▲ or ▼ to `Sent Items` and press OK to select.

3 Press ▲ or ▼ to the required message and press OK to select.

The icon at the top right corner of the screen indicates the status of the message (see Sent Item Icons on page 188).

Sending a Sent Text Message

You can select one of the following options while viewing a sent text message:

- Resend
- Forward
- Delete

1 Press OK again while viewing the message.

2 ▲ or ▼ to one of the following options and press OK to select.

Option	Steps
Forward	Select Forward to send the selected text message to another subscriber/group alias or ID (see Forwarding a Text Message on page 241).
Delete	Select Delete to delete the text message.
Resend	Select Resend to resend the selected text message to the same subscriber/group alias or ID. The display shows Sending Message, confirming that the same message is being sent to the same target radio. If the message is sent successfully, a tone sounds and the display shows Message Sent. If the message cannot be sent, a low tone sounds and the display shows Message Send Failed.

Option	Steps
	If the message fails to send, the radio returns you to the Resend option screen. Press OK to resend the message to the same subscriber/group alias or ID.

If you exit the message sending screen while the message is being sent, the radio updates the status of the message in the Sent Items folder without any audio or visual indication.

If the radio changes mode or powers down before the status of the message in Sent Items is updated, the radio cannot complete any In-Progress messages and automatically marks it with a **Send Failed** icon.

The radio supports a maximum of five In-Progress messages at one time. During this period, the radio cannot send any new message and automatically marks it with a **Send Failed** icon.

Deleting All Sent Text Messages from Sent Items

1 Access the **Text Message** feature.

Radio Controls	Steps
Programmed Text Message button	Press the programmed **Text Message** button.
Menu	**a** Press OK to access the menu. **b** Press ▲ or ▼ to `Messages` and press OK to select.

2 Press ▲ or ▼ to `Sent Items` and press OK to select.

When you select `Sent Items` and it contains no text messages, the display shows `List Empty`.

3 Press ▲ or ▼ to `Delete All` and press OK to select.

4 Choose one of the following.

- Press ▲ or ▼ to `Yes` and press OK to select. The display shows positive mini notice.
- Press ▲ or ▼ to `No` and press OK to return to the previous screen.

Receiving a Text Message

When your radio receives a message, the display shows the Notification List with the alias or ID of the sender and the Message icon.

You can select one of the following options when receiving a text message:

- Read
- Read Later
- Delete

Reading a Text Message

1 Press ▲ or ▼ to Read? and press OK to select.

Selected message in the Inbox opens.

2 Do one of the following:

- Press OK to return to the Inbox.
- Press OK a second time to reply, forward, or delete the text message.

Managing Received Text Messages

Use the Inbox to manage your text messages. The Inbox is capable of storing a maximum of 30 messages.

Text messages in the Inbox are sorted according to the most recently received.

Your radio supports the following options for text messages:

- Forward
- Delete
- Delete All

NOTICE:
If the channel type is not a match, you can only forward, delete, or delete all Received messages.

Long press ⮌ at any time to return to the Home screen.

Viewing a Text Message from the Inbox

1 Press OK to access the menu.

2 Press ▲ or ▼ to Messages and press OK to select.

3 Press ▲ or ▼ to Inbox and press OK to select.

4 Press ▲ or ▼ to view the messages.

5 Do one of the following:

- Press OK to select the current message, and press OK again to reply, forward, or delete that message.
- Long press to return to the Home screen.

Deleting a Text Message from the Inbox

1 Access the **Text Message** feature.

Radio Controls	Steps
Programmed Text Message button	Press the programmed **Text Message** button.
Menu	**a** Press OK to access the menu.
	b Press ▲ or ▼ to `Messages` and press OK to select.

2 Press ▲ or ▼ to `Inbox` and press OK to select.

3 Press ▲ or ▼ to the required message and press OK to select.

4 Press OK once more to access the sub-menu.

5 Press ▲ or ▼ to `Delete` and press OK to select.

6 Press ▲ or ▼ to `Yes` and press OK to select.

The display shows `Message Deleted`, and the screen returns to the Inbox.

Deleting All Text Messages from the Inbox

1 Access the **Text Message** feature.

Radio Controls	Steps
Programmed Text Message button	Press the programmed **Text Message** button.
Menu	**a** Press OK to access the menu. **b** Press ▲ or ▼ to `Messages` and press OK to select.

2 Press ▲ or ▼ to `Inbox` and press OK to select.

When you select `Inbox` and it contains no text messages, the display shows `List Empty`.

3 Press ▲ or ▼ to `Delete All` and press OK to select.

4 Press ▲ or ▼ to `Yes` and press OK to select.

The display shows `Inbox Cleared`.

Privacy

If enabled, this feature helps to prevent eavesdropping by unauthorized users on a channel by the use of a software-based scrambling solution. The signaling and user identification portions of a transmission are not scrambled.

Your radio must have privacy enabled on the current channel selector position to send a privacy-enabled transmission, although this is not a necessary requirement for receiving a transmission. While on a privacy-enabled channel selector position, the radio is still able to receive clear (unscrambled) transmissions.

Your radio supports Enhanced Privacy.

To unscramble a privacy-enabled call transmission, your radio must be programmed to have the same Key Value

and Key ID (for Enhanced Privacy) as the transmitting radio.

If your radio receives a scrambled call that is of a different Key Value and Key ID, you hear nothing at all (Enhanced Privacy).

If the radio has a privacy type assigned, the Home screen shows the Secure or Unsecure icon, except when the radio is sending or receiving an Emergency call or alarm.

The LED lights up solid green while the radio is transmitting and blinks green rapidly when the radio is receiving an ongoing privacy-enabled transmission.

You can access this feature by performing one of the following actions:

- Pressing the programmed **Privacy** button to toggle privacy on or off.
- Using the Radio Menu as described by the steps described next.

NOTICE:
Some radio models may not offer this Privacy feature. Check with your dealer or system administrator for more information.

1. Press OK to access the menu.
2. Press ▲ or ▼ to `Utilities` and press OK to select.
3. Press ▲ or ▼ to `Radio Settings` or ▲ or ▼ to `Connect Plus` and press OK to select.
4. Press ▲ or ▼ to `Enhanced Privacy`.

   If the display shows `Turn On`, press OK to enable Privacy. The radio displays a message confirming your selection.

   If the display shows `Turn Off`, press OK to disable Privacy. The radio displays a message confirming your selection.

If the radio has a privacy type assigned, the secure or unsecure icon appears on the status bar, except when the radio is sending or receiving an Emergency Alert.

Making a Privacy-Enabled (Scrambled) Call

Toggle privacy on using the programmed privacy button or by using the menu. Your radio must have the Privacy feature enabled for the currently selected channel position to send a privacy-enabled transmission. When privacy is enabled for the currently selected channel position, all voice transmissions made by your radio will be scrambled. This includes Group Call, Multigroup Call, talk-back during scanned calls, Site All Call, Emergency Call, and Private Call. Only receiving radios with the same Key Value and Key ID as your radio will be able to unscramble the transmission.

Security

You can enable or disable any radio in the system. For example, you might want to disable a stolen radio, to prevent the thief from using it, and enable that radio, when it is recovered.

NOTICE:
Performing Radio Disable and Enable is limited to radios with these functions enabled. Check with your dealer or system administrator for more information.

Radio Disable

1 Access this feature by performing one of the following actions:

Radio Controls	Steps
Radio Disable button	**a** Press the programmed **Radio Disable** button. **b** Press ▲ or ▼ to the required alias or ID and press OK to select.

Radio Controls	Steps
Radio menu	**a** Press OK to access the menu. **b** Press ▲ or ▼ to `Contacts` and press OK to select. The entries are alphabetically sorted. **c** Use one of the steps described next to select the required subscriber alias or ID: • Select the required alias or ID directly. • Press ▲ or ▼ to the required alias or ID and press OK to select.

Radio Controls	Steps
	d Press ▲ or ▼ to `Radio Disable` and press OK to select.

The display shows `Radio Disable: <Target Alias or ID>` and the LED blinks green.

2 Wait for acknowledgement.

If successful, a positive indicator tone sounds and the display shows `Radio Disable Successful.`

If not successful, a negative indicator tone sounds and the display shows `Radio Disable Failed.`

Radio Enable

1 Access this feature by performing one of the following actions:

Radio Controls	Steps
Radio Enable button	**a** Press the programmed **Radio Enable** button. **b** Press ▲ or ▼ to the required alias or ID and press OK to select.
Radio menu	**a** Press OK to access the menu. **b** Press ▲ or ▼ to `Contacts` and press OK to select. The entries are alphabetically sorted. **c** Use one of the steps described next to select the required subscriber alias or ID • Select the required alias or ID directly. • Press ▲ or ▼ to the required alias or ID and press OK to select. **d** Press ▲ or ▼ to `Radio Enable` and press OK to select.

The display shows `Radio Enable: <Subscriber Alias or ID>` and the LED lights up solid green.

2 Wait for acknowledgement.

If successful, a positive indicator tone sounds and the display shows `Radio Enable Successful.`

If not successful, a negative indicator tone sounds and the display shows `Radio Enable Failed.`

Password Lock Features

If enabled, this feature only allows you access your radio if the correct password is entered upon powering up.

Accessing the Radio from Password

1 Power up the radio.

The radio sounds a continuous tone.

2 Enter your current four-digit password. Press ▲ or ▼ to edit each digit numeric value. Each digit changes to •. Press ▶ to move to next digit. Press OK to confirm your selection.

You hear a positive indicator tone for every digit entered. Press ◀ to remove each • on the display. The radio sounds a negative indicator tone, if you press ◀ when the line is empty, or if you press more than four digits.

If the password is correct, the radio proceeds to power up. See Powering Up the Radio on page 43.

If the password is incorrect, the display shows `Wrong Password`. Repeat step 2.

After the third incorrect password, the display shows `Wrong Password` and then, shows `Radio Locked`. A tone sounds and the LED double blinks yellow.

NOTICE:
The radio is unable to receive any call, including emergency calls, in locked state.

Turning the Password Lock On or Off

1 Press OK to access the menu.

2 Press ▲ or ▼ to `Utilities` and press OK to select.

3 Press ▲ or ▼ to `Radio Settings` and press OK to select.

4 Press ▲ or ▼ to `Passwd Lock` and press OK to select.

5 Enter the four-digit password.

See step 2 in Accessing the Radio from Password on page 252.

6 Press OK to proceed.

If the password is incorrect, the display shows `Wrong Password`, and automatically returns to the previous menu.

7 If the password entered in the previous step is correct, press OK to enable/disable password lock.

The display shows ✓ beside Enabled.

The ✓ disappears from beside Enabled.

Unlocking the Radio from Locked State

1 If your radio was powered down after being in the locked state, power up the radio.

A tone sounds and the LED double blinks yellow. The display shows `Radio Locked`.

2 Wait for 15 minutes.

Your radio restarts the 15 minutes timer for locked state when you power up.

3 Repeat step 1 and step 2 in Accessing the Radio from Password on page 252.

Changing the Password

1 Press OK to access the menu.

2 Press ▲ or ▼ to `Utilities` and press OK to select.

3 Press ▲ or ▼ to `Radio Settings` and press OK to select.

4 Press ▲ or ▼ to `Passwd Lock` and press OK to select.

5 Enter the four-digit password.

See step 2 in Accessing the Radio from Password on page 252.

6 Press OK to proceed.

If the password is incorrect, the display shows `Wrong Password`, and automatically returns to the previous menu.

7 If the password entered in the previous step is correct, ▲ or ▼ to `Change Pwd` and press OK to select.

8 Enter a new four-digit password.

See step 2 in Accessing the Radio from Password on page 252.

9 Reenter the previously entered four-digit password. See step 2 in Accessing the Radio from Password on page 252.

10 Press OK to proceed.

If the reentered password matches the new password entered earlier, the display shows `Password Changed`.

If the reentered password does **NOT** match the new password entered earlier, the display shows `Passwords Do Not Match`.

The screen automatically returns to the previous menu.

Bluetooth Operation

NOTICE:
If disabled via the CPS, all Bluetooth-related features are disabled and the Bluetooth device database is erased.

This feature allows you to use your radio with a Bluetooth-enabled device (accessory) via a wireless Bluetooth connection. Your radio supports both Motorola Solutions and Commercially available Off-The-Shelf (COTS) Bluetooth-enabled devices.

Bluetooth operates within a range of 10 meters (32 feet) line of sight. This is an unobstructed path between your radio and your Bluetooth-enabled device.

It is not recommended that you leave your radio behind and expect your Bluetooth-enabled device to work with a high degree of reliability when they are separated.

At the fringe areas of reception, both voice and tone quality will start to sound "garbled" or "broken". To correct this problem, simply position your radio and Bluetooth-enabled device closer to each other (within the 10-meter/32 feet defined range) to re-establish clear audio reception. Your radio's Bluetooth function has a maximum power of 2.5 mW (4 dBm) at the 10-meter/32 feet range.

Your radio can support up to 4 simultaneous Bluetooth connections with Bluetooth-enabled devices of unique types. For example, a headset, and a PTT-Only Device (POD). Multiple connections with Bluetooth-enabled devices of the same type are not supported.

Refer to your respective Bluetooth-enabled device's user manual for more details on your Bluetooth-enabled device's full capabilities.

Turning Bluetooth On and Off

1. Press OK to access the menu.
2. Press ▲ or ▼ to `Bluetooth` and press OK to select.
3. Press ▲ or ▼ to `My Status` and press OK to select.

   The display shows `On` and `Off`. The current status is indicated by a ✓ .
4. Do one of the following:

   - Press ▲ or ▼ to `On` and press OK to select. The display shows `On` and a ✓ appears left of the selected status.

- Press ▲ or ▼ to `Off` and press OK to select. The display shows `Off` and a ✓ appears left of the selected status.

Finding and Connecting to a Bluetooth Device

Do not turn off your Bluetooth-enabled device or press ⮌ during the finding and connecting operation as this cancels the operation.

1. Turn on your Bluetooth-enabled device and place it in pairing mode. Refer to respective Bluetooth-enabled device user manual.
2. On your radio, press OK to access the menu.
3. Press ▲ or ▼ to `Bluetooth` and press OK to select.
4. Press ▲ or ▼ to `Devices` and press OK to select.
5. Do one of the following:
   - Press ▲ or ▼ to the required device and press OK to select.
   - Press ▲ or ▼ to `Find Devices` to locate available devices. Press ▲ or ▼ to the required device and press OK to select.
6. Press ▲ or ▼ to `Connect` and press OK to select.

   Display shows `Connecting to <Device>`. Your Bluetooth-enabled device may require additional steps to complete the pairing. Refer to respective Bluetooth-enabled device user manual.

If successful, the radio display shows `<Device>Connected`. A tone sounds and ✓ appears

besides the connected device. The Bluetooth Connected icon appears on the status bar.

If unsuccessful, the radio display shows `Connecting Failed`.

Finding and Connecting from a Bluetooth Device (Discoverable Mode)

Do not turn off your Bluetooth or your radio during the finding and connecting operation as this may cancel the operation.

1. Turn Bluetooth On.

   See Turning Bluetooth On and Off on page 255.

2. Press OK to access the menu.

3. Press ▲ or ▼ to `Bluetooth` and press OK to select.

4. Press ▲ or ▼ to `Find Me` and press OK to select.

   Your radio can now be found by other Bluetooth-enabled devices for a programmed duration. This is called Discoverable Mode.

5. Turn on your Bluetooth-enabled device and pair it with your radio.

   Refer to respective Bluetooth-enabled device user manual.

Disconnecting from a Bluetooth Device

1. On your radio, press OK to access the menu.

2. Press ▲ or ▼ to `Bluetooth` and press OK to select.

3. Press ▲ or ▼ to `Devices` and press OK to select.

4 Press ▲ or ▼ to the required device and press OK to select.

5 Press ▲ or ▼ to `Disconnect` and press OK to select.

Display shows `Disconnecting from <Device>`. Your Bluetooth-enabled device may require additional steps to disconnect. Refer to respective Bluetooth-enabled device user manual.

The radio display shows `<Device> Disconnected`. A positive indicator tone sounds and ✓ disappears beside the connected device. The Bluetooth Connected icon disappears on the status bar.

Switching Audio Route between Internal Radio Speaker and Bluetooth Device

You can toggle audio routing between internal radio speaker and external Bluetooth-enabled accessory.

Press the programmed **Bluetooth Audio Switch** button.

- A tone sounds and display shows `Route Audio to Radio`.
- A tone sounds and display shows `Route Audio to Bluetooth`.

Viewing Device Details

1 Press OK to access the menu.

2 Press ▲ or ▼ to `Bluetooth` and press OK to select.

3 Press ▲ or ▼ to `Devices` and press OK to select.

4 Press ▲ or ▼ to the required device and press OK to select.

5 Press ▲ or ▼ to `View Details` and press OK to select.

Deleting Device Name

You can remove a disconnected device from the list of Bluetooth-enabled devices.

1 Press OK to access the menu.

2 Press ▲ or ▼ to `Bluetooth` and press OK to select.

3 Press ▲ or ▼ to `Devices` and press OK to select.

4 Press ▲ or ▼ to the required device and press OK to select.

5 Press ▲ or ▼ to `Delete` and press OK to select.

The display shows `Device Deleted`.

Bluetooth Mic Gain

Allows control of the connected Bluetooth-enabled device microphone gain value.

1 Press OK to access the menu.

2 Press ▲ or ▼ to `Bluetooth` and press OK to select.

3 Press ▲ or ▼ to `BT Mic Gain` and press OK to select.

4 Press ▲ or ▼ to the BT Mic Gain type and the current values.

To edit values, press OK to select.

5 Press ▲ or ▼ to increase or to decrease values and press OK to select.

Permanent Bluetooth Discoverable Mode

NOTICE:
The Permanent Bluetooth Discoverable Mode can only be enabled by using the MOTOTRBO CPS. If enabled, the `Bluetooth` item will **not** be displayed in the Menu and you will **not** be able to use any Bluetooth programmable button features.

Other Bluetooth-enabled devices can locate your radio, but the devices cannot connect to the radio. It enables dedicated devices to use your radio position in the process of Bluetooth-based location.

Turn on your Bluetooth-enabled device and pair it with your radio. Refer to the respective user manual of Bluetooth-enabled device.

Indoor Location

NOTICE:
Indoor Location feature is applicable for models with the latest software and hardware. Check with your dealer or system administrator for more information.

Indoor Location is be used to keep track of the location of radio users. When Indoor Location is activated, the radio is in a limited discoverable mode. Dedicated beacons are used to locate the radio and determine its position.

Turning Indoor Location On or Off

You can turn on or turn off Indoor Location by performing one of the following actions.

- Access this feature through the menu.

  a. Press OK to access the menu.

  b. Press ▲ or ▼ to `Bluetooth` and press OK to select.

  c. Press ▲ or ▼ to `Indoor Location` and press OK to select.

d. Press OK to turn on Indoor Location.

The display shows `Indoor Location On`. You hear a positive indicator tone.
One of the following scenarios occurs.

- If successful, the Indoor Location Available icon appears on the Home screen display.
- If unsuccessful, the display shows `Turning On Failed`. You hear a negative indicator tone.

e. Press OK to turn off Indoor Location.

The display shows `Indoor Location Off`. You hear a positive indicator tone.
One of the following scenarios occurs.

- If successful, the Indoor Location Available icon disappears on the Home screen display.
- If unsuccessful, the display shows `Turning Off Failed`. You hear a negative indicator tone.

- Access this feature by using the programmed button.

a. Long press the programmed **Indoor Location** button to turn on Indoor Location.

The display shows `Indoor Location On`. You hear a positive indicator tone.
One of the following scenarios occurs.

- If successful, the Indoor Location Available icon appears on the Home screen display.
- If unsuccessful, the display shows `Turning On Failed`. If unsuccessful, you hear a negative indicator tone.

b. Press the programmed **Indoor Location** button to turn off Indoor Location.

The display shows `Indoor Location Off`. You hear a positive indicator tone.
One of the following scenarios occurs.

- If successful, the Indoor Location Available icon disappears on the Home screen display.
- If unsuccessful, the display shows `Turning Off Failed`. If unsuccessful, you hear a negative indicator tone.

Accessing Indoor Location Beacons Information

Follow the procedure to access Indoor Location beacons information.

1. Press OK to access the menu.
2. Press ▲ or ▼ to `Bluetooth` and press OK to select.
3. Press ▲ or ▼ to `Indoor Location` and press OK to select.
4. Press ▲ or ▼ to `Beacons` and press OK to select.

The display shows the beacons information.

Notification List

Your radio has a Notification List that collects all your "unread" events on the channel, such as unread text messages, missed calls, and call alerts.

The Notification icon appears on the status bar when the Notification List has one or more events.

The list supports a maximum of 40 unread events. When it is full, the next event automatically replaces the oldest event.

NOTICE:
After the events are read, they are removed from the Notification List.

Accessing the Notification List

Follow the procedure to access the notification list.

1. Press OK to access the menu.
2. Press ▲ or ▼ to `Notification` and press OK to select.

3 Press ▲ or ▼ to the required event and press OK to select.

Long press ↩ to return to the Home Screen.

Wi-Fi Operation

Wi-Fi® is a registered trademark of Wi-Fi Alliance®.

NOTICE:
This feature is applicable to DP4601e only.

This feature allows you to setup and connect to a Wi-Fi network. Wi-Fi supports updates for radio firmware, codeplug, and resources such as language packs and voice announcement.

Turning Wi-Fi On or Off

The programmed **Wi-Fi On or Off** button is assigned by your dealer or system administrator. Check with your dealer or system administrator to determine how your radio has been programmed.

Voice Announcements for the programmed **Wi-Fi On or Off** button can be customized through CPS according to user requirements. Check with your dealer or system administrator for more information.

You can turn on or turn off Wi-Fi by performing one of the following actions.

- Press the programmed **Wi-Fi On or Off** button. Voice Announcement sounds Turning On Wi-Fi or Turning Off Wi-Fi.
- Access this feature using the menu.

  a. Press OK to access the menu.

  b. Press ▲ or ▼ to `WiFi` and press OK to select.

  c. Press ▲ or ▼ to `WiFi On` and press OK to select.

  Press OK to turn on Wi-Fi. The display shows ✓ beside `Enabled`.

  Press OK to turn off Wi-Fi. The ✓ disappears from beside `Enabled`.

Connecting to a Network Access Point

When you turn on Wi-Fi, the radio scans and connects to a network access point.

You can also connect to a network access point using the menu.

1. Press OK to access the menu.
2. Press ▲ or ▼ to `WiFi` and press OK to select.
3. Press ▲ or ▼ to `Networks` and press OK to select.
4. Press ▲ or ▼ to a network access point and press OK to select.
5. Press ▲ or ▼ to `Connect` and press OK to select.

When the connection is successful, the radio displays a notice and the network access point is saved into the profile list.

Checking Wi-Fi Connection Status

Follow the procedure to check the Wi-Fi Connection status.

Press the programmed **Wi-Fi Status Query** button for the connection status by using Voice Announcement. Voice Announcement sounds Wi-Fi is Off, Wi-Fi is On but No Connection, or Wi-Fi is On with Connection.

- The display shows `WiFi Off` when the Wi-Fi is turned off.
- The display shows `WiFi On, Connected` when the radio is connected to a network.
- The display shows `WiFi On, Disconnected` when the Wi-Fi is turned on but the radio is not connected to any network.

  Voice Announcements for the Wi-Fi status query results can be customized through CPS according to

user requirements. Check with your dealer or system administrator for more information.

NOTICE:
The programmed **Wi-Fi Status Query** button is assigned by your dealer or system administrator. Check with your dealer or system administrator to determine how your radio has been programmed.

Refreshing the Network List

Follow the procedure to refresh the network list.

- Perform the following actions to refresh the network list through the menu.

  a. Press OK to access the menu.

  b. Press ▲ or ▼ to `WiFi` and press OK to select.

  c. Press ▲ or ▼ to `Networks` and press OK to select.

  When you enter the Networks menu, the radio automatically refreshes the network list.

- If you are already in the Networks menu, perform the following action to refresh the network list.

  Press ▲ or ▼ to `Refresh` and press OK to select.

  The radio refreshes and displays the latest network list.

Adding a Network

If a preferred network is not in the available network list, perform the following actions to add a network.

1. Press OK to access the menu.

2. Press ▲ or ▼ to `WiFi` and press OK to select.

3 Press ▲ or ▼ to Networks and press OK to select.

4 Press ▲ or ▼ to Add Network and press OK to select.

5 Enter the Service Set Identifier (SSID) and press OK .

6 Press ▲ or ▼ to Open and press OK to select.

7 Enter the password and press OK .

The radio displays a positive mini notice to indicate that the network is successfully saved.

Viewing Details of Network Access Points

Follow the procedure to view details of network access points.

1 Press OK to access the menu.

2 Press ▲ or ▼ to WiFi and press OK to select.

3 Press ▲ or ▼ to Networks and press OK to select.

4 Press ▲ or ▼ to a network access point and press OK to select.

5 Press ▲ or ▼ to View Details and press OK to select.

For a connected network access point, the Service Set Identifier (SSID), Security Mode, Media Access

Control (MAC) address, and Internet Protocol (IP) address are displayed.

For a non-connected network access point, the Service Set Identifier (SSID) and Security Mode are displayed.

Removing Network Access Points

Perform the following actions to remove network access points from the profile list.

1. Press OK to access the menu.
2. Press ▲ or ▼ to WiFi and press OK to select.
3. Press ▲ or ▼ to Networks and press OK to select.
4. Press ▲ or ▼ to the selected network access point and press OK to select.
5. Press ▲ or ▼ to Remove and press OK to select.
6. Press ▲ or ▼ to Yes and press OK to select.

   The radio displays a positive mini notice to indicate that the selected network access point is successfully removed.

Utilities

This chapter explains the operations of the utility functions available in your radio.

Turning the Radio Tones/Alerts On or Off

You can enable and disable all radio tones and alerts (except for the incoming Emergency alert tone) if needed.

Press the programmed **All Tones/Alerts** button to toggle all tones on or off, or follow the procedure described next to access this feature via the radio menu.

1. Press OK to access the menu.
2. Press ▲ or ▼ to `Utilities` and press OK to select.
3. Press ▲ or ▼ to `Radio Settings` and press OK to select.
4. Press ▲ or ▼ to `Tones/Alerts` and press OK to select.
5. Press ▲ or ▼ to `All Tones` and press OK to select.
6. Press OK to enable/disable all tones and alerts.

   The display shows ✓ beside `Enabled`.

   The ✓ disappears from beside `Enabled`.

Setting the Tone Alert Volume Offset Level

You can adjust the Tone Alert Volume Offset level if needed. This feature adjusts the volume of the tones/alerts, allowing it to be higher or lower than the voice volume.

1. Press OK to access the menu.
2. Press ▲ or ▼ to `Utilities` and press OK to select.
3. Press ▲ or ▼ to `Radio Settings` and press OK to select.
4. Press ▲ or ▼ to `Tones/Alerts` and press OK to select.

5 Press ▲ or ▼ to `Vol. Offset` and press OK to select.

6 Press ▲ or ▼ to the required volume value.

The radio sounds a feedback tone with each corresponding volume value.

7 Do one of the following:

- Press OK to keep the required displayed volume value.
- Press ↩ to exit without changing the current volume offset settings.

Turning the Talk Permit Tone On or Off

You can enable and disable the Talk Permit Tone if needed.

1 Press OK to access the menu.

2 Press ▲ or ▼ to `Utilities` and press OK to select.

3 Press ▲ or ▼ to `Radio Settings` and press OK to select.

4 Press ▲ or ▼ to `Tones/Alerts` and press OK to select.

5 Press ▲ or ▼ to `Talk Permit` and press OK to select.

You can also use ◀ or ▶ to change the selected option.

6 Press OK to enable/disable the Talk Permit Tone.

The display shows ✓ beside `Enabled`.

The ✓ disappears from beside `Enabled`.

Turning the Power Up Alert Tone On or Off

You can enable and disable the Power Up Alert Tone if needed.

1 Press OK to access the menu.

2 Press ▲ or ▼ to `Utilities` and press OK to select.

3 Press ▲ or ▼ to `Radio Settings` and press OK to select.

4 Press ▲ or ▼ to `Tones/Alerts` and press OK to select.

5 Press ▲ or ▼ to `Power Up` and press OK to select.

You can also use ◀ or ▶ to change the selected option.

6 Press OK to enable/disable the Power Up Alert Tone.

The display shows ✓ beside `Enabled`.

The ✓ disappears from beside `Enabled`.

Setting the Power Level

You can customize your radio power setting to high or low for each Connect Plus zone.

`High` enables communication with tower sites in Connect Plus mode located at a considerable distance from you. `Low` enables communication with tower sites in Connect Plus mode in closer proximity.

Press the programmed **Power Level** button to toggle transmit power level between high and low.

Follow the procedure described next to access this feature via the radio menu.

1. Press OK to access the menu.
2. Press ▲ or ▼ to `Utilities` and press OK to select.
3. Press ▲ or ▼ to `Radio Settings` and press OK to select.
4. Press ▲ or ▼ to `Power` and press OK to select.
5. Press ▲ or ▼ to the required setting and press OK to select.

   ✓ appears beside selected setting. At any time, long press ⮌ to return to the Home screen.

   Screen returns to the previous menu.

Adjusting the Display Brightness

You can adjust the display brightness of the radio as needed.

NOTICE:
Display brightness cannot be adjusted when Auto Brightness is enabled.

1. Press OK to access the menu.

2 Press ▲ or ▼ to `Utilities` and press OK to select.

3 Press ▲ or ▼ to `Radio Settings` and press OK to select.

4 Press ▲ or ▼ to `Display` and press OK to select.

5 Press ▲ or ▼ to `Brightness` and press OK to select.

The display shows a progress bar.

6 Decrease display brightness by pressing ◀ or increase the display brightness by pressing ▶ .

Select from setting of 1 to 8. Press OK to confirm your entry.

Setting the Display Backlight Timer

You can set the the radio display backlight timer as needed. The setting also affects the Menu Navigation Buttons and keypad backlighting accordingly.

Press the programmed **Backlight** button to toggle the backlight settings, or follow the procedure described next to access this feature via the radio menu.

The display backlight and keypad backlighting are automatically turned off if the LED indicator is disabled (see Turning the LED Indicator On or Off on page 274).

1 Press OK to access the menu.

2 Press ▲ or ▼ to `Utilities` and press OK to select.

3 Press ▲ or ▼ to `Radio Settings` and press OK to select.

4 Press ▲ or ▼ to `Display` and press OK to select.

5 Press ▲ or ▼ to `Backlight Timer` and press OK to select.

You can use ◀ or ▶ to change the selected option.

Turning the Introduction Screen On or Off

You can enable and disable the Introduction Screen if needed.

1 Press OK to access the menu.

2 Press ▲ or ▼ to `Utilities` and press OK to select.

3 Press ▲ or ▼ to `Radio Settings` and press OK to select.

4 Press ▲ or ▼ to `Display` and press OK to select.

5 Press ▲ or ▼ to `Intro Screen` and press OK to select.

You can also use ◀ or ▶ to change the selected option.

6 Press OK to enable/disable the Introduction Screen.

The display shows ✓ beside `Enabled`.

The ✓ disappears from beside `Enabled`.

Language

You can set your radio display to be in your required language.

1. Press OK to access the menu.
2. Press ▲ or ▼ to `Utilities` and press OK to select.
3. Press ▲ or ▼ to `Radio Settings` and press OK to select.
4. Press ▲ or ▼ to `Languages` and press OK to select.

   You can also use ◀ or ▶ to change selected option.
5. Press ▲ or ▼ to the required language and press OK to enable. ✓ appears beside selected language.

Turning the LED Indicator On or Off

You can enable and disable the LED Indicator if needed.

1. Press OK to access the menu.
2. Press ▲ or ▼ to `Utilities` and press OK to select.
3. Press ▲ or ▼ to `Radio Settings` and press OK to select.
4. Press ▲ or ▼ to `LED Indicator` and press OK to select.

   You can also use ◀ or ▶ to change the selected option.
5. Press OK to enable/disable the LED Indicator.

   The display shows ✓ beside `Enabled`.

The ✓ disappears from beside Enabled.

Identifying Cable Type

You can select the type of cable your radio uses.

1 Press OK to access the menu.

2 Press ▲ or ▼ to Utilities and press OK to select.

3 Press ▲ or ▼ to Radio Settings and press OK to select.

4 Press ▲ or ▼ to Cable Type and press OK to select.

You can also use ◀ or ▶ to change the selected option.

5 The current cable type is indicated by a ✓ .

Voice Announcement

This feature enables the radio to audibly indicate the current Zone or Channel the user has just assigned, or programmable button press. This audio indicator can be customized per customer requirements. This is typically useful when the user is in a difficult condition to read the content shown on the display.

1 Press OK to access the menu.

2 Press ▲ or ▼ to Utilities and press OK to select.

3 Press ▲ or ▼ to Radio Settings and press OK to select.

4 Press ▲ or ▼ to Voice Announcement and press OK to select.

You can also use ◀ or ▶ to change the selected option.

5 Do one of the following:

- Press OK to enable Voice Announcement. The display shows ✓ beside `Enabled`.
- Press OK to disable Voice Announcement. The ✓ disappears from beside `Enabled`.

Setting the Text-to-Speech Feature

NOTICE:
The Text-to-Speech feature can only be enabled by using the MOTOTRBO CPS. If enabled, the Voice Announcement feature is automatically disabled, and vice versa. Check with your dealer or system administrator for more information.

This feature enables the radio to audibly indicate the following features:

- Current Channel
- Current Zone
- Programmed button feature on or off
- Content of received text messages
  - Press the programmed **Voice Announcement** button to toggle this feature on or off.
  - This audio indicator can be customized per customer requirements. This is typically useful when the user is in a difficult condition to read the content shown on the display.

    a. Press OK to access the menu.

    b. Press ▲ or ▼ to `Utilities` and press OK to select.

    c. Press ▲ or ▼ to `Radio Settings` and press OK to select.

    d. Press ▲ or ▼ to `Voice Announce` and press OK to select.

    e. Press ▲ or ▼ to `Messages` or `Program Button` and press OK to select.

You can also use ◀ or ▶ to change the selected option.

✓ appears beside the selected setting.

Menu Timer

Set the period of time your radio stays in the menu before it automatically switches to the Home screen.

1. Press OK to access the menu.
2. Press ▲ or ▼ to `Utilities` and press OK to select.
3. Press ▲ or ▼ to `Radio Settings` and press OK to select.
4. Press ▲ or ▼ to `Display` and press OK to select.
5. Press ▲ or ▼ to `Menu Timer` and press OK to select.
6. Press ▲ or ▼ to the required setting and press OK to select.

Digital Mic AGC (Mic AGC-D)

This feature controls the your radio's microphone gain automatically while transmitting on a digital system. It suppresses loud audio or boosts soft audio to a preset value in order to provide a consistent level of audio.

1. Press OK to access the menu.
2. Press ▲ or ▼ to `Utilities` and press OK to select.
3. Press ▲ or ▼ to `Radio Settings` and press OK to select.

You can also use ◀ or ▶ to change the selected option.

4 Press ▲ or ▼ to `Mic AGC-D` and press OK to select.

5 Do one of the following:

- Press OK to enable **Mic AGC-D** . The display shows ✓ beside `Enabled` .
- Press OK to disable **Mic AGC-D** . The ✓ disappears from beside `Enabled` .

Intelligent Audio

Your radio can automatically adjust its audio volume to overcome background noise in the environment, inclusive of all stationary and non-stationary noise sources. This feature is a Receive-only feature and does not affect Transmit audio.

NOTICE:
This feature is not applicable during a Bluetooth session.

1 Press OK to access the menu.

Radio Control	Steps
Menu	**a** Press OK to access the menu. **b** Press ▲ or ▼ to `Radio Settings` and press OK to select. **c** Press ▲ or ▼ to `Radio Settings` and press OK to select. **d** Press ▲ or ▼ to `Intelligent Audio` and press OK to select.

Radio Control	Steps
	NOTICE: You can also use ◀ or ▶ to change the selected option. **e** Do one of the following: • Press OK to enable Intelligent Audio. The display shows ✓ beside `Enabled`. • Press OK to disable Intelligent Audio. The ✓ disappears from beside `Enabled`.

2 Press ▲ or ▼ to `Utilities` and press OK to select.

3 Press ▲ or ▼ to `Radio Settings` and press OK to select.

4 Press ▲ or ▼ to `Intelligent Audio` and press OK to select.

5 Do one of the following:

- Press OK to enable Intelligent Audio. The display shows ✓ beside `Enabled`.
- Press OK to disable Intelligent Audio. The ✓ disappears from beside `Enabled`.

Turning the Acoustic Feedback Suppressor Feature On or Off

This feature allows you to minimize acoustic feedback in received calls.

1 Press OK to access the menu.

2 Press ▲ or ▼ to `Utilities` and press OK to select.

3 Press ▲ or ▼ to `Radio Settings` and press OK to select.

4 Press ▲ or ▼ to `AF Suppressor` and press OK to select.

You can also use ◀ or ▶ to change the selected option.

5 Do one of the following.

- Press OK to enable Acoustic Feedback Suppressor. The display shows ✓ beside `Enabled`.
- Press OK to disable Acoustic Feedback Suppressor. The ✓ disappears from beside `Enabled`.

Turning the Microphone Dynamic Distortion Control Feature On or Off

This feature allows you to enable the radio to automatically monitor the microphone input and adjust the microphone gain value to avoid audio clipping.

1 Press OK to access the menu.

2 Press ▲ or ▼ to `Utilities` and press OK to select.

3 Press ▲ or ▼ to `Radio Settings` and press OK to select.

You can also use ◀ or ▶ to change the selected option.

4 Press ▲ or ▼ to `Mic Distortion` and press OK to select.

5 Do one of the following:

- Press OK to enable Microphone Dynamic Distortion Control. The display shows ✓ beside Enabled.
- Press OK to disable Microphone Dynamic Distortion Control. The ✓ disappears from beside Enabled.

Turning GNSS On or Off

Global Navigation Satellite System (GNSS) is a satellite navigation system that determines the radio precise location. GNSS includes Global Positioning System (GPS) and Global Navigation Satellite System (GLONASS).

NOTICE:
Selected radio models may offer GPS and GLONASS. GNSS constellation is configured by using CPS. Check with your dealer or system administrator to determine how your radio has been programmed.

1 Do one of the following:

- Press the programmed **GNSS** button to toggle the feature on or off. Skip the following steps.
- Press OK to access the menu.

2 Press ▲ or ▼ to `Utilities`. Press OK to select.

3 Press ▲ or ▼ to `Radio Settings`. Press OK to select.

4 Press ▲ or ▼ to `GNSS`. Press OK to select.

5 Press OK to enable/disable GNSS.

If enabled, ✓ appears beside `Enabled`.

If disabled, ✓ disappears beside `Enabled`.

See Checking the GNSS Information on page 294 for details on retrieving GNSS information.

Accessing General Radio Information

Your radio contains information on the following:

- Battery
- Degree of Tilt (Accelerometer)
- Radio Model Number Index
- Option Board Over-the-Air (OTA) Codeplug CRC
- Site Number
- Site Info
- Radio Alias and ID
- Firmware and Codeplug Versions
- GNSS Information

Press at any time to return to the previous screen or long press to return to the Home screen. The radio exits the current screen once the inactivity timer expires.

Accessing the Battery Information

Displays information on your radio battery.

1. Press OK to access the menu.
2. Press ▲ or ▼ to `Utilities` and press OK to select.
3. Press ▲ or ▼ to `Radio Info` and press OK to select.
4. Press ▲ or ▼ to `Battery Info` and press OK to select.

   The display shows the battery information.

   For **IMPRES** batteries **ONLY**: The display reads `Recondition Battery` if the battery requires reconditioning in an IMPRES charger. After the reconditioning process, the display then shows the battery information.

Checking the Degree of Tilt (Accelerometer)

NOTICE:
The measurement on the display shows the degree of tilt at the moment you press OK to accept the `Accelerometer` option. If you change the angle of the radio after pressing OK, the radio does not change the measurement shown on its display. It continues to display the measurement taken when OK was pressed.

If the portable radio has been enabled for the Man Down Alarms, there is a menu option to check how the radio measures the degree of tilt. This is a helpful feature when the dealer or Radio System Administrator uses the MOTOTRBO Connect Plus Option Board CPS to configure the activation angle that will trigger the tilt alarm.

1. Press OK to access the menu.
2. Press ▲ or ▼ to `Utilities` and press OK to select.
3. Press ▲ or ▼ to `Radio Info` and press OK to select.
4. Tilt the radio at the angle that triggers the Tilt Alarm.
5. Press ▲ or ▼ to `Accelerometer` and press OK to select.

   The display shows the radio's angle of tilt (deviation from perpendicular vertical position) in degrees (example: `62 Deg.`) Based on this, use MOTOTRBO Connect Plus Option Board CPS to configure the Activation Angle for 60 degrees (which is the closest programmable value). The Tilt Alarm timers are triggered when the Activation Angle is 60 degrees, or greater.

Checking the Radio Model Number Index

This index number identifies your radio model-specific hardware. Your radio system administrator may ask for this number when preparing a new Option Board codeplug for your radio.

1. Press OK to access the menu.
2. Press ▲ or ▼ to `Utilities` and press OK to select.
3. Press ▲ or ▼ to `Radio Info` and press OK to select.
4. Press ▲ or ▼ to `Model Index` and press OK to select.

   The display shows the Model Number Index.

Checking the CRC of the Option Board OTA Codeplug File

Follow the instructions below if your radio system administrator asks you to view the Option Board OTA Codeplug File CRC (Cyclic Redundancy Check). This menu option only appears if the Option Board received its last codeplug update OTA.

1. Press OK to access the menu.
2. Press ▲ or ▼ to `Utilities` and press OK to select.
3. Press ▲ or ▼ to `Radio Info` and press OK to select.

4 Press ▲ or ▼ to `OB OTA CPcrc` and press OK to select.

The display shows some letters and numbers. Communicate this information to your radio system administrator exactly as shown.

Displaying the Site ID (Site Number)

NOTICE:
If you are not currently registered at a site, the display shows `Not Registered`.

The radio briefly shows the Site ID as it registers with a Connect Plus site. Following registration, the radio does not generally indicate the Site number. To display the registered Site number, do the following:

1 Press OK to access the menu.

2 Press ▲ or ▼ to `Utilities` and press OK to select.

3 Press ▲ or ▼ to `Radio Info` and press OK to select.

4 Press ▲ or ▼ to `Site Number` and press OK to select.

The display shows the Network ID and the Site Number.

Checking the Site Info

NOTICE:
If you are not currently registered at a site, the display shows `Not Registered`.

The Site Info feature provides information that can be useful to a service technician. It consists of the following information:

- Repeater number of current Control Channel repeater.
- RSSI: Last signal strength value measured from Control Channel repeater.
- Neighbor List sent by Control Channel repeater (five numbers separated by commas).

If you are requested to use this feature, please report the displayed information exactly as it appears on the screen.

1. Press OK to access the menu.
2. Press ▲ or ▼ to `Utilities` and press OK to select.
3. Press ▲ or ▼ to `Radio Info` and press OK to select.
4. Press ▲ or ▼ to `Site Info` and press OK to select.

   The display shows the Site Info.

Follow the procedure described next to access this feature via the radio screen.

1. Press OK to access the menu.
2. Press ▲ or ▼ to `Utilities` and press OK to select.
3. Press ▲ or ▼ to `Radio Info` and press OK to select.
4. Press ▲ or ▼ to `My ID` and press OK to select.

   The display shows the radio ID.

Checking the Radio ID

This feature displays the ID of your radio.

Checking the Firmware Version and Codeplug Version

Displays the firmware version on your radio.

1. Press OK to access the menu.
2. Press ▲ or ▼ to `Utilities` and press OK to select.
3. Press ▲ or ▼ to `Radio Info` and press OK to select.
4. Press ▲ or ▼ to `Versions` and press OK to select.

   The display a list with the following information:

   - (Radio) Firmware Version
   - (Radio) Codeplug Version
   - Option Board Firmware Version
   - Option Board Frequency Version
   - Option Board Hardware Version
   - Option Board Codeplug Version

Checking for Updates

Connect Plus provides the ability to update certain files (Option Board Codeplug, Network Frequency File, and Option Board Firmware File) Over-The-Air (OTA).

NOTICE:
Check with the dealer or network administrator to determine whether this feature has been enabled for your radio.

Any display Connect Plus radio has the ability to show its current Option Board OTA Codeplug CRC, Frequency File version or Option Board firmware file version by using a menu option. In addition, display radios that have been enabled for over-the-air file transfer can display the version of a "pending file". A "pending file" is a Frequency File or Option Board firmware file that the Connect Plus radio knows about through system messaging, but the radio has not yet collected all of the file packets. If a display Connect Plus radio has a pending file, the menu provides options to:

- See the version number of the pending file.

- See what percentage of packets has been collected so far.
- Request the Connect Plus radio to resume collecting file packets.

If the radio is enabled for Connect Plus OTA file transfer, there may be times when the radio automatically joins a file transfer without first notifying the radio user. While the radio is collecting file packets, the LED rapidly blinks red and the radio displays the High Volume Data icon on the Home Screen status bar.

NOTICE:
The Connect Plus radio cannot collect file packets and receive calls at the same time. If you wish to cancel the file transfer, press and release the **PTT** button. This causes the radio to request a call on the selected Contact Name, and it will also cancel the file transfer for that radio until the process resumes at a later time.

There are several things that can make the file transfer process start again. The first example applies to all OTA file types. The other examples apply only to the Network Frequency File and Option Board Firmware File:

- The radio system administrator re-initiates the OTA file transfer.
- The Option Board pre-defined timer expires, which causes the Option Board to automatically resume the process of collecting packets.
- The timer has not yet expired, but the radio user requests the file transfer to resume through the menu option.

After the Connect Plus radio finishes downloading all file packets, it must upgrade to the newly acquired file. For the Network Frequency File, this is an automatic process and does not require a radio reset. For the Option Board Codeplug File, this is an automatic process that will cause a brief interruption to service as the Option Board loads the new codeplug information and re-acquires a network site. How quickly the radio upgrades to a new Option Board firmware file depend on how the radio has been configured by the dealer or system administrator. The radio will either upgrade immediately after collecting all file packets, or it will wait until the next time that the user turns the radio on.

NOTICE:
Check with your dealer or system administrator to determine how your radio has been programmed.

The process of upgrading to a new Option Board firmware file takes several seconds, and it requires the Connect Plus Option Board to reset the radio. Once the upgrade starts, the radio user will not be able to make or receive calls until

the process is completed. During the process, radio display prompts user to not turn off the radio.

Firmware File

The following section provides information on the radio firmware.

Firmware Up to Date

NOTICE:
If the Option Board firmware file is not Up to Date (and if the radio has partially collected a more recent Option Board firmware file version) the radio displays a list with additional options; `Version`, `%Received`, and `Download`.

1. Press OK to access the menu.
2. Press ▲ or ▼ to `Utilities` and press OK to select.
3. Press ▲ or ▼ to `Radio Info` and press OK to select.
4. Press ▲ or ▼ to `Updates` and press OK to select.
5. Press ▲ or ▼ to `Firmware` and press OK to select.

   The display shows `Firmware is Up to Date`.

Pending Firmware – Version

1. Press OK to access the menu.
2. Press ▲ or ▼ to `Utilities` and press OK to select.

3 Press ▲ or ▼ to `Radio Info` and press OK to select.

4 Press ▲ or ▼ to `Updates` and press OK to select.

5 Press ▲ or ▼ to `Firmware` and press OK to select.

6 Press ▲ or ▼ to `Version` and press OK to select.

If there is a pending Option Board firmware file, the display shows the pending firmware version number.

If there is a pending Option Board firmware file, the display shows `Firmware is Up to Date`.

Pending Firmware – % Received

1 Press OK to access the menu.

2 Press ▲ or ▼ to `Utilities` and press OK to select.

3 Press ▲ or ▼ to `Radio Info` and press OK to select.

4 Press ▲ or ▼ to `Updates` and press OK to select.

5 Press ▲ or ▼ to `Firmware` and press OK to select.

6 Press ▲ or ▼ to `%Received` and press OK to select.

The screen displays the percentage of firmware file packets collected so far.

NOTICE:
When at 100%, the radio needs to be power cycled Off and then On to initiate the firmware upgrade.

Pending Firmware – Download

If the Connect Plus radio has previously left an OTA Option Board Firmware File Transfer with a partial file, the unit automatically rejoins the file transfer (if still ongoing) when an internal timer expires. If you want the unit to rejoin an ongoing Option Board Firmware File transfer prior to expiration of this internal timer, use the Download option as described below.

1. Press OK to access the menu.
2. Press ▲ or ▼ to `Utilities` and press OK to select.
3. Press ▲ or ▼ to `Radio Info` and press OK to select.
4. Press ▲ or ▼ to `Updates` and press OK to select.
5. Press ▲ or ▼ to `Firmware` and press OK to select.
6. Press ▲ or ▼ to `Download` and press OK to select.

   The display shows the following:

Download Available	`Start Download`
No Download Available	`Download not available`

7. Do one of the following:
   - Select `Yes` and press OK to start the download.

- Select No and press OK to return to the previous menu.

Frequency File

The following section provides information on the frequency file of the radio.

Frequency File Up to Date

NOTICE:
If the Frequency File is not Up to Date (and if the radio has partially collected a more recent frequency file version) the radio displays a list with additional options; Version, %Received, and Download.

1. Press OK to access the menu.
2. Press ▲ or ▼ to Utilities and press OK to select.
3. Press ▲ or ▼ to Radio Info and press OK to select.
4. Press ▲ or ▼ to Frequency and press OK to select.

   The display shows Freq. File is Up to Date.

Frequency File Pending – Version

1. Press OK to access the menu.
2. Press ▲ or ▼ to Utilities and press OK to select.
3. Press ▲ or ▼ to Radio Info and press OK to select.

4 Press ▲ or ▼ to Updates and press OK to select.

5 Press ▲ or ▼ to Frequency and press OK to select.

6 Press ▲ or ▼ to Version and press OK to select.

If there is a pending Frequency File, the display shows the pending Frequency File version number.

Frequency File Pending – % Received

1 Press OK to access the menu.

2 Press ▲ or ▼ to Utilities and press OK to select.

3 Press ▲ or ▼ to Radio Info and press OK to select.

4 Press ▲ or ▼ to Updates and press OK to select.

5 Press ▲ or ▼ to %Received and press OK to select.

The screen displays the percentage of frequency file packets collected so far.

Frequency File Pending – Download

If the Connect Plus radio has previously left an OTA Network Frequency File Transfer with a partial file, the unit automatically rejoins the file transfer (if still ongoing) when an internal timer expires. If you want the unit to rejoin an ongoing Network Frequency File transfer prior to expiration

of this internal timer, use the Download option as described below.

1 Press OK to access the menu.

2 Press ▲ or ▼ to Utilities and press OK to select.

3 Press ▲ or ▼ to Radio Info and press OK to select.

4 Press ▲ or ▼ to Updates and press OK to select.

5 Press ▲ or ▼ to Frequency and press OK to select.

6 Press ▲ or ▼ to Download and press OK to select.

Download Currently Unavailable	Download not available
Download Currently Available	Start Download

7 Do one of the following:

- Select Yes and press to start the download.
- Select No and press to return to the previous menu.

Checking the GNSS Information

Displays the GNSS information on your radio, such as values of:

- Latitude
- Longitude
- Altitude

- Direction
- Velocity
- Horizontal Dilution of Precision (HDOP)
- Satellites
- Version

1. Press OK to access the menu.

2. Press ▲ or ▼ to `Utilities` and press OK to select.

3. Press ▲ or ▼ to `Radio Info` and press OK to select.

4. Press ▲ or ▼ to `GNSS Info` and press OK to select.

5. Press ▲ or ▼ to the required item and press OK to select.

   The display shows the requested GNSS information.

See Turning GNSS On or Off on page 281 for details on GNSS.

This page intentionally left blank.

Other Systems

Features that are available to the radio users under this system are available in this chapter.

Push-To-Talk Button

The Push-to-Talk **(PTT)** button serves two basic purposes:

- While a call is in progress, the **PTT** button allows the radio to transmit to other radios in the call. The microphone is activated when the **PTT** button is pressed.
- While a call is not in progress, the **PTT** button is used to make a new call.

Long press the **PTT** button to talk. Release the **PTT** button to listen.

If the Talk Permit Tone is enabled, wait until the short alert tone ends before talking.

Programmable Buttons

Depending on the duration of a button press, your dealer can program the programmable buttons as shortcuts to radio functions.

Short press
Pressing and releasing rapidly.

Long press
Pressing and holding for the programmed duration.

NOTICE:
See Emergency Operation on page 363 for more information on the programmed duration of the **Emergency** button.

Assignable Radio Functions

The following radio functions can be assigned to the programmable buttons.

Audio Profiles
Allows the user to select the preferred audio profile.

Audio Toggle
Toggles audio routing between the internal radio speaker and the speaker of a wired accessory.

Bluetooth® Audio Switch
Toggles audio routing between internal radio speaker and external Bluetooth-enabled accessory.

Bluetooth Connect
Initiates a Bluetooth find-and-connect operation.

Bluetooth Disconnect
Terminates all existing Bluetooth connections between your radio and any Bluetooth-enabled devices.

Bluetooth Discoverable
Enables your radio to enter Bluetooth Discoverable Mode.

Call Alert
Provides direct access to the contacts list for you to select a contact to whom a Call Alert can be sent.

Call Forwarding
Toggles Call Forwarding on or off.

Call Log
Selects the call log list.

Channel Announcement
Plays zone and channel announcement voice messages for the current channel.

Contacts
Provides direct access to the Contacts list.

Emergency
Depending on the programming, initiates or cancels an emergency.

Indoor Location
Toggles Indoor Location on or off.

Intelligent Audio
Toggles intelligent audio on or off.

Manual Site Roam [6]
Starts the manual site search.

Mic AGC
Toggles the internal microphone automatic gain control (AGC) on or off.

Monitor
Monitors a selected channel for activity.

Notifications
Provides direct access to the Notifications list.

Nuisance Channel Delete[6]
Temporarily removes an unwanted channel, except for the Selected Channel, from the scan list. The Selected Channel refers to the selected zone or channel combination of the user from which scan is initiated.

[6] Not applicable in Capacity Plus.

One Touch Access
Directly initiates a predefined Private, Phone or Group Call, a Call Alert, a Quick Text message, or Home Revert.

Option Board Feature
Toggles option board feature(s) on or off for option board-enabled channels.

Permanent Monitor[6]
Monitors a selected channel for all radio traffic until function is disabled.

Phone
Provides direct access to the Phone Contacts list.

Privacy
Toggles privacy on or off.

Radio Alias and ID
Provides radio alias and ID.

Radio Check
Determines if a radio is active in a system.

Radio Enable
Allows a target radio to be remotely enabled.

Radio Disable
Allows a target radio to be remotely disabled.

Remote Monitor
Turns on the microphone of a target radio without it giving any indicators.

Repeater/Talkaround[6]
Toggles between using a repeater and communicating directly with another radio.

Silence Home Channel Reminder
Mutes the Home Channel Reminder.

Scan [7]
Toggles scan on or off.

Site Info
Displays the current site name and ID of Capacity Plus-Multi-Site.

Plays site announcement voice messages for the current site when Voice Announcement is enabled.

Site Lock[6]
When toggled on, the radio searches the current site only. When toggled off, the radio searches other sites in addition to the current site.

[7] Not applicable in Capacity Plus–Single-Site.

Status
Selects the status list menu.

Telemetry Control
Controls the Output Pin on a local or remote radio.

Text Message
Selects the text message menu.

Transmit Interrupt Remote Dekey
Stops an ongoing interruptible call to free the channel.

Trill Enhancement
Toggles trill enhancement on or off.

Voice Announcement On/Off
Toggles voice announcement on or off.

Voice Operating Transmission (VOX)
Toggles VOX on or off.

Wi-Fi
Toggles Wi-Fi on or off.

Zone Selection
Allows selection from a list of zones.

Assignable Settings or Utility Functions

The following radio settings or utility functions can be assigned to the programmable buttons.

Tones/Alerts
Toggles all tones and alerts on or off.

Backlight
Toggles display backlight on or off.

Backlight Brightness
Adjusts the brightness level.

Power Level
Toggles transmit power level between high and low.

Accessing Programmed Functions

Follow the procedure to access programmed functions in your radio.

1 Do one of the following:
   - Press the programmed button. Proceed to step 3.
   - Press OK to access the menu.

2 Press ▲ or ▼ to the menu function, and press OK to select a function or enter a sub-menu.

3 Do one of the following:

- Press to return to the previous screen.
- Long press to return to the Home screen.

Your radio automatically exits the menu after a period of inactivity and returns to the Home screen.

Status Indicators

This chapter explains the status indicators and audio tones used in the radio.

Icons

The radio display shows radio status, text entries, and menu entries. The following are the icons that appear on the radio display.

Table 8: Display Icons

The following icons appear on the status bar at the top of the radio display. The icons are arranged left most in order of appearance or usage, and are channel-specific.

	Battery The number of bars (0–4) shown indicates the charge remaining in the battery. The icon blinks when the battery is low.
	Bluetooth Connected The Bluetooth feature is enabled. The icon stays lit when a remote Bluetooth device is connected.
	Bluetooth Not Connected The Bluetooth feature is enabled but there is no remote Bluetooth device connected.
	Call Log Radio call log.
	Contact Radio contact is available.

Table continued…

	Emergency Radio is in Emergency mode.
	Flexible Receive List Flexible receive list is enabled.
	GNSS Available GNSS feature is enabled. The icon stays lit when a position fix is available.
	GNSS Not Available GNSS feature is enabled but is not receiving data from the satellite.
	High Volume Data Radio is receiving high volume data and channel is busy.
	Indoor Location Available [8] Indoor location status is on and available.

Table continued…

	Indoor Location Unavailable[8] Indoor location status is on but unavailable due to Bluetooth disabled or Beacons Scan suspended by Bluetooth.
	Message Incoming message.
	Monitor Selected channel is being monitored.
	Mute Mode Mute Mode is enabled and speaker is muted.
	Notification Notification List has one or more missed events.
	Option Board The Option Board is enabled. (Option board enabled models only)

Table continued…

[8] Only applicable for models with the latest software and hardware.

	Option Board Non-Function The Option Board is disabled.
5	**Over-the-Air Programming Delay Timer** Indicates time left before automatic restart of radio.
L or H	**Power Level** Radio is set at Low power or Radio is set at High power.
	Received Signal Strength Indicator (RSSI) The number of bars displayed represents the radio signal strength. Four bars indicate the strongest signal. This icon is only displayed while receiving.
	Response Inhibit Response Inhibit is enabled.

Table continued…

	Ring Only Ringing mode is enabled.
	Scan [9] Scan feature is enabled.
	Scan- Priority 1[9] Radio detects activity on channel/ group designated as Priority 1.
	Scan- Priority 2[9] Radio detects activity on channel/ group designated as Priority 2.
	Secure The Privacy feature is enabled.
	Silent Ring Silent ring mode is enabled.
	Site Roaming [10] The site roaming feature is enabled.

Table continued…

[9] Not applicable in Capacity Plus.
[10] Not applicable in Capacity Plus–Single-Site

	Talkaround[9] In the absence of a repeater, radio is currently configured for direct radio to radio communication.
	Tones Disable Tones are turned off.
	Unsecure The Privacy feature is disabled.
	Vibrate Vibrate mode is enabled.
	Vibrate and Ring Vibrate and Ring mode is enabled.
	Vote Scan Vote scan feature is enabled.
	Wi-Fi Excellent [11] Wi-Fi signal is excellent.

Table continued…

	Wi-Fi Good[11] Wi-Fi signal is good.
	Wi-Fi Average[11] Wi-Fi signal is average
	Wi-Fi Poor[11] Wi-Fi signal is poor.
	Wi-Fi Unavailable[11] Wi-Fi signal is unavailable.

Table 9: Advance Menu Icons

The following icons appear beside menu items that offer a choice between two options or as an indication that there is a sub-menu offering two options.

	Checkbox (Checked) Indicates that the option is selected.

Table continued…

[11] Only applicable for DP4601e

	Checkbox (Empty) Indicates that the option is not selected.
	Solid Black Box Indicates that the option selected for the menu item with a sub-menu.

Table 10: Bluetooth Device Icons

The following icons appear next to items in the list of Bluetooth-enabled devices available to indicate the device type.

	Bluetooth Audio Device Bluetooth-enabled audio device, such as a headset.
	Bluetooth Data Device Bluetooth-enabled data device, such as a scanner.
	Bluetooth PTT Device Bluetooth-enabled PTT device, such as a PTT-Only Device (POD).

Table 11: Call Icons

The following icons appear on the display during a call. These icons also appear in the Contacts list to indicate alias or ID type.

	Bluetooth PC Call Indicates a Bluetooth PC Call in progress. In the Contacts list, it indicates a Bluetooth PC Call alias (name) or ID (number).
	Dispatch Call The Dispatch Call contact type is used to send a text message to a dispatcher PC through a third-party Text Message Server.
	Group Call/All Call Indicates a Group Call or All Call in progress. In the Contacts list, it indicates a group alias (name) or ID (number).

Table continued…

	Non-IP Peripheral Individual call Indicates a Non-IP Peripheral individual call in progress. In the Contacts list, it indicates a subscriber alias (name) or ID (number).
	Non-IP Peripheral Group call Indicates a Non-IP Peripheral group call in progress. In the Contacts list, it indicates a group alias (name) or ID (number).
	Option Board Individual Call Indicates an Option Board individual call in progress. In the Contacts list, it indicates a subscriber alias (name) or ID (number).
	Option Board Group Call Indicates an Option Board group call in progress. In the Contacts list, it indicates a group alias (name) or ID (number).

Table continued…

	Phone Call as Group/All Call Indicates a Phone Call as Group Call or All Call in progress. In the Contacts list, it indicates a group alias (name) or ID (number).
	Phone Call as Private Call Indicates a Phone Call as Private Call in progress. In the Contacts list, it indicates a phone alias (name) or ID (number).
	Private Call Indicates a Private Call in progress. In the Contacts list, it indicates a subscriber alias (name) or ID (number).

Table 12: Mini Notice Icons

The following icons appear momentarily on the display after an action to perform a task is taken.

	Failed Transmission (Negative) Failed action taken.

Table continued…

	Successful Transmission (Positive) Successful action taken.
	Transmission in Progress (Transitional) Transmitting. This is seen before indication for Successful Transmission or Failed Transmission.

Table 13: Sent Items Icons

The following icons appear at the top right corner of the display in the Sent Items folder.

or	**In Progress** The text message to a subscriber alias or ID is pending transmission, followed by waiting for acknowledgement. The text message to a group alias or ID is pending transmission.

Table continued…

or	**Individual or Group Message Read** The text message has been read.
or	**Individual or Group Message Unread** The text message has not been read.
or	**Send Failed** The text message cannot be sent.
or	**Sent Successfully** The text message has been successfully sent.

LED Indicators

LED indicators show the operational status of your radio.

Blinking Red

Radio is indicating a battery mismatch.

Radio has failed the self-test upon powering up.

Radio is receiving an emergency transmission.

Radio is transmitting in low battery state.

Radio has moved out of range if Auto-Range Transponder System is configured.

Mute Mode is enabled.

Solid Green

Radio is powering up.

Radio is transmitting.

Radio is sending a Call Alert or an emergency transmission.

Blinking Green

Radio is receiving a call or data.

Radio is retrieving Over-the-Air Programming transmissions.

Radio is detecting activity over the air.

NOTICE:
This activity may or may not affect the programmed channel of the radio due to the nature of the digital protocol.

There is no LED indication when the radio is detecting activity over the air in Capacity Plus.

Double Blinking Green

Radio is receiving a privacy-enabled call or data.

Solid Yellow

Radio is monitoring a conventional channel.

Blinking Yellow

Radio is scanning for activity.

Radio has yet to respond to a Call Alert.

All Capacity Plus-Multi-Site channels are busy.

Double Blinking Yellow

Radio has Auto Roaming enabled.

Radio is actively searching for a new site.

Radio has yet to respond to a Group Call Alert.

Radio is locked.

Radio is not connected to the repeater while in Capacity Plus.

All Capacity Plus channels are busy.

Tones

The following are the tones that sound through on the radio speaker.

High Pitched Tone

Low Pitched Tone

Indicator Tones

Indicator tones provide you with audible indications of the status after an action to perform a task is taken.

Positive Indicator Tone

Negative Indicator Tone

Audio Tones

Audio tones provide you with audible indications of the status, or response to data received on the radio.

Continuous Tone
A monotone sound. Sounds continuously until termination.

Periodic Tone
Sounds periodically depending on the duration set by the radio. Tone starts, stops, and repeats itself.

Repetitive Tone
A single tone that repeats itself until it is terminated by the user.

Momentary Tone
Sounds once for a short duration set by the radio.

Zone and Channel Selections

This chapter explains the operations to select a zone or channel on your radio. A zone is a group of channels.

Your radio supports up to 1000 channels and 250 zones, with a maximum of 160 channels per zone.

Each channel can be programmed with different features and/or support different groups of users.

Selecting Zones

Follow the procedure to select the required zone on your radio.

1 Do one of the following:

- Press the programmed **Zone Selection** button. Proceed to step 3.
- Press OK to access the menu.

2 Press ▲ or ▼ to `Zone`. Press OK to select.

The display shows ✓ and the current zone.

3 Press ▲ or ▼ to the required zone. Press OK to select.

The display shows `<Zone> Selected` momentarily and returns to the selected zone screen.

Selecting Channels

Follow the procedure to select the required channel on your radio after you have selected a zone.

Turn the **Channel Selector** Knob to select the channel, subscriber ID, or group ID.

Calls

This chapter explains the operations to receive, respond to, make, and stop calls.

You can select a subscriber alias or ID, or group alias or ID after you have selected a channel by using one of these features:

Alias Search
This method is used for Group, Private, and All Calls only with a keypad microphone.

Contacts List
This method provides direct access to the Contacts list.

Manual Dial (by using Contacts)
This method is used for Private and Phone Calls only with a keypad microphone.

Programmed Number Keys

This method is used for Group, Private, and All Calls only with a keypad microphone.

NOTICE:
You can only have one alias or ID assigned to a number key, but you can have more than one number key associated to an alias or ID. All the number keys on a keypad microphone can be assigned. See Assigning Entries to Programmable Number Keys on page 348 for more information.

Programmed One Touch Access Button

This method is used for Group, Private, and Phone Calls only.

You can only have one ID assigned to a **One Touch Access** button with a short or long programmable button press. Your radio can have multiple **One Touch Access** buttons programmed.

Programmable Button

This method is used for Phone Calls only.

Group Calls

Your radio must be configured as part of a group to receive a call from or make a call to the group of users.

Making Group Calls

Follow the procedure to make Group Calls on your radio.

1. Do one of the following:
   - Select a channel with the active group alias or ID.
   - Press the programmed **One Touch Access** button.
2. Press the **PTT** button to make the call.

   The green LED lights up. The display shows the **Group Call** icon and the group call alias.
3. Do one of the following:
   - Wait for the Talk Permit Tone to end and speak clearly into the microphone if enabled.
   - Wait for the **PTT** Sidetone to end and speak clearly into the microphone if enabled.
4. Release the **PTT** button to listen.

   The green LED lights up when the target radio responds. The display shows the **Group Call** icon,

the group alias or ID, and the transmitting radio alias or ID.

5 If the Channel Free Indication feature is enabled, you hear a short alert tone the moment the transmitting radio releases the **PTT** button, indicating the channel is free for you to respond. Press the **PTT** button to respond to the call.

The call ends when there is no voice activity for a predetermined period. The radio returns to the screen you were on prior to initiating the call.

Making Group Calls by Using the Contacts List

Follow the procedure to make Group Calls on your radio by using the Contacts list.

1 Press OK to access the menu.

2 Press ▲ or ▼ to Contacts. Press OK to select.

3 Press ▲ or ▼ to the required alias or ID. Press OK to select.

4 Press the **PTT** button to make the call.

The green LED lights up.

5 Do one of the following:

- Wait for the Talk Permit Tone to end and speak clearly into the microphone if enabled.
- Wait for the **PTT** Sidetone to end and speak clearly into the microphone if enabled.

6 Release the **PTT** button to listen.

The green LED lights up when the target radio responds. The display shows the **Group Call** icon, and alias or ID, and the transmitting radio alias or ID.

7 If the Channel Free Indication feature is enabled, you hear a short alert tone the moment the transmitting radio releases the **PTT** button, indicating the channel is free for you to respond. Press the **PTT** button to respond to the call.

The call ends when there is no voice activity for a predetermined period.

Responding to Group Calls

To receive a call from a group of users, your radio must be configured as part of that group. Follow the procedure to respond to Group Calls on your radio.

When you receive a Group Call:

- The green LED blinks.
- The display shows the **Group Call** icon at the top right corner.
- The first text line shows the caller alias.
- The second text line displays the group call alias.
- Your radio unmutes and the incoming call sounds through the speaker.

1 Do one of the following:

- If the Channel Free Indication feature is enabled, you hear a short alert tone the moment the transmitting radio releases the **PTT** button, indicating the channel is free for you to respond. Press the **PTT** button to respond to the call.
- If the Voice Interrupt feature is enabled, press the **PTT** button to interrupt the audio from the transmitting radio and free the channel for you to respond.

The green LED lights up.

2 Do one of the following:

- Wait for the Talk Permit Tone to end and speak clearly into the microphone if enabled.
- Wait for the **PTT** Sidetone to end and speak clearly into the microphone if enabled.

3 Release the **PTT** button to listen.

The call ends when there is no voice activity for a predetermined period.

If the radio receives a Group Call while not on the Home screen, it remains on its current screen prior to answering the call.

Long press to return to the Home screen to view the caller alias before replying.

Private Calls

A Private Call is a call from an individual radio to another individual radio.

There are two ways to set up a Private Call. The first type sets up the call after performing a radio presence check, while the second type sets up the call immediately. Only one of these types can be programmed to your radio by your dealer.

If your radio is programmed to perform a radio presence check prior to setting up the Private Call and the target radio is not available:

- A tone sounds.
- The display shows a negative mini notice.
- The radio returns to the menu prior to initiating the radio presence check.

See Privacy on page 385 for more information.

Making Private Calls

Your radio must be programmed to initiate a Private Call. If this feature is not enabled, a negative indicator tone sounds when you initiate the call. Follow the procedure to make Private Calls on your radio.

1. Do one of the following:
   - Select a channel with the active subscriber alias or ID.
   - Press the programmed **One Touch Access** button.
2. Press the **PTT** button to make the call.

   The green LED lights up. The display shows the **Private Call** icon, the subscriber alias, and call status.
3. Wait for the Talk Permit Tone to end and speak clearly into the microphone if enabled.
4. Release the **PTT** button to listen.

   The green LED blinks when the target radio responds.
5. If the Channel Free Indication feature is enabled, you hear a short alert tone the moment the transmitting radio releases the **PTT** button, indicating the channel is free for you to respond. Press the **PTT** button to respond to the call.

The call ends when there is no voice activity for a predetermined period. A tone sounds. The display shows `Call Ended`.

Making Private Calls by Using the Contacts List

Follow the procedure to make Private Calls on your radio by using the Contacts list.

1. Press OK to access the menu.
2. Press ▲ or ▼ to `Contacts`. Press OK to select.
3. Press ▲ or ▼ to the required alias or ID. Press OK to select.
4. Press the **PTT** button to make the call.

   If you release the **PTT** button while the radio is setting up the call, it exits without any indication and returns to the previous screen.

   The green LED lights up. The display shows the destination alias.
5. Wait for the Talk Permit Tone to end and speak clearly into the microphone if enabled.
6. Release the **PTT** button to listen.

   The green LED blinks when the target radio responds. The display shows the transmitting user alias or ID.
7. If the Channel Free Indication feature is enabled, you hear a short alert tone the moment the transmitting radio releases the **PTT** button, indicating the channel is free for you to respond. Press the **PTT** button to respond to the call.

   The call ends when there is no voice activity for a predetermined period. A tone sounds. The display shows `Call Ended`.

Responding to Private Calls

Follow the procedure to respond to Private Calls on your radio.

When you receive a Private Call:

- The green LED blinks.
- The **Private Call** icon appears in the top right corner.
- The first text line shows the caller alias.
- Your radio unmutes and the incoming call sounds through the speaker.

1 Do one of the following:

- If the Channel Free Indication feature is enabled, you hear a short alert tone the moment the transmitting radio releases the **PTT** button, indicating the channel is free for you to respond. Press the **PTT** button to respond to the call.
- If the Transmit Interrupt Remote Dekey feature is enabled, press the **PTT** button to stop an ongoing interruptible call and free the channel for you to respond.

The green LED lights up.

2 Wait for the Talk Permit Tone to end and speak clearly into the microphone if enabled.

3 Release the **PTT** button to listen.

The call ends when there is no voice activity for a predetermined period. A tone sounds. The display shows `Call Ended`.

All Calls

An All Call is a call from an individual radio to every radio on the channel. An All Call is used to make important announcements, requiring full attention from the user. The users on the channel cannot respond to an All Call.

Making All Calls

Your radio must be programmed for you to make an All Call. Follow the procedure to make All Calls on your radio.

1 Select a channel with the active All Call group alias or ID.

2 Press the **PTT** button to make the call.

The green LED lights up. The display shows the **Group Call** icon and `All Call`.

3 Do one of the following:

- Wait for the Talk Permit Tone to end and speak clearly into the microphone if enabled.
- Wait for the **PTT** Sidetone to end and speak clearly into the microphone if enabled.

Users on the channel cannot respond to an All Call.

Receiving All Calls

When you receive an All Call:

- A tone sounds.
- The green LED blinks.
- The display shows the **Group Call** icon at the top right corner.
- The first text line shows the caller alias ID.
- The second text line displays `All Call`.
- Your radio unmutes and the incoming call sounds through the speaker.

The radio returns to the screen before receiving the All Call when the call ends.

An All Call does not wait for a predetermined period before ending.

If the Channel Free Indication feature is enabled, you hear a short alert tone when the transmitting radio releases the **PTT** button, indicating the channel is free for you to use.

You cannot respond to an All Call.

NOTICE:
The radio stops receiving the All Call if you switch to a different channel while receiving the call. You are not able to continue with any menu navigation or editing until the end of an All Call.

Selective Calls

A Selective Call is a call from an individual radio to another individual radio. It is a Private Call on an analog system.

Making Selective Calls

Your radio must be programmed for you to initiate a Selective Call. Follow the procedure to make Selective Calls on your radio.

1. Select a channel with the active subscriber alias or ID.
2. Press the **PTT** button to make the call.

   The green LED lights up. The display shows the **Private Call** icon, the subscriber alias, and call status.
3. Do one of the following:
   - Wait for the Talk Permit Tone to end and speak clearly into the microphone if enabled.
   - Wait for the **PTT** Sidetone to end and speak clearly into the microphone if enabled.
4. Release the **PTT** button to listen.

   The green LED lights up when the target radio responds.
5. If the Channel Free Indication feature is enabled, you hear a short alert tone the moment the transmitting radio releases the **PTT** button, indicating the channel is free for you to respond. Press the **PTT** button to respond to the call.

   The call ends when there is no voice activity for a predetermined period.
6. The display shows `Call Ended`.

Responding to Selective Calls

Follow the procedure to respond to Selective Calls on your radio.

When you receive a Selective Call:

- The green LED blinks.
- The first text line shows the **Private Call** icon and the caller alias or `Selective Call` or `Alert with Call`.

- Your radio unmutes and the incoming call sounds through the speaker.

1 Press the **PTT** button to respond to the call.

The green LED lights up.

2 Wait for the Talk Permit Tone to end and speak clearly into the microphone if enabled.

3 Release the **PTT** button to listen.

The call ends when there is no voice activity for a predetermined period. A tone sounds. The display shows `Call Ended`.

Phone Calls

A Phone Call is a call from an individual radio to a telephone.

If Phone Call capability is not enabled in your radio:

- The display shows `Unavailable`.
- Your radio mutes the call.
- Your radio returns to the previous screen when the call ends.

During the Phone Call, your radio attempts to end the call when:

- You press the **One Touch Access** button with the deaccess code preconfigured.
- You enter the deaccess code as the input for extra digits.

During channel access, access or deaccess code, or extra digits transmission, your radio responds to the **On/Off** , **Volume Control**, and **Channel Selector** buttons or knobs only. A tone sounds for every invalid input.

During channel access, press to dismiss the call attempt. A tone sounds.

NOTICE:
Check with your dealer or system administrator for more information.

Making Phone Calls

Follow the procedure to make Phone Calls on your radio.

Making Phone Calls with the Programmable Phone Button

Follow the procedure to make a phone call with the programmable phone button.

1 Press the programmed **Phone** button to enter into the Phone Entry list.

2 Press ▲ or ▼ to the required alias or ID. Press OK to select.

- The green LED lights up. The **Phone Call** icon appears in the top right corner. The first text line shows the subscriber alias. The second text line displays the call status.
- If the call-setup is successful, the Dual Tone Multi Frequency (DTMF) tone sounds. You hear the dialing tone of the telephone user. The first text line shows the subscriber alias. The **Phone Call** icon remains in the top right corner. The second text line displays the call status.
- If call-setup is unsuccessful, a tone sounds and the display shows `Phone Call Failed`. Your radio returns to the Access Code input screen. If the access code was preconfigured in the Contacts list, the radio returns to the screen you were on prior to initiating the call.

3 Press the **PTT** button to talk. Release the **PTT** button to listen.

4 Press to end the call.

- The Dual Tone Multi Frequency (DTMF) tone sounds and the display shows `Ending Phone Call.`
- If the end-call-setup is successful, a tone sounds and the display shows `Call Ended` .
- If the end-call-setup is unsuccessful, your radio returns to the Phone Call screen. Repeat step 3 and step 4 or wait for the telephone user to end the call.
- When you press **PTT** button while in the Phone Contacts screen, a tone sounds and the display shows `Press OK to Place Phone Call.`

- When the telephone user ends the call, a tone sounds and the display shows `Phone Call Ended`.

NOTICE:

During channel access, press to dismiss the call attempt and a tone sounds.

During the call, when you press **One Touch Access** button with the deaccess code preconfigured or enter the deaccess code as the input for extra digits, your radio attempts to end the call.

Dual Tone Multi Frequency

The Dual Tone Multi Frequency (DTMF) feature allows the radio to operate in a radio system with an interface to the telephone systems.

You can turn off the DTMF tone by disabling all radio tones and alerts. See Turning Radio Tones/Alerts On or Off on page 163 for more information.

Initiating DTMF Calls

Follow the procedure to initiate DTMF calls on your radio.

1. Press and hold the **PTT** button.
2. Do one of the following:
   - Enter the desired number to initiate a DTMF call.
   - Press * to initiate a DTMF call.
   - Press # to initiate a DTMF call.

Responding to Phone Calls as Private Calls

Follow the procedure to respond to Phone Calls as Private Calls on your radio.

When you receive a Phone Call as a Private Call:

- The display shows the **Phone Call** icon at the top right corner.
- The display shows the caller alias or `Phone Call`.

If Phone Call capability is not enabled on your radio, the first line of the display shows `Unavailable` and your radio

mutes the call. Your radio returns to the previous screen when the call ends.

1 Press the **PTT** button to respond to the call. Release the **PTT** button to listen.

2 Press to end the call.

The display shows `Ending Phone Call`.
If the call ends successfully:

- A tone sounds.
- The display shows `Call Ended`.

If the call fails to end, the radio returns to the Phone Call screen. Repeat this step or wait for the telephone user to end the call.

Responding to Phone Calls as Group Calls

Follow the procedure to respond to Phone Calls as Group Calls on your radio.

When you receive a Phone Call as a Group Call:

- The display shows the **Phone Call** icon at the top right corner.
- The display shows the group alias and `Phone Call`.

If Phone Call capability is not enabled on your radio, the first line of the display shows `Unavailable` and your radio mutes the call.

1 Press the **PTT** button to respond to the call. Release the **PTT** button to listen.

2 Press to end the call.

The display shows `Ending Phone Call`.
If the call ends successfully:

- A tone sounds.
- The display shows `Call Ended`.

If the call fails to end, the radio returns to the Phone Call screen. Repeat this step or wait for the telephone user to end the call.

Responding to Phone Calls as All Calls

When you receive a Phone Call as an All Call, you can respond to or end the call, only if an All Call type is assigned to the channel. Follow the procedure to respond to Phone Calls as All Calls on your radio.

When you receive a Phone Call as an All Call:

- The display shows the **Phone Call** icon at the top right corner.
- The display shows `All Call` and `Phone Call`.

If Phone Call capability is not enabled on your radio, the first line of the display shows `Unavailable` and your radio mutes the call.

Your radio returns to the previous screen when the call ends.

1. Press the **PTT** button to respond to the call.
2. Release the **PTT** button to listen.
3. Press to end the call.

   The display shows `Ending Phone Call`.

   If the call ends successfully:

   - A tone sounds.
   - The display shows `All Call` and `Call Ended`.

   If the call fails to end, the radio returns to the Phone Call screen. Repeat step 3 or wait for the telephone user to end the call.

Stopping Radio Calls

This feature allows you to stop an ongoing Group or Private Call to free the channel for transmission. For example, when a radio experiences a "stuck microphone" condition where the **PTT** button is inadvertently pressed by the user. Your radio must be programmed to allow you to use this feature. Follow the procedure to stop calls on your radio.

1. Press the programmed **Transmit Interrupt Remote Dekey** button.

   The display shows `Remote Dekey`.
2. Wait for acknowledgment.

   If successful:

- A positive indicator tone sounds.
- The display shows `Remote Dekey Success`.

If unsuccessful:

- A negative indicator tone sounds.
- The display shows `Remote Dekey Failed`.

NOTICE:
Check with your dealer or system administrator for more information.

Advanced Features

This chapter explains the operations of the features available in your radio.

Your dealer or system administrator may have customized your radio for your specific needs. Check with your dealer or system administrator for more information.

Bluetooth

This feature allows you to use your radio with a Bluetooth-enabled device (accessory) through a Bluetooth connection. Your radio supports both Motorola Solutions and Commercially available Off-The-Shelf (COTS) Bluetooth-enabled devices.

Bluetooth operates within a range of 10 m (32 ft) line of sight. This is an unobstructed path between your radio and your Bluetooth-enabled device. For high degree of reliability, Motorola Solutions recommends to not separate the radio and the accessory.

At the fringe areas of reception, both voice and tone quality start to sound "garbled" or "broken". To correct this problem, position your radio and Bluetooth-enabled device closer to each other (within the 10 m defined range) to re-establish clear audio reception. The Bluetooth function of your radio has maximum power of 2.5 mW (4 dBm) at the 10 m range.

Your radio can support up to three simultaneous Bluetooth connections with Bluetooth-enabled devices of unique types. For example, a headset, a scanner, and a PTT-Only Device (POD). Multiple connections with Bluetooth-enabled devices of the same type are not supported.

Refer to the user manual of your respective Bluetooth-enabled device for more details on the full capabilities of your Bluetooth-enabled device.

Your radio connects to the Bluetooth-enabled device within range with either the strongest signal strength, or to one

which it has connected to before in a prior session. Do not turn off your Bluetooth-enabled device or press the home back button during the finding and connecting operation as this cancels the operation.

Turning Bluetooth On and Off

Follow the procedure to turn Bluetooth on and off.

1. Press OK to access the menu.
2. Press ▲ or ▼ to `Bluetooth`. Press OK to select.
3. Press ▲ or ▼ to `My Status`. Press OK to select.

   The display shows `On` and `Off`. The current status is indicated by a ✓ .
4. Do one of the following:
   - Press ▲ or ▼ to `On`. Press OK to select. The display shows ✓ beside `On`.
   - Press ▲ or ▼ to `Off`. Press OK to select. The display shows ✓ beside `Off`.

Connecting to Bluetooth Devices

Follow the procedure to connect to Bluetooth devices.

Turn on your Bluetooth-enabled device and place it in pairing mode.

1. Press OK to access the menu.
2. Press ▲ or ▼ to `Bluetooth`. Press OK to select.
3. Press ▲ or ▼ to `Devices`. Press OK to select.
4. Do one of the following:
   - Press ▲ or ▼ to the required device. Press OK to select.

- Press ▲ or ▼ to `Find Devices` to locate available devices. Press ▲ or ▼ to the required device. Press OK to select.

5 Press ▲ or ▼ to `Connect`. Press OK to select.

Your Bluetooth-enabled device may require additional steps to complete the pairing. Refer to the user manual of your Bluetooth-enabled device.

The display shows `Connecting to <Device>`.

Wait for acknowledgment.
If successful:

- A positive indicator tone sounds.
- The display shows `<Device> Connected` and the **Bluetooth Connected** icon.
- The display shows ✓ beside the connected device.

If unsuccessful:

- A negative indicator tone sounds.
- The display shows `Connecting Failed`.

Connecting to Bluetooth Devices in Discoverable Mode

Follow the procedure to connect to Bluetooth devices in discoverable mode.

Turn on your Bluetooth-enabled device and place it in pairing mode.

1 Press OK to access the menu.

2 Press ▲ or ▼ to `Bluetooth`. Press OK to select.

3 Press ▲ or ▼ to `Find Me`. Press OK to select.
The radio can now be found by other Bluetooth-enabled devices for a programmed duration. This is called Discoverable Mode.

Wait for acknowledgment.
If successful:

- A positive indicator tone sounds.
- The display shows `<Device> Connected` and the **Bluetooth Connected** icon.

- The display shows ✓ beside the connected device.

If unsuccessful:

- A negative indicator tone sounds.
- The display shows `Connecting Failed`.

Disconnecting from Bluetooth Devices

Follow the procedure to disconnect from Bluetooth devices.

1. Press OK to access the menu.
2. Press ▲ or ▼ to `Bluetooth`. Press OK to select.
3. Press ▲ or ▼ to `Devices`. Press OK to select.
4. Press ▲ or ▼ to the required device. Press OK to select.
5. Press ▲ or ▼ to `Disconnect`. Press OK to select.

   The display shows `Disconnecting from <Device>`.

Wait for acknowledgment.

- A tone sounds.
- The display shows `<Device> Disconnected` and the **Bluetooth Connected** icon disappears.
- The ✓ disappears beside the connected device.

Switching Audio Route between Internal Radio Speaker and Bluetooth Device

Follow the procedure to toggle audio routing between internal radio speaker and external Bluetooth device.

Press the programmed **Bluetooth Audio Switch** button.

The display shows one of the following results:

- A tone sounds. The display shows `Route Audio to Radio`.
- A tone sounds. The display shows `Route Audio to Bluetooth`.

Viewing Device Details

Follow the procedure to view device details on your radio.

1. Press OK to access the menu.
2. Press ▲ or ▼ to `Bluetooth`. Press OK to select.
3. Press ▲ or ▼ to `Devices`. Press OK to select.
4. Press ▲ or ▼ to the required device. Press OK to select.
5. Press ▲ or ▼ to `View Details`. Press OK to select.

Deleting Device Name

You can remove a disconnected device from the list of Bluetooth-enabled devices.

1. Press OK to access the menu.
2. Press ▲ or ▼ to `Bluetooth`. Press OK to select.
3. Press ▲ or ▼ to `Devices`. Press OK to select.
4. Press ▲ or ▼ to the required device. Press OK to select.
5. Press ▲ or ▼ to `Delete`. Press OK to select. The display shows `Device Deleted`.

Bluetooth Mic Gain

This feature allows the user to control the microphone gain value of the connected Bluetooth-enabled device.

1 Press OK to access the menu.

2 Press ▲ or ▼ to `Bluetooth`. Press OK to select.

3 Press ▲ or ▼ to `BT Mic Gain`. Press OK to select.

4 Press ▲ or ▼ to the BT Mic Gain type and the current values. Press OK to select. You can edit the values here.

5 Press ▲ or ▼ to increase or to decrease values. Press OK to select.

Permanent Bluetooth Discoverable Mode

The Permanent Bluetooth Discoverable Mode must be enabled by the dealer or system administrator.

NOTICE:
If enabled, `Bluetooth` is **not** displayed in the Menu and you cannot use any Bluetooth programmable button features.

Other Bluetooth-enabled devices can locate your radio, but the devices cannot connect to the radio. The Permanent Bluetooth Discoverable Mode enables dedicated devices to use your radio position in the process of Bluetooth-based location.

Indoor Location

NOTICE:
Indoor Location feature is applicable for models with the latest software and hardware. Check with your dealer or system administrator for more information.

Indoor Location is be used to keep track of the location of radio users. When Indoor Location is activated, the radio is in a limited discoverable mode. Dedicated beacons are used to locate the radio and determine its position.

Turning Indoor Location On or Off

You can turn on or turn off Indoor Location by performing one of the following actions.

- Access this feature through the menu.

  a. Press OK to access the menu.

  b. Press ▲ or ▼ to `Bluetooth` and press OK to select.

  c. Press ▲ or ▼ to `Indoor Location` and press OK to select.

  d. Press OK to turn on Indoor Location.

  The display shows `Indoor Location On`. You hear a positive indicator tone.
  One of the following scenarios occurs.

  - If successful, the Indoor Location Available icon appears on the Home screen display.
  - If unsuccessful, the display shows `Turning On Failed`. You hear a negative indicator tone.

  e. Press OK to turn off Indoor Location.

  The display shows `Indoor Location Off`. You hear a positive indicator tone.
  One of the following scenarios occurs.

  - If successful, the Indoor Location Available icon disappears on the Home screen display.
  - If unsuccessful, the display shows `Turning Off Failed`. You hear a negative indicator tone.

- Access this feature by using the programmed button.

  a. Long press the programmed **Indoor Location** button to turn on Indoor Location.

  The display shows `Indoor Location On`. You hear a positive indicator tone.
  One of the following scenarios occurs.

  - If successful, the Indoor Location Available icon appears on the Home screen display.

- If unsuccessful, the display shows `Turning On Failed`. If unsuccessful, you hear a negative indicator tone.

b. Press the programmed **Indoor Location** button to turn off Indoor Location.

The display shows `Indoor Location Off`. You hear a positive indicator tone.
One of the following scenarios occurs.

- If successful, the Indoor Location Available icon disappears on the Home screen display.
- If unsuccessful, the display shows `Turning Off Failed`. If unsuccessful, you hear a negative indicator tone.

Accessing Indoor Location Beacons Information

Follow the procedure to access Indoor Location beacons information.

1 Press OK to access the menu.

2 Press ▲ or ▼ to `Bluetooth` and press OK to select.

3 Press ▲ or ▼ to `Indoor Location` and press OK to select.

4 Press ▲ or ▼ to `Beacons` and press OK to select.

The display shows the beacons information.

Multi-Site Controls

These features are applicable when your current radio channel is part of an IP Site Connect or Capacity Plus–Multi-Site configuration.

Starting Manual Site Search

Follow the procedure to start manual site search when the received signal strength is poor in order to attempt to find a site with better signal.

1 Do one of the following:

- Press the programmed **Manual Site Roam** button. Skip the following steps.
- Press OK to access the menu.

2 Press ▲ or ▼ to `Utilities`. Press OK to select.

3 Press ▲ or ▼ to `Radio Settings`. Press OK to select.

4 Press ▲ or ▼ to `Site Roaming`. Press OK to select.

5 Press ▲ or ▼ to `Active Search`. Press OK to select.

A tone sounds.The green LED blinks.The display shows `Finding Site`.

If the radio finds a new site:

- A positive indicator tone sounds.
- The LED turns off.
- The display shows `Site <Alias> Found`.

If the radio fails to find a new site:

- A negative indicator tone sounds.
- The LED turns off.
- The display shows `Out of Range`.

If a new site is within range, but the radio is unable to connect to it:

- A negative indicator tone sounds.
- The LED turns off.
- The display shows `Channel Busy`.

Site Lock On/Off

When toggled on, the radio searches the current site only. When toggled off, the radio searches other sites in addition to the current site.

Press the programmed **Site Lock** button.

If the **Site Lock** function is toggled on:

- You hear a positive indicator tone, indicating the radio has locked to the current site.
- The display shows `Site Locked`.

If the **Site Lock** function is toggled off:

- You hear a negative indicator tone, indicating the radio is unlocked.
- The display shows `Site Unlocked`.

Talkaround

This feature allows you to continue communication when your repeater is not operational, or when your radio is out of range from the repeater but within talking range of other radios.

The talkaround setting is retained even after powering down.

NOTICE:
This feature is not applicable in Capacity Plus–Single-Site, Capacity Plus–Multi-Site, and Citizens Band channels that are in the same frequency.

Toggling Between Repeater and Talkaround Modes

Follow the procedure to toggle between Repeater and Talkaround modes on your radio.

1. Do one of the following:
   - Press the programmed **Repeater/Talkaround** button. Skip the following steps.
   - Press OK to access the menu.
2. Press ▲ or ▼ to `Utilities`. Press OK to select.
3. Press ▲ or ▼ to `Radio Settings`. Press OK to select.
4. Press ▲ or ▼ to `Talkaround`. Press OK to select.

   If enabled, ✓ appears beside `Enabled`.

   If disabled, ✓ disappears beside `Enabled`.

The screen automatically returns to the previous screen.

Monitor Feature

The monitor feature is used to make sure that a channel is free before transmitting.

NOTICE:
This feature is not applicable in Capacity Plus–Single-Site and Capacity Plus–Multi-Site.

Monitoring Channels

Follow the procedure to monitor channels.

1 Long press the programmed **Monitor** button.

The **Monitor** icon appears on the display and the LED lights up solid yellow.
If the channel is in use:

- The display shows the **Monitor** icon.
- You hear radio activity or total silence.
- The yellow LED lights up.

If the monitored channel is free, you hear a “white noise".

2 Press the **PTT** button to talk. Release the **PTT** button to listen.

Permanent Monitor

The Permanent Monitor feature is used to continuously monitor a selected channel for activity.

Turning Permanent Monitor On or Off

Follow the procedure to turn Permanent Monitor on or off on your radio.

Press the programmed **Permanent Monitor** button.

When the radio enters the mode:

- An alert tone sounds.
- The yellow LED lights up.
- The display shows `Permanent Monitor On` and the **Monitor** icon.

When the radio exits the mode:

- An alert tone sounds.
- The yellow LED turns off.
- The display shows `Permanent Monitor Off`.

Home Channel Reminder

This feature provides a reminder when the radio is not set to the home channel for a period of time.

If this feature is enabled through CPS, when your radio is not set to the home channel for a period of time, the following occurs periodically:

- The Home Channel Reminder tone and announcement sound.
- The first line of the display shows `Non`.
- The second line shows `Home Channel`.

You can respond to the reminder by performing one of the following actions:

- Return to the home channel.
- Mute the reminder temporarily using the programmable button.
- Set a new home channel using the programmable button.

Muting the Home Channel Reminder

When the Home Channel Reminder sounds, you can temporarily mute the reminder.

Press the **Silence Home Channel Reminder** programmable button.

The first line of the display shows `HCR` and the second line shows `Silenced`.

Setting New Home Channels

When the Home Channel Reminder occurs, you can set a new home channel.

1 Do one of the following:
   - Press the **Reset Home Channel** programmable button to set the current channel as the new Home Channel. Skip the following steps.
     The first line of the display shows the channel alias and the second line shows `New Home Ch`.

- Press OK to access the menu.

2 Press ▲ or ▼ to `Utilities`. Press OK to select.

3 Press ▲ or ▼ to `Radio Settings`. Press OK to select.

4 Press ▲ or ▼ to `Home Channel`. Press OK to select.

5 Press ▲ or ▼ to the desired new home channel alias. Press OK to select.

The display shows ✓ beside the selected home channel alias.

Radio Check

This feature allows you to determine if another radio is active in a system without disturbing the radio user. No audible or visual notification is shown on the target radio.

Your radio must be programmed to allow you to use this feature.

Sending Radio Checks

Follow the procedure to send radio checks on your radio.

1 Press the programmed **Radio Check** button.

2 Press ▲ or ▼ to the required alias or ID. Press OK to select.

The display shows a transitional mini notice, indicating the request is in progress.The green LED lights up.

Wait for acknowledgment.

If you press ↩ when the radio is waiting for acknowledgment, a tone sounds, the radio terminates all retries, and exits Radio Check mode.

If successful:

- A positive indicator tone sounds.
- The display shows a positive mini notice.

If unsuccessful:

- A negative indicator tone sounds.
- The display shows a negative mini notice.

The radio returns to the subscriber alias or ID screen.

Remote Monitor

This feature is used to turn on the microphone of a target radio with a subscriber alias or ID. You can use this feature to remotely monitor any audible activity surrounding the target radio.

There are two types of Remote Monitor:

- Remote Monitor without Authentication
- Remote Monitor with Authentication.

Authenticated Remote Monitor is a purchasable feature. In Authenticated Remote Monitor, verification is required when your radio turns on the microphone of a target radio.

When your radio initiates this feature on a target radio with User Authentication, a passphrase is required. The passphrase is preprogrammed into the target radio through CPS.

Both your radio and the target radio must be programmed to allow you to use this feature.

This feature stops after a programmed duration or when there is any user operation on the target radio.

Initiating Remote Monitor

Follow the procedure to initiate Remote Monitor on your radio.

1. Press the programmed **Remote Monitor** button.
2. Press ▲ or ▼ to the required alias or ID.
3. Press OK to select. One of the following scenarios occurs:
   - The display shows a transitional mini notice, indicating the request is in progress. The green LED lights up.
   - A passphrase screen appears.

     Enter the passphrase. Press OK to proceed.
     - If the passphrase is correct, the display shows a transitional mini notice, indicating the request is in progress. The green LED lights up.

- If the passphrase is incorrect, the display shows a negative mini notice, and returns to the previous screen.

4 Wait for acknowledgment.

If successful:

- A positive indicator tone sounds.
- The display shows a positive mini notice.
- The audio from the monitored radio starts playing for a programmed duration, and the display shows `Rem. Monitor`. Once the timer expires, an alert tone sounds, and the LED turns off.

If unsuccessful:

- A negative indicator tone sounds.
- The display shows a negative mini notice.

Initiating Remote Monitor by Using the Contacts List

Follow the procedure to initiate Remote Monitor on your radio by using the Contacts list.

1 Press OK to access the menu.

2 Press ▲ or ▼ to `Contacts`. Press OK to select.

3 Press ▲ or ▼ to the required alias or ID. Press OK to select.

4 Press ▲ or ▼ to `Remote Mon.`.

5 Press OK to select. One of the following scenarios occurs:

- The display shows a transitional mini notice, indicating the request is in progress. The green LED lights up.
- A passphrase screen appears.

  Enter the passphrase. Press OK to proceed.

  - If the passphrase is correct, the display shows a transitional mini notice, indicating the

request is in progress. The green LED lights up.

- If the passphrase is incorrect, the display shows a negative mini notice, and returns to the previous screen.

6 Wait for acknowledgment.

If successful:

- A positive indicator tone sounds.
- The display shows a positive mini notice.
- The audio from the monitored radio starts playing for a programmed duration, and the display shows `Rem. Monitor`. Once the timer expires, an alert tone sounds, and the LED turns off.

If unsuccessful:

- A negative indicator tone sounds.
- The display shows a negative mini notice.

Initiating Remote Monitor by Using the Manual Dial

Follow the procedure to initiate Remote Monitor on your radio by using the manual dial.

1 Press OK to access the menu.

2 Press ▲ or ▼ to `Contacts`. Press OK to select.

3 Press ▲ or ▼ to `Manual Dial`. Press OK to select.

4 Press ▲ or ▼ to `Radio Number`. Press OK to select.

5 Do one of the following:

- Enter the subscriber alias or ID, and press OK to proceed.

- Edit the previously dialed ID, and press OK to proceed.

6 Press ▲ or ▼ to `Remote Mon..`

7 Press OK to select. One of the following scenarios occurs:

- The display shows a transitional mini notice, indicating the request is in progress. The green LED lights up.
- A passphrase screen appears.

  Enter the passphrase. Press OK to proceed.

  - If the passphrase is correct, the display shows a transitional mini notice, indicating the request is in progress. The green LED lights up.
  - If the passphrase is incorrect, the display shows a negative mini notice, and returns to the previous screen.

8 Wait for acknowledgment.

If successful:

- A positive indicator tone sounds.
- The display shows a positive mini notice.
- The audio from the monitored radio starts playing for a programmed duration, and the display shows `Rem. Monitor`. Once the timer expires, an alert tone sounds, and the LED turns off.

If unsuccessful:

- A negative indicator tone sounds.
- The display shows a negative mini notice.

Scan Lists

Scan lists are created and assigned to individual channels or groups. Your radio scans for voice activity by cycling through the channel or group sequence specified in the scan list for the current channel or group.

Your radio can support up to 250 scan lists, with a maximum of 16 members in a list.

Each scan list supports a mixture of both analog and digital entries.

You can add, delete, or prioritize channels by editing a scan list.

You can attach a new scan list to your radio by using Front Panel Programming. See Front Panel Programming on page 152 for more information.

The **Priority** icon appears on the left of the member alias, if set, to indicate whether the member is on a Priority 1 or Priority 2 channel list. You cannot have multiple Priority 1 or Priority 2 channels in a scan list. There is no **Priority** icon if priority is set to **None**.

NOTICE:
This feature is not applicable in Capacity Plus.

Viewing Entries in the Scan List

Follow the procedure to view the entries in the Scan list on your radio.

1. Press OK to access the menu.
2. Press ▲ or ▼ to `Scan`. Press OK to select.
3. Press ▲ or ▼ to `Scan List`. Press OK to select.
4. Press ▲ or ▼ to view each member on the list.

Adding New Entries to the Scan List

Follow the procedure to add new entries to the Scan list on your radio.

1. Press OK to access the menu.
2. Press ▲ or ▼ to `Scan`. Press OK to select.
3. Press ▲ or ▼ to `Scan List`. Press OK to select.
4. Press ▲ or ▼ to `Add Member`. Press OK to select.

5 Press ▲ or ▼ to the required alias or ID. Press OK to select.

6 Press ▲ or ▼ to the required priority level. Press OK to select.

The display shows a positive mini notice and then, `Add Another?`.

7 Do one of the following:

- Press ▲ or ▼ to `Yes` to add another entry.

  Press OK to select. Repeat step 5 and step 6.
- Press ▲ or ▼ to `No` to save the current list.

  Press OK to select.

Deleting Entries from the Scan List

Follow the procedure to delete entries from the Scan list.

1 Press OK to access the menu.

2 Press ▲ or ▼ to `Scan`. Press OK to select.

3 Press ▲ or ▼ to `Scan List`. Press OK to select.

4 Press ▲ or ▼ to the required alias or ID. Press OK to select.

5 Press ▲ or ▼ to `Delete`. Press OK to select.

The display shows `Delete Entry?`.

6 Do one of the following:

- Press ▲ or ▼ to `Yes` to delete the entry. Press OK to select.

  The display shows a positive mini notice.

- Press ▲ or ▼ to No to return to the previous screen. Press OK to select.

7 Repeat step 4 to step 6 to delete other entries.

8 Long press ⌂ to return to the Home screen after deleting all required aliases or IDs.

Setting Priority for Entries in the Scan List

Follow the procedure to set priorities for entries in the Scan list on your radio.

1 Press OK to access the menu.

2 Press ▲ or ▼ to Scan. Press OK to select.

3 Press ▲ or ▼ to Scan List. Press OK to select.

4 Press ▲ or ▼ to the required alias or ID. Press OK to select.

5 Press ▲ or ▼ to Edit Priority. Press OK to select.

6 Press ▲ or ▼ to the required priority level. Press OK to select.

The display shows a positive mini notice before returning to the previous screen. The **Priority** icon appears on the left of the member alias.

Scan

Your radio cycles through the programmed scan list for the current channel looking for voice activity when you start a scan.

NOTICE:
This feature is not applicable in Capacity Plus.

During a dual-mode scan, if you are on a digital channel, and your radio locks onto an analog channel, it

automatically switches from digital mode to analog mode for the duration of the call. This is also true for the reverse.

There are two ways of initiating scan:

Main Channel Scan (Manual)

Your radio scans all the channels or groups in your scan list. On entering scan, your radio may, depending on the settings, automatically start on the last scanned active channel or group, or on the channel where scan was initiated.

Auto Scan (Automatic)

Your radio automatically starts scanning when you select a channel or group that has Auto Scan enabled.

Turning Scan On or Off

Follow the procedure to turn scan on or off on your radio.

NOTICE:
While scanning, the radio only accepts data (for example: text message, location, or PC data) if received on its Selected Channel.

1. Turn the **Channel Selector Knob** to select a channel programmed with a scan list.
2. Press OK to access the menu.
3. Press ▲ or ▼ to `Scan`. Press OK to select.
4. Press ▲ or ▼ to `Scan State`. Press OK to select.
5. Press ▲ or ▼ to the required scan state and press OK to select.

If scan is enabled:

- The display shows `Scan On` and **Scan** icon.
- The yellow LED blinks.

If scan is disabled:

- The display shows `Scan Off`.
- The **Scan** icon disappears.
- The LED turns off.

Responding to Transmissions During Scanning

During scanning, your radio stops on a channel or group where activity is detected. The radio stays on that channel for a programmed duration known as hang time. Follow the procedure to respond to transmissions during scanning.

1 If the Channel Free Indication feature is enabled, you hear a short alert tone the moment the transmitting radio releases the **PTT** button, indicating the channel is free for you to respond. Press the **PTT** button during hang time.

   The green LED lights up.

2 Do one of the following:

   - Wait for the Talk Permit Tone to end and speak clearly into the microphone if enabled.
   - Wait for the **PTT** Sidetone to end and speak clearly into the microphone if enabled.

3 Release the **PTT** button to listen.

   The radio returns to scanning other channels or groups if you do not respond within the hang time.

Deleting Nuisance Channels

If a channel continually generates unwanted calls or noise, (termed a "nuisance" channel), you can temporarily remove the unwanted channel from the scan list. This capability does not apply to the channel designated as the Selected Channel. Follow the procedure to delete nuisance channels on your radio.

1 When your radio locks on to an unwanted or nuisance channel, press the programmed **Nuisance Channel Delete** button until you hear a tone.

2 Release the programmed **Nuisance Channel Delete** button.

   The nuisance channel is deleted.

Restoring Nuisance Channels

Follow the procedure to restore nuisance channels on your radio.

Do one of the following:

- Turn the radio off and then power it on again.

- Stop and restart a scan using the programmed **Scan** button or menu.
- Change the channel using the **Channel Selector Knob**.

Vote Scan

Vote Scan provides you with wide area coverage in areas where there are multiple base stations transmitting identical information on different analog channels.

Your radio scans analog channels of multiple base stations and performs a voting process to select the strongest received signal. Once that is established, your radio receives transmissions from that base station.

During a vote scan, the yellow LED blinks and the display shows the **Vote Scan** icon.

Follow the same procedures as Responding to Transmissions During Scanning on page 345, to respond to a transmission during a vote scan.

Contacts Settings

Contacts provides address book capabilities on your radio. Each entry corresponds to an alias or ID that you use to initiate a call. The entries are alphabetically sorted.

Each entry, depending on context, associates with the different call types: Group Call, Private Call, All Call, PC Call, or Dispatch Call.

PC Call and Dispatch Call are data-related. They are only available with the applications. Refer to the data applications documentation for further details.

NOTICE:
You see a checkmark before each number key that is assigned to an entry. If the checkmark is before `Empty`, you have not assign a number key to the entry.

Each entry within Contacts displays the following information:

- Call Type
- Call Alias
- Call ID

NOTICE:
If the Privacy feature is enabled on a channel, you can make privacy-enabled Group Calls, Private Calls, and All Calls on that channel. Only target radios with the same Privacy Key, or the same Key Value and Key ID as your radio will be able to decrypt the transmission.

Adding New Contacts

Follow the procedure to add new contacts on your radio.

1. Press OK to access the menu.
2. Press ▲ or ▼ to `Contacts`. Press OK to select.
3. Press ▲ or ▼ to `New Contact`. Press OK to select.
4. Press ▲ or ▼ to select contact type `Radio Contact` or `Phone Contact`. Press OK to select.
5. Enter the contact number with the keypad, and press OK to proceed.
6. Enter the contact name with the keypad, and press OK to proceed.
7. Press ▲ or ▼ to the required ringer type. Press OK to select.

   A positive indicator tone sounds. The display shows a positive mini notice.

Setting Default Contact

Follow the procedure to set the default contact on your radio.

1. Press OK to access the menu.
2. Press ▲ or ▼ to `Contacts`. Press OK to select.

3 Press ▲ or ▼ to the required alias or ID. Press OK to select.

4 Press ▲ or ▼ to `Set as Default`. Press OK to select.

A positive indicator tone sounds. The display shows a positive mini notice. The display shows ✓ beside the selected default alias or ID.

Assigning Entries to Programmable Number Keys

Follow the procedure to assign entries to programmable number keys on your radio.

1 Press OK to access the menu.

2 Press ▲ or ▼ to `Contacts`. Press OK to select.

3 Press ▲ or ▼ to the required alias or ID. Press OK to select.

4 Press ▲ or ▼ to `Program Key`. Press OK to select.

5 Do one of the following:

- If the desired number key has not been assigned to an entry, press ▲ or ▼ to the desired number key. Press OK to select.
- If the desired number key has been assigned to an entry, the display shows `The Key is Already Assigned` and then, the first text line shows `Overwrite?`. Do one of the following:

  Press ▲ or ▼ to `Yes`. Press OK to select.

  The radio sounds a positive indicator tone and the display shows `Contact Saved` and a positive mini notice.

  Press ▲ or ▼ to `No` to return to the previous step.

Removing Associations Between Entries and Programmable Number Keys

Follow the procedure to remove the associations between entries and programmable number keys on your radio.

1 Do one of the following:

- Long press the programmed number key to the required alias or ID. Proceed to step 4.
- Press OK to access the menu.

2 Press ▲ or ▼ to `Contacts`. Press OK to select.

3 Press ▲ or ▼ to the required alias or ID. Press OK to select.

4 Press ▲ or ▼ to `Program Key`. Press OK to select.

5 Press ▲ or ▼ to `Empty`. Press OK to select.

The first text line shows `Clear from all keys`.

6 Press ▲ or ▼ to `Yes`. Press OK to select.

NOTICE:
When an entry is deleted, the association between the entry and its programmed number key(s) is removed.

A positive indicator tone sounds. The display shows `Contact Saved`.
The screen automatically returns to the previous menu.

Call Indicator Settings

This feature allows the radio users to configure call or text message ringing tones.

Activating or Deactivating Call Ringers for Call Alerts

Follow the procedure to activate or deactivate call ringers for Call Alerts on your radio.

1. Press OK to access the menu.
2. Press ▲ or ▼ to `Utilities`. Press OK to select.
3. Press ▲ or ▼ to `Radio Settings`. Press OK to select.
4. Press ▲ or ▼ to `Tones/Alert`. Press OK to select.
5. Press ▲ or ▼ to `Call Ringers`. Press OK to select.
6. Press ▲ or ▼ to `Call Alert`. Press OK to select.
7. Do one of the following:
   - Press ▲ or ▼ to the required tone. Press OK to select.
     The display shows ✓ and the selected tone.
   - Press ▲ or ▼ to `Off`. Press OK to select.
     If the ringing tones were earlier enabled, the display shows ✓ beside `Off`.

     If the ringing tones were earlier disabled, the display does not show ✓ beside `Off`.

Activating or Deactivating Call Ringers for Private Calls

Follow the procedure to activate or deactivate call ringers for Private Calls on your radio.

1. Press OK to access the menu.
2. Press ▲ or ▼ to `Utilities`. Press OK to select.
3. Press ▲ or ▼ to `Radio Settings`. Press OK to select.
4. Press ▲ or ▼ to `Tones/Alerts`. Press OK to select.
5. Press ▲ or ▼ to `Call Ringers`. Press OK to select.
6. Press ▲ or ▼ to `Private Call`. Press OK to select.

   The display shows ✓ beside `On` if Private Call ringing tones are enabled.

   The display shows ✓ beside `Off` if Private Call ringing tones are disabled.
7. Do one of the following:
   - Press ▲ or ▼ to the required tone. Press OK to select.
     The display shows ✓ and the selected tone.
   - Press ▲ or ▼ to `Off`. Press OK to select.
     If the ringing tones were earlier enabled, the display shows ✓ beside `Off`.

     If the ringing tones were earlier disabled, the display does not show ✓ beside `Off`.

Activating or Deactivating Call Ringers for Selective Calls

Follow the procedure to activate or deactivate call ringers for Selective Calls on your radio.

1. Press OK to access the menu.
2. Press ▲ or ▼ to `Utilities`. Press OK to select.
3. Press ▲ or ▼ to `Radio Settings`. Press OK to select.
4. Press ▲ or ▼ to `Tones/Alerts`. Press OK to select.
5. Press ▲ or ▼ to `Call Ringers`. Press OK to select.
6. Press ▲ or ▼ to `Selective Call`. Press OK to select.

   The display shows ✓ and the current tone.
7. Do one of the following:
   - Press ▲ or ▼ to the required tone. Press OK to select.
     The display shows ✓ and the selected tone.
   - Press ▲ or ▼ to `Off`. Press OK to select.
     If the ringing tones were earlier enabled, the display shows ✓ beside `Off`.

     If the ringing tones were earlier disabled, the display does not show ✓ beside `Off`.

Activating or Deactivating Call Ringers for Text Messages

Follow the procedure to activate or deactivate call ringers for text messages on your radio.

1 Press OK to access the menu.

2 Press ▲ or ▼ to `Utilities`. Press OK to select.

3 Press ▲ or ▼ to `Radio Settings`. Press OK to select.

4 Press ▲ or ▼ to `Tones/Alerts`. Press OK to select.

5 Press ▲ or ▼ to `Call Ringers`. Press OK to select.

6 Press ▲ or ▼ to `Text Message`. Press OK to select.

The display shows ✓ and the current tone.

7 Do one of the following:

- Press ▲ or ▼ to the required tone. Press OK to select.
  The display shows ✓ and the selected tone.
- Press ▲ or ▼ to `Off`. Press OK to select.
  If the ringing tones were earlier enabled, the display shows ✓ beside `Off`.

  If the ringing tones were earlier disabled, the display does not show ✓ beside `Off`.

Activating or Deactivating Call Ringers for Telemetry Status with Text

Follow the procedure to activate or deactivate call ringers for telemetry status with text on your radio.

1 Press OK to access the menu.

2 Press ▲ or ▼ to `Utilities`. Press OK to select.

3 Press ▲ or ▼ to `Radio Settings`. Press OK to select.

4 Press ▲ or ▼ to `Tones/Alert`. Press OK to select.

5 Press ▲ or ▼ to `Call Ringers`. Press OK to select.

6 Press ▲ or ▼ to `Telemetry`. Press OK to select.

The current tone is indicated by a ✓ .

7 Do one of the following:

- Press ▲ or ▼ to the preferred tone. Press OK to select.
  The display shows `Tone <Number> Selected` and a ✓ appears left of the selected tone.
- Press ▲ or ▼ to `Turn Off`. Press OK to select.
  The display shows `Telemetry Ringer Off` and a ✓ appears left of `Turn Off`.

Assigning Ring Styles

The radio can be programmed to sound one of ten predefined ringing tones when receiving a Call Alert or a Text Message from a particular contact. The radio sounds out each ring style as you navigate through the list. Follow the procedure to assign ring styles on your radio.

1 Press OK to access the menu.

2 Press ▲ or ▼ to `Contacts`. Press OK to select.

The entries are alphabetically sorted.

3 Press ▲ or ▼ to the required alias or ID. Press OK to select.

4 Press ▲ or ▼ to `Edit`. Press OK to select.

5 Press OK until display shows `Edit Ringtone` menu.

A ✓ indicates the current selected tone.

6 Press ▲ or ▼ to the required tone. Press OK to select.

The display shows a positive mini notice.

Selecting a Ring Alert Type

NOTICE:
The programmed **Ring Alert Type** button is assigned by your dealer or system administrator. Check with your dealer or system administrator to determine how your radio has been programmed.

You can program the radio calls to one predetermined vibrate call. If All Tones status is disabled, the radio displays the All Tone Mute icon. If All Tones status is enabled, the related ring alert type is displayed.

The radio vibrates once if it is a momentary ring style. The radio vibrates repetitively if it is a repetitive ring style. When set to Ring and Vibrate, the radio sounds a specific ring tone if there is any incoming radio transaction (for example, Call Alert or Message). It sounds like a positive indicator tone or missed call.

For radios with batteries that support the vibrate feature and are attached to a vibrating belt clip, the available Ring Alert Type options are Silent, Ring, Vibrate, and Ring and Vibrate.

For radios with batteries that do not support the vibrate feature and are not attached to a vibrating belt clip, Ring Alert Type is automatically set to Ring. The available Ring Alert Type options are Silent and Ring.

You can select a Ring Alert Type by performing one of the following actions.

- Press the programmed **Ring Alert Type** button to access the Ring Alert Type menu.
  a. Press ▲ or ▼ to `Ring`, `Vibrate`, `Ring & Vibrate` or `Silent` and press OK to select.

- Access this feature through the menu.

  a. Press OK to access the menu.

  b. Press ▲ or ▼ to `Utilities` and press OK to select.

  c. Press ▲ or ▼ to `Radio Settings` and press OK to select.

  d. Press ▲ or ▼ to `Tones/Alerts` and press OK to select.

  e. Press ▲ or ▼ to `Ring Alert Type` and press OK to select.

  f. Press ▲ or ▼ to `Ring`, `Vibrate`, `Ring & Vibrate` or `Silent` and press OK to select.

Configuring Vibrate Style

NOTICE:
The programmed **Vibrate Style** button is assigned by your dealer or system administrator. Check with your dealer or system administrator to determine how your radio has been programmed.

Vibrate Style is enabled when the Vibrating Belt Clip is attached to the radio with a battery that supports the vibrate feature.

You can configure the vibrate style by performing one of the following actions.

- Press the programmed **Vibrate Style** button to access the Vibrate Style menu.

  a. Press ▲ or ▼ to `Short`, `Medium`, or `Long` and press OK to select.

- Access this feature via the menu.

  a. Press OK to access the menu.

  b. Press ▲ or ▼ to `Utilities` and press OK to select.

c. Press ▲ or ▼ to `Radio Settings` and press OK to select.

d. Press ▲ or ▼ to `Tones/Alerts` and press OK to select.

e. Press ▲ or ▼ to `Vibrate Style` and press OK to select.

f. Press ▲ or ▼ to `Short`, `Medium`, or `Long` and press OK to select.

Escalating Alarm Tone Volume

The radio can be programmed to continually alert, when a radio call remains unanswered. This is done by automatically increasing the alarm tone volume over time. This feature is known as Escalert. Follow the procedure to escalate alarm tone volume on your radio.

Call Log Features

Your radio keeps track of all recent outgoing, answered, and missed Private Calls. The call log feature is used to view and manage recent calls.

Missed Call Alerts may be included in the call logs, depending on the system configuration on your radio. You can perform the following tasks in each of your call lists:

- Store Alias or ID to Contacts
- Delete Call
- View Details

Viewing Recent Calls

Follow the procedure to view recent calls on your radio.

1. Press OK to access the menu.
2. Press ▲ or ▼ to `Call Log`. Press OK to select.
3. Press ▲ or ▼ to the preferred list. The options are `Missed`, `Answered`, and `Outgoing` lists.

Press OK to select.

The display shows the most recent entry.

4 Press ▲ or ▼ to view the list.

You can start a Private Call with the alias or ID the display is currently showing by pressing the **PTT** button.

Viewing Call List Details

Follow the procedure to view call details on your radio.

1 Press OK to access the menu.

2 Press ▲ or ▼ to `Call Log`. Press OK to select.

3 Press ▲ or ▼ to the required list. Press OK to select.

4 Press ▲ or ▼ to the required alias or ID. Press OK to select.

5 Press ▲ or ▼ to `View Details`. Press OK to select.

The display shows the call details.

Storing Aliases or IDs from the Call List

Follow the procedure to store aliases or IDs on your radio from the Call list.

1 Press OK to access the menu.

2 Press ▲ or ▼ to `Call Log`. Press OK to select.

3 Press ▲ or ▼ to the required list. Press OK to select.

4 Press ▲ or ▼ to the required alias or ID. Press OK to select.

5 Press ▲ or ▼ to `Store`. Press OK to select.

The display shows a blinking cursor.

6 Enter the rest of the characters of the required alias.

Press OK to select.

You can store an ID without an alias.

The display shows a positive mini notice.

Deleting Calls from the Call List

Follow the procedure to delete calls from the Call list.

1 Press OK to access the menu.

2 Press ▲ or ▼ to `Call Log`. Press OK to select.

3 Press ▲ or ▼ to the required list. Press OK to select.

If the list is empty:

- A tone sounds.
- The display shows `List Empty`.

4 Press ▲ or ▼ to the required alias or ID. Press OK to select.

5 Press ▲ or ▼ to `Delete Entry?`. Press OK to select.

6 Do one of the following:

- Press OK to select `Yes` to delete the entry. The display shows `Entry Deleted`.
- Press ▲ or ▼ to `No`. Press OK to select.

The radio returns to the previous screen.

Call Alert Operation

Call Alert paging enables you to alert a specific radio user to call you back.

This feature is applicable for subscriber aliases or IDs only and is accessible through the menu using Contacts or a programmed **One Touch Access** button.

Responding to Call Alerts

Follow the procedure to respond to Call Alerts on your radio.

When you receive a Call Alert:

- A repetitive tone sounds.
- The yellow LED blinks.
- The display shows the notification list listing a Call Alert with the alias or ID of the calling radio.

  Depending on the configuration by your dealer or system administrator, you can respond to a Call Alert by doing one of the following:

  - Press the **PTT** button and respond with a Private Call directly to the caller.
  - Press the **PTT** button to continue normal talkgroup communication.
    The Call Alert is moved to the Missed Call option at the Call Log menu. You can respond to the caller from the Missed Called log.

See Notification List on page 150 and Call Log Features on page 111 for more information.

Making Call Alerts

Follow the procedure to make Call Alerts on your radio.

1. Press the programmed **One Touch Access** button.

   The display shows `Call Alert` and the subscriber alias or ID. The green LED lights up.

2. Wait for acknowledgment.

   If the Call Alert acknowledgment is received, the display shows a positive mini notice.

   If the Call Alert acknowledgment is not received, the display shows a negative mini notice.

Making Call Alerts by Using the Contacts List

Follow the procedure to make Call Alerts on your radio by using the Contacts list.

1. Press OK to access the menu.
2. Press ▲ or ▼ to `Contacts`. Press OK to select.
3. Press ▲ or ▼ to the required alias or ID. Press OK to select.
4. Press ▲ or ▼ to `Call Alert`. Press OK to select.

   The display shows `Call Alert` and the subscriber alias or ID. The green LED lights up.
5. Wait for acknowledgment.
   - If the Call Alert acknowledgment is received, the display shows a positive mini notice.
   - If the Call Alert acknowledgment is not received, the display shows a negative mini notice.

Mute Mode

Mute Mode provides an option to the user to silence all audio indicators of the radio.

Once Mute Mode feature is initiated, all audio indicators are muted except higher priority features such as Emergency operations.

When Mute Mode is exited, the radio resumes playing ongoing tones and audio transmissions.

NOTICE:
This is a purchasable feature. Check with your dealer or system administrator for more information.

Turning On Mute Mode

Follow the procedure to turn on Mute Mode.

Do one of the following:

- Access this feature by using the programmed **Mute Mode** button.

- Access this feature by placing the radio in a face-down position momentarily.

Depending on radio model, the Face Down feature can be enabled either through the radio menu or by your system administrator. Check with your dealer or system administrator for more information.

IMPORTANT:
User can only enable either Man Down or Face Down at a time. Both features cannot be enabled together.

NOTICE:
Face Down feature is applicable to DP4601e only.

The following occurs when Mute mode is enabled:

- Positive Indicator Tone sounds.
- Display shows `Mute Mode On`.
- The red LED light starts blinking and remains blinking until Mute Mode is exited.
- Display shows **Mute Mode** icon on home screen.
- Radio is muted.
- Mute Mode Timer begins counting down the duration that is configured.

Setting Mute Mode Timer

Mute Mode feature can be enabled for a pre-configured amount of time by setting the Mute Mode Timer. The timer duration is configured in the radio menu and can range between 0.5–6 hours. Mute Mode is exited once the timer expires.

If the timer is left at 0, the radio remains in Mute mode for an indefinite period until the radio is moved to a face-up position or the programmed **Mute Mode** button is pressed.

NOTICE:
Face Down feature is applicable to DP4601e only.

1. Press OK to access the menu.
2. Press ▲ or ▼ to `Utilities`. Press OK to select.
3. Press ▲ or ▼ to `Radio Settings`. Press OK to select.

4 Press ▲ or ▼ to `Mute Timer`. Press OK to select.

5 Press ▲ or ▼ to edit the numeric value of each digit, and press OK.

Exiting Mute Mode

This feature can be exited automatically once the Mute Mode Timer expires.

Do one of the following to exit Mute mode manually:

- Press the programmed **Mute Mode** button.
- Press the **PTT** button on any entry.
- Place the radio in a face-up position momentarily.

NOTICE:
Face Down feature is applicable to DP4601e only.

The following occurs when Mute mode is disabled:

- Negative Indicator Tone sounds.
- Display shows `Mute Mode Off`.
- The blinking red LED turns off.
- **Mute Mode** icon disappears from home screen.
- Your radio unmutes and speaker state is restored.
- If the timer has not expired, Mute mode timer is stopped.

NOTICE:
Mute Mode is also exited if the user transmits voice or switches to an unprogrammed channel.

Emergency Operation

An Emergency Alarm is used to indicate a critical situation. You are able to initiate an Emergency at any time even when there is activity on the current channel.

Your dealer can set the duration of a button press for the programmed **Emergency** button, except for long press, which is similar with all other buttons:

Short Press
Duration between 0.05 seconds and 0.75 seconds.

Long Press
Duration between 1.00 second and 3.75 seconds.

The **Emergency** button is assigned with the Emergency On/Off feature. Check with your dealer for the assigned operation of the **Emergency** button.

NOTICE:
If a short press to the **Emergency** button initiates Emergency mode, then a long press to the same enables the radio to exit Emergency mode.

If a long press to the **Emergency** button initiates Emergency mode, then a short press to the same enables the radio to exit Emergency mode.

Your radio supports three Emergency Alarms:

- Emergency Alarm
- Emergency Alarm with Call
- Emergency Alarm with Voice to Follow

NOTICE:
Only one of the Emergency Alarms above can be assigned to the programmed **Emergency** button.

In addition, each alarm has the following types:

Regular
Radio transmits an alarm signal and shows audio and/or visual indicators.

Silent
Radio transmits an alarm signal without any audio or visual indicators. Radio receives calls without any sound through the speaker, until the programmed *hot mic* transmission period is over and/or you press the **PTT** button.

Silent with Voice
Radio transmits an alarm signal without any audio or visual indicators, but allow incoming calls to sound through the speaker. If *hot mic* is enabled, the incoming calls sound through the speaker after the programmed *hot mic* transmission period is over. The indicators only appear once you press the **PTT** button.

Sending Emergency Alarms

This feature allows you to send an Emergency Alarm, a non-voice signal, which triggers an alert indication on a group of radios. Your radio does not display any audio or visual indicators during Emergency mode when it is set to Silent.

Follow the procedure to send Emergency Alarms on your radio.

1 Press the programmed **Emergency On** button.

You see one of these results:

- The display shows `Tx Alarms` and the destination alias.
- The display shows `Tx Telegram` and the destination alias.

The green LED lights up. The **Emergency** icon appears.

NOTICE:
If programmed, the Emergency Search tone sounds. This tone is muted when the radio transmits or receives voice, and stops when the radio exits Emergency mode. The Emergency Search tone can be programmed through CPS.

2 Wait for acknowledgment.

If successful:

- The Emergency tone sounds.
- The red LED blinks.
- The display shows `Alarm Sent`.

If unsuccessful after all retries have been exhausted:

- A tone sounds.
- The display shows `Alarm Failed`.

The radio exits the Emergency Alarm mode and returns to the Home screen.

Sending Emergency Alarms with Call

This feature allows you to send an Emergency Alarm with Call to a group of radios. Upon acknowledgement by a radio within the group, the group of radios can communicate over a programmed Emergency channel. Follow the procedure to send Emergency Alarms with call on your radio.

1 Press the programmed **Emergency On** button.

You see the following:

- The display shows `Tx Telegram` and the destination alias.

The green LED lights up. The **Emergency** icon appears.

NOTICE:
If programmed, the Emergency Search tone sounds. This tone is muted when the radio transmits or receives voice, and stops when the radio exits Emergency mode. The Emergency Search tone can be programmed by your dealer or system administrator.

2 Wait for acknowledgment.

If successful:

- The Emergency tone sounds.
- The red LED blinks.
- The display shows `Alarm Sent`.
- Your radio enters the Emergency call mode when the display shows `Emergency` and the destination group alias.

3 Press the **PTT** button to make the call.

The green LED lights up. The display shows the **Group Call** icon.

4 Do one of the following:

- Wait for the Talk Permit Tone to end and speak clearly into the microphone if enabled.
- Wait for the **PTT** Sidetone to end and speak clearly into the microphone if enabled.

5 Release the **PTT** button to listen.

The display shows the caller and group aliases.

6 If the Channel Free Indication feature is enabled, you hear a short alert tone the moment the transmitting radio releases the **PTT** button, indicating the channel is free for you to respond. Press the **PTT** button to respond to the call.

7 To exit the Emergency mode once the call ends, press the **Emergency Off** button.

The radio returns to the Home screen.

Emergency Alarms with Voice to Follow

This feature allows you to send an Emergency Alarm with Voice to Follow to a group of radios. Your radio microphone

is automatically activated, allowing you to communicate with the group of radios without pressing the **PTT** button. This activated microphone state is also known as *hot mic*.

If your radio has Emergency Cycle Mode enabled, repetitions of *hot mic* and receiving period are made for a programmed duration. During Emergency Cycle Mode, received calls sound through the speaker.

If you press the **PTT** button during the programmed receiving period, you hear a prohibit tone, indicating that you should release the **PTT** button. The radio ignores the **PTT** button press and remains in Emergency mode.

If you press the **PTT** button during *hot mic*, and continue to press it after the *hot mic* duration expires, the radio continues to transmit until you release the **PTT** button.

If the Emergency Alarm request fails, the radio does not retry to send the request, and enters the *hot mic* state directly.

NOTICE:
Some accessories may not support *hot mic*. Check with your dealer or system administrator for more information.

Sending Emergency Alarms with Voice to Follow

Follow the procedure to send Emergency Alarms with voice to follow on your radio.

1 Press the programmed **Emergency On** button.

You see one of these results:

- The display shows `Tx Alarm` and the destination alias.
- The display shows `Tx Telegram` and the destination alias.

The green LED lights up. The **Emergency** icon appears.

2 Once the display shows `Alarm Sent`, speak clearly into the microphone.

The radio automatically stops transmitting when:

- The cycling duration between *hot mic* and receiving calls expires, if Emergency Cycle Mode is enabled.

- The *hot mic* duration expires, if Emergency Cycle Mode is disabled.

3 Press the **Emergency Off** button to exit the Emergency mode.

The radio returns to the Home screen.

Receiving Emergency Alarms

Follow the procedure to receive Emergency Alarms on your radio.

When you receive an Emergency Alarm:

- A tone sounds.
- The red LED blinks.
- The display shows the **Emergency** icon, and the Emergency caller alias or if there is more than one alarm, all emergency caller aliases are displayed in an Alarm List.

1 Do one of the following:

- If only one alarm, press OK to view more details.
- If more than one alarm, press ▲ or ▼ to the required alias, and press OK to view more details.

2 Press OK to view the action options.

3 Press ↩ and select `Yes` to exit the Alarm list.

4 Press OK to access the menu.

5 Select `Alarm List` to revisit the Alarm list.

Responding to Emergency Alarms

Follow the procedure to respond to Emergency Alarms on your radio.

1 Make sure the display shows the Alarm List. Press ▲ or ▼ to the required alias or ID.

2 If the Channel Free Indication feature is enabled, you hear a short alert tone the moment the transmitting radio releases the **PTT** button, indicating the channel is free for you to respond. Press the **PTT** button to transmit non-emergency voice to the same group the Emergency Alarm targeted.

The green LED lights up. Your radio remains in the Emergency mode.

3 Do one of the following:

- Wait for the Talk Permit Tone to end and speak clearly into the microphone if enabled.
- Wait for the **PTT** Sidetone to end and speak clearly into the microphone if enabled.

4 Release the **PTT** button to listen.

When the emergency initiating radio responds:

- The green LED blinks.
- The display shows the **Group Call** icon and ID, transmitting radio ID, and the Alarm list.

Emergency voice can only be transmitted by the emergency initiating radio. All other radios, including the emergency receiving radio, transmit non-emergency voice.

Exiting Emergency Mode After Receiving the Emergency Alarm

Do one of the following to exit Emergency mode after receiving Emergency alarm:

- Delete the alarm items.
- Power down the radio.

Reinitiating Emergency Mode

This feature is only applicable to the radio sending the Emergency Alarm. Follow the procedure to reinitiate Emergency mode on your radio.

Do one of the following:

- Change the channel while the radio is in Emergency mode. The radio exits the Emergency

mode, and reinitiates Emergency, if Emergency Alarm is enabled on the new channel.

- Press the programmed **Emergency On** button during an Emergency initiation or transmission state. The radio exits this state, and reinitiates Emergency.

Exiting Emergency Mode

This feature is only applicable to the radio sending the Emergency Alarm.

Your radio exits Emergency mode when:

- An acknowledgment is received (for Emergency Alarm only).
- All retries to send the alarm have been exhausted.
- Your radio is turned off.

NOTICE:
Your radio does not reinitiate the Emergency mode automatically when it is powered up again.

Follow the procedure to exit Emergency mode on your radio.

Do one of the following:

- Press the programmed **Emergency Off** button.
- Turn off the radio and then, power it on again, if your radio has been programmed to remain on the Emergency Revert channel even after acknowledgment is received.
- Change the channel to a new channel that has no emergency system configured.
  The display shows `No Emergency`.

Deleting an Alarm Item from the Alarm List

Follow the procedure to delete the alarm items from the Alarm List, to exit Emergency mode.

1. Press OK to access the menu.
2. Press ▲ or ▼ to `Alarm List`. Press OK to select.

3 Press ▲ or ▼ to the required alarm item. Press OK to select.

4 Press ▲ or ▼ to `Delete`. Press OK to select.

Man Down

NOTICE:
Man Down feature is applicable to only DP4601e .

This feature prompts an emergency to be raised if there is a change in the motion of the radio, such as the tilt of the radio, motion and/or the lack of motion for a predefined time.

Following a change in the motion of the radio for a programmed duration, the radio pre-warns the user with an audio indicator indicating that a change in motion is detected.

If there is still no acknowledgment by the user before the predefined reminder timer expires, the radio initiates an Emergency Alarm or an Emergency Call. You can program the reminder timer by using CPS.

Turning the Man Down Feature On or Off

NOTICE:
The programmed **Man Down** button and Man Down settings are configured using CPS. Check with your dealer or system administrator to determine how your radio has been programmed.

If you disable the Man Down feature, the programmed alert tone sounds repeatedly until the Man Down feature is enabled. A device failure tone sounds when the Man Down feature fails while powering up. The device failure tone continues until the radio resumes normal operation.

You can enable or disable this feature by performing one of the following actions.

- Press the programmed **Man Down** button to toggle the feature on or off.
- Access this feature using the menu.

  a. Press OK to access the menu.

  b. Press ▲ or ▼ to `Utilities`. Press OK to select.

c. Press ▲ or ▼ to `Radio Settings`. Press OK to select.

d. Press ▲ or ▼ to `Man Down`. Press OK to select.

You can also use ◀ or ▶ to change the selected option.

e. Press OK to enable or disable Man Down.

If enabled, ✓ appears beside `Enabled`.

If disabled, ✓ disappears beside `Enabled`.

Text Messaging

Your radio is able to receive data, for example a text message, from another radio or a text message application.

There are two types of text messages, Digital Mobile Radio (DMR) Short Text Message and text message. The maximum length of a DMR Short Text Message is 23 characters. The maximum length of a text message is 280 characters, including the subject line. The subject line only appears when you receive messages from e-mail applications.

NOTICE:
The maximum character length is only applicable for models with the latest software and hardware. For radio models with older software and hardware, the maximum length of a text message is 140 characters. Check with your dealer or system administrator for more information.

For the Arabic language, the text entry orientation is from right to left.

Text Messages

The text messages are stored in an Inbox, and sorted according to the most recently received.

Viewing Text Messages

Follow the procedure to view text messages on your radio.

1 Press OK to access the menu.

2 Press ▲ or ▼ to Messages. Press OK to select.

3 Press ▲ or ▼ to Inbox. Press OK to select.

If the Inbox is empty:

- The display shows List Empty.
- A tone sounds, if the Keypad Tone is turned on.

4 Press ▲ or ▼ to the required message. Press OK to select.

The display shows a subject line if the message is from an e-mail application.

Viewing Telemetry Status Text Messages

Follow the procedure to view a telemetry status text message from the inbox.

1 Press OK to access the menu.

2 Press ▲ or ▼ to Messages. Press OK to select.

3 Press ▲ or ▼ to Inbox. Press OK to select.

4 Press ▲ or ▼ to the required message. Press OK to select.

You cannot reply to a Telemetry Status text message.

The display shows Telemetry: <Status Text Message>.

5 Long press ↩ to return to the Home screen.

Viewing Saved Text Messages

Follow the procedure to view saved text message on your radio.

1 Do one of the following:

- Press the programmed **Text Message** button. Proceed to step 3.
- Press OK to access the menu.

2 Press ▲ or ▼ to `Messages`. Press OK to select.

3 Press ▲ or ▼ to `Drafts`. Press OK to select.

4 Press ▲ or ▼ to the required message. Press OK to select.

Responding to Text Messages

Follow the procedure to respond to text messages on your radio.

When you receive a text message:

- The display shows the Notification list with the alias or ID of the sender.
- The display shows the **Message** icon.

NOTICE:
The radio exits the Text Message alert screen and sets up a Private or Group Call to the sender of the message if the **PTT** button is pressed.

1 Do one of the following:

- Press ▲ or ▼ to `Read`. Press OK to select. The display shows the text message. The display shows a subject line if the message is from an e-mail application.
- Press ▲ or ▼ to `Read Later`. Press OK to select.
  The radio returns to the screen you were on prior to receiving the text message.
- Press ▲ or ▼ to `Delete`. Press OK to select.

2 Press ↩ to return to the Inbox.

Replying to Text Messages

Follow the procedure to respond to text messages on your radio.

1 Do one of the following:

- Press the programmed **Text Message** button. Proceed to Step step 3.
- Press OK to access the menu.

2 Press ▲ or ▼ to `Messages`. Press OK to select.

3 Press ▲ or ▼ to `Inbox`. Press OK to select.

4 Press ▲ or ▼ to the required message. Press OK to select.

The display shows a subject line if the message is from an e-mail application.

5 Press OK to access the sub-menu.

6 Do one of the following:

- Press ▲ or ▼ to `Reply`. Press OK to select.
- Press ▲ or ▼ to `Quick Reply`. Press OK to select.

A blinking cursor appears. You can write or edit your message, if required.

7 Press OK once message is composed.

The display shows a transitional mini notice, confirming the message is being sent.

8 Wait for acknowledgment.

If successful:

- A tone sounds.
- The display shows a positive mini notice.

If unsuccessful:

- A tone sounds.
- The display shows a negative mini notice.

- The radio returns to the Resend option screen.

Forwarding Text Messages

Follow the procedure to forward text messages on your radio.

When you are at the Resend option screen:

1. Press ▲ or ▼ to Forward, and press OK to send the same message to another subscriber or group alias or ID.
2. Press ▲ or ▼ to the required alias or ID. Press OK to select.

   The display shows a transitional mini notice, confirming your message is being sent.
3. Wait for acknowledgment.

   If successful:

   - A positive indicator tone sounds.
   - The display shows a positive mini notice.

   If unsuccessful:

   - A negative indicator tone sounds.
   - The display shows a negative mini notice.

Resending Text Messages

Follow the procedure to resend text messages on your radio.

When you are at the Resend option screen:

Press OK to resend the same message to the same subscriber or group alias or ID.

If successful:

- A positive indicator tone sounds.
- The display shows a positive mini notice.

If unsuccessful:

- A negative indicator tone sounds.
- The display shows a negative mini notice.
- The radio returns to the Resend option screen.

Deleting Text Messages from the Inbox

Follow the procedure to delete text messages from the Inbox on your radio.

1 Do one of the following:

- Press the programmed **Text Message** button. Proceed to step 3.
- Press OK to access the menu.

2 Press ▲ or ▼ to `Messages`. Press OK to select.

3 Press ▲ or ▼ to `Inbox`. Press OK to select.

If the Inbox is empty:

- The display shows `List Empty`.
- A tone sounds.

4 Press ▲ or ▼ to the required message. Press OK to select.

The display shows a subject line if the message is from an e-mail application.

5 Press OK to access the sub-menu.

6 Press ▲ or ▼ to `Delete`. Press OK to select.

7 Press ▲ or ▼ to `Yes`. Press OK to select.

The display shows a positive mini notice. The screen returns to the Inbox.

Deleting All Text Messages from the Inbox

Follow the procedure to delete all text messages from the Inbox on your radio.

1 Do one of the following:

- Press the programmed **Text Message** button. Proceed to step 3.

- Press OK to access the menu.

2 Press ▲ or ▼ to Messages. Press OK to select.

3 Press ▲ or ▼ to Inbox. Press OK to select.

If the Inbox is empty:

- The display shows List Empty.
- A tone sounds.

4 Press ▲ or ▼ to Delete All. Press OK to select.

5 Press ▲ or ▼ to Yes. Press OK to select.

The display shows a positive mini notice.

Deleting Saved Text Messages from the Drafts Folder

Follow the procedure to delete saved text message from drafts on your radio.

1 Do one of the following:

- Press the programmed **Text Message** button. Proceed to step 3.
- Press OK to access the menu.

2 Press ▲ or ▼ to Messages. Press OK to select.

3 Press ▲ or ▼ to Drafts. Press OK to select.

4 Press ▲ or ▼ to the required message. Press OK to select.

5 Press ▲ or ▼ to Delete. Press OK to delete the text message.

Sent Text Messages

Once a message is sent to another radio, it is saved in Sent Items folder. The most recent sent text message is always added to the top of the Sent Items folder. You can resend, forward or delete a Sent text message.

The Sent Items folder is capable of storing a maximum of 30 last sent messages. When the folder is full, the next sent text message automatically replaces the oldest text message in the folder.

If you exit the message sending screen while the message is being sent, the radio updates the status of the message in the Sent Items folder without providing any indication in the display or via sound.

If the radio changes mode or powers down before the status of the message in Sent Items folder is updated, the radio cannot complete any In-Progress messages and automatically marks it with a **Send Failed** icon.

The radio supports a maximum of five In-Progress messages at one time. During this period, the radio cannot send any new message and automatically marks it with a **Send Failed** icon.

If you long press ⮌ at any time, the radio returns to the Home screen.

NOTICE:
If the channel type, for example a conventional digital or Capacity Plus channel, is not a match, you can only edit, forward, or delete a Sent message.

Viewing Sent Text Messages

Follow the procedure to view sent text messages on your radio.

1. Do one of the following:
   - Press the programmed **Text Message** button. Proceed to step 3.
   - Press OK to access the menu.
2. Press ▲ or ▼ to `Messages`. Press OK to select.
3. Press ▲ or ▼ to `Sent Items`. Press OK to select.

   If the Sent Items folder is empty:
   - The display shows `List Empty`.

- A low tone sounds, if the Keypad Tone is turned on.

4 Press ▲ or ▼ to the required message. Press OK to select.

The display shows a subject line if the message is from an e-mail application.

Sending Sent Text Messages

Follow the procedure to send a sent text message on your radio.

When you are viewing a Sent message:

1 Press OK while viewing the message.

2 Press ▲ or ▼ to Resend. Press OK to select.

The display shows a transitional mini notice, confirming your message is being sent.

3 Wait for acknowledgment.

If successful:

- A positive indicator tone sounds.
- The display shows a positive mini notice.

If unsuccessful:

- A negative indicator tone sounds.
- The display shows a negative mini notice.
- The radio proceeds to the Resend option screen. See Resending Text Messages on page 136 for more information.

Deleting All Sent Text Messages from the Sent Items Folder

Follow the procedure to delete all sent text messages from the Sent Items folder on your radio.

1 Do one of the following:

- Press the programmed **Text Message** button. Proceed to step 3.

- Press OK to access the menu.

2 Press ▲ or ▼ to `Messages`. Press OK to select.

3 Press ▲ or ▼ to `Sent Items`. Press OK to select.

If the Sent Items folder is empty:

- The display shows `List Empty`.
- A tone sounds.

4 Press ▲ or ▼ to `Delete All`. Press OK to select.

5 Do one of the following:

- Press ▲ or ▼ to `Yes`. Press OK to select. The display shows a positive mini notice.
- Press ▲ or ▼ to `No`. Press OK to select. The radio returns to the previous screen.

Quick Text Messages

Sending Quick Text Messages

Follow the procedure to send predefined Quick Text messages on your radio to a predefined alias.

1 Press the programmed **One Touch Access** button.

The display shows a transitional mini notice, confirming the message is being sent.

2 Wait for acknowledgment.

If successful:

- A positive indicator tone sounds.
- The display shows a positive mini notice.

If unsuccessful:

- A negative indicator tone sounds.
- The display shows a negative mini notice.

- The radio proceeds to the `Resend` option screen. See Resending Text Messages on page 136 for more information.

Analog Message Encode

Your radio is able to send preprogrammed messages from the Message list to a radio alias or the dispatcher.

Sending MDC Encode Messages to Dispatchers

Follow the procedure to send MDC Encode messages to dispatchers on your radio.

1. Press OK to access the menu.
2. Press ▲ or ▼ to `Message`. Press OK to select.
3. Press ▲ or ▼ to `Quick Text`. Press OK to select.
4. Press ▲ or ▼ to the required message. Press OK to select.

   The display shows a transitional mini notice, confirming the message is being sent.
5. Wait for acknowledgment.

   If successful:

   - A positive indicator tone sounds.
   - The display shows a positive mini notice.

   If unsuccessful:

   - A negative indicator tone sounds.
   - The display shows a negative mini notice.

Sending 5-Tone Encode Messages to Contacts

Follow the procedure to send 5-Tone Encode messages to contacts on your radio.

1 Press OK to access the menu.

2 Press ▲ or ▼ to `Message`. Press OK to select.

3 Press ▲ or ▼ to `Quick Text`. Press OK to select.

4 Press ▲ or ▼ to the required message. Press OK to select.

5 Press ▲ or ▼ to the required contact. Press OK to select.

The display shows a transitional mini notice, confirming the message is being sent.

6 Wait for acknowledgment.

If successful:

- A positive indicator tone sounds.
- The display shows a positive mini notice.

If unsuccessful:

- A negative indicator tone sounds.
- The display shows a negative mini notice.

NOTICE:
Check with your dealer or system administrator for more information.

Analog Status Update

Your radio is able to send preprogrammed messages from the Status list indicating your current activity to a radio contact (for 5-Tone systems) or the dispatcher (for Motorola Data Communication systems).

The last acknowledged message is kept at the top of the Status list. The other messages are arranged in alphanumeric order.

Sending Status Updates to Predefined Contacts

Follow the procedure to send status updates to predefined contacts on your radio.

1 Press ▲ or ▼ to `Status`. Press OK to select.

2 Press ▲ or ▼ to the required status. Press OK to select.

When you press the **PTT** button while in the Status list for 5-Tone systems, the radio sends the selected status update, and returns to the Home screen to initiate a voice call.

3 Press ▲ or ▼ to `Set as Default`. Press OK to select.

The display shows a transitional mini notice, confirming the status update is being sent.

4 Wait for acknowledgment.

If successful:

- A positive indicator tone sounds.
- The display shows a positive mini notice.
- The display shows ✓ beside the acknowledged status.

If unsuccessful:

- A negative indicator tone sounds.
- The display shows a negative mini notice.
- The display shows ✓ beside the previous status.

See Setting Default Contact on page 347 for more information on setting the default contact for 5-Tone systems.

Viewing 5-Tone Status Details

Follow the procedure to view 5-tone status details on your radio.

It is assumed that you have purchased the Software License Key.

1 Press ▲ or ▼ to `Status`. Press OK to select.

2 Press ▲ or ▼ to the required status. Press OK to select.

3 Press ▲ or ▼ to `View Details`. Press OK to select.

The display shows details of the selected status.

Privacy

This feature helps to prevent eavesdropping by unauthorized users on a channel by the use of a software-based scrambling solution. The signaling and user identification portions of a transmission are not scrambled.

Your radio must have privacy enabled on the channel to send a privacy-enabled transmission, although this is not a necessary requirement for receiving a transmission. While on a privacy-enabled channel, the radio is still able to receive clear or unscrambled transmissions.

Some radio models may not offer Privacy feature, or may have a different configuration. Check with your dealer or system administrator for more information.

Your radio supports two types of privacy, but only one can be assigned to your radio. They are:

- Basic Privacy
- Enhanced Privacy

To unscramble a privacy-enabled call or data transmission, your radio must be programmed to have the same Privacy Key for Basic Privacy, or the same Key Value and Key ID for Enhanced Privacy as the transmitting radio.

If your radio receives a scrambled call that is of a different Privacy Key, or different Key Value and Key ID, you either hear a garbled transmission for Basic Privacy or nothing at all for Enhanced Privacy.

On a privacy-enabled channel, your radio is able to receive clear or unscrambled calls, depending on how your radio is programmed. In addition, your radio may play a warning tone or not, depending on how it is programmed.

The green LED lights up when the radio is transmitting, and blinks rapidly when the radio is receiving an ongoing privacy-enabled transmission.

NOTICE:
This feature is not applicable in Citizens Band channels that are in the same frequency.

Turning Privacy On or Off

Follow the procedure to turn privacy on or off on your radio.

1 Do one of the following:

- Press the programmed **Privacy** button. Skip the steps below.
- Press OK to access the menu.

2 Press ▲ or ▼ to `Utilities`. Press OK to select.

3 Press ▲ or ▼ to `Radio Settings`. Press OK to select.

4 Press ▲ or ▼ to `Privacy`. Press OK to select.

5 Do one of the following:

- Press ▲ or ▼ to `On`. Press OK to select. The display shows ✓ beside `On`.
- Press ▲ or ▼ to `Off`. Press OK to select. The display shows ✓ beside `Off`.

Response Inhibit

This feature helps prevent your radio from responding to any incoming transmissions.

NOTICE:
This is a purchasable feature. Check with your dealer or system administrator to determine how your radio has been programmed.

If enabled, your radio does not generate any outgoing transmissions in respond to incoming transmissions, such as Radio Check, Call Alert, Radio Disable, Remote Monitor, Automatic Registration Service (ARS), Responding to Private Messages, and Sending GNSS location reports. Your radio cannot receive Confirmed Private Calls when this feature is enabled. However, your radio is able to manually send transmission.

Turning Response Inhibit On or Off

Follow the procedure to enable or disable Response Inhibit on your radio.

Press the programmed **Response Inhibit** button.

If successful:

- A positive indicator tone sounds.
- The display shows a momentary positive mini notice.

If unsuccessful:

- A negative indicator tone sounds.
- The display shows a momentary negative mini notice.

Security

This feature allows you to enable or disable any radio in the system.

For example, you may want to disable a stolen radio to prevent unauthorized users from using it, and enable the radio when it is recovered.

There are two ways to enable or disable a radio, with authentication and without authentication.

Authenticated Radio Disable is a purchasable feature. In Authenticated Radio Disable, verification is required when you enable or disable a radio. When your radio initiates this feature on a target radio with User Authentication, a passphrase is required. The passphrase is preprogrammed in the target radio through CPS.

You will not receive an acknowledgment if you press during Radio Enable or Radio Disable operation.

NOTICE:
Check with your dealer or system administrator for more information.

Disabling Radios

Follow the procedure to disable your radio.

1. Press the programmed **Radio Disable** button.
2. Press ▲ or ▼ to the required alias or ID.
3. Press OK to select. One of the following scenarios occurs:
   - The display shows `Radio Disable: <Subscriber Alias or ID>`. The green LED blinks.
   - A passphrase screen appears.

     Enter the passphrase. Press OK to proceed.

- If the passphrase is correct, the display shows a transitional mini notice, indicating the request is in progress. The green LED lights up.
- If the passphrase is incorrect, the display shows a negative mini notice, and returns to the previous screen.

4 Wait for acknowledgment.

If successful:

- A positive indicator tone sounds.
- The display shows a positive mini notice.

If unsuccessful:

- A negative indicator tone sounds.
- The display shows a negative mini notice.

Disabling Radios by Using the Contacts List

Follow the procedure to disable your radio by using the Contacts list.

1 Press OK to access the menu.

2 Press ▲ or ▼ to `Contacts`. Press OK to select.

3 Press ▲ or ▼ to the required alias or ID. Press OK to select.

4 Press ▲ or ▼ to `Radio Disable`.

5 Press OK to select. One of the following scenarios occurs:

- The display shows `Radio Disable: <Subscriber Alias or ID>`. The green LED blinks.
- A passphrase screen appears.

  Enter the passphrase. Press OK to proceed.

  - If the passphrase is correct, the display shows a transitional mini notice, indicating the

request is in progress. The green LED lights up.

- If the passphrase is incorrect, the display shows a negative mini notice, and returns to the previous screen.

6 Wait for acknowledgment.

If successful:

- A positive indicator tone sounds.
- The display shows a positive mini notice.

If unsuccessful:

- A negative indicator tone sounds.
- The display shows a negative mini notice.

Disabling Radios by Using the Manual Dial

Follow the procedure to disable your radio by using the manual dial.

1 Press OK to access the menu.

2 Press ▲ or ▼ to `Contacts`. Press OK to select.

3 Press ▲ or ▼ to `Manual Dial`. Press OK to select.

4 Enter the subscriber ID, and press OK to proceed.

5 Press ▲ or ▼ to `Radio Disable`.

6 Press OK to select. One of the following scenarios occurs:

- The display shows a transitional mini notice, indicating the request is in progress. The green LED blinks.
- A passphrase screen appears.

  Enter the passphrase. Press OK to proceed.

  - If the passphrase is correct, the display shows a transitional mini notice, indicating the

request is in progress. The green LED lights up.

- If the passphrase is incorrect, the display shows a negative mini notice, and returns to the previous screen.

7 Wait for acknowledgment.

If successful:

- A positive indicator tone sounds.
- The display shows a positive mini notice.

If unsuccessful:

- A negative indicator tone sounds.
- The display shows a negative mini notice.

Enabling Radios

Follow the procedure to enable your radio.

1 Press the programmed **Radio Enable** button.

2 Press ▲ or ▼ to the required alias or ID.

3 Press OK to select. One of the following scenarios occurs:

- The display shows `Radio Enable: <Subscriber Alias or ID>`. The green LED lights up.
- A passphrase screen appears.

  Enter the passphrase. Press OK to proceed.

  - If the passphrase is correct, the display shows a transitional mini notice, indicating the request is in progress. The green LED lights up.
  - If the passphrase is incorrect, the display shows a negative mini notice, and returns to the previous screen.

4 Wait for acknowledgment.

If successful:

- A positive indicator tone sounds.
- The display shows a positive mini notice.

If unsuccessful:

- A negative indicator tone sounds.
- The display shows a negative mini notice.

Enabling Radios by Using the Contacts List

Follow the procedure to enable your radio by using the Contacts list.

1 Press OK to access the menu.

2 Press ▲ or ▼ to `Contacts`. Press OK to select.

3 Press ▲ or ▼ to the required alias or ID. Press OK to select.

4 Press ▲ or ▼ to `Radio Enable`.

5 Press OK to select. One of the following scenarios occurs:

- The display shows `Radio Enable: <Subscriber Alias or ID>`. The green LED lights up.
- A passphrase screen appears.

  Enter the passphrase. Press OK to proceed.

  - If the passphrase is correct, the display shows a transitional mini notice, indicating the request is in progress. The green LED lights up.
  - If the passphrase is incorrect, the display shows a negative mini notice, and returns to the previous screen.

6 Wait for acknowledgment.

If successful:

- A positive indicator tone sounds.
- The display shows a positive mini notice.

If unsuccessful:

- A negative indicator tone sounds.
- The display shows a negative mini notice.

Enabling Radios by Using the Manual Dial

Follow the procedure to enable your radio by using the manual dial.

1. Press OK to access the menu.
2. Press ▲ or ▼ to `Contacts`. Press OK to select.
3. Press ▲ or ▼ to `Manual Dial`. Press OK to select.
4. Press ▲ or ▼ to `Private Call`. Press OK to select.

   The first text line shows `Radio Number:`.
5. Enter the subscriber ID, and press OK to proceed.
6. Press ▲ or ▼ to `Radio Enable`.
7. Press OK to select. One of the following scenarios occurs:
   - The green LED lights up.
   - A passphrase screen appears.

     Enter the passphrase. Press OK to proceed.
     - If the passphrase is correct, the display shows a transitional mini notice, indicating the request is in progress. The green LED lights up.
     - If the passphrase is incorrect, the display shows a negative mini notice, and returns to the previous screen.
8. Wait for acknowledgment.

   If successful:
   - A positive indicator tone sounds.
   - The display shows a positive mini notice.

   If unsuccessful:
   - A negative indicator tone sounds.

- The display shows a negative mini notice.

Lone Worker

This feature prompts an emergency to be raised if there is no user activity, such as any radio button press or channel selection, for a predefined time.

Following no user activity for a programmed duration, the radio pre-warns you using an audio indicator once the inactivity timer expires.

If there is still no acknowledgment by you before the predefined reminder timer expires, the radio initiates an Emergency Alarm.

Only one of the following Emergency Alarms is assigned to this feature:

- Emergency Alarm
- Emergency Alarm with Call
- Emergency Alarm with Voice to Follow

The radio remains in the emergency state, allowing voice messages to proceed until action is taken. See Emergency Operation on page 363 for more information on ways to exit Emergency.

NOTICE:
Check with your dealer or system administrator for more information.

Password Lock Features

This feature allows you to restrict access to the radio by asking for a password when the device is turned on.

Accessing Radios by Using Passwords

Follow the procedure to access your radio by using a password.

1. Enter the current four-digit password.
   - Press ▲ or ▼ to edit the numeric value of each digit, and press OK to enter and move to the next digit.
2. Press OK to enter the password.

   If successful, the radio powers up.
   If unsuccessful:

- After the first and second attempt, the display shows `Wrong Password`. Repeat step 1.
- After the third attempt, the display shows `Wrong Password` and then, `Radio Locked`. A tone sounds. The yellow LED double blinks. Your radio enters into locked state for 15 minutes.

NOTICE:
In locked state, your radio responds to inputs from the **On/Off/Volume Control Knob** and programmed **Backlight** button only.

Turning Password Lock On or Off

Follow the procedure to turn password lock on or off on your radio.

1. Press OK to access the menu.
2. Press ▲ or ▼ to `Utilities`. Press OK to select.
3. Press ▲ or ▼ to `Radio Settings`. Press OK to select.
4. Press ▲ or ▼ to `Passwd Lock`. Press OK to select.
5. Enter the current four-digit password.
   - Use a keypad microphone.
   - Press ▲ or ▼ to edit the numeric value of each digit, and press OK to enter and move to the next digit.
     A positive indicator tone sounds for every digit pressed.
6. Press OK to enter the password.

   If the password is incorrect, the display shows `Wrong Password` and automatically returns to the previous menu.
7. Do one of the following:

- Press ▲ or ▼ to `Turn On`. Press OK to select.
  The display shows ✓ beside `Turn On`.
- Press ▲ or ▼ to `Turn Off`. Press OK to select.
  The display shows ✓ beside `Turn Off`.

Unlocking Radios in Locked State

Your radio is unable to receive calls in locked state. Follow the procedure to unlock your radio in locked state.

Do one of the following:

- If the radio is powered on, wait for 15 minutes and then repeat the steps in Accessing Radios by Using Passwords on page 147 to access the radio.
- If the radio is powered off, power up the radio. Your radio restarts the 15-minute timer for locked state. A tone sounds. The yellow LED double blinks. The display shows `Radio Locked`.

Wait for 15 minutes and then repeat the steps in Accessing Radios by Using Passwords on page 147 to access the radio.

Changing Passwords

Follow the procedure to change passwords on your radio.

1. Press OK to access the menu.
2. Press ▲ or ▼ to `Utilities`. Press OK to select.
3. Press ▲ or ▼ to `Radio Settings`. Press OK to select.
4. Press ▲ or ▼ to `Passwd Lock`. Press OK to select.
5. Enter the current four-digit password, and press OK to proceed.

If the password is incorrect, the display shows `Wrong Password` and automatically returns to the previous menu.

6 Press ▲ or ▼ to `Change PWD`. Press OK to select.

7 Enter a new four-digit password, and press OK to proceed.

8 Re-enter the new four-digit password, and press OK to proceed.

If successful, the display shows `Password Changed`. If unsuccessful, the display shows `Passwords Do Not Match`.

The screen automatically returns to the previous menu.

Notification List

Your radio has a Notification list that collects all your unread events on the channel, such as unread text messages, telemetry messages, missed calls, and call alerts.

The display shows the **Notification** icon when the Notification list has one or more events.

The list supports a maximum of 40 unread events. When the list is full, the next event automatically replaces the oldest event. After the events are read, they are removed from the Notification list.

For text messages, missed calls, and call alert events, the maximum number of notifications are 30 text messages and 10 missed calls or call alerts. This maximum number depends on individual feature (job tickets or text messages or missed calls or call alerts) list capability.

Accessing Notification List

Follow the procedure to access the Notification list on your radio.

1 Do one of the following:

- Press the programmed **Notification** button. Skip the steps below.
- Press OK to access the menu.

2 Press OK to access the menu.

3 Press ▲ or ▼ to `Notification`. Press OK to select.

4 Press ▲ or ▼ to the required event. Press OK to select.

Long press ↩ to return to the Home screen.

Auto-Range Transponder System

The Auto-Range Transponder System (ARTS) is an analog-only feature designed to inform you when your radio is out-of-range of other ARTS-equipped radios.

ARTS-equipped radios transmit or receive signals periodically to confirm that they are within range of each other.

Your radio provides indications of states as follows:

First-Time Alert

A tone sounds.

The display shows `In Range` after the channel alias.

ARTS-in-Range Alert

A tone sounds, if programmed.

The display shows `In Range` after the channel alias.

ARTS-Out-of-Range Alert

A tone sounds. The red LED rapidly blinks.

The display shows `Out of Range` alternating with the Home screen.

NOTICE:
Check with your dealer or system administrator for more information.

Over-the-Air Programming

Your dealer can remotely update your radio through Over-the-Air Programming (OTAP) without any physical

connection. Additionally, some settings can also be configured by using OTAP.

When your radio undergoes OTAP, the green LED blinks.

When your radio receives high volume data:

- The display shows the **High Volume Data** icon.
- The channel becomes busy.
- A negative tone sounds if you press the **PTT** button.

When OTAP completes, depending on the configuration:

- A tone sounds. The display shows `Updating Restarting`. Your radio restarts by powering off and on again.
- You can select `Restart Now` or `Postpone`. When you select `Postpone`, your radio returns to the previous screen. The display shows the **OTAP Delay Timer** icon until the automatic restart occurs.

When your radio powers up after automatic restart:

- If successful, the display shows `Sw Update Completed`.
- If unsuccessful, the display shows `Sw Update Failed`.

See Checking Software Update Information on page 178 for the updated software version.

Transmit Inhibit

Transmit inhibit feature allow users to block all transmission from the radio.

NOTICE:
Bluetooth and Wi-Fi features are available in Transmit Inhibit mode.

Enabling Transmit Inhibit

Follow the procedure to enable Transmit Inhibit.

Perform one of the following actions:

- Press ▲ or ▼ to `Tx Inhibit` and press OK to select.
- Press the **Transmit Inhibit** programmable button.

- A positive indicator tone sounds.
- The display shows `Tx Inhibit On`.

NOTICE:
The status of the Transmit Inhibit does not change after the radio powers up.

Disabling Transmit Inhibit

Follow the procedure to disable Transmit Inhibit.

Perform one of the following actions:

- Press ▲ or ▼ to `Tx Inhibit` and press OK to select.
- Press the **Transmit Inhibit** programmable button.

- A negative indicator tone sounds. Transmission is back to normal operation.
- The display shows `Tx Inhibit Off`.

Wi-Fi Operation

Wi-Fi® is a registered trademark of Wi-Fi Alliance®.

NOTICE:
This feature is applicable to DP4601e only.

This feature allows you to setup and connect to a Wi-Fi network. Wi-Fi supports updates for radio firmware, codeplug, and resources such as language packs and voice announcement.

Turning Wi-Fi On or Off

The programmed **Wi-Fi On or Off** button is assigned by your dealer or system administrator. Check with your dealer or system administrator to determine how your radio has been programmed.

Voice Announcements for the programmed **Wi-Fi On or Off** button can be customized through CPS according to user requirements. Check with your dealer or system administrator for more information.

You can turn on or turn off Wi-Fi by performing one of the following actions.

- Press the programmed **Wi-Fi On or Off** button. Voice Announcement sounds Turning On Wi-Fi or Turning Off Wi-Fi.
- Access this feature using the menu.

  a. Press OK to access the menu.

  b. Press ▲ or ▼ to `WiFi` and press OK to select.

c. Press ▲ or ▼ to `WiFi On` and press OK to select.

Press OK to turn on Wi-Fi. The display shows ✓ beside `Enabled`.

Press OK to turn off Wi-Fi. The ✓ disappears from beside `Enabled`.

Connecting to a Network Access Point

When you turn on Wi-Fi, the radio scans and connects to a network access point.

You can also connect to a network access point using the menu.

1. Press OK to access the menu.
2. Press ▲ or ▼ to `WiFi` and press OK to select.
3. Press ▲ or ▼ to `Networks` and press OK to select.
4. Press ▲ or ▼ to a network access point and press OK to select.
5. Press ▲ or ▼ to `Connect` and press OK to select.

When the connection is successful, the radio displays a notice and the network access point is saved into the profile list.

Checking Wi-Fi Connection Status

Follow the procedure to check the Wi-Fi Connection status.

Press the programmed **Wi-Fi Status Query** button for the connection status by using Voice Announcement. Voice Announcement sounds Wi-Fi is Off, Wi-Fi is On but No Connection, or Wi-Fi is On with Connection.

- The display shows `WiFi Off` when the Wi-Fi is turned off.

- The display shows `WiFi On, Connected` when the radio is connected to a network.
- The display shows `WiFi On, Disconnected` when the Wi-Fi is turned on but the radio is not connected to any network.

  Voice Announcements for the Wi-Fi status query results can be customized through CPS according to user requirements. Check with your dealer or system administrator for more information.

  NOTICE:
  The programmed **Wi-Fi Status Query** button is assigned by your dealer or system administrator. Check with your dealer or system administrator to determine how your radio has been programmed.

Refreshing the Network List

Follow the procedure to refresh the network list.

- Perform the following actions to refresh the network list through the menu.

  a. Press OK to access the menu.

  b. Press ▲ or ▼ to `WiFi` and press OK to select.

  c. Press ▲ or ▼ to `Networks` and press OK to select.

  When you enter the Networks menu, the radio automatically refreshes the network list.

- If you are already in the Networks menu, perform the following action to refresh the network list.

  Press ▲ or ▼ to `Refresh` and press OK to select.

  The radio refreshes and displays the latest network list.

Adding a Network

If a preferred network is not in the available network list, perform the following actions to add a network.

1. Press OK to access the menu.

2 Press ▲ or ▼ to WiFi and press OK to select.

3 Press ▲ or ▼ to Networks and press OK to select.

4 Press ▲ or ▼ to Add Network and press OK to select.

5 Enter the Service Set Identifier (SSID) and press OK .

6 Press ▲ or ▼ to Open and press OK to select.

7 Enter the password and press OK .

The radio displays a positive mini notice to indicate that the network is successfully saved.

Viewing Details of Network Access Points

Follow the procedure to view details of network access points.

1 Press OK to access the menu.

2 Press ▲ or ▼ to WiFi and press OK to select.

3 Press ▲ or ▼ to Networks and press OK to select.

4 Press ▲ or ▼ to a network access point and press OK to select.

5 Press ▲ or ▼ to View Details and press OK to select.

For a connected network access point, the Service Set Identifier (SSID), Security Mode, Media Access

Control (MAC) address, and Internet Protocol (IP) address are displayed.

For a non-connected network access point, the Service Set Identifier (SSID) and Security Mode are displayed.

Removing Network Access Points

Perform the following actions to remove network access points from the profile list.

1. Press OK to access the menu.
2. Press ▲ or ▼ to WiFi and press OK to select.
3. Press ▲ or ▼ to Networks and press OK to select.
4. Press ▲ or ▼ to the selected network access point and press OK to select.
5. Press ▲ or ▼ to Remove and press OK to select.
6. Press ▲ or ▼ to Yes and press OK to select.

   The radio displays a positive mini notice to indicate that the selected network access point is successfully removed.

Front Panel Programming

You are able to customize certain feature parameters in Front Panel Programming (FPP) to enhance the use of your radio.

The following buttons are used as required while navigating through the feature parameters.

Up/Down Navigation Button

Press to navigate through options horizontally or vertically, or increase or decrease values.

Menu/OK Button

Press to select the option or enter a sub-menu.

Return/Home Button

Short press to return to the previous menu or exit the selection screen.

Long press at any time to return to the Home screen.

Entering Front Panel Programming Mode

Follow the procedure to enter front panel programming mode on your radio.

1. Press OK to access the menu.
2. Press ▲ or ▼ to `Utilities`. Press OK to select.
3. Press ▲ or ▼ to `Program Radio`. Press OK to select.

Editing FPP Mode Parameters

Use the following buttons as required while navigating through the feature parameters.

- ▲ , ▼ – Scroll through options, increase/decrease values, or navigate vertically.
- OK – Select the option or enter a sub-menu.
- ↩ – Short-press to return to previous menu or to exit the selection screen. Long-press to return to Home screen.

Utilities

This chapter explains the operations of the utility functions available in your radio.

Locking or Unlocking the Keypad

Follow the procedure to lock or unlock the keypad of your radio.

1. Press OK to access the menu.
2. Press ▲ or ▼ to `Utilities`. Press OK to select.
3. Press ▲ or ▼ to `Radio Settings`. Press OK to select.

4 Press ▲ or ▼ to `Keypad Lock`. Press OK to select.

- If the keypad is locked, the display shows `Keypad Locked`.
- If the keypad is unlocked, the display shows `Keypad Unlocked`.

The radio returns to the Home screen.

Turning Automatic Call Forwarding On or Off

You can enable your radio to automatically forward voice calls to another radio.

1 Press OK to access the menu.

2 Press ▲ or ▼ to `Utilities`. Press OK to select.

3 Press ▲ or ▼ to `Radio Settings`. Press OK to select.

4 Press ▲ or ▼ to `Call Forward`. Press OK to select.

5 Do one of the following:

- Press ▲ or ▼ to enable Call Forwarding. If enabled, ✓ appears beside `Enabled`.
- Press ▲ or ▼ to disable Call Forwarding. If disabled, ✓ disappears beside `Enabled`.

Identifying Cable Type

Do the following steps to select the type of cable your radio uses.

1 Press OK to access the menu.

2 Press ▲ or ▼ to `Utilities`. Press OK to select.

3 Press ▲ or ▼ to `Radio Settings`. Press OK to select.

4 Press ▲ or ▼ to `Cable Type`. Press OK to select.

5 Press ▲ or ▼ to change the selected option.

The current cable type is indicated by a ✓ .

Flexible Receive List

Flexible Receive List is a feature that allows you to create and assign members on the receive talkgroup list. Your radio can support a maximum of 16 members in the list. This feature is supported in Capacity Plus.

Turning Flexible Receive List On or Off

Follow the procedure to turn Flexible Receive List on or off.

1 Do one of the following:

- Press the programmed **Flexible Receive List** button. Skip the following steps.
- Press OK to access the menu.

2 Press ▲ or ▼ to `Flexible Rx List`. Press OK to select.

3 Do one of the following:

- Press ▲ or ▼ to `Turn On`. Press OK to select.
  A positive indicator tone sounds.

  The display shows a positive mini notice.
- Press ▲ or ▼ to `Turn Off`. Press OK to select.
  A negative indicator tone sounds.

  The display shows a negative mini notice.

Adding New Entries to the Flexible Receive List

Follow the procedure to add new members to the receive talkgroup list.

1 Press OK to access the menu.

2 Press ▲ or ▼ to Utilities. Press OK to select.

3 Press ▲ or ▼ to Radio Settings. Press OK to select.

4 Press ▲ or ▼ to Flexible Rx List. Press OK to select.

5 Press ▲ or ▼ to View/Edit List. Press OK to select.

6 Press ▲ or ▼ to Add Member. Press OK to select.

7 Press ▲ or ▼ to the required alias or ID. Press OK to select.

The display shows a positive mini notice and then, Add Another?.

8 Do one of the following:

- Press ▲ or ▼ to Yes to add another entry.

  Press OK to select. Repeat step 7.
- Press ▲ or ▼ to No to save the current list.

  Press OK to select.

Deleting Entries from the Flexible Receive List

Follow the procedure to delete members of the receive talkgroup list from your radio.

1 Press OK to access the menu.

2 Press ▲ or ▼ to `Utilities`. Press OK to select.

3 Press ▲ or ▼ to `Radio Settings`. Press OK to select.

4 Press ▲ or ▼ to `Flexible Rx List`. Press OK to select.

5 Press ▲ or ▼ to `View/Edit List`. Press OK to select.

6 Press ▲ or ▼ to the required alias or ID. Press OK to select.

7 Press ▲ or ▼ to `Delete`. Press OK to select.

8 Do one of the following:

- Press ▲ or ▼ to `Yes` to delete the entry. Press OK to select.

  The display shows a positive mini notice.

- Press ▲ or ▼ to `No`. Press OK to select.

  The radio returns to the previous screen.

9 Repeat step 6 to step 8 to delete other entries.

10 Long press ⮌ to return to the Home screen after deleting all required aliases or IDs.

Setting Menu Timer

You can set the time your radio stays in the menu before it automatically switches to the Home screen. Follow the procedure to set the menu timer.

1 Press OK to access the menu.

2 Press ▲ or ▼ to `Utilities`. Press OK to select.

3 Press ▲ or ▼ to `Radio Settings`. Press OK to select.

4 Press ▲ or ▼ to `Display`. Press OK to select.

5 Press ▲ or ▼ to `Menu Timer`. Press OK to select.

6 Press ▲ or ▼ to the required setting. Press OK to select.

Text-to-Speech

The Text-to-Speech feature can only be enabled by your dealer or system administrator. If Text-to-Speech is enabled, the Voice Announcement feature is automatically disabled. If Voice Announcement is enabled, then the Text-to-Speech feature is automatically disabled.

This feature enables the radio to audibly indicate the following features:

- Current Channel
- Current Zone
- Programmed button feature on or off
- Content of received text messages
- Content of received Job Tickets

This audio indicator can be customized per customer requirements. This feature is typically useful when the user is in a difficult condition to read the content shown on the display.

Setting Text-to-Speech

Follow the procedure to set the Text-to-Speech feature.

1 Press OK to access the menu.

2 Press ▲ or ▼ to `Utilities`. Press OK to select.

3 Press ▲ or ▼ to `Radio Settings`. Press OK to select.

4 Press ▲ or ▼ to `Voice Announcement`. Press OK to select.

5 Press ▲ or ▼ to any of the following features.

Press OK to select.

The available features are as follows:

- `All`
- `Messages`
- `Job Tickets`
- `Channel`
- `Zone`
- `Program Button`

✓ appears beside the selected setting.

Turning Acoustic Feedback Suppressor On or Off

The feature allows you to minimize acoustic feedback in received calls. Follow the procedure to turn Acoustic Feedback Suppressor on or off on your radio.

1 Do one of the following:

- Press the programmed **AF Suppressor** button. Skip the following steps.
- Press OK to access the menu.

2 Press ▲ or ▼ to `Utilities`. Press OK to select.

3 Press ▲ or ▼ to `Radio Settings`. Press OK to select.

4 Press ▲ or ▼ to `AF Suppressor`. Press OK to select.

5 Do one of the following:

- Press OK to enable Acoustic Feedback Suppressor.
- Press OK to disable Acoustic Feedback Suppressor.

If enabled, ✓ appears beside `Enabled`. If disabled, ✓ disappears beside `Enabled`.

Turning Global Navigation Satellite System On or Off

Global Navigation Satellite System (GNSS) is a satellite navigation system that determines the radio precise location. GNSS includes Global Positioning System (GPS) and Global Navigation Satellite System (GLONASS).

NOTICE:
Selected radio models may offer GPS and GLONASS. GNSS constellation is configured by using CPS. Check with your dealer or system administrator to determine how your radio has been programmed.

1. Do one of the following steps to toggle GNSS on or off on your radio.
   - Press the programmed **GNSS** button.
   - Press OK to access the menu. Proceed to the next step.
2. Press ▲ or ▼ to `Utilities`. Press OK to select.
3. Press ▲ or ▼ to `Radio Settings`. Press OK to select.
4. Press ▲ or ▼ to `GNSS`. Press OK to select.

5 Press OK to enable or disable GNSS.

If enabled, ✓ appears beside `Enabled`.
If disabled, ✓ disappears beside `Enabled`.

Turning Introduction Screen On or Off

You can enable and disable the Introduction Screen by following the procedure.

1 Press OK to access the menu.

2 Press ▲ or ▼ to `Utilities`. Press OK to select.

3 Press ▲ or ▼ to `Radio Settings`. Press OK to select.

4 Press ▲ or ▼ to `Display`. Press OK to select.

5 Press ▲ or ▼ to `Intro Screen`. Press OK to select.

6 Press OK to enable or disable the Introduction Screen.

The display shows one of the following results:

- If enabled, ✓ appears beside `Enabled`.
- If disabled, ✓ disappears beside `Enabled`.

Turning Radio Tones/Alerts On or Off

You can enable and disable all radio tones and alerts, if needed, except for incoming Emergency alert tone . Follow the procedure to turn tones and alerts on or off on your radio.

1 Do one of the following:

- Press the programmed **Tones/Alerts** button. Skip the following steps.

- Press OK to access the menu.

2 Press ▲ or ▼ to `Utilities`. Press OK to select.

3 Press ▲ or ▼ to `Radio Settings`. Press OK to select.

4 Press ▲ or ▼ to `Tones/Alerts`. Press OK to select.

5 Press ▲ or ▼ to `All Tones`. Press OK to select.

6 Press OK to enable or disable all tones and alerts. The display shows one of the following results:

- If enabled, ✓ appears beside `Enabled`.
- If disabled, ✓ disappears beside `Enabled`.

Setting Tones/Alerts Volume Offset Levels

This feature adjusts the volume of the tones or alerts, allowing it to be higher or lower than the voice volume. Follow the procedure to set the tones and alerts volume offset levels on your radio.

1 Press OK to access the menu.

2 Press ▲ or ▼ to `Utilities`. Press OK to select.

3 Press ▲ or ▼ to `Radio Settings`. Press OK to select.

4 Press ▲ or ▼ to `Tones/Alerts`. Press OK to select.

5 Press ▲ or ▼ to `Vol. Offset`. Press OK to select.

6 Press ▲ or ▼ to the required volume offset level.

A feedback tone sounds with each corresponding volume offset level.

7 Do one of the following:

- Press OK to select. The required volume offset level is saved.
- Press ⮌ to exit. The changes are discarded.

Turning Talk Permit Tone On or Off

Follow the procedure to turn Talk Permit Tone on or off on your radio.

1 Press OK to access the menu.

2 Press ▲ or ▼ to `Utilities`. Press OK to select.

3 Press ▲ or ▼ to `Radio Settings`. Press OK to select.

4 Press ▲ or ▼ to `Tones/Alerts`. Press OK to select.

5 Press ▲ or ▼ to `Talk Permit`. Press OK to select.

6 Press OK to enable or disable the Talk Permit Tone.

The display shows one of the following results:

- If enabled, ✓ appears beside `Enabled`.
- If disabled, ✓ disappears beside `Enabled`.

Turning Power Up Tone On or Off

Follow the procedure to turn Power Up Tone on or off on your radio.

1 Press OK to access the menu.

2 Press ▲ or ▼ to Utilities. Press OK to select.

3 Press ▲ or ▼ to Radio Settings. Press OK to select.

4 Press ▲ or ▼ to Tones/Alerts. Press OK to select.

5 Press ▲ or ▼ to Power Up. Press OK to select.

6 Press OK to enable or disable the Power Up Tone. The display shows one of the following results:

- If enabled, ✓ appears beside Enabled.
- If disabled, ✓ disappears beside Enabled.

Setting Text Message Alert Tones

You can customize the text message alert tone for each entry in the Contacts list. Follow the procedure to set the text message alert tones on your radio.

1 Press OK to access the menu.

2 Press ▲ or ▼ to Contacts. Press OK to select.

3 Press ▲ or ▼ to the required alias or ID. Press OK to select.

4 Press ▲ or ▼ to Message Alert. Press OK to select.

5 Do one of the following:

- Press ▲ or ▼ to Momentary. Press OK to select.
  The display shows ✓ beside Momentary.

- Press ▲ or ▼ to Repetitive. Press OK to select.
  The display shows ✓ beside Repetitive.

Power Levels

You can customize the power setting to high or low for each channel.

High
This enables communication with radios located at a considerable distance from you.

Low
This enables communication with radios in closer proximity.

NOTICE:
This feature is not applicable in Citizens Band channels that are in the same frequency.

Setting Power Levels

Follow the procedure to set the power levels on your radio.

1 Do one of the following:

- Press the programmed **Power Level** button. Skip the steps below.
- Press OK to access the menu.

2 Press ▲ or ▼ to Utilities. Press OK to select.

3 Press ▲ or ▼ to Radio Settings. Press OK to select.

4 Press ▲ or ▼ to Power. Press OK to select.

5 Do one of the following:

- Press ▲ or ▼ to High. Press OK to select.
  The display shows ✓ beside High.
- Press ▲ or ▼ to Low. Press OK to select.
  The display shows ✓ beside Low.

6 Long press ⮌ to return to the Home screen.

Adjusting Display Brightness

Follow the procedure to adjust the display brightness on your radio.

1 Do one of the following:
   - Press the programmed **Brightness** button. Skip the following steps.
   - Press OK to access the menu.

2 Press ▲ or ▼ to `Utilities`. Press OK to select.

3 Press ▲ or ▼ to `Radio Settings`. Press OK to select.

4 Press ▲ or ▼ to `Brightness`. Press OK to select.

   The display shows the progress bar.

5 Press ▲ or ▼ to decrease or increase the display brightness. Press OK to select.

Setting Display Backlight Timer

You can set the display backlight timer of the radio as needed. The setting also affects the Menu Navigation Buttons and keypad backlighting accordingly. Follow the procedure to set the backlight timer on your radio.

1 Do one of the following:
   - Press the programmed **Backlight** button. Skip the following steps.
   - Press OK to access the menu.

2 Press ▲ or ▼ to `Utilities`. Press OK to select.

3 Press ▲ or ▼ to `Radio Settings`. Press OK to select.

4 Press ▲ or ▼ to `Display`. Press OK to select.

5 Press ▲ or ▼ to `Backlight Timer`. Press OK to select.

The display backlight and keypad backlighting are automatically turned off as the LED indicator is disabled. See Turning LED Indicators On or Off on page 169 for more information.

Turning Backlight Auto On or Off

You can enable and disable the backlight of the radio to turn on automatically as needed. If enabled, the backlight is turned on when the radio receives a call, Notification List event, or Emergency Alarm.

1 Press OK to access the menu.

2 Press ▲ or ▼ to `Utilities`. Press OK to select.

3 Press ▲ or ▼ to `Radio Settings`. Press OK to select.

4 Press ▲ or ▼ to `Backlight Auto`.

5 Press OK to enable or disable Backlight Auto.

The display shows one of the following results:

- If enabled, ✓ appears beside `Enabled`.
- If disabled, ✓ disappears beside `Enabled`.

Squelch Levels

You can adjust the squelch level to filter out unwanted calls with low signal strength or channels with noise higher than normal background.

Normal

This is the default setting.

Tight

This setting filters out unwanted calls and/or background noise. Calls from remote locations may also be filtered out.

NOTICE:
This feature is not applicable in Citizens Band channels that are in the same frequency.

Setting Squelch Levels

Follow the procedure to set the squelch levels on your radio.

1 Do one of the following:

- Press the programmed **Squelch** button. Skip the following steps.
- Press OK to access the menu.

2 Press ▲ or ▼ to `Utilities`. Press OK to select.

3 Press ▲ or ▼ to `Radio Settings`. Press OK to select.

4 Press ▲ or ▼ to `Squelch`. Press OK to select.

5 Do one of the following:

- Press ▲ or ▼ to `Normal`. Press OK to select. The display shows ✓ beside `Normal`.
- Press ▲ or ▼ to `Tight`. Press OK to select. The display shows ✓ beside `Tight`.

The screen automatically returns to the previous menu.

Turning LED Indicators On or Off

Follow the procedure to turn the LED indicators on or off on your radio.

1 Press OK to access the menu.

2 Press ▲ or ▼ to `Utilities`. Press OK to select.

3 Press ▲ or ▼ to `Radio Settings`. Press OK to select.

4 Press ▲ or ▼ to `LED Indicator`. Press OK to select.

5 Press OK to enable or disable the LED indicator.

The display shows one of the following results:

- If enabled, ✓ appears beside `Enabled`.
- If disabled, ✓ disappears beside `Enabled`.

Setting Languages

Follow the procedure to set the languages on your radio.

1 Press OK to access the menu.

2 Press ▲ or ▼ to `Utilities`. Press OK to select.

3 Press ▲ or ▼ to `Radio Settings`. Press OK to select.

4 Press ▲ or ▼ to `Languages`. Press OK to select.

5 Press ▲ or ▼ to the required language. Press OK to select.

The display shows ✓ beside the selected language.

Voice Operating Transmission

The Voice Operating Transmission (VOX) allows you to initiate a hands-free voice-activated call on a programmed channel. The radio automatically transmits, for a programmed period, whenever the microphone on the VOX-capable accessory detects voice.

NOTICE:
This feature is not applicable in Citizens Band channels that are in the same frequency.

You can enable or disable VOX by doing one of the following:

- Turn the radio off and then power it on again to enable VOX.
- Change the channel by using the **Channel Selector** knob to enable VOX.
- Turn VOX on or off by using the programmed **VOX** button or menu to enable or disable VOX.
- Press the **PTT** button during radio operation to disable VOX.

NOTICE:
Turning this feature on or off is limited to radios with this function enabled. Check with your dealer or system administrator for more information.

Turning Voice Operating Transmission On or Off

Follow the procedure to turn VOX on or off on your radio.

1 Do one of the following:
   - Press the programmed **VOX** button. Skip the steps below.
   - Press OK to access the menu.

2 Press ▲ or ▼ to `Utilities`. Press OK to select.

3 Press ▲ or ▼ to `Radio Settings`. Press OK to select.

4 Press ▲ or ▼ to `VOX`. Press OK to select.

5 Do one of the following:
   - Press ▲ or ▼ to `On`. Press OK to select. The display shows ✓ beside `On`.
   - Press ▲ or ▼ to `Off`. Press OK to select. The display shows ✓ beside `Off`.

NOTICE:
If the Talk Permit Tone is enabled, use a trigger word to initiate the call. Wait for the Talk Permit Tone to finish before speaking clearly into the microphone. See Turning Talk Permit Tone On or Off on page 164 for more information.

Turning Option Board On or Off

Option board capabilities within each channel can be assigned to programmable buttons. Follow the procedure to turn option board on or off on your radio.

Press the programmed **Option Board** button.

Turning Voice Announcement On or Off

This feature enables the radio to audibly indicate the current zone or channel the user has just assigned, or the programmable button the user has just pressed.
This is typically useful when the user has difficulty reading the content shown on the display.

This audio indicator can be customized according to customer requirements. Follow the procedure to turn Voice Announcement on or off on your radio.

1 Do one of the following:

- Press the programmed **Voice Announcement** button. Skip the following steps.
- Press OK to access the menu.

2 Press ▲ or ▼ to `Utilities`. Press OK to select.

3 Press ▲ or ▼ to `Radio Settings`. Press OK to select.

4 Press ▲ or ▼ to `Voice Announcement`. Press OK to select.

5 Press OK to enable or disable Voice Announcement.

- If enabled, ✓ appears beside `Enabled`.
- If disabled, ✓ disappears beside `Enabled`.

Turning Digital Microphone AGC On or Off

The Digital Microphone Automatic Gain Control (AGC) controls the microphone gain of the radio automatically while transmitting on a digital system.
This feature suppresses loud audio or boosts soft audio to a preset value in order to provide a consistent level of audio. Follow the procedure to turn Digital Microphone AGC on or off on your radio.

1. Press OK to access the menu.
2. Press ▲ or ▼ to `Utilities`. Press OK to select.
3. Press ▲ or ▼ to `Radio Settings`. Press OK to select.
4. Press ▲ or ▼ to `Mic AGC-D`. Press OK to select.
5. Press OK to enable or disable Digital Microphone AGC.

   The display shows one of the following results:

   - If enabled, ✓ appears beside `Enabled`.
   - If disabled, ✓ disappears beside `Enabled`.

Turning Analog Microphone AGC On or Off

The Analog Microphone Automatic Gain Control (AGC) controls the microphone gain of the radio automatically while transmitting on an analog system.
This feature suppresses loud audio or boosts soft audio to a preset value in order to provide a consistent level of audio. Follow the procedure to turn Analog Microphone AGC on or off on your radio.

1. Press OK to access the menu.

2 Press ▲ or ▼ to `Utilities`. Press OK to select.

3 Press ▲ or ▼ to `Radio Settings`. Press OK to select.

4 Press ▲ or ▼ to `Mic AGC-A`. Press OK to select.

5 Press OK to enable or disable Analog Microphone AGC.

The display shows one of the following results:

- If enabled, ✓ appears beside `Enabled`.
- If disabled, ✓ disappears beside `Enabled`.

Switching Audio Route between Internal Radio Speaker and Wired Accessory

Follow the procedure to toggle audio routing between internal radio speaker and wired accessory.

You can toggle audio routing between the internal radio speaker and the speaker of a wired accessory with the condition that:

- The wired accessory with speaker is attached.
- The audio is not routed to an external Bluetooth accessory.

Press the programmed **Audio Toggle** button.

A tone sounds when the audio route has switched.

Powering down the radio or detaching the accessory resets the audio routing to the internal radio speaker.

Turning Intelligent Audio On or Off

Your radio automatically adjusts the audio volume to overcome current background noise in the environment, inclusive of both stationary and non-stationary noise

sources. This is a receive-only feature and does not affect transmission audio. Follow the procedure to turn Intelligent Audio on or off on your radio.

NOTICE:
This feature is not applicable during a Bluetooth session.

1 Do one of the following:

- Press the programmed **Intelligent Audio** button. Skip the steps below.
- Press OK to access the menu.

2 Press ▲ or ▼ to `Utilities`. Press OK to select.

3 Press ▲ or ▼ to `Radio Settings`. Press OK to select.

4 Press ▲ or ▼ to `Intelligent Audio`. Press OK to select.

5 Do one of the following:

- Press ▲ or ▼ to `On`. Press OK to select. The display shows ✓ beside `On`.
- Press ▲ or ▼ to `Off`. Press OK to select. The display shows ✓ beside `Off`.

Turning Trill Enhancement On or Off

You can enable this feature when you are speaking in a language that contains many words with alveolar trill (rolling "R") pronunciations. Follow the procedure to turn Trill Enhancement on or off on your radio.

1 Do one of the following:

- Press the programmed **Trill Enhancement** button. Skip the steps below.
- Press OK to access the menu.

2 Press ▲ or ▼ to `Utilities`. Press OK to select.

3 Press ▲ or ▼ to Radio Settings. Press OK to select.

4 Press ▲ or ▼ to Trill Enhance. Press OK to select.

5 Do one of the following:

- Press ▲ or ▼ to On. Press OK to select. The display shows ✓ beside On.
- Press ▲ or ▼ to Off. Press OK to select. The display shows ✓ beside Off.

Turning the Microphone Dynamic Distortion Control Feature On or Off

This feature allows you to enable the radio to automatically monitor the microphone input and adjust the microphone gain value to avoid audio clipping.

1 Press OK to access the menu.

2 Press ▲ or ▼ to Utilities. Press OK to select.

3 Press ▲ or ▼ to Radio Settings. Press OK to select.

4 Press ▲ or ▼ to Mic Distortion. Press OK to select.

5 Do one of the following:

- Press OK to enable Microphone Dynamic Distortion Control. If enabled, ✓ appears beside Enabled.
- Press OK to disable Microphone Dynamic Distortion Control. If disabled, ✓ disappears beside Enabled.

Setting Audio Ambience

Follow the procedure to set the audio ambience on your radio according to your environment.

1. Press OK to access the menu.
2. Press ▲ or ▼ to `Utilities`. Press OK to select.
3. Press ▲ or ▼ to `Radio Settings`. Press OK to select.
4. Press ▲ or ▼ to `Audio Ambience`. Press OK to select.
5. Press ▲ or ▼ to the required setting. Press OK to select.

   The settings are as follows.

   - Choose `Default` for the default factory settings.
   - Choose `Loud` to increase speaker loudness when using in noisy surroundings.
   - Choose `Work Group` to reduce acoustic feedback when using with a group of radios that are near to each other.

   The display shows ✓ beside the selected setting.

Setting Audio Profiles

Follow the procedure to set audio profiles on your radio.

1. Press OK to access the menu.
2. Press ▲ or ▼ to `Utilities`. Press OK to select.
3. Press ▲ or ▼ to `Radio Settings`. Press OK to select.
4. Press ▲ or ▼ to `Audio Profiles`. Press OK to select.

5 Press ▲ or ▼ to the required setting. Press OK to select.

The settings are as follows.

- Choose `Default` to disable the previously selected audio profile and return to the default factory settings.
- Choose `Level 1`, `Level 2`, or `Level 3` for audio profiles intended to compensate for noise-induced hearing loss that is typical for adults over 40 years of age.
- Choose `Treble Boost`, `Mid Boost`, or `Bass Boost` for audio profiles that align with your preference for tinnier, more nasal, or deeper sounds.

The display shows ✓ beside the selected setting.

General Radio Information

Your radio contains information on various general parameters.

The general information of your radio is as follows:

- Battery information.
- Radio alias and ID.
- Firmware and Codeplug versions.
- Software update.
- GNSS information.
- Site information.
- Received Signal Strength Indicator.

NOTICE:

Press ⮌ to return to the previous screen. Long press ⮌ to return to the Home screen. The radio exits the current screen once the inactivity timer expires.

Accessing Battery Information

Displays information of your radio battery.

1 Press OK to access the menu.

2 Press ▲ or ▼ to Utilities. Press OK to select.

3 Press ▲ or ▼ to Radio Info. Press OK to select.

4 Press ▲ or ▼ to Battery Info. Press OK to select. The display shows the battery information.

NOTICE:
For **IMPRES** batteries only: The display reads Recondition Battery when the battery requires reconditioning in an IMPRES charger. After the reconditioning process, the display then shows the battery information.

Checking Radio Alias and ID

Follow the procedure to check the radio alias and ID on your radio.

1 Do one of the following:

- Press the programmed **Radio Alias and ID** button. Skip the following steps.

  A positive indicator tone sounds.

  You can press the programmed **Radio Alias and ID** button to return to the previous screen.

- Press OK to access the menu.

2 Press ▲ or ▼ to Utilities. Press OK to select.

3 Press ▲ or ▼ to Radio Info. Press OK to select.

4 Press ▲ or ▼ to My ID. Press OK to select.

The first text line shows the radio alias. The second text line shows the radio ID.

Checking Firmware and Codeplug Versions

Follow the procedure to check the firmware and codeplug versions on your radio.

1 Press OK to access the menu.

2 Press ▲ or ▼ to `Utilities`. Press OK to select.

3 Press ▲ or ▼ to `Radio Info`. Press OK to select.

4 Press ▲ or ▼ to `Versions`. Press OK to select.

The display shows the current firmware and codeplug versions.

Checking GNSS Information

Displays the GNSS information on your radio, such as values of:

- Latitude
- Longitude
- Altitude
- Direction
- Velocity
- Horizontal Dilution of Precision (HDOP)
- Satellites
- Version

1 Press OK to access the menu.

2 Press ▲ or ▼ to `Utilities`. Press OK to select.

3 Press ▲ or ▼ to `Radio Info`. Press OK to select.

4 Press ▲ or ▼ to `GNSS Info`. Press OK to select.

5 Press ▲ or ▼ to the required item. Press OK to select. The display shows the requested GNSS information.

Checking Software Update Information

This feature shows the date and time of the latest software update carried out through OTAP or Wi-Fi. Follow the procedure to check the software update information on your radio.

1. Press OK to access the menu.
2. Press ▲ or ▼ to `Utilities`. Press OK to select.
3. Press ▲ or ▼ to `Radio Info`. Press OK to select.
4. Press ▲ or ▼ to `SW Update`. Press OK to select.

   The display shows the date and time of the latest software update.

Software Update menu is only available after at least one successful OTAP or Wi-Fi session. See Over-the-Air Programming on page 397 for more information.

Displaying Site Information

Follow the procedure to display the current site name your radio is on.

1. Press OK to access the menu.
2. Press ▲ or ▼ to `Utilities`. Press OK to select.
3. Press ▲ or ▼ to `Radio Info`. Press OK to select.
4. Press ▲ or ▼ to `Site Info`. Press OK to select.

The display shows the current site name.

Received Signal Strength Indicator

This feature allows you to view the Received Signal Strength Indicator (RSSI) values.

The display shows the **RSSI** icon at the top right corner. See Display Icons for more information on the **RSSI** icon.

Viewing RSSI Values

Follow the procedure to view RSSI values on your radio.

When you are at the Home screen:

1. Press ◀ three times and immediately press ▶, all in 5 seconds.

   The display shows the current RSSI values.

2. Long press ⮌ to return to the Home screen.

Batteries and Chargers Warranty

The Workmanship Warranty

The workmanship warranty guarantees against defects in workmanship under normal use and service.

All MOTOTRBO Batteries	24 Months
IMPRES Chargers (Single-Unit and Multi-Unit, Non-Display)	24 Months
IMPRES Chargers (Multi-Unit with Display)	12 Months
Nickel Metal-Hydride (NiMH) or Lithium-Ion (Li-Ion) Batteries	12 Months
IMPRES Batteries, When Used Exclusively with IMPRES Chargers	18 Months

The Capacity Warranty

The capacity warranty guarantees 80% of the rated capacity for the warranty duration.

Limited Warranty

MOTOROLA SOLUTIONS COMMUNICATION PRODUCTS

I. WHAT THIS WARRANTY COVERS AND FOR HOW LONG:

Motorola Solutions, Inc. ("Motorola Solutions") warrants the Motorola Solutions manufactured Communication Products listed below ("Product") against defects in material and workmanship under normal use and service for a period of time from the date of purchase as scheduled below:

DP Series Digital Portable Radios	24 Months
Product Accessories (Excluding Batteries and Chargers)	12 Months

Motorola Solutions, at its option, will at no charge either repair the Product (with new or reconditioned parts), replace it (with a new or reconditioned Product), or refund the purchase price of the Product during the warranty period provided it is returned in accordance with the terms of this warranty. Replaced parts or boards are warranted for the balance of the original applicable warranty period. All replaced parts of Product shall become the property of Motorola Solutions.

This express limited warranty is extended by Motorola Solutions to the original end user purchaser only and is not assignable or transferable to any other party. This is the complete warranty for the Product manufactured by Motorola Solutions. Motorola Solutions assumes no obligations or liability for additions or modifications to this warranty unless made in writing and signed by an officer of Motorola Solutions.

Unless made in a separate agreement between Motorola Solutions and the original end user purchaser, Motorola Solutions does not warrant the installation, maintenance or service of the Product.

Motorola Solutions cannot be responsible in any way for any ancillary equipment not furnished by Motorola Solutions which is attached to or used in connection with the Product, or for operation of the Product with any ancillary equipment, and all such equipment is expressly excluded from this warranty. Because each system which may use the Product is unique, Motorola Solutions

disclaims liability for range, coverage, or operation of the system as a whole under this warranty.

II. GENERAL PROVISIONS

This warranty sets forth the full extent of Motorola Solutions responsibilities regarding the Product. Repair, replacement or refund of the purchase price, at Motorola Solutions option, is the exclusive remedy. THIS WARRANTY IS GIVEN IN LIEU OF ALL OTHER EXPRESS WARRANTIES. IMPLIED WARRANTIES, INCLUDING WITHOUT LIMITATION, IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, ARE LIMITED TO THE DURATION OF THIS LIMITED WARRANTY. IN NO EVENT SHALL MOTOROLA SOLUTIONS BE LIABLE FOR DAMAGES IN EXCESS OF THE PURCHASE PRICE OF THE PRODUCT, FOR ANY LOSS OF USE, LOSS OF TIME, INCONVENIENCE, COMMERCIAL LOSS, LOST PROFITS OR SAVINGS OR OTHER INCIDENTAL, SPECIAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE SUCH PRODUCT, TO THE FULL EXTENT SUCH MAY BE DISCLAIMED BY LAW.

III. STATE LAW RIGHTS:

SOME STATES DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES OR LIMITATION ON HOW LONG AN IMPLIED WARRANTY LASTS, SO THE ABOVE LIMITATION OR EXCLUSIONS MAY NOT APPLY.

This warranty gives specific legal rights, and there may be other rights which may vary from state to state.

IV. HOW TO GET WARRANTY SERVICE

You must provide proof of purchase (bearing the date of purchase and Product item serial number) in order to receive warranty service and, also, deliver or send the Product item, transportation and insurance prepaid, to an authorized warranty service location. Warranty service will be provided by Motorola Solutions through one of its authorized warranty service locations. If you first contact the company which sold you the Product (for example, dealer or communication service provider), it can facilitate your obtaining warranty service. You can also call Motorola Solutions at 1-800-927-2744 US/Canada.

V. WHAT THIS WARRANTY DOES NOT COVER

1 Defects or damage resulting from use of the Product in other than its normal and customary manner.

2 Defects or damage from misuse, accident, water, or neglect.

3 Defects or damage from improper testing, operation, maintenance, installation, alteration, modification, or adjustment.

4 Breakage or damage to antennas unless caused directly by defects in material workmanship.

5 A Product subjected to unauthorized Product modifications, disassembles or repairs (including, without limitation, the addition to the Product of non-Motorola Solutions supplied equipment) which adversely affect performance of the Product or interfere with Motorola Solutions normal warranty inspection and testing of the Product to verify any warranty claim.

6 Product which has had the serial number removed or made illegible.

7 Rechargeable batteries if:

- any of the seals on the battery enclosure of cells are broken or show evidence of tampering.
- the damage or defect is caused by charging or using the battery in equipment or service other than the Product for which it is specified.

8 Freight costs to the repair depot.

9 A Product which, due to illegal or unauthorized alteration of the software/firmware in the Product, does not function in accordance with Motorola Solutions published specifications or the FCC certification labeling in effect for the Product at the time the Product was initially distributed from Motorola Solutions.

10 Scratches or other cosmetic damage to Product surfaces that does not affect the operation of the Product.

11 Normal and customary wear and tear.

VI. PATENT AND SOFTWARE PROVISIONS

Motorola Solutions will defend, at its own expense, any suit brought against the end user purchaser to the extent that it is based on a claim that the Product or parts infringe a United States patent, and Motorola Solutions will pay those

costs and damages finally awarded against the end user purchaser in any such suit which are attributable to any such claim, but such defense and payments are conditioned on the following:

1. Motorola Solutions will be notified promptly in writing by such purchaser of any notice of such claim,
2. Motorola Solutions will have sole control of the defense of such suit and all negotiations for its settlement or compromise, and
3. Should the Product or parts become, or in Motorola Solutions opinion be likely to become, the subject of a claim of infringement of a United States patent, that such purchaser will permit Motorola Solutions, at its option and expense, either to procure for such purchaser the right to continue using the Product or parts or to replace or modify the same so that it becomes non-infringing or to grant such purchaser a credit for the Product or parts as depreciated and accept its return. The depreciation will be an equal amount per year over the lifetime of the Product or parts as established by Motorola Solutions.

Motorola Solutions will have no liability with respect to any claim of patent infringement which is based upon the combination of the Product or parts furnished hereunder with software, apparatus or devices not furnished by Motorola Solutions, nor will Motorola Solutions have any liability for the use of ancillary equipment or software not furnished by Motorola Solutions which is attached to or used in connection with the Product. The foregoing states the entire liability of Motorola Solutions with respect to infringement of patents by the Product or any parts thereof.

Laws in the United States and other countries preserve for Motorola Solutions certain exclusive rights for copyrighted Motorola Solutions software such as the exclusive rights to reproduce in copies and distribute copies of such Motorola Solutions software. Motorola Solutions software may be used in only the Product in which the software was originally embodied and such software in such Product may not be replaced, copied, distributed, modified in any way, or used to produce any derivative thereof. No other use including, without limitation, alteration, modification, reproduction, distribution, or reverse engineering of such Motorola Solutions software or exercise of rights in such Motorola Solutions software is permitted. No license is granted by implication, estoppel or otherwise under Motorola Solutions patent rights or copyrights.

VII. GOVERNING LAW

This Warranty is governed by the laws of the State of Illinois, U.S.A.

Wichtige Sicherheitshinweise

Handbuch zur HF-Energiestrahlung und Produktsicherheit für Handsprechfunkgeräte

ATTENTION!

Dieses Funkgerät ist nur für eine berufliche Nutzung vorgesehen. Lesen Sie vor Verwendung des Funkgeräts das Handbuch zur HF-Energiestrahlung und Produktsicherheit für Handsprechfunkgeräte, das wichtige Bedienungsanweisungen für den sicheren Umgang und HF-Energiesicherheitsinformationen zur Einhaltung der geltenden Normen und Richtlinien enthält.

Eine Auflistung der von Motorola Solutions genehmigten Antennen, Akkus und anderen Zubehörteilen finden Sie auf folgender Website:

http://www.motorolasolutions.com

Diese Seite wurde absichtlich leer gelassen.

Softwareversion

Alle in den folgenden Abschnitten beschriebenen Funktionen werden von der Softwareversion **R02.08.05.0000** oder neueren Versionen unterstützt.

Unter Überprüfen der Firmware- und Codeplug-Versionen auf Seite 212 können Sie die Softwareversion Ihres Funkgeräts bestimmen.

Weitere Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator.

Diese Seite wurde absichtlich leer gelassen.

Copyright

Die in diesem Dokument beschriebenen Motorola Solutions-Produkte können durch Copyright geschützte Computerprogramme von Motorola Solutions enthalten. Nach den Gesetzen der USA und anderer Staaten sind bestimmte exklusive Rechte an der urheberrechtlich geschützten Software der Firma Motorola Solutions vorbehalten. Demzufolge dürfen urheberrechtlich geschützte Computerprogramme von Motorola Solutions, die zusammen mit den in diesem Dokument beschriebenen Motorola Solutions-Produkten ausgeliefert werden, ohne die vorherige schriftliche Genehmigung von Motorola Solutions weder kopiert noch in jeglicher Form reproduziert werden.

Die Vervielfältigung, Übertragung, Speicherung in einem Abrufsystem oder Übersetzung in eine Sprache oder Computersprache ist für keinen Teil dieses Dokuments in keinerlei Form und durch keinerlei Methode ohne vorherige schriftliche Genehmigung von Motorola Solutions Inc. gestattet.

Darüber hinaus werden mit dem Kauf von Produkten von Motorola Solutions weder ausdrücklich noch stillschweigend, durch Rechtsverwirkung oder auf andere Weise Lizenzen unter dem Copyright, dem Patent oder den Patentanwendungen von Software von Motorola Solutions ausgegeben, außer der Nutzung von normalen, nicht ausschließlich erteilten, gebührenfreien Lizenzen, die sich aus der Anwendung der Gesetze beim Verkauf eines Produkts ergeben.

Haftungsausschluss

Beachten Sie, dass bestimmte Funktionen, Fähigkeiten und Möglichkeiten, die in diesem Dokument beschrieben werden, für ein bestimmtes System möglicherweise nicht gelten oder nicht lizenziert sind, oder von den Eigenschaften bestimmter mobiler Endgeräte (Funkgeräte) oder von der Konfiguration bestimmter Parameter abhängen können. Wenden Sie sich für weitere Informationen an Ihren Motorola Solutions-Ansprechpartner.

Marken

MOTOROLA, MOTO, MOTOROLA SOLUTIONS und das stilisierte M-Logo sind Marken oder eingetragene Marken von Motorola Trademark Holdings, LLC und werden unter Lizenz verwendet. Alle anderen Marken sind Eigentum der jeweiligen Besitzer.

WEEE-Richtlinie der EU

Gemäß WEEE-Richtlinie (Waste of Electrical and Electronic Equipment, deutsch Elektro- und Elektronikaltgeräte) der EU besteht für Elektro- und Elektronikgeräte, die in den Mitgliedsländern der Europäischen Union in Verkehr gebracht werden, Kennzeichnungspflicht.

Die Kennzeichnung erfolgt durch ein Etikett mit einer durchgestrichenen Mülltonne, das am Produkt selbst oder an der Verpackung angebracht wird.

Endverbraucher in den Mitgliedsländern der Europäischen Union sind angehalten, bei ihrem lokalen Händler oder beim Kundendienst des Herstellers Informationen zum Rücknahmesystem ihres Landes einzuholen.

Copyright-Hinweis zur Computersoftware

Die in diesem Handbuch beschriebenen Motorola Solutions Produkte können durch Copyright geschützte Computerprogramme von Motorola Solutions enthalten, die in Halbleiterspeichern oder anderen Medien gespeichert sind. Nach den Gesetzen der USA und anderer Staaten sind bestimmte exklusive Rechte an der urheberrechtlich geschützten Software, insbesondere die Rechte der Vervielfältigung in jeglicher Form, der Firma Motorola Solutions vorbehalten. Entsprechend dürfen keine in den Produkten von Motorola Solutions enthaltenen, durch Copyright geschützten Computerprogramme, die in dieser Bedienungsanleitung beschrieben werden, in irgendeiner Form kopiert, reproduziert, geändert, zurückentwickelt oder verteilt werden, ohne dass hierfür eine ausdrückliche schriftliche Genehmigung von Motorola Solutions vorliegt. Darüber hinaus werden mit dem Kauf von Produkten von Motorola Solutions weder ausdrücklich noch stillschweigend, durch Rechtsverwirkung oder auf andere Weise Lizenzen unter dem Copyright, dem Patent oder den Patentanwendungen von Software von Motorola Solutions ausgegeben, abgesehen von der Nutzung von normalen, nicht ausschließlich erteilten Lizenzen, die sich aus der Anwendung der Gesetze beim Verkauf eines Produkts ergeben.

Die in diesem Produkt eingebettete AMBE+2™-Sprachcodierungstechnologie ist durch geistiges Eigentum und Urheberrechte einschließlich Patentansprüche, Copyrights und Industriegeheimnisvorgaben von Digital Voice Systems, Inc. geschützt.

Die Nutzung dieser Sprachcodierungstechnologie wird ausschließlich in Verbindung mit der Nutzung dieser Kommunikationsausrüstung genehmigt. Benutzern dieser Technologie ist jeder Versuch, die Zielsprache/den Objektcode zu dekompilieren, analysieren (Reverse Engineering) oder auf jegliche andere Art in eine lesbare Form zu übertragen, ausdrücklich untersagt.

U.S. Pat. Nr. 5,870,405, 5,826,222, 5,754,974, 5,701,390, 5,715,365, 5,649,050, 5,630,011, 5,581,656, 5,517,511, 5,491,772, 5,247,579, 5,226,084 und 5,195,166.

Sicherheitshinweise für die Handhabung

Das MOTOTRBO Digital-Handfunkgerät erfüllt die Bedingungen der Schutzart IP67, d. h. es ist widrigen Einsatzbedingungen wie z. B. Untertauchen in Wasser gewachsen. Dieser Abschnitt beschreibt einige grundlegende Vorsichtsmaßnahmen bei der Handhabung.

VORSICHT:
Nehmen Sie Ihr Gerät nicht auseinander. Dies kann zur Beschädigung der Dichtungen des Funkgeräts und zu Kriechwegen innerhalb des Funkgeräts führen. Die Wartung des Funkgeräts darf ausschließlich im Wartungszentrum durchgeführt werden, das zum Testen und Ersetzen der Dichtungen am Funkgerät eingerichtet ist.

- Wurde Ihr Funkgerät in Wasser getaucht, schütteln Sie es, um es von eventuell im Lautsprechergitter und im Mikrofonanschluss befindlichem Wasser zu befreien. Dort eingedrungenes Wasser könnte die Audioleistung verringern.
- Wenn der Akkukontaktbereich Ihres Funkgeräts mit Wasser in Kontakt gekommen ist, sind die Akkukontakte am Funkgerät und am Akku zu reinigen und zu trocknen, bevor der Akku am Funkgerät angebracht wird. Restfeuchtigkeit an den Kontakten könnte das Funkgerät kurzschließen.
- Wenn Ihr Funkgerät in eine korrodierende Flüssigkeit (z. B. Salzwasser) getaucht wurde, spülen Sie das Funkgerät und den Akku mit sauberem Süßwasser ab und trocknen Sie sie.
- Verwenden Sie zum Reinigen der Außenflächen des Funkgeräts eine verdünnte Lösung aus einem milden Spülmittel und frischem Wasser (d. h. ein Teelöffel Spülmittel auf 4 Liter Wasser).
- Stecken Sie niemals etwas in die Entlüftungsöffnung des Funkgerätegehäuses unterhalb des Akku-Kontakts. Diese Entlüftungsöffnung ermöglicht den Druckausgleich im Funkgerät. Andernfalls kann ein Kriechweg innerhalb des Funkgeräts entstehen und die Wasserdichtheit möglicherweise verloren gehen.
- Die Entlüftungsöffnung darf auf keinen Fall blockiert oder verdeckt werden, auch nicht mit einem Etikett.
- Stellen Sie sicher, dass die Entlüftungsöffnung nicht mit öligen Stoffen in Kontakt kommt.
- Das Funkgerät mit ordnungsgemäß angebrachter Antenne ist für eine Wasserdichtheit bis maximal einen (1) Meter und maximal 30 Minuten ausgelegt. Bei

Überschreiten der Maximalwerte oder Gebrauch des Funkgeräts ohne Antenne kann es beschädigt werden.

- Reinigen Sie Ihr Funkgerät nicht mit einem Hochdruckstrahl, da dieser Druck für die vorgesehene Wasserdichtheit (d. h. Druck in 1 m Tiefe) zu hoch ist und eventuell Wasser in das Funkgerät eindringen lässt.

Einleitung

In diesem Handbuch wird die Bedienung Ihres Funkgeräts beschrieben.

Ihr Händler oder Systemadministrator kann Ihr Funkgerät an Ihre speziellen Anforderungen und Bedürfnisse anpassen. Weitere Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator.

Für folgende Auskünfte setzen Sie sich bitte mit Ihrem Systemadministrator oder Händler in Verbindung:

- Wurden voreingestellte Betriebsfunkkanäle bereits in das Funkgerät einprogrammiert?
- Welche Tasten wurden bereits zum Aufrufen anderer Funktionen programmiert?
- Welche zusätzlichen Zubehörteile kommen Ihren Bedürfnissen entgegen?
- Wie sehen die besten Vorgehensweisen für die effektive Nutzung von Funkgeräten aus?
- Welche Wartungsmaßnahmen können zu einer längeren Lebensdauer von Funkgeräten beitragen?

1.1

Symbolinformationen

In dieser Veröffentlichung werden die beschriebenen Symbole verwendet, um zwischen Funktionsmerkmalen ausschließlich im analogen bzw. digitalen Betriebsfunk zu unterscheiden.

Bedeutet Funktionsmerkmal **ausschließlich für analogen Betriebsfunk**.

Bedeutet Funktionsmerkmal **ausschließlich für digitalen Betriebsfunk**.

Bei Funktionsmerkmalen, die im analogen **und** im digitalen Betriebsfunk verfügbar sind, werden **beide** Symbole nicht angezeigt.

1.2

Analoger und digitaler Betriebsfunk

Jeder Kanal Ihres Funkgeräts kann für den analogen oder digitalen Betriebsfunkmodus konfiguriert werden.

Bestimmte Funktionen stehen nicht zur Verfügung, wenn Sie vom digitalen in den analogen Modus wechseln. Die Symbole für nicht verfügbare digitale Funktionen sind „ausgegraut“. Die deaktivierten Funktionen sind im Menü ausgeblendet.

Ihr Funkgerät verfügt auch über Funktionen, die sowohl analog als auch digital verfügbar sind. Die kleineren Funktionsunterschiede der jeweiligen Merkmale haben **keinen** Einfluss auf die Leistung Ihres Funkgeräts.

HINWEIS:
Im Dual-Scan-Modus schaltet das Funkgerät ebenfalls zwischen Digital- und Analogmodus um. Weitere Informationen finden Sie unter Scan auf Seite 405.

1.3

IP Site Connect

Mithilfe dieser Funktion kann das Funkgerät über ein IP-Netz (Internetprotokoll) Verbindung mit verschiedenen verfügbaren Stationen aufnehmen und somit seinen Betriebsfunk-Kommunikationsbereich über die Reichweite einer einzelnen Station hinaus ausdehnen. Dies ist ein Multi-Site-Betriebsfunkmodus.

Verlässt das Funkgerät den Bereich einer Station und tritt in den Bereich einer anderen ein, nimmt es mit dem Repeater der neuen Station Verbindung auf, um Rufe oder Datenübertragungen zu senden bzw. zu empfangen. Dies erfolgt entweder automatisch oder manuell, je nach Ihren Einstellungen.

Bei der automatischen Stationssuche durchsucht das Funkgerät alle verfügbaren Stationen, wenn das Signal der aktuell verwendeten Station schwach ist oder das Funkgerät kein Signal der aktuellen Station ausfindig machen kann. Das Funkgerät wechselt dann zum Repeater mit dem höchsten RSSI-Wert (Anzeige der Empfangssignalstärke).

Bei einer manuellen Stationssuche sucht das Funkgerät nach der nächsten in Reichweite befindlichen Station der Roaming-Liste (die aber vielleicht nicht das stärkste Signal bietet) und wechselt auf den Repeater über.

HINWEIS:
Auf jedem Kanal kann Scan oder Roam aktiviert werden, nicht jedoch beide Funktionen gleichzeitig.

Kanäle, für die diese Funktion aktiviert ist, können einer bestimmten Roaming-Liste hinzugefügt werden. Während des automatischen Roaming-Suchlaufs durchsucht das Funkgerät die Kanäle der Roaming-Liste, um die beste

Station zu finden. Eine Roaming-Liste unterstützt bis zu 16 Kanäle, einschließlich des gewählten Kanals.

HINWEIS:
Manuelles Hinzufügen oder Löschen von Einträgen der Roaming-Liste ist nicht möglich. Weitere Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator.

1.4

Capacity Plus

Capacity Plus ist ein Einsteiger-Bündelfunk-System für Einzel- und Mehrfachstandorte. Der dynamische Bündelfunk an Einzel- und Mehrfachstandorten bietet eine bessere Kapazität und Abdeckung.

1.4.1

Capacity Plus-Single-Site

Capacity Plus-Single-Site ist eine Single-Site-Bündelfunkkonfiguration des MOTOTRBO Funksystems, die mithilfe mehrerer verfügbarer Kanäle hunderte von Benutzern und bis zu 254 Gruppen unterstützt. Dadurch kann Ihr Funkgerät im Repeater-Modus die verfügbare Zahl vorprogrammierter Kanäle effizient nutzen.

Wird durch Drücken einer programmierbaren Taste eine Funktion aufgerufen, die für Capacity Plus - Einzelstandort nicht verfügbar ist, ertönt ein negativer Hinweiston.

Ihr Funkgerät verfügt auch über die Funktionen, die im Digitalmodus, im IP Site Connect-Modus und in Capacity Plus verfügbar sind. Die kleineren Funktionsunterschiede der jeweiligen Merkmale haben keinen Einfluss auf die Leistung Ihres Funkgeräts.

Weitere Informationen zu dieser Konfiguration erhalten Sie von Ihrem Systemadministrator oder Händler.

1.4.2

Capacity Plus-Multi-Site

Capacity Plus-Multi-Site ist eine Mehrkanal-Bündelfunkkonfiguration des MOTOTRBO-Funksystems, die die besten Eigenschaften von Capacity Plus und IP Site Connect in sich vereint.

Mithilfe von Capacity Plus – Mehrfachstandort kann das Funkgerät über ein IP-Netz Verbindung mit verschiedenen verfügbaren Standorten aufnehmen und somit seinen Bündelfunk-Kommunikationsbereich über die Reichweite eines einzelnen Standorts hinaus ausdehnen. Indem es die insgesamt verfügbare Zahl programmierter Kanäle, die von jeder der verfügbaren Stationen unterstützt werden,

effizient nutzt, steigert Linked Capacity Plus auch die Kapazität.

Verlässt das Funkgerät den Bereich einer Station und tritt in den Bereich einer anderen ein, nimmt es mit dem Repeater der neuen Station Verbindung auf, um Rufe/ Datenübertragungen zu senden bzw. zu empfangen. Je nach Funkgeräteinstellungen erfolgt dies automatisch oder manuell.

Bei der automatischen Stationssuche durchsucht das Funkgerät alle verfügbaren Stationen, wenn das Signal der aktuell verwendeten Station schwach ist oder das Funkgerät kein Signal der aktuellen Station ausfindig machen kann. Das Funkgerät wechselt dann zum Repeater mit dem höchsten RSSI-Wert.

Bei einer manuellen Stationssuche sucht das Funkgerät nach der nächsten in Reichweite befindlichen Station der Roaming-Liste (die aber vielleicht nicht das stärkste Signal bietet) und wechselt auf diese über.

Jeder Kanal, auf dem Capacity Plus-Multi-Site aktiviert ist, kann in eine Roaming-Liste aufgenommen werden. Während des automatischen Roaming-Suchlaufs durchsucht das Funkgerät diese Kanäle, um die beste Station zu finden.

HINWEIS:
Manuelles Hinzufügen oder Löschen von Einträgen der Roaming-Liste ist nicht möglich. Weitere Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator.

Wie auch bei Capacity Plus-Single-Site stehen im Menü keine Symbole für die Funktionen zur Verfügung, die in Capacity Plus-Multi-Standort nicht anwendbar sind. Wird durch Drücken einer programmierbaren Taste eine Funktion aufgerufen, die für Capacity Plus – Mehrfachstandort nicht verfügbar ist, ertönt ein negativer Hinweiston.

Grundlegende Bedienung

In diesem Kapitel werden die ersten Schritte für die Benutzung des Funkgeräts beschrieben.

2.1

Aufladen des Akkus

Ihr Funkgerät wird mit einem Nickel-Metallhydrid- (NiMH) oder einem Lithium-Ionen-Akku betrieben.

- Laden Sie Akkus ausschließlich in einem Motorola Solutions-Ladegerät exakt laut den Anweisungen im Handbuch für das Ladegerät auf, um die Garantiebedingungen einzuhalten und eventuelle Schäden zu vermeiden.

  Alle Ladegeräte können nur zum Laden der von Motorola Solutions autorisierten Akkus verwendet werden. Andere Akkus werden eventuell nicht geladen. Motorola Solutions empfiehlt, das Funkgerät während des Ladevorgangs ausgeschaltet zu lassen.
- Für eine optimierte Akkulebensdauer und zum Erhalten wertvoller Akkudaten müssen IMPRES™-Akkus in einem IMPRES-Ladegerät geladen werden.

  Für IMPRES-Akkus, die ausschließlich mit IMPRES-Ladegeräten aufgeladen werden, wird die standardmäßige Motorola Solutions Premium-Akkugarantie um sechs Monate verlängert.
- Um die optimale Leistung des Funkgeräts sicherzustellen, ist ein neuer Akku vor dem Erstgebrauch 14 bis 16 Stunden aufzuladen.

2.2

Anbringen des Akkus

Führen Sie die Vorgehensweise zum Verbinden des Akkus mit Ihrem Funkgerät durch.

Diese Alarmfunktion für Akku-Fehlanpassungen ist nur bei IMPRES-Akkus und Nicht-IMPRES-Akkus anwendbar, deren Kit-Nummer im EEPROM (Electrically Erasable Programmable Read Only Memory) programmiert wurde.

Wenn das Funkgerät mit dem falschen Akku verwendet wird, ertönt ein tiefer Warnton, die LED blinkt rot, die Anzeige zeigt `Falscher Akku` an, und über die Sprachansage-/Text-zu-Sprache-Funktion wird „falscher Akku“ ausgegeben (sofern diese Funktion über CPS geladen wurde).

Die Zertifizierung des Funkgeräts wird ungültig, wenn Sie einen UL-Akku an ein UKW-zugelassenes Funkgerät

anschließen oder umgekehrt. Ihr Funkgerät kann über CPS so programmiert werden, dass es Sie benachrichtigt, wenn diese Akku-Fehlanpassung vorliegt. Klären Sie mit Ihrem Händler oder Systemadministrator, wie das Funkgerät konfiguriert wurde.

1 Richten Sie den Akku an der Führung an der Rückseite des Funkgeräts aus.

2 Setzen Sie den Akku fest auf, und schieben Sie ihn aufwärts, bis die Verriegelung einrastet.

3 Schieben Sie die Akkuverriegelung in die Sperrposition.

4 Zum Entfernen des Akkus schalten Sie das Funkgerät aus. Schieben Sie die mit **A** markierte Akkuverriegelung in die gelöste Position und schieben Sie den Akku abwärts aus der Führung heraus.

2.3

Anbringen der Antenne

Führen Sie die Vorgehensweise zum Anschließen der Antenne an Ihrem Funkgerät durch.

Stellen Sie sicher, dass das Funkgerät ausgeschaltet ist.

Setzen Sie die Antenne in die Fassung ein, und drehen Sie sie im Uhrzeigersinn.

HINWEIS:
Zum Entfernen der Antenne drehen Sie sie gegen den Uhrzeigersinn.

VORSICHT:
Muss eine Antenne ersetzt werden, ist sicherzustellen, dass ausschließlich MOTOTRBO-Antennen verwendet werden. Die Verwendung anderer Antennen verursacht Schäden am Funkgerät.

2.4

Anbringen des Trageholsters

Führen Sie die Vorgehensweise zum Befestigen des Trageholsters an Ihrem Funkgerät durch.

1 Richten Sie die Schienen am Trageholster an den Nuten am Akku aus.

2 Drücken Sie sie nach unten, bis sie hörbar einrasten.

2.5

Anbringen der Universalabdeckung (Staubkappe)

Die Universalbuchse befindet sich auf der Antennenseite des Funkgeräts. Sie wird zum Anschluss von MOTOTRBO-Zubehör an das Funkgerät verwendet. Führen Sie die Vorgehensweise zum Befestigen der Staubkappe an Ihrem Funkgerät durch.

Bringen Sie die Staubkappe wieder an, wenn der Universalanschluss nicht mehr benutzt wird.

1 Stecken Sie das mit Haken versehene Ende der Abdeckung in die Ritzen oberhalb des Universalanschlusses.

2 Drücken Sie die Abdeckung nach unten, bis die Staubabdeckung korrekt auf dem Universalanschluss sitzt.

3 Befestigen Sie die Abdeckung am Funkgerät, indem Sie die Rändelschraube im Uhrzeigersinn drehen.

2.6

Reinigen der Universalabdeckung (Staubkappe)

Wenn das Funkgerät mit Wasser in Berührung kommt, trocknen Sie den Universalanschluss, bevor Sie Zubehör anbringen oder die Schutzabdeckung wieder aufsetzen. Wenn das Funkgerät mit Salzwasser oder

Verunreinigungen in Berührung kommt, führen Sie die folgenden Reinigungsmaßnahmen aus.

1. Mischen Sie eine 0,5-prozentige Lösung aus einem milden Spülmittel und frischem Wasser (d. h. ein Teelöffel Spülmittel auf 4 Liter Wasser).
2. Reinigen Sie nur die externen Oberflächen des Funkgeräts mit der Lösung. Tragen Sie die milde Lösung mit einem harten, nicht metallischen Kurzhaarpinsel auf.
3. Trocknen Sie das Funkgerät mit einem weichen, fusselfreien Tuch. Stellen Sie sicher, dass die Kontaktfläche des Universalanschlusses sauber und trocken ist.
4. Wenden Sie DeoxIT GOLD-Reiniger/Stift (Hersteller CAIG Labors, Teilenummer G100P) auf die Kontaktfläche des Universalanschlusses an.
5. Bringen Sie zum Testen der Konnektivität ein Zubehörteil am Universalanschluss an.

HINWEIS:
Tauchen Sie das Funkgerät nicht in Wasser. Stellen Sie sicher, dass sich kein überschüssiges Reinigungsmittel zwischen dem Universalanschluss, den Steuerungen oder Ritzen ansammelt.

Reinigen Sie das Funkgerät ein Mal pro Monat für die Wartung. Bei härteren Umgebungsbedingungen, z. B. in petrochemischen Anlagen oder in Marineumgebungen mit hoher Salzkonzentration, sollten Sie das Funkgerät öfter reinigen.

2.7 Entfernen der Universalabdeckung (Staubkappe)

Führen Sie die Vorgehensweise zum Entfernen der Schutzabdeckung von Ihrem Funkgerät durch.

1. Drücken Sie die Verriegelung nach unten.
2. Heben Sie die Abdeckung nach oben, und schieben Sie die Staubabdeckung am Universalanschluss nach unten, um sie zu entfernen.

Bringen Sie die Staubkappe wieder an, wenn der Universalanschluss nicht mehr benutzt wird.

2.8

Einschalten des Funkgeräts

Führen Sie die Vorgehensweise zum Einschalten des Funkgeräts durch.

Drehen Sie den **An-/Aus-/Lautstärkeregler** im Uhrzeigersinn, bis Sie ein Klicken hören.

Bei erfolgreicher Durchführung:

- Ein Hinweiston ertönt.
- Die grüne LED leuchtet.
- Auf dem Display wird `MOTOTRBO (TM)` gefolgt von einer Begrüßungsnachricht oder einem Bild angezeigt.
- Der Startbildschirm wird eingeschaltet.

Wenn die Funktion „Töne/Hinweistöne“ deaktiviert ist, erklingt kein Ton beim Einschalten.

HINWEIS:
Während der Inbetriebnahme nach einer Aktualisierung der Softwareversion auf **R02.07.00.0000** oder höher, findet 20 Sekunden lang ein GNSS-Firmwareupgrade statt. Nach dem Upgrade wird das Funkgerät zurückgesetzt und schaltet sich ein. Das Firmwareupgrade ist nur für portable Modelle mit der neuesten Software und Hardware verfügbar.

Überprüfen Sie den Akku, wenn sich Ihr Funkgerät nicht einschalten lässt. Stellen Sie sicher, dass er aufgeladen und richtig eingelegt ist. Wenden Sie sich an Ihren Händler, wenn sich Ihr Funkgerät noch immer nicht einschalten lässt.

2.9

Ausschalten des Funkgeräts

Gehen Sie wie folgt vor, um das Funkgeräts auszuschalten.

Drehen Sie den **Ein-/Aus-/Lautstärkeregler** gegen den Uhrzeigersinn, bis Sie ein Klicken hören.

Auf dem Display wird `Gerät wird abgesch` angezeigt.

2.10

Anpassen der Lautstärke

Führen Sie die Vorgehensweise zum Ändern der Lautstärke auf Ihrem Funkgerät aus.

Führen Sie einen der folgenden Schritte aus:

- Drehen Sie den **Ein/Aus/Lautstärkeregler** im Uhrzeigersinn, um die Lautstärke zu erhöhen.
- Drehen Sie den **Ein/Aus/Lautstärkeregler** gegen den Uhrzeigersinn, um die Lautstärke zu verringern.

HINWEIS:
Ihr Funkgerät kann auf eine Mindestlautstärke programmiert werden. Die Lautstärke kann dann nicht niedriger als diese einprogrammierte Mindestlautstärke eingestellt werden. Weitere Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator.

Diese Seite wurde absichtlich leer gelassen.

Bedienelemente

In diesem Kapitel werden die Tasten und Funktionen zum Bedienen des Funkgeräts beschrieben.

1 Drehknopf für die Kanalwahl

2 Ein-/Aus-/Lautstärkeregler

3 LED-Anzeige

4 Seitentaste 1[1]

5 Sendetaste (PTT)

6 Seitentaste 2[1]

7 Seitentaste 3[1]

8 Vordere Taste P1[1]

9 Menü-/OK-Taste

10 4-Wege-Navigationstaste

11 Taste „Zurück/Startbildschirm“

12 Vordere Taste P2[1]

13 Anzeige

14 Mikrofon

15 Lautsprecher

16 Universalanschluss für Zubehör

17 Notruftaste[1]

18 Antenne

[1] Diese Tasten sind programmierbar.

3.1

Verwendung der Vier-Wege-Navigationstaste

Mit der Vier-Wege-Navigationstaste können Sie durch Menüs blättern, Werte erhöhen/verringern und senkrecht navigieren.

Kategorie	Richtung	
	▲ oder ▼	◀ oder ▶
Menu	Senkrechte Navigation	-
Listen	Senkrechte Navigation	-
Details	Senkrechte Navigation	Vorheriger/ Nächster Punkt

Sie können die Vier-Wege-Navigationstaste als einen Nummern-, Alias- oder Freitexteditor verwenden.

Editorkategorie	Richtung	
	▲ oder ▼	◀ oder ▶
Nummer	-	Links: Letzte Stelle wird gelöscht Rechts: -
Alias	-	-
Freitext	Cursor wird auf-/abwärts bewegt	Cursor wird um ein Zeichen nach links/ rechts bewegt
Zahlenwerte	Erhöhen/ Verringern	Cursor wird um ein Zeichen nach links/ rechts bewegt

WAVE

Wide Area Voice Environment (WAVE™) bietet eine neue Methode zum Tätigen von Rufen zwischen zwei Funkgeräten.

Diese Funktion unterstützt auch Rufe zwischen Funkgeräten und anderen WAVE-fähigen Geräten. Damit diese Funktion verwendet werden kann, muss jedoch ein WAVE-Kanal eingerichtet sein.

Wenn das Funkgerät sich in einem WAVE-Kanal befindet, kann es keine Rufe von anderen Systemen annehmen und empfängt nur WAVE-Rufe.

Wenn das Funkgerät sich in einem WAVE-Kanal befindet, aktiviert es automatisch die WLAN-Funktion und meldet sich beim WAVE-Server an. WAVE-Rufe werden getätigt, wenn das Funkgerät über WLAN mit einem IP-Netzwerk verbunden ist.

HINWEIS:
Diese Funktion gilt nur für DP4601e.

Tabelle 1: WAVE-Anzeigesymbole

Die folgenden Symbole werden jeweils kurz auf dem Display angezeigt, wenn WAVE aktiviert ist.

	WAVE verbunden WAVE ist verbunden
	WAVE getrennt WAVE ist getrennt.

4.1

Einrichten des aktiven WAVE-Kanals

WAVE-Kanäle werden über CPS konfiguriert. Gehen Sie wie folgt vor, um den gewünschten WAVE-Kanal auszuwählen.

1. Drücken Sie OK, um das Menü aufzurufen.
2. Drücken Sie ▲ oder ▼ bis `WAVE-Kanäle`.

   Drücken Sie OK, um die Option auszuwählen.
3. Drücken Sie ▲ oder ▼ bis zum gewünschten WAVE-Kanal. Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis `Als aktiv festl..`

Drücken Sie OK, um die Option auszuwählen.

Auf dem Display wird ✓ neben dem ausgewählten Kanal angezeigt.

4.2

Anzeigen von WAVE-Kanalinformationen

Gehen Sie wie folgt vor, um WAVE-Kanalinformationen anzuzeigen.

1 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie die vorprogrammierte Taste **WAVE-Kanalliste**. Überspringen Sie die folgenden Schritte.
- Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `WAVE-Kanäle`.

Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis zum gewünschten WAVE-Kanal. Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis `Details anzeigen`.

Drücken Sie OK, um die Option auszuwählen.

Das Display zeigt die Details zum WAVE-Kanal an.

4.3

Anzeigen von WAVE-Endpunktinformationen

Gehen Sie wie folgt vor, um WAVE-Endpunktinformationen anzuzeigen.

1 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie die vorprogrammierte **Kontakt**-Taste. Wechseln Sie zu Schritt 3.
- Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Endpunkte`. Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis zum gewünschten WAVE-Endpunkt. Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie OK, um `Details anzeigen` auszuwählen.

Das Display zeigt die Details zum WAVE-Endpunkt an.

4.4

Tätigen von Gruppenrufen

Gehen Sie wie folgt vor, um Gruppenrufe auf einem WAVE-Kanal zu tätigen.

1 Wählen Sie den WAVE-Kanal mithilfe des erforderlichen Gruppen-Aliasnamens oder der ID aus.

2 Drücken Sie zum Durchführen des Rufs die **Sendetaste (PTT)**.

Die grüne LED leuchtet. In der ersten Textzeile werden das **Gruppenruf**-Symbol und der Alias angezeigt. In der zweiten Textzeile wird der WAVE-Gruppen-Alias angezeigt.

3 Führen Sie einen der folgenden Schritte aus:

- Warten Sie, bis der Freiton verklungen ist, und sprechen Sie deutlich in das Mikrofon.
- Warten Sie, bis der **PTT**-Mithörton verstummt, und sprechen Sie dann deutlich in das Mikrofon.

4 Lassen Sie die **PTT**-Taste los, um den Gesprächspartner zu hören.

Die grüne LED leuchtet, wenn das Zielfunkgerät antwortet.Im Display werden das **Gruppenruf**-Symbol und ein Aliasname oder eine ID und der Aliasname oder die ID des sendenden Funkgeräts angezeigt.

5 Ist die Funktion „Kanal frei-Anzeige“ aktiviert, hören Sie einen kurzen Hinweiston, sobald die **Sendetaste (PTT)** am sendenden Funkgerät freigegeben wird,

der Ihnen mitteilt, dass Sie nun auf diesem Kanal antworten können. Drücken Sie zum Beantworten des Anrufs die **Sendetaste** (PTT).

Der Anruf wird beendet, wenn es keine Sprachaktivität für einen festgelegten Zeitraum gibt. Das Funkgerät wechselt zu dem Bildschirm, auf dem Sie vor der Rufeinleitung waren.

Capacity Max-Betrieb

Capacity Max ist ein auf einem Steuerungskanal basierendes Bündelfunksystem. Die für Funkgerätebenutzer verfügbaren Funktionen in diesem System werden in diesem Kapitel beschrieben.

5.1

Sendetaste (PTT)

Die Sendetaste **(PTT)** dient zwei grundlegenden Zwecken:

- Während eines Anrufs wird durch Betätigung der **Sendetaste (PTT)** mit anderen am Anruf beteiligten Funkgeräten kommuniziert. Wenn die **Sendetaste (PTT)** gedrückt wird, wird das Mikrofon aktiviert.
- Wird gerade kein Ruf getätigt, wird die **Sendetaste (PTT)** zur Durchführung eines neuen Rufs verwendet .

Drücken Sie lange die **Sendetaste (PTT)**, um zu sprechen. Lassen Sie die **PTT**-Taste los, um den Gesprächspartner zu hören.

Wenn der Gesprächsgenehmigungston aktiviert ist, warten Sie, bis dieser kurze Signalton verstummt, bevor Sie mit dem Sprechen beginnen.

5.2

programmierbare Tasten

Abhängig von der Dauer eines Tastendrucks kann Ihr Händler die programmierbaren Tasten als Verknüpfungen mit Funkgerätfunktionen programmieren.

Kurz drücken
Drücken und schnell wieder loslassen.

Lang drücken
Für die programmierte Zeit gedrückt halten.

HINWEIS:
Unter Notruf auf Seite 429 finden Sie weitere Informationen über die vorprogrammierte Tastendruckdauer der **Notruf**-Taste.

5.2.1

Zuweisbare Funkgerätfunktionen

Den programmierbaren Tasten können von Ihrem Händler oder Systemadministrator folgende Funkgerätefunktionen zugewiesen werden.

Audioprofile
Ermöglicht dem Benutzer das Auswählen des gewünschten Audio-Profils.

Audio-Routing
Schaltet das Audio-Routing zwischen eingebautem und externem Lautsprecher um.

Audio umschalten
Schaltet die Audioweiterleitung zwischen dem eingebauten Lautsprecher des Funkgeräts und dem Lautsprecher des kabelgebundenen Zubehörs ein/aus.

Bluetooth® Audio-Schalter
Schaltet die Audioausgabe zwischen dem internen Funkgerätlautsprecher und einem externen Bluetooth-fähigen Zubehör um.

Bluetooth verbinden
Sucht nach Bluetooth-Geräten und stellt die Verbindung her.

Bluetooth trennen
Beendet alle vorhandenen Bluetooth-Verbindungen zwischen Funkgerät und Bluetooth-fähigen Geräten.

Bluetooth-Erkennung
Ermöglicht es Ihrem Funkgerät, in den erkennbaren Bluetooth-Modus versetzt werden zu können.

Kontakte
Bietet direkten Zugriff auf die Kontaktliste.

Rufhinweis
Bietet direkten Zugriff auf die Kontaktliste. Sie können dann einen Kontakt auswählen, an den ein Rufhinweis gesendet werden kann.

Anrufprotokoll
Wählt die Rufprotokollliste aus.

Emergency
Je nach Programmierung wird ein Notruf eingeleitet oder abgebrochen.

Innenbereich
Schaltet die Innenbereichs-Funktion ein oder aus.

Intelligentes Audio
Schaltet Intelligentes Audio ein-/aus.

Manuell wählen
Es wird durch Eingabe einer Funkgeräte-ID ein Einzelruf eingeleitet.

Manuelles Funkstation-Roaming
Startet die manuelle Standortsuche.

Mic AGC
Schaltet die automatische Verstärkungsregelung (AGC) des eingebauten Mikrofons ein bzw. aus.

Benachrichtigungen
Für direkten Zugriff auf die Benachrichtigungsliste.

Eintastenzugang
Leitet eine vordefinierte Durchsage, einen vordefinierten Einzel-, Telefon- oder Gruppenruf, einen Rufhinweis oder eine Quick Textnachricht direkt ein.

Optionskartenfunktion
Schaltet Optionskartenfunktion(en) für Kanäle mit aktivierter Optionskarte ein oder aus.

Telefon
Für den direkten Zugriff auf die Telefonkontaktliste.

Privacy
Schaltet die Verschlüsselung ein oder aus.

Aliasname und ID des Funkgeräts
Bietet den Aliasnamen und die ID des Funkgeräts

Fernüberwachung
Schaltet das Mikrofon eines Zielfunkgeräts ein, ohne dies anzuzeigen.

Home-Kanal zurücksetzen
Richtet einen neuen Home-Kanal ein.

Home-Kanalerinnerung stummschalten
Schaltet die Home-Kanalerinnerung stumm.

Standortinformationen
Zeigt den aktuellen Standortnamen und die ID für Capacity Max an.

Kanal-Ansage von Standort-Sprachnachrichten für den aktuellen Standort, wenn diese Funktion aktiviert ist.

Standortsperre
Wenn diese Option aktiviert ist, sucht das Funkgerät nur den aktuellen Standort. Ist diese Option deaktiviert, sucht das Funkgerät neben dem aktuellen Standort auch nach anderen Standorten.

Status
Wählt das Statuslistenmenü aus.

Telemetriesteuerung
Steuert den Ausgabe-Pin eines lokalen oder entfernten Funkgeräts.

Textnachricht
Wählt das Textnachrichtenmenü aus.

Vibrant-Verbesserung
Schaltet die Funktion „Vibrant-Verb.“ ein oder aus.

Sprachankündigung ein/aus
Schaltet die Sprachansage ein/aus.

WLAN
Schaltet WLAN ein oder aus.

Zonenauswahl
Ermöglicht das Auswählen einer Zone aus einer Zonenliste.

5.2.2

Zuweisbare Einstellungen oder Einstellungsfunktionen

Die folgenden Einstellungen des Funkgeräts oder Dienstprogrammfunktionen können den programmierbaren Tasten zugewiesen werden.

Tones/Alerts
Schaltet alle Töne und Warnungen ein und aus.

Hintergrundbeleuchtung
Schaltet die Hintergrundbeleuchtung des Displays ein bzw. aus.

Beleuchtungshelligkeit
Passt die Helligkeit an.

Leistung
Schaltet den Sendeleistungspegel zwischen hoch und niedrig um.

5.2.3

Aufrufen von programmierten Funktionen

Führen Sie die Vorgehensweise zum Aufrufen von programmierten Funktionen auf Ihrem Funkgerät durch.

1 Führen Sie einen der folgenden Schritte aus:
- Drücken Sie die vorprogrammierte Taste. Lesen Sie weiter unter Schritt 3.
- Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis zur Menüfunktion, und drücken Sie OK zur Auswahl einer Funktion oder zum Aufrufen eines Untermenüs.

3 Führen Sie einen der folgenden Schritte aus:
- Drücken Sie ⮌, um zum vorangehenden Bildschirm zurückzukehren.
- Drücken Sie ⮌ lang, um zum Startbildschirm zurückzukehren.

Das Funkgerät verlässt ein Menü nach einer bestimmten Zeit automatisch und kehrt zum Startbildschirm zurück.

5.3

Statusanzeigen

Dieses Kapitel erläutert die im Funkgerät verwendeten Statusanzeigen und Tonsignale.

5.3.1

Symbole

Im Display des Funkgeräts werden der Funkgerätestatus, Texteingaben und Menüeingaben angezeigt. Die folgenden Symbole werden auf dem Funkgerätdisplay angezeigt.

Tabelle 2: Anzeigesymbole

Die folgenden Symbole werden in der Statusleiste am oberen Rand des Displays angezeigt. Die Symbole sind von links ausgehend in der Reihenfolge ihres Erscheinens oder ihrer Nutzung angeordnet und sie sind kanalspezifisch.

	Akku Die Anzahl der Balken (0 bis 4) zeigt die verfügbare Ladekapazität an. Das Symbol blinkt, wenn der Akkustand niedrig ist.
	Bluetooth angeschlossen Die Bluetooth-Funktion ist aktiviert. Das Symbol leuchtet konstant, wenn ein abgesetztes Bluetooth-Gerät angeschlossen ist.
	Bluetooth nicht angeschlossen Die Bluetooth-Funktion ist aktiviert, es besteht aber keine Verbindung zu einem Remote-Bluetooth-Gerät.
	Emergency Das Funkgerät befindet sich im Notruf-Modus.
	GNSS verfügbar Die GNSS-Funktion ist aktiviert. Das Symbol leuchtet, wenn eine Positionsfestlegung verfügbar ist.

Tabelle wird fortgesetzt…

	GNSS nicht verfügbar Die GNSS-Funktion ist aktiviert, aber es werden keine Satellitendaten empfangen.
	Große Datenmengen Das Funkgerät empfängt große Datenmengen, und der Kanal ist belegt.
	Die Funktion „Innenbereich“ ist verfügbar[2] Der Status für die Funktion „Innenbereich“ ist eingeschaltet und verfügbar.
	Die Funktion „Innenbereich“ ist nicht verfügbar[2] Der Status für die Funktion „Innenbereich“ ist eingeschaltet aber aufgrund von ausgeschaltetem Bluetooth oder von einem Bakensignal-Scan, der durch Bluetooth ausgesetzt wurde, nicht verfügbar.
	Stummschaltmodus Stummschalt-Modus ist aktiviert und Lautsprecher ist stumm geschaltet.
	Benachrichtigungen Die Benachrichtigungsliste enthält ein oder mehrere verpasste Ereignisse.
	Optionskarte Die Zusatzkarte ist aktiviert. (Nur für Modelle, für die die Nutzung einer Zusatzkarte aktiviert ist)
	Zusatzkarte aus Die Zusatzkarte ist deaktiviert.
5	**Verzögerungs-Timer bei der Over-The-Air-Programmierung (OTAP)** Gibt die verbleibende Zeit bis zum automatischen Neustart des Funkgeräts an.

Tabelle wird fortgesetzt…

Tabelle wird fortgesetzt…

[2] Nur verfügbar für Modelle mit neuester Software und Hardware.

L oder H	**Leistung** Das Funkgerät ist auf niedrige oder auf hohe Leistung eingestellt.
1	**Priorität 1** Gibt Gesprächsgruppe mit Priorität 1 an.
2	**Priorität 2** Gibt Gesprächsgruppe mit Priorität 2 an.
	Anzeige der Empfangssignalstärke (RSSI) Die Anzahl der Balken zeigt die Signalstärke an. Vier Balken bedeuten, dass das Signal ausgezeichnet ist. Dieses Symbol wird nur während des Empfangs angezeigt.
	Antwortsperre Antwortsperre ist aktiviert.
	Nur Rufton Rufton-Modus ist aktiviert.

Tabelle wird fortgesetzt…

	Sicher Die Verschlüsselungsfunktion ist aktiviert.
	Stiller Klingelton Stiller Klingelton ist aktiviert.
	Standort-Roaming Die Roaming-Funktion ist aktiviert.
	Status Gibt eine neue Statusmeldung an.
	Ton-Deaktivierung Töne sind abgestellt.
	Ungesichert Die Verschlüsselungsfunktion ist deaktiviert.
	Vibrieren Vibrationsmodus ist aktiviert.
	Vibrieren und Klingelton Vibrations- und Klingelton-Modus ist aktiviert.

Tabelle wird fortgesetzt…

	WLAN ausgezeichnet[3] WLAN-Signal ist ausgezeichnet.
	WLAN gut[3] WLAN-Signal ist gut.
	WLAN durchschnittlich[3] WLAN-Signal ist durchschnittlich.
	WLAN schlecht[3] WLAN-Signal ist schlecht.
	WLAN nicht verfügbar[3] WLAN-Signal ist nicht verfügbar.

Tabelle 3: Erweiterte Menüsymbole

Die folgenden Symbole tauchen neben Menüpunkten mit zwei Optionen oder als Anzeige dafür auf, dass es ein Untermenü mit zwei Optionen gibt.

	Kontrollkästchen (markiert) Zeigt an, dass die Option ausgewählt wurde.
	Kontrollkästchen (leer) Zeigt an, dass die Option nicht ausgewählt wurde.
	Schwarzes Kästchen Zeigt die für den Menüpunkt mit einem Untermenü gewählte Option an.

Tabelle 4: Bluetooth-Symbole

Die folgenden Symbole werden neben den Einträgen in der Liste der verfügbaren Bluetooth-fähigen Geräte angezeigt und geben den Gerätetyp an.

	Bluetooth-Audiogerät Bluetooth-fähiges Audiogerät wie z. B. ein Kopfhörer.

Tabelle wird fortgesetzt…

[3] Gilt nur für DP4601e

	Bluetooth-Datengerät Bluetooth-fähiges Datengerät wie z. B. ein Scanner.
	Bluetooth-PTT-Gerät Bluetooth-fähiges PTT-Gerät wie z. B. ein POD-Gerät (nur PTT/ Sendetaste).

Tabelle 5: Rufsymbole

Die folgenden Symbole werden während eines Anrufs im Display angezeigt. Diese Symbole erscheinen auch in der Kontaktliste zur Anzeige des Alias- oder ID-Typs.

	Bluetooth-PC-Ruf Ein Bluetooth-PC-Ruf wird gerade getätigt. In der Kontaktliste weist das Symbol auf den Aliasnamen (Namen) bzw. die ID (Nummer) eines Bluetooth-PC-Rufs hin.

Tabelle wird fortgesetzt…

	Zentralruf Der Kontakttyp „Zentralruf“ dient zum Senden einer Textnachricht an einen Dispatcher-PC über den Textnachrichten-Server eines Drittanbieters.
	Gruppenruf/Sammelruf Ein Gruppenruf oder Sammelruf wird gerade getätigt. In der Kontaktliste weist das Symbol auf den Aliasnamen (Namen) bzw. die ID (Nummer) einer Gruppe hin.
	Einzelruf ohne IP eines Peripheriegeräts Zeigt an, dass ein Einzelruf ohne IP eines Peripheriegeräts ausgeführt wird. In der Kontaktliste weist das Symbol auf den Aliasnamen bzw. die ID (Nummer) eines Funkgeräts hin.

Tabelle wird fortgesetzt…

	Gruppenruf ohne IP eines Peripheriegeräts Zeigt an, dass ein Gruppenruf ohne IP eines Peripheriegeräts ausgeführt wird. In der Kontaktliste weist das Symbol auf den Aliasnamen (Namen) bzw. die ID (Nummer) einer Gruppe hin.
	Einzelruf mit Zusatzkarte Zeigt an, dass ein Einzelruf mit Zusatzkarte ausgeführt wird. In der Kontaktliste weist das Symbol auf den Aliasnamen bzw. die ID (Nummer) eines Funkgeräts hin.
	Gruppenruf mit Zusatzkarte Zeigt an, dass ein Gruppenruf mit Zusatzkarte ausgeführt wird. In der Kontaktliste weist das Symbol auf den Aliasnamen (Namen) bzw. die ID (Nummer) einer Gruppe hin.

Tabelle wird fortgesetzt…

	Telefonruf als Gruppen-/Sammelruf Ein Telefonanruf als Gruppenruf oder Sammelruf wird gerade getätigt. In der Kontaktliste weist das Symbol auf den Aliasnamen (Namen) bzw. die ID (Nummer) einer Gruppe hin.
	Telefonanruf als Einzelruf Ein Anruf wird gerade als Einzelruf getätigt. In der Kontaktliste weist das Symbol auf den Aliasnamen (Namen) bzw. die ID (Nummer) eines Telefons hin.
	Einzelruf Ein Einzelruf wird gerade getätigt. In der Kontaktliste weist das Symbol auf den Aliasnamen bzw. die ID (Nummer) eines Funkgeräts hin.

Tabelle 6: Kurzhinweissymbole

Die folgenden Symbole tauchen jeweils kurz im Display auf, nachdem eine Aktion zur Durchführung einer Aufgabe ausgeführt wurde.

!	**Übertragung erfolglos (negativ)** Gescheiterte Durchführung der Aktion.
✔	**Übertragung erfolgreich (positiv)** Erfolgreiche Durchführung der Aktion.
⌛	**Übertragung läuft (Zwischenstand)** Beim Senden. Dies wird vor der Anzeige der erfolgreichen bzw. gescheiterten Übertragung angezeigt.

Tabelle 7: Symbole für gesendete Objekte

Die folgenden Symbole werden in der oberen rechten Ecke des Displays im Ordner „Ausgang“ angezeigt:

oder	**Wird ausgeführt** Die Textnachricht an den Funkgeräte-Alias oder die ID eines Funkgeräts wurde noch nicht übertragen, da noch auf eine Quittierung gewartet wird. Die Textnachricht an einen Gruppen-Aliasname oder an eine Gruppen-ID wurde noch nicht übertragen.
oder	**Einzel- oder Gruppennachricht gelesen** Die Textnachricht wurde gelesen.
oder	**Einzel- oder Gruppennachricht ungelesen** Die Textnachricht wurde nicht gelesen.
oder	**Fehler beim Senden** Die Textnachricht kann nicht gesendet werden.
oder	**Erfolgreich gesendet** Die Nachricht wurde erfolgreich gesendet.

Tabelle wird fortgesetzt…

5.3.2

LED-Anzeige

Die LED-Anzeige zeigt den Betriebsstatus Ihres Funkgeräts an.

Blinkt rot

Selbsttest beim Einschalten des Funkgeräts ist fehlgeschlagen.

Das Funkgerät empfängt einen Notruf.

Das Funkgerät sendet bei niedrigem Akkustand.

Das Funkgerät befindet sich außerhalb der Reichweite, wenn das Auto-Range Transponder-System konfiguriert wurde.

Stummschalt-Modus ist aktiviert.

Grünes Dauerlicht

Das Funkgerät wird gerade eingeschaltet.

Funkgerät sendet Daten.

Das Funkgerät sendet einen Rufhinweis oder einen Notruf.

Blinkt grün

Das Funkgerät empfängt einen Ruf oder Daten.

Das Funkgerät erkennt Funkaktivität oder fragt Übertragungen mittels Over-The-Air Programmierung ab.

Das Funkgerät erkennt Funkaktivität.

HINWEIS:
Diese Aktivität kann sich je nach Art des digitalen Protokolls auf den programmierten Kanal des Funkgeräts auswirken.

Doppeltes grünes Blinken

Das Funkgerät empfängt einen Ruf oder Daten mit aktivierter Verschlüsselung.

Gelbes Dauerlicht

Das Funkgerät befindet sich im erkennbaren Bluetooth-Modus.

Blinkt gelb

Das Funkgerät muss noch auf einen Rufhinweis antworten.

Doppeltes gelbes Blinken

Auf dem Funkgerät ist automatisches Roaming aktiviert.

Das Funkgerät sucht aktiv nach einem neuen Standort.

Das Funkgerät muss noch auf einen Gruppenruf-Hinweis antworten.

Das Funkgerät ist gesperrt.

5.3.3

Tones

Die folgenden Symbole werden über den Lautsprecher des Funkgeräts ausgegeben.

Hoher Ton

Tiefer Ton

5.3.3.1

Töne

Hinweistöne sind hörbare Anzeigen zum Funkgerätestatus oder der Reaktion des Funkgeräts auf empfangene Daten.

Dauerton

Gleichmäßiger Ton. Wird ununterbrochen bis zum Beenden abgespielt.

Periodischer Ton

Wird periodisch je nach der über das Funkgerät konfigurierten Tonlänge abgespielt. Der Ton beginnt, stoppt und wiederholt sich.

Wiederholter Ton

Ein einzelner Ton, der sich wiederholt, bis der Benutzer ihn abschaltet.

Kurzton

Ertönt einmal für eine für das Funkgerät festgelegte Dauer.

5.3.3.2

Hinweistöne

Hinweistöne liefern einen akustischen Hinweis auf den Status, nachdem eine Aktion zum Durchführen einer Aufgabe ausgeführt wurde.

Positiver Hinweiston

Negativer Hinweiston

5.4

Registrierung

Es gibt eine Reihe von Nachrichten zur Registrierung, die Sie möglicherweise empfangen.

Registrierung

In der Regel wird die Registrierung beim Hochfahren, Wechseln der Gesprächsgruppe oder beim Standort-Roaming an das System gesendet. Wenn die Registrierung eines Funkgerätes an einem Standort fehlschlägt, versucht das Funkgerät automatisch, per Roaming an einen anderen Standort zu wechseln. Das Funkgerät entfernt vorübergehend den Standort, an der der Registrierungsversuch erfolgte, aus der Roaming-Liste.

Die Anzeige bedeutet, dass das Funkgerät damit beschäftigt ist, einen Standort für das Roaming zu suchen, oder das Funkgerät hat erfolgreich einen Standort gefunden, wartet jedoch noch auf eine Reaktion auf die Registrierungsnachrichten vom Funkgerät.

Wenn auf dem Funkgerät `Registrierung` angezeigt wird, erklingt ein Hinweiston und die gelbe LED-Anzeige leuchtet zweimal auf, um eine Standortsuche anzuzeigen.

Wenn sich die Anzeigen nicht ändern, muss der Benutzer den Standort wechseln oder per Roaming an einen anderen Standort wechseln.

Außer Reichweite

Bei einem Funkgerät wird von „Außer Reichweite“ gesprochen, wenn das Funkgerät nicht in der Lage ist, ein Signal von einem System oder einem aktuellen Standort zu erkennen. In der Regel bedeutet diese Anzeige, dass sich das Funkgerät außerhalb des geografischen Funkfrequenzbereichs befindet.

Wenn `Außer Reichweite` auf dem Funkgerät angezeigt wird, erklingt ein wiederholter Hinweiston und die rote LED-Anzeige leuchtet auf.

Wenden Sie sich an Ihren Händler oder Systemadministrator, wenn das Funkgerät weiterhin Meldungen empfängt, dass es sich außer Reichweite befindet, obwohl es sich in einem Gebiet mit guter Funkfrequenzabdeckung befindet.

Gesprächsgruppenzugehörigkeit fehlgeschlagen

Ein Funkgerät versucht, eine Zugehörigkeit zu einer Gesprächsgruppe aufzubauen, die in den Kanälen oder in

der UKP (Unified Knob Position) während der Registrierung festgelegt wurde.

Ein Funkgerät mit dem Status einer fehlgeschlagenen Zugehörigkeit ist nicht in der Lage, Rufe von der Gesprächsgruppe zu tätigen oder zu empfangen, mit der das Funkgerät versucht, eine Zugehörigkeit aufzubauen.

Wenn ein Funkgerät keine Zugehörigkeit zu einer Gesprächsgruppe aufbauen kann, wird `UKP Alias` auf dem Startbildschirm mit einem beleuchteten Hintergrund angezeigt.

Wenden Sie sich an Ihren Händler oder Systemadministrator, wenn auf dem Funkgerät Anzeigen zu fehlerhaften Zugehörigkeiten erfolgen.

Registrierung verweigert

Anzeigen zu einer verweigerten Registrierung werden empfangen, wenn die Registrierung mit dem System nicht akzeptiert wurde.

Das Funkgerät zeigt dem Funkgerätbenutzer den genauen Grund für die abgelehnte Registrierung nicht an. Normalerweise wird eine Registrierung verweigert, wenn der Systembetreiber den Zugriff des Funkgeräts auf das System deaktiviert hat.

Wenn die Registrierung eines Funkgeräts verweigert wird, wird `Registrierung verweigert` auf dem Funkgerät angezeigt, und die gelbe LED-Anzeige leuchtet doppelt auf, um eine Standortsuche anzuzeigen.

5.5

Zonen- und Kanalwahl

In diesem Kapitel wird die Vorgehensweise zum Auswählen einer Zone oder eines Kanals auf Ihrem Funkgerät beschrieben.

Das Funkgerät kann mit max. 250 Capacity Max-Zonen mit max. 160 Kanälen pro Zone programmiert werden. Jede Capacity Max-Zone besteht aus max. 16 zuweisbaren Positionen.

5.5.1

Auswählen von Zonen

Führen Sie die Vorgehensweise zum Auswählen der gewünschten Zone auf Ihrem Funkgerät durch.

1 Führen Sie einen der folgenden Schritte aus:
   - Drücken Sie die programmierte Taste **Zonenauswahl**. Lesen Sie weiter unter Schritt 3.

- Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Zone`. Drücken Sie OK, um die Option auszuwählen.

Auf dem Display werden ✓ und die aktuelle Zone angezeigt.

3 Drücken Sie ▲ oder ▼ bis zur gewünschten Zone. Drücken Sie OK, um die Option auszuwählen.

Das Display zeigt kurz `<Zone> gewählt` an und wechselt dann zum Bildschirm der gewählten Zone.

5.5.2

Auswählen eines Ruftyps

Verwenden Sie den Kanalwahlschalter, um einen Ruftyp auszuwählen. Hierbei kann es sich um einen Gruppenruf, Ansageanruf, Rundumruf oder Einzelruf handeln, je nachdem, wie Ihr Funkgerät konfiguriert wurde. Wenn Sie den Drehknopf für die Kanalwahl auf eine andere Position (mit einem zugewiesenen Ruftyp) stellen, wird das Funkgerät erneut beim Capacity Max-Standort registriert. Das Funkgerät wird mit der Gesprächsgruppen-ID registriert, die der neuen Position des Kanalwahlschalter-Ruftyps zugewiesen wurde.

Ihr Funkgerät funktioniert nicht, wenn ein nicht konfigurierter Kanal ausgewählt wurde. Verwenden Sie stattdessen den Kanalwahlschalter zur Auswahl eines konfigurierten Kanals.

Nachdem die gewünschte Zone angezeigt wird (bei mehreren Zonen in Ihrem Funkgerät), drehen Sie den programmierten Kanalwahlschalter, um den Ruftyp auszuwählen.

5.5.3

Auswahl eines Standorts

Ein Standort bietet Abdeckung für einen bestimmten Bereich. In einem Mehrfachstandort-Netzwerk sucht das Capacity Plus-Funkgerät automatisch nach einem neuen Standort, wenn der Signalpegel des aktuellen Standorts auf ein inakzeptables Niveau absinkt.

Das Capacity Max-System kann bis zu 250 Standorte unterstützten.

5.5.4

Roaming-Anforderung

Eine Roaming-Anforderung weist das Funkgerät an, einen neuen Standort zu suchen, selbst wenn das Signal des aktuellen Standorts akzeptabel ist.

Wenn keine Standorte verfügbar sind:

- wird im Display `Suche` angezeigt und die Liste der Standorte weiter durchgegangen.
- kehrt das Gerät zum vorherigen Standort zurück, falls dieser noch zur Verfügung steht.

HINWEIS:
Diese Funktion wird von Ihrem Händler konfiguriert.

Drücken Sie die programmierte Taste **Manuelles Standort-Roaming**.

Sie hören einen Ton, der darauf hinweist, dass das Funkgerät zu einem neuen Standort wechselt. Im Display wird `Site-ID` angezeigt.

5.5.5

Funkstation sperren/entsperren

Wenn diese Option aktiviert ist, sucht das Funkgerät nur den aktuellen Standort. Ist diese Option deaktiviert, sucht das Funkgerät neben dem aktuellen Standort auch nach anderen Standorten.

Drücken Sie die programmierte Taste **Funkstationsperr**e.

Wenn die **Standortsperre** eingeschaltet ist:

- Sie hören einen positiven Hinweiston, der darauf hinweist, dass das Funkgerät gesperrt ist und den aktuellen Standort nicht verlassen kann.

- Im Display wird `Station gesperrt` angezeigt.

Wenn die **Standortsperre** ausgeschaltet ist:

- Sie hören einen negativen Hinweiston, der darauf hinweist, dass das Funkgerät entsperrt ist.
- Im Display wird `Station entsperrt` angezeigt.

5.5.6

Standorteinschränkung

Ihr Systemadministrator für Funkgeräte kann im Capacity Max-System entscheiden, welche Netzwerkstandorte Ihr Funkgerät verwenden darf und welche nicht.

Das Funkgerät muss nicht neu programmiert werden, um die Liste der erlaubten und nicht erlaubten Standorte zu ändern. Wenn Ihr Funkgerät versucht, sich bei einem nicht erlaubten Standort anzumelden, erhält das Funkgerät eine Meldung darüber, dass der Standort verweigert wurde. Das Funkgerät sucht dann nach einem anderen Netzwerkstandort.

Wenn dem Funkgerät Standorte verweigert werden, zeigt Ihr Funkgerät `Registrierung verweigert` an, und die gelbe LED leuchtet zweimal auf, um eine Standortsuche anzuzeigen.

5.5.7

Lokaler Bündelfunk

Ein Standort muss mit einem Bündelfunk-Controller kommunizieren können, um als Systembündelfunk berücksichtigt werden zu können.

Wenn der Standort nicht mit dem Bündelfunk-Controller im System kommunizieren kann, wird das Funkgerät in den Modus „Bündelfunk am Standort“ versetzt. Im Modus „Lokaler Bündelfunk“ gibt das Funkgerät eine periodische akustische und visuelle Anzeige an den Benutzer aus, um ihn auf die eingeschränkte Funktionsfähigkeit hinzuweisen.

Im Modus „Bündelfunk am Standort“ zeigt das Funkgerät `Standort-Bündelf.` und gibt wiederholende Töne aus.

Die Funkgeräte im Modus „Bündelfunk am Standort“ sind für Gruppen- und Einzelsprachrufe sowie für das Versenden von Textnachrichten an andere Funkgeräte innerhalb desselben Standorts verfügbar. Sprachkonsolen, Aufzeichnungsgeräte, Telefon-Gateways und Datenanwendungen können nicht mit den Funkgeräten am Standort kommunizieren.

Ein Funkgerät im Modus „Bündelfunk am Standort“, das an Rufen innerhalb mehrerer Standorte beteiligt ist, ist nur zur Kommunikation mit anderen Funkgeräten innerhalb

desselben Standorts in der Lage. Die Kommunikation von und zu anderen Standorten geht verloren.

HINWEIS:
Wenn mehrere Standorte den aktuellen Standort des Funkgeräts abdecken und einer der Standorte in den Modus „Lokaler Bündelfunk“ wechselt, wechselt das Funkgerät per Roaming zu einem anderen Standort in Reichweite.

5.6

Rufe

In diesem Kapitel wird erklärt, wie Rufe empfangen, beantwortet, getätigt oder abgebrochen werden.

Sie können einen Funkgerät-Alias oder eine Funkgerät-ID bzw. einen Gruppen-Alias oder eine Gruppen-ID wählen, nachdem Sie einen Kanal mithilfe einer der folgenden Funktionen ausgewählt haben:

Alias-Suche
Diese Methode wird für Gruppenrufe, Einzelrufe und Sammelrufe nur mit einem Tastenfeldmikrofon verwendet.

Kontaktliste
Diese Methode bietet direkten Zugriff auf die Kontaktliste.

Manuell wählen (über „Kontakte“)
Diese Methode wird für Einzelrufe und Telefonrufe nur mit einem Tastenfeldmikrofon verwendet.

Programmierte Zifferntasten
Diese Methode wird für Gruppenrufe, Einzelrufe und Sammelrufe nur mit einem Tastenfeldmikrofon verwendet.

HINWEIS:
Einer Zifferntaste kann jeweils nur ein Aliasname bzw. eine ID zugewiesen werden, Sie können aber einem Aliasnamen bzw. einer ID mehr als eine Zifferntaste zuweisen. Es können alle Zifferntasten auf einem Tastenfeldmikrofon zugewiesen werden. Weitere Informationen finden Sie unter Zuweisen von Einträgen zu programmierbaren Zifferntasten auf Seite 410.

Programmierte Schnellwahltaste
Diese Methode wird nur für Gruppen-, Einzel- und Telefonrufe verwendet.

Sie können einer **Eintastenzugang**-Taste durch kurzes oder langes Drücken einer programmierbaren Taste nur eine ID zuweisen. Am Funkgerät können mehrere **Schnellwahltasten** programmiert sein.

Programmierbare Taste

Diese Methode wird nur für Telefonrufe verwendet.

5.6.1

Gruppenanrufe

Ihr Funkgerät muss als Teil einer Gruppe konfiguriert sein, um einen Ruf von einer Gruppe zu empfangen oder an eine Gruppe von Benutzern zu senden.

5.6.1.1

Tätigen von Gruppenrufen

Führen Sie die Vorgehensweise zum Tätigen von Gruppenrufen auf Ihrem Funkgerät durch.

1 Führen Sie einen der folgenden Schritte aus:

- Wählen Sie einen Kanal mit dem aktiven Gruppen-Alias oder der aktiven Gruppen-ID. Siehe Auswählen eines Ruftyps auf Seite 74.
- Drücken Sie die vorprogrammierte **Schnellwahltaste**.

2 Drücken Sie zum Durchführen des Rufs die **Sendetaste (PTT)**.

Die grüne LED leuchtet. In der ersten Textzeile wird das **Gruppenruf**-Symbol angezeigt.

3 Führen Sie einen der folgenden Schritte aus:

- Warten Sie, bis der Freiton verklungen ist, und sprechen Sie deutlich in das Mikrofon.
- Warten Sie, bis der **PTT**-Mithörton verstummt, und sprechen Sie dann deutlich in das Mikrofon.

4 Lassen Sie die **PTT**-Taste los, um den Gesprächspartner zu hören.

Die grüne LED leuchtet, wenn das Zielfunkgerät antwortet. Im Display werden das **Gruppenruf**-Symbol und ein Aliasname oder eine ID und der Aliasname oder die ID des sendenden Funkgeräts angezeigt.

5 Ist die Funktion „Kanal frei-Anzeige“ aktiviert, hören Sie einen kurzen Hinweiston, sobald die **Sendetaste (PTT)** am sendenden Funkgerät freigegeben wird, der Ihnen mitteilt, dass Sie nun auf diesem Kanal

antworten können. Drücken Sie zum Beantworten des Anrufs die **Sendetaste** (PTT).

Der Anruf wird beendet, wenn es keine Sprachaktivität für einen festgelegten Zeitraum gibt.

Der Rufinitiator kann die programmierte Taste drücken, um einen Gruppenruf zu beenden.

5.6.1.2

Tätigen von Gruppenrufen mithilfe der Kontaktliste

Führen Sie die Vorgehensweise zum Tätigen von Gruppenrufen mithilfe der Kontaktliste auf Ihrem Funkgerät durch.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Kontakte`. Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis zum gewünschten Aliasnamen oder zur gewünschten ID. Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie zum Durchführen des Rufs die **Sendetaste (PTT)**.

Die grüne LED leuchtet.
Die zweite Zeile zeigt den Aliasnamen oder die ID des Funkgeräts an. Die zweite Zeile zeigt `Gruppenruf` und das **Gruppenrufsymbol** an.

5 Führen Sie einen der folgenden Schritte aus:

- Warten Sie, bis der Freiton verklungen ist, und sprechen Sie deutlich in das Mikrofon.
- Warten Sie, bis der **PTT**-Mithörton verstummt, und sprechen Sie dann deutlich in das Mikrofon.

6 Lassen Sie die **PTT**-Taste los, um den Gesprächspartner zu hören.

Die grüne LED leuchtet, wenn das Zielfunkgerät antwortet. Im Display werden das **Gruppenruf**-Symbol und ein Aliasname oder eine ID und der

Aliasname oder die ID des sendenden Funkgeräts angezeigt.

7 Ist die Funktion „Kanal frei-Anzeige“ aktiviert, hören Sie einen kurzen Hinweiston, sobald die **Sendetaste (PTT)** am sendenden Funkgerät freigegeben wird, der Ihnen mitteilt, dass Sie nun auf diesem Kanal antworten können. Drücken Sie zum Beantworten des Anrufs die **Sendetaste** (PTT).

Der Anruf wird beendet, wenn es keine Sprachaktivität für einen festgelegten Zeitraum gibt.

Der Rufinitiator kann drücken, um den Gruppenruf zu beenden.

Ein kurzer Hinweiston erklingt. Im Display wird `Ruf beendet` angezeigt.

5.6.1.3

Antworten auf Gruppenrufe

Führen Sie die Vorgehensweise zum Antworten auf Gruppenrufe auf Ihrem Funkgerät durch.

Wenn Sie einen Gruppenruf empfangen:

- Die grüne LED blinkt.
- Auf dem Display wird das Symbol **Gruppenruf** in der oberen rechten Ecke angezeigt.
- In der ersten Textzeile wird der Aliasname des Anrufenden angezeigt.
- In der zweiten Textzeile wird der Gruppen-Aliasname angezeigt.
- Die Stummschaltung Ihres Funkgeräts wird aufgehoben, und der ankommende Anruf ist über den Lautsprecher zu hören.

1 Führen Sie einen der folgenden Schritte aus:

- Ist die Funktion „Kanal frei-Anzeige“ aktiviert, hören Sie einen kurzen Hinweiston, sobald die **Sendetaste (PTT)** am sendenden Funkgerät freigegeben wird, der Ihnen mitteilt, dass Sie nun auf diesem Kanal antworten können. Drücken Sie zum Beantworten des Anrufs die **Sendetaste** (PTT).
- Wenn die Sprachunterbrechungsfunktion aktiviert ist, drücken Sie die **Sendetaste (PTT)**, um den Ton des sendenden Funkgeräts zu unterbrechen

und den Kanal freizumachen, damit Sie antworten können.

Die grüne LED leuchtet.

2 Führen Sie einen der folgenden Schritte aus:

- Warten Sie, bis der Freiton verklungen ist, und sprechen Sie deutlich in das Mikrofon.
- Warten Sie, bis der **PTT**-Mithörton verstummt, und sprechen Sie dann deutlich in das Mikrofon.

3 Lassen Sie die **PTT**-Taste los, um den Gesprächspartner zu hören.

Der Anruf wird beendet, wenn es keine Sprachaktivität für einen festgelegten Zeitraum gibt.

5.6.2

Ansageanruf

Ein Ansageanruf ist ein Einweg-Sprachanruf von einem Benutzer an die gesamte Gesprächsgruppe.

Diese Funktion ermöglicht es nur dem initialisierenden Benutzer, Übertragungen an die Gesprächsgruppe zu initiieren, während die Empfänger des Anrufs nicht antworten können.

Der Ansage-Initiator kann den Ansageanruf auch beenden. Anrufe von einer Benutzergruppe können nur empfangen werden, wenn Ihr Funkgerät als Mitglied dieser Gruppe konfiguriert ist. Dies gilt auch für Anrufe an eine Benutzergruppe.

5.6.2.1

Tätigen von Ansageanrufen

Führen Sie die Vorgehensweise zum Tätigen von Ansagerufen auf Ihrem Funkgerät durch.

1 Führen Sie einen der folgenden Schritte aus:

- Wählen Sie einen Kanal mit dem aktiven Gruppen-Alias oder der aktiven Gruppen-ID. Siehe Auswählen eines Ruftyps auf Seite 74.
- Drücken Sie die vorprogrammierte **Schnellwahltaste**.

2 Drücken Sie zum Durchführen des Rufs die **Sendetaste (PTT)**.

Die grüne LED leuchtet.Das Display zeigt das **Gruppenruf**-Symbol und den Alias an.

3 Führen Sie einen der folgenden Schritte aus:

- Warten Sie, bis der Freiton verklungen ist, und sprechen Sie deutlich in das Mikrofon.
- Warten Sie, bis der **PTT**-Mithörton verstummt, und sprechen Sie dann deutlich in das Mikrofon.

Der Rufinitiator kann drücken, um den Ansageanruf zu beenden.

5.6.2.2

Tätigen von Ansageanrufen mithilfe der Kontaktliste

Führen Sie die Vorgehensweise zum Tätigen von Ansageanrufen mithilfe der Kontaktliste auf Ihrem Funkgerät durch.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Kontakte`.Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis zum gewünschten Aliasnamen oder zur gewünschten ID.Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie zum Durchführen des Rufs die **Sendetaste (PTT)**.

Die grüne LED blinkt.
Die zweite Zeile zeigt den Aliasnamen oder die ID des Funkgeräts an. Die zweite Zeile zeigt `Gruppenruf` und das **Gruppenrufsymbol** an.

5 Führen Sie einen der folgenden Schritte aus:

- Warten Sie, bis der Freiton verklungen ist, und sprechen Sie deutlich in das Mikrofon.
- Warten Sie, bis der **PTT**-Mithörton verstummt, und sprechen Sie dann deutlich in das Mikrofon.

Der Rufinitiator kann drücken, um den Ansageanruf zu beenden.

5.6.2.3

Empfangen von Ansageanrufen

Führen Sie die Vorgehensweise zum Empfangen eines Ansagerufs auf Ihrem Funkgerät durch.

Wenn Sie einen Ansageruf empfangen:

- Die grüne LED blinkt.
- Auf dem Display wird das Symbol **Gruppenruf** in der oberen rechten Ecke angezeigt.
- In der ersten Textzeile wird der Aliasname des Anrufenden angezeigt.
- In der zweiten Textzeile wird der Gruppen-Aliasname angezeigt.
- Die Stummschaltung Ihres Funkgeräts wird aufgehoben, und der ankommende Anruf ist über den Lautsprecher zu hören.

HINWEIS:
Empfangsbenutzer sind nicht in der Lage, während eines Ansagerufs zu antworten. Das Display zeigt `Antworten untersagt` an. Der Sendesperrton ertönt vorübergehend, wenn die **Sendetaste (PTT)** während des Ansagerufs gedrückt wird.

5.6.3

Einzelruf

Ein Einzelruf ist ein Anruf von einem einzelnen Funkgerät an ein anderes einzelnes Funkgerät.

Es gibt zwei Möglichkeiten, einen Einzelruf einzurichten.

- Der erste Ruftyp nennt sich OACSU (Off Air Call Set-Up). OACSU richtet den Ruf nach der Durchführung einer Verfügbarkeitsprüfung ein und schließt den Ruf automatisch ab.
- Der zweite Ruftyp nennt sich FOACSU (Full Off Air Call Set-Up). FOACSU richtet den Ruf ebenso nach Durchführung einer Verfügbarkeitsprüfung ein. FOACSU-Rufe erfordern jedoch eine Benutzerbestätigung, um den Ruf abzuschließen, und ermöglichen dem Benutzer, den Ruf entweder anzunehmen oder abzulehnen.

Der Ruftyp wird vom Systemadministrator konfiguriert.

Wenn das Zielfunkgerät nicht vor der Einrichtung des Einzelrufs verfügbar ist, passiert Folgendes:

- Ein Hinweiston ertönt.
- Im Display wird ein negativer Kurzhinweis angezeigt.
- Das Funkgerät kehrt zum Menü zurück, bevor es die Verfügbarkeitsprüfung durchführt.

HINWEIS:
Sowohl Anrufinitiatoren als auch Anrufempfänger können einen laufenden Einzelruf beenden, indem Sie drücken.

5.6.3.1

Tätigen von Einzelrufen

Ihr Funkgerät muss konfiguriert werden, um einen Einzelruf initiieren zu können. Wenn diese Funktion nicht aktiviert ist und Sie versuchen, einen Ruf einzuleiten, erklingt ein negativer Hinweiston. Führen Sie die Vorgehensweise zum Tätigen von Einzelrufen auf Ihrem Funkgerät durch.Wenn das gewünschte Funkgerät nicht verfügbar ist, wird ein kurzer Hinweiston ausgegeben, und im Display wird `Gerufener nicht verfügbar` angezeigt.

1. Führen Sie einen der folgenden Schritte aus:
   - Wählen Sie einen Kanal mithilfe des aktiven Funkgerät-Alias oder der aktiven Funkgerät-ID. Siehe Auswählen eines Ruftyps auf Seite 74.
   - Drücken Sie die vorprogrammierte **Schnellwahltaste**.
2. Drücken Sie zum Durchführen des Rufs die **Sendetaste (PTT)**.

   Die grüne LED leuchtet.Auf dem Display wird das Symbol **Einzelruf**, der Funkgeräte-Aliasnamen und der Anrufstatus angezeigt.
3. Warten Sie, bis der Freiton verklungen ist, und sprechen Sie deutlich in das Mikrofon.
4. Lassen Sie die **PTT**-Taste los, um den Gesprächspartner zu hören.

   Die grüne LED leuchtet, wenn das Zielfunkgerät antwortet.
5. Der Anruf wird beendet, wenn es keine Sprachaktivität für einen festgelegten Zeitraum gibt.Sie hören einen kurzen Ton. Im Display wird `Ruf beendet` angezeigt.

Sowohl Anrufinitiatoren als auch Anrufempfänger können einen laufenden Einzelruf beenden, indem Sie drücken.

5.6.3.2

Durchführen eines Einzelrufs mit einer Schnellwahltaste

Die Schnellwahlfunktion ermöglicht es Ihnen, einen Einzelruf an einen vordefinierten Alias oder eine ID eines Einzelrufs durchzuführen. Diese Funktion kann durch kurzes oder langes Drücken einer programmierbaren Taste zugewiesen werden.

Sie können einem Eintastenzugang nur einen Aliasnamen oder eine ID zuweisen. Am Funkgerät können mehrere Schnellwahltasten konfiguriert werden.

1 Drücken Sie die programmierte **Schnellwahltaste**, um einen Einzelruf an einen vordefinierten Alias oder eine ID eines Einzelrufs durchzuführen.

2 Drücken Sie zum Durchführen des Rufs die **Sendetaste (PTT)**.

Die LED leuchtet dauerhaft grün.

Im Display wird der Einzelruf-Alias oder die Einzelruf-ID angezeigt.

3 Warten Sie, bis der Freiton verklungen ist (falls aktiviert), und sprechen Sie deutlich in das Mikrofon.

4 Lassen Sie die **Sendetaste (PTT)** zum Hören los.

Wenn das Zielfunkgerät antwortet, blinkt die LED grün.

Wird während einer vorprogrammierten Zeitdauer nicht gesprochen, endet der Ruf.

Sowohl Anrufinitiatoren als auch Anrufempfänger können einen laufenden Einzelruf beenden, indem Sie drücken.

5.6.3.3

Tätigen von Einzelrufen durch manuelles Wählen

Führen Sie die Vorgehensweise zum Tätigen von Einzelrufen auf Ihrem Funkgerät durch manuelles Wählen durch.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Kontakte`. Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis `Man. Wählen`. Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis `Funkgerät-Nr.` Drücken Sie OK, um die Option auszuwählen.

5 Führen Sie einen der folgenden Schritte aus:
- Geben Sie die Funkgerät-ID ein, und drücken Sie OK, um fortzufahren.
- Bearbeiten Sie die zuvor gewählte Funkgerät-ID, und drücken Sie OK, um fortzufahren.

6 Drücken Sie zum Durchführen des Rufs die **Sendetaste (PTT)**.

Die grüne LED leuchtet. Im Display wird der Aliasname des Zielfunkgeräts angezeigt.

7 Warten Sie, bis der Freiton verklungen ist, und sprechen Sie deutlich in das Mikrofon.

8 Lassen Sie die **PTT**-Taste los, um den Gesprächspartner zu hören.

Die grüne LED leuchtet, wenn das Zielfunkgerät antwortet. Im Display wird der Aliasname oder die ID des sendenden Benutzers angezeigt.

9 Ist die Funktion „Kanal frei-Anzeige“ aktiviert, hören Sie einen kurzen Hinweiston, sobald die **Sendetaste (PTT)** am sendenden Funkgerät freigegeben wird, der Ihnen mitteilt, dass Sie nun auf diesem Kanal antworten können. Drücken Sie zum Beantworten des Anrufs die **Sendetaste** (PTT).

Der Anruf wird beendet, wenn es keine Sprachaktivität für einen festgelegten Zeitraum gibt.Ein Hinweiston ertönt.Im Display wird `Ruf beendet` angezeigt.

5.6.3.4

Einzelrufe empfangen

Wenn Sie Einzelrufe empfangen, die als Off Air Call Set-Up (OACSU) konfiguriert sind:

- Die grüne LED blinkt.
- Das **Einzelrufsymbol** wird in der rechten oberen Ecke angezeigt.
- In der ersten Textzeile wird der Aliasname des Anrufenden angezeigt.
- Die Stummschaltung Ihres Funkgeräts wird aufgehoben, und der ankommende Anruf ist über den Lautsprecher zu hören.

HINWEIS:
Anhängig von der Konfiguration Ihres Funkgeräts (OACSU oder FOACSU) kann die Antwort auf Einzelrufe eine Benutzerbestätigung erfordern oder nicht.

Bei der OACSU-Konfiguration wird Ihr Funkgerät stummgeschaltet und der Ruf automatisch verbunden.

5.6.3.5

Einzelrufe annehmen

Wenn Sie als FOACSU konfigurierte Einzelrufe (Full Off Air Call Set-Up) erhalten:

- Die grüne LED blinkt.
- Das **Einzelrufsymbol** wird in der rechten oberen Ecke angezeigt.
- In der ersten Textzeile wird der Aliasname des Anrufenden angezeigt.

1. Führen Sie einen der folgenden Schritte aus, um einen als FOACSU konfigurierten Einzelruf anzunehmen:

- Drücken Sie ▲ oder ▼ bis Annehmen und OK, um einen Einzelruf zu beantworten.
- Drücken Sie die **Sendetaste (PTT)** bei einem beliebigen Eintrag.

Die grüne LED leuchtet.

2 Warten Sie, bis der Freiton verklungen ist, und sprechen Sie deutlich in das Mikrofon.

3 Lassen Sie die **PTT**-Taste los, um den Gesprächspartner zu hören.

Der Anruf wird beendet, wenn es keine Sprachaktivität für einen festgelegten Zeitraum gibt.Ein Hinweiston ertönt. Im Display wird Ruf beendet angezeigt.

HINWEIS:
Sowohl Anrufinitiatoren als auch Anrufempfänger können einen laufenden Einzelruf beenden, indem Sie drücken.

5.6.3.6

Einzelrufe ablehnen

Wenn Sie als FOACSU konfigurierte Einzelrufe (Full Off Air Call Set-Up) erhalten:

- Die grüne LED blinkt.
- Das **Einzelrufsymbol** wird in der rechten oberen Ecke angezeigt.
- In der ersten Textzeile wird der Aliasname des Anrufenden angezeigt.

Führen Sie einen der folgenden Schritte aus, um einen als FOACSU konfigurierten Einzelruf abzulehnen:

- Drücken Sie ▲ oder ▼ bis Ablehnen und OK, um einen Einzelruf abzulehnen.
- Drücken Sie zum Ablehnen eines Einzelrufs.

5.6.4

Rundumrufe

Ein Rundumruf ist ein Ruf von einem einzelnen Funkgerät an alle Funkgeräte an einem Standort oder alle Funkgeräte an einem Gruppenstandort, je nach Systemkonfiguration.

Ein Rundumruf wird für wichtige Durchsagen verwendet, die die volle Aufmerksamkeit des Benutzers erfordern. Die Benutzer auf dem System können auf einen Rundumruf nicht antworten.

Capacity Max unterstützt Standort-Rundumrufe und Mult-Standort-Rundumrufe. Der Systemadministrator kann eine dieser Optionen für Ihr Funkgerät konfigurieren.

HINWEIS:
Funkgeräte können systemweite Rundumrufe unterstützen, die Infrastruktur von Motorola Solutions unterstützt jedoch keine systemweiten Rundumrufe.

5.6.4.1

Tätigen von Rundumrufen

Ihr Funkgerät muss konfiguriert werden, um einen Rundumruf tätigen zu können. Führen Sie die Vorgehensweise zum Tätigen von Rundumrufen auf Ihrem Funkgerät durch.

1. Wählen Sie einen Kanal mithilfe des aktiven Rundumruf-Gruppen-Alias oder der aktiven relevanten ID. Siehe Auswählen eines Ruftyps auf Seite 74.

2. Drücken Sie zum Durchführen des Rufs die **Sendetaste (PTT)**.

   Die grüne LED leuchtet.Auf dem Display wird je nach Konfigurationstyp das **Gruppenruf**-Symbol und entweder `Rundumruf`, `Standort-Rundruf` oder `Durchsageruf` angezeigt.

3. Führen Sie einen der folgenden Schritte aus:
   - Warten Sie, bis der Freiton verklungen ist, und sprechen Sie deutlich in das Mikrofon.
   - Warten Sie, bis der **PTT**-Mithörton verstummt, und sprechen Sie dann deutlich in das Mikrofon.

   Benutzer auf dem Kanal können auf einen Sammelruf nicht antworten.

Der Rufinitiator kann drücken, um den Rundumruf zu beenden.

5.6.4.2

Empfangen von Rundumrufen

Wenn Sie einen Rundumruf empfangen, geschieht Folgendes:

- Ein Hinweiston ertönt.
- Die grüne LED blinkt.
- Auf dem Display wird das Symbol **Gruppenruf** in der oberen rechten Ecke angezeigt.
- In der ersten Textzeile wird die ID des Anrufer-Alias angezeigt.
- Die zweite Textzeile zeigt abhängig vom Konfigurationstyp `Rundumruf`, `StandortRundruf` oder `Durchsageruf` an.
- Die Stummschaltung Ihres Funkgeräts wird aufgehoben, und der ankommende Anruf ist über den Lautsprecher zu hören.

Das Funkgerät kehrt zu dem Bildschirm zurück, der vor dem Empfangen des Sammelrufs angezeigt wurde, wenn der Ruf beendet wird.

Ist die Funktion „Kanal frei-Anzeige“ aktiviert, hören Sie einen kurzen Hinweiston, sobald die **Sendetaste (PTT)** am sendenden Funkgerät freigegeben wird, der Ihnen mitteilt, dass Sie nun diesen Kanal verwenden können. Auf einen Sammelruf kann nicht geantwortet werden.

HINWEIS:
Das Funkgerät unterbricht den Empfang eines Sammelrufs, wenn Sie während des Anrufs auf einen anderen Kanal schalten. Während eines Sammelrufs können Menüs nicht durchlaufen oder bearbeitet werden, bis der Ruf endet.

5.6.5

Telefonrufe

Ein Telefonruf ist ein Ruf von einem einzelnen Funkgerät an ein anderes Telefon.

In Capacity Max ist Ihr Funkgerät in der Lage, Anrufe zu empfangen und zu antworten, sogar dann, wenn die Telefonanruf-Funktion deaktiviert ist.

Die Telefonanruf-Funktion kann aktiviert werden, indem Telefonnummern auf dem System zugewiesen und

eingerichtet werden. Klären Sie mit Ihrem Systemadministrator, wie das Funkgerät konfiguriert wurde.

5.6.5.1

Tätigen von Telefonrufen mit der programmierbaren Telefon-Taste

Gehen Sie wie folgt vor, um einen Telefonanruf mit der programmierbaren Telefon-Taste zu tätigen.

1 Drücken Sie die programmierte **Telefon-**Taste, um auf die Liste der Telefoneinträge zuzugreifen.

2 Drücken Sie ▲ oder ▼ bis zum gewünschten Aliasnamen oder zur gewünschten ID.Drücken Sie OK, um die Option auszuwählen.

- Die grüne LED leuchtet. Das **Telefonruf**-Symbol wird in der rechten oberen Ecke angezeigt. In der ersten Textzeile wird der Funkgeräte-Alias angezeigt. In der zweiten Textzeile wird der Rufstatus angezeigt.
- Wenn die Rufeinrichtung erfolgreich war, ertönt der DTMF-Ton. Der Wählton des Telefonbenutzers erklingt. In der ersten Textzeile werden der Aliasname des Funkgeräts angezeigt. Das **Telefonruf**-Symbol wird in der rechten oberen Ecke angezeigt. In der zweiten Textzeile wird der Rufstatus angezeigt.
- War die Anrufeinrichtung nicht erfolgreich, wird ein Ton ausgegeben, und im Display wird `Telefonruf erfolglos` angezeigt. Ihr Funkgerät wechselt zum Eingabebildschirm für die Zugangsnummer. Wenn die Zugangsnummer in der Kontaktliste vorkonfiguriert wurde, wechselt das Funkgerät zu dem Bildschirm, auf dem Sie vor dem Einleiten des Rufs waren.

3 Drücken Sie die **Sendetaste (PTT)**, um zu sprechen. Lassen Sie die **PTT**-Taste los, um den Gesprächspartner zu hören.

4 Drücken Sie zum Beenden des Gesprächs.

- Der DTMF-Ton erklingt, und im Display wird `Telefonruf wird beendet` angezeigt.
- Wenn die Rufbeendigung erfolgreich eingerichtet wurde, erklingt ein Signalton, und im Display wird `Ruf beendet` angezeigt.

- War die Rufbeendigung nicht erfolgreich, kehrt das Funkgerät zum Telefonruf-Bildschirm zurück. Wiederholen Sie Schritt 3 und Schritt 4, oder warten Sie, bis der Telefonbenutzer den Ruf beendet.
- Wenn Sie die **Sendetaste** (PTT) auf dem Telefonkontakte-Bildschirm drücken, erklingt ein HinweistonZum Anrufen OK drücken angezeigt.
- Wenn der Telefonbenutzer den Ruf beendet, erklingt ein Hinweiston, und im Display wird, und im Display wird Telefonruf beendet angezeigt.

HINWEIS:
Drücken Sie während des Zugriffs auf den Kanal , um den Anrufversuch abzubrechen; es wird dann ein Hinweiston ausgegeben.

Wenn Sie während des Rufs bei vorkonfiguriertem Sperrcode den **Eintastenzugang** drücken oder den Sperrcode als zusätzliche Zeichen eingeben, versucht Ihr Funkgerät, den Ruf zu beenden.

5.6.5.2

Antworten auf Telefonrufe als Gruppenrufe

Führen Sie die Vorgehensweise zum Antworten auf Telefonrufe als Gruppenrufe auf Ihrem Funkgerät durch.

Wenn Sie einen Telefonruf als Gruppenruf empfangen, geschieht Folgendes:

- Auf dem Display wird das **Telefonruf**-Symbol in der oberen rechten Ecke angezeigt.
- Im Display wird die Meldung Telefonanruf angezeigt.
- Die grüne LED blinkt.
- Die Stummschaltung Ihres Funkgeräts wird aufgehoben, und der ankommende Anruf ist über den Lautsprecher zu hören.

1. Drücken Sie zum Beantworten des Anrufs die **Sendetaste** (PTT).
2. Lassen Sie die **PTT**-Taste los, um den Gesprächspartner zu hören.

3 Drücken Sie zum Beenden des Gesprächs .

Im Display wird die Meldung `Ruf beendet` angezeigt.

HINWEIS:
Wenn die Telefonrufkapazität nicht für Ihr Funkgerät aktiviert wurde, kann das Funkgerät einen Telefonruf nicht als einen Gruppenruf beenden. Der Telefonbenutzer muss den Ruf beenden. Der Empfänger kann während des Rufs nur sprechen.

Wenn der Ruf erfolgreich beendet wurde:

- Ein Hinweiston ertönt.
- Im Display wird `Ruf beendet` angezeigt.

Wenn der Ruf nicht beendet werden kann, wechselt das Funkgerät zum Telefonruf-Bildschirm. Wiederholen Sie Schritt 3, oder warten Sie, bis der Telefonbenutzer den Ruf beendet.

5.6.5.3

Antworten auf Telefonrufe als Sammelrufe

Wenn Sie einen Telefonanruf als einen Rundumruf empfangen, ist das empfangende Funkgerät nicht in der Lage, zu sprechen oder zu antworten. Der Empfangsbenutzer ist nicht in der Lage, den Rundumruf zu beenden.

Wenn Sie einen Telefonruf als Rundumruf empfangen, geschieht Folgendes:

- Auf dem Display wird das **Telefonruf**-Symbol in der oberen rechten Ecke angezeigt.
- Das Display zeigt abhängig vom Konfigurationstyp `Rundumruf`, `StandortRundruf` oder `Durchsageruf` und `Telefonruf` an.
- Die grüne LED blinkt.

- Die Stummschaltung Ihres Funkgeräts wird aufgehoben, und der ankommende Anruf ist über den Lautsprecher zu hören.

5.6.5.4

Antworten auf Telefonrufe als Einzelrufe

Führen Sie die Vorgehensweise zum Antworten auf Telefonrufe als Einzelrufe auf Ihrem Funkgerät durch.

Wenn Sie einen Telefonruf als Einzelruf empfangen, geschieht Folgendes:

- Auf dem Display wird das **Telefonruf**-Symbol in der oberen rechten Ecke angezeigt.
- Im Display wird die Meldung `Telefonanruf` angezeigt.
- Die grüne LED blinkt.
- Die Stummschaltung Ihres Funkgeräts wird aufgehoben, und der ankommende Anruf ist über den Lautsprecher zu hören.

1. Drücken Sie zum Beantworten des Anrufs die **Sendetaste** (PTT).
2. Lassen Sie die **PTT**-Taste los, um den Gesprächspartner zu hören.
3. Drücken Sie zum Beenden des Gesprächs.

   Im Display wird die Meldung `Ruf beendet` angezeigt.

   HINWEIS:
   Wenn die Telefonrufkapazität nicht für Ihr Funkgerät aktiviert wurde, kann das Funkgerät einen Telefonruf nicht als einen Einzelruf beenden. Der Telefonbenutzer muss den Ruf beenden. Der Empfänger kann während des Rufs nur sprechen.

   Wenn der Ruf erfolgreich beendet wurde:

   - Ein Hinweiston ertönt.
   - Im Display wird `Ruf beendet` angezeigt.

   Wenn der Ruf nicht beendet werden kann, wechselt das Funkgerät zum Telefonruf-Bildschirm. Wiederholen Sie Schritt 3, oder warten Sie, bis der Telefonbenutzer den Ruf beendet.

5.6.6

Gesprächsbevorrechtigung

Mit der Gesprächsbevorrechtigung kann ein Funkgerät alle aktiven Sprachübertragungen unterbrechen und eine priorisierte Übertragung initiieren.

Mit der Funktion der Gesprächsbevorrechtigung unterbricht das System gerade laufende Gespräche in Instanzen, in denen gebündelte Kanäle nicht verfügbar sind.

Anrufe mit höherer Priorität wie Notrufe oder Rundumrufe werden bei der Übertragung des sendenden Funkgeräts vorgezogen. Wenn kein anderer Funkfrequenzkanal verfügbar ist, wird der Notruf einem Rundumruf vorgezogen.

5.6.7

Stimmunterbrechung

Die Stimmunterbrechung ermöglicht das Herunterfahren einer aktiven Sprachübertragung.

Diese Funktion verwendet die Rückwärtskanalsignalisierung, um die aktive Sprachübertragung eines Funkgeräts zu unterbrechen, wenn das unterbrechende Funkgerät für die Stimmunterbrechung konfiguriert wurde und das sendende Funkgerät so konfiguriert wurde, dass Sprachrufe unterbrochen werden können. Das unterbrechende Funkgerät ist dann in der Lage, eine Sprachübertragung an den Teilnehmer des unterbrochenen Rufs zu tätigen.

Die Funktion der Sprachunterbrechung verbessert merklich die Fähigkeit erfolgreicher Bereitstellungen von neuen Übertragungen an die gewünschten Parteien, während ein Ruf aktiv ist.

Die Stimmunterbrechung ist nur für den Benutzer zugänglich, wenn diese Funktion über das Funkgerät eingerichtet wurde. Weitere Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator.

5.6.7.1

Aktivieren der Sprachunterbrechung

Führen Sie die Vorgehensweise zum Initialisieren der Sprachunterbrechung auf Ihrem Funkgerät durch.

Ihr Funkgerät muss für die Nutzung dieser Funktion konfiguriert sein. Weitere Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator.

1 Zum Unterbrechen der Übertragung während eines laufenden Anrufs drücken Sie die Sendetaste (**PTT**).

Bei einem Funkgerät wird bei einem abgebrochenen Anruf `Ruf unterbrochen` angezeigt. Das Funkgerät gibt einen negativen Hinweiston ab, bis Sie die **PTT**-Taste loslassen.

2 Warten Sie auf eine Quittierung.

Bei erfolgreicher Durchführung:

- Ein positiver Hinweiston erklingt.

Bei nicht erfolgreicher Durchführung:

- Ein negativer Hinweiston erklingt.

3 Führen Sie einen der folgenden Schritte aus:

- Warten Sie, bis der Freiton verklungen ist, und sprechen Sie deutlich in das Mikrofon.
- Warten Sie, bis der **PTT**-Mithörton verstummt, und sprechen Sie dann deutlich in das Mikrofon.

5.7

Erweiterte Funktionen

In diesem Kapitel wird die Bedienung der Funktionen auf Ihrem Funkgerät beschrieben.

Ihr Händler oder Systemadministrator kann Ihr Funkgerät an Ihre speziellen Anforderungen und Bedürfnisse anpassen. Weitere Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator.

5.7.1

Anrufwarteschlange

Wenn keine Ressourcen verfügbar sind, um den Ruf zu verarbeiten, ermöglicht die Anrufwarteschlange die Platzierung der Rufanfrage in der Systemwarteschlange, wo sie auf die nächsten verfügbaren Ressourcen wartet.

Sie hören einen Anrufwarteschlangenton nach dem Drücken der **Sendetaste (PTT)**, der Sie darüber informiert, dass das Funkgerät in den Anrufwarteschlangenmodus versetzt wurde. Die **Sendetaste** (PTT) kann nach dem Erklingen des Anrufwarteschlangentons losgelassen werden.

Nach erfolgreicher Rufeinrichtung passiert Folgendes:

- Die grüne LED blinkt.
- Sofern aktiviert ertönt der Freiton.
- Das Display zeigt das Symbol für den Ruftyp, die ID oder den Alias.

- Der Funkgerätebenutzer muss innerhalb von 4 Sekunden die **Sendetaste (PPT)** drücken, um die Sprachübertragung zu starten.

Wenn die Rufeinrichtung nicht erfolgreich war, passiert Folgendes:

- Sofern aktiviert, wird der Hinweiston für die Ablehnung ausgegeben.
- Im Display wird vorübergehend der Fehlerhinweis angezeigt.
- Der Ruf wird beendet, und das Funkgerät beendet die Rufeinrichtung.

5.7.2

Gesprächsgruppen-Scan

Mit dieser Funktion kann das Funkgerät Anrufe von Gruppen überwachen bzw. verbinden, die von einer Empfängergruppenliste definiert werden.

Wenn Scan aktiviert ist, wird das Scan-Symbol in der Statusleiste angezeigt, und die LED-Anzeige blinkt gelb. Das Funkgerät hebt die Stummschaltung für alle Mitglieder in der Empfängergruppenliste auf.

Wenn Scan aktiviert ist, empfängt das Funkgerät keine Übertragungen von Mitgliedern der Empfängergruppenliste, mit Ausnahme von Rundumrufen und der ausgewählten Gesprächsgruppe.

HINWEIS:
Die Funktion „Gesprächsgruppen-Scan“ kann über CPS konfiguriert werden. Klären Sie mit Ihrem Systemadministrator, wie das Funkgerät konfiguriert wurde.

5.7.2.1

Ein-/Ausschalten der Gesprächsgruppen-Scan-Funktion

Führen Sie die Vorgehensweise zum Ein- und Ausschalten der Gesprächsgruppen-Scan-Funktion Ihres Funkgeräts durch.

1. Drücken Sie OK, um das Menü aufzurufen.
2. Drücken Sie ▲ oder ▼ bis Scan. Drücken Sie OK, um die Option auszuwählen.
3. Führen Sie einen der folgenden Schritte aus:

- Drücken Sie ▲ oder ▼ bis `Einschalten`.

  Drücken Sie OK, um die Option auszuwählen.
- Drücken Sie ▲ oder ▼ bis `Abschalten`.

  Drücken Sie OK, um die Option auszuwählen.

Wenn die Scan-Funktion aktiviert ist:

- Auf dem Display werden `Scan ein` und das **Scan**-Symbol angezeigt.
- Die gelbe LED blinkt.
- Ein positiver Hinweiston erklingt.

Wenn die Scan-Funktion deaktiviert ist:

- Auf dem Display wird `Scan aus` angezeigt.
- Das **Scan**-Symbol wird nicht mehr angezeigt.
- Die LED erlischt.
- Ein negativer Hinweiston erklingt.

5.7.3

Empfängergruppenliste

Mit der Funktion „Empfängergruppenliste“ können Sie Mitglieder für die Gesprächsgruppen-Scanliste erstellen und zuweisen.

Diese Liste wird erstellt, wenn das Funkgerät programmiert wird und ermittelt, welche Gruppen gescannt werden können. Ihr Funkgerät unterstützt höchstens 16 Mitglieder in diese Liste.

Wenn das Funkgerät so programmiert wurde, dass die Scan-Liste bearbeitet werden kann, können Sie:

- Gesprächsgruppen hinzufügen/entfernen.
- Priorität für Gesprächsgruppen hinzufügen, entfernen bzw. bearbeiten. Siehe Bearbeitung der Priorität für eine Gesprächsgruppe auf Seite 100.
- Gesprächsgruppen für den Verbindungsaufbau hinzufügen, entfernen bzw. bearbeiten. Siehe Hinzufügen einer Gesprächsgruppenzugehörigkeit auf Seite 101 und Entfernen einer Gesprächsgruppenzugehörigkeit auf Seite 102.
- Die vorhandene Scanliste durch eine neue Scanliste ersetzen.

WICHTIG:
Zum Hinzufügen eines Mitglieds zur Liste muss die Gesprächsgruppe zunächst im Funkgerät konfiguriert werden.

HINWEIS:
Die Empfängergruppenliste wird vom Systemadministrator programmiert. Weitere Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator.

5.7.4

Prioritätsmonitor

Der Prioritätsmonitor ermöglicht es dem Funkgerät, automatisch Übertragungen von Gesprächsgruppen mit höherer Priorität zu empfangen, selbst wenn es gerade mit einem anderen Ruf beschäftigt ist.

Das Funkgerät verlässt den Gesprächsgruppenruf mit niedrigerer Priorität für den Gesprächsgruppenruf mit höherer Priorität.

HINWEIS:
Der Zugriff auf diese Funktion ist nur möglich, wenn die Funktion „Gesprächsgruppen-Scan“ aktiviert ist.

Der Prioritätsmonitor gilt nur für Mitglieder der Empfängergruppenliste. Es gibt zwei Prioritäts-Gesprächsgruppen: Priorität 1 (P1) und Priorität 2 (P2). P1 hat eine höhere Priorität als P2. Im Capacity Max-System empfängt das Funkgerät Übertragungen gemäß der folgenden Prioritätsreihenfolge:

1. Notruf für P1-Gesprächsgruppe
2. Notruf für P2-Gesprächsgruppe
3. Notruf für Gesprächsgruppen ohne Priorität in der Empfängergruppenliste
4. Rundumruf
5. P1-Gesprächsgruppenruf
6. P2-Gesprächsgruppenruf
7. Gesprächsgruppen ohne Priorität in der Empfängergruppenliste

Siehe Bearbeitung der Priorität für eine Gesprächsgruppe auf Seite 100 für weitere Informationen zum Hinzufügen, Entfernen bzw. Bearbeiten der Priorität von Gesprächsgruppen in der Scanliste.

HINWEIS:
Diese Funktion wird vom Systemadministrator programmiert. Weitere Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator.

5.7.4.1

Bearbeitung der Priorität für eine Gesprächsgruppe

Im Gesprächsgruppen-Scan-Menü können Sie die Priorität einer Gesprächsgruppe anzeigen oder bearbeiten.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Scan`. Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis `Liste anz/bearb`. Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis zur gewünschten Gesprächsgruppe. Drücken Sie OK, um die Option auszuwählen.

Die aktuelle Priorität wird durch das Symbol **Priorität 1** oder **Priorität 2** neben der Gesprächsgruppe angezeigt.

5 Drücken Sie ▲ oder ▼ bis `Priorit.bearb`. Drücken Sie OK, um die Option auszuwählen.

6 Drücken Sie ▲ oder ▼ bis zur gewünschten Prioritätsstufe. Drücken Sie OK, um die Option auszuwählen.

Wenn eine andere Gesprächsgruppe Priorität 1 oder Priorität 2 zugewiesen wurde, können Sie die aktuelle Priorität überschreiben. Wenn auf dem Display `"Vorhandene überschreiben?"` angezeigt wird, drücken Sie ▲ oder ▼ bei den folgenden Optionen:

- `Nein`, um zum vorherigen Schritt zurückzukehren.
- `Ja` zum Überschreiben.

Im Display wird ein positiver Kurzhinweis angezeigt, bevor wieder der vorhergehende Bildschirm angezeigt wird. Das Prioritätssymbol erscheint neben der Gesprächsgruppe.

5.7.5

Gesprächsgruppenzugehörigkeit für mehrere Gesprächsgruppen

In einem Capacity Max-System kann Ihr Funkgerät für bis zu sieben Gesprächsgruppen an einem Standort konfiguriert werden.

Von den 16 Gesprächsgruppen in der Empfängergruppenliste können bis zu sieben Gesprächsgruppen als Gesprächsgruppen für den Verbindungsaufbau zugewiesen werden. Die ausgewählte Gesprächsgruppe und die Prioritäts-Gesprächsgruppen werden automatisch verbunden.

HINWEIS:
Diese Funktion wird vom Systemadministrator programmiert. Weitere Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator.

5.7.5.1

Hinzufügen einer Gesprächsgruppenzugehörigkeit

Führen Sie die Vorgehensweise zum Hinzufügen einer Gesprächsgruppenzugehörigkeit durch.

1. Drücken Sie OK, um das Menü aufzurufen.
2. Drücken Sie ▲ oder ▼ bis `Scan`. Drücken Sie OK, um die Option auszuwählen.
3. Drücken Sie ▲ oder ▼ bis `Liste anz/bearb`. Drücken Sie OK, um die Option auszuwählen.
4. Drücken Sie ▲ oder ▼ bis zur gewünschten Gesprächsgruppen-ID oder -Alias. Drücken Sie OK, um die Option auszuwählen.

   Der Zugehörigkeitsstatus wird unter `Liste anzeigen/bearbeiten` angezeigt. Auf dem Display wird ● neben der ausgewählten Gesprächsgruppen-ID oder dem Alias angezeigt.
5. Drücken Sie ▲ oder ▼ bis `Verbindung bearb`. Drücken Sie OK, um die Option auszuwählen.
6. Führen Sie einen der folgenden Schritte aus:

- Drücken Sie ▲ oder ▼ bis Ein. Drücken Sie OK, um die Option auszuwählen.
- Drücken Sie ▲ oder ▼ bis Aus. Drücken Sie OK, um die Option auszuwählen.

Wenn Ein ausgewählt ist, wird ● neben der Gesprächsgruppen-ID oder dem Alias angezeigt.

Wenn der Verbindungsaufbau erfolgreich ist, wird auf dem Display ✓ neben der ausgewählten Gesprächsgruppen-ID oder dem Alias angezeigt.

Wenn der Verbindungsaufbau nicht erfolgreich ist, wird auf dem Display weiterhin ● neben der Gesprächsgruppen-ID oder dem Alias angezeigt.

HINWEIS:
Das Funkgerät zeigt Liste voll an, wenn maximal sieben Gesprächsgruppen für den Verbindungsaufbau in der Scanliste ausgewählt sind. Bevor Sie eine neue Gesprächsgruppe für den Verbindungsaufbau auswählen können, müssen Sie eine vorhandene verbundene Gesprächsgruppe entfernen. Weitere Informationen finden Sie unter Entfernen einer Gesprächsgruppenzugehörigkeit auf Seite 102.

5.7.5.2

Entfernen einer Gesprächsgruppenzugehörigkeit

Wenn die Verbindungsliste voll ist und Sie eine neue Gesprächsgruppe für den Verbindungsaufbau auswählen möchten, müssen Sie eine vorhandene verbundene Gesprächsgruppe entfernen, um Platz für die neue zu schaffen. Führen Sie die Vorgehensweise zum Entfernen einer Gesprächsgruppenzugehörigkeit durch.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Scan`. Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis `Liste anz/bearb`.

Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis zur gewünschten Gesprächsgruppen-ID oder -Alias. Drücken Sie OK, um die Option auszuwählen.

Der Zugehörigkeitsstatus wird unter `Liste anzeigen/bearbeiten` angezeigt. Auf dem Display wird ■ neben der ausgewählten Gesprächsgruppen-ID oder dem Alias angezeigt.

5 Drücken Sie ▲ oder ▼ bis `Verbindung bearb`.

Drücken Sie OK, um die Option auszuwählen.

6 Drücken Sie ▲ oder ▼ bis `Aus`. Drücken Sie OK, um die Option auszuwählen.

Wenn `Aus` ausgewählt ist, wird ■ nicht länger neben der Gesprächsgruppen-ID oder dem Alias angezeigt.

5.7.6

Rückruf

Anhand der Rückruf-Funktion können Sie während des Scannens auf eine Übertragung reagieren.

Wenn Ihr Funkgerät einen Ruf aus der wählbaren Gruppen-Scan-Liste scannt und die **Sendetaste** (PTT) während des gescannten Rufs gedrückt wird, hängt die Reaktion des Funkgeräts davon ab, ob die Rückruf-Funktion bei Konfiguration des Funkgeräts aktiviert oder deaktiviert wurde. Weitere Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator.

Rückruf deaktiviert

Das Funkgerät verlässt den gescannten Ruf und versucht, über den Kontakt für die aktuell ausgewählte Kanalposition zu senden. Wenn die Haltezeit für den aktuell ausgewählten Kontakt abläuft, wechselt das Funkgerät zu dem Standardkanal und startet den Timer

für die Scan-Haltezeit. Das Funkgerät setzt den Gruppenscan fort, wenn der Timer für die Scan-Haltezeit abläuft.

Rückruf aktiviert

Wenn die **Sendetaste** (PTT) während der Haltezeit der Gruppe für den gescannten Ruf gedrückt wird, versucht das Funkgerät, an die gescannte Gruppe zu senden.

HINWEIS:
Wenn Sie einen Ruf einer Gruppe scannen, die keiner Kanalposition in der derzeit ausgewählten Zone zugewiesen ist, und der Ruf beendet wird, wechseln Sie zu der richtigen Zone, und wählen Sie dann die Kanalposition der Gruppe, um mit dieser Gruppe zu sprechen.

5.7.7

Bluetooth

Mit der Bluetooth-Funktion können Sie Ihr Funkgerät über eine Bluetooth-Verbindung mit einem Bluetooth-fähigen Gerät (Zubehör) verwenden. Ihr Funkgerät unterstützt Bluetooth-Geräte von Motorola Solutions sowie im Handel erhältliche (COTS) Bluetooth-fähige Geräte.

Bluetooth funktioniert innerhalb eines Umkreises von 10 m Sichtverbindung. Die Sichtverbindung ist ein hindernisfreier Weg zwischen Ihrem Funkgerät und Ihrem Bluetooth-fähigen Gerät. Um eine hohe Zuverlässigkeit zu erreichen, empfiehlt Motorola Solutions, das Funkgerät und das Zubehör nicht zu trennen.

Im Randbereich der Reichweite nehmen die Sprach- und Tonqualität stark ab, und die Übertragung hört sich fehlerhaft oder gebrochen an. Um dieses Problem zu beseitigen, verringern Sie die Entfernung zwischen Funkgerät und Bluetooth-fähigem Gerät (innerhalb der maximalen Reichweite von 10 m), um wieder einen klaren Audioempfang zu erhalten. Die Bluetooth-Funktion Ihres Funkgeräts hat in 10 m Reichweite eine maximale Leistung von 2,5 mW (4 dBm).

Ihr Funkgerät unterstützt bis zu drei simultane Bluetooth-Verbindungen mit Bluetooth-fähigen Geräten verschiedener Typen. Zum Beispiel einen Kopfhörer, einen Scanner und ein PTT-Only-Device (POD). Mehrere Verbindungen mit Bluetooth-fähigen Geräten derselben Art werden nicht unterstützt.

Weitere Angaben über die Funktionalität Ihres Bluetooth-fähigen Geräts können Sie der Bedienungsanleitung des jeweiligen Bluetooth-Geräts entnehmen.

Ihr Funkgerät stellt eine Verbindung zum Bluetooth-fähigen Gerät innerhalb der Reichweite her, das entweder die höchste Signalstärke hat oder mit dem bereits zuvor eine

Verbindung hergestellt wurde. Während der Gerätesuche und der Kopplung darf weder das Bluetooth-fähige Gerät ausgeschaltet noch die Taste „Start/Zurück“ gedrückt werden, da der laufende Vorgang dadurch abgebrochen wird.

5.7.7.1

Aktivieren und Deaktivieren von Bluetooth

Führen Sie die Vorgehensweise zum Ein- und Ausschalten von Bluetooth durch.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Bluetooth`. Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis `Mein Status`.

Drücken Sie OK, um die Option auszuwählen.

Im Display wird `Ein` und `Aus` angezeigt. Der derzeitige Status wird durch ein ✓ angezeigt.

4 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie ▲ oder ▼ bis `Ein`. Drücken Sie OK, um die Option auszuwählen. Im Display wird ✓ neben `Ein` angezeigt.
- Drücken Sie ▲ oder ▼ bis `Aus`. Drücken Sie OK, um die Option auszuwählen. Im Display wird ✓ neben `Aus` angezeigt.

5.7.7.2

Verbinden mit Bluetooth-Geräten

Führen Sie die Vorgehensweise zum Verbinden mit Bluetooth-Geräten durch.

Schalten Sie das Bluetooth-fähige Gerät ein, und versetzen Sie es in den Kopplungsmodus.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Bluetooth`. Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis `Geräte`. Drücken Sie OK, um die Option auszuwählen.

4 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie ▲ oder ▼ bis zum gewünschten Gerät. Drücken Sie OK, um die Option auszuwählen.
- Drücken Sie ▲ oder ▼ bis `Geräte suchen`, um die verfügbaren Geräte zu suchen. Drücken Sie ▲ oder ▼ bis zum gewünschten Gerät.

  Drücken Sie OK, um die Option auszuwählen.

5 Drücken Sie ▲ oder ▼ bis `Verbinden`. Drücken Sie OK, um die Option auszuwählen.

Es sind möglicherweise zusätzliche Schritte erforderlich, um die Kopplung für Ihr Bluetooth-fähiges Gerät einzurichten. Weitere Informationen finden Sie im Benutzerhandbuch des Bluetooth-fähigen Geräts.

Im Display wird `Verb.aufbau <Gerät>` angezeigt.

Warten Sie auf eine Quittierung.
Bei erfolgreicher Durchführung:

- Ein positiver Hinweiston erklingt.
- Im Display wird `<Gerät> verbunden` und das Symbol Bluetooth verbunden angezeigt.
- Im Display wird ✓ neben dem verbundenen Gerät angezeigt.

Bei nicht erfolgreicher Durchführung:

- Ein negativer Hinweiston erklingt.
- Im Display wird `Verb.aufbau fehlgeschl` angezeigt.

5.7.7.3

Verbinden mit Bluetooth-Geräten im erkennbaren Bluetooth-Modus

Führen Sie die Vorgehensweise zum Anschließen von Bluetooth-Geräten im Erkennungsmodus durch.

Schalten Sie das Bluetooth-fähige Gerät ein, und versetzen Sie es in den Kopplungsmodus.

1. Drücken Sie OK, um das Menü aufzurufen.
2. Drücken Sie ▲ oder ▼ bis `Bluetooth`. Drücken Sie OK, um die Option auszuwählen.
3. Drücken Sie ▲ oder ▼ bis `Gerätesuche`. Drücken Sie OK, um die Option auszuwählen. Ihr Funkgerät kann jetzt von anderen Bluetooth-fähigen Geräten für eine programmierte Dauer gefunden werden. Dies wird als „Erkennbarer Modus“ bezeichnet.

Warten Sie auf eine Quittierung.
Bei erfolgreicher Durchführung:

- Ein positiver Hinweiston erklingt.
- Im Display wird `<Gerät> verbunden` und das Symbol **Bluetooth verbunden** angezeigt.
- Im Display wird ✓ neben dem verbundenen Gerät angezeigt.

Bei nicht erfolgreicher Durchführung:

- Ein negativer Hinweiston erklingt.
- Im Display wird `Verb.aufbau fehlgeschl` angezeigt.

5.7.7.4

Trennen von Bluetooth-Geräten

Führen Sie die Vorgehensweise zum Verbinden von Bluetooth-Geräten durch.

1. Drücken Sie OK, um das Menü aufzurufen.
2. Drücken Sie ▲ oder ▼ bis `Bluetooth`. Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis `Geräte`. Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis zum gewünschten Gerät. Drücken Sie OK, um die Option auszuwählen.

5 Drücken Sie ▲ oder ▼ bis `Trennen`. Drücken Sie OK, um die Option auszuwählen.

Im Display wird `<Gerät> wird getrennt` angezeigt.

Warten Sie auf eine Quittierung.

- Ein Hinweiston ertönt.
- Das Display zeigt `<Gerät> getrennt` und das Symbol **Bluetooth verbunden** wird ausgeblendet.
- ✓ Wird neben dem verbundenen Gerät nicht mehr angezeigt.

5.7.7.5

Umschalten des Audiosignals zwischen dem eingebauten Lautsprecher des Funkgeräts und dem Bluetooth-Gerät

Führen Sie die Vorgehensweise zum Umschalten der Audioausgabe zwischen dem internen Lautsprecher des Funkgeräts und dem Bluetooth-Gerät durch.

Drücken Sie die programmierte **Bluetooth-Audio-Umschalttaste**.

Im Display wird eines der folgenden Ergebnisse angezeigt:

- Ein Hinweiston ertönt. Das Display zeigt `Audio zu Funkg leiten` an.
- Ein Hinweiston ertönt. Im Display wird `Audio zu BT leiten` angezeigt.

5.7.7.6

Anzeigen von Gerätedetails

Führen Sie die Vorgehensweise zum Anzeigen der Gerätedetails auf Ihrem Funkgerät durch.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Bluetooth`. Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis `Geräte`. Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis zum gewünschten Gerät. Drücken Sie OK, um die Option auszuwählen.

5 Drücken Sie ▲ oder ▼ bis `Details`. Drücken Sie OK, um die Option auszuwählen.

5.7.7.7

Löschen eines Gerätenamens

Sie können ein nicht verbundenes Gerät aus der Liste der Bluetooth-fähigen Geräte entfernen.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Bluetooth`. Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis `Geräte`. Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis zum gewünschten Gerät. Drücken Sie OK, um die Option auszuwählen.

5 Drücken Sie ▲ oder ▼ bis `Löschen`. Drücken Sie OK, um die Option auszuwählen. Im Display wird `Gerät gelöscht` angezeigt.

5.7.7.8

Anpassen von Bluetooth-Mikrofonverstärkern

Ermöglicht dem Benutzer das Steuern der Mikrofonverstärkung bei den angeschlossenen Bluetooth-fähigen Geräten.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Bluetooth`. Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis `BT MikVerstärk.` Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis zum Typ des BT-Mikrofonverstärkers und den aktuellen Werten. Zum Bearbeiten der Werte drücken Sie OK.

5 Drücken Sie ▲ oder ▼, um die Werte zu erhöhen oder zu senken. Drücken Sie OK, um die Option auszuwählen.

5.7.7.9

Permanent erkennbarer Bluetooth-Modus

Der permanent erkennbare Bluetooth-Modus muss vom Händler oder Systemadministratoren aktiviert werden.

HINWEIS:
Bei Aktivierung wird `Bluetooth` nicht im Menü angezeigt und Sie können **keine** für Bluetooth programmierbaren Tastenfunktionen verwenden.

Andere Bluetooth-fähige Geräte können den Standort Ihres Funkgeräts erkennen, sich aber nicht mit dem Funkgerät verbinden. Der permanent erkennbare Bluetooth-Modus ermöglicht dedizierten Geräten die Verwendung Ihrer Funkgerätposition zur Verarbeitung von Bluetooth-basierenden Standorten.

5.7.8

Innenbereich

HINWEIS:
Die Innenbereichs-Funktion ist verfügbar für Modelle mit neuester Software und Hardware. Weitere Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator.

„Innenbereich“ kann verwendet werden, um den Standort von Funkgerätbenutzern zu verfolgen. Wenn der Innenbereich aktiviert ist, ist das Funkgerät in einem begrenzt erkennbaren Modus. Dedizierte Bakensignale werden verwendet, um das Funkgerät aufzufinden und seine Position zu bestimmen.

5.7.8.1

Ein- und Ausschalten der Funktion Innenbereich

Sie können durch Ausführen einer der folgenden Aktionen die Funktion Innenbereich ein- oder ausschalten.

- Rufen Sie diese Funktion über das Menü auf.

  a. Drücken Sie OK, um das Menü aufzurufen.

  b. Drücken Sie ▲ oder ▼ bis `Bluetooth` und drücken Sie OK zum Auswählen.

  c. Drücken Sie ▲ oder ▼ `Innenbereich` und drücken Sie OK zum Auswählen.

  d. Drücken Sie OK, um die Funktion Innenbereich zu aktivieren.

  Das Display zeigt `Innenbereich ein` an. Das Gerät gibt einen positiven Hinweiston ab. Eines der folgenden Ereignisse tritt ein.

  - Wenn erfolgreich, wird das Symbol für den verfügbaren Innenbereich auf dem Startbildschirm angezeigt.
  - Wenn nicht erfolgreich, wird im Display `Einschalten fehlgeschlagen` angezeigt. Das Gerät gibt einen negativen Hinweiston aus.

e. Drücken Sie OK zum Ausschalten der Funktion „Innenbereich“.

Das Display zeigt `Innenbereich aus` an. Das Gerät gibt einen positiven Hinweiston ab. Eines der folgenden Ereignisse tritt ein.

- Wenn erfolgreich, wird das Symbol für den verfügbaren Innenbereich auf dem Startbildschirm nicht mehr angezeigt.
- Wenn nicht erfolgreich, wird im Display `Ausschalten fehlgeschlagen` angezeigt. Das Gerät gibt einen negativen Hinweiston aus.

- Rufen Sie diese Funktion über die vorprogrammierte Taste auf.

a. Drücken Sie lang auf die vorprogrammierte Taste **Innenbereich**, um die Funktion „Innenbereich“ einzuschalten.

Das Display zeigt `Innenbereich ein` an. Das Gerät gibt einen positiven Hinweiston ab. Eines der folgenden Ereignisse tritt ein.

- Wenn erfolgreich, wird das Symbol für den verfügbaren Innenbereich auf dem Startbildschirm angezeigt.
- Wenn nicht erfolgreich, wird im Display `Einschalten fehlgeschlagen` angezeigt. Wenn nicht erfolgreich, ertönt ein negativer Hinweiston.

b. Drücken Sie die vorprogrammierte Taste **Innenbereich**, um die Funktion „Innenbereich“ auszuschalten.

Das Display zeigt `Innenbereich aus` an. Das Gerät gibt einen positiven Hinweiston ab. Eines der folgenden Ereignisse tritt ein.

- Wenn erfolgreich, wird das Symbol für den verfügbaren Innenbereich auf dem Startbildschirm nicht mehr angezeigt.
- Wenn nicht erfolgreich, wird im Display `Ausschalten fehlgeschlagen` angezeigt. Wenn nicht erfolgreich, ertönt ein negativer Hinweiston.

5.7.8.2

Zugriff auf Informationen eines Standort-Bakensignals in Innenbereichen

Gehen Sie wie folgt vor, um auf Informationen zu Innenbereich-Bakensignalen zuzugreifen.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Bluetooth` und drücken Sie OK zum Auswählen.

3 Drücken Sie ▲ oder ▼ `Innenbereich` und drücken Sie OK zum Auswählen.

4 Drücken Sie ▲ oder ▼ bis `Sender` und drücken Sie OK zum Auswählen.

Im Display werden Bakensignal-Informationen angezeigt.

5.7.9

Multi-Site-Bedienelemente

Diese Funktionen gelten, wenn Ihr aktueller Funkkanal für ein Capacity Max-System konfiguriert ist.

5.7.9.1

Starten einer manuellen Stationssuche

Führen Sie die Vorgehensweise zum Starten der manuellen Standortsuche aus, sobald die empfangene Signalstärke schwach ist, um einen Standort mit besserer Signalstärke zu finden.

1 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie die programmierte Taste **Manuelles Standort-Roaming**. Überspringen Sie die folgenden Schritte.
- Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Dienstprogramme`.Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis `Funkgeräteinstellungen`.Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis `Roaming`. Drücken Sie OK, um die Option auszuwählen.

5 Drücken Sie ▲ oder ▼ bis `Aktive Suche`.

Drücken Sie OK, um die Option auszuwählen.

Ein Hinweiston ertönt.Die grüne LED blinkt.Das Display zeigt `Stationssuche` an.

Sobald das Funkgerät einen neuen Standort gefunden hat, passiert Folgendes:

- Ein positiver Hinweiston erklingt.
- Die LED erlischt.
- Im Display wird `Station <Alias> gefunden` angezeigt.

Wenn das Funkgerät keinen neuen Standort gefunden hat, passiert Folgendes:

- Ein negativer Hinweiston erklingt.
- Die LED erlischt.
- Im Display wird `Auss. Reichw.` angezeigt.

Wird eine neue Station innerhalb der Reichweite gefunden, aber das Funkgerät kann keine Verbindung herstellen, passiert Folgendes:

- Ein negativer Hinweiston erklingt.
- Die LED erlischt.
- Im Display wird `Kanal belegt` angezeigt.

5.7.9.2
Funkstation sperren/entsperren

Wenn diese Option aktiviert ist, sucht das Funkgerät nur den aktuellen Standort. Ist diese Option deaktiviert, sucht das Funkgerät neben dem aktuellen Standort auch nach anderen Standorten.

Drücken Sie die programmierte Taste **Funkstationsperre**.

Wenn die **Standortsperre** eingeschaltet ist:

- Sie hören einen positiven Hinweiston, der darauf hinweist, dass das Funkgerät gesperrt ist und den aktuellen Standort nicht verlassen kann.
- Im Display wird `Station gesperrt` angezeigt.

Wenn die **Standortsperre** ausgeschaltet ist:

- Sie hören einen negativen Hinweiston, der darauf hinweist, dass das Funkgerät entsperrt ist.
- Im Display wird `Station entsperrt` angezeigt.

5.7.9.3

Zugriff auf Nachbarstandortliste

Diese Funktion ermöglicht dem Benutzer die Überprüfung der benachbarten Standortliste des aktuellen Home-Standorts. Führen Sie die Vorgehensweise zum Zugriff auf die benachbarte Standortliste aus:

1. Drücken Sie OK, um das Menü aufzurufen.
2. Drücken Sie ▲ oder ▼ bis `Dienstprogramme`.Drücken Sie OK, um die Option auszuwählen.
3. Drücken Sie ▲ oder ▼ bis `Geräteinfo`. Drücken Sie OK, um die Option auszuwählen.
4. Drücken Sie ▲ oder ▼ bis `Nachb.-Stando..` Drücken Sie OK, um die Option auszuwählen.

5.7.10

Home-Kanalerinnerung

Diese Funktion aktiviert eine Erinnerung, wenn der Home-Kanal auf dem Funkgerät für eine gewisse Zeit nicht eingestellt ist.

Wenn diese Funktion aktiviert ist, erfolgt in regelmäßigen Abständen Folgendes, falls das Funkgerät für einen bestimmten Zeitraum nicht als Home-Kanal festgelegt ist:

- Der Erinnerungston und die Ansage des Home-Kanals erklingen.

- In der ersten Zeile des Displays wird `Nicht-` angezeigt.
- In der zweiten Zeile wird `Home-Kanal` angezeigt.

5.7.10.1

Stummschalten der Home-Kanalerinnerung

Wenn eine Home-Kanalerinnerung ertönt, können Sie die Erinnerung vorübergehend stummschalten.

Drücken Sie die programmierbare Taste **Home-Kanalerinnerung stummschalten**.

In der ersten Zeile des Displays wird `HCR` und in der zweiten Zeile `Stumm` angezeigt.

5.7.10.2

Einrichten eines neuen Home-Kanals

Wenn eine Home-Kanalerinnerung eintritt, können Sie einen neuen Home-Kanal einrichten.

1 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie die programmierbare Taste **Home-Kanal zurücksetzen**, um den aktuellen Kanal als neuen Home-Kanal festzulegen. Überspringen Sie die folgenden Schritte.
  In der ersten Zeile des Displays wird der Kanal-Aliasname und in der zweiten Zeile `Neuer Home-K.` angezeigt.
- Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Dienstprogramme`.Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis `Funkgeräteinstellungen`.Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis `Home-Kanal`. Drücken Sie OK, um die Option auszuwählen.

5 Drücken Sie ▲ oder ▼ bis zum gewünschten neuen Home-Kanal-Alias. Drücken Sie OK, um die Option auszuwählen.

Das Display zeigt ✓ neben dem ausgewählten Home-Kanal-Alias an.

5.7.11

Fernüberwachung

Mit dieser Funktion kann das Mikrofon des Zielfunkgeräts mit einem Funkgeräte-Alias oder einer Funkgeräte-ID eingeschaltet werden. Diese Funktion kann zur Fernüberwachung jeglicher hörbarer Aktivität rund um das Zielfunkgerät eingesetzt werden.

Ihr Funkgerät und das Zielfunkgerät müssen beide für die Nutzung dieser Funktion konfiguriert sein.

Wenn initiiert, blinkt die grüne LED einmal am Ziel-Funkgerät. Diese Funktion wird nach Ablauf einer vorprogrammierten Zeitdauer bzw. dann, wenn das Zielfunkgerät in Betrieb ist, automatisch ausgeschaltet.

5.7.11.1

Einleiten des Fernmonitors

Führen Sie die Vorgehensweise zum Einleiten der Fernüberwachung auf Ihrem Funkgerät durch.

1 Drücken Sie die programmierte Taste **Fern-Monitor**.

2 Drücken Sie ▲ oder ▼ bis zum gewünschten Aliasnamen oder zur gewünschten ID.Drücken Sie OK, um die Option auszuwählen.

Im Display wird eine Zwischenstand-Kurznotiz angezeigt und damit bestätigt, dass die Anfrage ausgeführt wird. Die grüne LED leuchtet.

3 Warten Sie auf eine Quittierung.

Bei erfolgreicher Durchführung:

- Ein positiver Hinweiston erklingt.
- Im Display wird ein positiver Kurzhinweis angezeigt.
- Die Audiosignale vom überwachten Funkgerät werden für die programmierte Dauer wiedergegeben, und auf dem Display wird Fern

angezeigt. Mon angezeigt. Nach Ablauf dieser Zeit ertönt ein Hinweiston, und die LED erlischt.

Bei nicht erfolgreicher Durchführung:

- Ein negativer Hinweiston erklingt.
- Im Display wird ein negativer Kurzhinweis angezeigt.

5.7.11.2

Einleiten der Fernüberwachung mithilfe der Kontaktliste

Führen Sie die Vorgehensweise zum Einleiten der Fernüberwachung auf Ihrem Funkgerät mithilfe der Kontaktliste durch.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis Kontakte.Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis zum gewünschten Aliasnamen oder zur gewünschten ID.Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis Fernmonitor.

Drücken Sie OK, um die Option auszuwählen.

Im Display wird eine Zwischenstand-Kurznotiz angezeigt und damit bestätigt, dass die Anfrage ausgeführt wird. Die grüne LED leuchtet.

5 Warten Sie auf eine Quittierung.

Bei erfolgreicher Durchführung:

- Ein positiver Hinweiston erklingt.
- Im Display wird ein positiver Kurzhinweis angezeigt.
- Die Audiosignale vom überwachten Funkgerät werden für die programmierte Dauer wiedergegeben, und auf dem Display wird Fern angezeigt. Mon angezeigt. Nach Ablauf dieser Zeit ertönt ein Hinweiston, und die LED erlischt.

Bei nicht erfolgreicher Durchführung:

- Ein negativer Hinweiston erklingt.
- Im Display wird ein negativer Kurzhinweis angezeigt.

5.7.11.3

Einleiten der Fernüberwachung durch manuelles Wählen

Führen Sie die Vorgehensweise zum Einleiten der Fernüberwachung auf Ihrem Funkgerät über manuelles Wählen durch.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Kontakte`. Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis `Man. Wählen`. Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis `Funkgerät-Nr.` Drücken Sie OK, um die Option auszuwählen.

5 Führen Sie einen der folgenden Schritte aus:
- Geben Sie den Funkgerät-Alias oder die ID ein, und drücken Sie OK, um fortzufahren.
- Bearbeiten Sie die zuvor gewählte ID, und drücken Sie OK, um fortzufahren.

6 Drücken Sie ▲ oder ▼ bis `Fernmonitor`. Drücken Sie OK, um die Option auszuwählen.

Im Display wird eine Zwischenstand-Kurznotiz angezeigt und damit bestätigt, dass die Anfrage ausgeführt wird. Die grüne LED leuchtet.

7 Warten Sie auf eine Quittierung.

Bei erfolgreicher Durchführung:
- Ein positiver Hinweiston erklingt.

- Im Display wird ein positiver Kurzhinweis angezeigt.
- Die Audiosignale vom überwachten Funkgerät werden für die programmierte Dauer wiedergegeben, und auf dem Display wird `Fern` angezeigt. `Mon` angezeigt. Nach Ablauf dieser Zeit ertönt ein Hinweiston, und die LED erlischt.

Bei nicht erfolgreicher Durchführung:

- Ein negativer Hinweiston erklingt.
- Im Display wird ein negativer Kurzhinweis angezeigt.

5.7.12

Kontakteinstellungen

Über Kontakte wird Ihr Funkgerät mit einer Adressbuchfunktion ausgestattet. Jeder Eintrag entspricht einem Aliasnamen bzw. einer ID, die Sie zur Rufeinleitung verwenden. Die Einträge sind in alphabetischer Reihenfolge sortiert.

Jeder Eintrag wird je nach Kontext mit einem anderen Ruftyp assoziiert: Gruppenruf, Einzelruf, Ansageruf, Standort-Rundruf, Durchsageruf, PC-Ruf oder Zentralruf.

PC- und Zentralrufe sind mit Daten verbunden. Diese Ruftypen sind nur mit entsprechenden Anwendungen verfügbar. Ausführliche Informationen hierzu finden Sie in den Handbüchern der Datenanwendungen.

Außerdem können Sie über das Kontakte-Menü jedem Eintrag eine oder mehrere programmierbare Zifferntasten an einem Tastenfeld-Mikrofon zuweisen. Wenn ein Eintrag einer Zifferntaste zugeordnet ist, können Sie von dem Eintrag aus eine Schnellwahl durchführen.

HINWEIS:
Vor jeder Zifferntaste, die einem Eintrag zugewiesen ist, wird eine Markierung angezeigt. Wenn sich die Markierung vor `Leer` befindet, haben Sie diesem Eintrag noch keine Zifferntaste zugewiesen.

Jeder Eintrag setzt sich aus den folgenden Feldern zusammen:

- Rufart
- Ruf-Alias
- Ruf-ID

HINWEIS:
Ist die Verschlüsselungsfunktion für einen Kanal aktiviert, können Sie auf diesem Kanal Gruppenrufe, Einzelrufe, Rundumrufe und Telefonrufe mit aktivierter Verschlüsselung durchführen. Ausschließlich Funkgeräte mit demselben Privacy-Key oder demselben Schlüsselwert und derselben Schlüssel-ID wie Ihr Funkgerät können die Übertragung entschlüsseln.

5.7.12.1

Zuweisen von Einträgen zu programmierbaren Zifferntasten

Führen Sie die Vorgehensweise zum Zuweisen von Einträgen zu programmierbaren Zifferntasten auf Ihrem Funkgerät durch.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Kontakte`. Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis zum gewünschten Aliasnamen oder zur gewünschten ID. Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis `Progr.-Taste`. Drücken Sie OK, um die Option auszuwählen.

5 Führen Sie einen der folgenden Schritte aus:

- Wenn die gewünschte Zifferntaste keinem Eintrag zugewiesen wurde, drücken Sie ▲ oder ▼ bis zur gewünschten Zifferntaste. Drücken Sie OK, um die Option auszuwählen.
- Wenn die gewünschte Zifferntaste einem Eintrag zugewiesen wurde, wird im Display `Die Taste ist bereits zugewiesen` und dann in der ersten Textzeile `Überschreiben?` angezeigt. Führen Sie einen der folgenden Schritte aus: Drücken Sie ▲ oder ▼ bis `Ja`. Drücken Sie OK, um die Option auszuwählen.

Das Funkgerät gibt einen positiven Hinweiston aus, und im Display wird das positive Kurzhinweissymbol `Kontakt gesichert` sowie ein positiver Kurzhinweis angezeigt.

Drücken Sie ▲ oder ▼ bis `Nein`, um zum vorherigen Schritt zurückzukehren.

5.7.12.2

Aufheben von Zuordnungen zwischen Einträgen und programmierbaren Zifferntasten

Führen Sie die Vorgehensweise zum Aufheben der Zuordnungen zwischen Einträgen und programmierbaren Zifferntasten auf Ihrem Funkgerät durch.

1 Führen Sie einen der folgenden Schritte aus:

- Halten Sie die programmierte Zifferntaste für den gewünschten Aliasnamen oder die ID gedrückt. Lesen Sie weiter unter Schritt 4.
- Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Kontakte`. Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis zum gewünschten Aliasnamen oder zur gewünschten ID. Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis `Progr.-Taste`. Drücken Sie OK, um die Option auszuwählen.

5 Drücken Sie ▲ oder ▼ bis `Leer`. Drücken Sie OK, um die Option auszuwählen.

Die erste Textzeile zeigt `AlleT.löschen` an.

6 Drücken Sie ▲ oder ▼ bis `Ja`. Drücken Sie OK, um die Option auszuwählen.

HINWEIS:
Die Verbindung zwischen einem Eintrag und seiner bzw. seinen vorprogrammierten Zifferntaste(n) wird aufgehoben, wenn der Eintrag gelöscht wird.

Ein positiver Hinweiston erklingt. Im Display wird `Kontakt gespeichert` angezeigt.
Der Bildschirm wechselt automatisch zum vorherigen Menü.

5.7.12.3

Hinzufügen neuer Kontakte

Führen Sie die Vorgehensweise zum Hinzufügen neuer Kontakte auf Ihrem Funkgerät durch.

1. Drücken Sie OK, um das Menü aufzurufen.
2. Drücken Sie ▲ oder ▼ bis `Kontakte`.Drücken Sie OK, um die Option auszuwählen.
3. Drücken Sie ▲ oder ▼ bis `Neuer Kontakt`.

   Drücken Sie OK, um die Option auszuwählen.
4. Drücken Sie ▲ oder ▼ zum Auswählen des Kontakttyps `Funkg.-Kontakt` oder

   `Telefonkontakt`. Drücken Sie OK, um die Option auszuwählen.
5. Geben Sie die Nummer des Kontakts mit der

   Tastatur ein, und drücken Sie OK, um fortzufahren.
6. Geben Sie den Namen des Kontakts mit der

   Tastatur ein, und drücken Sie OK, um fortzufahren.

7 Drücken Sie ▲ oder ▼ bis zum gewünschten Ruftontyp. Drücken Sie OK, um die Option auszuwählen.

Ein positiver Hinweiston erklingt.Im Display wird ein positiver Kurzhinweis angezeigt.

5.7.13

Rufanzeigeeinstellungen

Mit dieser Funktion können Funkgerätebenutzer Ruftöne für Rufe oder Textnachrichten konfigurieren.

5.7.13.1

Aktivieren und Deaktivieren von Ruftönen für Einzelrufe

Führen Sie die Vorgehensweise zum Aktivieren oder Deaktivieren von Ruftönen für Einzelrufe auf Ihrem Funkgerät durch.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Dienstprogramme`. Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis `Funkgeräteinstellungen`. Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis `Töne/Hinweistöne`. Drücken Sie OK, um die Option auszuwählen.

5 Drücken Sie ▲ oder ▼ bis `Ruftöne`. Drücken Sie OK, um die Option auszuwählen.

6 Drücken Sie ▲ oder ▼ bis `Einzelruf`. Drücken Sie OK, um die Option auszuwählen.

7 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie ▲ oder ▼ bis zum gewünschten Hinweiston. Drücken Sie OK, um die Option auszuwählen.
  Auf dem Display wird ✓ und der ausgewählte Ton angezeigt.
- Drücken Sie ▲ oder ▼ bis Aus. Drücken Sie OK, um die Option auszuwählen.
  Wenn die Töne früher aktiviert wurden, wird auf dem Display ✓ neben Aus angezeigt.
  Wenn die Töne früher deaktiviert wurden, wird auf dem Display ✓ neben Aus angezeigt.

5.7.13.2

Aktivieren und Deaktivieren von Ruftönen für Textnachrichten

Führen Sie die Vorgehensweise zum Aktivieren und Deaktivieren von Ruftönen für Textnachrichten auf Ihrem Funkgerät durch.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis Dienstprogramme.
Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis Funkgeräteinstellungen. Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis Töne/Hinweistöne.
Drücken Sie OK, um die Option auszuwählen.

5 Drücken Sie ▲ oder ▼ bis Ruftöne. Drücken Sie OK, um die Option auszuwählen.

6 Drücken Sie ▲ oder ▼ bis Textnachricht.
Drücken Sie OK, um die Option auszuwählen.
Im Display wird ✓ und der aktuelle Hinweiston angezeigt.

7 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie ▲ oder ▼ bis zum gewünschten Hinweiston. Drücken Sie OK, um die Option auszuwählen.
  Auf dem Display wird ✓ und der ausgewählte Ton angezeigt.
- Drücken Sie ▲ oder ▼ bis Aus. Drücken Sie OK, um die Option auszuwählen.
  Wenn die Töne früher aktiviert wurden, wird auf dem Display ✓ neben Aus angezeigt.

  Wenn die Töne früher deaktiviert wurden, wird auf dem Display ✓ neben Aus angezeigt.

5.7.13.3

Aktivieren und Deaktivieren von Ruftönen für Rufhinweise

Führen Sie die Vorgehensweise zum Aktivieren oder Deaktivieren von Ruftönen für Rufhinweise auf Ihrem Funkgerät durch.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis Dienstprogramme.Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis Funkgeräteinstellungen.Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis Hinweistöne.
Drücken Sie OK, um die Option auszuwählen.

5 Drücken Sie ▲ oder ▼ bis Ruftöne. Drücken Sie OK, um die Option auszuwählen.

6 Drücken Sie ▲ oder ▼ bis Hinweiston. Drücken Sie OK, um die Option auszuwählen.

7 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie ▲ oder ▼ bis zum gewünschten Hinweiston. Drücken Sie OK, um die Option auszuwählen.
  Auf dem Display wird ✓ und der ausgewählte Ton angezeigt.
- Drücken Sie ▲ oder ▼ bis Aus. Drücken Sie OK, um die Option auszuwählen.
  Wenn die Töne früher aktiviert wurden, wird auf dem Display ✓ neben Aus angezeigt.
  Wenn die Töne früher deaktiviert wurden, wird auf dem Display ✓ neben Aus angezeigt.

5.7.13.4

Aktivieren und Deaktivieren von Ruftönen für Telemetriestatus mit Text

Führen Sie die Vorgehensweise zum Aktivieren oder Deaktivieren von Ruftönen für den Telemetriestatus mit Text auf Ihrem Funkgerät durch.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis Dienstprogramme.
Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis Funkgeräteinstellungen. Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis Hinweistöne.
Drücken Sie OK, um die Option auszuwählen.

5 Drücken Sie ▲ oder ▼ bis Ruftöne. Drücken Sie OK, um die Option auszuwählen.

6 Drücken Sie ▲ oder ▼ bis Telemetrie. Drücken Sie OK, um die Option auszuwählen.
Der derzeitige Ton wird durch ein ✓ angezeigt.

7 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie ▲ oder ▼ bis zum gewünschten Hinweiston. Drücken Sie OK, um die Option auszuwählen.
  Im Display wird `Ton <Nummer> ausgewählt` angezeigt, und links neben dem eingestellten Ton wird ✓ eingeblendet.
- Drücken Sie ▲ oder ▼ bis `Abschalten`.
  Drücken Sie OK, um die Option auszuwählen.
  Im Display wird `Telemetrie Ruft.Aus` angezeigt, und ein ✓ wird links neben `Abschalten` angezeigt.

5.7.13.5

Zuweisen von Ruftontypen

Sie können Ihr Funkgerät so konfigurieren, dass es einen von zehn vordefinierten Hinweistönen ausgibt, wenn es einen Rufhinweis oder eine Textnachricht von einem bestimmten Kontakt erhält. Wenn Sie die Liste der Ruftöne durchgehen, ertönt bei jedem Eintrag jeweils der eingestellte Rufton. Führen Sie die Vorgehensweise zum Zuweisen von Ruftontypen auf Ihrem Funkgerät durch.

1. Drücken Sie OK, um das Menü aufzurufen.
2. Drücken Sie ▲ oder ▼ bis `Kontakte`. Drücken Sie OK, um die Option auszuwählen.
   Die Einträge sind in alphabetischer Reihenfolge sortiert.
3. Drücken Sie ▲ oder ▼ bis zum gewünschten Aliasnamen oder zur gewünschten ID. Drücken Sie OK, um die Option auszuwählen.
4. Drücken Sie ▲ oder ▼ bis `Bearbeiten`. Drücken Sie OK, um die Option auszuwählen.
5. Drücken Sie OK, bis im Display das Menü `Rufton bearbeiten` angezeigt wird.
   Ein ✓ zeigt den derzeit ausgewählten Ton an.

6 Drücken Sie ▲ oder ▼ bis zum gewünschten Hinweiston. Drücken Sie OK, um die Option auszuwählen.

Im Display wird ein positiver Kurzhinweis angezeigt.

5.7.13.6

Auswählen eines Rufhinweistyps

HINWEIS:
Die programmierte Taste **Klingelton** wird von Ihrem Händler oder Systemadministrator zugeordnet. Klären Sie mit Ihrem Händler oder Systemadministrator, wie das Funkgerät konfiguriert wurde.

Sie können die Funkrufe auf einen vorprogrammierten Vibrations-Ton einstellen. Wenn „Alle Töne“ deaktiviert ist, zeigt das Funkgerät das Symbol „Alle Töne stumm“ an. Wenn „Alle Töne“ aktiviert ist, wird der zugehörige Klingelton angezeigt.

Bei einem kurzen Klingelton vibriert das Funkgerät einmal. Bei einem sich wiederholenden Klingelton vibriert das Funkgerät mehrmals. Bei der Einstellung „Klingeln und Vibrieren“ gibt das Funkgerät bei einer eingehenden Übertragung (z. B. Rufhinweis oder Nachricht) einen speziellen Klingelton aus. Dieser klingt wie ein Bestätigungston oder ein Ton bei einem verpassten Ruf.

Für Funkgeräte mit Akkus, die die Funktion „Vibrieren“ unterstützen und an einem vibrierenden Gürtelclip befestigt sind, sind die zur Verfügung stehen Optionen für den Rufhinweistyp: Stumm, Klingeln, Vibrieren sowie Klingeln und Vibrieren.

Für Funkgeräte mit Akkus, die die Funktion „Vibrieren“ nicht unterstützen und nicht an einem vibrierenden Gürtelclip befestigt sind, ist der Rufhinweistyp automatisch auf „Klingeln“ eingestellt.Die verfügbaren Optionen für Rufhinweistypen sind „Stumm” und „Klingeln”.

Sie können einen Rufhinweistontyp durch eine der folgenden Maßnahmen auswählen.

- Drücken Sie die vorprogrammierte Taste **Art des Hinweistons bei Anruf**, um auf das Menü für die Art des Hinweistons zuzugreifen.
  a. Drücken Sie ▲ oder ▼ zu `Klingeln`, `Vibrieren`, `Klingeln und Vibrieren` oder `Stiller Klingelton` und drücken Sie OK zum Auswählen.

- Rufen Sie diese Funktion über das Menü auf.

  a. Drücken Sie OK, um das Menü aufzurufen.

  b. Drücken Sie ▲ oder ▼ zu `Einstellungen` und drücken Sie OK zum Auswählen.

  c. Drücken Sie ▲ oder ▼ zu `Funkgeräteinstellungen` und drücken Sie OK zum Auswählen.

  d. Drücken Sie ▲ oder ▼ zu `Hinweistöne` und drücken Sie OK zum Auswählen.

  e. Drücken Sie ▲ oder ▼ zu `Rufhinweistyp` und drücken Sie OK zum Auswählen.

  f. Drücken Sie ▲ oder ▼ bis `Klingeln`, `Vibrieren`, `Klingeln und Vibrieren` oder `Still`, und drücken Sie OK zum Auswählen.

5.7.13.7

Konfigurieren der Vibrationsart

HINWEIS:
Die programmierte Taste **Vibrationsart** wird von Ihrem Händler oder Systemadministrator zugeordnet. Klären Sie mit Ihrem Händler oder Systemadministrator, wie das Funkgerät konfiguriert wurde.

„Vibrationsart“ ist aktiviert, wenn der vibrierende Gürtelclip am Funkgerät mit einem Akku angeschlossen ist, der die Vibrationsfunktion unterstützt.

Sie können die Vibrationsart durch eine der folgenden Maßnahmen konfigurieren.

- Drücken Sie die vorprogrammierte Taste **Vibrationsart**, um auf das Menü „Vibrationsart“ zuzugreifen.

  a. Drücken Sie ▲ oder ▼ zu `Kurz`, `Mittel` oder `Lang` und drücken Sie OK zum Auswählen.

- Rufen Sie diese Funktion über das Menü auf.

  a. Drücken Sie OK, um das Menü aufzurufen.

b. Drücken Sie ▲ oder ▼ zu `Einstellungen` und drücken Sie OK zum Auswählen.

c. Drücken Sie ▲ oder ▼ zu `Funkgeräteinstellungen` und drücken Sie OK zum Auswählen.

d. Drücken Sie ▲ oder ▼ zu `Hinweistöne` und drücken Sie OK zum Auswählen.

e. Drücken Sie ▲ oder ▼ zu `Vibrationsart` und drücken Sie OK zum Auswählen.

f. Drücken Sie ▲ oder ▼ bis `Kurz`, `Mittel` oder `Lang`, und drücken Sie OK zum Auswählen.

5.7.13.8

Zunehmende Alarmtonlautstärke

Das Funkgerät kann so programmiert werden, dass Sie kontinuierlich erinnert werden, wenn ein Funkruf noch unbeantwortet ist. Dieser Dauerhinweis erfolgt dadurch, dass der Alarmton automatisch zunehmend lauter wird.

Diese Funktion wird als Escalert bezeichnet. Führen Sie die Vorgehensweise für die zunehmende Lautstärke auf Ihrem Funkgerät aus.

5.7.14

Funktionen des Rufprotokolls

Das Funkgerät führt ein Protokoll aller kürzlich durchgeführten, beantworteten und entgangenen Einzelrufe. Das Rufprotokoll kann zur Ansicht und Verwaltung kürzlich durchgeführter Anrufe verwendet werden.

Die Rufhinweise zu entgangenen Anrufen werden in den Rufprotokollen aufgenommen; dies ist abhängig von der Systemkonfiguration Ihres Funkgeräts. In jeder Rufliste können die folgenden Funktionen durchgeführt werden:

- Aliasnamen oder IDs können in „Kontakte“ gespeichert werden
- Anruf löschen
- Details

5.7.14.1

Anzeigen der letzten Anrufe

Führen Sie die Vorgehensweise zum Anzeigen der letzten Rufe auf Ihrem Funkgerät durch.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Rufprotokoll`.

Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis zur gewünschten Liste. Zur Auswahl stehen die Listen `Verpasst`, `Beantwortet` und `Abgehend`.

Drücken Sie OK, um die Option auszuwählen.

Auf dem Display wird der neueste Eintrag angezeigt.

4 Drücken Sie ▲ oder ▼, um die Liste anzuzeigen.

Sie können einen Einzelruf mit dem Aliasnamen oder der ID auf dem Display starten, indem Sie die **PTT**-Taste drücken.

5.7.14.2

Speichern von Aliasnamen oder IDs aus der Rufliste

Führen Sie die Vorgehensweise zum Speichern von Aliasnamen oder IDs auf Ihrem Funkgerät aus der Rufliste durch.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Rufprotokoll`.

Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis zur gewünschten Liste.

Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis zum gewünschten Aliasnamen oder zur gewünschten ID. Drücken Sie OK, um die Option auszuwählen.

5 Drücken Sie ▲ oder ▼ bis `Speichern`. Drücken Sie OK, um die Option auszuwählen.

Im Display wird ein blinkender Cursor angezeigt.

6 Geben Sie die übrigen Zeichen des gewünschten Aliasnamens ein. Drücken Sie OK, um die Option auszuwählen.

Eine ID kann ohne einen Aliasnamen gespeichert werden.

Im Display wird ein positiver Kurzhinweis angezeigt.

5.7.14.3

Löschen von Rufen aus der Rufliste

Führen Sie die Vorgehensweise zum Löschen von Rufen aus der Rufliste auf Ihrem Funkgerät durch.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Rufprotokoll`.

Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis zur gewünschten Liste.

Drücken Sie OK, um die Option auszuwählen.

Wenn die Liste leer ist:

- Ein Hinweiston ertönt.
- Auf dem Display wird `Liste leer` angezeigt.

4 Drücken Sie ▲ oder ▼ bis zum gewünschten Aliasnamen oder zur gewünschten ID. Drücken Sie OK, um die Option auszuwählen.

5 Drücken Sie ▲ oder ▼ bis `Eintrag löschen?`.

Drücken Sie OK, um die Option auszuwählen.

6 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie OK, um Ja auszuwählen und den Eintrag zu löschen.
  Im Display wird Eintrag gelöscht angezeigt.
- Drücken Sie ▲ oder ▼ bis Nein. Drücken Sie OK, um die Option auszuwählen.
  Das Funkgerät wechselt zum vorherigen Bildschirm.

5.7.14.4

Anzeigen von Details aus der Rufliste

Führen Sie die Vorgehensweise zum Anzeigen von Details aus der Rufliste auf Ihrem Funkgerät durch.

1. Drücken Sie OK, um das Menü aufzurufen.
2. Drücken Sie ▲ oder ▼ bis Rufprotokoll.
   Drücken Sie OK, um die Option auszuwählen.
3. Drücken Sie ▲ oder ▼ bis zur gewünschten Liste.
   Drücken Sie OK, um die Option auszuwählen.
4. Drücken Sie ▲ oder ▼ bis zum gewünschten Aliasnamen oder zur gewünschten ID. Drücken Sie OK, um die Option auszuwählen.
5. Drücken Sie ▲ oder ▼ bis Details. Drücken Sie OK, um die Option auszuwählen.
   Auf dem Display werden die Details angezeigt.

5.7.15

Rufhinweise

Paging mit Rufhinweis erlaubt Ihnen, einen bestimmten Funkgerätbenutzer dazu aufzufordern, Sie bei nächster Gelegenheit zurückzurufen.

Diese Funktion kann nur für Aliasnamen bzw. IDs von Funkgeräten eingesetzt werden und ist über das Menü via „Kontakte“ oder eine vorprogrammierte **Eintastenzugang**-Taste verfügbar.

In Capacity Max ermöglichen Rufhinweise dem Funkgerätenutzer oder dem Dispatcher, eine Warnmeldung an einen anderen Funkgerätenutzer zu senden, um den initialisierenden Funkgerätenutzer bei Verfügbarkeit zurückzurufen. Diese Funktion umfasst keine Sprachkommunikation.

Rufhinweise können durch den Händler oder Systemadministrator mithilfe von zwei verschiedenen Methoden konfiguriert werden:

- Das Funkgerät wird so konfiguriert, dass der Benutzer die Sendetaste (**PTT**) drücken kann, um dem Anrufinitiator direkt über einen Einzelruf zu antworten.
- Das Funkgerät wird so konfiguriert, dass der Benutzer die Sendetaste (**PTT**) drücken kann und mit einer anderen Gesprächsgruppenkommunikation fortfährt. Durch Drücken der Sendetaste (**PTT**) bei Eingang eines Rufhinweises ist der Benutzer nicht in der Lage, dem Anrufinitiator zu antworten. Der Benutzer muss zu Protokoll der entgangenen Rufe im Menü „Ruf-Log“ navigieren und von dort aus auf den Rufhinweis antworten.

Ein OACSU-Einzelruf (Off Air Call Set-Up-Einzelruf) ermöglicht dem Benutzer, sofort zu antworten, während ein FOACSU-Einzelruf (Full Off Air Call Set-Up-Einzelruf) eine Benutzerbestätigung für den Ruf erfordert. OACSU-Rufe werden daher für die Rufhinweis-Funktion empfohlen. Siehe Einzelruf auf Seite 83.

5.7.15.1
Tätigen von Rufhinweisen

Führen Sie die Vorgehensweise zum Tätigen von Rufhinweisen auf Ihrem Funkgerät aus.

1. Drücken Sie die vorprogrammierte **Schnellwahltaste**.

   Im Display wird `Hinweiston` und der Aliasname oder die ID des Funkgeräts angezeigt. Die grüne LED leuchtet.

2. Warten Sie auf eine Quittierung.

   Wird die Rufhinweis-Quittierung empfangen, wird im Display der positive Kurzhinweis angezeigt.

   Wird die Rufhinweis-Quittierung nicht empfangen, wird im Display der negative Kurzhinweis angezeigt.

5.7.15.2

Tätigen von Rufhinweisen mithilfe der Kontaktliste

Führen Sie die Vorgehensweise zum Tätigen von Rufhinweisen mithilfe der Kontaktliste auf Ihrem Funkgerät durch.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis Kontakte. Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis zum gewünschten Aliasnamen oder zur gewünschten ID.Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis Hinweiston. Drücken Sie OK, um die Option auszuwählen.

Im Display wird Hinweiston und der Aliasname oder die ID des Funkgeräts angezeigt. Die grüne LED leuchtet.

5 Warten Sie auf eine Quittierung.

- Wird die Rufhinweis-Quittierung empfangen, wird im Display der positive Kurzhinweis angezeigt.
- Wird die Rufhinweis-Quittierung nicht empfangen, wird im Display der negative Kurzhinweis angezeigt.

5.7.15.3

Antworten auf Rufhinweise

Führen Sie die Vorgehensweise zum Antworten auf Rufhinweise auf Ihrem Funkgerät durch.

Wenn Sie einen Rufhinweis erhalten:

- Ein wiederholter Hinweiston erklingt.
- Die gelbe LED blinkt.

- Auf dem Display wird die Liste der Benachrichtigungen mit einem Rufhinweiseintrag mit dem Alias oder der ID des anrufenden Funkgeräts angezeigt.

  Anhängig von der Konfiguration durch den Händler oder Systemadministrator können Sie auf einen Rufhinweis folgendermaßen reagieren:

  - Drücken Sie die **Sendetaste (PTT)**, und antworten Sie dem Anrufer direkt mit einem Einzelruf.
  - Drücken Sie die **Sendetaste (PTT)**, um die Gesprächsgruppenkommunikation fortzuführen. Der Rufhinweis wird in die Option „Entgangene Rufe“ im Menü „Ruf-Log“ verschoben. Sie können aus dem Verlauf der entgangenen Rufe heraus dem Anrufer antworten.

Weitere Informationen finden Sie unter Benachrichtigungsliste auf Seite 179 und Funktionen des Rufprotokolls auf Seite 131.

5.7.16

Stummschaltmodus

Der Stummschalt-Modus stellt dem Benutzer eine Möglichkeit zur Verfügung, sämtliche akustischen Signale des Funkgeräts stummzuschalten.

Sobald der Stummschalt-Modus initiiert wurde, werden alle akustischen Signale stummgeschaltet, mit Ausnahme der Funktionen mit höherer Priorität wie etwa Notfall-Funktionen.

Beim Beenden des Stummschalt-Modus nimmt das Funkgerät die Wiedergabe von laufenden Tönen oder Audio-Übertragungen wieder auf.

HINWEIS:
Dies ist eine käufliche Funktion. Weitere Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator.

5.7.16.1

Einschalten des Stummschalt-Modus

Führen Sie die Vorgehensweise zum Einschalten des Stummschalt-Modus durch.

Führen Sie einen der folgenden Schritte aus:

- Rufen Sie diese Funktion über die programmierte Taste **Stummschalt-Modus** auf.
- Der Zugriff auf diese Funktion erfolgt, indem Sie das Funkgerät kurzzeitig mit dem Display nach unten hinlegen.

Abhängig von Funkgerätemodell kann die Display nach unten-Funktion über das Funkgerätemenü oder vom Systemadministrator aktiviert werden. Weitere Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator.

WICHTIG:
Der Benutzer kann zu einem bestimmten Zeitpunkt nur die Totmann-Funktion oder die Display nach unten-Funktion aktivieren. Die beiden Funktionen können nicht gleichzeitig aktiviert werden.

HINWEIS:
Display nach unten Funktion gilt nur für DP4601e .

Folgendes geschieht, wenn der Stummschalt-Modus aktiviert ist:

- Positiver Hinweiston erklingt.
- Auf dem Display wird `Stummschalt-Modus Ein` angezeigt.
- Die rote LED beginnt zu blinken und blinkt weiter, bis der Stummschalt-Modus beendet wird.
- Auf dem Display wird das Symbol **Stummschalt-Modus** auf der Startseite angezeigt.
- Das Funkgerät wird stummgeschaltet.
- Der Stummschalt-Modus-Timer beginnt mit dem Countdown der konfigurierten Dauer.

5.7.16.2
Einstellen des Stummschalt-Modus-Timers

Der Stummschalt-Modus kann durch Einstellen des Stummschalt-Modus-Timers für eine vorkonfigurierte Dauer aktiviert werden. Die Timer-Dauer wird über das Funkgerätemenü konfiguriert und kann zwischen 0,5 und 6 Stunden betragen. Nach Ablauf des Timers wird der Stummschalt-Modus beendet.

Wenn der Timer bei 0 belassen wird, bleibt das Funkgerät unbeschränkt im Stummschalt-Modus, bis es wieder mit dem Display nach oben hingelegt oder die programmierte **Stummschalt-Modus**-Taste gedrückt wird.

HINWEIS:
Display nach unten-Funktion gilt nur für DP4601e.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Dienstprogramme`.Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis `Funkgeräteinstellungen`.Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis `Timer stummschalten`. Drücken Sie OK, um die Option auszuwählen.

5 Drücken Sie ▲ oder ▼ zum Bearbeiten des numerischen Werts jeder Ziffer, und drücken Sie OK.

5.7.16.3

Beenden des Stummschalt-Modus

Die Funktion kann automatisch beendet werden, sobald der Stummschalt-Modus-Timer abgelaufen ist.

Führen Sie einen der folgenden Schritte aus, um den Stummschalt-Modus manuell zu beenden:

- Drücken Sie die programmierte **Stummschalt-Modus**-Taste.
- Drücken Sie die **Sendetaste (PTT)** bei einem beliebigen Eintrag.
- Legen Sie das Funkgerät kurzzeitig mit dem Display nach unten hin.

HINWEIS:
Display nach unten-Funktion gilt nur für DP4601e.

Folgendes geschieht, wenn der Stummschalt-Modus deaktiviert ist:

- Negativer Hinweiston erklingt.
- Das Display zeigt `Stummschalt-Modus aus` an.
- Die blinkende rote LED schaltet sich aus.

- Das **Stummschalt-Modus**-Symbol verschwindet von der Startseite.
- Die Stummschaltung des Funkgeräts wird aufgehoben, und der Lautsprecherstatus wird wiederhergestellt.
- Wenn der Timer nicht abgelaufen ist, wird der Stummschalt-Modus-Timer gestoppt.

HINWEIS:
Der Stummschalt-Modus wird ebenfalls beendet, wenn der Benutzer Sprache überträgt oder auf einen nicht programmierten Kanal wechselt.

5.7.17

Notruf

Ein Notsignal dient dazu, auf eine kritische Situation aufmerksam zu machen. Sie können einen Notruf jederzeit absetzen, auch wenn es Aktivitäten auf dem aktuellen Kanal gibt.

Bei Capacity Max kann das empfangende Funkgerät gleichzeitig nur ein Notsignal unterstützen. Sofern initiiert, überschreibt ein zweites Notsignal das erste Signal.

Wenn ein Notsignal empfangen wird, kann der Empfänger wählen, ob das Signal gelöscht und die Notsignal-Liste beendet werden soll oder ob auf das Notsignal reagiert werden soll, indem die **Sendetaste (PTT)** gedrückt und ein normaler Sprachruf (nicht Notruf) gesendet wird.

Ihr Händler oder Systemadministrator kann festlegen, wie lange die vorprogrammierte **Notruftaste** gedrückt werden muss, allerdings ist die Dauer für das lange Drücken die gleiche wie bei allen anderen Tasten:

Kurzer Tastendruck
Dauer zwischen 0,05 Sekunden und 0,75 Sekunden.

Langer Tastendruck
Dauer zwischen 1,00 und 3,75 Sekunden.

Die **Notruftaste** ist mit der Notruf-Ein/Aus-Funktion belegt. Für Informationen über die zugewiesene Funktionsweise der **Notruftaste** wenden Sie sich bitte an Ihren Händler.

HINWEIS:
Wenn die **Notruftaste** zum Einschalten des Notruf-Modus durch kurzes Drücken programmiert ist, dann wird der Notruf-Modus durch langes Drücken der **Notruftaste** beendet.

Wenn die **Notruftaste** zum Einschalten des Notruf-Modus durch langes Drücken programmiert ist, dann wird der Notruf-Modus durch kurzes Drücken der **Notruftaste** beendet.

Ihr Funkgerät unterstützt drei Arten von Notsignalen:

- Notrufalarm
- Notsignal mit Ruf
- Notsignal mit anschließender Sprache

Darüber hinaus gibt es vier unterschiedliche Notsignaltypen:

Regulär
Das Funkgerät überträgt ein Alarmsignal und gibt akustische und/oder optische Hinweise aus.

„Silent“
Das Funkgerät überträgt ein Alarmsignal und gibt keine akustischen und/oder optischen Hinweise aus. Das Funkgerät empfängt Rufe ohne Ton über den Lautsprecher, bis die programmierte Sendedauer für das *Notrufmikrofon* abgelaufen ist und/oder bis Sie die **Sendetaste (PTT)** drücken.

Still mit Sprache
Das Funkgerät überträgt ein Alarmsignal ohne akustische und optische Hinweise, erlaubt aber die Ausgabe eingehender Anrufe über den Lautsprecher.Wenn die *Notrufmikrofon*-Funktion aktiviert ist, werden eingehende Rufe nach dem Ende der programmierten *Notrufmikrofon*-Sendedauer über den Lautsprecher wiedergegeben. Diese Hinweise erscheinen nur dann, wenn Sie die **Sendetaste (PTT)** drücken.

HINWEIS:
Der vorprogrammierten Notruftaste kann jeweils nur **einer** der oben angeführten Notsignale zugewiesen werden.

5.7.17.1

Senden von Notrufsignalen

Mit dieser Funktion senden Sie ein Notsignal, d. h. ein Signal ohne Sprache, das einen Hinweis auf einer Gruppe von Funkgeräten auslöst. Führen Sie die Vorgehensweise zum Senden von Notrufsignalen auf Ihrem Funkgerät durch.

Ihr Funkgerät gibt keine akustischen oder visuellen Signale während des Notrufmodus aus, wenn es stummgeschaltet ist.

1. Drücken Sie die programmierte **Notrufeinschalttaste**.

   Sie sehen folgende Ergebnisse:

   - Im Display wird `Tx Alarm` und der Aliasname des Zielgeräts angezeigt.

- Im Display wird `Tx Telegramm` und der Aliasname des Zielgeräts angezeigt.

Die grüne LED leuchtet. Das **Notruf**-Symbol wird angezeigt.

HINWEIS:
Wenn programmiert, erklingt der Notsuchton. Der Ton wird stummgeschaltet, wenn das Funkgerät Sprache sendet oder empfängt, und er stoppt, wenn das Funkgerät den Notruf-Modus verlässt. Der Notsuchton kann durch Ihren Händler oder Systemadministrator programmiert werden.

2 Warten Sie auf eine Quittierung.

Bei erfolgreicher Durchführung:

- Der Notrufton ertönt.
- Die grüne LED blinkt.
- Im Display wird `Alarm gesendet` angezeigt.

Bei nicht erfolgreicher Durchführung, wenn alle Versuche durchgeführt wurden:

- Ein Hinweiston ertönt.
- Das Display zeigt `Alarm fehlg` an.

Das Funkgerät verlässt den Notsignalmodus und kehrt zum Ausgangsbildschirm zurück.

HINWEIS:
Wenn nur das Notsignal konfiguriert ist, besteht der Notrufprozess nur aus der Bereitstellung des Notsignals. Der Notruf endet, wenn eine Bestätigung vom System empfangen wurde oder wenn die maximale Anzahl an Versuchen für den Zugriff auf den Kanal erreicht wurde.

Wenn nur das Notsignal konfiguriert wurde, ist mit dem Absenden eines Notrufs kein Sprachruf verbunden.

5.7.17.2
Senden von Notrufsignalen mit Ruf

Mithilfe dieser Funktion können Sie ein Notsignal mit Ruf an eine Gruppe von Funkgeräten oder an einen Dispatcher senden. Nach erfolgter Quittierung durch die Infrastruktur in der Gruppe kann eine Gruppe von Funkgeräten auf einem vorprogrammierten Notrufkanal miteinander kommunizieren.

Das Funkgerät muss für Notsignale mit Ruf konfiguriert werden, damit ein Notruf nach der Durchführung eines Notrufs ausgeführt werden kann.

1 Drücken Sie die programmierte **Notrufeinschalttaste**.

Im Display wird `Tx Alarm` und der Aliasname des Zielgeräts angezeigt. Das **Notruf**-Symbol wird angezeigt.Die grüne LED leuchtet.

HINWEIS:
Wenn programmiert, erklingt der Notsuchton. Der Ton wird stummgeschaltet, wenn das Funkgerät Sprache sendet oder empfängt, und er stoppt, wenn das Funkgerät den Notruf-Modus verlässt.

Wenn eine Notsignal-Quittierung erfolgreich empfangen wurde

- Der Notrufton ertönt.
- Die grüne LED blinkt.
- Im Display wird `Alarm gesendet` angezeigt.
- Sobald auf dem Display `Notruf` und die Zielgruppen-Aliasnamen anzeigt werden, wird das Funkgerät auf Notrufmodus geschaltet.

Wenn eine Notsignal-Quittierung nicht erfolgreich empfangen werden konnte:

- alle erneuten Versuche erschöpft sind.
- Ertönt ein tiefer Hinweiston.
- Das Display zeigt `Alarm fehlg` an.
- Verlässt das Funkgerät den Notsignalmodus.

2 Drücken Sie die **Sendetaste** (PTT), um eine Sprachübertragung zu initiieren.

Die grüne LED leuchtet.Das Display zeigt das **Gruppenruf**-Symbol an.

3 Führen Sie einen der folgenden Schritte aus:

- Warten Sie, bis der Freiton verklungen ist, und sprechen Sie deutlich in das Mikrofon.
- Warten Sie, bis der **PTT**-Mithörton verstummt, und sprechen Sie dann deutlich in das Mikrofon.

4 Lassen Sie die **PTT**-Taste los, um den Gesprächspartner zu hören.

Im Display werden der Anrufer und die Gruppen-Aliase angezeigt.

5 Ist die Funktion „Kanal frei-Anzeige“ aktiviert, hören Sie einen kurzen Hinweiston, sobald die **Sendetaste (PTT)** am sendenden Funkgerät freigegeben wird, der Ihnen mitteilt, dass Sie nun auf diesem Kanal antworten können. Drücken Sie zum Beantworten des Anrufs die **Sendetaste** (PTT).

6 Drücken Sie zum Verlassen des Notrufmodus die **Notruf aus**-Taste.

Das Funkgerät kehrt zum Startbildschirm zurück.

HINWEIS:
Je nachdem, wie Ihr Funkgerät programmiert wurde, hören Sie einen Gesprächserlaubniston oder nicht. Ihr Händler oder Systemadministrator kann Ihnen zusätzliche Informationen zur Programmierung Ihres Funkgeräts für Notfälle geben.

Der Notrufinitiator kann Abbrechen drücken, , um einen laufenden Notruf zu beenden. Das Funkgerät kehrt in einen Verfügbar-Status zurück, der Notrufbildschirm bleibt jedoch geöffnet.

5.7.17.3

Senden von Notrufsignalen mit nachfolgendem Sprachruf

Mit dieser Funktion senden Sie ein Notsignal mit nachfolgendem Sprachruf an eine Gruppe von Funkgeräten. Ihr Funkgerät wird automatisch aktiviert, sodass Sie ohne Drücken der Sendetaste **(PTT)** mit der Funkgerätgruppe kommunizieren können. Dieser Modus

mit aktiviertem Mikrofon wird auch „Notrufmikrofon” genannt.

Bei aktiviertem Notrufzyklusbetrieb werden für eine einprogrammierte Dauer der *Mikrofon-Bereitschaftsmodus* und die Empfangszeit abwechselnd wiederholt. Während des Notrufzyklusbetriebs werden empfangene Rufe über den Lautsprecher ausgegeben.

Wenn Sie während der vorprogrammierten Empfangszeit die Sendetaste **(PTT)** drücken, hören Sie einen Sperrton. Dieser Ton weist Sie darauf hin, dass Sie die Sendetaste **(PTT)** freigeben müssen. Das Funkgerät reagiert nicht auf das Drücken der Sendetaste **(PTT)** und bleibt im Notruf-Modus.

Wenn Sie die **Sendetaste (PTT)** bei aktiviertem *Hot Mic*-Modus drücken und sie bis nach Ablauf der Dauer des *Hot Mic*-Modus gedrückt halten, sendet das Funkgerät weiterhin, bis Sie die **Sendetaste (PTT)** loslassen.

Wird eine Notsignalanforderung nicht beantwortet, versucht das Funkgerät nicht noch einmal, die Anforderung zu senden, sondern ruft den *Mikrofon-Bereitschaftsmodus* direkt auf.

HINWEIS:
Von einigen Zubehörteilen wird der *Mikrofon-Bereitschaftsmodus* möglicherweise nicht unterstützt. Weitere Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator.

Führen Sie die Vorgehensweise zum Senden von Notrufsignalen mit nachfolgendem Sprachruf auf Ihrem Funkgerät durch.

1 Drücken Sie die programmierte **Notrufeinschalttaste**.

   Sie sehen eines der folgenden Ergebnisse:

   - Im Display wird `Tx Alarm` und der Aliasname des Zielgeräts angezeigt.
   - Im Display wird `Tx Telegramm` und der Aliasname des Zielgeräts angezeigt.

   Die grüne LED leuchtet. Das **Notruf**-Symbol wird angezeigt.

2 Sobald das Display `Alarm gesendet` anzeigt, sprechen Sie deutlich in das Mikrofon.

   Das Funkgerät stoppt den Sendevorgang automatisch:

- Bei aktiviertem Notrufzyklusbetrieb endet die Dauer des Zyklus zwischen *Hot Mic* und dem Empfang von Rufen.
- Bei deaktiviertem Notrufzyklusbetrieb endet die Dauer des *Hot Mic*-Modus.

3 Drücken Sie zum Verlassen des Notrufmodus die **Notruf aus**-Taste.

Das Funkgerät kehrt zum Startbildschirm zurück.

5.7.17.4

Empfangen von Notrufsignalen

Das empfangende Funkgerät kann nur ein Notsignal gleichzeitig unterstützen. Sofern initiiert, überschreibt ein zweites Notsignal das erste Signal. Führen Sie die Vorgehensweise zum Empfangen und Anzeigen von Notsignalen auf Ihrem Funkgerät durch.

Wenn Sie ein Notrufsignal empfangen:

- Ein Hinweiston ertönt.
- Die rote LED blinkt.
- Das Display zeigt die Notsignalliste, die Notruf-Gesprächsgruppen-ID oder den Aliasnamen und die ID oder den Aliasnamen des übertragenden Funkgeräts an.

1 Drücken Sie OK, um das Notsignal anzuzeigen.

2 Drücken Sie OK, um die Aktionsoptionen und -details für alle Einträge in der Notsignalliste anzuzeigen.

3 Drücken Sie ⮌, und wählen Sie Ja, um die Alarmliste zu verlassen.

Das Funkgerät kehrt zum Startbildschirm zurück und zeigt oben ein **Notsignalsymbol** an, das darauf hinweist, dass es sich um ein noch nicht gelöstes Notsignal handelt. Das **Notsignalsymbol** wird nicht mehr angezeigt, wenn der Eintrag in der Notsignalliste gelöscht wurde.

4 Drücken Sie OK, um das Menü aufzurufen.

5 Wählen Sie `Alarmliste`, um die Alarmliste wieder anzuzeigen.

5.7.17.5

Antworten auf Notrufsignale

Wenn ein Notsignal empfangen wird, kann der Empfänger wählen, ob das Signal gelöscht und die Notsignal-Liste beendet werden soll oder ob auf das Notsignal reagiert werden soll, indem die **Sendetaste (PTT)** gedrückt und ein normaler Sprachruf (nicht Notruf) gesendet wird. Führen Sie die Vorgehensweise zum Antworten auf Notrufsignale auf Ihrem Funkgerät durch.

1 Wenn die Notrufanzeige aktiviert ist, wird der Notruf angezeigt, sobald das Funkgerät einen Notruf erhält. Drücken Sie ▲ oder ▼ bis zum gewünschten Aliasnamen oder zur gewünschten ID.

2 Ist die Funktion „Kanal frei-Anzeige“ aktiviert, hören Sie einen kurzen Hinweiston, sobald die **Sendetaste (PTT)** am sendenden Funkgerät freigegeben wird, der Ihnen mitteilt, dass Sie nun auf diesem Kanal antworten können. Um der gleichen Gruppe, an die auch das Notrufsignal gerichtet war, einen normalen Sprachruf (nicht Notruf) zu senden, drücken Sie die **Sendetaste (PTT)**.

   Die grüne LED leuchtet.

3 Führen Sie einen der folgenden Schritte aus:

   - Warten Sie, bis der Freiton verklungen ist, und sprechen Sie deutlich in das Mikrofon.
   - Warten Sie, bis der **PTT**-Mithörton verstummt, und sprechen Sie dann deutlich in das Mikrofon.

4 Lassen Sie die **PTT**-Taste los, um den Gesprächspartner zu hören.

   Wenn das Funkgerät, das den Notruf gesendet hat, antwortet:

   - Die rote LED blinkt.
   - Das Display zeigt das **Notruf-**Symbol, die Notruf-Gesprächsgruppen-ID oder den Aliasnamen und die ID oder den Aliasnamen des sendenden Funkgeräts.

HINWEIS:
Wenn die Notrufanzeige nicht aktiviert ist, zeigt das Display das **Gruppenruf**-Symbol, die Notruf-Gesprächsgruppen-ID oder den Aliasnamen und die ID oder den Aliasnamen des sendenden Funkgeräts.

5.7.17.6

Antworten auf Notsignale mit Ruf

Führen Sie die Vorgehensweise zum Antworten auf Notsignale mit Ruf auf Ihrem Funkgerät durch.

Wenn Sie einen Notruf empfangen, geschieht Folgendes:

- Der Notrufton erklingt, wenn die Notrufanzeige und der Notruf-Decodierungshinweiston aktiviert sind. Der Notrufton erklingt nicht, wenn nur die Notrufanzeige aktiviert ist.
- Im Display wird das **Notruf**-Symbol in der oberen rechten Ecke angezeigt.
- Die Textzeile zeigt die Notruf-Gesprächsgruppen-ID oder den Aliasnamen des sendenden Funkgeräts.
- Die Stummschaltung Ihres Funkgeräts wird aufgehoben, und der ankommende Anruf ist über den Lautsprecher zu hören.

1. Ist die Funktion „Kanal frei-Anzeige“ aktiviert, hören Sie einen kurzen Hinweiston, sobald die **Sendetaste (PTT)** am sendenden Funkgerät freigegeben wird, der Ihnen mitteilt, dass Sie nun auf diesem Kanal antworten können. Drücken Sie zum Beantworten des Anrufs die **Sendetaste** (PTT).

   Die grüne LED leuchtet.

2. Warten Sie, bis der Freiton verklungen ist, und sprechen Sie deutlich in das Mikrofon.

3. Lassen Sie die **PTT**-Taste los, um den Gesprächspartner zu hören.

   Wenn das Funkgerät, das den Notruf gesendet hat, antwortet:

   - Die rote LED blinkt.
   - Das Display zeigt das **Notruf**-Symbol, die Notruf-Gesprächsgruppen-ID oder den Aliasnamen und die ID oder den Aliasnamen des sendenden Funkgeräts.

HINWEIS:
Wenn die Notrufanzeige nicht aktiviert ist, zeigt das Display das **Gruppenruf**-Symbol, die Notruf-Gesprächsgruppen-ID oder den Aliasnamen und die ID oder den Aliasnamen des sendenden Funkgeräts.

5.7.18

Statusmeldung

Anhand dieser Funktion ist der Benutzer in der Lage, Statusmeldungen an andere Funkgeräte zu senden.

Die Quick-Status-Liste wird über CPS-RM konfiguriert und umfasst maximal 99 Status.

Die maximale Zeichenlänge für jede Statusmeldung ist 16.

HINWEIS:
Jeder Status hat einen entsprechenden digitalen Wert zwischen 0 und 99. Zur besseren Übersichtlichkeit kann jedem Status ein Alias zugewiesen werden.

5.7.18.1

Senden von Statusnachrichten

Führen Sie zum Senden einer Statusmeldung die folgende Vorgehensweise durch.

1. Führen Sie einen der folgenden Schritte aus:
   - Drücken Sie die vorprogrammierte **Schnellwahltaste**. Überspringen Sie die folgenden Schritte.
   - Drücken Sie OK, um das Menü aufzurufen.
2. Drücken Sie ▲ oder ▼ bis `Status`. Drücken Sie OK, um die Option auszuwählen.
3. Drücken Sie ▲ oder ▼ bis `Quick-Status`. Drücken Sie OK, um die Option auszuwählen.
4. Drücken Sie ▲ oder ▼ bis zu den gewünschten Statusmeldungen. Drücken Sie OK, um die Option auszuwählen.

5 Drücken Sie ▲ oder ▼ bis zum Alias oder zur ID des gewünschten Funkgeräts oder der Gruppe.

Drücken Sie OK, um die Option auszuwählen.

Bei erfolgreicher Durchführung:

- Ein positiver Hinweiston erklingt.
- Die LED erlischt.
- Im Display wird ein positiver Kurzhinweis angezeigt, bevor wieder der vorhergehende Bildschirm `Quick-Status` angezeigt wird.
- Auf dem Display wird ✓ neben dem gesendeten Status angezeigt.

Bei nicht erfolgreicher Durchführung:

- Ein negativer Hinweiston erklingt.
- Die LED erlischt.
- Im Display wird vorübergehend der Fehlerhinweis angezeigt, bevor wieder der vorhergehende Bildschirm `Quick-Status` angezeigt wird.

5.7.18.2

Senden von Statusmeldungen über die programmierbare Taste

Führen Sie die Vorgehensweise zum Senden einer Statusmeldung über die programmierbare Taste durch.

1 Drücken Sie die programmierte Taste **Statusmeldung**.

2 Drücken Sie ▲ oder ▼ bis zu den gewünschten Statusmeldungen. Drücken Sie OK, um die Option auszuwählen. Die Kontaktliste wird angezeigt.

3 Drücken Sie ▲ oder ▼ bis zum Alias oder zur ID des gewünschten Funkgeräts oder der Gruppe.

Drücken Sie OK, um die Option auszuwählen.

Bei erfolgreicher Durchführung:

- Ein positiver Hinweiston erklingt.
- Die LED erlischt.
- Im Display wird ein positiver Kurzhinweis angezeigt, bevor wieder der vorhergehende Bildschirm `Quick-Status` angezeigt wird.

- Auf dem Display wird ✓ neben dem gesendeten Status angezeigt.

Bei nicht erfolgreicher Durchführung:

- Ein negativer Hinweiston erklingt.
- Die LED erlischt.
- Im Display wird vorübergehend der Fehlerhinweis angezeigt, bevor wieder der vorhergehende Bildschirm `Quick-Status` angezeigt wird.

5.7.18.3

Senden einer Statusmeldung mithilfe der Kontaktliste

Führen Sie die Vorgehensweise zum Senden einer Statusmeldung mithilfe der Kontaktliste durch.

1. Drücken Sie OK, um das Menü aufzurufen.
2. Drücken Sie ▲ oder ▼ bis `Kontakte`. Drücken Sie OK, um die Option auszuwählen.
3. Drücken Sie ▲ oder ▼ bis zum Alias oder zur ID des gewünschten Funkgeräts oder der Gruppe.

   Drücken Sie OK, um die Option auszuwählen.
4. Drücken Sie ▲ oder ▼ bis `Status senden`.

   Drücken Sie OK, um die Option auszuwählen.
5. Drücken Sie ▲ oder ▼ bis zu den gewünschten Statusmeldungen. Drücken Sie OK, um die Option auszuwählen.

Bei erfolgreicher Durchführung:

- Ein positiver Hinweiston erklingt.
- Die LED erlischt.
- Im Display wird ein positiver Kurzhinweis angezeigt, bevor wieder der vorhergehende Bildschirm `Quick-Status` angezeigt wird.
- Auf dem Display wird ✓ neben der gesendeten Statusmeldung angezeigt.

Bei nicht erfolgreicher Durchführung:

- Ein negativer Hinweiston erklingt.
- Die LED erlischt.
- Im Display wird vorübergehend der Fehlerhinweis angezeigt, bevor wieder der vorhergehende Bildschirm `Quick-Status` angezeigt wird.

5.7.18.4

Senden von Statusmeldungen über manuelles Wählen

Führen Sie die Vorgehensweise zum Senden einer Statusmeldung über manuelles Wählen durch.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Kontakte`. Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis `Man. Wählen`. Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis `Funkgerät-Nr.` Drücken Sie OK, um die Option auszuwählen.

5 Geben Sie den Funkgerät-Alias oder die ID oder den Gruppen-Alias oder die ID ein, und drücken Sie OK, um fortzufahren.

6 Drücken Sie ▲ oder ▼ bis `Status senden`. Drücken Sie OK, um die Option auszuwählen.

7 Drücken Sie ▲ oder ▼ bis zu den gewünschten Statusmeldungen. Drücken Sie OK, um die Option auszuwählen.

Bei erfolgreicher Durchführung:

- Ein positiver Hinweiston erklingt.
- Die LED erlischt.
- Im Display wird vorübergehend ein positiver Kurzhinweis angezeigt, bevor wieder der Bildschirm `Quick-Status` angezeigt wird.

- Auf dem Display wird ✓ neben dem gesendeten Status angezeigt.

Bei nicht erfolgreicher Durchführung:

- Ein negativer Hinweiston erklingt.
- Die LED erlischt.
- Im Display wird vorübergehend der Fehlerhinweis angezeigt, bevor wieder der vorhergehende Bildschirm `Quick-Status` angezeigt wird.

5.7.18.5

Statusmeldungen anzeigen

Führen Sie die Vorgehensweise zum Anzeigen von Statusmeldungen durch.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Status`. Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis `Posteingang`.

Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis zu den gewünschten Statusmeldungen. Drücken Sie OK, um die Option auszuwählen.

Der Inhalt der Statusmeldung wird dem Benutzer des Funkgeräts angezeigt.

Empfangene Statusmeldungen können auch durch Zugriff auf die Benachrichtigungsliste angezeigt werden. Weitere Informationen finden Sie unterBenachrichtigungsliste auf Seite 179.

5.7.18.6

Antworten auf Statusmeldungen

Führen Sie die Vorgehensweise zum Antworten auf Statusmeldungen durch.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Status`. Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis `Inbox`. Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis zu den gewünschten Statusmeldungen. Drücken Sie OK, um die Option auszuwählen.

5 Der Inhalt der Statusmeldung wird angezeigt. Drücken Sie OK, um die Option auszuwählen.

6 Drücken Sie ▲ oder ▼ bis `Antw.`. Drücken Sie OK, um die Option auszuwählen.

7 Drücken Sie ▲ oder ▼ bis zu den gewünschten Statusmeldungen. Drücken Sie OK, um die Option auszuwählen.

Bei erfolgreicher Durchführung:

- Ein positiver Hinweiston erklingt.
- Die LED erlischt.
- Im Display wird ein positiver Kurzhinweis angezeigt, bevor wieder der Bildschirm `Posteingang` angezeigt wird.
- Auf dem Display wird ✓ neben der gesendeten Statusmeldung angezeigt.

Bei nicht erfolgreicher Durchführung:

- Ein negativer Hinweiston erklingt.
- Die LED erlischt.
- Im Display wird vorübergehend der Fehlerhinweis angezeigt, bevor wieder der vorhergehende Bildschirm `Posteingang` angezeigt wird.

5.7.18.7

Löschen einer Statusmeldung

Führen Sie die Vorgehensweise zum Löschen einer Statusmeldung auf Ihrem Funkgerät durch.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Status`. Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis `Inbox`. Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis zu den gewünschten Statusmeldungen. Drücken Sie OK, um die Option auszuwählen.

5 Der Inhalt der Statusmeldung wird angezeigt. Drücken Sie OK, um die Option auszuwählen.

6 Drücken Sie ▲ oder ▼ bis `Löschen`. Drücken Sie OK, um die Option auszuwählen.

7 Drücken Sie ▲ oder ▼ bis `Ja`. Drücken Sie OK, um die Option auszuwählen.

- Im Display wird ein positiver Kurzhinweis angezeigt, bevor wieder der Bildschirm `Posteingang` angezeigt wird.

5.7.18.8

Löschen aller Statusmeldungen

Führen Sie die Vorgehensweise zum Löschen aller Statusmeldungen auf Ihrem Funkgerät durch.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Status`. Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis `Inbox`. Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis `Alle löschen`. Drücken Sie OK, um die Option auszuwählen.

5 Drücken Sie ▲ oder ▼ bis `Ja`. Drücken Sie OK, um die Option auszuwählen.

- Auf dem Display wird `Liste leer` angezeigt.

5.7.19

Textnachrichten (SMS)

Ihr Funkgerät kann von einem anderen Funkgerät oder einer Textnachricht-Anwendung Daten empfangen, beispielsweise Textnachrichten.

Es gibt zwei Arten von Textnachrichten, DMR-Kurztextnachrichten (Digital Mobile Radio) und Textnachrichten. Die maximale Länge einer DMR-Kurztextnachricht beträgt 23 Zeichen. Die maximale Länge einer Textnachricht beträgt 280 Zeichen, einschließlich der Betreffzeile. Die Betreffzeile wird nur angezeigt, wenn Sie Nachrichten von E-Mail-Anwendungen empfangen.

HINWEIS:
Die maximale Länge gilt nur für Modelle mit der neuesten Software und Hardware. Bei Funkgerätemodellen mit älterer Software und Hardware beträgt die maximale Länge für eine Textnachricht 140 Zeichen. Weitere Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator.

In arabischer Sprache wird der Text von rechts nach links eingegeben.

5.7.19.1

Textnachrichten

Die Textnachrichten werden im Posteingang gespeichert und nach Eingang geordnet, d. h. die zuletzt eingegangene Nachricht steht an erster Stelle.

Das Funkgerät verlässt den aktuellen Bildschirm, sobald der Inaktivitäts-Timer abgelaufen ist. Durch Gedrückthalten von ↩ kehren Sie zum Startbildschirm zurück.

5.7.19.1.1

Anzeigen von Textnachrichten

Führen Sie die Vorgehensweise zum Anzeigen von Textnachrichten auf Ihrem Funkgerät durch.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Nachrichten`.

Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis `Inbox`. Drücken Sie OK, um die Option auszuwählen.

Wenn der Posteingang leer ist:

- Auf dem Display wird `Liste leer` angezeigt.
- Ein Ton erklingt, wenn der Tastaturton eingeschaltet ist.

4 Drücken Sie ▲ oder ▼ bis zur gewünschten Nachricht. Drücken Sie OK, um die Option auszuwählen.

Auf dem Display wird eine Betreffzeile angezeigt, wenn die Nachricht von einem E-Mail-Programm stammt.

5.7.19.1.2

Anzeigen von Telemetriestatus-Textnachrichten

Folgen Sie der Vorgehensweise zum Anzeigen einer Telemetriestatus-Textnachricht aus dem Posteingang.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Nachrichten`.

Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis `Inbox`. Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis zur gewünschten Nachricht. Drücken Sie OK, um die Option auszuwählen.

Telemetriestatus-Textnachrichten können Sie nicht beantworten.

Das Display zeigt `Telemetrie: <Telemetriestatus-Textnachricht>`.

5 Drücken Sie ⌂ lang, um zum Startbildschirm zurückzukehren.

5.7.19.1.3

Anzeigen gespeicherter Textnachrichten

Führen Sie die Vorgehensweise zum Anzeigen von gespeicherten Textnachrichten auf Ihrem Funkgerät durch.

1 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie die programmierte Taste **Textnachricht**. Lesen Sie weiter unter Schritt 3.
- Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Nachrichten`. Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis `Entwürfe`. Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis zur gewünschten Nachricht. Drücken Sie OK, um die Option auszuwählen.

5.7.19.1.4

Antworten auf Textnachrichten

Führen Sie die Vorgehensweise zum Antworten auf Textnachrichten auf Ihrem Funkgerät durch.

Wenn Sie eine Textnachricht erhalten:

- Auf dem Display wird die Benachrichtigungsliste mit dem Alias oder der ID des Absenders angezeigt.
- Auf dem Display wird das **Nachrichten**-Symbol angezeigt.

HINWEIS:
Wird die **Sendetaste (PTT)** gedrückt, verlässt das Funkgerät den Textnachrichten-Hinweisbildschirm und baut einen Einzel- oder Gruppenruf an den Sender der Nachricht auf.

1 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie ▲ oder ▼ bis `Lesen`. Drücken Sie OK, um die Option auszuwählen.
  Das Display zeigt die Textnachricht an. Auf dem Display wird eine Betreffzeile angezeigt, wenn die Nachricht von einem E-Mail-Programm stammt.
- Drücken Sie ▲ oder ▼ bis `Später lesen`.
  Drücken Sie OK, um die Option auszuwählen.
  Das Funkgerät kehrt zum vor Erhalt der Textnachricht angezeigten Bildschirm zurück.
- Drücken Sie ▲ oder ▼ bis `Löschen`. Drücken Sie OK, um die Option auszuwählen.

2 Drücken Sie ⌂, um zum Posteingang zurückzukehren.

5.7.19.1.5

Antworten auf Textnachrichten mit Quick Text

1 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie die programmierte Taste **Textnachricht**. Fahren Sie mit Schritt 3 fort.
- Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Nachrichten`.
Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis Inbox. Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis zur gewünschten Nachricht. Drücken Sie OK, um die Option auszuwählen.

Auf dem Display wird eine Betreffzeile angezeigt, wenn die Nachricht von einem E-Mail-Programm stammt.

5 Drücken Sie OK, um das Untermenü aufzurufen.

6 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie ▲ oder ▼ bis Antw.. Drücken Sie OK, um die Option auszuwählen.
- Drücken Sie ▲ oder ▼ bis KurzAw. Drücken Sie OK, um die Option auszuwählen.

Ein blinkender Cursor wird angezeigt. Sie können Ihre Nachricht bei Bedarf schreiben oder bearbeiten.

7 Drücken Sie OK, nachdem Sie die Nachricht erstellt haben.

Im Display wird eine Zwischenstand-Kurznotiz angezeigt und damit bestätigt, dass Ihre Nachricht gesendet wird.

8 Warten Sie auf eine Quittierung.

Bei erfolgreicher Durchführung:

- Ein Hinweiston ertönt.
- Im Display wird ein positiver Kurzhinweis angezeigt.

Bei nicht erfolgreicher Durchführung:

- Ein Hinweiston ertönt.
- Im Display wird ein negativer Kurzhinweis angezeigt.

- Das Funkgerät kehrt zum Bildschirm `Wiederholen` zurück.

5.7.19.1.6

Weiterleiten von Textnachrichten

Führen Sie die Vorgehensweise zum Weiterleiten von Textnachrichten auf Ihrem Funkgerät durch.

Auf dem Bildschirm `Wiederholen`:

1 Drücken Sie ▲ oder ▼ bis `Weiterleiten`, und drücken Sie dann OK, um dieselbe Nachricht an ein anderes Funkgerät, einen anderen Gruppen-Alias oder eine andere Gruppen-ID zu senden.

2 Drücken Sie ▲ oder ▼ bis zum gewünschten Aliasnamen oder zur gewünschten ID. Drücken Sie OK, um die Option auszuwählen.

Im Display wird eine Zwischenstand-Kurznotiz angezeigt und damit bestätigt, dass Ihre Nachricht gesendet wird.

3 Warten Sie auf eine Quittierung.

Bei erfolgreicher Durchführung:

- Ein Hinweiston ertönt.
- Im Display wird ein positiver Kurzhinweis angezeigt.

Bei nicht erfolgreicher Durchführung:

- Ein Hinweiston ertönt.
- Im Display wird ein negativer Kurzhinweis angezeigt.

5.7.19.1.7

Erneutes Senden von Textnachrichten

Führen Sie die Vorgehensweise zum erneuten Senden von Textnachrichten auf Ihrem Funkgerät durch.

Auf dem Bildschirm `Wiederholen`:

Drücken Sie OK, um dieselbe Nachricht erneut an denselben Aliasnamen oder dieselbe ID des Funkgeräts bzw. der Gruppe zu senden.

Bei erfolgreicher Durchführung:

- Ein positiver Hinweiston erklingt.
- Im Display wird ein positiver Kurzhinweis angezeigt.

Bei nicht erfolgreicher Durchführung:

- Ein negativer Hinweiston erklingt.
- Im Display wird ein negativer Kurzhinweis angezeigt.
- Das Funkgerät kehrt zum Bildschirm `Wiederholen` zurück.

5.7.19.1.8

Löschen aller Textnachrichten aus dem Posteingang

Führen Sie die Vorgehensweise zum Löschen aller Textnachrichten aus dem Posteingang auf Ihrem Funkgerät durch.

1 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie die programmierte Taste **Textnachricht**. Lesen Sie weiter unter Schritt 3.
- Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Nachrichten`.

Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis `Inbox`. Drücken Sie OK, um die Option auszuwählen.

Wenn der Posteingang leer ist:

- Auf dem Display wird `Liste leer` angezeigt.
- Ein Hinweiston ertönt.

4 Drücken Sie ▲ oder ▼ bis `Alle löschen`.

Drücken Sie OK, um die Option auszuwählen.

5 Drücken Sie ▲ oder ▼ bis `Ja`. Drücken Sie OK, um die Option auszuwählen.

Im Display wird ein positiver Kurzhinweis angezeigt.

5.7.19.1.9

Löschen gespeicherter Textnachrichten aus dem Entwurfsordner

Führen Sie die Vorgehensweise zum Löschen aller Textnachrichten aus dem Posteingang auf Ihrem Funkgerät durch.

1 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie die programmierte Taste **Textnachricht**. Lesen Sie weiter unter Schritt 3.
- Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Nachrichten`. Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis `Entwürfe`. Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis zur gewünschten Nachricht. Drücken Sie OK, um die Option auszuwählen.

5 Drücken Sie ▲ oder ▼ bis `Löschen`. Drücken Sie OK zum Löschen der Textnachricht.

5.7.19.2

Gesendete Textnachrichten

Nachdem eine Nachricht an ein anderes Funkgerät gesendet wurde, wird sie im Ordner „Ausgang“ gespeichert. Die zuletzt gesendete Textnachricht wird jeweils an die erste Stelle des Ordners „Ausgang“ gestellt. Sie können eine gesendete Textnachricht erneut senden, weiterleiten oder löschen.

Der Ordner „Ausgang“ kann bis zu 30 gesendete Nachrichten aufnehmen. Sobald der Ordner voll ist, wird die älteste Textnachricht im Ordner automatisch durch die als nächstes gesendete Textnachricht ersetzt.

Wenn Sie den Bildschirm zum Senden einer Nachricht verlassen, während die Nachricht gesendet wird, aktualisiert das Funkgerät den Status dieser Nachricht im

Ausgangsordner, ohne dies im Display oder durch Abgeben eines Hinweistons anzuzeigen.

Wechselt das Funkgerät in einen anderen Modus oder wird es ausgeschaltet, bevor der Status der Nachricht im Ordner „Ausgang“ aktualisiert wird, kann das Funkgerät die Übertragung anhängiger Nachrichten nicht abschließen und kennzeichnet diese automatisch mit dem Symbol für **Fehler beim Senden**.

Das Funkgerät unterstützt bis zu maximal fünf anhängige Nachrichten. Sind bereits fünf Nachrichten anhängig, d. h. noch zu senden, kann das Funkgerät keine weitere Nachricht senden und kennzeichnet diese automatisch mit dem Symbol für **Fehler beim Senden**.

Wenn Sie zu einem beliebigen Zeitpunkt lange drücken, kehrt das Funkgerät zum Startbildschirm zurück.

HINWEIS:
Wenn der Kanaltyp, z. B. konventioneller digitaler Kanal oder Capacity Plus-Kanal, nicht übereinstimmt, können nur gesendete Nachrichten bearbeitet, weitergeleitet oder gelöscht werden.

5.7.19.2.1

Anzeigen gesendeter Textnachrichten

Führen Sie die Vorgehensweise zum Anzeigen von gesendeten Nachrichten auf Ihrem Funkgerät durch.

1 Führen Sie einen der folgenden Schritte aus:
   - Drücken Sie die programmierte Taste **Textnachricht**. Lesen Sie weiter unter Schritt 3.
   - Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Nachrichten`.

   Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis `Ausgang`. Drücken Sie OK, um die Option auszuwählen.

   Der Ordner für gesendete Nachrichten ist leer:
   - Auf dem Display wird `Liste leer` angezeigt.
   - Ein tiefer Ton erklingt, wenn der Tastaturton eingeschaltet ist.

4 Drücken Sie ▲ oder ▼ bis zur gewünschten Nachricht. Drücken Sie OK, um die Option auszuwählen.

Im Display wird eine Betreffzeile angezeigt, wenn die Nachricht von einem E-Mail-Programm stammt.

5.7.19.2.2

Senden von gesendeten Textnachrichten

Führen Sie die Vorgehensweise zum Senden von gesendeten Textnachrichten auf Ihrem Funkgerät durch.

Wenn Sie eine gesendete Nachricht anzeigen:

1 Drücken Sie OK.

2 Drücken Sie ▲ oder ▼ bis `Wiederholen`.

Drücken Sie OK, um die Option auszuwählen.

Im Display wird eine Zwischenstand-Kurznotiz angezeigt und damit bestätigt, dass Ihre Nachricht gesendet wird.

3 Warten Sie auf eine Quittierung.

Bei erfolgreicher Durchführung:

- Ein Hinweiston ertönt.
- Im Display wird ein positiver Kurzhinweis angezeigt.

Bei nicht erfolgreicher Durchführung:

- Ein Hinweiston ertönt.
- Im Display wird ein negativer Kurzhinweis angezeigt.
- Das Funkgerät fährt mit dem Bildschirm `Wiederholen` fort. Weitere Informationen finden Sie unterErneutes Senden von Textnachrichten auf Seite 161.

5.7.19.2.3

Löschen aller gesendeten Textnachrichten aus dem Ordner „Gesendete Elemente“

Führen Sie die Vorgehensweise zum Löschen aller gesendeten Textnachrichten aus den Ordner „Ausgang“ auf Ihrem Funkgerät durch.

1 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie die programmierte Taste **Textnachricht**. Lesen Sie weiter unter Schritt 3.
- Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Nachrichten`.

Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis `Ausgang`. Drücken Sie OK, um die Option auszuwählen.

Der Ordner für gesendete Nachrichten ist leer:

- Auf dem Display wird `Liste leer` angezeigt.
- Ein Hinweiston ertönt.

4 Drücken Sie ▲ oder ▼ bis `Alle löschen`.

Drücken Sie OK, um die Option auszuwählen.

5 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie ▲ oder ▼ bis `Ja`. Drücken Sie OK, um die Option auszuwählen.
  Im Display wird ein positiver Kurzhinweis angezeigt.
- Drücken Sie ▲ oder ▼ bis `Nein`. Drücken Sie OK, um die Option auszuwählen.
  Das Funkgerät wechselt zum vorherigen Bildschirm.

5.7.19.3
Quick Text-Nachrichten

5.7.19.3.1
Senden von Quick Text-Nachrichten

Führen Sie die Vorgehensweise zum Senden von vordefinierten Quick Text-Nachrichten auf Ihrem Funkgerät an einen vordefinierten Aliasnamen durch.

1 Drücken Sie die vorprogrammierte **Schnellwahltaste**.

Im Display wird eine Zwischenstand-Kurznotiz angezeigt und damit bestätigt, dass Ihre Nachricht gesendet wird.

2 Warten Sie auf eine Quittierung.

Bei erfolgreicher Durchführung:

- Ein positiver Hinweiston erklingt.
- Im Display wird ein positiver Kurzhinweis angezeigt.

Bei nicht erfolgreicher Durchführung:

- Ein negativer Hinweiston erklingt.
- Im Display wird ein negativer Kurzhinweis angezeigt.
- Das Funkgerät fährt mit dem Bildschirm `Wiederholen` fort. Weitere Informationen finden Sie unterErneutes Senden von Textnachrichten auf Seite 161.

5.7.20

Privacy

Durch den Einsatz softwaregestützter Verschlüsselung verhindert diese Funktion, wenn aktiviert, unbefugtes Zuhören auf einem Kanal. Die Signalisierungs- und Benutzeridentifikationsteile einer Übertragung werden nicht verschlüsselt.

Um verschlüsselt senden zu können, muss die Verschlüsselung für den Kanal aktiviert sein, während dies für empfangende Funkgeräte nicht erforderlich ist. Kanäle mit aktivierter Verschlüsselung können weiterhin normale (unverschlüsselte) Übertragungen empfangen.

Ihr Gerät unterstützt erweiterte Verschlüsselung.

Zum Entschlüsseln eines Anrufs oder von Daten mit aktivierter Verschlüsselung muss Ihr Funkgerät den gleichen Schlüsselwert oder die gleiche Schlüssel-ID wie das sendende Funkgerät verwenden.

Wenn ihr Funkgerät einen verschlüsselten Anruf mit anderem Schlüsselwert und anderer Schlüssel-ID empfängt, hören Sie gar nichts für eine erweiterte Verschlüsselung.

Je nachdem, wie Ihr Funkgerät programmiert wurde, können Funkgeräte auf einem Kanal mit aktivierter Verschlüsselung weiterhin normale (unverschlüsselte) Übertragungen empfangen. Darüber hinaus kann das

Funkgerät einen Warnton ausgeben oder nicht. Auch dies richtet sich danach, wie es programmiert wurde.

HINWEIS:
Diese Funktion ist auf Citizens Band-Kanälen nicht verfügbar, die sich auf der gleichen Frequenz befinden.

Die grüne LED leuchtet, während das Funkgerät sendet. Während des Empfangs eines Rufs mit aktivierter Verschlüsselung blinkt sie schnell.

HINWEIS:
Die Verschlüsselungsfunktion wird nicht für alle Funkgerätmodelle angeboten oder sie haben eine andere Konfiguration. Weitere Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator.

5.7.20.1

Ein- und Ausschalten des Datenschutzes

Führen Sie die Vorgehensweise zum Ein- und Ausschalten der Verschlüsselung auf Ihrem Funkgerät durch.

1 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie die programmierte Taste **Verschlüsselung**. Überspringen Sie die nachfolgenden Schritte.
- Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis `Verschl.`. Drücken Sie OK, um die Option auszuwählen.

5 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie ▲ oder ▼ bis `Ein`. Drücken Sie OK, um die Option auszuwählen. Im Display wird ✓ neben `Ein` angezeigt.

- Drücken Sie ▲ oder ▼ bis Aus. Drücken Sie OK, um die Option auszuwählen. Im Display wird ✓ neben Aus angezeigt.

5.7.21

Antwortsperre

Anhand dieser Funktion können Sie verhindern, dass Ihr Funkgerät auf eingehende Übertragungen reagiert.

HINWEIS:
Dies ist eine käufliche Funktion. Klären Sie mit Ihrem Händler oder Systemadministrator, wie das Funkgerät konfiguriert wurde.

Wenn aktiviert, generiert das Funkgerät keine abgehenden Übertragungen in Antwort auf eingehende Übertragungen, wie etwa Funkgerätkontrolle, Rufhinweis, Funkgerät deaktivieren, Remote-Überwachung, Automatischer Registrierungsservice (ARS), Antwort auf Einzelrufe und Senden von GNSS-Standortberichten. Ihr Funkgerät kann keine Einzelrufbestätigungen empfangen, wenn diese Funktion aktiviert ist. Das Funkgerät kann jedoch manuell Übertragungen senden.

5.7.21.1

Ein-/Ausschalten der Antwortsperre

Führen Sie die Vorgehensweise zum Ein- oder Ausschalten der Antwortsperre auf Ihrem Funkgerät durch.

Drücken Sie die programmierte **Antwortsperre**-Taste.

Bei erfolgreicher Durchführung:

- Ein positiver Hinweiston erklingt.
- Im Display wird ein kurzzeitiger positiver Kurzhinweis angezeigt.

Bei nicht erfolgreicher Durchführung:

- Ein negativer Hinweiston erklingt.
- Im Display wird ein kurzzeitiger negativer Kurzhinweis angezeigt.

5.7.22

Blockieren/Wiederherstellen

Mit dieser Funktion können Sie jedes im System befindliche Funkgerät aktivieren oder deaktivieren. Der Händler oder Systemadministrator kann z. B. ein gestohlenes Funkgerät deaktivieren und damit für

unberechtigte Benutzer unbrauchbar machen oder ein wiedergefundenes Funkgerät aktivieren.

Ein Funkgerät kann über die Konsole oder einen von einem anderen Funkgerät initiierten Befehl deaktiviert (blockiert) oder aktiviert (wiederhergestellt) werden.

Sobald ein Funkgerät deaktiviert wurde, wird ein negativer Hinweiston ausgegeben, und auf der Startseite erscheint `Kanal gesperrt`.

Wenn für das Funkgerät Stun aktiviert wird, kann das Funkgerät keine benutzerinitiierten Services auf dem System anfordern oder empfangen, das die Stun-Vorgehensweise ausgeführt hat. Das Funkgerät kann jedoch zu einem anderen System wechseln. Das Funkgerät sendet weiterhin GNSS-Positionsberichte und kann aus der Ferne im Stun-Modus überwacht werden.

HINWEIS:
Der Händler oder Systemadministrator kann ein Funkgerät permanent deaktivieren. Weitere Informationen finden Sie unter Funkgerät deaktivieren auf Seite 175.

5.7.22.1

Blockieren eines Funkgeräts

Führen Sie die Vorgehensweise zum Deaktivieren eines Funkgeräts durch.

1. Drücken Sie die vorprogrammierte **Funkgerät deaktivieren**-Taste.

2. Drücken Sie ▲ oder ▼ bis zum gewünschten Aliasnamen oder zur gewünschten ID.Drücken Sie OK, um die Option auszuwählen.

   Das Display zeigt `Funkg.deaktiv.: <Funkgeräte-Alias oder -ID>` an.Die grüne LED blinkt.

3. Warten Sie auf eine Quittierung.

   Bei erfolgreicher Durchführung:

   - Ein positiver Hinweiston erklingt.
   - Im Display wird ein positiver Kurzhinweis angezeigt.

   Bei nicht erfolgreicher Durchführung:

   - Ein negativer Hinweiston erklingt.

- Im Display wird ein negativer Kurzhinweis angezeigt.

5.7.22.2

Blockieren von Funkgeräten mithilfe der Kontaktliste

Führen Sie die Vorgehensweise zum Deaktivieren eines Funkgeräts mithilfe der Kontaktliste durch.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Kontakte`.Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis zum gewünschten Aliasnamen oder zur gewünschten ID.Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis `FunkgDeak.` Drücken Sie OK, um die Option auszuwählen.

Im Display wird `Funkgerät deakt.: <Funkgeräte-Alias oder -ID>` angezeigt. Die grüne LED blinkt.

5 Warten Sie auf eine Quittierung.

Bei erfolgreicher Durchführung:

- Ein positiver Hinweiston erklingt.
- Im Display wird ein positiver Kurzhinweis angezeigt.

Bei nicht erfolgreicher Durchführung:

- Ein negativer Hinweiston erklingt.
- Im Display wird ein negativer Kurzhinweis angezeigt.

5.7.22.3

Blockieren von Funkgeräten über manuelles Wählen

Führen Sie die Vorgehensweise zum Deaktivieren eines Funkgeräts über manuelles Wählen durch.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis Kontakte.Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis Man. Wählen.

Drücken Sie OK, um die Option auszuwählen.

4 Geben Sie die Funkgerät-ID ein, und drücken Sie OK, um fortzufahren.

5 Drücken Sie ▲ oder ▼ bis FunkgDeak. Drücken Sie OK, um die Option auszuwählen.

Im Display wird eine Zwischenstand-Kurznotiz angezeigt und damit bestätigt, dass die Anfrage ausgeführt wird. Die grüne LED blinkt.

6 Warten Sie auf eine Quittierung.

Bei erfolgreicher Durchführung:

- Ein positiver Hinweiston erklingt.
- Im Display wird ein positiver Kurzhinweis angezeigt.

Bei nicht erfolgreicher Durchführung:

- Ein negativer Hinweiston erklingt.
- Im Display wird ein negativer Kurzhinweis angezeigt.

5.7.22.4

Wiederherstellen eines Funkgeräts

Führen Sie die Vorgehensweise zum Aktivieren eines Funkgeräts durch.

1 Drücken Sie die konfigurierte **Funkgerät aktivieren**-Taste.

2 Drücken Sie ▲ oder ▼ bis zum gewünschten Aliasnamen oder zur gewünschten ID.Drücken Sie OK, um die Option auszuwählen.

Das Display zeigt `Funkg.aktiv.: <Funkgeräte-Alias oder -ID>` an.Die grüne LED leuchtet.

3 Warten Sie auf eine Quittierung.

Bei erfolgreicher Durchführung:

- Ein positiver Hinweiston erklingt.
- Im Display wird ein positiver Kurzhinweis angezeigt.

Bei nicht erfolgreicher Durchführung:

- Ein negativer Hinweiston erklingt.
- Im Display wird ein negativer Kurzhinweis angezeigt.

5.7.22.5

Wiederherstellen eines Funkgeräts mithilfe der Kontaktliste

Führen Sie die Vorgehensweise zum Aktivieren eines Funkgeräts mithilfe der Kontaktliste durch.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Kontakte`.Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis zum gewünschten Aliasnamen oder zur gewünschten ID.Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis `FunkgAkt`. Drücken Sie OK, um die Option auszuwählen.

Das Display zeigt `Funkg.aktiv.: <Funkgeräte-Alias oder -ID>` an.Die grüne LED leuchtet.

5 Warten Sie auf eine Quittierung.

Bei erfolgreicher Durchführung:

- Ein positiver Hinweiston erklingt.
- Im Display wird ein positiver Kurzhinweis angezeigt.

Bei nicht erfolgreicher Durchführung:

- Ein negativer Hinweiston erklingt.
- Im Display wird ein negativer Kurzhinweis angezeigt.

5.7.22.6

Wiederherstellen eines Funkgeräts über manuelles Wählen

Führen Sie die Vorgehensweise zum Aktivieren eines Funkgeräts über manuelles Wählen durch.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis Kontakte.Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis Man. Wählen.

Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis Einzelruf. Drücken Sie OK, um die Option auszuwählen.

In der ersten Textzeile wird Funkgerät-Nr.: angezeigt.

5 Geben Sie die Funkgerät-ID ein, und drücken Sie OK, um fortzufahren.

6 Drücken Sie ▲ oder ▼ bis FunkgAkt. Drücken Sie OK, um die Option auszuwählen.

Die grüne LED leuchtet.

5.7.23

Funkgerät deaktivieren

Diese Funktion bietet eine erweiterte Sicherheitsmaßnahme, um den nicht autorisierten Zugriff auf das Funkgerät zu beschränken.

Die Funktion „Funkgerät deaktivieren“ kann ein Funkgerät unbrauchbar machen. Der Händler oder Systemadministrator kann ein verlorenes oder verlegtes Funkgerät deaktivieren, um die nicht autorisierte Verwendung zu verhindern.

Beim Einschalten zeigt ein deaktiviertes Funkgerät vorübergehend die Meldung `Funkgerät deaktiviert` auf dem Bildschirm an, um den deaktivierten Status anzuzeigen.

HINWEIS:
Ein deaktiviertes Funkgerät kann nur in einem Reparatur-Center von Motorola Solutions wiederhergestellt werden. Weitere Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator.

5.7.24

Alleinarbeiter

Der Alleinarbeiterschutz löst einen Notruf aus, wenn eine vordefinierte Zeit lang keine Benutzeraktivität erfasst wird, d. h. beispielsweise keine Taste am Funkgerät gedrückt wird oder der Kanalwahlschalter nicht betätigt wird.

Wurde während der einprogrammierten Dauer keine Benutzeraktivität erfasst, warnt das Funkgerät den Benutzer durch ein akustisches Signal vor, sobald der Inaktivitäts-Timer abgelaufen ist.

Haben Sie auch nach Ablauf des vordefinierten Ansprechzeit-Timers noch nicht bestätigt, löst das Funkgerät ein Notsignal aus, so wie vom Händler oder Systemadministrator programmiert.

Weitere Informationen finden Sie unter Notruf auf Seite 140.

HINWEIS:
Weitere Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator.

5.7.25

Passwortgeschützter Zugriff auf das Funkgerät

Diese Funktion ermöglicht Ihnen die Beschränkung des Zugriffs auf das Funkgerät, indem ein Passwort abgefragt wird, wenn das Gerät eingeschaltet wird.

5.7.25.1

Zugreifen auf Funkgeräte mithilfe von Kennwörtern

Führen Sie die Vorgehensweise für das Zugreifen auf Ihr Funkgerät mit einem Passwort durch.

1 Geben Sie das aktuelle vierstellige Passwort ein.

- Drücken Sie ▲ oder ▼, um den numerischen Wert jeder Ziffer zu bearbeiten, und drücken Sie OK, um die Eingabe zu bestätigen und zur nächsten Ziffer zu gehen.

2 Drücken Sie OK, um das Passwort einzugeben.

Bei erfolgreicher Durchführung wird das Funkgerät eingeschaltet.
Bei nicht erfolgreicher Durchführung:

- Nach dem ersten und zweiten Versuch wird auf dem Display `Falsches Passwort` angezeigt. Wiederholen Sie Schritt 1.
- Nach dem dritten Versuch erscheint im Display `Falsches Passwort` und dann `Gerät gesperrt`. Ein Hinweiston ertönt. Die gelbe LED blinkt. Ihr Funkgerät wird 15 Minuten lang gesperrt.

HINWEIS:
Im gesperrten Status reagiert das Funkgerät nur auf Eingaben des **Ein-/Aus-/Lautstärkereglers** und der vorprogrammierten Taste **Hintergrundbeleuchtung**.

5.7.25.2

Ein-/Ausschalten der Passwortsperre

Führen Sie die Vorgehensweise zum Ein- und Ausschalten der Passwortsperre auf Ihrem Funkgerät durch.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Dienstprogramme`.

Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis

`Funkgeräteinstellungen`. Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis `Passw-Sperre`.

Drücken Sie OK, um die Option auszuwählen.

5 Geben Sie das aktuelle vierstellige Passwort ein.

- Über ein Tastenfeldmikrofon.
- Drücken Sie ▲ oder ▼, um den numerischen Wert jeder Ziffer zu bearbeiten, und drücken Sie OK, um die Eingabe zu bestätigen und zur nächsten Ziffer zu gehen.
  Bei der Passworteingabe ertönt mit jedem Drücken einer Taste ein positiver Hinweiston.

6 Drücken Sie OK, um das Passwort einzugeben.

Wenn das Passwort falsch ist, erscheint im Display `Falsches Passwort`, und das Funkgerät zeigt automatisch wieder das vorhergehende Menü an.

7 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie ▲ oder ▼ bis `Einschalten`.

  Drücken Sie OK, um die Option auszuwählen.
  Im Display wird ✓ neben `Einschalten` angezeigt.
- Drücken Sie ▲ oder ▼ bis `Abschalten`.

  Drücken Sie OK, um die Option auszuwählen.
  Im Display wird ✓ neben `Abschalten` angezeigt.

5.7.25.3

Entsperren von Funkgeräten

Im gesperrten Zustand kann Ihr Funkgerät keine Anrufe empfangen. Führen Sie die Vorgehensweise zum Entsperren Ihres Funkgeräts durch.

Führen Sie einen der folgenden Schritte aus:

- Wenn das Funkgerät eingeschaltet ist, warten Sie 15 Minuten, und wiederholen Sie dann die Schritte unter Zugreifen auf Funkgeräte mithilfe von Kennwörtern auf Seite 176, um auf das Funkgerät zuzugreifen.
- Wenn das Funkgerät ausgeschaltet ist, schalten Sie das Gerät ein. Ihr Funkgerät startet den 15-Minuten-Timer für die Sperre.
  Ein Hinweiston ertönt. Die gelbe LED blinkt. Im Display wird `Gerät gesperrt` angezeigt.

  Warten Sie 15 Minuten, und wiederholen Sie dann die Schritte unter Zugreifen auf Funkgeräte mithilfe von Kennwörtern auf Seite 176, um auf das Funkgerät zuzugreifen.

5.7.25.4

Ändern von Kennwörtern

Führen Sie die Vorgehensweise zum Ändern von Kennwörtern auf Ihrem Funkgerät durch.

1. Drücken Sie OK, um das Menü aufzurufen.
2. Drücken Sie ▲ oder ▼ bis `Dienstprogramme`.

   Drücken Sie OK, um die Option auszuwählen.
3. Drücken Sie ▲ oder ▼ bis

   `Funkgeräteinstellungen`. Drücken Sie OK, um die Option auszuwählen.
4. Drücken Sie ▲ oder ▼ bis `Passw-Sperre`.

   Drücken Sie OK, um die Option auszuwählen.
5. Geben Sie das aktuelle Passwort mit vier Ziffern ein,

   und drücken Sie OK, um fortzufahren.

Wenn das Passwort falsch ist, erscheint im Display `Falsches Passwort`, und das Funkgerät zeigt automatisch wieder das vorhergehende Menü an.

6 Drücken Sie ▲ oder ▼ bis `Passw.änd.` angezeigt wird. Drücken Sie OK, um die Option auszuwählen.

7 Geben Sie ein neues vierstelliges Passwort ein, und drücken Sie OK, um fortzufahren.

8 Geben Sie das neue vierstellige Passwort noch einmal ein, und drücken Sie OK, um fortzufahren.

Bei erfolgreicher Durchführung wird auf dem Display `Passwort geändert` angezeigt.
Bei nicht erfolgreicher Durchführung wird auf dem Display `PW stimmen nicht überein` angezeigt.

Der Bildschirm wechselt automatisch zum vorherigen Menü.

Benachrichtigungsliste

Ihr Funkgerät hat eine Mitteilungsliste, die alle Ihre „ungelesenen“ Ereignisse auf dem Kanal, wie z. B. ungelesene Textnachrichten, Telemetrienachrichten, verpasste Rufe und Rufhinweise sammelt.

Auf dem Display wird das **Benachrichtigungssymbol** angezeigt, wenn die Benachrichtigungsliste mindestens ein Ereignis enthält.

Die Liste unterstützt maximal 40 ungelesene Ereignisse. Wenn die Liste voll ist, ersetzt das nächste Ereignis automatisch den jeweils ältesten Listeneintrag. Die Ereignisse werden nach dem Lesen aus der Benachrichtigungsliste entfernt.

Für Textnachrichten, verpasste Rufe und Rufhinweise beträgt die maximale Anzahl 30 Textnachrichten und 10 verpasste Rufe bzw. Rufhinweise. Diese maximale Anzahl hängt von der Kapazität der einzelnen Funktionslisten ab (Jobtickets oder Textnachrichten, verpasste Rufe oder Rufhinweise).

5.7.26.1

Aufrufen der Mitteilungsliste

Führen Sie die Vorgehensweise zum Aufrufen der Mitteilungsliste auf Ihrem Funkgerät durch.

1 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie die programmierte Taste **Mitteilung**. Überspringen Sie die nachfolgenden Schritte.
- Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie OK, um das Menü aufzurufen.

3 Drücken Sie ▲ oder ▼ bis `Mitteilung`. Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis zum gewünschten Ereignis. Drücken Sie OK, um die Option auszuwählen.

Drücken Sie ↩ lang, um zum Startbildschirm zurückzukehren.

5.7.27

Over-the-Air Programmierung

Ihr Händler kann Ihr Funkgerät über Over-the-Air-Programmierung (OTAP) ohne physische Verbindung ferngesteuert aktualisieren. Darüber hinaus können auch einige Einstellungen über OTAP konfiguriert werden.

Wenn OTAP auf Ihrem Funkgerät aktiv ist, blinkt die grüne LED.

Wenn Ihr Funkgerät große Datenmengen empfängt:

- Das Display zeigt das Symbol **Große Datenmengen** an.
- Der Kanal ist belegt.
- Ein negativer Hinweiston erklingt, wenn Sie die **PTT**-Taste drücken.

Wenn OTAP abgeschlossen ist, je nach Konfiguration:

- Ein Hinweiston ertönt. Auf dem Display wird `Aktualisierung Neustart` angezeigt. Das Funkgerät wird durch Aus- und Einschalten neu gestartet.

- Sie können `Jetzt neu start.` oder `Später` auswählen. Wenn Sie `Später` auswählen, wechselt Ihr Funkgerät zum vorherigen Bildschirm. Auf dem Display wird das **OTAP-Verzögerungs-Timer**-Symbol angezeigt, bis der automatische Neustart erfolgt.

Wenn Ihr Funkgerät nach dem automatischen Neustart eingeschaltet wird:

- Bei erfolgreichem Abschluss wird auf dem Display `SW-Update abgeschlossen` angezeigt.
- Schlägt der Vorgang fehl, so zeigt das Display `SW-Update fehlg.` angezeigt.

Informationen zur aktualisierten Softwareversion finden Sie unter Überprüfen der Software-Aktualisierungsinformationen auf Seite 213.

5.7.28

Anzeige der Empfangssignalstärke (RSSI)

Mit dieser Funktion können Sie die Werte für die Anzeige der Empfangssignalstärke (RSSI) ansehen.

Auf dem Display wird das **RSSI**-Symbol in der oberen rechten Ecke angezeigt. Unter Anzeigesymbole finden Sie weitere Informationen zum **RSSI**-Symbol.

5.7.28.1

Anzeigen von RSSI-Werten

Führen Sie die Vorgehensweise zum Anzeigen von RSSI-Werten auf Ihrem Funkgerät durch.

Auf dem Startbildschirm:

1. Drücken Sie innerhalb von fünf Sekunden ◀ dreimal und dann sofort ▶.

   Im Display werden die aktuellen RSSI-Werte angezeigt.

2. Drücken Sie lang, um zum Startbildschirm zurückzukehren.

5.7.29

Frontplattenprogrammierung

Sie können bestimmte Funktionsparameter in der Frontplattenprogrammierung anpassen, um die Verwendung des Funkgeräts zu optimieren.

Die folgenden Tasten werden bei Bedarf verwendet, um durch die Funktionsparameter zu navigieren.

Nach oben/nach unten-Navigationstaste

Drücken Sie diese Taste, um horizontal oder vertikal durch die Optionen zu navigieren oder um Werte zu erhöhen oder zu verringern.

Menü-/OK-Taste

Drücken Sie diese Taste, um die Option zu wählen bzw. ein Untermenü aufzurufen.

Zurück-/Startbildschirm-Taste

Kurz drücken, um zum vorhergehenden Menü zurückzukehren oder um den Auswahlbildschirm zu verlassen.

Durch Gedrückthalten kehren Sie zum Startbildschirm zurück.

5.7.29.1

Eingabe von Frontplattenprogrammierung

Führen Sie die Vorgehensweise zum Aufrufen des Bedienfeld-Programmiermodus (FFP) auf Ihrem Funkgerät durch.

1. Drücken Sie OK, um das Menü aufzurufen.
2. Drücken Sie ▲ oder ▼ bis `Dienstprogramme`.Drücken Sie OK, um die Option auszuwählen.
3. Drücken Sie ▲ oder ▼ bis `Funkgerät programmieren`. Drücken Sie OK, um die Option auszuwählen.

5.7.29.2

Bearbeiten von Parametern im FPP-Modus

Verwenden Sie bei der Navigation durch die Funktionsparameter die folgenden Tasten.

- ▲ , ▼ – Zum Durchblättern von Optionen, Erhöhen/Verringern von Werten und um senkrecht zu navigieren.
- OK – Zum Wählen der Option bzw. zum Aufrufen eines Untermenüs.

- – Kurz drücken, um zum vorhergehenden Menü zurückzukehren oder um den Auswahlbildschirm zu verlassen. Gedrückt halten, um zum Ausgangsbildschirm zurückzukehren.

5.7.30

Wi-Fi-Betrieb

Wi-Fi® ist eine eingetragene Marke der Wi-Fi Alliance®.

HINWEIS:
Diese Funktion gilt nur für DP4601e .

Diese Funktion ermöglicht Ihnen, ein WLAN-Netzwerk einzurichten und eine Verbindung damit herzustellen. Wi-Fi unterstützt Aktualisierungen an der Firmware des Funkgeräts, Codeplug und Ressourcen, wie z. B. Sprachpakete und Sprachansage.

5.7.30.1

Ein-/Ausschalten von WLAN

Die programmierte Taste **Ein-/Ausschalten von WLAN** wird von Ihrem Händler oder Systemadministrator zugeordnet. Klären Sie mit Ihrem Händler oder Systemadministrator, wie das Funkgerät konfiguriert wurde.

Sprachansagen für die vorprogrammierte Taste **WLAN ein oder aus** können über CPS gemäß den Benutzeranforderungen angepasst werden. Weitere Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator.

Sie können WLAN durch Ausführen einer der folgenden Aktionen ein- oder ausschalten.

- Drücken Sie die vorprogrammierte Taste **WLAN ein oder aus**. Die Sprachansage besagt: WLAN wird eingeschaltet oder WLAN wird ausgeschaltet.
- Rufen Sie diese Funktion über das Menü auf.

  a. Drücken Sie OK, um das Menü aufzurufen.

  b. Drücken Sie ▲ oder ▼ bis WLAN, und drücken Sie OK zum Auswählen.

  c. Drücken Sie ▲ oder ▼ bis WLAN ein und drücken Sie OK zum Auswählen.

  Drücken Sie OK, um WLAN zu aktivieren. Im Display wird ✓ neben Aktiviert angezeigt.

Drücken Sie OK, um das WLAN zu deaktivieren. Neben Aktiviert wird kein ✓ mehr angezeigt.

5.7.30.2

Verbinden mit einem Access Point im Netzwerk

Wenn Sie WLAN einschalten, startet das Funkgerät einen Suchlauf und stellt eine Verbindung zu einem Access Point im Netzwerk her.

Sie können auch über das Menü eine Verbindung mit einem Access Point im Netzwerk herstellen.

1. Drücken Sie OK, um das Menü aufzurufen.
2. Drücken Sie ▲ oder ▼ bis WLAN, und drücken Sie OK zum Auswählen.
3. Drücken Sie ▲ oder ▼ bis Netzwerke, und drücken Sie OK zum Auswählen.
4. Drücken Sie ▲ oder ▼ bis zu einem Netzwerk-Access-Point, und drücken Sie OK zum Auswählen.
5. Drücken Sie ▲ oder ▼ bis Verbinden, und drücken Sie OK zum Auswählen.

Wenn die Verbindung erfolgreich hergestellt werden konnte, zeigt das Funkgerät einen Hinweis an, und der Access Point des Netzwerks wird in der Profilliste gespeichert.

5.7.30.3

Prüfen des WLAN-Verbindungsstatus

Führen Sie die Vorgehensweise zum Prüfen des WLAN-Verbindungsstatus durch.

Drücken Sie die vorprogrammierte Taste **Wi-Fi-Status abfragen**, um den Verbindungsstatus über eine Sprachansage abzurufen. Die Sprachansage besagt: Wi-Fi

ist deaktiviert, Wi-Fi ist aktiviert, aber keine Verbindung, oder Wi-Fi ist aktiviert mit Verbindung.

- Das Display zeigt `WLAN Aus`, wenn WLAN ausgeschaltet ist.
- Das Display zeigt `WLAN Ein, Verbunden`, wenn das Funkgerät mit einem Netzwerk verbunden ist.
- Das Display zeigt `WLAN Ein, Nicht verbunden`, wenn das Funkgerät zwar eingeschaltet, aber nicht mit einem Netzwerk verbunden ist.

  Sprachansagen für die WLAN-Statusabfrageergebnisse können über CPS gemäß den Benutzeranforderungen angepasst werden. Weitere Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator.

  HINWEIS:
  Die programmierte Taste **Wi-Fi-Status abfragen** wird von Ihrem Händler oder Systemadministrator zugeordnet. Klären Sie mit Ihrem Händler oder Systemadministrator, wie das Funkgerät konfiguriert wurde.

5.7.30.4

Aktualisieren der Netzwerkliste

Gehen Sie wie folgt vor, um die Netzwerkliste zu aktualisieren.

- Gehen Sie wie folgt vor, um die Netzwerkliste über das Menü zu aktualisieren.

  a. Drücken Sie OK, um das Menü aufzurufen.

  b. Drücken Sie ▲ oder ▼ bis `WLAN`, und drücken Sie OK zum Auswählen.

  c. Drücken Sie ▲ oder ▼ bis `Netzwerke`, und drücken Sie OK zum Auswählen.

  Wenn Sie das Netzwerkmenü öffnen, aktualisiert das Funkgerät automatisch die Netzwerkliste.

- Wenn Sie sich bereits im Netzwerk-Menü befinden, führen Sie die folgende Maßnahme durch, um die Netzwerkliste zu aktualisieren.

Drücken Sie ▲ oder ▼ zu Aktualisieren und drücken Sie OK zum Auswählen.

Das Funkgerät aktualisiert sich und zeigt die neueste Netzwerkliste an.

5.7.30.5

Hinzufügen eines Netzwerks

Wenn ein bevorzugtes Netzwerk nicht in der Liste der verfügbaren Netzwerke angezeigt wird, führen Sie die folgenden Maßnahmen durch, um ein Netzwerk hinzuzufügen.

1. Drücken Sie OK, um das Menü aufzurufen.
2. Drücken Sie ▲ oder ▼ bis WLAN, und drücken Sie OK zum Auswählen.
3. Drücken Sie ▲ oder ▼ bis Netzwerke, und drücken Sie OK zum Auswählen.
4. Drücken Sie ▲ oder ▼ zu Netzwerk hinzufügen und drücken Sie OK zum Auswählen.
5. Geben Sie die SSID (Service Set Identifier) ein, und drücken Sie OK.
6. Drücken Sie ▲ oder ▼ zu Öffnen und drücken Sie OK zum Auswählen.
7. Geben Sie das Kennwort ein, und drücken Sie OK.

   Das Funkgerät zeigt eine Bestätigung an, um darauf hinzuweisen, dass das Netzwerk erfolgreich gespeichert wurde.

5.7.30.6

Anzeigen von Details zu Netzwerk-Access-Points

Gehen Sie wie folgt vor, um die Details zu Netzwerk-Access-Points anzuzeigen.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis WLAN, und drücken Sie OK zum Auswählen.

3 Drücken Sie ▲ oder ▼ bis Netzwerke, und drücken Sie OK zum Auswählen.

4 Drücken Sie ▲ oder ▼ bis zu einem Netzwerk-Access-Point, und drücken Sie OK zum Auswählen.

5 Drücken Sie ▲ oder ▼ zu Details anzeigen und drücken Sie OK zum Auswählen.

Für einen verbundenen Netzwerk-Access Point werden die SSID (Service Set Identifier), der Sicherheitsmodus, die MAC-Adresse (Media Access Control) und die IP-Adresse (Internet Protocol) angezeigt.

Für einen nicht verbundenen Netzwerk-Access Point werden die SSID (Service Set Identifier) und der Sicherheitsmodus angezeigt.

5.7.30.7

Entfernen von Netzwerk-Access Points

Führen Sie die folgenden Aktionen aus, um Netzwerk-Access Points aus der Profilliste zu entfernen.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis WLAN, und drücken Sie OK zum Auswählen.

3 Drücken Sie ▲ oder ▼ bis Netzwerke, und drücken Sie OK zum Auswählen.

4 Drücken Sie ▲ oder ▼ zum ausgewählten Netzwerk-Access Point und drücken Sie OK zum Auswählen.

5 Drücken Sie ▲ oder ▼ zu Entfernen und drücken Sie OK zum Auswählen.

6 Drücken Sie ▲ oder ▼ zu JA und drücken Sie OK zum Auswählen.

Das Funkgerät zeigt eine Bestätigung an, um darauf hinzuweisen, dass der ausgewählte Netzwerk-Access-Point erfolgreich entfernt wurde.

5.8

Energieversorgung

In diesem Kapitel wird die Verwendung der Einstellungsfunktionen auf Ihrem Funkgerät beschrieben.

5.8.1

Sperren und Entsperren der Tastatur

Führen Sie die Vorgehensweise zum Sperren und Entsperren der Tastatur des Funkgeräts durch.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis Dienstprogramme. Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis Funkgeräteinstellungen. Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis `TastSperre`. Drücken Sie OK, um die Option auszuwählen.

- Wenn die Tastatur gesperrt ist, erscheint im Display `Tastatur gesperrt`.
- Wenn die Tastatur nicht gesperrt ist, zeigt das Display `Tastatur nicht gesperrt` an.

Das Funkgerät kehrt zum Startbildschirm zurück.

5.8.2

Bestimmen des Kabeltyps

Führen Sie die folgenden Schritte aus, um den Kabeltyp auszuwählen, den Ihr Funkgerät verwendet.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Dienstprogramme`. Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis `Funkgeräteinstellungen`. Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis `Kabeltyp`. Drücken Sie OK, um die Option auszuwählen.

5 Drücken Sie ▲ oder ▼, um die ausgewählte Option zu ändern.

Der aktuelle Kabeltyp ist mit einem ✓ gekennzeichnet.

5.8.3

Einstellen des Menü-Timers

Mit dieser Funktion können Sie festlegen, wie lange Ihr Funkgerät das Menü anzeigt, bevor es automatisch wieder auf den Ausgangsbildschirm umschaltet. Folgen Sie den Anweisungen, um den Menü-Timer einzustellen.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis Dienstprogramme.Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis Funkgeräteinstellungen.Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis Anzeige. Drücken Sie OK, um die Option auszuwählen.

5 Drücken Sie ▲ oder ▼ bis Menü-Timer. Drücken Sie OK, um die Option auszuwählen.

6 Drücken Sie ▲ oder ▼ bis zur gewünschten Einstellung. Drücken Sie OK, um die Option auszuwählen.

5.8.4

Text-in-Sprache

Die Funktion Text-in-Sprache kann nur vom Händler oder Systemadministrator aktiviert werden. Wenn die Funktion Text in Speech aktiviert ist, wird die Sprachansage-Funktion automatisch deaktiviert. Wenn die Sprachansage-Funktion aktiviert ist, wird die Text-in-Sprache-Funktion automatisch deaktiviert.

Diese Funktion aktiviert die Sprachansage des Funkgeräts mit den folgenden Funktionen:

- Aktueller Kanal
- Aktuelle Zone
- Programmierbare Taste ein- bzw. aus
- Inhalt der empfangenen Textnachrichten
- Inhalt von empfangenen Job Tickets

Dieses Tonsignal kann bedarfsspezifisch eingestellt werden. Die Funktion ist besonders nützlich, wenn der Benutzer Schwierigkeiten hat, die Anzeige im Display zu lesen.

5.8.4.1

Einstellen von Text-in-Sprache

Folgen Sie den Schritten zur Einrichtung der Funktion Text-in-Sprache.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis Dienstprogramme.

Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis

Funkgeräteinstellungen. Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis Kanal-Ansage.

Drücken Sie OK, um die Option auszuwählen.

5 Drücken Sie ▲ oder ▼ bis zu einer der folgenden

Funktionen. Drücken Sie OK, um die Option auszuwählen.

Die verfügbaren Optionen lauten wie folgt:

- Alle
- Nachrichten
- Job Tickets
- Channel
- Zone
- Programmtaste

✓ wird neben der ausgewählten Einstellung angezeigt.

5.8.5

Aktivieren/Deaktivieren der Funktion „Sperre akustischer Rückkopplungen“

Mit dieser Funktion können Sie die akustische Rückkopplung bei eingehenden Anrufen reduzieren.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis Dienstprogramme, und drücken Sie OK zum Auswählen.

3 Drücken Sie ▲ oder ▼ zu FunkgEinstellg und drücken Sie OK zum Auswählen.

4 Drücken Sie ▲ oder ▼ bis AF-Unterdrückung, und drücken Sie OK zum Auswählen.

Sie können durch Drücken der Tasten ◀ oder ▶ die ausgewählte Option ändern.

5 Führen Sie einen der folgenden Schritte aus.

- Drücken Sie OK, um die Sperre akustischer Rückkopplungen zu aktivieren. Im Display wird ✓ neben Aktiviert angezeigt.
- Drücken Sie OK, um die Sperre akustischer Rückkopplungen zu deaktivieren. Neben Aktiviert wird kein ✓ mehr angezeigt.

5.8.6

Einschalten/Ausschalten von GNSS

Das Global Navigation Satellite System (GNSS) ist ein Satellitennavigationssystem, das die genaue Position des Funkgeräts ortet. GNSS umfasst Global Positioning System (GPS) und Global Navigation Satellite System (GLONASS).

HINWEIS:
Ausgewählte Funkgerätmodelle bieten möglicherweise GPS und GLONASS. Die GNSS-Konstellation wird über CPS konfiguriert. Klären Sie mit Ihrem Händler oder Systemadministrator, wie das Funkgerät konfiguriert wurde.

1 Führen Sie einen der folgenden Schritte aus, um GNSS des Funkgeräts ein- oder auszuschalten.

- Drücken Sie die programmierte Taste **GNSS**.
- Drücken Sie OK, um das Menü aufzurufen. Fahren Sie mit dem nächsten Schritt fort.

2 Drücken Sie ▲ oder ▼ bis Dienstprogramme.

Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis

Funkgeräteinstellungen. Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis GNSS. Drücken Sie

OK, um die Option auszuwählen.

5 Drücken Sie OK, um GNSS zu aktivieren/deaktivieren.

Wenn diese Option aktiviert ist, wird ✓ neben Aktiviert angezeigt.
Wenn diese Option deaktiviert ist, wird ✓ neben Aktiviert angezeigt.

5.8.7

Ein-/Ausschalten des Startbildschirms

Sie können den Startbildschirm mithilfe der folgenden Vorgehensweise aktivieren oder deaktivieren.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis Dienstprogramme.

Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis

Funkgeräteinstellungen. Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis Anzeige. Drücken Sie

OK, um die Option auszuwählen.

5 Drücken Sie ▲ oder ▼ bis Introbildschirm.

Drücken Sie OK, um die Option auszuwählen.

6 Drücken Sie OK zum Aktivieren/Deaktivieren des Startbildschirms.

Im Display wird eines der folgenden Ergebnisse angezeigt:

- Wenn diese Option aktiviert ist, wird ✓ neben Aktiviert angezeigt.
- Wenn diese Option deaktiviert ist, wird ✓ neben Aktiviert angezeigt.

5.8.8

Ein-/Ausschalten der Funkgerät-Hinweistöne

Sie können bei Bedarf alle Töne des Funkgeräts aktivieren bzw. deaktivieren außer den Ton für eingehende Notrufe . Führen Sie die Vorgehensweise zum Ein- und Ausschalten von Tönen und Hinweisen auf Ihrem Funkgerät durch.

1 Führen Sie einen der folgenden Schritte aus:
   - Drücken Sie die programmierte Taste **Töne/ Hinweistöne**. Überspringen Sie die folgenden Schritte.
   - Drücken Sie OK , um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis Dienstprogramme.Drücken Sie OK , um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis Funkgeräteinstellungen.Drücken Sie OK , um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis Töne/Hinweistöne. Drücken Sie OK , um die Option auszuwählen.

5 Drücken Sie ▲ oder ▼ bis Alle Töne. Drücken Sie OK , um die Option auszuwählen.

6 Drücken Sie OK, um alle Töne und Hinweistöne zu aktivieren oder deaktivieren. Im Display wird eines der folgenden Ergebnisse angezeigt:
   - Wenn diese Option aktiviert ist, wird ✓ neben Aktiviert angezeigt.

- Wenn diese Option deaktiviert ist, wird ✓ neben Aktiviert angezeigt.

5.8.9

Einstellen der Abweichung der Hinweistonlautstärke

Diese Funktion stellt die Lautstärke der Hinweistöne ein, sodass sie höher oder niedriger als die Lautstärke für Sprache sein können. Führen Sie die Vorgehensweise zum Einstellen der Abweichung der Hinweistonlautstärke auf Ihrem Funkgerät durch.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis Dienstprogramme.

Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis

Funkgeräteinstellungen. Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis Töne/Hinweise.

Drücken Sie OK, um die Option auszuwählen.

5 Drücken Sie ▲ oder ▼ bis Lautst.Offset.

Drücken Sie OK, um die Option auszuwählen.

6 Drücken Sie ▲ oder ▼ bis zur gewünschten Lautstärkeabweichung.

Für jede Lautstärkeabweichung wird jeweils ein Ton in der entsprechenden Lautstärke ausgegeben.

7 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie OK, um die Option auszuwählen. Die gewünschte Lautstärkeabweichung wurde gespeichert.
- Drücken Sie ↩ zum Beenden. Die Änderungen werden verworfen.

5.8.10

Ein-/Ausschalten des Freitons

Führen Sie die Vorgehensweise zum Ein- und Ausschalten des Freitons auf Ihrem Funkgerät durch.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Dienstprogramme`.

Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis `Funkgeräteinstellungen`. Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis `Töne/Hinweistöne`.

Drücken Sie OK, um die Option auszuwählen.

5 Drücken Sie ▲ oder ▼ bis `Freiton`. Drücken Sie OK, um die Option auszuwählen.

6 Drücken Sie OK, um den Freiton zu aktivieren/deaktivieren.

Im Display wird eines der folgenden Ergebnisse angezeigt:

- Wenn diese Option aktiviert ist, wird ✓ neben `Aktiviert` angezeigt.
- Wenn diese Option deaktiviert ist, wird ✓ neben `Aktiviert` angezeigt.

5.8.11

Ein-/Ausschalten des Hinweistons beim Einschalten

Führen Sie die Vorgehensweise zum Ein- und Ausschalten des Hinweistons beim Einschaltton auf Ihrem Funkgerät durch.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis Dienstprogramme.

Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis

Funkgeräteinstellungen. Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis Töne/Hinweistöne.

Drücken Sie OK, um die Option auszuwählen.

5 Drücken Sie ▲ oder ▼ bis Einschalten.

Drücken Sie OK, um die Option auszuwählen.

6 Drücken Sie OK, um den Hinweiston beim Einschalten zu aktivieren/deaktivieren. Im Display wird eines der folgenden Ergebnisse angezeigt:

- Wenn diese Option aktiviert ist, wird ✓ neben Aktiviert angezeigt.
- Wenn diese Option deaktiviert ist, wird ✓ neben Aktiviert angezeigt.

5.8.12

Einstellen der Hinweistöne für Textnachrichten

Sie können den Hinweiston der Textnachricht für alle Einträge in der Kontaktliste anpassen. Führen Sie die Vorgehensweise zum Einstellen von Hinweistönen für Textnachrichten auf Ihrem Funkgerät durch.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis Kontakte. Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis zum gewünschten Aliasnamen oder zur gewünschten ID. Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis `Nachr.Hinweis`.

Drücken Sie OK, um die Option auszuwählen.

5 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie ▲ oder ▼ bis `Momentan`. Drücken Sie OK, um die Option auszuwählen.
  Im Display wird ✓ neben `Momentan` angezeigt.
- Drücken Sie ▲ oder ▼ bis `Wiederholt`.
  Drücken Sie OK, um die Option auszuwählen.
  Im Display wird ✓ neben `Wiederholt` angezeigt.

5.8.13

Leistungspegel

Die Sendeleistung kann für jeden Kanal hoch oder niedrig eingestellt werden.

Hoch
Erlaubt die Kommunikation mit relativ weit entfernten Funkgeräten.

Niedrig
Erlaubt die Kommunikation mit näher befindlichen Funkgeräten.

HINWEIS:
Diese Funktion ist auf Citizens Band-Kanälen nicht verfügbar, die sich auf der gleichen Frequenz befinden.

5.8.13.1

Einstellen der Sendeleistung

Führen Sie die Vorgehensweise zum Einstellen der Sendeleistung auf Ihrem Funkgerät durch.

1 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie die vorprogrammierte Taste **Leistungspegel**. Überspringen Sie die nachfolgenden Schritte.
- Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Dienstprogramme`.Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis Funkgeräteinstellungen.Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis Leistung. Drücken Sie OK, um die Option auszuwählen.

5 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie ▲ oder ▼ bis Hoch. Drücken Sie OK, um die Option auszuwählen.
  Im Display wird ✓ neben Hoch angezeigt.
- Drücken Sie ▲ oder ▼ bis Niedrig. Drücken Sie OK, um die Option auszuwählen.
  Im Display wird ✓ neben Niedrig angezeigt.

6 Drücken Sie ↩ lang, um zum Startbildschirm zurückzukehren.

5.8.14

Anpassen der Displayhelligkeit

Führen Sie die Vorgehensweise zum Einstellen der Displayhelligkeit auf Ihrem Funkgerät durch.

1 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie die programmierte Taste **Helligkeit**. Überspringen Sie die folgenden Schritte.
- Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis Dienstprogramme. Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis Funkgeräteinstellungen. Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis Helligkeit. Drücken Sie OK, um die Option auszuwählen.
Im Display wird die Helligkeitsleiste angezeigt.

5 Drücken Sie ▲ oder ▼ , um die Displayhelligkeit zu erhöhen oder zu verringern. Drücken Sie OK , um die Option auszuwählen.

5.8.15

Einstellen der Displaybeleuchtung

Sie können den Timer für die Displaybeleuchtung des Funkgeräts nach Bedarf anpassen. Diese Einstellung gilt dann auch für die Beleuchtung der Menü-Navigationstasten und der Tastatur. Führen Sie die Vorgehensweise zum Einstellen des Timers der Beleuchtung Ihres Funkgeräts durch.

1 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie die programmierte **Beleuchtung**-Taste. Überspringen Sie die folgenden Schritte.
- Drücken Sie OK , um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Dienstprogramme`. Drücken Sie OK , um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis `Funkgeräteinstellungen`. Drücken Sie OK , um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis `Anzeige`. Drücken Sie OK , um die Option auszuwählen.

5 Drücken Sie ▲ oder ▼ bis `Beleuchtungstimer`. Drücken Sie OK , um die Option auszuwählen.

Wird die LED-Anzeige deaktiviert, wird die Beleuchtung des Displays und der Tastatur automatisch ausgeschaltet. Weitere Informationen finden Sie unterEin-/Ausschalten der LED-Anzeigen auf Seite 201.

5.8.16

Ein- und Ausschalten der automatischen

Hintergrundbeleuchtung (Bel.Autom.)

Sie können die Hintergrundbeleuchtung Ihres Funkgeräts aktivieren bzw. deaktivieren, sodass sie sich bei Bedarf automatisch einschaltet. Wenn diese Option aktiviert ist, wird die Hintergrundbeleuchtung eingeschaltet, wenn das Funkgerät einen Anruf empfängt, bei einem Ereignis der Benachrichtigungsliste oder bei einem Notsignal.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Dienstprogramme`.

Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis `Funkgeräteinstellungen`. Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis `Bel.Autom.`.

5 Drücken Sie OK, um die Beleuchtungsautomatik zu aktivieren oder zu deaktivieren.

Im Display wird eines der folgenden Ergebnisse angezeigt:

- Wenn diese Option aktiviert ist, wird ✓ neben `Aktiviert` angezeigt.
- Wenn diese Option deaktiviert ist, wird ✓ neben `Aktiviert` angezeigt.

5.8.17

Ein-/Ausschalten der LED-Anzeigen

Führen Sie die Vorgehensweise zum Ein- und Ausschalten der LED-Anzeigen auf Ihrem Funkgerät durch.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Dienstprogramme`.

Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis

Funkgeräteinstellungen. Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis LED-Anzeige.

Drücken Sie OK, um die Option auszuwählen.

5 Drücken Sie OK, um die LED-Anzeige zu aktivieren/deaktivieren.

Im Display wird eines der folgenden Ergebnisse angezeigt:

- Wenn diese Option aktiviert ist, wird ✓ neben Aktiviert angezeigt.
- Wenn diese Option deaktiviert ist, wird ✓ neben Aktiviert angezeigt.

5.8.18

Einstellen der Sprachen

Führen Sie die Vorgehensweise zum Einstellen der Sprachen auf Ihrem Funkgerät durch.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis Dienstprogramme.

Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis

Funkgeräteinstellungen.Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis Sprachen. Drücken Sie OK, um die Option auszuwählen.

5 Drücken Sie ▲ oder ▼ bis zur gewünschten Sprache. Drücken Sie OK, um die Option auszuwählen.

Auf dem Display wird ✓ neben der ausgewählten Sprache angezeigt.

5.8.19

Ein-/Ausschalten der Zusatzkarten

Jeder Kanal unterstützt Zusatzkartenfunktionen, die programmierbaren Tasten zugewiesen werden können. Führen Sie die Vorgehensweise zum Ein- und Ausschalten der Zusatzkarten auf Ihrem Funkgerät durch.

Drücken Sie die programmierte Taste **Zusatzkarte**.

5.8.20

Ein-/Ausschalten der Kanalansage

Diese Funktion aktiviert die Sprachansage des Funkgeräts, sodass es die aktuelle Zone bzw. den aktuellen Kanal, die/der vom Benutzer gerade zugewiesen wurde, oder das Drücken einer programmierbaren Taste akustisch angibt.

Die Ansage ist besonders nützlich, wenn der Benutzer Schwierigkeiten hat, die Anzeige im Display zu lesen.

Dieses Tonsignal kann kundenspezifisch eingestellt werden. Führen Sie die Vorgehensweise zum Ein- und Ausschalten der Kanal-Ansage auf Ihrem Funkgerät durch.

1 Führen Sie einen der folgenden Schritte aus:
- Drücken Sie die programmierte **Kanal-Ansage**-Taste. Überspringen Sie die folgenden Schritte.
- Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Dienstprogramme`.Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis `Funkgeräteinstellungen`.Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis Sprachansage.

Drücken Sie OK, um die Option auszuwählen.

5 Drücken Sie OK, um die Sprachansage zu aktivieren oder zu deaktivieren.

- Wenn diese Option aktiviert ist, wird ✓ neben Aktiviert angezeigt.
- Wenn diese Option deaktiviert ist, wird ✓ neben Aktiviert angezeigt.

5.8.21

Ein-/Ausschalten der Digitalmikrofon-AGC

Die automatische Verstärkungsregelung (Automatic Gain Control, AGC) des Digitalmikrofons steuert die Mikrofonverstärkung des Funkgeräts beim Senden in einem digitalen System automatisch.
Diese Funktion unterdrückt laute Geräusche oder verstärkt leise Geräusche. Hierbei wird ein voreingestellter Wert verwendet, um eine konsistente Lautstärke zu gewährleisten. Befolgen Sie die Vorgehensweise zum Ein- oder Ausschalten der Digitalmikrofon-AGC auf Ihrem Funkgerät.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis Dienstprogramme.

Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis Funkgeräteinstellungen. Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis MikAGC-D. Drücken Sie OK, um die Option auszuwählen.

5 Drücken Sie OK, um Digital Microphone AGC zu aktivieren oder zu deaktivieren.

Im Display wird eines der folgenden Ergebnisse angezeigt:

- Wenn diese Option aktiviert ist, wird ✓ neben `Aktiviert` angezeigt.
- Wenn diese Option deaktiviert ist, wird ✓ neben `Aktiviert` angezeigt.

5.8.22

Umschalten des Audiosignals zwischen dem internen Lautsprecher des Funkgeräts und dem kabelgebundenen Zubehör

Führen Sie die Vorgehensweise zum Umschalten der Audioausgabe zwischen dem internen Lautsprecher des Funkgeräts und dem kabelgebundenen Zubehör durch.

Sie können die Audioausgabe zwischen dem eingebauten Lautsprecher des Funkgeräts und dem Lautsprecher des kabelgebundenen Zubehörs hin- und herschalten, vorausgesetzt dass:

- Das kabelgebundene Zubehör mit Lautsprecher angeschlossen ist.
- Das Audiosignal nicht an ein externes Bluetooth-Zubehör weitergeleitet wurde.

Drücken Sie die programmierte **Audio-Umschalttaste**.

Wenn das Audiosignal geändert wurde, ertönt ein Hinweiston.

Das Ausschalten des Funkgeräts oder das Abnehmen des Zubehörs setzt die Audioausgabe auf die internen Lautsprecher des Funkgeräts zurück.

5.8.23

Ein-/Ausschalten der Lautstärkeregelung

Die Audiolautstärke Ihres Funkgeräts wird automatisch so geregelt, dass sie an aktuelle Hintergrundgeräusche in der Umgebung des Funkgeräts, einschließlich stationärer und nicht stationärer Geräuschquellen, angepasst und entsprechend kompensiert wird. Diese Funktion betrifft nur den Empfang und hat keinen Einfluss auf das Sende-Audio. Befolgen Sie die Vorgehensweise zum Ein- und Ausschalten der Lautstärkeregelung auf Ihrem Funkgerät.

HINWEIS:
Während einer Bluetooth-Sitzung ist diese Funktion nicht verfügbar.

1 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie die programmierte Taste **Intelligentes Audio**. Überspringen Sie die nachfolgenden Schritte.
- Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Dienstprogramme`. Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis `Funkgeräteinstellungen`. Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis `Intelligentes Audio`. Drücken Sie OK, um die Option auszuwählen.

5 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie ▲ oder ▼ bis `Ein`. Drücken Sie OK, um die Option auszuwählen. Im Display wird ✓ neben `Ein` angezeigt.
- Drücken Sie ▲ oder ▼ bis `Aus`. Drücken Sie OK, um die Option auszuwählen. Im Display wird ✓ neben `Aus` angezeigt.

5.8.24

Ein-/Ausschalten der Funktion „Vibrant-Verbesserung“

Sie können diese Funktion beim Sprechen in einer Sprache aktivieren, die viele alveolare Vibranten (rollendes „R“) enthält. Führen Sie die Vorgehensweise zum Ein- und Ausschalten der Funktion „Vibrant-Verbesserung“ auf Ihrem Funkgerät durch.

1 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie die programmierte Taste **Vibrant-Verbesserung**. Überspringen Sie die nachfolgenden Schritte.
- Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis Dienstprogramme.Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis Funkgeräteinstellungen.Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis Trill-Ton-Erweiterung. Drücken Sie OK, um die Option auszuwählen.

5 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie ▲ oder ▼ bis Ein. Drücken Sie OK, um die Option auszuwählen. Im Display wird ✓ neben Ein angezeigt.
- Drücken Sie ▲ oder ▼ bis Aus. Drücken Sie OK, um die Option auszuwählen. Im Display wird ✓ neben Aus angezeigt.

5.8.25

Ein- und Ausschalten der dynamischen Mikrofonverzerrungssteuerung

Wenn diese Funktion eingeschaltet ist, kontrolliert das Funkgerät automatisch den Mikrofoneingang und passt den Verstärkungswert an, um Audioclipping zu vermeiden.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis Dienstprogramme. Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis Funkgeräteinstellungen. Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis Mik.-Verzerrung. Drücken Sie OK, um die Option auszuwählen.

5 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie OK, um die dynamische Mikrofonverzerrungssteuerung zu aktivieren. Wenn diese Option aktiviert ist, wird ✓ neben Aktiviert angezeigt.
- Drücken Sie OK, um die dynamische Mikrofonverzerrungssteuerung zu deaktivieren. Wenn diese Option deaktiviert ist, wird ✓ neben Aktiviert angezeigt.

5.8.26

Einstellen der Audioumgebung

Befolgen Sie die Vorgehensweise zum Einstellen der Audioumgebung Ihres Funkgeräts in Abhängigkeit zu Ihrer Umgebung.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis Dienstprogramme. Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis Funkgeräteinstellungen. Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis Audioumgebung. Drücken Sie OK, um die Option auszuwählen.

5 Drücken Sie ▲ oder ▼ bis zur gewünschten Einstellung. Drücken Sie OK, um die Option auszuwählen.

Die Einstellungen sind wie folgt:

- Wählen Sie Standard für die werkseitigen Voreinstellungen aus.
- Wählen Sie Laut aus, um die Lautstärke zu erhöhen, wenn Sie sich in geräuschvollen Umgebungen befinden.
- Wählen Sie Arbeitsgruppe, um das akustische Feedback zu reduzieren, wenn Sie eine Reihe von Funkgeräten benutzen, die sich nahezu an derselben Position befinden.

Auf dem Display wird ✓ neben der ausgewählten Einstellung angezeigt.

5.8.27

Einstellen von Audio-Profilen

Führen Sie die Vorgehensweise zum Einstellen von Audio-Profilen auf Ihrem Funkgerät durch.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis Dienstprogramme.

Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis

Funkgeräteinstellungen. Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis Audio-Profile.

Drücken Sie OK, um die Option auszuwählen.

5 Drücken Sie ▲ oder ▼ bis zur gewünschten

Einstellung. Drücken Sie OK, um die Option auszuwählen.

Die Einstellungen sind wie folgt:

- Wählen Sie Standard zum Deaktivieren des zuvor ausgewählten Audioprofils und zum Zurückkehren zu den werkseitigen Voreinstellungen.
- Wählen Sie Ebene 1, Ebene 2 oder Ebene 3 für Audio-Profile zur Vermeidung von lärmbedingten

Hörverlusten, die typisch für Erwachsene ab dem 40. Lebensjahr sind.

- Wählen Sie `Höhensteig.`, `Mittensteigerung`, oder `Basssteigerung` für Audio-Profile mit einem klareren, etwas nasaleren und einen tieferen Klang.

Auf dem Display wird ✓ neben der ausgewählten Einstellung angezeigt.

5.8.28

Allgemeine Informationen zum Funkgerät

In Ihrem Funkgerät sind Daten zu verschiedenen Parametern gespeichert.

Zu den allgemeinen Informationen Ihres Funkgeräts gehören:

- Akku-Informationen
- Funkgerät-Alias und Funkgeräte-ID
- Firmware- und Codeplug-Version
- Software-Aktualisierung
- GNSS-Informationen
- Standort-Informationen
- Anzeige der Empfangssignalstärke (RSSI)

HINWEIS:

Drücken Sie , um zum vorangehenden Bildschirm zurückzukehren. Drücken Sie lang, um zum Startbildschirm zurückzukehren. Das Funkgerät verlässt den aktuellen Bildschirm, sobald der Inaktivitäts-Timer abgelaufen ist.

5.8.28.1

Aufrufen der Akkudaten

Zeigt Akkuinformationen an.

1. Drücken Sie , um das Menü aufzurufen.
2. Drücken Sie ▲ oder ▼ bis `Dienstprogramme`.

   Drücken Sie , um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis `Geräteinfo`.Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis `Akku Info`.Drücken Sie OK, um die Option auszuwählen. Im Display werden Informationen zum Akku angezeigt.

HINWEIS:
Nur für **IMPRES**-Akkus: Wenn ein Akku in einem IMPRES-Ladegerät aufgefrischt werden muss, zeigt das Display `Akku auffrischen` an. Nach dem Auffrischen werden im Display Informationen zum Akku angezeigt.

5.8.28.2

Prüfen des Funkgerät-Alias und der ID

Führen Sie die Vorgehensweise zum Überprüfen des Funkgerät-Alias und der ID auf Ihrem Funkgerät durch.

1 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie die programmierte Taste **Funkgerät-Alias und ID**. Überspringen Sie die folgenden Schritte.
  Ein positiver Hinweiston erklingt.

  Sie können die programmierte Taste **Funkgerät-Alias und ID** drücken, um zum vorhergehenden Bildschirm zurückzukehren.

- Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Dienstprogramme`. Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis `Geräte-Info`. Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis `Meine ID`. Drücken Sie OK, um die Option auszuwählen.

In der ersten Textzeile wird der Funkgerät-Aliasname angezeigt. In der zweiten Textzeile wird die Funkgerät-ID angezeigt.

5.8.28.3

Überprüfen der Firmware- und Codeplug-Versionen

Führen Sie die Vorgehensweise zum Überprüfen der Firmware- und Codeplug-Version Ihres Funkgeräts durch.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Dienstprogramme`.

Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis `Geräte-Info`.

Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis `Versionen`. Drücken Sie OK, um die Option auszuwählen.

Im Display wird die aktuelle Firmware- und Codeplug-Version angezeigt.

5.8.28.4

Überprüfen der GNSS-Informationen

Sie können GNSS-Informationen Ihres Funkgeräts anzeigen, d. h. Werte wie die folgenden:

- Breitengrad
- Längengrad
- Höhe
- Richtung
- Geschwindigkeit
- Horizontal Dilution of Precision (HDOP – Streubreite der Messwerte in Horizontalrichtung)
- Satelliten
- Version

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Dienstprogramme`.

Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis `Geräteinfo`. Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis `GNSS Info`. Drücken Sie OK, um die Option auszuwählen.

5 Drücken Sie ▲ oder ▼ bis zum gewünschten Element. Drücken Sie OK, um die Option auszuwählen. Im Display werden die gewünschten GNSS-Informationen angezeigt.

5.8.28.5

Überprüfen der Software-Aktualisierungsinformationen

Diese Funktion zeigt das Datum und die Zeit der letzten Softwareaktualisierung, die über Over-the-Air-Programming (OTAP) oder WLAN durchgeführt wurde. Führen Sie die Vorgehensweise zum Überprüfen der Softwareaktualisierungsfunktionen auf Ihrem Funkgerät durch.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Dienstprogramme`. Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis `Geräte-Info`. Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis `SW-Update`. Drücken Sie OK, um die Option auszuwählen.

Im Display werden das Datum und die Uhrzeit der letzten Software-Aktualisierung angezeigt.

Das Menü für die Software-Aktualisierung ist erst nach mindestens einer erfolgreichen OTAP- oder WLAN-Sitzung verfügbar. Weitere Informationen finden Sie unter Over-the-Air Programmierung (OTAP) auf Seite 471.

5.8.28.6

Anzeigen von Standort-Informationen

Befolgen Sie die Vorgehensweise, um den aktuellen Standortnamen anzuzeigen, an dem sich Ihr Funkgerät befindet.

1. Drücken Sie OK, um das Menü aufzurufen.
2. Drücken Sie ▲ oder ▼ bis `Dienstprogramme`.

   Drücken Sie OK, um die Option auszuwählen.
3. Drücken Sie ▲ oder ▼ bis `Geräte-Info`.

   Drücken Sie OK, um die Option auszuwählen.
4. Drücken Sie ▲ oder ▼ bis

   `Standortinformationen`. Drücken Sie OK, um die Option auszuwählen.

Das Display zeigt den aktuellen Standortnamen an.

Connect Plus-Betrieb

Connect Plus ist eine vollständige, auf DMR-Technologie basierte Bündelfunklösung. Connect Plus verwendet einen dedizierten Steuerungskanal für Kanalanforderungen und Zuordnungen. Die für Funkgerätebenutzer verfügbaren Funktionen in diesem System werden in diesem Kapitel beschrieben.

6.1

Zusätzliche Bedienelemente im Connect Plus-Modus

In diesem Kapitel werden die zusätzlichen Bedienelemente erläutert, auf die Funkgerätbenutzer über vorprogrammierte Elemente, wie z. B. programmierbare Tasten und zuweisbare Funkgerätefunktionen, zugreifen können.

6.1.1

Sendetaste (PTT)

Die **Sendetaste (PTT)** seitlich am Funkgerät erfüllt zwei grundlegende Zwecke:

- Während eines Anrufs wird durch Betätigung der **Sendetaste (PTT)** mit anderen am Anruf beteiligten Funkgeräten kommuniziert.

  Halten Sie die **Sendetaste (PTT)** zum Sprechen gedrückt. Lassen Sie die **Sendetaste (PTT)** zum Hören los.

  Wenn die **Sendetaste (PTT)** gedrückt wird, wird das Mikrofon aktiviert.

- Wird gerade kein Ruf getätigt, wird die **Sendetaste (PTT)** zur Durchführung eines neuen Rufs verwendet (siehe Durchführen eines Funkrufs auf Seite 234).

Wenn der Gesprächsgenehmigungston (siehe Ein-/Ausschalten des Freitons auf Seite 319) aktiviert ist, warten Sie, bis dieser kurze Signalton verstummt, bevor Sie mit dem Sprechen beginnen.

6.1.2

programmierbare Tasten

Diese Tasten können von Ihrem Händler vorprogrammiert werden. Sie dienen dann, je nachdem, wie lange sie gedrückt werden, für den Direktzugriff auf verschiedene Funkgerätefunktionen:

Kurzer Tastendruck
Drücken und schnell wieder loslassen.

Drücken Sie lange auf
Für die programmierte Zeit gedrückt halten.

HINWEIS:
Die vorprogrammierte Zeitdauer für einen Tastendruck gilt für alle zuweisbaren Funkgerät-/Einstellungsfunktionen und Einstellungen. Unter Notruf auf Seite 269 finden Sie weitere Informationen über die vorprogrammierte Tastendruckdauer der *Notruf*-Taste.

6.1.2.1

Zuweisbare Funkgerätfunktionen

Baken Ein/Aus
Schaltet die Funktion „Beacon“ ein oder aus. Erfordert den Erwerb der Connect Plus-Funktion „Man Down“.

Baken zurücksetzen
Der Bakensignalton wird zurückgesetzt (beendet), aber die Bakensignal-Funktion wird nicht deaktiviert. Erfordert den Erwerb der Connect Plus-Funktion „Man Down“.

Bluetooth® Audio-Schalter
Schaltet die Audioausgabe zwischen dem internen Funkgerätlautsprecher und einem externen Bluetooth-fähigen Zubehör um.

Bluetooth verbinden
Sucht nach Bluetooth-Geräten und stellt die Verbindung her.

Bluetooth trennen
Beendet alle vorhandenen Bluetooth-Verbindungen zwischen Funkgerät und Bluetooth-fähigen Geräten.

Bluetooth-Erkennung
Ermöglicht es Ihrem Funkgerät, in den erkennbaren Bluetooth-Modus versetzt werden zu können.

Abbruch der Warteschleife
Beendet den Belegt-Modus, wenn in der Warteschlange ein Ruftyp initiiert wurde, der kein Notruf ist. Nachdem Notrufe in die Warteschlange gestellt wurden, können sie nicht mehr abgebrochen werden.

Anrufprotokoll
Wählt die Rufprotokollliste aus.

Kanalankündigung
Sprachansage von Zonen- und Kanalnachrichten für den aktuellen Kanal.

Kontakte
Bietet direkten Zugriff auf die Kontaktliste.

Notruf Ein/Aus
Je nach Programmierung wird ein Notruf eingeleitet oder abgebrochen.

Innenbereich
Schaltet die Innenbereichs-Funktion ein oder aus.

Intelligentes Audio
Schaltet Intelligentes Audio ein-/aus.

Totmannalarm Ein/Aus
Schaltet alle konfigurierten Totmannalarme ein oder aus. Erfordert den Erwerb der Connect Plus-Funktion „Man Down“.

Totmann-Alarme zurücksetzen
Wird diese Taste gedrückt, während der Hinweiston der Funktion „Totmann“ wiedergegeben wird, wird der Ton beendet und die Funktionstimer werden zurückgesetzt; die Funktion „Totmann-Alarm“ wird jedoch nicht deaktiviert. Erfordert den Erwerb der Funktion „Man Down“.

Manuell wählen
Je nach Programmierung wird durch Eingabe einer Teilnehmer-ID oder einer Telefonnummer ein Einzel- oder Telefonanruf eingeleitet.

Eintastenzugang
Leitet einen vordefinierten Einzelruf, Rufhinweis, eine Quick Text-Nachricht oder die Funktion „Zurück auf Startkanal“ direkt ein.

Privacy
Schaltet die Verschlüsselung ein oder aus.

Funkgerät-Check
Stellt fest, ob das Funkgerät in einem System aktiv ist.

Funkgerät aktivieren
Ermöglicht die Fernaktivierung eines Zielfunkgeräts.

Funkgerät deaktivieren
Ermöglicht die Ferndeaktivierung eines Zielfunkgeräts.

Fernüberwachung
Schaltet das Mikrofon eines Zielfunkgeräts ein, ohne dies anzuzeigen.

Home-Kanal zurücksetzen
Richtet einen neuen Home-Kanal ein.

Art des Hinweistons bei Anruf
Gibt direkten Zugriff auf die Einstellung des Rufhinweistyps.

Roaming-Anforderung
Fordert die Suche nach einem anderen Standort an.

Scan
Schaltet Scan ein oder aus.

Home-Kanalerinnerung stummschalten
Schaltet die Home-Kanalerinnerung stumm.

Funkstation sperren/entsperren
Wenn diese Option aktiviert ist, sucht das Funkgerät nur den aktuellen Standort. Ist diese Option deaktiviert, sucht das Funkgerät neben dem aktuellen Standort auch nach anderen Standorten.

Textnachricht
Wählt das Textnachrichtenmenü aus.

Vibrationsart
Konfiguriert die Vibrationsart.

Sprachankündigung ein/aus
Schaltet die Sprachansage ein/aus.

WLAN
Schaltet WLAN ein oder aus.

Zone
Ermöglicht das Auswählen einer Zone aus einer Zonenliste.

6.1.2.2

Zuweisbare Einstellungen oder Einstellungsfunktionen

AF-Unterdrückung
Schaltet die Funktion zur Unterdrückung akustischer Rückkopplungen ein oder aus.

Alle Töne/Warnungen
Schaltet alle Töne und Warnungen ein und aus.

Hintergrundbeleuchtung
Schaltet die Hintergrundbeleuchtung des Displays ein bzw. aus.

Beleuchtungshelligkeit
Passt die Helligkeit an.

Display-Modus
Schaltet den Tag/Nacht-Displaymodus ein bzw. aus.

Global Navigation Satellite System (GNSS)
Schaltet das Satellitennavigationssystem ein oder aus.

Leistung
Schaltet den Sendeleistungspegel zwischen hoch und niedrig um.

Nicht zugewiesen
Gibt an, dass die Taste noch nicht belegt ist.

6.1.3

Identifizieren von Statusanzeigen im Connect Plus-Modus

Im Display des Funkgeräts werden der Funkgerätestatus, Texteingaben und Menüeingaben angezeigt.

6.1.3.1

Anzeigesymbole

Die folgenden Symbole werden auf dem Display des Funkgeräts angezeigt. Die Symbole werden in der Statusleiste von links in der Reihenfolge ihres Anzeigezeitpunkts/ihrer Benutzung angezeigt und sind kanalspezifisch.

	Anzeige der Empfangssignalstärke (RSSI) Die Anzahl der Balken zeigt die Signalstärke an. Vier Balken bedeuten, dass das Signal ausgezeichnet ist. Dieses Symbol wird nur während des Empfangs angezeigt.
	Bluetooth nicht angeschlossen Die Bluetooth-Funktion ist aktiviert, es besteht aber keine Verbindung zu einem Remote-Bluetooth-Gerät.
	Bluetooth angeschlossen Die Bluetooth-Funktion ist aktiviert. Das Symbol leuchtet konstant, wenn ein abgesetztes Bluetooth-Gerät angeschlossen ist.
	Große Datenmengen Das Funkgerät empfängt große Datenmengen, und der Kanal ist belegt.
	Die Funktion „Innenbereich“ ist verfügbar [4] Der Status für die Funktion „Innenbereich“ ist eingeschaltet und verfügbar.

Tabelle wird fortgesetzt…

Tabelle wird fortgesetzt…

	Die Funktion „Innenbereich“ ist nicht verfügbar [4] Der Status für die Funktion „Innenbereich“ ist eingeschaltet aber aufgrund von ausgeschaltetem Bluetooth oder von einem Bakensignal-Scan, der durch Bluetooth ausgesetzt wurde, nicht verfügbar.
	Stummschaltmodus Stummschalt-Modus ist aktiviert und Lautsprecher ist stumm geschaltet.
	Benachrichtigungen Die Benachrichtigungsliste enthält ein oder mehrere verpasste Ereignisse.
L oder H	**Leistung** Das Funkgerät ist auf niedrige oder auf hohe Leistung eingestellt.
	Ton-Deaktivierung Töne sind abgestellt.

Tabelle wird fortgesetzt…

	Optionskarte Die Zusatzkarte ist aktiviert.
	Zusatzkarte aus Die Zusatzkarte ist deaktiviert.
	GNSS verfügbar Die GPS/GNSS-Funktion ist aktiviert. Das Symbol leuchtet, wenn eine Positionsfestlegung verfügbar ist.
	GNSS nicht verfügbar/außer Funkreichweite Die GPS/GNSS-Funktion ist aktiviert, aber es werden keine Satellitendaten empfangen.
	Scan Die Scan-Funktion ist aktiviert.
	Emergency

Tabelle wird fortgesetzt…

[4] Nur für Modelle mit neuester Software und Hardware verfügbar

	Das Funkgerät befindet sich im Notruf-Modus.
	Sicher Die Verschlüsselungsfunktion ist aktiviert.
	Ungesichert Die Verschlüsselungsfunktion ist deaktiviert.
	Standort-Roaming Die Roaming-Funktion ist aktiviert.
	Akku Die Anzahl der Balken (0 – 4) zeigt die verfügbare Ladekapazität an. Blinkt, wenn der Akkustand niedrig ist.
	Kontakt Funkgerätkontakt verfügbar.
	Anrufprotokoll Rufprotokoll des Funkgeräts.

Tabelle wird fortgesetzt…

	Nachricht Eingehende Nachricht.
	Nur Rufton Rufton-Modus ist aktiviert.
	Stiller Klingelton Stiller Klingelton ist aktiviert.
	Vibrieren Vibrationsmodus ist aktiviert.
	Vibrieren und Klingelton Vibrations- und Klingelton-Modus ist aktiviert.
	WLAN ausgezeichnet [5] WLAN-Signal ist ausgezeichnet.
	WLAN gut [5] WLAN-Signal ist gut.
	WLAN durchschnittlich [5] WLAN-Signal ist durchschnittlich.

Tabelle wird fortgesetzt…

	WLAN schlecht [5] WLAN-Signal ist schlecht.
	WLAN nicht verfügbar [5] WLAN-Signal ist nicht verfügbar.

6.1.3.2

Rufsymbole

Die folgenden Symbole werden während eines Anrufs im Display Ihres Funkgeräts angezeigt. Diese Symbole werden auch in der Kontaktliste angezeigt, um den ID-Typ anzugeben.

	Einzelruf Ein Einzelruf wird gerade getätigt. In der Kontaktliste weist das Symbol auf den Aliasnamen bzw. die ID (Nummer) eines Funkgeräts hin.

Tabelle wird fortgesetzt…

	Gruppenruf/Standort-Alle-Ruf Ein Gruppenruf oder Standort-Alle-Ruf wird gerade getätigt. In der Kontaktliste weist das Symbol auf den Aliasnamen (Namen) bzw. die ID (Nummer) einer Gruppe hin.
	Telefonanruf als Einzelruf Ein Anruf wird gerade als Einzelruf getätigt.

6.1.3.3

Erweiterte Menüsymbole

Die folgenden Symbole tauchen neben Menüpunkten mit zwei Optionen oder als Anzeige dafür auf, dass es ein Untermenü mit zwei Optionen gibt.

	Kontrollkästchen (leer) Zeigt an, dass der Menüpunkt nicht ausgewählt wurde.

Tabelle wird fortgesetzt…

[5] Gilt nur für DP4601e

	Kontrollkästchen (markiert) Zeigt an, dass der Menüpunkt ausgewählt wurde.
	Schwarzes Kästchen Zeigt die für den Menüpunkt mit einem Untermenü gewählte Option an.

6.1.3.4

Ausgang-Symbole (Gesendete Nachrichten)

Die folgenden Symbole werden in der oberen rechten Ecke des Funkgerätdisplays im Ordner „Ausgang“ angezeigt:

ODE	**Erfolgreich gesendet** Die Nachricht wurde erfolgreich gesendet.

Tabelle wird fortgesetzt…

R	
ODER	**Fehler beim Senden** Die Textnachricht wurde nicht gesendet.
ODER	**Wird ausgeführt** • Die Textnachricht an einen Gruppen-Aliasname oder an eine Gruppen-ID wurde noch nicht übertragen. • Die Textnachricht an den Funkgeräte-Alias oder die ID eines Funkgeräts wurde noch nicht übertragen, da noch auf eine Quittierung gewartet wird.
	Einzel- oder Gruppennachricht gelesen Die Textnachricht wurde gelesen.

Tabelle wird fortgesetzt…

ODER	
	Einzel- oder Gruppennachricht ungelesen Die Textnachricht wurde nicht gelesen.
ODER	

6.1.3.5

Bluetooth-Symbole

Die folgenden Symbole werden auch neben Einträgen in der Liste der verfügbaren Bluetooth-fähigen Geräte angezeigt und geben den Gerätetyp an.

	Bluetooth-Datengerät Bluetooth-fähiges Datengerät wie z. B. ein Scanner.

Tabelle wird fortgesetzt…

	Bluetooth-Audiogerät Bluetooth-fähiges Audiogerät wie z. B. ein Kopfhörer.
	Bluetooth-PTT-Gerät Bluetooth-fähiges PTT-Gerät wie z. B. ein POD-Gerät (nur PTT/Sendetaste).

6.1.3.6

LED-Anzeige

Die LED-Anzeige zeigt den Betriebsstatus Ihres Funkgeräts an.

Blinkt rot	Batterie-Fehlanpassung tritt auf oder das Funkgerät sendet mit geringer Akkuleistung, empfängt einen Notruf oder die Selbstprüfung beim Einschalten ist fehlgeschlagen, oder das Funkgerät befindet sich außerhalb der Reichweite, wenn das Funkgerät mit dem Auto-Range Transponder-System konfiguriert wurde. Stummschalt-Modus ist aktiviert.

Tabelle wird fortgesetzt…

Blinkt schnell rot	Das Funkgerät empfängt eine OTA-Dateiübertragung (Optionskarten-Firmware-Datei, Netzwerkfrequenzdatei oder Optionskarten-Codeplug-Datei), oder es wird ein Upgrade auf eine neue Optionskarten-Firmware-Datei durchgeführt.
Blinkt grün und gelb	Das Funkgerät empfängt einen Rufhinweis, hat eine Textnachricht empfangen, oder der Scan ist aktiviert und empfängt Aktivitäten.
Gelbes Dauerlicht	Das Funkgerät befindet sich im erkennbaren Bluetooth-Modus.
Doppeltes gelbes Blinken	Das Funkgerät sucht aktiv nach einem neuen Standort.
Blinkt gelb	Das Funkgerät empfängt einen Rufhinweis, oder der Scan ist aktiviert und empfängt keine Aktivitäten (das Funkgerät empfängt keine Aktivitäten).
Dauerhaft grün	Das Funkgerät fährt hoch oder überträgt Daten.

Tabelle wird fortgesetzt…

Blinkt grün	Das Funkgerät wird eingeschaltet oder empfängt einen Ruf oder Daten.
Doppeltes grünes Blinken	Das Funkgerät empfängt einen Ruf mit aktivierter Verschlüsselung.

6.1.3.7

Hinweistöne

Die folgenden Töne werden über den Lautsprecher des Funkgeräts ausgegeben.

Hoher Ton	□	Tiefer Ton	■

Hinweistöne liefern einen akustischen Hinweis auf den Status, nachdem eine Aktion zum Durchführen einer Aufgabe ausgeführt wurde.

■□	Positiver Hinweiston
□■	Negativer Hinweiston

6.1.3.8

Hinweistöne

Hinweistöne sind hörbare Anzeigen zum Funkgerätestatus oder zur Reaktion des Funkgeräts auf empfangene Daten.

Dauerton	Gleichmäßiger Ton. Wird ununterbrochen bis zum Beenden abgespielt.
Periodischer Ton	Wird periodisch je nach der über das Funkgerät konfigurierten Tonlänge abgespielt. Der Ton beginnt, stoppt und wiederholt sich.
Wiederholter Ton	Ein einzelner Ton, der sich wiederholt, bis der Benutzer ihn abschaltet.
Kurzton	Erklingt nur einmal kurz (Tonlänge ist vorgegeben).

6.1.4

Umschalten zwischen Connect Plus- und Non-Connect Plus-Modus

Um den Connect Plus-Modus zu verlassen, müssen Sie zu einer anderen Zone wechseln, sofern diese Möglichkeit von Ihrem Händler oder Systemadministrator konfiguriert wurde. Klären Sie mit Ihrem Händler oder Ihrem Systemadministrator, ob das Funkgerät für Zonen außerhalb von Connect Plus konfiguriert wurde und welche Funktionen verfügbar sind, wenn Sie außerhalb einer Connect Plus-Zone tätig sind.

6.2

Durchführen und Empfangen von Anrufen im Connect Plus-Modus

In diesem Abschnitt werden die allgemeine Bedienung und die verfügbaren Ruffunktionen Ihres Funkgeräts erläutert.

6.2.1

Auswahl eines Standorts

Ein Standort bietet Abdeckung für einen bestimmten Bereich. Ein Connect Plus-Standort hat einen Standort-Controller und maximal 15 Repeater. In einem Mehrfachstandort-Netzwerk sucht das Connect Plus-Funkgerät automatisch nach einem neuen Standort, wenn der Signalpegel des aktuellen Standorts auf ein inakzeptables Niveau absinkt.

6.2.1.1

Roaming-Anforderung

Eine Roaming-Anforderung weist das Funkgerät an, einen neuen Standort zu suchen, selbst wenn das Signal des aktuellen Standorts akzeptabel ist.

Wenn keine Standorte verfügbar sind:

- Das Funkgerät zeigt `Suche` und `den Alias des ausgewählten Kanals` an und fährt mit dem Durchsuchen der Standortliste fort.
- kehrt das Gerät zum vorherigen Standort zurück, falls dieser noch zur Verfügung steht.

HINWEIS:
Diese Funktion wird von Ihrem Händler konfiguriert.

Drücken Sie die konfigurierte Taste **Roaming-Anforderung**.

Sie hören einen Ton, der darauf hinweist, dass das Funkgerät zu einem neuen Standort wechselt. Im Display wird `Site-ID` angezeigt.

6.2.1.2

Funkstation sperren/entsperren

Wenn diese Option aktiviert ist, sucht das Funkgerät nur den aktuellen Standort. Ist diese Option deaktiviert, sucht das Funkgerät neben dem aktuellen Standort auch nach anderen Standorten.

Drücken Sie die programmierte Taste **Funkstationsperr**e.

Wenn die **Standortsperre** eingeschaltet ist:

- Sie hören einen positiven Hinweiston, der darauf hinweist, dass das Funkgerät gesperrt ist und den aktuellen Standort nicht verlassen kann.
- Im Display wird `Station gesperrt` angezeigt.

Wenn die **Standortsperre** ausgeschaltet ist:

- Sie hören einen negativen Hinweiston, der darauf hinweist, dass das Funkgerät entsperrt ist.
- Im Display wird `Station entsperrt` angezeigt.

6.2.1.3

Standorteinschränkung

Ihr Systemadministrator für Connect Plus-Funkgeräte kann entscheiden, welche Netzwerkstandorte Ihr Funkgerät verwenden darf und welche nicht. Das Funkgerät muss nicht neu programmiert werden, um die Liste der erlaubten und nicht erlaubten Standorte zu ändern. Wenn Ihr Funkgerät versucht, sich bei einem nicht erlaubten Standort anzumelden, wird eine kurze Meldung angezeigt: `Site <angegebene Nummer> nicht erlaubt`. Das Funkgerät sucht dann nach einem anderen Netzwerkstandort.

6.2.2

Auswählen einer Zone

Das Funkgerät kann mit maximal 16 Connect Plus-Zonen konfiguriert werden, wobei jede Connect Plus-Zone maximal 16 zuweisbare Positionen auf dem Drehknopf für die Kanalwahl bietet.

Alle zugewiesenen Drehknopfpositionen können zum Starten eines der folgenden Ruftypen verwendet werden:

- Gruppenruf
- Multi-Gruppenruf
- Funkstations-Rundruf
- Einzelruf

1 Greifen Sie folgendermaßen auf die Zone zu:

Bedienelemente	Schritte
Programmierte Zonenauswahl-Taste	Drücken Sie die programmierte Taste **Zonenauswahl**.
Menü „Radio“	**a** Drücken Sie OK, um das Menü aufzurufen. **b** Drücken Sie ▲ oder ▼ bis `Zone`, und

Bedienelemente	Schritte
	drücken Sie OK zum Auswählen.

Im Display wird die aktuelle Zone angezeigt; sie ist mit einem ✓ gekennzeichnet.

2 Wählen Sie die gewünschte Zone.

Bedienelement des Funkgeräts	Schritte
▲ **oder** ▼	Drücken Sie ▲ oder ▼ , und blättern Sie zur gewünschten Zone.

3 Drücken Sie OK , um die Option auszuwählen.

Das Display zeigt kurz `<Zone> gewählt` an und wechselt dann zum Bildschirm der gewählten Zone.

6.2.3

Arbeiten mit mehreren Netzwerken

Wenn Ihr Funkgerät für die Verwendung von mehreren Connect Plus-Netzwerken konfiguriert wurde, können Sie ein anderes Netz wählen, indem Sie zu der Connect Plus-Zone wechseln, die dem gewünschten Netzwerk zugewiesen ist. Diese Netzwerk-zu-Zonen-Zuweisungen werden von Ihrem Händler für Ihr Funkgerät konfiguriert.

6.2.4

Auswählen eines Ruftyps

Verwenden Sie den Kanalwahlschalter, um einen Ruftyp auszuwählen. Hierbei kann es sich um einen Gruppenruf, Multi-Gruppenruf, Standort-Rundumruf oder Einzelruf handeln, je nachdem, wie Ihr Funkgerät konfiguriert wurde. Wenn Sie den Drehknopf für die Kanalwahl auf eine andere Position (mit einen zugewiesenen Ruftyp) stellen, wird das Funkgerät erneut beim Connect Plus-Standort registriert. Das Funkgerät wird mit der Registrierungs-Gruppen-ID registriert, die dem neuen Position des Kanalwahlschalter-Ruftyp zugewiesen wurde.

Wenn Sie eine Position wählen, der kein Ruftyp zugewiesen wurde, gibt das Funkgerät einen Dauerton aus, und im Display erscheint `Nicht progr.`. Ihr Funkgerät funktioniert nicht, wenn ein nicht konfigurierter

Kanal ausgewählt wurde. Verwenden Sie stattdessen den Kanalwahlschalter zur Auswahl eines konfigurierten Kanals.

Nachdem die gewünschte Zone angezeigt wird (bei mehreren Zonen in Ihrem Funkgerät), drehen Sie den programmierten Kanalwahlschalter, um den Ruftyp auszuwählen.

6.2.5

Empfangen und Beantworten eines Funkrufs

Sobald der Kanal, die Funkgeräte-ID oder der Ruftyp angezeigt wird, können Sie Rufe empfangen und beantworten.

Die LED leuchtet ununterbrochen grün, wenn das Funkgerät sendet, und blinkt grün, wenn das Funkgerät empfängt.

HINWEIS:
Die LED leuchtet dauerhaft grün, wenn das Funkgerät sendet. Beim Empfang eines Rufs mit aktivierter Verschlüsselung blinkt sie schnell grün Zum Entschlüsseln eines verschlüsselten Rufs muss Ihr Funkgerät denselben Privacy-Key ODER denselben Schlüsselwert und dieselbe Schlüssel-ID aufweisen (von Ihrem Händler programmiert) wie das sendende Funkgerät (von dem Sie den Ruf empfangen).

Weitere Informationen finden Sie unter Privacy auf Seite 293.

6.2.5.1

Empfangen und Beantworten eines Gruppenrufs

Ein Gruppenruf kann nur empfangen werden, wenn Ihr Funkgerät als Mitglied dieser Gruppe konfiguriert ist.

Wenn Sie einen Gruppenruf (auf dem Ausgangsbildschirm), empfangen, blinkt die LED grün.Das Gruppenrufsymbol erscheint in der oberen rechten Ecke. In der ersten Textzeile wird der Aliasname des Anrufenden angezeigt. In der zweiten Textzeile wird der Gruppen-Aliasname angezeigt. Die Stummschaltung Ihres Funkgeräts wird aufgehoben, und der ankommende Anruf ist über den Lautsprecher des Funkgeräts zu hören.

1 Halten Sie das Funkgerät senkrecht 2,5 bis 5,0 cm vom Mund entfernt.

   Die LED leuchtet dauerhaft grün.

2 Warten Sie, bis der Gesprächsgenehmigungston verklungen ist (falls aktiviert), und sprechen Sie deutlich in das Mikrofon.

3 Lassen Sie die **PTT**-Taste los, um den Gesprächspartner zu hören.

   Wird während einer vorprogrammierten Zeitdauer nicht gesprochen, endet der Ruf.

HINWEIS:
Eine genaue Beschreibung zur Durchführung eines Gruppenrufs finden Sie unter Durchführen eines Gruppenrufs auf Seite 235.

6.2.5.2

Empfangen und Beantworten eines Einzelrufs

Ein Einzelruf ist ein Anruf von einem einzelnen Funkgerät an ein anderes einzelnes Funkgerät.

Wenn Sie einen Einzelruf empfangen, blinkt die LED-Anzeige grün. Das Einzelruf-Symbol wird in der rechten oberen Ecke angezeigt. In der ersten Textzeile wird der Aliasname des Anrufenden angezeigt. Die Stummschaltung Ihres Funkgeräts wird aufgehoben, und der ankommende Anruf ist über den Lautsprecher des Funkgeräts zu hören.

1 Halten Sie das Funkgerät senkrecht 2,5 bis 5,0 cm vom Mund entfernt.

2 Drücken Sie zum Beantworten des Anrufs die **Sendetaste** (PTT).

Die LED leuchtet dauerhaft grün.

3 Warten Sie, bis der Freiton verklungen ist (falls aktiviert), und sprechen Sie deutlich in das Mikrofon.

4 Lassen Sie die **PTT**-Taste los, um den Gesprächspartner zu hören.

Wird während einer vorprogrammierten Zeitdauer nicht gesprochen, endet der Ruf.

Ein kurzer Hinweiston erklingt. Im Display wird `Ruf beendet` angezeigt.

Eine genaue Beschreibung zur Durchführung eines Einzelrufs finden Sie unter Durchführen eines Einzelrufs auf Seite 235.

6.2.5.3
Empfangen eines Standort-Rundumrufs

Ein Standort-Rundumruf ist ein Anruf von einem einzelnen Funkgerät an alle anderen Funkgeräte am Standort. Dieser Ruftyp wird für Ankündigungen verwendet, denen alle Benutzer volle Aufmerksamkeit schenken müssen.

Wenn Sie einen Standort-Rundumruf erhalten, erklingt ein Hinweiston und die LED-Anzeige blinkt grün.

Das Gruppenrufsymbol wird in der rechten oberen Ecke angezeigt. In der ersten Textzeile wird der Aliasname des Anrufenden angezeigt. In der zweiten Zeile wird `Standort-Rundumruf` angezeigt. Die Stummschaltung Ihres Funkgeräts wird aufgehoben, und der ankommende Anruf ist über den Lautsprecher des Funkgeräts zu hören.

Nach Ende des Standort-Rundumrufs kehrt das Funkgerät zum vor dem Empfang des Anrufs angezeigten Bildschirm zurück. Rundumrufe werden ohne eine vorbestimmte Wartezeit beendet.

Sie können auf einen Standort-Alle-Anruf nicht antworten.

HINWEIS:
Eine genaue Beschreibung zur Durchführung eines Standort-Rundumrufs finden Sie unter Durchführen eines Standort-Rundumrufs auf Seite 236.

Das Funkgerät unterbricht den Empfang eines Standort-Rundumrufs, wenn Sie während des Anrufs auf einen anderen Kanal schalten. Während eines Standort-Alle-Anrufs können Sie die konfigurierten Tastenfunktionen nicht verwenden, bis der Anruf beendet wird.

6.2.5.4

Empfangen eines eingehenden Einzel-Telefonrufs

Wenn Sie einen eingehenden Einzel-Telefonruf erhalten, wird in der oberen rechten Ecke das „Anruf als Einzelruf"-Symbol angezeigt. In der ersten Textzeile wird `Telefonruf` angezeigt.

1 Halten Sie die **Sendetaste** (PTT) zum Antworten und Sprechen gedrückt. Lassen Sie die **Sendetaste (PTT)** zum Hören los.

2 Halten Sie gedrückt, um den Anruf zu beenden.

In der ersten Zeile des Displays wird `Telefonruf ...` angezeigt. In der zweiten Zeile des Displays wird `wird beendet` angezeigt. Das Display kehrt zum Anruf-Bildschirm zurück.
Im Display wird `Telefonruf beendet` angezeigt.

6.2.5.5

Empfangen eines eingehenden Gesprächsgruppen-Telefonrufs

Wenn Sie einen eingehenden Gesprächsgruppen-Telefonruf erhalten, wird in der oberen rechten Ecke das Gruppenrufsymbol angezeigt. In der ersten Textzeile wird `Call1 (Ruf1)` angezeigt.

Drücken Sie die **Sendetaste** (PTT) zum Sprechen, und lassen Sie sie zum Hören wieder los.

6.2.5.6

Eingehender Multi-Gruppen-Telefonruf

Wenn Sie einen eingehenden Multi-Gruppen-Telefonruf erhalten, wird in der oberen rechten Ecke das Gruppenrufsymbol angezeigt. In der ersten Textzeile wird `Multi-Gruppenruf` angezeigt. Die Stummschaltung Ihres Funkgeräts wird aufgehoben, und der ankommende Multi-Gruppenruf ist über den Lautsprecher des Funkgeräts zu hören.

6.2.6

Durchführen eines Funkrufs

Wenn Sie Ihren Kanal gewählt haben, können Sie den Funkgeräte-Alias oder die ID bzw. den Aliasnamen oder die ID einer Gruppe wie folgt auswählen:

- Mit dem Drehknopf für die Kanalwahl.
- Mit einem vorprogrammierten **Eintastenzugang** – Der Eintastenzugang erleichtert Einzelrufe zu vordefinierten IDs. Diese Funktion kann durch kurzes oder langes Drücken einer programmierbaren Taste zugewiesen werden. Pro **Schnellwahltaste** kann nur eine ID zugewiesen werden. Auf dem Funkgerät können mehrere **Eintastenzugänge** programmiert sein.
- Über die Kontaktliste (siehe Kontakteinstellungen auf Seite 254).

HINWEIS:
Um mit Verschlüsselung senden zu können, muss die Verschlüsselungsfunktion auf diesem Kanal aktiviert sein. Nur empfangende Funkgeräte mit dem gleichen Schlüsselwert und der gleichen Schlüssel-ID wie Ihr Gerät können die Übertragung entschlüsseln.

Weitere Informationen finden Sie unter Privacy auf Seite 293.

6.2.6.1

Durchführen eines Anrufs mit dem Kanalwahlschalter

Mit dieser Funktion können Funkgerätebenutzer unterschiedliche Ruftypen nutzen: Gruppenruf, Einzelruf, Standort-Rundruf, Durchsageruf.

6.2.6.1.1

Durchführen eines Gruppenrufs

Ein Anruf an eine Gruppe kann nur durchgeführt werden, wenn Ihr Funkgerät als Mitglied dieser Gruppe konfiguriert ist.

1. Wählen Sie den Kanal mithilfe des aktiven Gruppen-Aliasnamen oder der aktiven Gruppen-ID. Siehe Auswählen eines Ruftyps auf Seite 229.
2. Halten Sie das Funkgerät senkrecht 2,5 bis 5,0 cm vom Mund entfernt.
3. Drücken Sie zum Durchführen des Rufs die **Sendetaste (PTT)**.

   Die LED-Beleuchtung leuchtet grün. Das Gruppenrufsymbol wird in der oberen rechten Ecke des Displays angezeigt. In der ersten Textzeile wird der Gruppenruf-Aliasnamen angezeigt.
4. Warten Sie, bis der Freiton verklungen ist (falls aktiviert), und sprechen Sie deutlich in das Mikrofon.
5. Lassen Sie die **PTT**-Taste los, um den Gesprächspartner zu hören.

   Wenn das Zielfunkgerät antwortet, blinkt die LED-Anzeige grün, die Stummschaltung des Funkgeräts wird ausgeschaltet, und die Antwort ist über den Lautsprecher des Funkgeräts zu hören. Im Display wird das Gruppenrufsymbol, der Gruppen-Aliasname oder die Gruppen-ID und der Aliasname oder die ID des sendenden Funkgeräts angezeigt.

   Wird während einer vorprogrammierten Zeitdauer nicht gesprochen, endet der Ruf. Das Funkgerät wechselt zu dem Bildschirm, auf dem Sie vor dem Einleiten des Anrufs waren.

6.2.6.1.2

Durchführen eines Einzelrufs

Damit Sie einen Einzelruf empfangen und/oder beantworten können, der von einem autorisierten, individuellen Funkgerät ausgeht, muss Ihr Funkgerät so konfiguriert werden, dass Sie einen Einzelruf initiieren können.

Sie hören einen negativen Hinweiston, wenn Sie versuchen, einen Einzelruf über die Kontaktliste, das Anrufprotokoll, **den Eintastenzugang** oder den Kanalwahlschalter zu tätigen, während diese Funktion nicht aktiviert ist.

Verwenden Sie die - oder Rufhinweisfunktionen, um mit einem einzelnen Funkgerät Kontakt aufzunehmen. Weitere Informationen finden Sie unter Textnachrichten (SMS) auf Seite 156 oder Rufhinweise auf Seite 263.

1 Führen Sie einen der folgenden Schritte aus.
   - Wählen Sie den Kanal mithilfe des Aliasnamens oder der ID des aktiven Funkgeräts. Siehe Auswählen eines Ruftyps auf Seite 229.
   - Drücken Sie die vorprogrammierte **Schnellwahltaste**.

2 Halten Sie das Funkgerät senkrecht 2,5 bis 5,0 cm vom Mund entfernt.

3 Drücken Sie zum Durchführen des Rufs die **Sendetaste (PTT)**.

   Die LED leuchtet dauerhaft grün. Das Einzelrufsymbol wird in der rechten oberen Ecke angezeigt. In der ersten Textzeile wird der Aliasname des Funkgeräts angezeigt. In der zweiten Textzeile wird der Rufstatus angezeigt

4 Warten Sie, bis der Freiton verklungen ist (falls aktiviert), und sprechen Sie deutlich in das Mikrofon.

5 Lassen Sie die **PTT**-Taste los, um den Gesprächspartner zu hören.

   Wenn das Zielfunkgerät antwortet, blinkt die LED-Anzeige grün.

   Wird während einer vorprogrammierten Zeitdauer nicht gesprochen, endet der Ruf. Ein kurzer Hinweiston erklingt. Im Display wird `Ruf beendet` angezeigt.

Es kann sein, dass das Funkgerät so programmiert ist, dass es vor dem Aufbau eines Einzelrufs überprüft, ob das Zielfunkgerät verfügbar ist. Ist das Zielfunkgerät nicht verfügbar, hören Sie einen kurzen Ton, und im Display wird ein negativer Kurzhinweis angezeigt.

6.2.6.1.3
Durchführen eines Standort-Rundumrufs

Mit dieser Funktion können Sie die Übertragung an alle Benutzer des Standorts starten, die nicht bereits ein Gespräch führen. Ihr Funkgerät muss für die Nutzung dieser Funktion konfiguriert sein.

Benutzer auf dem Kanal/der Station können auf einen Standort-Alle-Ruf nicht antworten.

1 Wählen Sie den Kanal mithilfe des aktiven Standort-Alle-Ruf-Gruppen-Aliasnamens (oder der aktiven relevanten ID). Siehe Auswählen eines Ruftyps auf Seite 229.

2 Halten Sie das Funkgerät senkrecht 2,5 bis 5,0 cm vom Mund entfernt.

3 Drücken Sie zum Durchführen des Anrufs die **Sendetaste (PTT)**.

Die LED leuchtet dauerhaft grün. Das Gruppenrufsymbol wird in der oberen rechten Ecke des Displays angezeigt. In der ersten Textzeile wird `Standort-Alle-Ruf` angezeigt.

4 Warten Sie, bis der Freiton verklungen ist (falls aktiviert), und sprechen Sie deutlich in das Mikrofon.

6.2.6.1.4

Durchführen eines Multi-Gruppenrufs

Mit dieser Funktion können Sie eine Übertragung an alle Benutzer in mehreren Gruppen starten. Ihr Funkgerät muss für die Nutzung dieser Funktion konfiguriert sein.

HINWEIS:
Benutzer einer Gruppe können auf einen Multi-Gruppenruf nicht antworten.

1 Wählen Sie mit dem Drehknopf für die Kanalwahl den Multi-Gruppen-Aliasnamen oder die entsprechende ID.

2 Drücken Sie zum Durchführen des Anrufs die **Sendetaste (PTT)**.

Die LED leuchtet dauerhaft grün. Im Display wird der Multi-Gruppen-Aliasname oder die relevante ID angezeigt.

Warten Sie, bis der Freiton verklungen ist (falls aktiviert), und sprechen Sie deutlich in das Mikrofon.

6.2.6.1.5

Durchführen eines Einzelrufs mit einer Schnellwahltaste

HINWEIS:
Programmierbare Tasten müssen vom Startbildschirm aus betätigt werden.

Die Schnellwahlfunktion ermöglicht es Ihnen, einen Einzelruf an einen vordefinierten Alias oder eine ID eines Einzelrufs durchzuführen. Diese Funktion kann durch kurzes oder langes Drücken einer programmierbaren Taste zugewiesen werden.

Sie können NUR einen Aliasnamen oder eine ID einer Schnellwahltaste zuweisen. Am Funkgerät können mehrere Schnellwahltasten konfiguriert werden.

1. Drücken Sie die programmierte **Schnellwahltaste**, um einen Einzelruf an einen vordefinierten Alias oder eine ID eines Einzelrufs durchzuführen.
2. Halten Sie das Funkgerät senkrecht 2,5 bis 5,0 cm vom Mund entfernt.
3. Drücken Sie zum Durchführen des Anrufs die **Sendetaste (PTT)**.

   Die LED leuchtet dauerhaft grün.

   Im Display wird der Einzelruf-Alias oder die Einzelruf-ID angezeigt.
4. Warten Sie, bis der Freiton verklungen ist (falls aktiviert), und sprechen Sie deutlich in das Mikrofon.
5. Lassen Sie die **Sendetaste (PTT)** zum Hören los.

   Wenn das Zielfunkgerät antwortet, blinkt die LED grün.

   Wird während einer vorprogrammierten Zeitdauer nicht gesprochen, endet der Ruf.

6.3

Erweiterte Funktionen im Connect Plus-Modus

In diesem Kapitel wird die Bedienung der Funktionen auf Ihrem Funkgerät beschrieben.

6.3.1

Home-Kanalerinnerung

Diese Funktion aktiviert eine Erinnerung, wenn der Home-Kanal auf dem Funkgerät für eine gewisse Zeit nicht eingestellt ist.

Wenn diese Funktion über CPS aktiviert ist und auf dem Funkgerät der Home-Kanal für eine bestimmte Zeit nicht eingestellt ist, ertönen die Home-Kanalerinnerung und die Ansage. In der ersten Zeile des Displays wird regelmäßig `Kein` und in der zweiten Zeile `Home-Kanal` angezeigt.

Sie können auf die Erinnerung durch eine der folgenden Aktionen reagieren:

- Kehren Sie zum Home-Kanal zurück.
- Schalten Sie die Erinnerung über die programmierbare Taste vorübergehend stumm.
- Legen Sie einen neuen Home-Kanal über die programmierbare Taste fest.

6.3.1.1

Stummschalten der Home-Kanalerinnerung

Wenn die Home-Kanalerinnerung ertönt, können Sie die Erinnerung durch die folgenden Aktionen vorübergehend stummschalten.

Drücken Sie die programmierbare Taste **Home-Kanalerinnerung stummschalten**.

In der ersten Zeile des Displays wird `HCR` und in der zweiten Zeile `Stumm` angezeigt.

6.3.1.2

Einrichten eines neuen Home-Kanals

Wenn die Home-Kanalerinnerung ertönt, können Sie einen neuen Home-Kanal durch das Ausführen der folgenden Aktionen einrichten:

- Drücken Sie die programmierbare Taste **Home-Kanal zurücksetzen**.

  In der ersten Zeile des Displays wird der Kanal-Aliasname und in der zweiten Zeile `Neuer Home-K.` angezeigt.

- Legen Sie einen neuen Home-Kanal über das Menü fest:

  a. Drücken Sie OK, um das Menü aufzurufen.

  b. Drücken Sie ▲ oder ▼ bis `Dienstprogramme`, und drücken Sie OK zum Auswählen.

  c. Drücken Sie ▲ oder ▼ zu `FunkgEinstellg` und drücken Sie OK zum Auswählen.

  d. Drücken Sie ▲ oder ▼ bis `Home-Kanal`, und drücken Sie OK zum Auswählen.

  e. Wählen Sie aus der Liste der gültigen Kanäle.

  Das Display zeigt ✓ neben dem ausgewählten Home-Kanal-Alias an.

6.3.2
Automatisches Fallback

Beim automatischen Fallback handelt es sich um eine Funktion, die es Ihnen bei bestimmten Arten von Connect Plus-Systemausfällen ermöglicht, für einen ausgewählten Gruppenkontakt normale Gruppenrufe (keine Notrufe) durchzuführen und zu empfangen.

Wenn einer der folgenden Fehler auftritt, versucht das Funkgerät, per Roaming eine Verbindung zu einem anderen Connect Plus-Standort herzustellen. Bei diesem Suchvorgang kann es passieren, dass Ihr Funkgerät einen betriebsbereiten Connect Plus-Standort findet, oder es kann passieren, dass Ihr Funkgerät einen „Fallback-Kanal“ findet (sofern der automatische Fallback-Modus auf Ihrem Funkgerät aktiviert wurde). Ein Fallback-Kanal ist ein Repeater, der normalerweise Teil eines betriebsbereiten Connect Plus-Standorts ist, der aber momentan keine Verbindung mit seinem Standort-Controller oder mit dem Connect Plus-Netzwerk herstellen kann. Im Fallback-Modus arbeitet der Repeater als eigenständiger digitaler Repeater. Der automatische Fallback-Modus unterstützt nur normale Gruppenrufe (keine Notrufe). Alle anderen Anrufarten werden im Fallback-Modus nicht unterstützt.

6.3.2.1
Hinweise auf den automatischen Fallback-Modus

Wenn das Funkgerät einen Fallback-Kanal verwendet, hören Sie den sporadisch auftretenden „Fallback-Ton“ (etwa ein Mal alle 15 Sekunden, außer bei der

Übertragung). Im Display wird in regelmäßigen Abständen die kurze Meldung „Fallback Kanal“ angezeigt. Ihr Funkgerät lässt PTT nur für den ausgewählten Gruppenkontakt zu (Gruppenruf, Multigroup-Ruf oder Site All Call). Sie können keine anderen Ruftypen durchführen.

6.3.2.2

Durchführen/Empfangen von Anrufen im Fallback-Modus

HINWEIS:
Anrufe werden nur von den Funkgeräten gehört, die den gleichen Fallback-Kanal verwenden und für die gleiche Gruppe ausgewählt sind. Anrufe werden nicht an andere Standorte oder andere Repeater übermittelt.
Notrufe oder Notfallwarnungen sind im Fallback-Modus nicht verfügbar. Wenn Sie im Fallback-Modus die Notruftaste drücken, gibt das Funkgerät den Ton für eine ungültige Taste aus. Funkgeräte mit Display zeigen außerdem die Meldung „Funktion nicht verfügbar“ an.

Einzelrufe von Funkgerät zu Funkgerät und Telefonrufe sind im Fallback-Modus nicht verfügbar. Wenn Sie versuchen, einen privaten Kontakt anzurufen, wird ein Verweigerungston ausgegeben. In solchen Fällen sollten Sie den gewünschten Gruppenkontakt auswählen. Zu den nicht unterstützten Ruftypen gehören Fernmonitor, Rufhinweis, Funkgerät-Check, Aktivieren des Funkgeräts, Deaktivieren des Funkgeräts, Textnachrichten, Standortaktualisierungen und Paketdatenanrufe.

Die ETCA-Funktion (Enhanced Traffic Channel Access) wird im automatischen Fallback-Modus nicht unterstützt. Wenn zwei oder mehr Funkgerätbenutzer gleichzeitig (oder fast gleichzeitig) die **Sendetaste (PTT)** drücken, ist es möglich, dass beide Funkgeräte übertragen, bis die **Sendetaste (PTT)** wieder losgelassen wird. In diesem Fall ist es möglich, dass die Übertragung auf den empfangenden Funkgeräten nicht verstanden wird.

Das Durchführen von Anrufen im Fallback-Modus ähnelt der normalen Funktionsweise. Wählen Sie einfach den Gruppenkontakt, den Sie anrufen möchten (über die normale Kanalauswahlmethode des Funkgeräts), und drücken Sie anschließend die **Sendetaste (PTT)**, um den Ruf zu starten. Es ist möglich, dass der Kanal bereits von einer anderen Gruppe verwendet wird. Wenn der Kanal verwendet wird, hören Sie einen Besetztton, und im Display wird „Kanal belegt“ angezeigt. Über die normale Kanalauswahlmethode des Funkgeräts können Sie Kontakte für Gruppen-, Multi-Gruppen- oder Standort-Rundumrufe auswählen. Wenn das Funkgerät einen Fallback-Kanal verwendet, arbeitet die Multi-Gruppe genau wie die anderen Gruppen. Sie wird nur von Funkgeräten gehört, die derzeit für dieselbe Multi-Gruppe ausgewählt sind.

6.3.2.3
Rückkehr in den normalen Betrieb

Wenn der Standort zum normalen Bündelfunkbetrieb zurückkehrt, während Sie sich im Empfangsbereich Ihres Fallback-Repeaters befinden, verlässt das Funkgerät automatisch den automatischen Fallback-Modus. Ein Produktregistrierungs-„Signalton“ erklingt, wenn das Funkgerät erfolgreich registriert wird. Wenn Sie sich im Bereich eines betriebsbereiten Standorts befinden (der sich nicht im Fallback-Modus befindet), können Sie die Taste „Roaming-Anforderung“ drücken (falls für Ihr Funkgerät konfiguriert), um Ihr Funkgerät zu veranlassen, einen verfügbaren Standort zu suchen und sich dort zu registrieren. Wenn kein anderer Standort verfügbar ist, wechselt Ihr Funkgerät in den automatischen Fallback-Modus, sobald die Suche abgeschlossen ist. Wenn Sie die Netzabdeckung Ihres Fallback-Repeaters verlassen, wechselt Ihr Funkgerät in den Suchmodus (im Display wird `Suche` angezeigt).

6.3.3
Funkgerät-Check

Wenn aktiviert, kann mit dieser Funktion festgestellt werden, ob ein anderes Funkgerät im System aktiv ist,

ohne den Benutzer dieses Funkgeräts zu stören. Am Zielfunkgerät wird keine hörbare oder sichtbare Anzeige der Kontrolle angezeigt.

Diese Funktion ist nur für Funkgeräte-Aliasnamen oder -IDs verfügbar.

6.3.3.1
Senden eines Funkgerät-Checks

1 Zugriff auf die Funkgerät-Check-Funktion.

Bedienelement des Funkgeräts	Schritte
Programmierte Taste für den Funkgerät-Check	**a** Drücken Sie die vorprogrammierte Taste **FunkgCheck**. **b** Drücken Sie ▲ oder ▼ bis zum gewünschten Funkgeräte-Alias oder zur gewünschten ID, und drücken Sie OK zum Auswählen.
Menu	**a** Drücken Sie OK, um das Menü aufzurufen. **b** Drücken Sie ▲ oder ▼ bis `Kontakte`, und drücken Sie OK zum Auswählen. **c** Drücken Sie ▲ oder ▼ bis zum gewünschten Funkgeräte-Alias oder zur gewünschten ID, und drücken Sie OK zum Auswählen. **d** Drücken Sie ▲ oder ▼ bis `FunkgCheck`, und

Bedienelement des Funkgeräts	Schritte
	drücken Sie OK zum Auswählen.

Das Display zeigt den Ziel-Aliasnamen an, der angibt, dass die Anfrage ausgeführt wird. Die LED leuchtet dauerhaft grün.

2 Warten Sie auf eine Quittierung.

Wenn das gewünschte Funkgerät im System aktiv ist, wird ein Hinweiston ausgegeben, und im Display wird kurz `Zielfunkgerät verfügbar` angezeigt.

Wenn das gewünschte Funkgerät nicht im System aktiv ist, wird ein Hinweiston ausgegeben, und im Display wird kurz `Zielfunkgerät nicht verfügbar` angezeigt.

Das Funkgerät kehrt zum Bildschirm des Funkgeräte-Alias oder der relevanten ID zurück, wenn dies über das Menü veranlasst wird.

Das Funkgerät kehrt zum Ausgangsbildschirm zurück, wenn dies über die programmierbare Taste veranlasst wird.

6.3.4
Fernüberwachung

Mit dieser Funktion kann das Mikrofon eines Zielfunkgeräts eingeschaltet werden (nur Funkgeräte-Alias oder -IDs). Die grüne LED des Zielfunkgeräts blinkt einmal. Diese Funktion kann zur Remote-Überwachung jeglicher hörbarer Aktivität rund um das Zielfunkgerät eingesetzt werden.

Ihr Funkgerät muss für die Nutzung dieser Funktion konfiguriert sein.

6.3.4.1
Einleiten des Fernmonitors

HINWEIS:
Der Fern-Monitor stoppt automatisch nach einer programmierten Zeit oder wenn versucht wird, eine Übertragung einzuleiten, den Kanal zu wechseln, oder das Funkgerät auszuschalten.

1 Wählen Sie die Fernmonitor-Funktion.

Bedienelement des Funkgeräts	Schritte
Programmierte Fernmonitor-Taste	**a** Drücken Sie die vorprogrammierte Taste **Remote-Überwachung**. **b** Drücken Sie ▲ oder ▼ bis zum gewünschten Funkgeräte-Alias oder zur gewünschten ID, und drücken Sie OK zum Auswählen.
Menu	**a** Drücken Sie OK, um das Menü aufzurufen. **b** Drücken Sie ▲ oder ▼ bis `Kontakte`, und drücken Sie OK zum Auswählen. **c** Drücken Sie ▲ oder ▼ bis zum gewünschten Funkgeräte-Alias oder zur gewünschten ID, und drücken Sie OK zum Auswählen. **d** Drücken Sie ▲ oder ▼ bis `Manuell wählen`, und drücken Sie OK zum Auswählen. **e** Drücken Sie ▲ oder ▼ bis `FernMon`, und drücken Sie OK zum Auswählen.

Die erste Textzeile zeigt `FernMon` an. Die zweite Textzeile zeigt den Ziel-Aliasnamen, was darauf hinweist, dass die Anfrage ausgeführt wird. Die LED blinkt grün.

2 Warten Sie auf eine Quittierung.

Wenn erfolgreich, erklingt ein positiver Hinweiston, und im Display wird `FernMon erfolgr.` angezeigt. Das Funkgerät gibt nun während einer vorprogrammierten Zeitdauer Audio vom überwachten Funkgerät wieder. Im Display wird `FernMon` angezeigt, gefolgt vom Ziel-Aliasnamen. Nach Ablauf dieser Zeit ertönt ein Hinweiston, und die LED erlischt.

Wenn erfolglos, erklingt ein negativer Hinweiston und im Display wird `FernMon fehlg.` angezeigt.

6.3.5

„Scan“

Mit dieser Funktion kann das Funkgerät Anrufe von Gruppen in einer vorprogrammierten Scan-Liste überwachen bzw. verbinden. Wenn Scan aktiviert ist, wird das Scan-Symbol in der Statusleiste angezeigt, und die LED-Anzeige blinkt (im Leerlauf) gelb.

6.3.5.1

Starten und Stoppen des Scanvorgangs

HINWEIS:
Bei diesem Vorgang wird die Scan-Funktion für alle Connect Plus-Zonen mit derselben Netzwerk-ID wie Ihre derzeit ausgewählte Zone ein- bzw. ausgeschaltet. Dabei ist zu beachten, dass die Scan-Funktion unter Umständen für einige (oder alle) Gruppen in Ihrer Scan-Liste deaktiviert ist, obwohl sie mithilfe dieses Vorgangs aktiviert wurde. Weitere Informationen finden Sie unter Bearbeiten der Scan-Liste auf Seite 248.

Sie können den Scanvorgang durch Drücken der programmierten **Scan**-Taste starten und anhalten **ODER** die folgenden Schritte ausführen.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Scan`, und drücken Sie OK zum Auswählen.

3 Drücken Sie ▲ oder ▼ bis `Einschalten` oder `Abschalten`, und drücken Sie OK zum Auswählen.

- Im Display wird `Scan Ein` angezeigt, wenn Scan deaktiviert ist.
- Das Scan-Menü zeigt `Abschalten`, wenn Scan aktiviert ist.
- Im Display wird `Scan Aus` angezeigt, wenn Scan deaktiviert ist.
- Das Scan-Menü zeigt `Einschalten`, wenn Scan aktiviert ist.

6.3.5.2

Reagieren auf eine Übertragung während eines Scanvorgangs

Das Funkgerät stoppt während eines Suchlaufs auf einem Kanal/bei einer Gruppe, sobald es Aktivität erfasst. Das Funkgerät sucht kontinuierlich nach weiteren Mitgliedern der Scan-Liste, wenn es sich im Steuerungskanal im Leerlauf befindet.

1 Halten Sie das Funkgerät senkrecht 2,5 bis 5,0 cm vom Mund entfernt.

2 Drücken Sie während der Haltezeit die **Sendetaste** (PPT).

Die LED leuchtet dauerhaft grün.

3 Warten Sie, bis der Freiton verklungen ist (falls aktiviert), und sprechen Sie deutlich in das Mikrofon.

4 Lassen Sie die **Sendetaste (PTT)** zum Hören los.

Wenn Sie nicht vor Ablauf der Haltezeit antworten, nimmt das Funkgerät den Scanvorgang wieder auf und durchsucht weitere Gruppen.

6.3.6

Vom Benutzer konfigurierbarer Scan

Wenn das Menü „Liste bearbeiten“ aktiviert ist, kann ein Teilnehmer über das Menü „Mitglied hinzufügen“ Scan-Listen-Mitglieder hinzufügen und entfernen. Ein Scan-Listen-Mitglied muss ein Stamm-Gruppenkontakt sein (z. B.

nicht Multi-Gruppe oder Site All Call/netzwerkweiter Rundumruf), der gegenwärtig einer Kanalwahlposition in einer Connect Plus-Zone mit derselben Netzwerk-ID wie die aktuell ausgewählte Zone zugewiesen ist. Der Gesprächsgruppen-Alias darf keiner Gesprächsgruppe entsprechen, die in der Scan-Liste der aktuellen Zone enthalten ist.

Scan kann über das Menü aktiviert oder deaktiviert werden, oder indem Sie die programmierbare Taste **Scan ein/aus** drücken.

Diese Funktion funktioniert nur, wenn das Funkgerät derzeit an keinem Gespräch teilnimmt. Wenn Sie gerade ein Gespräch führen, kann das Funkgerät keine anderen Gruppenrufe scannen und somit auch nicht erkennen, ob solche Anrufe getätigt werden. Wenn Ihr Ruf beendet ist, kehrt das Funkgerät zum Steuerungskanals-Zeitfenster zurück und kann wieder nach Gruppen scannen, die sich in der Scan-Liste befinden.

6.3.7

Bearbeiten der Scan-Liste

HINWEIS:
Wenn der Eintrag in der Scan-Liste zufällig die derzeit ausgewählte Gruppe ist, hört das Funkgerät Aktivitäten dieser Gruppe ab, unabhängig davon, ob neben dem Eintrag in der Liste ein Häkchen angezeigt wird oder nicht. Wenn ein Funkgerät sich nicht in einem Anruf befindet, wartet es auf Aktivitäten in seiner ausgewählten Gruppe, der Multi-Gruppe, dem Site-Rundumruf und der Standard-Notrufgruppe (falls diese konfiguriert wurden). Dieser Vorgang kann nicht deaktiviert werden. Wenn das Scannen aktiviert ist, achtet das Funkgerät auch auf Aktivitäten aktivierter Mitglieder der Scan-Liste.

Ihre Scan-Liste bestimmt, welche Gruppen gescannt werden können. Die Liste wird erstellt, wenn das Funkgerät programmiert wird. Wenn ihr Funkgerät so programmiert wurde, dass Sie die Scan-Liste bearbeiten können, können Sie:

- Scanning für einzelne Gruppen in der Liste aktivieren/deaktivieren.
- Scan-Mitglieder über das Menü zum Hinzufügen von Mitgliedern hinzufügen oder entfernen. Siehe

Hinzufügen oder Löschen einer Gruppe über das Menü „Teilnehmer hinzufügen“ auf Seite 250.

HINWEIS:
Ein Scan-Listen-Mitglied muss ein Stamm-Gruppenkontakt sein (nicht Multi-Gruppe oder Site All Call/netzwerkweiter Rundumruf), der gegenwärtig einer Kanalwahlposition in einer Connect Plus-Zone mit derselben Netzwerk-ID wie die aktuell ausgewählte Zone zugewiesen ist. Der Gesprächsgruppen-Alias darf keiner Gesprächsgruppe entsprechen, die in der Scan-Liste der aktuellen Zone enthalten ist.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Liste anzeigen/bearbeiten`, und drücken Sie OK zum Auswählen.

3 Drücken Sie ▲ oder ▼ bis zum gewünschten Gruppennamen.

Wenn sich ein Häkchen vor dem Gruppennamen befindet, ist Scannen derzeit aktiviert für diese Gruppe.

Wenn sich kein Häkchen vor dem Gruppennamen befindet, ist Scannen derzeit für diese Gruppe deaktiviert.

4 OK, um die gewünschte Gruppe auszuwählen.

Das Display zeigt `Aktivieren`, wenn die Funktion „Scannen“ derzeit für die Gruppe deaktiviert ist.

Das Display zeigt `Deaktivieren`, wenn die Funktion „Scannen“ derzeit für die Gruppe aktiviert ist.

5 Wählen Sie die angezeigte Option (`Aktivieren` oder `Deaktivieren`) und drücken Sie OK zum Auswählen.

Abhängig von der gewählten Option, erscheint auf dem Funkgerät vorübergehend die Anzeige `Scannen aktiviert` oder `Scannen Deaktiviert` als Bestätigung.

Auf dem Funkgerät wird erneut die Zonen-Scan-Liste angezeigt. Wenn die Funktion „Scannen“ für die Gruppe aktiviert wurde, wird das Häkchen vor dem Gruppennamen angezeigt. Wenn die Funktion „Scannen“ für die Gruppe

deaktiviert wurde, wird das Häkchen vor dem Gruppennamen entfernt.

6.3.8

Hinzufügen oder Löschen einer Gruppe über das Menü „Teilnehmer hinzufügen“

Das Connect Plus-Funkgerät unterstützt keine doppelten Gruppennummern oder doppelten Gruppen-Aliasnamen in einer Zonen-Scan-Liste (oder deren Anzeige als „Scan-Kandidaten“). Daher kann sich die in Schritt 6 und Schritt 7 beschriebene Liste der „Scan-Kandidaten“ ändern, wenn eine Gruppe zur Zonen-Scan-Liste hinzugefügt oder aus dieser gelöscht wird.

Wenn Ihr Funkgerät darauf programmiert wurde, dass Sie die Scan-Liste bearbeiten können, so können Sie mithilfe des Menüs „Teilnehmer hinzufügen“ eine Gruppe zur Scan-Liste der aktuell ausgewählten Zone hinzufügen oder eine Gruppe aus dieser löschen.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis zur Option „Scan“, und drücken Sie OK zum Auswählen.

3 Drücken Sie ▲ oder ▼ bis `<Teilnehmer hinzufügen>` und drücken Sie OK zum Auswählen.

Im Display wird `Teilnehmer aus Zone n hinzufügen` angezeigt (n = die Zahl der ersten Connect Plus-Zone in Ihrem Funkgerät mit derselben Netzwerk-ID wie Ihre derzeit ausgewählte Zone).

4 Führen Sie einen der folgenden Schritte aus.

- Wenn die Gruppe, die Sie der Scan-Liste hinzufügen möchten, einer Kanalwahlschalter-Position in dieser Zone zugeordnet ist, fahren Sie mit Schritt 6 fort.
- Wenn die Gruppe, die Sie der Scan-Liste hinzufügen möchten, einer Kanalwahlschalter-Position in einer anderen Connect Plus-Zone zugeordnet ist, fahren Sie mit Schritt 5 fort.

5 Drücken Sie ▲ oder ▼ , um eine Liste von Connect Plus-Zonen mit derselben Netzwerk-ID wie die aktuell ausgewählte Zone zu durchsuchen.

6 Nach der Standortbestimmung der Connect Plus-Zone, bei der die gewünschte Gruppe einer Kanalwahlschalterposition zugeordnet ist, drücken Sie OK zum Auswählen.

Ihr Funkgerät zeigt den ersten Eintrag in einer Liste von Gruppen an, die einer Kanal-Position in dieser Zone zugeordnet sind. Die Gruppen in der Liste werden als „Scan-Kandidaten“ bezeichnet, weil sie der Scan-Liste der derzeit ausgewählten Zone hinzugefügt werden können (bzw. der Zone-Scan-Liste bereits hinzugefügt sind).

Wenn die Zone keine Gruppen enthält, die der Scan-Liste hinzugefügt werden können, zeigt das Funkgerät `Keine Kandidaten` an.

7 Drücken Sie ▲ oder ▼ zum Durchsuchen der Liste der Gruppenkandidaten.

Wenn ein Pluszeichen (+) unmittelbar vor dem Gruppen-Aliasnamen angezeigt wird, so bedeutet dies, dass sich die Gruppe derzeit in der Scan-Liste für die ausgewählte Zone befindet.

Wenn das Pluszeichen (+) nicht unmittelbar vor dem Aliasnamen angezeigt wird, so befindet sich die Gruppe derzeit nicht in der Scan-Liste, kann jedoch hinzugefügt werden.

8 Drücken Sie OK, wenn der gewünschte Gruppen-Aliasname angezeigt wird.

Wenn sich diese Gruppe nicht auf der Scan-Liste für die aktuell ausgewählte Zone befindet, wird die Meldung (Gruppen-Alias) `Hinzufügen` angezeigt.

Wenn sich diese Gruppe bereits auf der Scan-Liste für die aktuell ausgewählte Zone befindet, wird die Meldung (Gruppen-Alias) `Löschen` angezeigt.

9 Drücken Sie OK, um die angezeigte Meldung zu bestätigen (`Hinzufügen` oder `Löschen`).

War der Löschvorgang einer Gruppe aus der Liste erfolgreich, so wird das Pluszeichen (+) unmittelbar vor dem Alias nicht mehr angezeigt.

War das Hinzufügen einer Gruppe zur Liste erfolgreich, so wird das Pluszeichen (+) unmittelbar vor dem Alias angezeigt.

Wenn Sie versuchen, eine Gruppe hinzuzufügen, wenn die Liste bereits voll ist, zeigt das Funkgerät `Liste voll` an. In diesem Fall müssen Sie eine Gruppe aus der Scan-Liste löschen, bevor Sie eine neue hinzufügen können.

10 Wenn Sie die Einstellungen abgeschlossen haben, drücken Sie so oft wie notwendig, um zum gewünschten Menü zurückzukehren.

6.3.9

Informationen zum Scan-Vorgang

HINWEIS:
Wenn sich das Funkgerät mit einem Ruf für ein Mitglied der Scan-Liste von einer anderen Zone verbindet und der Standzeit-Timer abläuft, bevor Sie reagieren können, müssen Sie zu der Zone und dem Kanal des Mitglieds der Scan-Liste navigieren und einen neuen Ruf einleiten, um antworten zu können.

Unter manchen Umständen ist es möglich, Anrufe für Gruppen zu verpassen, die sich in Ihrer Scan-Liste befinden. Wenn Sie einen Anruf aus einem der folgenden Gründe verpassen, deutet dies nicht auf ein Problem mit Ihrem Funkgerät hin. Hierbei handelt es sich um einen normalen Scan-Vorgang für Connect Plus.

- Die Scan-Funktion ist nicht eingeschaltet (prüfen Sie, ob das Scan-Symbol im Display angezeigt wird).
- Ein Mitglied der Scan-Liste wurde über das Menü deaktiviert (siehe Bearbeiten der Scan-Liste auf Seite 248).
- Sie nehmen bereits an einem Gespräch teil.
- Kein Mitglied der gescannten Gruppe ist an Ihrem Standort registriert (gilt nur für Multisite-Systeme).

6.3.10

Antworten während des Scannens

Wenn Ihr Funkgerät einen Ruf aus der wählbaren Gruppen-Scan-Liste scannt und die **Sendetaste** (PTT) während des gescannten Rufs gedrückt wird, hängt die Reaktion des Funkgeräts davon ab, ob die Funktion „Antworten während des Scannens“ bei Konfiguration des Funkgeräts aktiviert oder deaktiviert wurde. Weitere

Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator.

Antworten während des Scannens deaktiviert

Das Funkgerät verlässt den gescannten Ruf und versucht, über den Kontakt für die aktuell ausgewählte Kanalposition zu senden. Wenn die Haltezeit für den aktuell ausgewählten Kontakt abläuft, wechselt das Funkgerät zu dem Standardkanal und startet den Timer für die Scan-Haltezeit. Das Funkgerät setzt den Gruppenscan fort, wenn der Timer für die Scan-Haltezeit abläuft.

Antworten während des Scannens aktiviert

Wenn die **Sendetaste** (PTT) während der Haltezeit der Gruppe für den gescannten Ruf gedrückt wird, versucht das Funkgerät, an die gescannte Gruppe zu senden.

HINWEIS:
Wenn Sie einen Ruf einer Gruppe scannen, die keiner Kanalposition in der derzeit ausgewählten Zone zugewiesen ist, und die Haltezeit des Rufs abläuft, wechseln Sie zu der richtigen Zone, und wählen Sie dann die Kanalposition der Gruppe, um mit dieser Gruppe zu sprechen.

6.3.11

Bearbeitung der Priorität für eine Gesprächsgruppe

Der Prioritätsmonitor ermöglicht es dem Funkgerät, automatisch Übertragungen von einer Gesprächsgruppe mit höherer Priorität zu empfangen, wenn es gerade mit einem anderen Ruf beschäftigt ist. Beim Wechsel des Funkgeräts zum Ruf mit höherer Priorität erklingt ein Ton. Es gibt zwei Prioritätsstufen für die Gesprächsgruppen: `P1` und `P2`. `P1` hat eine höhere Priorität als `P2`.

HINWEIS:
Wenn die standardmäßige Notrufgruppen-ID in MOTOTRBO Connect Plus Option Board CPS konfiguriert ist, gibt es drei Prioritätsstufen für Gesprächsgruppen: P0, P1 und P2. P0 ist die permanente Notrufgruppen-ID und hat die höchste Priorität. Weitere Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator.

1. Drücken Sie OK, um das Menü aufzurufen.
2. Drücken Sie ▲ oder ▼ bis `Scan`, und drücken Sie OK zum Auswählen.

3 Drücken Sie ▲ oder ▼ bis `Liste anzeigen/bearbeiten`, und drücken Sie OK zum Auswählen.

4 Drücken Sie ▲ oder ▼ bis zur gewünschten Gesprächsgruppe, und drücken Sie OK zum Auswählen.

5 Drücken Sie ▲ oder ▼ bis `Priorit.bearb`, und drücken Sie OK zum Auswählen.

6 Drücken Sie ▲ oder ▼ bis zur gewünschten Prioritätsstufe, und drücken Sie OK zum Auswählen.

Im Display wird ein positiver Kurzhinweis angezeigt, bevor wieder der vorhergehende Bildschirm angezeigt wird. Das Prioritäts-Symbol wird links neben der Gesprächsgruppe angezeigt.

6.3.12

Kontakteinstellungen

HINWEIS:
Sie können den Contact Plus-Kontakten Funkgeräte-IDs hinzufügen oder diese bearbeiten. Funkgeräte-IDs können nur von Ihrem Händler gelöscht werden.
Ist die Verschlüsselungsfunktion für einen Kanal aktiviert, können Sie auf diesem Kanal Sprachanrufe mit aktivierter Verschlüsselung durchführen. Ausschließlich Funkgeräte mit demselben Privacy-Key oder demselben Schlüsselwert und derselben Schlüssel-ID wie Ihr Funkgerät können die Übertragung entschlüsseln.

Der Zugang zu Kontaktlisten hängt von der Zonenkonfiguration ab:

- Wenn nur eine Zone auf dem Funkgerät konfiguriert ist, zeigt die Kontaktliste direkt die Liste aus der aktuell ausgewählten Zone an.
- Wenn mehrere Zonen konfiguriert sind, zeigt der Ordner für Zonenkontakte alle Zonen mit identischen Netzwerk-IDs als aktuell ausgewählte Zone an. Der Benutzer kann auf die Kontakte in diesen Zonen zugreifen.

Über die Kontakte wird Ihr Funkgerät mit einer „Adressbuchfunktion“ ausgestattet. Jeder Eintrag entspricht

einem Aliasnamen bzw. einer ID, die Sie zur Rufeinleitung verwenden.

Jede Zone bietet eine Kontaktliste mit bis zu 100 Kontakten. Die folgenden Kontaktoptionen sind verfügbar:

- Einzelruf
- Gruppenruf
- Multi-Gruppenruf
- Standortsammelruf – Sprachruf
- Standortsammelruf – Text
- Zentralruf

Der Kontakttyp „Zentralruf“ dient zum Senden einer Textnachricht an einen Dispatcher-PC über den Textnachrichten-Server eines Drittanbieters.

6.3.12.1

Durchführen eines Einzelrufs über das Menü „Kontakte“

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis Kontakte, und drücken Sie OK zum Auswählen.

Die Einträge sind in alphabetischer Reihenfolge sortiert.

3 Halten Sie das Funkgerät senkrecht 2,5 bis 5,0 cm vom Mund entfernt.

4 Drücken Sie zum Durchführen des Anrufs die **Sendetaste (PTT)**.

Die LED leuchtet dauerhaft grün. Im Display wird der Aliasname des Zielfunkgeräts angezeigt.

5 Warten Sie, bis der Freiton verklungen ist (falls aktiviert), und sprechen Sie deutlich in das Mikrofon.

6 Lassen Sie die **Sendetaste (PTT)** los, um den Gesprächspartner zu hören.

Sobald das gerufene Funkgerät antwortet, blinkt die LED grün, und im Display wird die ID des sendenden Funkgeräts angezeigt.

Wird während einer vorprogrammierten Zeitdauer nicht gesprochen, endet der Ruf.

Ein kurzer Hinweiston erklingt. Im Display wird `Ruf beendet` angezeigt.

6.3.12.2

Durchführen eines Rufs mittels Ruf-Aliassuche

Zum Auffinden des Aliasnamens des gewünschten Funkgeräts kann auch eine Alias- oder alphanumerische Suche durchgeführt werden.

Diese Funktion ist nur verfügbar, während sich das Funkgerät im Menü „Kontakte“ befindet.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Kontakte`, und drücken Sie OK zum Auswählen.

Die Einträge sind in alphabetischer Reihenfolge sortiert.

3 Geben Sie den ersten Buchstaben des gewünschten Aliasnamens ein, und drücken Sie dann die Taste ▲ oder ▼, um den gewünschten Aliasnamen zu lokalisieren.

4 Halten Sie das Funkgerät senkrecht 2,5 bis 5,0 cm vom Mund entfernt.

5 Drücken Sie zum Durchführen des Anrufs die **Sendetaste (PTT)**.

Die LED leuchtet dauerhaft grün. Im Display wird der Aliasname des Zielfunkgeräts angezeigt.

6 Warten Sie, bis der Freiton verklungen ist (falls aktiviert), und sprechen Sie deutlich in das Mikrofon.

7 Lassen Sie die **Sendetaste (PTT)** los, um den Gesprächspartner zu hören.

Wenn das Zielfunkgerät antwortet, blinkt die LED grün.

Wird während einer vorprogrammierten Zeitdauer nicht gesprochen, endet der Ruf.

Im Display wird `Ruf beendet` angezeigt.

6.3.13

Rufanzeigeeinstellungen

Mit dieser Funktion können Funkgerätebenutzer Ruftöne für Rufe oder Textnachrichten konfigurieren.

6.3.13.1

Aktivieren und Deaktivieren von Ruftönen für Rufhinweise

Die Ruftöne für einen empfangenen Rufhinweis können ausgewählt bzw. ein- oder ausgeschaltet werden.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ zu `Einstellungen` und drücken Sie OK zum Auswählen.

3 Drücken Sie ▲ oder ▼ zu `FunkgEinstellg` und drücken Sie OK zum Auswählen.

4 Drücken Sie ▲ oder ▼ zu `Hinweistöne` und drücken Sie OK zum Auswählen.

5 Drücken Sie ▲ oder ▼ bis `Ruftöne` und drücken Sie OK zum Auswählen.

6 Drücken Sie ▲ oder ▼ bis `Rufhinweis` und drücken Sie OK zum Auswählen.

Der derzeitige Ton wird durch ein ✓ angezeigt.

7 Drücken Sie ▲ oder ▼ bis zum gewünschten Hinweiston und drücken Sie OK zum Auswählen.

Neben dem gewählten Ton wird ✓ angezeigt.

6.3.13.2

Aktivieren und Deaktivieren von Ruftönen für Einzelrufe

Die Ruftöne für einen empfangenen Einzelruf können ein- oder ausgeschaltet werden.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Dienstprogramme`, und drücken Sie OK zum Auswählen.

3 Drücken Sie ▲ oder ▼ zu `FunkgEinstellg` und drücken Sie OK zum Auswählen.

4 Drücken Sie ▲ oder ▼ bis `Töne/Hinweistöne`, und drücken Sie OK zum Auswählen.

5 Drücken Sie ▲ oder ▼ bis `Ruftöne`, und drücken Sie OK zum Auswählen.

6 Drücken Sie ▲ oder ▼ bis `Einzelruf`, und drücken Sie OK zum Auswählen.

6.3.13.3

Aktivieren und Deaktivieren von Ruftönen für Textnachrichten

Die Ruftöne für eine empfangene Textnachricht können ein- oder ausgeschaltet werden.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Dienstprogramme`, und drücken Sie OK zum Auswählen.

3 Drücken Sie ▲ oder ▼ zu `FunkgEinstellg` und drücken Sie OK zum Auswählen.

4 Drücken Sie ▲ oder ▼ bis `Töne/Hinweistöne`, und drücken Sie OK zum Auswählen.

5 Drücken Sie ▲ oder ▼ bis `Ruftöne`, und drücken Sie OK zum Auswählen.

6 Drücken Sie ▲ oder ▼ bis `Textnachricht`, und drücken Sie OK zum Auswählen.
Der derzeitige Ton wird durch ein ✓ angezeigt.

7 Drücken Sie ▲ oder ▼ bis zum gewünschten Ton, und drücken Sie OK zum Auswählen.
Neben dem gewählten Ton wird ✓ angezeigt.

6.3.13.4

Auswählen eines Rufhinweistyps

HINWEIS:
Die programmierte Taste **Klingelton** wird von Ihrem Händler oder Systemadministrator zugeordnet. Klären Sie mit Ihrem Händler oder Systemadministrator, wie das Funkgerät konfiguriert wurde.

Sie können die Funkrufe auf einen vorprogrammierten Vibrations-Ton einstellen. Wenn „Alle Töne“ deaktiviert ist, zeigt das Funkgerät das Symbol „Alle Töne stumm“ an. Wenn „Alle Töne“ aktiviert ist, wird der zugehörige Klingelton angezeigt.

Bei einem kurzen Klingelton vibriert das Funkgerät einmal. Bei einem sich wiederholenden Klingelton vibriert das Funkgerät mehrmals. Bei der Einstellung „Klingeln und Vibrieren“ gibt das Funkgerät bei einer eingehenden Übertragung (z. B. Rufhinweis oder Nachricht) einen speziellen Klingelton aus. Dieser klingt wie ein Bestätigungston oder ein Ton bei einem verpassten Ruf.

Für Funkgeräte mit Akkus, die die Funktion „Vibrieren“ unterstützen und an einem vibrierenden Gürtelclip befestigt sind, sind die zur Verfügung stehen Optionen für den Rufhinweistyp: Stumm, Klingeln, Vibrieren sowie Klingeln und Vibrieren.

Für Funkgeräte mit Akkus, die die Funktion „Vibrieren“ nicht unterstützen und nicht an einem vibrierenden Gürtelclip befestigt sind, ist der Rufhinweistyp automatisch auf „Klingeln“ eingestellt.Die verfügbaren Optionen für Rufhinweistypen sind „Stumm” und „Klingeln”.

Sie können einen Rufhinweistontyp durch eine der folgenden Maßnahmen auswählen.

- Drücken Sie die vorprogrammierte Taste **Art des Hinweistons bei Anruf**, um auf das Menü für die Art des Hinweistons zuzugreifen.
  a. Drücken Sie ▲ oder ▼ zu `Klingeln`, `Vibrieren`, `Klingeln und Vibrieren` oder `Stiller Klingelton` und drücken Sie OK zum Auswählen.
- Rufen Sie diese Funktion über das Menü auf.
  a. Drücken Sie OK , um das Menü aufzurufen.
  b. Drücken Sie ▲ oder ▼ zu `Einstellungen` und drücken Sie OK zum Auswählen.
  c. Drücken Sie ▲ oder ▼ zu `Funkgeräteinstellungen` und drücken Sie OK zum Auswählen.
  d. Drücken Sie ▲ oder ▼ zu `Hinweistöne` und drücken Sie OK zum Auswählen.
  e. Drücken Sie ▲ oder ▼ zu `Rufhinweistyp` und drücken Sie OK zum Auswählen.
  f. Drücken Sie ▲ oder ▼ bis `Klingeln`, `Vibrieren`, `Klingeln und Vibrieren` oder `Still`, und drücken Sie OK zum Auswählen.

6.3.13.5

Konfigurieren der Vibrationsart

HINWEIS:
Die programmierte Taste **Vibrationsart** wird von Ihrem Händler oder Systemadministrator zugeordnet. Klären Sie mit Ihrem Händler oder Systemadministrator, wie das Funkgerät konfiguriert wurde.

„Vibrationsart“ ist aktiviert, wenn der vibrierende Gürtelclip am Funkgerät mit einem Akku angeschlossen ist, der die Vibrationsfunktion unterstützt.

Sie können die Vibrationsart durch eine der folgenden Maßnahmen konfigurieren.

- Drücken Sie die vorprogrammierte Taste **Vibrationsart**, um auf das Menü „Vibrationsart“ zuzugreifen.
  a. Drücken Sie ▲ oder ▼ zu `Kurz`, `Mittel` oder `Lang` und drücken Sie OK zum Auswählen.
- Rufen Sie diese Funktion über das Menü auf.
  a. Drücken Sie OK, um das Menü aufzurufen.
  b. Drücken Sie ▲ oder ▼ zu `Einstellungen` und drücken Sie OK zum Auswählen.
  c. Drücken Sie ▲ oder ▼ zu `Funkgeräteinstellungen` und drücken Sie OK zum Auswählen.
  d. Drücken Sie ▲ oder ▼ zu `Hinweistöne` und drücken Sie OK zum Auswählen.
  e. Drücken Sie ▲ oder ▼ zu `Vibrationsart` und drücken Sie OK zum Auswählen.
  f. Drücken Sie ▲ oder ▼ bis `Kurz`, `Mittel` oder `Lang`, und drücken Sie OK zum Auswählen.

6.3.13.6
Zunehmende Alarmtonlautstärke

Das Funkgerät kann auf Dauerhinweis bei Nichtbeantworten eines Funkrufs programmiert werden. Dieser Dauerhinweis erfolgt dadurch, dass der Alarmton automatisch zunehmend lauter wird. Diese Funktion wird als Escalert bezeichnet.

6.3.14
Funktionen des Rufprotokolls

Das Funkgerät führt ein Protokoll aller kürzlich durchgeführten, beantworteten und entgangenen Einzelrufe. Das Rufprotokoll kann zur Ansicht und

Verwaltung kürzlich durchgeführter Anrufe verwendet werden.

In jeder Rufliste können die folgenden Funktionen durchgeführt werden:

- Delete
- Details

6.3.14.1

Anzeigen der letzten Anrufe

Die Listen lauten `Verpasst`, `Beantwortet` und `Abgehend`.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Anrufprotokoll`, und drücken Sie OK zum Auswählen.

3 Drücken Sie ▲ oder ▼ bis zur gewünschten Liste, und drücken Sie OK zum Auswählen.

Das Display zeigt oben in der Liste den letzten Eintrag an.

4 Drücken Sie ▲ oder ▼, um die Liste anzuzeigen.

Drücken Sie die **Sendetaste (PTT)**, um einen Einzelruf mit dem gerade ausgewählten Alias oder der ID zu starten.

6.3.14.2

Löschen eines Rufs aus einer Rufliste

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Anrufprotokoll`, und drücken Sie OK zum Auswählen.

3 Drücken Sie ▲ oder ▼ bis zur gewünschten Liste, und drücken Sie OK zum Auswählen.

Wenn Sie eine Anrufliste wählen, die keine Einträge aufweist, zeigt das Display `Liste leer` an .

4 Drücken Sie ▲ oder ▼ bis zum gewünschten Aliasnamen oder zur gewünschten ID, und drücken Sie OK zum Auswählen.

5 Drücken Sie ▲ oder ▼ bis Löschen, und drücken Sie OK zum Auswählen.

6 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie OK, um Ja auszuwählen und den Eintrag zu löschen. Im Display wird Eintrag gelöscht angezeigt.
- Drücken Sie ▲ oder ▼ bis Nein, und drücken Sie die Taste OK, um zum vorherigen Bildschirm zurückzukehren.

6.3.14.3

Anzeigen von Details aus einer Rufliste

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis Anrufprotokoll, und drücken Sie OK zum Auswählen.

3 Drücken Sie ▲ oder ▼ bis zur gewünschten Liste, und drücken Sie OK zum Auswählen.

4 Drücken Sie ▲ oder ▼ bis zum gewünschten Aliasnamen oder zur gewünschten ID, und drücken Sie OK zum Auswählen.

5 Drücken Sie ▲ oder ▼ bis Details anzeigen, und drücken Sie OK zum Auswählen.
Das Display zeigt die Details der Rufliste an.

6.3.15

Rufhinweise

Paging mit Rufhinweis erlaubt Ihnen, einen bestimmten Funkgerätbenutzer dazu aufzufordern, Sie bei nächster Gelegenheit zurückzurufen.

Der Zugriff auf diese Funktion läuft über das Menü via „Kontakte“.

6.3.15.1

Antworten auf Rufhinweise

Führen Sie die Vorgehensweise zum Antworten auf Rufhinweise auf Ihrem Funkgerät durch.

Wenn Sie einen Rufhinweis erhalten:

- Ein wiederholter Hinweiston erklingt.
- Die gelbe LED blinkt.
- Auf dem Display wird die Liste der Benachrichtigungen mit einem Rufhinweiseintrag mit dem Alias oder der ID des anrufenden Funkgeräts angezeigt.

  Anhängig von der Konfiguration durch den Händler oder Systemadministrator können Sie auf einen Rufhinweis folgendermaßen reagieren:

  - Drücken Sie die **Sendetaste (PTT)**, und antworten Sie dem Anrufer direkt mit einem Einzelruf.
  - Drücken Sie die **Sendetaste (PTT)**, um die Gesprächsgruppenkommunikation fortzuführen.

  Der Rufhinweis wird in die Option „Entgangene Rufe“ im Menü „Ruf-Log“ verschoben. Sie können aus dem Verlauf der entgangenen Rufe heraus dem Anrufer antworten.

Weitere Informationen finden Sie unter Benachrichtigungsliste auf Seite 179 und Funktionen des Rufprotokolls auf Seite 131.

6.3.15.2

Senden eines Rufhinweises aus der Kontaktliste

1. Drücken Sie OK, um das Menü aufzurufen.
2. Drücken Sie ▲ oder ▼ bis `Kontakte`, und drücken Sie OK zum Auswählen.
3. Verwenden Sie einen der im Folgenden beschriebenen Schritte, um den relevanten Alias oder die ID des Funkgeräts auszuwählen:
   - Wählen Sie den Aliasnamen des Funkgeräts direkt

- Drücken Sie ▲ oder ▼ bis zum gewünschten Funkgeräte-Alias, und drücken Sie OK zum Auswählen.

4 Drücken Sie ▲ oder ▼ bis `Rufhinweis`, und drücken Sie OK zum Auswählen.

Das Display zeigt `Rufhinweis: <Funkgeräte-Alias oder ID>Rufhinweis` und den Alias oder die ID des Teilnehmers an, was darauf hinweist, dass der Rufhinweis gesendet wurde.

Während das Funkgerät den Rufhinweis sendet, leuchtet die LED ununterbrochen grün.

Wird die Rufhinweis-Quittierung empfangen, wird im Display `Hinweiston erfolgr` angezeigt.

Wird keine Rufhinweis-Quittierung empfangen, wird im Display `Hinweiston erfolglos` angezeigt.

6.3.15.3

Senden eines Rufhinweises mit der Schnellwahltaste

Drücken Sie die vorprogrammierte **Schnellwahltaste,** um einen Rufhinweis an den vordefinierten Aliasnamen zu senden.

Im Display wird `Rufhinweis` und der Aliasname bzw. die ID des Funkgeräts angezeigt, was bedeutet, dass der Rufhinweis gesendet wurde. Während das Funkgerät den Rufhinweis sendet, leuchtet die LED ununterbrochen grün.

Wird die Rufhinweis-Quittierung empfangen, wird im Display `Hinweiston erfolgr` angezeigt.

Wird keine Rufhinweis-Quittierung empfangen, wird im Display `Hinweiston erfolglos` angezeigt.

6.3.16

Stummschaltmodus

Der Stummschalt-Modus stellt dem Benutzer eine Möglichkeit zur Verfügung, sämtliche akustischen Signale des Funkgeräts stummzuschalten.

Sobald der Stummschalt-Modus initiiert wurde, werden alle akustischen Signale stummgeschaltet, mit Ausnahme der Funktionen mit höherer Priorität wie etwa Notfall-Funktionen.

Beim Beenden des Stummschalt-Modus nimmt das Funkgerät die Wiedergabe von laufenden Tönen oder Audio-Übertragungen wieder auf.

HINWEIS:
Dies ist eine käufliche Funktion. Weitere Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator.

6.3.16.1

Einschalten des Stummschalt-Modus

Führen Sie die Vorgehensweise zum Einschalten des Stummschalt-Modus durch.

Führen Sie einen der folgenden Schritte aus:

- Rufen Sie diese Funktion über die programmierte Taste **Stummschalt-Modus** auf.
- Der Zugriff auf diese Funktion erfolgt, indem Sie das Funkgerät kurzzeitig mit dem Display nach unten hinlegen.

Abhängig von Funkgerätemodell kann die Display nach unten-Funktion über das Funkgerätemenü oder vom Systemadministrator aktiviert werden. Weitere Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator.

WICHTIG:
Der Benutzer kann zu einem bestimmten Zeitpunkt nur die Totmann-Funktion oder die Display nach unten-Funktion aktivieren. Die beiden Funktionen können nicht gleichzeitig aktiviert werden.

HINWEIS:
Display nach unten Funktion gilt nur für DP4601e .

Folgendes geschieht, wenn der Stummschalt-Modus aktiviert ist:

- Positiver Hinweiston erklingt.
- Auf dem Display wird `Stummschalt-Modus Ein` angezeigt.
- Die rote LED beginnt zu blinken und blinkt weiter, bis der Stummschalt-Modus beendet wird.
- Auf dem Display wird das Symbol **Stummschalt-Modus** auf der Startseite angezeigt.

- Das Funkgerät wird stummgeschaltet.
- Der Stummschalt-Modus-Timer beginnt mit dem Countdown der konfigurierten Dauer.

6.3.16.2

Einstellen des Stummschalt-Modus-Timers

Der Stummschalt-Modus kann durch Einstellen des Stummschalt-Modus-Timers für eine vorkonfigurierte Dauer aktiviert werden. Die Timer-Dauer wird über das Funkgerätemenü konfiguriert und kann zwischen 0,5 und 6 Stunden betragen. Nach Ablauf des Timers wird der Stummschalt-Modus beendet.

Wenn der Timer bei 0 belassen wird, bleibt das Funkgerät unbeschränkt im Stummschalt-Modus, bis es wieder mit dem Display nach oben hingelegt oder die programmierte **Stummschalt-Modus**-Taste gedrückt wird.

HINWEIS:
Display nach unten-Funktion gilt nur für DP4601e.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Dienstprogramme`.Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis `Funkgeräteinstellungen`.Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis `Timer stummschalten`. Drücken Sie OK, um die Option auszuwählen.

5 Drücken Sie ▲ oder ▼ zum Bearbeiten des numerischen Werts jeder Ziffer, und drücken Sie OK.

6.3.16.3

Beenden des Stummschalt-Modus

Die Funktion kann automatisch beendet werden, sobald der Stummschalt-Modus-Timer abgelaufen ist.

Führen Sie einen der folgenden Schritte aus, um den Stummschalt-Modus manuell zu beenden:

- Drücken Sie die programmierte **Stummschalt-Modus**-Taste.
- Drücken Sie die **Sendetaste (PTT)** bei einem beliebigen Eintrag.
- Legen Sie das Funkgerät kurzzeitig mit dem Display nach unten hin.

HINWEIS:
Display nach unten-Funktion gilt nur für DP4601e.

Folgendes geschieht, wenn der Stummschalt-Modus deaktiviert ist:

- Negativer Hinweiston erklingt.
- Das Display zeigt `Stummschalt-Modus aus` an.
- Die blinkende rote LED schaltet sich aus.
- Das **Stummschalt-Modus**-Symbol verschwindet von der Startseite.
- Die Stummschaltung des Funkgeräts wird aufgehoben, und der Lautsprecherstatus wird wiederhergestellt.
- Wenn der Timer nicht abgelaufen ist, wird der Stummschalt-Modus-Timer gestoppt.

HINWEIS:
Der Stummschalt-Modus wird ebenfalls beendet, wenn der Benutzer Sprache überträgt oder auf einen nicht programmierten Kanal wechselt.

6.3.17

Notruf

HINWEIS:
Wenn Ihr Funkgerät für die Notrufinitiierung des Typs „Lautlos“ oder „Lautlos mit Sprache“ konfiguriert ist, wird es in den meisten Fällen den lautlosen Betrieb automatisch beenden, nachdem der Notruf oder Notfallalarm abgeschlossen wurde. Eine Ausnahme zu dieser Regel besteht, wenn „Notfallalarm“ der konfigurierte Notruf-Modus und „Lautlos“ der konfigurierte Notfalltyp ist. Wenn Ihr Funkgerät auf diese Weise konfiguriert wurde, wird der lautlose Betrieb fortgesetzt, bis Sie ihn abbrechen, indem Sie die **Sendetaste (PTT)** oder die konfigurierte Notrufausschalttaste drücken.

Notfall-Sprachanrufe und Notrufsignale werden im Connect Plus Auto Fallback-Modus nicht unterstützt. Weitere Informationen finden Sie unter Automatisches Fallback auf Seite 240.

Ein Notrufsignal dient dazu, auf eine kritische Situation aufmerksam zu machen. Sie können einen Notruf jederzeit auf jedem beliebigen Bildschirm absetzen, auch wenn es Aktivitäten auf dem aktuellen Kanal gibt. Wenn Sie die Taste **Notruf** drücken, wird der konfigurierte Notruf-Modus initiiert. Der konfigurierte Notruf-Modus kann auch durch Auslösen der optionalen Funktion „Totmann“ initiiert werden. Die Notruffunktion ist unter Umständen auf Ihrem Funkgerät deaktiviert.

Ihr Händler kann festlegen, wie lange die vorprogrammierte **Notruftaste** gedrückt werden muss, allerdings ist die Dauer für das lange Drücken die gleiche wie bei allen anderen Tasten:

Kurzer Tastendruck
Zwischen 0,05 Sekunden und 0,75 Sekunden.

Drücken Sie lange auf
Zwischen 1,00 und 3,75 Sekunden.

Die **Notruftaste** ist mit der Notruf-Ein/Aus-Funktion belegt. Für Informationen über die zugewiesene Funktionsweise der **Notruftaste** wenden Sie sich bitte an Ihren Händler.

- Wenn die **Notruftaste** zum Einschalten des Notrufmodus durch kurzes Drücken programmiert ist, wird der Notrufmodus durch langes Drücken der **Notruftaste** beendet.
- Wenn die **Notruftaste** zum Einschalten des Notrufmodus durch langes Drücken programmiert ist, wird der Notrufmodus durch kurzes Drücken der **Notruftaste** beendet.

Wenn Ihr Funkgerät für eine Connect Plus-Zone eingestellt wird, unterstützt es drei Notfallmodi:

Notruf

Drücken Sie die **Sendetaste (PTT)**, um auf dem zugewiesenen Notruf-Zeitfenster zu sprechen.

Notruf mit anschließender Sprache

Für die erste Übertragung auf dem zugewiesenen Notruf-Zeitfenster wird die Stummschaltung des Mikrofons automatisch aufgehoben und Sie können sprechen, ohne die **Sendetaste (PTT)** zu drücken. Das Mikrofon bleibt während der für das Funkgerät konfigurierten Zeitdauer aktiv. Für nachfolgende Übertragungen im Rahmen des gleichen Notrufs müssen Sie die **Sendetaste (PTT)** drücken.

Notrufhinweis

Ein Notfallalarm ist kein Sprachanruf. Es ist eine Notrufbenachrichtigung, die an Funkgeräte weitergeleitet wird, die dafür konfiguriert sind, diese Warnsignale zu empfangen. Das Funkgerät sendet ein Notrufsignal über den Steuerungskanal des aktuell registrierten Standorts. Das Notrufsignal wird von Funkgeräten im Connect Plus-Netzwerk empfangen, die hierfür konfiguriert sind (unabhängig vom registrierten Netzwerkstandort).

Der Notruf-Taste kann pro Connect Plus-Zone nur EIN Notruf-Modus zugewiesen werden. Darüber hinaus verfügt jeder Notruf-Modus über die folgenden Typen:

Regulär

Das Funkgerät initiiert ein Notrufsignal und gibt akustische und/oder optische Anzeigen aus.

„Silent“

Das Funkgerät initiiert ein Notrufsignal und gibt keine akustischen und/oder optischen Anzeigen aus. Das Funkgerät unterdrückt alle Audiosignale oder optischen Anzeigen eines Notrufs, bis Sie die **Sendetaste (PTT)** drücken, um eine Sprachübertragung zu starten.

Still mit Sprache

Wie beim lautlosen Betrieb, mit dem Unterschied, dass das Funkgerät die Stummschaltung für Sprachübertragungen aufhebt.

6.3.17.1

Empfangen eines eingehenden Notrufs

Sie können das Funkgerät so konfigurieren, dass es einen Hinweiston ausgibt und alle Informationen zum eingehenden Notruf anzeigt. Wenn es so programmiert ist, wird nach dem Empfang des Notrufs der Bildschirm „Notrufdaten“ mit dem Notrufsymbol, dem Aliasnamen oder der ID des Funkgeräts, das den Notruf angefordert hat, dem für den Notfall verwendeten Gruppenkontakt und einer Zeile mit Zusatzinformationen angezeigt. Die

Zusatzinformation ist der Name der Zone, die den Gruppenkontakt enthält.

Zum gegenwärtigen Zeitpunkt zeigt das Funkgerät nur den zuletzt entschlüsselten Notruf an. Wenn ein neuer Notruf empfangen wird, bevor der vorherige Notruf deaktiviert ist, ersetzen die Details des neuen Notrufs die Details des vorherigen Notrufs.

Je nachdem, wie Ihr Funkgerät programmiert wurde, wird der Bildschirm „Notrufdaten“ (oder „Alarmliste“) weiterhin auf dem Funkgerätdisplay angezeigt, auch wenn der Notruf endet. Sie können die Notrufdaten in der Alarmliste speichern oder die Notrufdetails löschen, wie in den folgenden Abschnitten beschrieben ist.

6.3.17.2
Speichern der Notrufdaten in der Alarmliste

Durch das Speichern der Notrufdaten in die Alarmliste können Sie die Daten nochmals zu einem späteren Zeitpunkt anzeigen lassen, indem Sie im Hauptmenü „Alarmliste“ auswählen.

1. Während der Bildschirm „Notrufdaten“ (oder „Alarmliste“) angezeigt wird, drücken Sie .

   Der Bildschirm **Alarmliste verl** wird angezeigt.

2. Wählen Sie eine der folgenden Optionen aus:

   - Wählen Sie **Ja**, und drücken Sie OK zum Speichern der Notrufdaten in der Alarmliste und zum Beenden des Bildschirms mit den Notrufdaten (oder Alarmliste).
   - Wählen Sie **Nein**, und drücken Sie OK, um zum Bildschirm „Notrufdaten“ (oder „Alarmliste“) zurückzukehren.

6.3.17.3

Löschen der Notrufdaten

1 Während der Bildschirm „Notrufdaten“ angezeigt wird, drücken Sie .

Der Bildschirm **Löschen** wird angezeigt.

2 Wählen Sie eine der folgenden Optionen aus:

- Wählen Sie **Ja**, und drücken Sie zum Löschen der Notrufdaten.
- Wählen Sie **Nein**, und drücken Sie , um zum Bildschirm „Notrufdaten“ zurückzukehren.

6.3.17.4

Beantworten eines Notrufs

HINWEIS:
Wenn Sie nicht innerhalb der zugewiesenen Haltezeit für Notrufe auf den Notruf reagieren, wird der Notruf beendet. Wenn Sie sprechen möchten, nachdem die Haltezeit für Notrufe abgelaufen ist, müssen Sie zunächst die der Gruppe zugewiesene Kanalposition wählen (falls noch nicht ausgewählt). Drücken Sie dann die **Sendetaste (PTT)** zum Starten eines normalen Anrufs bei der Gruppe.

1 Drücken Sie beim Empfangen eines Notrufs eine beliebige Taste, um alle „Notsignal empfangen“-Anzeigen zu beenden.

2 Drücken Sie die **Sendetaste (PTT)**, um eine Sprachübertragung zur Notrufgruppe zu initiieren.

Alle Funkgeräte, die diese Gruppe überwachen, hören Ihre Sprachübertragung.

3 Warten Sie, bis der Freiton verklungen ist (falls aktiviert), und sprechen Sie deutlich in das Mikrofon.

Die LED leuchtet grün.

4 Lassen Sie die **PTT**-Taste los, um den Gesprächspartner zu hören.

Wenn das Funkgerät, das den Notruf gesendet hat, antwortet, blinkt die LED-Anzeige grün. Im Display wird das Gruppenrufsymbol, die Gruppen-ID und die ID des sendenden Funkgeräts angezeigt.

6.3.17.5

Beantworten eines Notrufsignals

HINWEIS:
Der Gruppenkontakt für die Notrufsignale sollte nicht für Sprachkommunikationen verwendet werden. Dies könnte verhindern, dass andere Funkgeräte Notfrufsignale auf der gleichen Gruppe senden und empfangen.

Ein Notrufsignal von einem Funkgerät weist darauf hin, dass sich der Benutzer in einer Notsituation befindet. Sie können auf das Notrufsignal antworten, indem Sie einen Einzelruf an das Funkgerät initiieren, das den Notruf gesendet hat, oder Sie initiieren einen Gruppenruf an die entsprechende Gesprächsgruppe, senden einen Rufhinweis, initiieren Remote-Monitor für dieses Funkgerät usw. Die passende Reaktion richtet sich nach den Anforderungen Ihres Unternehmens und nach der vorliegenden Situation.

6.3.17.6

Ignorieren von Notrufen

Diese Funktionserweiterung bietet eine Option für das Funkgerät zum Ignorieren eines aktiven Notrufs.

Zum Ignorieren eines Notrufs muss das Funkgerät in der CPCPS-Software (Connect Plus Customer Programming Software) konfiguriert werden.

Wenn die Funktion aktiviert ist, kann das Funkgerät keinen Notruf anzeigen und keinen Ton zur standardmäßigen Notruf-Gruppen-ID empfangen.

Weitere Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator.

6.3.17.7

Initiieren eines Notrufs

HINWEIS:
Ist Ihr Funkgerät auf den lautlosen Betrieb eingestellt, gibt es im Notrufmodus keine akustischen oder optischen Signale aus, bis Sie die **Sendetaste (PTT)** zum Initiieren einer Sprachübertragung drücken.
Ist Ihr Funkgerät auf den lautlosen Betrieb mit Sprache eingestellt, gibt es zunächst keine akustischen oder optischen Signale aus, die auf den Notruf-Modus hinweisen. Das Funkgerät hebt die Stummschaltung jedoch für die Übertragung von Funkgeräten auf, die auf Ihren Notruf reagieren. Die Notrufsignale werden nur einmal angezeigt, wenn Sie die **Sendetaste (PTT)** zum Initiieren einer Sprachübertragung von Ihrem Funkgerät aus drücken.

Sowohl bei „Lautlos“ als auch bei „Lautlos mit Sprache“ beendet das Funkgerät den lautlosen Betrieb automatisch, nachdem der Notruf abgeschlossen wurde.

1 Drücken Sie die vorprogrammierte **Notruftaste**.

2 Drücken Sie die **Sendetaste (PTT)**, um eine Sprachübertragung zur Notrufgruppe zu initiieren.

Wenn Sie die **Sendetaste (PTT)** loslassen, wird der Notruf fortgesetzt, bis die zugewiesene Standzeit für Notrufe abgelaufen ist.

Wenn Sie die **Sendetaste (PTT)** während dieser Zeit drücken, wird der Notruf fortgesetzt.

6.3.17.8

Initiieren eines Notrufs mit anschließender Sprachkommunikation

Ihr Funkgerät muss für diese Betriebsart konfiguriert werden.

Bei dieser Betriebsart wird das Mikrofon ohne Drücken der **Sendetaste (PTT)** automatisch aktiviert, wenn Sie die konfigurierte **Notruftaste** drücken und Ihrem Funkgerät ein Zeitfenster zugewiesen wird. Dieser Modus mit aktiviertem Mikrofon wird auch „Notrufmikrofon“ genannt. Das „Notrufmikrofon“ wird für die erste Sprachübertragung von Ihrem Funkgerät aus während des Notrufs verwendet. Für

nachfolgende Übertragungen im Rahmen des gleichen Notrufs müssen Sie die **Sendetaste (PTT)** drücken.

1. Drücken Sie die vorprogrammierte **Notruftaste**.
2. Das Mikrofon bleibt während der im Codeplug des Funkgeräts konfigurierten „Hot Mic“-Zeitdauer aktiv.

   Während dieser Zeit leuchtet die grüne LED.
3. Halten Sie die **Sendetaste (PTT)** gedrückt, um über die konfigurierte Dauer hinaus sprechen zu können.

6.3.17.9

Initiieren eines Notrufsignals

HINWEIS:
Ist Ihr Funkgerät für den „lautlosen Betrieb“ oder den „lautlosen Betrieb mit Sprache“ konfiguriert, gibt es keine akustischen oder optischen Signale aus, die darauf hinweisen, dass ein Notrufsignal gesendet wird. Bei der Konfiguration für den lautlosen Betrieb wird dieser Betrieb fortgesetzt, bis Sie die Sendetaste (PTT) oder die Taste für „Notruf aus“ drücken. Bei der Konfiguration für den „lautlosen Betrieb mit Sprache“ unterbricht das Funkgerät den lautlosen Betrieb automatisch, sobald der Standort-Controller ein Notrufsignal sendet.

Drücken Sie auf die orangefarbene **Notruf**-Taste.

Nach der Übertragung des Notrufsignals zum Standort-Controller wird im Display des Funkgeräts das Notruf-Symbol, der für das Notrufsignal verwendete Gruppenkontakt und `Tx Alarm` angezeigt.

Sobald das Notrufsignal erfolgreich gesendet wurde und an andere Funkgeräte übertragen wird, hören Sie einen entsprechenden positiven Hinweiston, und im Display des

Funkgeräts wird `Alarm gesend` angezeigt. Wenn das Notrufsignal nicht erfolgreich war, ist ein negativer Hinweiston zu hören, und das Funkgerät zeigt die Meldung `Alarm fehlg` an.

6.3.17.10
Verlassen des Notruf-Modus

HINWEIS:
Wenn der Notruf durch Ablauf der zugewiesenen Notruf-Haltezeit beendet wird, die Notfallsituation aber noch nicht behoben ist, drücken Sie die **Notruf**-Taste erneut, um den Vorgang neu zu starten.

Wenn Sie einen Notruf absetzen durch Drücken der programmierten **Notruf**-Taste, verlässt Ihr Funkgerät automatisch den Notruf-Modus, nachdem eine Antwort vom Connect Plus-System eingegangen ist.

Wenn Sie einen Notruf einleiten, indem Sie die **Notruf**-Taste drücken, wird Ihrem Funkgerät automatisch ein Kanal zugewiesen, sobald einer verfügbar wird. Wenn Ihr Funkgerät eine Nachricht übertragen hat, die auf einen Notfall hinweist, können Sie den Notruf nicht abbrechen. Wenn Sie die Taste jedoch versehentlich gedrückt haben oder wenn kein Notfall mehr besteht, können Sie dies über den zugewiesenen Kanal mitteilen. Wenn Sie die **Sendetaste** (PTT) loslassen, wird der Notruf nach Ablauf der zugewiesenen Haltezeit für Notrufe beendet.

Wenn Ihr Funkgerät für Notruf mit nachfolgendem Sprachruf konfiguriert wurde, verwenden Sie das „Notrufmikrofon", um Ihren Fehler zu erläutern, und drücken Sie dann die **Sendetaste** (PTT), und lassen Sie sie wieder los, um die Übertragung zu beenden. Der Notruf wird nach Ablauf der zugewiesenen Haltezeit für Notrufe beendet.

6.3.18
Totmann-Alarme

HINWEIS:
Diese Funktion ist nur für DP4600e/DP4601e verfügbar.

Totmann-Alarme werden im Fallback-Modus nicht unterstützt. Weitere Informationen finden Sie unter Automatisches Fallback auf Seite 240.

In diesem Abschnitt wird die Connect Plus-Funktion „Totmann" beschrieben. Da diese Funktion zusätzlich käuflich erworben werden kann, trifft dieser Abschnitt möglicherweise auf Ihr Funkgerät zu oder nicht.

Ihr tragbares Connect Plus-Funkgerät kann für eine oder mehrere „Totmann"-Funktionen aktiviert und konfiguriert

werden. Fragen Sie Ihren Händler oder Systemadministrator, ob dies auf Ihr Funkgerät zutrifft und welche spezifischen „Totmann“-Funktionen aktiviert und konfiguriert wurden.

Wenn Ihr Funkgerät für einen oder mehrere der folgenden Totmann-Alarme konfiguriert wurde, sollten Sie wissen, auf welche Weise diese Alarme funktionieren, welche Hinweistöne Ihr Funkgerät ausgibt, und welche Maßnahmen Sie anschließend ergreifen sollten.

Der Zweck der Totmann-Alarme besteht darin, andere darauf hinzuweisen, dass Sie sich möglicherweise in Gefahr befinden. Dies wird erreicht, indem Ihr Funkgerät einen bestimmten Neigungswinkel, fehlende Bewegung oder eine bestimmte Bewegung erkennt, je nachdem, welcher bzw. welche Totmann-Alarme gerade aktiviert sind. Wenn Ihr Funkgerät eine unzulässige Bewegungsart erkennt und das Problem nicht innerhalb eines bestimmten Zeitraums behoben wird, gibt das Funkgerät einen bestimmten Hinweiston aus (wenn es so konfiguriert wurde). Zu diesem Zeitpunkt sollten Sie umgehend eine oder mehrere der nachfolgend erläuterten Abhilfemaßnahmen ergreifen, je nachdem, welche Totmann-Alarme für Ihr Funkgerät konfiguriert wurden. Wenn Sie innerhalb einer bestimmten Zeit keine Abhilfemaßnahmen ergreifen, startet Ihr Funkgerät automatisch einen Notruf oder ein Notrufsignal.

- **Neigungsalarm** – Wenn sich das Funkgerät über einen bestimmten Zeitraum hinweg über einen vorgegebenen Winkel hinaus neigt, gibt es einen Notsignalton aus (wenn es so konfiguriert wurde). Um zu verhindern, dass das Funkgerät automatisch einen Notruf oder Notrufsignal startet, stellen Sie die vertikale Position des Funkgeräts sofort wieder her.
- **Stillstandalarm** – Wenn das Funkgerät über einen bestimmten Zeitraum hinweg bewegungslos bleibt, gibt es einen Notsignalton aus (wenn es so konfiguriert wurde). Um zu verhindern, dass das Funkgerät automatisch einen Notruf oder Notfallalarm startet, versetzen Sie das Funkgerät umgehend in Bewegung.
- **Bewegungsalarm** – Wenn das Funkgerät über einen bestimmten Zeitraum hinweg in Bewegung bleibt, gibt es einen Notsignalton aus (wenn es so konfiguriert wurde). Um zu verhindern, dass das Funkgerät automatisch einen Notruf oder Notrufsignal startet, stoppen Sie die Bewegung des Funkgeräts umgehend.

Fragen Sie Ihren Händler oder Systemadministrator, welche der oben genannten Alarme (falls vorhanden) bei der Konfiguration des Funkgeräts aktiviert wurde. Es ist möglich, sowohl den Neigungs- als auch den Stillstandsalarm zu aktivieren. In diesem Fall gibt das

Funkgerät einen Notsignalton aus, wenn es die erste Bewegungsverletzung erkennt.

Statt der oben erwähnten Abhilfemaßnahmen können Sie auch verhindern, dass das Funkgerät einen Notruf oder Notrufsignal startet, indem Sie eine programmierbare Taste drücken, wenn das Funkgerät hierfür konfiguriert wurde. Diese Möglichkeit wird in den nächsten beiden Abschnitten erläutert.

6.3.18.1
Ein- und Ausschalten von Totmann-Alarmen

HINWEIS:
Die vorprogrammierte **Totmann**-Taste und die Totmanneinstellungen werden über CPS konfiguriert. Klären Sie mit Ihrem Händler oder Systemadministrator, wie das Funkgerät konfiguriert wurde.

Wenn Sie die Totmann-Funktion für maximale Empfindlichkeit aktivieren und den Vibrationsstil auf hoch einstellen, schränkt das Funkgerät den Vibrationsstil automatisch auf mittel ein. Diese Funktion verhindert, dass ein hoher Vibrationsstil die Totmann-Notruffunktion auslöst.

Die Vorgehensweise zum Ein- oder Ausschalten der Totmann-Alarme hängt davon ab, wie Ihr Funkgerät konfiguriert wurde. Wenn Ihr Funkgerät mit der Taste „Totmann-Alarm ein/aus“ konfiguriert wurde, verwenden Sie diese Taste, um die Funktion ein- bzw. auszuschalten. Dies gilt für alle Totmann-Alarme, die für Ihr Funkgerät aktiviert wurden.

Wenn Sie die Totmann-Alarme mit der programmierbaren Taste einschalten, gibt das Funkgerät einen ansteigenden Ton aus und zeigt eine kurze Bestätigungsmeldung an.

Um die oben beschriebenen Töne hören zu können, wenn die Totmann-Alarme ein- und ausgeschaltet werden, müssen das MOTOTRBO-Funkgerät und die Connect Plus-Optionskarte für die Ausgabe von Tastentönen aktiviert werden.

Wenn Ihr Funkgerät so konfiguriert wurde, dass die Totmann-Alarme über das Menü aktiviert oder deaktiviert werden können, gehen Sie wie nachfolgend beschrieben vor.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis Dienstprogramme, und drücken Sie OK zum Auswählen.

3 Drücken Sie ▲ oder ▼ bis Connect Plus, und drücken Sie OK zum Auswählen.

4 Drücken Sie ▲ oder ▼ bis Totmannalarm, und drücken Sie OK zum Auswählen.

Wenn der Totmann-Alarm momentan deaktiviert ist, wird die Option Aktivieren angezeigt.

Wenn der Totmann-Alarm derzeit aktiviert ist, wird die Option Deaktivieren angezeigt.

5 Drücken Sie ▲ oder ▼ bis Aktivieren oder Deaktivieren, und drücken Sie OK zum Auswählen.

6.3.18.2

Zurücksetzen der Totmann-Alarme

Wenn Ihr Funkgerät entweder mit der Taste „Totmann-Alarme zurücksetzen“ oder mit der Menüoption „Totmann-Alarme“ konfiguriert wurde, können Sie die Totmann-Alarme zurücksetzen, ohne sie ein- oder auszuschalten. Dadurch wird der derzeit wiedergegebene Totmann-Alarm-Signalton beendet, und die Alarm-Timer werden zurückgesetzt. Allerdings ist es dennoch erforderlich, entsprechende Maßnahmen zur Fehlerbehebung zu ergreifen, wie im Abschnitt zu den Totmann-Alarmen beschrieben. Wenn die Bewegungsverletzung nicht innerhalb eines bestimmten Zeitraums behoben wird, startet die Wiedergabe des Signaltons erneut.

Die Vorgehensweise zum Zurücksetzen der Totmann-Alarme hängt davon ab, wie Ihr Funkgerät programmiert wurde. Wenn Ihr Funkgerät mit der Taste „Totmann-Alarme zurücksetzen“ programmiert wurde, verwenden Sie diese Taste, um die Totmann-Alarme zurückzusetzen. Dies gilt für alle Totmann-Alarme, die für Ihr Funkgerät aktiviert wurden.

Wenn Sie die Totmann-Alarme mit der programmierbaren Taste zurücksetzen, zeigt das Funkgerät eine kurze Bestätigungsmeldung an.

Wenn Ihr Funkgerät so programmiert wurde, dass die Totmann-Alarme über das Menü zurückgesetzt werden können, gehen Sie wie nachfolgend beschrieben vor.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Dienstprogramme`, und drücken Sie OK zum Auswählen.

3 Drücken Sie ▲ oder ▼ bis `Connect Plus`, und drücken Sie OK zum Auswählen.

4 Drücken Sie ▲ oder ▼ bis `Totmannalarm`, und drücken Sie OK zum Auswählen.

5 Drücken Sie ▲ oder ▼ bis `Zurücksetzen`, und drücken Sie OK zum Auswählen.

Das Funkgerät zeigt eine kurze Bestätigungsmeldung an.

6.3.19

Bakensignal-Funktion

In diesem Abschnitt wird die Funktion „Bakensignal“ beschrieben. Das Bakensignal ist Teil der Connect Plus-Totmann-Funktion, die optional käuflich erworben werden kann. Fragen Sie Ihren Händler oder Systemadministrator, ob diese Funktion für Ihr Funkgerät eingestellt wurde.

Wenn Ihr Funkgerät für eine oder mehrere Totmann-Funktionen aktiviert wurde, kann es auch für das Bakensignal aktiviert werden.

Ihr Funkgerät startet bei einem Totmann-Alarm automatisch einen Notruf oder Notsignal. Wenn auch das Bakensignal aktiviert wurde, gibt das Funkgerät in regelmäßigen Abständen, ca. einmal alle 10 Sekunden, einen hohen Ton aus. Das Intervall kann variieren, je nachdem, ob Sie das Funkgerät gerade zum Sprechen verwenden oder nicht. Der Zweck des Bakensignals besteht darin, dass Sie bei einer Personensuche besser gefunden werden können. Wenn auf Ihrem Funkgerät außerdem die Funktion „Visuelles Bakensignal“ aktiviert ist, wird die Hintergrundbeleuchtung Ihres Funkgeräts jedes Mal einige Sekunden lang aktiviert, wenn das Bakensignal ausgegeben wird.

Sie können die Ausgabe des Bakensignals über eine programmierbare Taste beenden, wenn Ihr Funkgerät entsprechend konfiguriert wurde. Diese Möglichkeit wird in den nächsten beiden Abschnitten erläutert. Wenn Ihr Funkgerät nicht über diese programmierbare Taste oder Menüoption verfügt, können Sie die Ausgabe des Bakensignals beenden, indem Sie Ihr Funkgerät aus- und wieder einschalten oder in eine andere Zone wechseln (sofern Ihr Funkgerät für mehr als eine Zone konfiguriert wurde).

6.3.19.1

Ein- und Ausschalten des Bakensignals

Die Vorgehensweise zum Ein- oder Ausschalten des Bakensignals hängt davon ab, wie Ihr Funkgerät konfiguriert wurde. Wenn Ihr Funkgerät mit der Taste „Bake ein/aus“ konfiguriert wurde, verwenden Sie diese Taste, um die Funktion ein- bzw. auszuschalten.

- Wenn Sie die Signal-Funktion mit der programmierbaren Taste einschalten, gibt das Funkgerät einen ansteigenden Ton aus und zeigt eine kurze Bestätigungsmeldung an.
- Wenn Sie die Signal-Funktion mit der programmierbaren Taste ausschalten, gibt das Funkgerät einen absteigenden Ton aus und zeigt eine kurze Bestätigungsmeldung an.

Um die oben beschriebenen Töne hören zu können, wenn die Bakensignalfunktion ein- und ausgeschaltet wird, müssen das MOTOTRBO-Funkgerät und die Connect Plus-Optionskarte für die Ausgabe von Tastentönen aktiviert werden. Wenn Ihr Funkgerät so konfiguriert wurde, dass die Bakensignalfunktion über das Menü aktiviert oder deaktiviert werden kann, gehen Sie wie nachfolgend beschrieben vor.

1. Drücken Sie OK, um das Menü aufzurufen.
2. Drücken Sie ▲ oder ▼ bis `Dienstprogramme`, und drücken Sie OK zum Auswählen.
3. Drücken Sie ▲ oder ▼ bis `Connect Plus`, und drücken Sie OK zum Auswählen.

4 Drücken Sie ▲ oder ▼ bis Bakensignal, und drücken Sie OK zum Auswählen.

Wenn Bake momentan deaktiviert ist, wird die Option Aktivieren angezeigt.

Wenn Bake derzeit aktiviert ist, wird die Option Deaktivieren angezeigt.

5 Drücken Sie ▲ oder ▼ bis Aktivieren oder Deaktivieren, und drücken Sie OK zum Auswählen.

Das Funkgerät zeigt eine kurze Bestätigungsmeldung, dass das Totmann-Bakensignal aktiviert (oder deaktiviert) wurde.

6.3.19.2

Zurücksetzen der Bakensignal-Funktion

Wenn Ihr Funkgerät mit der Taste „Bakensignal zurücksetzen“ oder mit der Menüoption „Bakensignal“ programmiert wurde, können Sie diese Funktion zurücksetzen. Hiermit wird der Bakensignalton beendet (und damit auch das visuelle Signal), ohne die Funktion zu deaktivieren. Die Vorgehensweise zum Zurücksetzen der Bakensignal-Funktion hängt davon ab, wie Ihr Funkgerät programmiert wurde. Wenn Ihr Funkgerät mit der Taste „Bakensignal zurücksetzen“ programmiert wurde, verwenden Sie diese Taste, um die Funktion zurückzusetzen. Wenn Sie die Totmann-Alarme mit der programmierbaren Taste zurücksetzen, zeigt das Funkgerät eine kurze Bestätigungsmeldung an. Wenn Ihr Funkgerät so programmiert wurde, dass die Bakensignal-Funktion über das Menü zurückgesetzt werden kann, gehen Sie wie nachfolgend beschrieben vor.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis Dienstprogramme, und drücken Sie OK zum Auswählen.

3 Drücken Sie ▲ oder ▼ bis Connect Plus, und drücken Sie OK zum Auswählen.

4 Drücken Sie ▲ oder ▼ bis `Bakensignal`, und drücken Sie OK zum Auswählen.

5 Drücken Sie ▲ oder ▼ bis `Zurücksetzen`, und drücken Sie OK zum Auswählen.

Das Funkgerät zeigt eine kurze Bestätigungsmeldung an.

6.3.20

Textnachrichten (SMS)

Ihr Funkgerät kann von einem anderen Funkgerät oder einer Textnachricht-Anwendung Daten empfangen, beispielsweise Textnachrichten.

Es gibt zwei Arten von Textnachrichten, DMR-Kurztextnachrichten (Digital Mobile Radio) und Textnachrichten. Die maximale Länge einer DMR-Kurztextnachricht beträgt 23 Zeichen. Die maximale Länge einer Textnachricht beträgt 280 Zeichen, einschließlich der Betreffzeile. Die Betreffzeile wird nur angezeigt, wenn Sie Nachrichten von E-Mail-Anwendungen empfangen.

HINWEIS:
Die maximale Länge gilt nur für Modelle mit der neuesten Software und Hardware. Bei Funkgerätemodellen mit älterer Software und Hardware beträgt die maximale Länge für eine Textnachricht 140 Zeichen. Weitere Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator.

In arabischer Sprache wird der Text von rechts nach links eingegeben.

6.3.20.1

Senden einer Quick Text-Nachricht

Ihr Funkgerät unterstützt je nach der Programmierung durch Ihren Händler maximal 10 Quick Text-Nachrichten.

Quick Text-Nachrichten sind zwar vorgegeben, Sie können jedoch jede Nachricht bearbeiten, bevor Sie sie senden.

Wenn Sie die Nachricht senden, führen Sie die folgenden Schritte aus, um einen Empfänger auszuwählen:

- Drücken Sie ▲ oder ▼ bis zum gewünschten Aliasnamen, und drücken Sie OK zum Auswählen.
- Drücken Sie ▲ oder ▼ bis `Manuell wählen`, und drücken Sie OK zum Auswählen. In der ersten Zeile des Displays wird `Nummer:` angezeigt. In der zweiten Zeile des Displays wird ein blinkender Cursor angezeigt. Geben Sie den Aliasnamen oder die ID des Funkgeräts ein, und drücken Sie OK .

Auf dem Display wird `Nachricht wird gesendet` angezeigt. Dies ist die Bestätigung, dass die Nachricht gesendet wird.

Nachdem die Nachricht erfolgreich gesendet wurde, wird ein Hinweiston ausgegeben, und im Display wird `Nachricht gesendet` angezeigt.

Kann die Nachricht nicht gesendet werden, wird ein tiefer Hinweiston ausgegeben, und im Display wird `Nachr. senden fehlgeschlagen` angezeigt.

Kann die Textnachricht nicht gesendet werden, kehrt das Funkgerät zum `Wiederholen`-Bildschirm zurück (siehe Verwaltung fehlgeschlagener Textnachrichtenübertragungen auf Seite 285).

6.3.20.2

Senden einer Quick Text-Nachricht mit der Schnellwahltaste

Sie können Quick Text-Nachrichten über die von Ihrem Händler programmierte programmierbare Taste versenden.

Drücken Sie die vorprogrammierte **Schnellwahltaste**, um eine vordefinierte Quick Text-Nachricht an ein vorgegebenes Alias zu senden.

Auf dem Display wird `Nachricht wird gesendet` angezeigt. Dies ist die Bestätigung, dass die Nachricht gesendet wird.

Nachdem die Nachricht gesendet wurde, wird ein Ton ausgegeben, und im Display erscheint `Nachricht gesendet` .

Kann die Nachricht nicht gesendet werden, wird ein tiefer Signalton ausgegeben, und im Display erscheint `Nachricht konnte nicht gesendet werden` .

Kann die Textnachricht nicht gesendet werden, kehrt das Funkgerät zum Wiederholen-Bildschirm zurück (siehe Verwaltung fehlgeschlagener Textnachrichtenübertragungen auf Seite 285).

6.3.20.3

Verwaltung fehlgeschlagener Textnachrichtenübertragungen

Auf dem Bildschirm Wiederholen können Sie eine der folgenden Optionen auswählen:

- Wiederholen
- Forward

6.3.20.3.1

Erneutes Senden einer Textnachricht

Drücken Sie OK, um dieselbe Nachricht erneut an denselben Aliasnamen oder dieselbe ID des Funkgeräts bzw. der Gruppe zu senden.

Wenn die Nachricht erfolgreich gesendet wurde, ertönt ein Signalton und im Display wird der positive Kurzhinweis angezeigt.

Wenn die Nachricht nicht gesendet werden kann, wird im Display der negative Kurzhinweis angezeigt.

6.3.20.3.2

Weiterleiten einer Textnachricht

Wählen Sie Weiterleiten, um die Nachricht an den Aliasnamen oder die ID eines anderen Funkgeräts bzw. einer anderen Gruppe zu senden.

1. Drücken Sie ▲ oder ▼ bis Weiterleiten, und drücken Sie OK zum Auswählen.
2. Um den Empfänger der Nachricht auszuwählen, drücken Sie ▲ oder ▼ bis zum gewünschten Aliasnamen oder der gewünschten ID, und drücken Sie OK zum Auswählen.

Auf dem Display wird Nachricht wird gesendet angezeigt. Dies ist die Bestätigung, dass die Nachricht gesendet wird.

Nachdem die Nachricht erfolgreich gesendet wurde, wird ein Hinweiston ausgegeben, und im Display wird `Nachricht gesendet` angezeigt.

Kann die Nachricht nicht gesendet werden, wird ein tiefer Hinweiston ausgegeben, und im Display wird `Nachr. senden fehlgeschlagen` angezeigt.

6.3.20.4

Verwalten von gesendeten Textnachrichten

Nachdem eine Nachricht an ein anderes Funkgerät gesendet wurde, wird sie unter „Ausgang“ gespeichert. Die zuletzt gesendete Textnachricht wird jeweils an die erste Stelle der Ausgangsliste gestellt.

Der Ordner „Ausgang“ kann bis zu 30 gesendete Nachrichten aufnehmen. Sobald der Ordner voll ist, wird die älteste Textnachricht im Ordner automatisch durch die als nächstes gesendete Textnachricht ersetzt.

HINWEIS:

Durch Gedrückthalten von kehren Sie zum Startbildschirm zurück.

6.3.20.4.1

Anzeigen einer gesendeten Textnachricht

1 Öffnen Sie die Funktion **Textnachricht**.

Bedienelemente	Schritte
Programmierte Taste „Textnachricht“	Drücken Sie die programmierte Taste **Textnachricht**.
Menu	**a** Drücken Sie OK, um das Menü aufzurufen. **b** Drücken Sie ▲ oder ▼ bis `Nachrichten`, und drücken Sie OK zum Auswählen.

2 Drücken Sie ▲ oder ▼ bis `Ausgang`, und drücken Sie OK zum Auswählen.

3 Drücken Sie ▲ oder ▼ bis zur gewünschten Nachricht, und drücken Sie OK zum Auswählen.

Das Symbol in der oberen rechten Ecke des Bildschirms zeigt den Status der Nachricht an (siehe Ausgang-Symbole (Gesendete Nachrichten) auf Seite 223).

6.3.20.4.2

Senden einer gesendeten Textnachricht

Bei Anzeigen einer gesendeten Textnachricht können Sie eine der folgenden Optionen wählen:

- Wiederholen
- Forward
- Delete

1 Drücken Sie beim Betrachten der Nachricht OK erneut.

2 ▲ oder ▼ zu einer der folgenden Optionen und drücken Sie OK zum Auswählen.

Option	Schritte
Forward	Wählen Sie Weiterleiten, wenn Sie die ausgewählte Textnachricht an einen anderen Teilnehmer/ Gruppenalias oder eine andere ID senden möchten (siehe Weiterleiten einer Textnachricht auf Seite 285).
Delete	Wählen Sie zum Löschen der Textnachricht Löschen.
Wiederholen	Wählen Sie Wiederholen, um die ausgewählte Textnachricht erneut an den Aliasnamen oder die ID desselben Funkgeräts bzw. derselben Gruppe zu senden. Auf dem Display wird Nachricht wird gesendet angezeigt. Dies ist die Bestätigung, dass dieselbe Nachricht erneut an dasselbe Zielfunkgerät gesendet wird. Nachdem die Nachricht erfolgreich gesendet wurde, wird ein Hinweiston ausgegeben, und im Display wird Nachricht gesendet angezeigt.

Option	Schritte
	Kann die Nachricht nicht gesendet werden, wird ein tiefer Hinweiston ausgegeben, und im Display wird `Nachr. senden fehlgeschlagen` angezeigt. Kann die Nachricht nicht gesendet werden, kehrt das Funkgerät zum Bildschirm `Wiederholen` zurück. Drücken Sie OK, um die Nachricht erneut an denselben Funkgerät/Gruppen-Aliasnamen oder dieselbe ID zu senden.

Wenn Sie den Bildschirm zum Senden einer Nachricht verlassen, während die Nachricht gesendet wird, aktualisiert das Funkgerät den Status dieser Nachricht im Ausgangsordner ohne Hinweiston oder visuelle Anzeige.

Wechselt das Funkgerät in einen anderen Modus oder wird es ausgeschaltet, bevor der Status der Nachricht im Ausgang aktualisiert wird, kann das Funkgerät die Übertragung anhängiger Nachrichten nicht abschließen und kennzeichnet diese automatisch mit dem Symbol **Senden fehlgeschlagen**.

Das Funkgerät unterstützt bis zu maximal fünf anhängige Nachrichten. Sind bereits fünf Nachrichten anhängig, d. h. noch zu senden, kann das Funkgerät keine weitere Nachricht senden und kennzeichnet diese automatisch mit dem Symbol für **Fehler beim Senden**.

6.3.20.4.3
Löschen aller gesendeten Textnachrichten aus dem Ausgang

1 Öffnen Sie die Funktion **Textnachricht**.

Bedienelemente	Schritte
Programmierte Taste „Textnachricht“	Drücken Sie die programmierte Taste **Textnachricht**.
Menu	**a** Drücken Sie OK, um das Menü aufzurufen.

Bedienelemente	Schritte
	b Drücken Sie ▲ oder ▼ bis `Nachrichten`, und drücken Sie OK zum Auswählen.

2 Drücken Sie ▲ oder ▼ bis `Ausgang`, und drücken Sie OK zum Auswählen.

Wenn Sie `Gesendete Elemente` wählen und diese keine Einträge aufweisen, zeigt das Display `Liste leer`.

3 Drücken Sie ▲ oder ▼ bis `Alle löschen`, und drücken Sie OK zum Auswählen.

4 Wählen Sie eine der folgenden Optionen aus.

- Drücken Sie ▲ oder ▼ bis `Ja`, und drücken Sie OK zum Auswählen. Im Display wird ein positiver Kurzhinweis angezeigt.
- Drücken Sie ▲ oder ▼ bis `Nein`, und drücken Sie OK, um zum vorherigen Bildschirm zurückzukehren.

6.3.20.5
Empfangen einer Textnachricht

Wenn Ihr Funkgerät eine Nachricht empfängt, werden im Display die Benachrichtigungsliste mit dem Aliasnamen oder der ID des Senders und das Nachrichtensymbol angezeigt.

Beim Empfang einer Textnachricht können Sie eine der folgenden Optionen wählen:

- Lesen
- Später lesen
- Delete

6.3.20.6

Lesen einer Textnachricht

1 Drücken Sie ▲ oder ▼ bis Lesen?, und drücken Sie OK zum Auswählen.

Die im Posteingang ausgewählte Nachricht wird geöffnet.

2 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie OK, um zum Posteingang zurückzukehren.
- Drücken Sie erneut OK, um die Textnachricht zu beantworten, weiterzuleiten oder zu löschen.

6.3.20.7

Verwalten von empfangenen Textnachrichten

In der Inbox können Sie Ihre Textnachrichten verwalten. Hier können bis zu 30 Nachrichten gespeichert werden.

Die Textnachrichten in der Inbox werden nach Eingang geordnet, d. h. die zuletzt eingegangene Nachricht steht an erster Stelle.

Das Funkgerät unterstützt die folgenden Optionen für Textnachrichten:

- Forward
- Delete
- Alle löschen

HINWEIS:
Wenn die Kanaltypen nicht übereinstimmen, können empfangene Nachrichten nur weitergeleitet oder gelöscht oder alle empfangenen Nachrichten gelöscht werden.

Durch Gedrückthalten von ↩ kehren Sie zum Startbildschirm zurück.

6.3.20.7.1

Anzeigen einer Textnachricht aus der Inbox

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis Nachrichten, und drücken Sie OK zum Auswählen.

3 Drücken Sie ▲ oder ▼ bis Inbox, und drücken Sie OK zum Auswählen.

4 Drücken Sie ▲ oder ▼ , um die Nachrichten anzuzeigen.

5 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie OK , um die aktuelle Nachricht auszuwählen, und erneut OK , um diese Nachricht zu beantworten, weiterzuleiten oder zu löschen.
- Drücken Sie ⌂ lang, um zum Startbildschirm zurückzukehren.

6.3.20.7.2

Löschen einer Textnachricht aus der Inbox

1 Öffnen Sie die Funktion **Textnachricht**.

Bedienelemente	Schritte
Programmierte Taste „Textnachricht“	Drücken Sie die programmierte Taste **Textnachricht**.
Menu	**a** Drücken Sie OK , um das Menü aufzurufen. **b** Drücken Sie ▲ oder ▼ bis Nachrichten, und drücken Sie OK zum Auswählen.

2 Drücken Sie ▲ oder ▼ bis Inbox, und drücken Sie OK zum Auswählen.

3 Drücken Sie ▲ oder ▼ bis zur gewünschten Nachricht und drücken Sie OK zum Auswählen.

4 Drücken Sie erneut OK, um das Untermenü aufzurufen.

5 Drücken Sie ▲ oder ▼ bis `Löschen`, und drücken Sie OK zum Auswählen.

6 Drücken Sie ▲ oder ▼ bis `Ja` und OK, um die Option auszuwählen.

Im Display wird `Nachr gelöscht` angezeigt, und der Bildschirm zeigt wieder die Inbox an.

6.3.20.7.3

Löschen aller Textnachrichten aus dem Posteingang

1 Öffnen Sie die Funktion **Textnachricht**.

Bedienelemente	Schritte
Programmierte Taste „Textnachricht“	Drücken Sie die programmierte Taste **Textnachricht**.
Menu	**a** Drücken Sie OK, um das Menü aufzurufen. **b** Drücken Sie ▲ oder ▼ bis `Nachrichten`, und drücken Sie OK zum Auswählen.

2 Drücken Sie ▲ oder ▼ bis `Inbox`, und drücken Sie OK zum Auswählen.

Wenn Sie `Inbox` wählen und diese keine Einträge aufweist, zeigt das Display `Liste leer`.

3 Drücken Sie ▲ oder ▼ bis `Alle löschen`, und drücken Sie OK zum Auswählen.

4 Drücken Sie ▲ oder ▼ bis Ja, und drücken Sie OK, um die Option auszuwählen.

Das Display zeigt Inbox geleert an.

6.3.21

Privacy

Durch Einsatz softwaregestützter Verschlüsselung verhindert diese Funktion, wenn aktiviert, unbefugtes Zuhören auf einem Kanal. Die Signalisierungs- und Benutzeridentifikationsteile einer Übertragung werden nicht verschlüsselt.

Um verschlüsselt senden zu können, muss die Verschlüsselung für die aktuelle Kanalwahlschalterposition aktiviert sein, während dies für empfangende Funkgeräte nicht erforderlich ist. Bei einer Kanalwahlschalterposition mit aktivierter Verschlüsselung können weiterhin normale (unverschlüsselte) Übertragungen empfangen werden.

Ihr Gerät unterstützt erweiterte Verschlüsselung.

Zum Entschlüsseln eines Anrufs mit aktivierter Verschlüsselung muss Ihr Funkgerät den gleichen Schlüsselwert und dieselbe Schlüssel-ID (für erweiterte Verschlüsselung) wie das sendende Funkgerät verwenden.

Wenn ihr Funkgerät einen verschlüsselten Anruf mit anderem Schlüsselwert und anderer Schlüssel-ID empfängt, hören Sie gar nichts (erweiterte Verschlüsselung).

Wurde dem Funkgerät ein Verschlüsselungstyp zugewiesen, wird das Gesichert- bzw. Ungesichert-Symbol am Ausgangsbildschirm angezeigt, außer wenn das Funkgerät einen Notruf oder Notsignal sendet oder empfängt.

Während einer Übertragung leuchtet die Funkgerät-LED grün. Während des Empfangs eines Rufs mit aktivierter Verschlüsselung blinkt sie schnell grün.

Sie können auf diese Funktion zugreifen, indem Sie eine der folgenden Aktionen ausführen:

- Drücken Sie die programmierte Taste **Verschlüsselung**, um den Datenschutz ein- oder auszuschalten.
- Das Menü „Funkgerät“ gemäß den im Folgenden beschriebenen Schritten verwenden.

HINWEIS:
Die Verschlüsseln-Funktion wird nicht für alle Funkgerätmodelle angeboten. Weitere Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Dienstprogramme`, und drücken Sie OK zum Auswählen.

3 Drücken Sie ▲ oder ▼ bis `Funkgeräteinstellungen` oder ▲ oder ▼ bis `Connect Plus`, und drücken Sie OK zum Auswählen.

4 Drücken Sie ▲ oder ▼ bis `Verbesserter Scrambler`.

Wenn auf dem Display `Einschalten` angezeigt wird, drücken Sie OK zum Aktivieren der Verschlüsselung. Das Funkgerät zeigt eine Meldung zur Bestätigung Ihrer Auswahl an.

Wenn auf dem Display `Ausschalten` angezeigt wird, drücken Sie OK zum Deaktivieren der Verschlüsselung. Das Funkgerät zeigt eine Meldung zur Bestätigung Ihrer Auswahl an.

Wurde dem Funkgerät ein Verschlüsselungstyp zugewiesen, wird das Gesichert- bzw. Ungesichert-Symbol in der Statusleiste angezeigt, außer wenn das Funkgerät einen Notsignal sendet oder empfängt.

6.3.21.1

Durchführen eines verschlüsselten Rufs

Aktiveren oder deaktivieren Sie die Datenschutzeinstellungen mit der konfigurierten Taste für die Verschlüsselung oder über das Menü. Die Datenschutzeinstellungen für Ihr Funkgerät müssen für die aktuell ausgewählte Kanalposition aktiviert sein, um eine verschlüsselte Übertragung senden zu können. Wenn die Verschlüsselung für die aktuell ausgewählte Kanalposition aktiviert ist, werden alle Sprachübertragungen Ihres Funkgeräts verschlüsselt. Dies umfasst Gruppenrufe, Multi-

Gruppenrufe, Antworten während gescannter Anrufe, Site All Call, Notrufe und Einzelrufe. Nur empfangende Funkgeräte mit dem gleichen Schlüsselwert und der gleichen Schlüssel-ID können die Übertragung entschlüsseln.

6.3.22

Security

Sie können jedes im System befindliche Funkgerät aktivieren oder deaktivieren. So kann z. B. ein gestohlenes Funkgerät deaktiviert und damit unbrauchbar gemacht werden oder ein wiedergefundenes Funkgerät aktiviert werden.

HINWEIS:
Die Funktionen „Deaktivieren des Funkgeräts“ und „Aktivieren des Funkgeräts“ sind nur bei Funkgeräten möglich, bei denen diese Funktionalität aktiviert ist. Weitere Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator.

6.3.22.1

Funkgerät deaktivieren

1 Greifen Sie auf diese Funktion zu, indem Sie eine der folgenden Aktionen ausführen:

Bedienelemente	Schritte
Funkgerät deaktivieren-Taste	**a** Drücken Sie die vorprogrammierte **Funkgerät deaktivieren**-Taste. **b** Drücken Sie ▲ oder ▼ bis zum gewünschten Aliasnamen oder zur gewünschten ID, und drücken Sie OK zum Auswählen.
Menü „Radio“	**a** Drücken Sie OK, um das Menü aufzurufen. **b** Drücken Sie ▲ oder ▼ bis `Kontakte`, und drücken Sie OK

Bedienelemente	Schritte
	zum Auswählen. Die Einträge sind in alphabetischer Reihenfolge sortiert. **c** Verwenden Sie einen der im Folgenden beschriebenen Schritte, um den relevanten Alias oder die ID des Funkgeräts auszuwählen: • Wählen Sie den Aliasnamen oder die ID des Funkgeräts direkt. • Drücken Sie ▲ oder ▼ bis zum gewünschten Aliasnamen oder zur gewünschten ID, und drücken Sie OK zum Auswählen. **d** Drücken Sie ▲ oder ▼ bis `Funkgerät deaktivieren`, und

Bedienelemente	Schritte
	drücken Sie OK zum Auswählen.

Im Display wird `Funkgerät deakt.: <Ziel-Alias oder ID>` angezeigt, und die LED blinkt grün.

2 Warten Sie auf eine Bestätigung.

Bei erfolgreicher Deaktivierung wird ein positiver Hinweiston ausgegeben, und auf dem Display wird `FunkgDeak erfolgr.` angezeigt.

Bei nicht erfolgter Deaktivierung wird ein negativer Hinweiston ausgegeben, und auf dem Display wird `FunkgDeak fehlg.` angezeigt.

6.3.22.2
Funkgerät aktivieren

1 Greifen Sie auf diese Funktion zu, indem Sie eine der folgenden Aktionen ausführen:

Bedienelemente	Schritte
Funkgerät aktivieren-Taste	**a** Drücken Sie die konfigurierte **Funkgerät aktivieren**-Taste. **b** Drücken Sie ▲ oder ▼ bis zum gewünschten Aliasnamen oder zur gewünschten ID, und drücken Sie OK zum Auswählen.
Menü „Radio“	**a** Drücken Sie OK, um das Menü aufzurufen. **b** Drücken Sie ▲ oder ▼ bis `Kontakte`, und drücken Sie OK zum Auswählen. Die Einträge sind in alphabetischer Reihenfolge sortiert.

Bedienelemente	Schritte
	c Verwenden Sie einen der im Folgenden beschriebenen Schritte, um den relevanten Alias oder die ID des Funkgeräts auszuwählen: • Wählen Sie den Aliasnamen oder die ID des Funkgeräts direkt. • Drücken Sie ▲ oder ▼ bis zum gewünschten Aliasnamen oder zur gewünschten ID, und drücken Sie OK zum Auswählen. **d** Drücken Sie ▲ oder ▼ bis `Funkgerät-Nr.`, und

Bedienelemente	Schritte
	drücken Sie OK zum Auswählen.

Im Display wird `Funkgerät aktiviert: <Funkgeräte-Alias oder ID>` angezeigt, und die LED leuchtet durchgehend grün.

2 Warten Sie auf eine Bestätigung.

Bei erfolgreicher Deaktivierung wird ein positiver Hinweiston ausgegeben, und auf dem Display wird `FunkgAkt erfolgr.` angezeigt.

Bei nicht erfolgter Deaktivierung wird ein negativer Hinweiston ausgegeben, und auf dem Display wird `FunkgAkt fehlg.` angezeigt.

6.3.23

Passwortgeschützter Zugriff auf das Funkgerät

Wenn diese Option aktiviert ist, wird der Zugriff auf Ihr Funkgerät nach dem Einschalten nur bei Eingabe des richtigen Passworts erlaubt.

6.3.23.1

Zugriff auf das Funkgerät über das Passwort

1 Schalten Sie das Funkgerät ein.

Das Funkgerät gibt einen Dauerton ab.

2 Geben Sie Ihr aktuelles vierstelliges Passwort ein. Drücken Sie ▲ oder ▼, um den numerischen Wert jeder Stelle zu ändern. Jede Stelle ändert sich auf •. Drücken Sie ▶, um zur nächsten Stelle zu rücken. Drücken Sie OK, um die Auswahl zu bestätigen.

Bei der Passworteingabe ertönt mit jeder eingegebenen Stelle ein positiver Hinweiston.

Drücken Sie ◀, um jeden • im Display zu löschen. Das Funkgerät gibt einen negativen Hinweiston aus, wenn Sie ◀ drücken, wenn die Zeile leer ist, oder wenn Sie mehr als vier Stellen einzugeben versuchen.

Wenn das Passwort richtig ist, wird das Funkgerät eingeschaltet. Siehe Einschalten des Funkgeräts auf Seite 50.

Wenn das Passwort falsch ist, erscheint im Display `Falsches Passwort`. Wiederholen Sie Schritt 2.

Nach dem dritten erfolglosen Versuch, das richtige Passwort einzugeben, wird im Display `Falsches Passwort` und dann `Gerät gesperrt` angezeigt. Ein Ton wird ausgegeben, und die LED blinkt im Doppelblinkrhythmus gelb.

HINWEIS:
Im gesperrten Zustand kann das Funkgerät keine Anrufe, auch keine Notrufe, empfangen.

6.3.23.2

Ein- und Ausschalten der Passwortsperre

1. Drücken Sie OK, um das Menü aufzurufen.
2. Drücken Sie ▲ oder ▼ bis `Dienstprogramme`, und drücken Sie OK zum Auswählen.
3. Drücken Sie ▲ oder ▼ zu `FunkgEinstellg` und drücken Sie OK zum Auswählen.
4. Drücken Sie ▲ oder ▼ bis `Passw-Sperre`, und drücken Sie OK zum Auswählen.
5. Geben Sie das vierstellige Passwort ein.

   Siehe Schritt 2 in Zugriff auf das Funkgerät über das Passwort auf Seite 298.

6 Drücken Sie OK, um fortzufahren.

Wenn das Passwort falsch ist, erscheint im Display `Falsches Passwort`, und das Funkgerät zeigt automatisch wieder das vorhergehende Menü an.

7 Wenn das im vorherigen Schritt eingegebene Passwort richtig ist, drücken Sie OK, um die Passwortsperre zu aktivieren/deaktivieren.

Im Display wird neben „Aktiviert“ ein ✓ angezeigt.

Neben Aktiviert wird kein ✓ mehr angezeigt.

6.3.23.3

Entsperren des Funkgeräts

1 Schalten Sie das Funkgerät wieder ein, wenn es nach der Funkgerätsperre ausgeschaltet wurde.

Ein Ton wird ausgegeben, und die LED blinkt im Doppelblinkrhythmus gelb. Im Display wird `Gerät gesperrt` angezeigt.

2 Lassen Sie 15 Minuten verstreichen.

Beim Einschalten startet Ihr Funkgerät den 15-Minuten-Timer für die Sperre.

3 Wiederholen Sie Schritt 1 und Schritt 2 in Zugriff auf das Funkgerät über das Passwort auf Seite 298.

6.3.23.4

Ändern des Passworts

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Dienstprogramme`, und drücken Sie OK zum Auswählen.

3 Drücken Sie ▲ oder ▼ zu `FunkgEinstellg` und drücken Sie OK zum Auswählen.

4 Drücken Sie ▲ oder ▼ bis `Passw-Sperre`, und drücken Sie OK zum Auswählen.

5 Geben Sie das vierstellige Passwort ein.

Weitere Informationen finden Sie unter Schritt 2 in Zugriff auf das Funkgerät über das Passwort auf Seite 298.

6 Drücken Sie OK, um fortzufahren.

Wenn das Passwort falsch ist, erscheint im Display `Falsches Passwort`, und das Funkgerät zeigt automatisch wieder das vorhergehende Menü an.

7 Wenn das im vorherigen Schritt eingegebene Passwort richtig ist, ▲ oder ▼ zu `Passw. änd` und drücken Sie OK zum Auswählen.

8 Geben Sie ein neues vierstelliges Passwort ein.

Weitere Informationen finden Sie unter Schritt 2 in Zugriff auf das Funkgerät über das Passwort auf Seite 298.

9 Geben Sie das vorher eingegebene vierstellige Passwort noch einmal ein. Weitere Informationen finden Sie unter Schritt 2 in Zugriff auf das Funkgerät über das Passwort auf Seite 298.

10 Drücken Sie OK, um fortzufahren.

Wenn das bestätigte Passwort dem zuvor eingegebenen neuen Passwort entspricht, wird im Display `Passwort geändert` angezeigt.

Wenn das bestätigte Passwort **NICHT** dem zuvor eingegebenen neuen Passwort entspricht, wird im Display `PW stimmen nicht überein` angezeigt.

Der Bildschirm wechselt automatisch zum vorherigen Menü.

6.3.24
Bluetooth-Betrieb

HINWEIS:
Wenn das Gerät über das CPS deaktiviert wird, sind alle Bluetooth-bezogenen Funktionen deaktiviert, und die Bluetooth-Gerätedatenbank wird gelöscht.

Mit dieser Funktion können Sie Ihr Funkgerät über eine Bluetooth-Verbindung mit einem Bluetooth-fähigen Gerät

(Zubehör) verwenden. Ihr Funkgerät unterstützt Bluetooth-Geräte von Motorola Solutions sowie im Handel erhältliche (COTS) Bluetooth-fähige Geräte.

Bluetooth funktioniert innerhalb eines Umkreises von 10 m Sichtverbindung. Die Sichtverbindung ist ein hindernisfreier Weg zwischen Ihrem Funkgerät und Ihrem Bluetooth-fähigen Gerät.

Sie sollten allerdings nicht erwarten, dass Ihr Bluetooth-fähiges Gerät auch dann noch mit hohem Zuverlässigkeitsgrad funktionieren wird, wenn es vom Funkgerät entfernt wurde.

Im Randbereich der Reichweite nehmen die Sprach- und Tonqualität stark ab, und die Übertragung hört sich fehlerhaft oder gebrochen an. Um dieses Problem zu beseitigen, verringern Sie einfach die Entfernung zwischen Funkgerät und Bluetooth-fähigem Gerät (innerhalb der maximalen Reichweite von 10 m), um wieder einen klaren Audioempfang zu erhalten. Die Bluetooth-Funktion Ihres Funkgeräts hat bei 10 m Reichweite eine maximale Leistung von 2,5 mW (4 dBm).

Ihr Funkgerät unterstützt bis zu 4 simultane Bluetooth-Verbindungen mit Bluetooth-fähigen Geräten verschiedener Typen. Beispiel: Ein Headset und ein PTT-Only-Device (POD). Mehrere Verbindungen mit Bluetooth-fähigen Geräten derselben Art werden nicht unterstützt.

Weitere Angaben über die Funktionalität Ihres Bluetooth-fähigen Geräts können Sie der Bedienungsanleitung des jeweiligen Bluetooth-Geräts entnehmen.

6.3.24.1
Aktivieren und Deaktivieren von Bluetooth

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Bluetooth`, und drücken Sie OK zum Auswählen.

3 Drücken Sie ▲ oder ▼ bis `Mein Status`, und drücken Sie OK zum Auswählen.

Im Display wird `Ein` und `Aus` angezeigt. Der derzeitige Status wird durch ein ✓ angezeigt.

4 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie ▲ oder ▼ bis `Ein`, und drücken Sie OK zum Auswählen. Das Display zeigt `Ein` an, und links neben dem eingestellten Status wird ein ✓ eingeblendet.
- Drücken Sie ▲ oder ▼ bis `Aus`, und drücken Sie OK zum Auswählen. Das Display zeigt `Aus` an, und links neben dem eingestellten Status wird ein ✓ eingeblendet.

6.3.24.2

Suchen und Herstellen einer Verbindung zu einem Bluetooth-Gerät

Während der Gerätesuche und der Kopplung darf weder das Bluetooth-fähige Gerät ausgeschaltet noch gedrückt werden, da der laufende Vorgang dadurch abgebrochen wird.

1. Schalten Sie das Bluetooth-fähige Gerät ein, und versetzen Sie es in den Kopplungsmodus. Siehe Bedienungsanleitung des betreffenden Bluetooth-fähigen Geräts.
2. Drücken Sie auf Ihrem Funkgerät OK, um das Menü aufzurufen.
3. Drücken Sie ▲ oder ▼ bis `Bluetooth`, und drücken Sie OK zum Auswählen.
4. Drücken Sie ▲ oder ▼ bis `Geräte`, und drücken Sie OK zum Auswählen.
5. Führen Sie einen der folgenden Schritte aus:
   - Drücken Sie ▲ oder ▼ bis zum gewünschten Gerät, und drücken Sie OK zum Auswählen.
   - Drücken Sie ▲ oder ▼ bis `Geräte suchen`, um die verfügbaren Geräte zu suchen. Drücken Sie ▲ oder ▼ bis zum gewünschten Gerät, und drücken Sie OK zum Auswählen.

6 Drücken Sie ▲ oder ▼ bis `Verbinden`, und drücken Sie OK zum Auswählen.

Im Display wird `Verb.aufbau <Gerät>` angezeigt. Es sind möglicherweise zusätzliche Schritte erforderlich, um die Kopplung für Ihr Bluetooth-fähiges Gerät einzurichten. Siehe Bedienungsanleitung des betreffenden Bluetooth-fähigen Geräts.

Bei erfolgreicher Kopplung wird im Display des Funkgeräts `<Gerät> verbunden` angezeigt. Ein erklingt und neben dem angeschlossenen Gerät wird ein ✓ angezeigt. In der Statusleiste wird das Bluetooth-Symbol angezeigt.

Bei erfolgloser Kopplung wird im Display des Funkgeräts `Verb.aufbau fehlgeschl` angezeigt.

6.3.24.3

Suchen und Herstellen einer Verbindung von einem Bluetooth-Gerät (Erkennbarer Modus)

Schalten Sie Ihr Bluetooth-Gerät oder Funkgerät während des Auffindens und Verbindens nicht aus. Dies könnte den Vorgang abbrechen.

1 Schalten Sie die Bluetooth-Funktion ein.

Siehe Aktivieren und Deaktivieren von Bluetooth auf Seite 302.

2 Drücken Sie OK, um das Menü aufzurufen.

3 Drücken Sie ▲ oder ▼ bis `Bluetooth`, und drücken Sie OK zum Auswählen.

4 Drücken Sie ▲ oder ▼ bis `Gerätesuche`, und drücken Sie OK zum Auswählen.

Ihr Funkgerät kann jetzt von anderen Bluetooth-fähigen Geräten für eine programmierte Dauer

gefunden werden. Dies wird als „Erkennbarer Modus“ bezeichnet.

5 Schalten Sie Ihr Bluetooth-fähiges Gerät ein, und koppeln Sie es an Ihr Funkgerät.

Siehe Bedienungsanleitung des betreffenden Bluetooth-fähigen Geräts.

6.3.24.4

Trennen eines Bluetooth-Geräts

1 Drücken Sie auf Ihrem Funkgerät OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Bluetooth`, und drücken Sie OK zum Auswählen.

3 Drücken Sie ▲ oder ▼ bis `Geräte`, und drücken Sie OK zum Auswählen.

4 Drücken Sie ▲ oder ▼ bis zum gewünschten Gerät, und drücken Sie OK zum Auswählen.

5 Drücken Sie ▲ oder ▼ bis `Trennen`, und drücken Sie OK zum Auswählen.

Im Display wird `<Gerät> wird abgetr` angezeigt. Möglicherweise sind zusätzliche Schritte erforderlich, um die Verbindung Ihres Bluetooth-fähigen Geräts zu unterbrechen. Siehe Bedienungsanleitung des betreffenden Bluetooth-fähigen Geräts.

Im Display des Funkgeräts wird `<Gerät> abgetrennt` angezeigt. Ein positiver Hinweiston erklingt, , und neben dem angeschlossenen Gerät wird kein ✓ mehr angezeigt. Das Bluetooth-Symbol verschwindet aus der Statusleiste.

6.3.24.5

Umschalten des Audiosignals zwischen dem eingebauten

Lautsprecher des Funkgeräts und dem Bluetooth-Gerät

Sie können die Audioausgabe zwischen dem internen Lautsprecher und einem externen Bluetooth-fähigen Zubehör umschalten.

Drücken Sie die programmierte **Bluetooth-Audio-Umschalttaste**.

- Ein Ton erklingt, und im Display wird `Audio zu Funkg leit` angezeigt.
- Ein Ton erklingt, und im Display wird `Audio zu BT leiten` angezeigt.

6.3.24.6

Anzeigen von Gerätedetails

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Bluetooth`, und drücken Sie OK zum Auswählen.

3 Drücken Sie ▲ oder ▼ bis `Geräte`, und drücken Sie OK zum Auswählen.

4 Drücken Sie ▲ oder ▼ bis zum gewünschten Gerät, und drücken Sie OK zum Auswählen.

5 Drücken Sie ▲ oder ▼ bis `Details anzeigen`, und drücken Sie OK zum Auswählen.

6.3.24.7

Löschen eines Gerätenamens

Sie können ein nicht verbundenes Gerät aus der Liste der Bluetooth-fähigen Geräte entfernen.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Bluetooth`, und drücken Sie OK zum Auswählen.

3 Drücken Sie ▲ oder ▼ bis `Geräte`, und drücken Sie OK zum Auswählen.

4 Drücken Sie ▲ oder ▼ bis zum gewünschten Gerät, und drücken Sie OK zum Auswählen.

5 Drücken Sie ▲ oder ▼ bis `Löschen`, und drücken Sie OK zum Auswählen.
Im Display wird `Gerät gelöscht` angezeigt.

6.3.24.8

Bluetooth-Mikrofonverstärker

Ermöglicht die Steuerung des Mikrofonverstärkerwerts des angeschlossenen Bluetooth-fähigen Geräts.

1 Drücken Sie OK , um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Bluetooth`, und drücken Sie OK zum Auswählen.

3 Drücken Sie ▲ oder ▼ bis `BT MikVerstärk`, und drücken Sie OK zum Auswählen.

4 Drücken Sie ▲ oder ▼ bis zum Typ der BT-Mikrofonverstärkung und den aktuellen Werten.

Zum Bearbeiten der Werte drücken Sie OK zum Auswählen.

5 Drücken Sie ▲ oder ▼ , um Werte zu erhöhen/reduzieren, und drücken Sie OK zum Auswählen.

6.3.24.9

Permanent erkennbarer Bluetooth-Modus

HINWEIS:
Der permanent erkennbare Bluetooth-Modus kann nur über MOTOTRBO CPS aktiviert werden. Wenn diese Option aktiviert ist, wird das `Bluetooth`-Element **nicht** im Menü angezeigt und Sie können die programmierbaren Tasten für Bluetooth **nicht** verwenden.

Andere Bluetooth-fähige Geräte können den Standort Ihres Funkgeräts erkennen, sich aber nicht mit dem Funkgerät verbinden. Damit können bestimmte Geräte die Position Ihres Funkgeräts für die Bluetooth-basierte Ortung nutzen.

Schalten Sie Ihr Bluetooth-fähiges Gerät ein, und koppeln Sie es an Ihr Funkgerät. Weitere Informationen finden Sie im Benutzerhandbuch des Bluetooth-fähigen Geräts.

6.3.25

Innenbereich

HINWEIS:
Die Innenbereichs-Funktion ist verfügbar für Modelle mit neuester Software und Hardware. Weitere Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator.

„Innenbereich“ kann verwendet werden, um den Standort von Funkgerätbenutzern zu verfolgen. Wenn der Innenbereich aktiviert ist, ist das Funkgerät in einem begrenzt erkennbaren Modus. Dedizierte Bakensignale werden verwendet, um das Funkgerät aufzufinden und seine Position zu bestimmen.

6.3.25.1

Ein- und Ausschalten der Funktion Innenbereich

Sie können durch Ausführen einer der folgenden Aktionen die Funktion Innenbereich ein- oder ausschalten.

- Rufen Sie diese Funktion über das Menü auf.

  a. Drücken Sie OK, um das Menü aufzurufen.

b. Drücken Sie ▲ oder ▼ bis `Bluetooth` und drücken Sie OK zum Auswählen.

c. Drücken Sie ▲ oder ▼ `Innenbereich` und drücken Sie OK zum Auswählen.

d. Drücken Sie OK, um die Funktion Innenbereich zu aktivieren.

   Das Display zeigt `Innenbereich ein` an. Das Gerät gibt einen positiven Hinweiston ab. Eines der folgenden Ereignisse tritt ein.

   - Wenn erfolgreich, wird das Symbol für den verfügbaren Innenbereich auf dem Startbildschirm angezeigt.
   - Wenn nicht erfolgreich, wird im Display `Einschalten fehlgeschlagen` angezeigt. Das Gerät gibt einen negativen Hinweiston aus.

e. Drücken Sie OK zum Ausschalten der Funktion „Innenbereich“.

   Das Display zeigt `Innenbereich aus` an. Das Gerät gibt einen positiven Hinweiston ab. Eines der folgenden Ereignisse tritt ein.

   - Wenn erfolgreich, wird das Symbol für den verfügbaren Innenbereich auf dem Startbildschirm nicht mehr angezeigt.
   - Wenn nicht erfolgreich, wird im Display `Ausschalten fehlgeschlagen` angezeigt. Das Gerät gibt einen negativen Hinweiston aus.

- Rufen Sie diese Funktion über die vorprogrammierte Taste auf.

  a. Drücken Sie lang auf die vorprogrammierte Taste **Innenbereich**, um die Funktion „Innenbereich“ einzuschalten.

     Das Display zeigt `Innenbereich ein` an. Das Gerät gibt einen positiven Hinweiston ab. Eines der folgenden Ereignisse tritt ein.

- Wenn erfolgreich, wird das Symbol für den verfügbaren Innenbereich auf dem Startbildschirm angezeigt.
- Wenn nicht erfolgreich, wird im Display `Einschalten fehlgeschlagen` angezeigt. Wenn nicht erfolgreich, ertönt ein negativer Hinweiston.

b. Drücken Sie die vorprogrammierte Taste **Innenbereich**, um die Funktion „Innenbereich“ auszuschalten.

Das Display zeigt `Innenbereich aus` an. Das Gerät gibt einen positiven Hinweiston ab. Eines der folgenden Ereignisse tritt ein.

- Wenn erfolgreich, wird das Symbol für den verfügbaren Innenbereich auf dem Startbildschirm nicht mehr angezeigt.
- Wenn nicht erfolgreich, wird im Display `Ausschalten fehlgeschlagen` angezeigt. Wenn nicht erfolgreich, ertönt ein negativer Hinweiston.

6.3.25.2

Zugriff auf Informationen eines Standort-Bakensignals in Innenbereichen

Gehen Sie wie folgt vor, um auf Informationen zu Innenbereich-Bakensignalen zuzugreifen.

1. Drücken Sie OK, um das Menü aufzurufen.
2. Drücken Sie ▲ oder ▼ bis `Bluetooth` und drücken Sie OK zum Auswählen.
3. Drücken Sie ▲ oder ▼ `Innenbereich` und drücken Sie OK zum Auswählen.
4. Drücken Sie ▲ oder ▼ bis `Sender` und drücken Sie OK zum Auswählen.

Im Display werden Bakensignal-Informationen angezeigt.

6.3.26

Benachrichtigungsliste

Ihr Funkgerät hat eine Benachrichtigungsliste, in der alle „ungelesenen“ Ereignisse auf dem Kanal, wie z. B. ungelesene Textnachrichten, verpasste Rufe und Rufhinweise erfasst werden.

Das Benachrichtigungssymbol wird in der Statusleiste angezeigt, wenn die Benachrichtigungsliste ein oder mehrere Ereignisse enthält.

Die Liste unterstützt maximal 40 ungelesene Ereignisse. Wenn sie voll ist, ersetzt das nächste Ereignis automatisch den jeweils ältesten Listeneintrag.

HINWEIS:
Die Ereignisse werden nach dem Lesen aus der Benachrichtigungsliste entfernt.

6.3.26.1

Aufrufen der Benachrichtigungsliste

Gehen Sie wie folgt vor, um die Benachrichtigungsliste zu öffnen.

1. Drücken Sie OK, um das Menü aufzurufen.
2. Drücken Sie ▲ oder ▼ bis `Benachrichtigung`, und drücken Sie OK zum Auswählen.
3. Drücken Sie ▲ oder ▼ bis zum gewünschten Ereignis, und drücken Sie OK zum Auswählen.

   Drücken Sie ↩ lang, um zum Startbildschirm zurückzukehren.

6.3.27

Wi-Fi-Betrieb

Wi-Fi® ist eine eingetragene Marke der Wi-Fi Alliance®.

HINWEIS:
Diese Funktion gilt nur für DP4601e .

Diese Funktion ermöglicht Ihnen, ein WLAN-Netzwerk einzurichten und eine Verbindung damit herzustellen. Wi-Fi unterstützt Aktualisierungen an der Firmware des Funkgeräts, Codeplug und Ressourcen, wie z. B. Sprachpakete und Sprachansage.

6.3.27.1

Ein-/Ausschalten von WLAN

Die programmierte Taste **Ein-/Ausschalten von WLAN** wird von Ihrem Händler oder Systemadministrator zugeordnet. Klären Sie mit Ihrem Händler oder Systemadministrator, wie das Funkgerät konfiguriert wurde.

Sprachansagen für die vorprogrammierte Taste **WLAN ein oder aus** können über CPS gemäß den Benutzeranforderungen angepasst werden. Weitere Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator.

Sie können WLAN durch Ausführen einer der folgenden Aktionen ein- oder ausschalten.

- Drücken Sie die vorprogrammierte Taste **WLAN ein oder aus**. Die Sprachansage besagt: WLAN wird eingeschaltet oder WLAN wird ausgeschaltet.
- Rufen Sie diese Funktion über das Menü auf.

  a. Drücken Sie OK, um das Menü aufzurufen.

  b. Drücken Sie ▲ oder ▼ bis WLAN, und drücken Sie OK zum Auswählen.

  c. Drücken Sie ▲ oder ▼ bis WLAN ein und drücken Sie OK zum Auswählen.

  Drücken Sie OK, um WLAN zu aktivieren. Im Display wird ✓ neben Aktiviert angezeigt.

  Drücken Sie OK, um das WLAN zu deaktivieren. Neben Aktiviert wird kein ✓ mehr angezeigt.

6.3.27.2

Verbinden mit einem Access Point im Netzwerk

Wenn Sie WLAN einschalten, startet das Funkgerät einen Suchlauf und stellt eine Verbindung zu einem Access Point im Netzwerk her.

Sie können auch über das Menü eine Verbindung mit einem Access Point im Netzwerk herstellen.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis WLAN, und drücken Sie OK zum Auswählen.

3 Drücken Sie ▲ oder ▼ bis Netzwerke, und drücken Sie OK zum Auswählen.

4 Drücken Sie ▲ oder ▼ bis zu einem Netzwerk-Access-Point, und drücken Sie OK zum Auswählen.

5 Drücken Sie ▲ oder ▼ bis Verbinden, und drücken Sie OK zum Auswählen.

Wenn die Verbindung erfolgreich hergestellt werden konnte, zeigt das Funkgerät einen Hinweis an, und der Access Point des Netzwerks wird in der Profilliste gespeichert.

6.3.27.3

Prüfen des WLAN-Verbindungsstatus

Führen Sie die Vorgehensweise zum Prüfen des WLAN-Verbindungsstatus durch.

Drücken Sie die vorprogrammierte Taste **Wi-Fi-Status abfragen**, um den Verbindungsstatus über eine Sprachansage abzurufen. Die Sprachansage besagt: Wi-Fi ist deaktiviert, Wi-Fi ist aktiviert, aber keine Verbindung, oder Wi-Fi ist aktiviert mit Verbindung.

- Das Display zeigt WLAN Aus, wenn WLAN ausgeschaltet ist.
- Das Display zeigt WLAN Ein, Verbunden, wenn das Funkgerät mit einem Netzwerk verbunden ist.
- Das Display zeigt WLAN Ein, Nicht verbunden, wenn das Funkgerät zwar eingeschaltet, aber nicht mit einem Netzwerk verbunden ist.

  Sprachansagen für die WLAN-Statusabfrageergebnisse können über CPS gemäß den Benutzeranforderungen angepasst werden. Weitere Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator.

HINWEIS:
Die programmierte Taste **Wi-Fi-Status abfragen** wird von Ihrem Händler oder Systemadministrator zugeordnet. Klären Sie mit Ihrem Händler oder Systemadministrator, wie das Funkgerät konfiguriert wurde.

6.3.27.4

Aktualisieren der Netzwerkliste

Gehen Sie wie folgt vor, um die Netzwerkliste zu aktualisieren.

- Gehen Sie wie folgt vor, um die Netzwerkliste über das Menü zu aktualisieren.

  a. Drücken Sie OK, um das Menü aufzurufen.

  b. Drücken Sie ▲ oder ▼ bis WLAN, und drücken Sie OK zum Auswählen.

  c. Drücken Sie ▲ oder ▼ bis Netzwerke, und drücken Sie OK zum Auswählen.

  Wenn Sie das Netzwerkmenü öffnen, aktualisiert das Funkgerät automatisch die Netzwerkliste.

- Wenn Sie sich bereits im Netzwerk-Menü befinden, führen Sie die folgende Maßnahme durch, um die Netzwerkliste zu aktualisieren.

  Drücken Sie ▲ oder ▼ zu Aktualisieren und drücken Sie OK zum Auswählen.

  Das Funkgerät aktualisiert sich und zeigt die neueste Netzwerkliste an.

6.3.27.5

Hinzufügen eines Netzwerks

Wenn ein bevorzugtes Netzwerk nicht in der Liste der verfügbaren Netzwerke angezeigt wird, führen Sie die

folgenden Maßnahmen durch, um ein Netzwerk hinzuzufügen.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis WLAN, und drücken Sie OK zum Auswählen.

3 Drücken Sie ▲ oder ▼ bis Netzwerke, und drücken Sie OK zum Auswählen.

4 Drücken Sie ▲ oder ▼ zu Netzwerk hinzufügen und drücken Sie OK zum Auswählen.

5 Geben Sie die SSID (Service Set Identifier) ein, und drücken Sie OK.

6 Drücken Sie ▲ oder ▼ zu Öffnen und drücken Sie OK zum Auswählen.

7 Geben Sie das Kennwort ein, und drücken Sie OK.

Das Funkgerät zeigt eine Bestätigung an, um darauf hinzuweisen, dass das Netzwerk erfolgreich gespeichert wurde.

6.3.27.6

Anzeigen von Details zu Netzwerk-Access-Points

Gehen Sie wie folgt vor, um die Details zu Netzwerk-Access-Points anzuzeigen.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis WLAN, und drücken Sie OK zum Auswählen.

3 Drücken Sie ▲ oder ▼ bis Netzwerke, und drücken Sie OK zum Auswählen.

4 Drücken Sie ▲ oder ▼ bis zu einem Netzwerk-Access-Point, und drücken Sie OK zum Auswählen.

5 Drücken Sie ▲ oder ▼ zu `Details anzeigen` und drücken Sie OK zum Auswählen.

Für einen verbundenen Netzwerk-Access Point werden die SSID (Service Set Identifier), der Sicherheitsmodus, die MAC-Adresse (Media Access Control) und die IP-Adresse (Internet Protocol) angezeigt.

Für einen nicht verbundenen Netzwerk-Access Point werden die SSID (Service Set Identifier) und der Sicherheitsmodus angezeigt.

6.3.27.7

Entfernen von Netzwerk-Access Points

Führen Sie die folgenden Aktionen aus, um Netzwerk-Access Points aus der Profilliste zu entfernen.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `WLAN`, und drücken Sie OK zum Auswählen.

3 Drücken Sie ▲ oder ▼ bis `Netzwerke`, und drücken Sie OK zum Auswählen.

4 Drücken Sie ▲ oder ▼ zum ausgewählten Netzwerk-Access Point und drücken Sie OK zum Auswählen.

5 Drücken Sie ▲ oder ▼ zu `Entfernen` und drücken Sie OK zum Auswählen.

6 Drücken Sie ▲ oder ▼ zu JA und drücken Sie OK zum Auswählen.

Das Funkgerät zeigt eine Bestätigung an, um darauf hinzuweisen, dass der ausgewählte Netzwerk-Access-Point erfolgreich entfernt wurde.

6.4

Energieversorgung

In diesem Kapitel wird die Verwendung der Einstellungsfunktionen auf Ihrem Funkgerät beschrieben.

6.4.1

Ein-/Ausschalten der Funkgerät-Hinweistöne

Alle Funkgerät-Hinweistöne (mit Ausnahme des ankommenden Emergency Alert-Tons) können nach Bedarf aktiviert und deaktiviert werden.

Drücken Sie die programmierte Taste **Alle Töne/ Hinweistöne** , um alle Töne ein- bzw. auszuschalten, oder führen Sie die nachfolgenden Schritte aus, um auf diese Funktion über das Menü „Funkgerät“ zuzugreifen.

1 Drücken Sie OK , um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis Dienstprogramme, und drücken Sie OK zum Auswählen.

3 Drücken Sie ▲ oder ▼ zu FunkgEinstellg und drücken Sie OK zum Auswählen.

4 Drücken Sie ▲ oder ▼ bis Töne/Hinweistöne, und drücken Sie OK zum Auswählen.

5 Drücken Sie ▲ oder ▼ bis Alle Töne, und drücken Sie OK zum Auswählen.

6 Drücken Sie OK, um alle Töne und Hinweistöne zu aktivieren/deaktivieren.

Im Display wird ✓ neben Aktiviert angezeigt.

Neben Aktiviert wird kein ✓ mehr angezeigt.

6.4.2

Einstellen der Abweichung der Hinweistonlautstärke

Die Abweichung der Hinweistonlautstärke kann bei Bedarf eingestellt werden. Diese Funktion stellt die Lautstärke der Hinweistöne ein, sodass sie höher oder niedriger als die Lautstärke für Sprache sein können.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis Dienstprogramme, und drücken Sie OK zum Auswählen.

3 Drücken Sie ▲ oder ▼ zu FunkgEinstellg und drücken Sie OK zum Auswählen.

4 Drücken Sie ▲ oder ▼ bis Töne/Hinweistöne, und drücken Sie OK zum Auswählen.

5 Drücken Sie ▲ oder ▼ bis Lautst.Offset., und drücken Sie OK zum Auswählen.

6 Drücken Sie ▲ oder ▼ bis zum gewünschten Lautstärkewert.

Das Funkgerät gibt für jeden Lautstärkewert jeweils einen Ton in der entsprechenden Lautstärke ab.

7 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie OK, um den gewünschten angezeigten Lautstärkewert zu behalten.

- Drücken Sie , um den Vorgang zu beenden, ohne die aktuellen Lautstärkeabweichungseinstellungen zu ändern.

6.4.3

Ein-/Ausschalten des Freitons

Sie können den Freiton nach Bedarf ein- oder ausschalten.

1 Drücken Sie , um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis Dienstprogramme, und drücken Sie zum Auswählen.

3 Drücken Sie ▲ oder ▼ zu FunkgEinstellg und drücken Sie zum Auswählen.

4 Drücken Sie ▲ oder ▼ bis Töne/Hinweistöne, und drücken Sie zum Auswählen.

5 Drücken Sie ▲ oder ▼ bis Sprecherlaubniston, und drücken Sie zum Auswählen.

Sie können durch Drücken von ◀ oder ▶ die ausgewählte Option ändern.

6 Drücken Sie , um den Freiton zu aktivieren/deaktivieren.

Im Display wird ✓ neben Aktiviert angezeigt.

Neben Aktiviert wird kein ✓ mehr angezeigt.

6.4.4

Ein- und Ausschalten des Hinweistons beim Einschalten

Sie können den Hinweiston beim Einschalten nach Bedarf ein- oder ausschalten.

1 Drücken Sie , um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis Dienstprogramme, und drücken Sie OK zum Auswählen.

3 Drücken Sie ▲ oder ▼ zu FunkgEinstellg und drücken Sie OK zum Auswählen.

4 Drücken Sie ▲ oder ▼ bis Töne/Hinweistöne, und drücken Sie OK zum Auswählen.

5 Drücken Sie ▲ oder ▼ bis Einschalten, und drücken Sie OK zum Auswählen.

Sie können durch Drücken von ◀ oder ▶ die ausgewählte Option ändern.

6 Drücken Sie OK zum Aktivieren bzw. Deaktivieren des Einschalttons.

Im Display wird ✓ neben Aktiviert angezeigt.

Neben Aktiviert wird kein ✓ mehr angezeigt.

6.4.5

Einstellen der Sendeleistung

Die Sendeleistung des Funkgeräts kann für jede Connect Plus-Zone hoch oder niedrig eingestellt werden.

Hoch ermöglicht die Kommunikation mit Funkstationen im Connect Plus-Modus, die sich in großer Entfernung befinden. Niedrig ermöglicht die Kommunikation mit Funkstationen im Connect Plus-Modus, die sich in geringer Entfernung befinden.

Drücken Sie die programmierte Taste **Leistung** zum Umschalten des Sendeleistungspegels zwischen Hoch und Niedrig.

Befolgen Sie das beschriebene Verfahren für den Zugriff auf diese Funktion über das Menü „Funkgerät“.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ zu Einstellungen und drücken Sie OK zum Auswählen.

3 Drücken Sie ▲ oder ▼ zu Funkgeräteinstellungen und drücken Sie OK zum Auswählen.

4 Drücken Sie ▲ oder ▼ zu Leistung und drücken Sie OK zum Auswählen.

5 Drücken Sie ▲ oder ▼ zur der erforderlichen Einstellung und drücken Sie OK zum Auswählen.

✓ wird neben der ausgewählten Einstellung angezeigt. Durch Gedrückthalten von ↩ können Sie jederzeit zum Startbildschirm zurückkehren.

Das Funkgerät kehrt zum vorherigen Menü zurück.

6.4.6

Einstellen der Helligkeit des Displays

Sie können die Display-Helligkeit des Funkgeräts nach Bedarf anpassen.

HINWEIS:
Die Helligkeit des Displays kann nicht angepasst werden, wenn „Helligkeitsautomatik“ aktiviert ist.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis Dienstprogramme, und drücken Sie OK zum Auswählen.

3 Drücken Sie ▲ oder ▼ zu FunkgEinstellg und drücken Sie OK zum Auswählen.

4 Drücken Sie ▲ oder ▼ bis Display, und drücken Sie OK zum Auswählen.

5 Drücken Sie ▲ oder ▼ bis `Helligkeit`, und drücken Sie OK zum Auswählen.

Im Display wird eine Helligkeitsleiste angezeigt.

6 Zum Verringern der Helligkeit drücken Sie ◀, zum Erhöhen der Helligkeit drücken Sie ▶. Wählen Sie eine Einstellung zwischen 1 und 8. Drücken Sie zur Bestätigung Ihrer Eingabe OK .

6.4.7

Einstellen der Displaybeleuchtung

Sie können die Display-Beleuchtungszeit des Funkgeräts je nach Bedarf einstellen. Diese Einstellung gilt dann auch für die Beleuchtung der Menü-Navigationstasten und der Tastatur.

Drücken Sie die vorprogrammierte Taste **Hintergrundbeleuchtung**, um die Helligkeit einzustellen, oder befolgen Sie das beschriebene Verfahren für den Zugriff auf diese Funktion über das Funkgerätmenü.

Wird die LED-Anzeige deaktiviert, wird die Beleuchtung des Displays und der Tastatur automatisch ausgeschaltet (siehe Ein-/Ausschalten der Funkgerät-LED-Anzeige auf Seite 324).

1 Drücken Sie OK , um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Dienstprogramme`, und drücken Sie OK zum Auswählen.

3 Drücken Sie ▲ oder ▼ zu `FunkgEinstellg` und drücken Sie OK zum Auswählen.

4 Drücken Sie ▲ oder ▼ bis `Display`, und drücken Sie OK zum Auswählen.

5 Drücken Sie ▲ oder ▼ bis `Hintergrundbeleuchtung Timer`, und drücken Sie OK zum Auswählen.

Sie können durch Drücken von ◀ oder ▶ die ausgewählte Option ändern.

6.4.8

Ein-/Ausschalten des Startbildschirms

Sie können den Startbildschirm nach Bedarf aktivieren oder deaktivieren.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Dienstprogramme`, und drücken Sie OK zum Auswählen.

3 Drücken Sie ▲ oder ▼ zu `FunkgEinstellg` und drücken Sie OK zum Auswählen.

4 Drücken Sie ▲ oder ▼ bis `Display`, und drücken Sie OK zum Auswählen.

5 Drücken Sie ▲ oder ▼ bis `Introbildschirm`, und drücken Sie OK zum Auswählen.

Sie können durch Drücken von ◀ oder ▶ die ausgewählte Option ändern.

6 Drücken Sie OK zum Aktivieren/Deaktivieren des Startbildschirms.

Im Display wird ✓ neben `Aktiviert` angezeigt.

Neben `Aktiviert` wird kein ✓ mehr angezeigt.

6.4.9

Sprache

Sie können das Display Ihres Funkgeräts auf die von Ihnen gewünschte Sprache einstellen.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Dienstprogramme`, und drücken Sie OK zum Auswählen.

3 Drücken Sie ▲ oder ▼ zu `FunkgEinstellg` und drücken Sie OK zum Auswählen.

4 Drücken Sie ▲ oder ▼ bis `Sprachen`, und drücken Sie OK zum Auswählen.

Sie können die ausgewählte Option auch mit ◀ oder ▶ ändern.

5 Drücken Sie ▲ oder ▼ bis zur gewünschten Sprache. Drücken Sie dann OK zum Aktivieren. ✓ wird neben der gewählten Sprache angezeigt.

6.4.10

Ein-/Ausschalten der Funkgerät-LED-Anzeige

Sie können die LED-Anzeige nach Bedarf aktivieren oder deaktivieren.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Dienstprogramme`, und drücken Sie OK zum Auswählen.

3 Drücken Sie ▲ oder ▼ zu `FunkgEinstellg` und drücken Sie OK zum Auswählen.

4 Drücken Sie ▲ oder ▼ bis `LED-Anzeige`, und drücken Sie OK zum Auswählen.

Sie können durch Drücken von ◀ oder ▶ die ausgewählte Option ändern.

5 Drücken Sie OK, um die LED-Anzeige zu aktivieren/deaktivieren.

Im Display wird ✓ neben Aktiviert angezeigt.

Neben Aktiviert wird kein ✓ mehr angezeigt.

6.4.11

Bestimmen des Kabeltyps

Sie können den Kabeltyp für Ihr Funkgerät auswählen.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis Dienstprogramme, und drücken Sie OK zum Auswählen.

3 Drücken Sie ▲ oder ▼ zu FunkgEinstellg und drücken Sie OK zum Auswählen.

4 Drücken Sie ▲ oder ▼ bis Kabeltyp, und drücken Sie OK zum Auswählen.

Sie können durch Drücken von ◀ oder ▶ die ausgewählte Option ändern.

5 Der aktuelle Kabeltyp ist mit einem ✓ gekennzeichnet.

6.4.12

Kanal-Ansage

Diese Funktion aktiviert die Sprachansage des Funkgeräts, sodass es die aktuelle Zone bzw. den aktuellen Kanal, die/der vom Benutzer gerade zugewiesen wurde, oder das Drücken einer programmierbaren Taste akustisch angibt. Dieses Tonsignal kann bedarfsspezifisch eingestellt werden. Die Ansage ist besonders nützlich, wenn der Benutzer Schwierigkeiten hat, die Anzeige im Display zu lesen.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis Dienstprogramme, und drücken Sie OK zum Auswählen.

3 Drücken Sie ▲ oder ▼ zu FunkgEinstellg und drücken Sie OK zum Auswählen.

4 Drücken Sie ▲ oder ▼ bis Sprachansage, und drücken Sie OK zum Auswählen.

Sie können durch Drücken von ◀ oder ▶ die ausgewählte Option ändern.

5 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie OK, um die Sprachansage zu aktivieren. Im Display wird ✓ neben Aktiviert angezeigt.
- Drücken Sie OK, um die Sprachansage zu deaktivieren. ✓ wird nicht mehr neben Aktiviert angezeigt.

6.4.13

Einstellen der Text-in-Sprache-Funktion

HINWEIS:
Die Text-zu-Sprache-Funktion kann nur in MOTOTRBO CPS aktiviert werden. Wenn diese Option aktiviert ist, wird die Sprachansage-Funktion automatisch deaktiviert, und umgekehrt. Weitere Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator.

Diese Funktion aktiviert die Sprachansage des Funkgeräts mit den folgenden Funktionen:

- Aktueller Kanal
- Aktuelle Zone
- Programmierbare Taste ein- bzw. aus
- Inhalt der empfangenen Textnachrichten
  - Drücken Sie die programmierbare Taste **Kanal-Ansage**, um die Funktion ein- oder auszuschalten.
  - Dieses Tonsignal kann bedarfsspezifisch eingestellt werden. Die Ansage ist besonders nützlich, wenn der Benutzer Schwierigkeiten hat, die Anzeige im Display zu lesen.

a. Drücken Sie OK, um das Menü aufzurufen.

b. Drücken Sie ▲ oder ▼ bis Dienstprogramme, und drücken Sie OK zum Auswählen.

c. Drücken Sie ▲ oder ▼ zu FunkgEinstellg und drücken Sie OK zum Auswählen.

d. Drücken Sie ▲ oder ▼ bis Sprachansage, und drücken Sie OK zum Auswählen.

e. Drücken Sie ▲ oder ▼ bis Nachrichten oder Programmtaste, und drücken Sie OK zum Auswählen.

Sie können durch Drücken von ◀ oder ▶ die ausgewählte Option ändern.

✓ wird neben der ausgewählten Einstellung angezeigt.

6.4.14

Menü-Timer

Mit dieser Funktion können Sie festlegen, wie lange Ihr Funkgerät das Menü anzeigt, bevor es automatisch wieder auf den Ausgangsbildschirm umschaltet.

1. Drücken Sie OK, um das Menü aufzurufen.
2. Drücken Sie ▲ oder ▼ bis Dienstprogramme, und drücken Sie OK zum Auswählen.
3. Drücken Sie ▲ oder ▼ zu FunkgEinstellg und drücken Sie OK zum Auswählen.
4. Drücken Sie ▲ oder ▼ bis Display, und drücken Sie OK zum Auswählen.
5. Drücken Sie ▲ oder ▼ bis Menü-Timer, und drücken Sie OK zum Auswählen.

6 Drücken Sie ▲ oder ▼ bis zur gewünschten Einstellung, und drücken Sie OK zum Auswählen.

6.4.15

Digital-Mikrofonverstärkungsautomatik (Mic AGC-D)

Mit dieser Funktion steuern Sie automatisch die Mikrofonverstärkung des Funkgeräts, während eine Übertragung auf einem digitalen System stattfindet. Laute Geräusche werden unterdrückt, oder leise Geräusche werden verstärkt. Hierbei wird ein voreingestellter Wert verwendet, um eine konsistente Lautstärke zu gewährleisten.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Dienstprogramme`, und drücken Sie OK zum Auswählen.

3 Drücken Sie ▲ oder ▼ zu `FunkgEinstellg` und drücken Sie OK zum Auswählen.

Sie können durch Drücken von ◀ oder ▶ die ausgewählte Option ändern.

4 Drücken Sie ▲ oder ▼ bis `MikAGC-D` und drücken Sie OK zum Auswählen.

5 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie OK, um **MikAGC-D** zu aktivieren. Im Display wird ✓ neben `Aktiviert` angezeigt.
- Drücken Sie OK, um **MikAGC-D** zu deaktivieren. ✓ verschwindet neben `Aktiviert`.

6.4.16

Intelligentes Audio

Die Audiolautstärke Ihres Funkgeräts wird automatisch so geregelt, dass sie an aktuelle Hintergrundgeräusche in der

Umgebung des Funkgeräts, einschließlich stationärer und sich bewegender Geräuschquellen, angepasst wird und sie überwindet. Diese Funktion betrifft nur den Empfang und hat keinen Einfluss auf das Sende-Audio.

HINWEIS:
Während einer Bluetooth-Sitzung ist diese Funktion nicht verfügbar.

1 Drücken Sie OK, um das Menü aufzurufen.

Bedienelement des Funkgeräts	Schritte
Menu	**a** Drücken Sie OK, um das Menü aufzurufen. **b** Drücken Sie ▲ oder ▼ zu `FunkgEinstellg` und drücken Sie OK zum Auswählen. **c** Drücken Sie ▲ oder ▼ zu `FunkgEinstellg` und drücken Sie OK zum Auswählen. **d** Drücken Sie ▲ oder ▼ bis `Intelligentes Audio`, und drücken Sie OK zum Auswählen. **HINWEIS:** Sie können durch Drücken von ◀ oder ▶ die ausgewählte Option ändern. **e** Führen Sie einen der folgenden Schritte aus:

Bedienelement des Funkgeräts	Schritte
	• Drücken Sie OK, um die intelligente Audio-Funktion zu aktivieren. Im Display wird ✓ neben Aktiviert angezeigt. • Drücken Sie OK, um die intelligente Audio-Funktion zu deaktivieren. Neben Aktiviert wird kein ✓ mehr angezeigt.

2 Drücken Sie ▲ oder ▼ bis Dienstprogramme, und drücken Sie OK zum Auswählen.

3 Drücken Sie ▲ oder ▼ zu FunkgEinstellg und drücken Sie OK zum Auswählen.

4 Drücken Sie ▲ oder ▼ bis Intelligentes Audio, und drücken Sie OK zum Auswählen.

5 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie OK, um die intelligente Audio-Funktion zu aktivieren. Im Display wird ✓ neben Aktiviert angezeigt.
- Drücken Sie OK, um die intelligente Audio-Funktion zu deaktivieren. Neben Aktiviert wird kein ✓ mehr angezeigt.

6.4.17

Aktivieren/Deaktivieren der Funktion „Sperre akustischer Rückkopplungen“

Mit dieser Funktion können Sie die akustische Rückkopplung bei eingehenden Anrufen reduzieren.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Dienstprogramme`, und drücken Sie OK zum Auswählen.

3 Drücken Sie ▲ oder ▼ zu `FunkgEinstellg` und drücken Sie OK zum Auswählen.

4 Drücken Sie ▲ oder ▼ bis `AF-Unterdrückung`, und drücken Sie OK zum Auswählen.

Sie können durch Drücken von ◀ oder ▶ die ausgewählte Option ändern.

5 Führen Sie einen der folgenden Schritte aus.

- Drücken Sie OK, um die Sperre akustischer Rückkopplungen zu aktivieren. Im Display wird ✓ neben `Aktiviert` angezeigt.
- Drücken Sie OK, um die Sperre akustischer Rückkopplungen zu deaktivieren. Neben `Aktiviert` wird kein ✓ mehr angezeigt.

6.4.18

Ein- und Ausschalten der dynamischen Mikrofonverzerrungssteuerung

Wenn diese Funktion eingeschaltet ist, kontrolliert das Funkgerät automatisch den Mikrofoneingang und passt den Verstärkungswert an, um Audioclipping zu vermeiden.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Dienstprogramme`, und drücken Sie OK zum Auswählen.

3 Drücken Sie ▲ oder ▼ zu `FunkgEinstellg` und drücken Sie OK zum Auswählen.

Sie können durch Drücken von ◀ oder ▶ die ausgewählte Option ändern.

4 Drücken Sie ▲ oder ▼ bis `Mik.-Verzerrung`, und drücken Sie OK zum Auswählen.

5 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie OK, um die dynamische Mikrofonverzerrungssteuerung zu aktivieren. Im Display wird neben „Aktiviert“ ✓ angezeigt.
- Drücken Sie OK, um die dynamische Mikrofonverzerrungssteuerung zu deaktivieren. Neben Aktiviert wird kein ✓ mehr angezeigt.

6.4.19

Ein-/Ausschalten von GNSS

Das Global Navigation Satellite System (GNSS) ist ein Satellitennavigationssystem, das die genaue Position des Funkgeräts ortet. GNSS umfasst Global Positioning System (GPS) und Global Navigation Satellite System (GLONASS).

HINWEIS:
Ausgewählte Funkgerätmodelle bieten GPS- und GLONASS. Die GNSS-Konstellation wird über CPS konfiguriert. Klären Sie mit Ihrem Händler oder Systemadministrator, wie das Funkgerät konfiguriert wurde.

1 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie die vorprogrammierte Taste **GNSS**, um die Funktion ein- bzw. auszuschalten. Überspringen Sie die folgenden Schritte.
- Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Dienstprogramme`.

Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis

Funkgeräteinstellungen. Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis GNSS. Drücken Sie OK, um die Option auszuwählen.

5 Drücken Sie OK, um GNSS zu aktivieren/deaktivieren.

Wenn diese Option aktiviert ist, wird ✓ neben Aktiviert angezeigt.

Wenn diese Option deaktiviert ist, wird ✓ neben Aktiviert angezeigt.

Unter Überprüfen der GNSS-Informationen auf Seite 347 finden Sie weitere Informationen zum Abrufen von GNSS-Informationen.

6.4.20

Aufrufen allgemeiner Funkgerätinformationen

In Ihrem Funkgerät sind folgende Daten gespeichert:

- Akku
- Grad der Neigung (Beschleunigungsmesser)
- Modellnummerindex des Funkmodells
- Optionskarte Over-The-Air (OTA) Codeplug CRC
- Standortnummer
- Standortinformationen
- Aliasname und ID des Funkgeräts
- Firmware- und Codeplug-Version
- GNSS-Informationen

Sie können jederzeit drücken, um zum vorhergehenden Bildschirm zu wechseln, oder lang drücken, um zum Ausgangsbildschirm zurückzukehren. Das Funkgerät verlässt den aktuellen Bildschirm, sobald der Inaktivitäts-Timer abgelaufen ist.

6.4.20.1

Aufrufen der Akkudaten

Zeigt Akkuinformationen an.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Dienstprogramme`, und drücken Sie OK zum Auswählen.

3 Drücken Sie ▲ oder ▼ bis `Geräteinfo`, und drücken Sie OK zum Auswählen.

4 Drücken Sie ▲ oder ▼ bis `Akku Info`, und drücken Sie OK zum Auswählen.

Im Display werden Informationen zum Akku angezeigt.

Nur für **IMPRES**-Akkus: Wenn ein Akku in einem IMPRES-Ladegerät aufgefrischt werden muss, zeigt das Display `Akku auffrischen` an. Nach dem Auffrischen werden im Display Informationen zum Akku angezeigt.

6.4.20.2

Überprüfen des Neigungsgrads (Beschleunigungssensor)

HINWEIS:
Das Messergebnis im Display zeigt den Neigungswinkel zu dem Zeitpunkt an, als Sie OK gedrückt haben, um die Option `Beschl.-Sensor` zu bestätigen. Wenn Sie den Neigungswinkel des Funkgeräts nach dem Drücken von OK ändern, wird das Messergebnis auf dem Display nicht geändert. Es wird weiterhin das Ergebnis angezeigt, als OK gedrückt wurde.

Wenn das tragbare Funkgerät für Totmann-Alarme aktiviert wurde, gibt es einen Menüpunkt, um zu überprüfen, wie das Funkgerät den Neigungsgrad ermittelt. Dies ist eine nützliche Funktion, wenn der Händler oder Systemadministrator des Funkgeräts die MOTOTRBO

Connect Plus-Optionskarten-CPS verwendet, um den Aktivierungswinkel zu konfigurieren, bei dem der Neigungsalarm ausgelöst wird.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Dienstprogramme`, und drücken Sie OK zum Auswählen.

3 Drücken Sie ▲ oder ▼ bis `Geräteinfo`, und drücken Sie OK zum Auswählen.

4 Kippen Sie das Funkgerät in dem Winkel, bei dem der Neigungsalarm ausgelöst wird.

5 Drücken Sie ▲ oder ▼ bis `Beschl.-Sensor`, und drücken Sie OK zum Auswählen.

Im Display wird der Neigungswinkel des Funkgeräts (Abweichung von der senkrechten zur vertikalen Position) in Grad angezeigt (Beispiel: `62 Grad.`) Verwenden Sie auf dieser Basis MOTOTRBO Connect Plus Option Board CPS zur Konfiguration des Aktivierungswinkels für 60 Grad (dies ist der engste programmierbare Wert). Die Timer für den Neigungsalarm werden ausgelöst, wenn der Aktivierungswinkel 60 Grad oder höher ist.

6.4.20.3
Überprüfen des Modellnummerindex des Funkgeräts

Diese Indexnummer dient zur Identifizierung der modellspezifischen Hardware Ihres Funkgeräts. Ihr Systemadministrator für Funkgeräte kann Sie nach dieser Nummer fragen, wenn ein neues Optionskarten-Codeplug für Ihr Funkgerät bereitgestellt werden soll.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Dienstprogramme`, und drücken Sie OK zum Auswählen.

3 Drücken Sie ▲ oder ▼ bis `Geräteinfo`, und drücken Sie OK zum Auswählen.

4 Drücken Sie ▲ oder ▼ bis `Modellindex`, und drücken Sie OK zum Auswählen.

Im Display wird der Modellnummerindex des Funkgeräts angezeigt.

6.4.20.4

CRC-Überprüfung der Optionskarten-OTA-Codeplug-Datei

Befolgen Sie die nachfolgenden Anweisungen, wenn Sie von Ihrem Systemadministrator für Funkgeräte aufgefordert werden, die Optionskarten-OTA-Codeplug-Datei „CRC“ (Cyclic Redundancy Check) anzuzeigen. Diese Menüoption wird nur dann angezeigt, wenn die Optionskarte ihre letzte Codeplug-Aktualisierung per OTA empfangen hat.

1 Drücken Sie OK , um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Dienstprogramme`, und drücken Sie OK zum Auswählen.

3 Drücken Sie ▲ oder ▼ bis `Geräteinfo`, und drücken Sie OK zum Auswählen.

4 Drücken Sie ▲ oder ▼ bis `OB OTA CPcrc`, und drücken Sie OK zum Auswählen.

Im Display werden einige Buchstaben und Zahlen anzeigt. Teilen Sie diese Informationen wie im Display dargestellt Ihrem Systemadministrator für Funkgeräte mit.

6.4.20.5

Anzeigen der Site-ID (Standortnummer)

HINWEIS:
Wenn Sie derzeit nicht an einem Standort registriert sind, wird im Display `Nicht registriert` angezeigt.

Das Funkgerät zeigt die Site-ID kurz bei der Registrierung beim Connect Plus-Standort an. Nach der Registrierung zeigt das Funkgerät die Standortnummer nicht mehr an.

Um die eingetragene Standortnummer anzuzeigen, gehen Sie wie folgt vor:

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Dienstprogramme`, und drücken Sie OK zum Auswählen.

3 Drücken Sie ▲ oder ▼ bis `Geräteinfo`, und drücken Sie OK zum Auswählen.

4 Drücken Sie ▲ oder ▼ bis `Standortnummer`, und drücken Sie OK zum Auswählen.

Im Display werden die Netzwerk-ID und die Standortnummer angezeigt.

6.4.20.6

Prüfen der Standort-Informationen

HINWEIS:
Wenn Sie derzeit nicht an einem Standort registriert sind, wird im Display `Nicht registriert` angezeigt.

Die Standort-Infofunktion bietet Informationen, die für Servicetechniker hilfreich sein können. Sie besteht aus folgenden Informationen:

- Repeater-Nummer des aktuellen Steuerungskanal-Repeaters.
- RSSI: Letzte vom Steuerungskanal-Repeater gemessene Signalstärke.
- Nachbarliste (NL), gesendet vom Steuerungskanal-Repeater (fünf durch Kommas getrennte Zahlen).

Wenn Sie zur Nutzung dieser Funktion aufgefordert werden, geben Sie die angezeigten Informationen genau so an, wie sie auf dem Bildschirm angezeigt werden.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Dienstprogramme`, und drücken Sie OK zum Auswählen.

3 Drücken Sie ▲ oder ▼ bis `Geräteinfo`, und drücken Sie OK zum Auswählen.

4 Drücken Sie ▲ oder ▼ `Site-Info`, und drücken Sie OK zum Auswählen.

Im Display werden die Standort-Informationen angezeigt.

6.4.20.7

Prüfen der Funkgerät-ID

Diese Funktion zeigt die ID des Funkgeräts an.

Befolgen Sie das beschriebene Verfahren für den Zugriff auf diese Funktion über den Bildschirm des Funkgeräts.

1 Drücken Sie OK , um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Dienstprogramme`, und drücken Sie OK zum Auswählen.

3 Drücken Sie ▲ oder ▼ bis `Geräteinfo`, und drücken Sie OK zum Auswählen.

4 Drücken Sie ▲ oder ▼ bis `Meine ID`, und drücken Sie OK zum Auswählen.

Im Display wird die Funkgerät-ID angezeigt.

6.4.20.8

Überprüfen der Firmware- und Codeplug-Version

Zeigt die Versionsnummer der Firmware Ihres Funkgeräts an.

1 Drücken Sie OK , um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Dienstprogramme`, und drücken Sie OK zum Auswählen.

3 Drücken Sie ▲ oder ▼ bis `Geräteinfo`, und drücken Sie OK zum Auswählen.

4 Drücken Sie ▲ oder ▼ bis `Versionen`, und drücken Sie OK zum Auswählen.

Die Anzeige enthält eine Liste mit den folgenden Informationen:

- (Funkgerät) Firmware-Version
- (Funkgerät) Codeplug-Version
- Optionskarten-Firmware-Version
- Optionskarten-Frequenz-Version
- Optionskarten-Hardware-Version
- Optionskarten-Codeplug-Version

6.4.20.9

Überprüfung auf Updates

Connect Plus bietet die Möglichkeit, bestimmte Dateien (Optionskarten-Codeplug, Netzwerkfrequenzdatei und Optionskarten-Firmware-Datei) per Funk (OTA = Over the Air) zu aktualisieren.

HINWEIS:
Wenden Sie sich an Ihren Händler oder Netzwerkadministrator, um festzustellen, ob diese Funktion für Ihr Funkgerät aktiviert wurde.

Jedes Connect Plus-Funkgerät mit Display ist in der Lage, die aktuelle OTA-Codeplug-CRC, Frequenzdateiversion oder Firmware-Dateiversion der Zusatzkarte über eine Menüoption anzuzeigen. Darüber hinaus können Display-Funkgeräte mit aktivierter OTA-Dateiübertragung die Version einer ausstehenden Datei anzeigen. Eine ausstehende Datei ist eine Frequenzdatei oder Optionskarten-Firmware-Datei, über die das Connect Plus-Funkgerät durch Systemmeldungen in Kenntnis gesetzt wurde, von denen aber noch nicht alle Dateipakete eingegangen sind. Sollte für das Connect Plus-Funkgerät mit Display eine ausstehende Datei vorliegen, bietet das Menü folgende Möglichkeiten:

- Abrufen der Versionsnummer der ausstehenden Datei.

- Anzeigen, welcher Prozentsatz an Datenpaketen bereits eingegangen ist.
- Anweisen des Connect Plus-Funkgeräts, die restlichen Dateipakete abzurufen.

Wenn das Funkgerät für die Connect Plus-OTA-Dateiübertragung aktiviert ist, kann es vorkommen, dass das Funkgerät automatisch eine Dateiübertragung durchführt, ohne zuvor den Funkgerätbenutzer darüber zu informieren. Während das Funkgerät die Dateipakete erhält, blinkt die LED schnell rot, und im Display des Funkgeräts wird das Symbol für große Datenmengen auf der Statusleiste des Startbildschirms angezeigt.

HINWEIS:
Das Connect Plus-Funkgerät kann nicht gleichzeitig Datenpakete abrufen und Anrufe empfangen. Wenn Sie die Dateiübertragung abbrechen möchten, drücken Sie die **Sendetaste (PTT)** und lassen sie wieder los. Dies führt dazu, dass das Funkgerät einen Anruf für den ausgewählten Kontaktnamen anfordert. Die Dateiübertragung wird für dieses Funkgerät abgebrochen, bis sie zu einem späteren Zeitpunkt fortgesetzt wird.

Es gibt verschiedene Möglichkeiten, den Dateiübertragungsprozess neu zu starten. Das erste Beispiel gilt für alle OTA-Dateitypen. Die anderen Beispiele gelten nur für die Netzwerkfrequenzdatei und die Optionskarten-Firmware-Datei:

- Der Systemadministrator für Funkgeräte startet die OTA-Dateiübertragung neu.
- Der vordefinierte Timer der Optionskarte läuft ab, sodass das Abrufen von Paketen automatisch wiederaufgenommen wird.
- Der Timer ist noch nicht abgelaufen, aber der Benutzer veranlasst das Fortsetzen der Datenübertragung über eine Menüoption.

Nachdem das Connect Plus-Funkgerät alle Dateipakete heruntergeladen hat, muss ein Upgrade auf die neu erhaltene Datei durchgeführt werden. Für die Netzwerkfrequenzdatei ist dies ein automatischer Vorgang, der kein Zurücksetzen des Funkgeräts erfordert. Für die Optionskarten-Codeplug-Datei ist dies ein automatischer Vorgang, der eine kurze Unterbrechung des Dienstes verursacht, da die Optionskarte die neuen Codeplug-Informationen lädt und sich erneut bei einem Netzwerkstandort anmeldet. Wie schnell das Funkgerät ein Upgrade auf eine neue Optionskarten-Firmware-Datei durchführt, hängt davon ab, wie das Funkgerät vom Händler oder Systemadministrator konfiguriert wurde. Das Funkgerät führt entweder sofort eine Aktualisierung nach

Einholung aller Dateipakete durch, oder es wartet, bis der Benutzer das Funkgerät das nächste Mal einschaltet.

HINWEIS:
Klären Sie mit Ihrem Händler oder Systemadministrator, wie das Funkgerät konfiguriert wurde.

Die Aktualisierung auf eine neue Optionskarten-Firmware-Datei dauert einige Sekunden, und hierzu ist es erforderlich, dass die Connect Plus-Optionskarte das Funkgerät zurücksetzt. Nachdem das Upgrade gestartet wurde, kann der Funkgerätbenutzer keine Anrufe tätigen oder empfangen, bis der Vorgang abgeschlossen ist. Während des Vorgangs erscheint auf dem Display der Hinweis, das Funkgerät nicht auszuschalten.

6.4.20.9.1

Firmware-Datei

Der folgende Abschnitt enthält Informationen zur Firmware des Funkgeräts.

6.4.20.9.1.1

Firmware auf dem neuesten Stand

HINWEIS:
Wenn die Firmwaredatei für die Zusatzkarte nicht auf dem neuesten Stand ist (und wenn das Funkgerät eine neuere Version einer Zusatzkarten-Firmwaredatei bereits teilweise heruntergeladen hat) zeigt das Display eine Liste mit zusätzlichen Optionen; `Version`, `%Empfangen` und `Download`.

1. Drücken Sie OK, um das Menü aufzurufen.
2. Drücken Sie ▲ oder ▼ bis `Dienstprogramme`, und drücken Sie OK zum Auswählen.
3. Drücken Sie ▲ oder ▼ bis `Geräteinfo`, und drücken Sie OK zum Auswählen.
4. Drücken Sie ▲ oder ▼ bis `Aktualisierungen`, und drücken Sie OK zum Auswählen.

5 Drücken Sie ▲ oder ▼ bis `Firmware`, und drücken Sie OK zum Auswählen.

Auf dem Display wird `Firmware ist auf neuestem Stand` angezeigt.

6.4.20.9.2

Ausstehende Firmware – Version

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Dienstprogramme`, und drücken Sie OK zum Auswählen.

3 Drücken Sie ▲ oder ▼ bis `Geräteinfo`, und drücken Sie OK zum Auswählen.

4 Drücken Sie ▲ oder ▼ bis `Aktualisierungen`, und drücken Sie OK zum Auswählen.

5 Drücken Sie ▲ oder ▼ bis `Firmware`, und drücken Sie OK zum Auswählen.

6 Drücken Sie ▲ oder ▼ bis `Version`, und drücken Sie OK zum Auswählen.

Wenn es eine ausstehende Optionskarte Firmware-Datei gibt, wird im Display die Versionsnummer der ausstehenden Firmware angezeigt.

Wenn keine ausstehende Optionskarten-Firmwaredatei vorhanden ist, wird auf dem Display `Firmware auf dem neuesten Stand` angezeigt.

6.4.20.9.3

Ausstehende Firmware – % empfangen

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Dienstprogramme`, und drücken Sie OK zum Auswählen.

3 Drücken Sie ▲ oder ▼ bis Geräteinfo, und drücken Sie OK zum Auswählen.

4 Drücken Sie ▲ oder ▼ bis Aktualisierungen, und drücken Sie OK zum Auswählen.

5 Drücken Sie ▲ oder ▼ bis Firmware, und drücken Sie OK zum Auswählen.

6 Drücken Sie ▲ oder ▼ bis %Empfangen, und drücken Sie OK zum Auswählen.

Der Bildschirm zeigt den Prozentsatz der bisher abgerufenen Firmware-Dateipakete an.

HINWEIS:
Bei 100 % muss das Funkgerät aus- und wieder eingeschaltet werden, um die Firmware-Aktualisierung zu starten.

6.4.20.9.4

Ausstehende Firmware – Download

Wenn das Connect Plus-Funkgerät zuvor eine OTA-Optionskarten-Firmware-Dateiübertragung mit einer unvollständigen Datei abgebrochen hat, wird die Dateiübertragung automatisch wieder aufgenommen (wenn noch aktiv), sobald ein interner Timer abläuft. Wenn Sie das Gerät anweisen möchten, eine aktive Optionskarten-Firmware-Dateiübertragung noch vor Ablauf dieses internen Timers wiederaufzunehmen, verwenden Sie die Download-Option, wie oben beschrieben.

1 Drücken Sie OK , um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis Dienstprogramme, und drücken Sie OK zum Auswählen.

3 Drücken Sie ▲ oder ▼ bis Geräteinfo, und drücken Sie OK zum Auswählen.

4 Drücken Sie ▲ oder ▼ bis Aktualisierungen, und drücken Sie OK zum Auswählen.

5 Drücken Sie ▲ oder ▼ bis `Firmware`, und drücken Sie OK zum Auswählen.

6 Drücken Sie ▲ oder ▼ bis `Herunterladen`, und drücken Sie OK zum Auswählen.

Im Display wird Folgendes angezeigt:

Download verfügbar	`Download starten`
Kein Download verfügbar	`Download nicht verfügbar`

7 Führen Sie einen der folgenden Schritte aus:

- Wählen Sie `Ja` und drücken Sie OK, um den Download zu starten.
- Wählen Sie `Nein` und drücken Sie OK, um zum vorherigen Menü zurückzukehren.

6.4.20.9.5

Frequenzdatei

Der folgende Abschnitt enthält Informationen zur Frequenzdatei des Funkgeräts.

6.4.20.9.5.1

Frequenzdatei auf dem neuesten Stand

HINWEIS:
Wenn die Frequenzdatei nicht auf dem neuesten Stand ist (und wenn das Funkgerät eine neuere Version einer Frequenzdatei bereits teilweise heruntergeladen hat), zeigt das Display eine Liste mit zusätzlichen Optionen an; `Version`, `%Empfangen` und `Download`.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Dienstprogramme`, und drücken Sie OK zum Auswählen.

3 Drücken Sie ▲ oder ▼ bis `Geräteinfo`, und drücken Sie OK zum Auswählen.

4 Drücken Sie ▲ oder ▼ bis Frequenz, und drücken Sie OK zum Auswählen.

Auf dem Display wird Frequ.-Datei auf neuestem Stand angezeigt.

6.4.20.9.5.2

Ausstehende Frequenzdatei – Version

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis Dienstprogramme, und drücken Sie OK zum Auswählen.

3 Drücken Sie ▲ oder ▼ bis Geräteinfo, und drücken Sie OK zum Auswählen.

4 Drücken Sie ▲ oder ▼ bis Aktualisierungen, und drücken Sie OK zum Auswählen.

5 Drücken Sie ▲ oder ▼ bis Frequenz, und drücken Sie OK zum Auswählen.

6 Drücken Sie ▲ oder ▼ bis Version, und drücken Sie OK zum Auswählen.

Wenn es eine ausstehende Frequenzdatei gibt, wird im Display die Versionsnummer der ausstehenden Frequenzdatei angezeigt.

6.4.20.9.5.3

Ausstehende Frequenzdatei – % empfangen

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis Dienstprogramme, und drücken Sie OK zum Auswählen.

3 Drücken Sie ▲ oder ▼ bis Geräteinfo, und drücken Sie OK zum Auswählen.

4 Drücken Sie ▲ oder ▼ bis Aktualisierungen, und drücken Sie OK zum Auswählen.

5 Drücken Sie ▲ oder ▼ bis %Empfangen, und drücken Sie OK zum Auswählen.

Der Bildschirm zeigt den Prozentsatz der bisher abgerufenen Frequenzdateipakete an.

6.4.20.9.5.4

Ausstehende Frequenzdatei – Download

Wenn das Connect Plus-Funkgerät zuvor eine OTA-Netzwerkfrequenzdateiübertragung mit einer unvollständigen Datei abgebrochen hat, wird die Dateiübertragung automatisch wieder aufgenommen (wenn noch aktiv), sobald ein interner Timer abläuft. Wenn Sie das Gerät anweisen möchten, eine aktive Netzwerkfrequenzdateiübertragung noch vor Ablauf dieses internen Timers wiederaufzunehmen, verwenden Sie die Download-Option, wie oben beschrieben.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis Dienstprogramme, und drücken Sie OK zum Auswählen.

3 Drücken Sie ▲ oder ▼ bis Geräteinfo, und drücken Sie OK zum Auswählen.

4 Drücken Sie ▲ oder ▼ bis Aktualisierungen, und drücken Sie OK zum Auswählen.

5 Drücken Sie ▲ oder ▼ bis Frequenz, und drücken Sie OK zum Auswählen.

6 Drücken Sie ▲ oder ▼ bis Herunterladen, und drücken Sie OK zum Auswählen.

Download zurzeit nicht verfügbar	Download nicht verfügbar
Download zurzeit verfügbar	Download starten

7 Führen Sie einen der folgenden Schritte aus:

- Wählen und drücken Sie Ja, um den Download zu starten.
- Wählen und drücken Sie Nein, um zum vorherigen Menü zurückzukehren.

6.4.20.9.6

Überprüfen der GNSS-Informationen

Sie können GNSS-Informationen Ihres Funkgeräts anzeigen, d. h. Werte wie die folgenden:

- Breitengrad
- Längengrad
- Höhe
- Richtung
- Geschwindigkeit
- Horizontal Dilution of Precision (HDOP – Streubreite der Messwerte in Horizontalrichtung)
- Satelliten
- Version

1 Drücken Sie OK , um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis Dienstprogramme, und drücken Sie OK zum Auswählen.

3 Drücken Sie ▲ oder ▼ bis Geräteinfo, und drücken Sie OK zum Auswählen.

4 Drücken Sie ▲ oder ▼ bis GNSS Info, und drücken Sie OK zum Auswählen.

5 Drücken Sie ▲ oder ▼ bis zum gewünschten Element, und drücken Sie OK zum Auswählen.

Im Display werden die gewünschten GNSS-Informationen angezeigt.

Unter Ein-/Ausschalten von GNSS auf Seite 332 finden Sie Einzelheiten über GNSS.

Andere Systeme

Die für Funkgerätebenutzer verfügbaren Funktionen in diesem System werden in diesem Kapitel beschrieben.

7.1

Sendetaste (PTT)

Die Sendetaste **(PTT)** dient zwei grundlegenden Zwecken:

- Während eines Anrufs wird durch Betätigung der **Sendetaste (PTT)** mit anderen am Anruf beteiligten Funkgeräten kommuniziert. Wenn die **Sendetaste (PTT)** gedrückt wird, wird das Mikrofon aktiviert.
- Wird gerade kein Ruf getätigt, wird die **Sendetaste (PTT)** zur Durchführung eines neuen Rufs verwendet .

Drücken Sie lange die **Sendetaste (PTT)**, um zu sprechen. Lassen Sie die **PTT**-Taste los, um den Gesprächspartner zu hören.

Wenn der Gesprächsgenehmigungston aktiviert ist, warten Sie, bis dieser kurze Signalton verstummt, bevor Sie mit dem Sprechen beginnen.

7.2

programmierbare Tasten

Abhängig von der Dauer eines Tastendrucks kann Ihr Händler die programmierbaren Tasten als Verknüpfungen mit Funkgerätfunktionen programmieren.

Kurz drücken
Drücken und schnell wieder loslassen.

Lang drücken
Für die programmierte Zeit gedrückt halten.

HINWEIS:
Unter Notruf auf Seite 429 finden Sie weitere Informationen über die vorprogrammierte Tastendruckdauer der **Notruf**-Taste.

7.2.1

Zuweisbare Funkgerätfunktionen

Die folgenden Funktionen können den programmierbaren Tasten zugewiesen werden.

Audioprofile
Ermöglicht dem Benutzer das Auswählen des gewünschten Audio-Profils.

Audio umschalten
Schaltet die Audioweiterleitung zwischen dem eingebauten Lautsprecher des Funkgeräts und dem Lautsprecher des kabelgebundenen Zubehörs ein/aus.

Bluetooth® Audio-Schalter
Schaltet die Audioausgabe zwischen dem internen Funkgerätlautsprecher und einem externen Bluetooth-fähigen Zubehör um.

Bluetooth verbinden
Sucht nach Bluetooth-Geräten und stellt die Verbindung her.

Bluetooth trennen
Beendet alle vorhandenen Bluetooth-Verbindungen zwischen Funkgerät und Bluetooth-fähigen Geräten.

Bluetooth-Erkennung
Ermöglicht es Ihrem Funkgerät, in den erkennbaren Bluetooth-Modus versetzt werden zu können.

Rufhinweis
Bietet direkten Zugriff auf die Kontaktliste. Sie können dann einen Kontakt auswählen, an den ein Rufhinweis gesendet werden kann.

Rufweiterleitung
Schaltet die Rufweiterleitung ein oder aus.

Anrufprotokoll
Wählt die Rufprotokollliste aus.

Kanalankündigung
Sprachansage von Zonen- und Kanalnachrichten für den aktuellen Kanal.

Kontakte
Bietet direkten Zugriff auf die Kontaktliste.

Emergency
Je nach Programmierung wird ein Notruf eingeleitet oder abgebrochen.

Innenbereich
Schaltet die Innenbereichs-Funktion ein oder aus.

Intelligentes Audio
Schaltet Intelligentes Audio ein-/aus.

Manuelles Funkstation-Roaming[6]
Startet die manuelle Standortsuche.

Mic AGC
Schaltet die automatische Verstärkungsregelung (AGC) des eingebauten Mikrofons ein bzw. aus.

[6] In Capacity Plus nicht verfügbar.

Monitor (Überwachung)
Überwacht einen gewählten Kanal auf Aktivität.

Benachrichtigungen
Für direkten Zugriff auf die Benachrichtigungsliste.

Störkanäle löschen[6]
Entfernt einen unerwünschten Kanal (mit Ausnahme des gewählten Kanals) vorübergehend aus der Scan-Liste. Mit dem gewählten Kanal ist die gewählte Zonen- oder Kanal-Kombination des Benutzers gemeint, von der aus der Scanvorgang gestartet wird.

Eintastenzugang
Leitet einen vordefinierten Einzel-, Telefon- oder Gruppenruf, einen Rufhinweis, eine Quick Text-Nachricht oder „Zurück auf Startkanal“ direkt ein.

Optionskartenfunktion
Schaltet Optionskartenfunktion(en) für Kanäle mit aktivierter Optionskarte ein oder aus.

Dauerüberwachung[6]
Überwacht einen gewählten Kanal auf sämtlichen Funkverkehr, bis die Funktion deaktiviert wird.

Telefon
Für den direkten Zugriff auf die Telefonkontaktliste.

Privacy
Schaltet die Verschlüsselung ein oder aus.

Aliasname und ID des Funkgeräts
Bietet den Aliasnamen und die ID des Funkgeräts

Funkgerät-Check
Stellt fest, ob das Funkgerät in einem System aktiv ist.

Funkgerät aktivieren
Ermöglicht die Fernaktivierung eines Zielfunkgeräts.

Funkgerät deaktivieren
Ermöglicht die Ferndeaktivierung eines Zielfunkgeräts.

Fernüberwachung
Schaltet das Mikrofon eines Zielfunkgeräts ein, ohne dies anzuzeigen.

Repeater/Repeater umgehen[6]
Zum Umschalten zwischen Einsatz eines Repeaters und direkter Übertragung an ein anderes Funkgerät.

Home-Kanalerinnerung stummschalten
Schaltet die Home-Kanalerinnerung stumm.

Scan[7]
Schaltet Scan ein oder aus.

[7] In Capacity Plus - Einzelstandort nicht verfügbar.

Standortinformationen
Zeigt den aktuellen Standortnamen und die ID des Capacity Plus-Mehrfachstandorts an.

Kanal-Ansage von Standort-Sprachnachrichten für den aktuellen Standort, wenn diese Funktion aktiviert ist.

Funkstationsperre[6]
Wenn diese Option aktiviert ist, sucht das Funkgerät nur den aktuellen Standort. Ist diese Option deaktiviert, sucht das Funkgerät neben dem aktuellen Standort auch nach anderen Standorten.

Status
Wählt das Statuslistenmenü aus.

Telemetriesteuerung
Steuert den Ausgabe-Pin eines lokalen oder entfernten Funkgeräts.

Textnachricht
Wählt das Textnachrichtenmenü aus.

Rufunterbrechungstaste
Unterbricht einen laufenden unterbrechbaren Ruf, um den Kanal freizumachen.

Vibrant-Verbesserung
Schaltet die Funktion „Vibrant-Verb.“ ein oder aus.

Sprachankündigung ein/aus
Schaltet die Sprachansage ein/aus.

Sprachgesteuerte Übertragung (VOX)
Schaltet VOX ein oder aus.

WLAN
Schaltet WLAN ein oder aus.

Zonenauswahl
Ermöglicht das Auswählen einer Zone aus einer Zonenliste.

7.2.2
Zuweisbare Einstellungen oder Einstellungsfunktionen

Die folgenden Einstellungen des Funkgeräts oder Dienstprogrammfunktionen können den programmierbaren Tasten zugewiesen werden.

Tones/Alerts
Schaltet alle Töne und Warnungen ein und aus.

Hintergrundbeleuchtung
Schaltet die Hintergrundbeleuchtung des Displays ein bzw. aus.

Beleuchtungshelligkeit
Passt die Helligkeit an.

Leistung
Schaltet den Sendeleistungspegel zwischen hoch und niedrig um.

7.2.3

Aufrufen von programmierten Funktionen

Führen Sie die Vorgehensweise zum Aufrufen von programmierten Funktionen auf Ihrem Funkgerät durch.

1 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie die vorprogrammierte Taste. Lesen Sie weiter unter Schritt 3.
- Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis zur Menüfunktion, und drücken Sie OK zur Auswahl einer Funktion oder zum Aufrufen eines Untermenüs.

3 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie ↩, um zum vorangehenden Bildschirm zurückzukehren.
- Drücken Sie ↩ lang, um zum Startbildschirm zurückzukehren.

Das Funkgerät verlässt ein Menü nach einer bestimmten Zeit automatisch und kehrt zum Startbildschirm zurück.

7.3

Statusanzeigen

Dieses Kapitel erläutert die im Funkgerät verwendeten Statusanzeigen und Tonsignale.

7.3.1

Symbole

Im Display des Funkgeräts werden der Funkgerätestatus, Texteingaben und Menüeingaben angezeigt. Die folgenden Symbole werden auf dem Funkgerätdisplay angezeigt.

Tabelle 8: Anzeigesymbole

Die folgenden Symbole werden in der Statusleiste am oberen Rand des Displays angezeigt. Die Symbole sind von links ausgehend in der Reihenfolge ihres Erscheinens oder ihrer Nutzung angeordnet und sie sind kanalspezifisch.

	Akku Die Anzahl der Balken (0 bis 4) zeigt die verfügbare Ladekapazität an. Das Symbol blinkt, wenn der Akkustand niedrig ist.
	Bluetooth angeschlossen Die Bluetooth-Funktion ist aktiviert. Das Symbol leuchtet konstant, wenn ein abgesetztes Bluetooth-Gerät angeschlossen ist.

Tabelle wird fortgesetzt…

	Bluetooth nicht angeschlossen Die Bluetooth-Funktion ist aktiviert, es besteht aber keine Verbindung zu einem Remote-Bluetooth-Gerät.
	Anrufprotokoll Rufprotokoll des Funkgeräts.
	Kontakt Funkgerätkontakt verfügbar.
	Emergency Das Funkgerät befindet sich im Notruf-Modus.
	Flexible Empfangen-Liste Flexible Empfangen-Liste ist aktiviert.
	GNSS verfügbar Die GNSS-Funktion ist aktiviert. Das Symbol leuchtet, wenn eine Positionsfestlegung verfügbar ist.

Tabelle wird fortgesetzt…

	GNSS nicht verfügbar Die GNSS-Funktion ist aktiviert, aber es werden keine Satellitendaten empfangen.
	Große Datenmengen Das Funkgerät empfängt große Datenmengen, und der Kanal ist belegt.
	Die Funktion „Innenbereich“ ist verfügbar[8] Der Status für die Funktion „Innenbereich“ ist eingeschaltet und verfügbar.
	Die Funktion „Innenbereich“ ist nicht verfügbar[8] Der Status für die Funktion „Innenbereich“ ist eingeschaltet aber aufgrund von ausgeschaltetem Bluetooth oder von einem Bakensignal-Scan, der durch Bluetooth ausgesetzt wurde, nicht verfügbar.

Tabelle wird fortgesetzt…

	Nachricht Eingehende Nachricht.
	Monitor (Überwachung) Der gewählte Kanal wird überwacht.
	Stummschaltmodus Stummschalt-Modus ist aktiviert und Lautsprecher ist stumm geschaltet.
	Benachrichtigungen Die Benachrichtigungsliste enthält ein oder mehrere verpasste Ereignisse.
	Optionskarte Die Zusatzkarte ist aktiviert. (Nur für Modelle, für die die Nutzung einer Zusatzkarte aktiviert ist)
	Zusatzkarte aus Die Zusatzkarte ist deaktiviert.

Tabelle wird fortgesetzt…

[8] Nur verfügbar für Modelle mit neuester Software und Hardware.

5	**Verzögerungs-Timer bei der Over-The-Air-Programmierung (OTAP)** Gibt die verbleibende Zeit bis zum automatischen Neustart des Funkgeräts an.
L oder H	**Leistung** Das Funkgerät ist auf niedrige oder auf hohe Leistung eingestellt.
	Anzeige der Empfangssignalstärke (RSSI) Die Anzahl der Balken zeigt die Signalstärke an. Vier Balken bedeuten, dass das Signal ausgezeichnet ist. Dieses Symbol wird nur während des Empfangs angezeigt.
	Antwortsperre Antwortsperre ist aktiviert.

Tabelle wird fortgesetzt…

	Nur Rufton Rufton-Modus ist aktiviert.
	Scan[9] Die Scan-Funktion ist aktiviert.
	Scan - Priorität 1[9] Das Funkgerät erfasst Aktivität auf dem Kanal/bei der Gruppe, der/die auf Priorität 1 eingestellt ist.
	Scan - Priorität 2[9] Das Funkgerät erfasst Aktivität auf dem Kanal/bei der Gruppe, der/die auf Priorität 2 eingestellt ist.
	Sicher Die Verschlüsselungsfunktion ist aktiviert.
	Stiller Klingelton Stiller Klingelton ist aktiviert.

Tabelle wird fortgesetzt…

[9] In Capacity Plus nicht verfügbar.

	Standort-Roaming[10] Die Roaming-Funktion ist aktiviert.
	[9]**Repeater umgehen** Da kein Repeater vorhanden ist, ist das Funkgerät derzeit auf direkte Funkgerät-zu-Funkgerät-Kommunikation konfiguriert.
	Ton-Deaktivierung Töne sind abgestellt.
	Ungesichert Die Verschlüsselungsfunktion ist deaktiviert.
	Vibrieren Vibrationsmodus ist aktiviert.
	Vibrieren und Klingelton Vibrations- und Klingelton-Modus ist aktiviert.

Tabelle wird fortgesetzt…

	Auswahlverfahren nach Signalgüte (Vote-Scan) Das Auswahlverfahren nach Signalgüte (Vote-Scan) ist aktiviert.
	WLAN ausgezeichnet[11] WLAN-Signal ist ausgezeichnet.
	WLAN gut[11] WLAN-Signal ist gut.
	WLAN durchschnittlich[11] WLAN-Signal ist durchschnittlich.
	WLAN schlecht[11] WLAN-Signal ist schlecht.
	WLAN nicht verfügbar[11] WLAN-Signal ist nicht verfügbar.

[10] In Capacity Plus - Einzelstandort nicht verfügbar
[11] Gilt nur für DP4601e

Tabelle 9: Erweiterte Menüsymbole

Die folgenden Symbole tauchen neben Menüpunkten mit zwei Optionen oder als Anzeige dafür auf, dass es ein Untermenü mit zwei Optionen gibt.

	Kontrollkästchen (markiert) Zeigt an, dass die Option ausgewählt wurde.
	Kontrollkästchen (leer) Zeigt an, dass die Option nicht ausgewählt wurde.
	Schwarzes Kästchen Zeigt die für den Menüpunkt mit einem Untermenü gewählte Option an.

Tabelle 10: Bluetooth-Symbole

Die folgenden Symbole werden neben den Einträgen in der Liste der verfügbaren Bluetooth-fähigen Geräte angezeigt und geben den Gerätetyp an.

	Bluetooth-Audiogerät Bluetooth-fähiges Audiogerät wie z. B. ein Kopfhörer.
	Bluetooth-Datengerät Bluetooth-fähiges Datengerät wie z. B. ein Scanner.
	Bluetooth-PTT-Gerät Bluetooth-fähiges PTT-Gerät wie z. B. ein POD-Gerät (nur PTT/ Sendetaste).

Tabelle 11: Rufsymbole

Die folgenden Symbole werden während eines Anrufs im Display angezeigt. Diese Symbole erscheinen auch in der Kontaktliste zur Anzeige des Alias- oder ID-Typs.

	Bluetooth-PC-Ruf Ein Bluetooth-PC-Ruf wird gerade getätigt. In der Kontaktliste weist das Symbol auf den Aliasnamen (Namen) bzw. die

Tabelle wird fortgesetzt…

	ID (Nummer) eines Bluetooth-PC-Rufs hin.
	Zentralruf Der Kontakttyp „Zentralruf“ dient zum Senden einer Textnachricht an einen Dispatcher-PC über den Textnachrichten-Server eines Drittanbieters.
	Gruppenruf/Sammelruf Ein Gruppenruf oder Sammelruf wird gerade getätigt. In der Kontaktliste weist das Symbol auf den Aliasnamen (Namen) bzw. die ID (Nummer) einer Gruppe hin.
	Einzelruf ohne IP eines Peripheriegeräts Zeigt an, dass ein Einzelruf ohne IP eines Peripheriegeräts ausgeführt wird. In der Kontaktliste weist das Symbol auf den Aliasnamen bzw. die ID (Nummer) eines Funkgeräts hin.

Tabelle wird fortgesetzt…

	Gruppenruf ohne IP eines Peripheriegeräts Zeigt an, dass ein Gruppenruf ohne IP eines Peripheriegeräts ausgeführt wird. In der Kontaktliste weist das Symbol auf den Aliasnamen (Namen) bzw. die ID (Nummer) einer Gruppe hin.
	Einzelruf mit Zusatzkarte Zeigt an, dass ein Einzelruf mit Zusatzkarte ausgeführt wird. In der Kontaktliste weist das Symbol auf den Aliasnamen bzw. die ID (Nummer) eines Funkgeräts hin.
	Gruppenruf mit Zusatzkarte Zeigt an, dass ein Gruppenruf mit Zusatzkarte ausgeführt wird. In der Kontaktliste weist das Symbol auf den Aliasnamen (Namen) bzw. die ID (Nummer) einer Gruppe hin.

Tabelle wird fortgesetzt…

	Telefonruf als Gruppen-/Sammelruf Ein Telefonanruf als Gruppenruf oder Sammelruf wird gerade getätigt. In der Kontaktliste weist das Symbol auf den Aliasnamen (Namen) bzw. die ID (Nummer) einer Gruppe hin.
	Telefonanruf als Einzelruf Ein Anruf wird gerade als Einzelruf getätigt. In der Kontaktliste weist das Symbol auf den Aliasnamen (Namen) bzw. die ID (Nummer) eines Telefons hin.
	Einzelruf Ein Einzelruf wird gerade getätigt. In der Kontaktliste weist das Symbol auf den Aliasnamen bzw. die ID (Nummer) eines Funkgeräts hin.

Tabelle 12: Kurzhinweissymbole

Die folgenden Symbole tauchen jeweils kurz im Display auf, nachdem eine Aktion zur Durchführung einer Aufgabe ausgeführt wurde.

	Übertragung erfolglos (negativ) Gescheiterte Durchführung der Aktion.
	Übertragung erfolgreich (positiv) Erfolgreiche Durchführung der Aktion.
	Übertragung läuft (Zwischenstand) Beim Senden. Dies wird vor der Anzeige der erfolgreichen bzw. gescheiterten Übertragung angezeigt.

Tabelle 13: Symbole für gesendete Objekte

Die folgenden Symbole werden in der oberen rechten Ecke des Displays im Ordner „Ausgang“ angezeigt:

oder	**Wird ausgeführt** Die Textnachricht an den Funkgeräte-Alias oder die ID eines Funkgeräts wurde noch nicht übertragen, da noch auf eine Quittierung gewartet wird. Die Textnachricht an einen Gruppen-

Tabelle wird fortgesetzt…

	Aliasname oder an eine Gruppen-ID wurde noch nicht übertragen.
oder	**Einzel- oder Gruppennachricht gelesen** Die Textnachricht wurde gelesen.
oder	**Einzel- oder Gruppennachricht ungelesen** Die Textnachricht wurde nicht gelesen.
oder	**Fehler beim Senden** Die Textnachricht kann nicht gesendet werden.
oder	**Erfolgreich gesendet** Die Nachricht wurde erfolgreich gesendet.

7.3.2

LED-Anzeigen

Die LED-Anzeigen zeigen den Betriebszustand/Status Ihres Funkgeräts an.

Blinkt rot

Das Funkgerät weist darauf hin, dass der Akku nicht übereinstimmt.

Selbsttest beim Einschalten des Funkgeräts ist fehlgeschlagen.

Das Funkgerät empfängt einen Notruf.

Das Funkgerät sendet bei niedrigem Akkustand.

Das Funkgerät befindet sich außerhalb der Reichweite, wenn das Auto-Range Transponder-System konfiguriert wurde.

Stummschalt-Modus ist aktiviert.

Grünes Dauerlicht

Das Funkgerät wird gerade eingeschaltet.

Funkgerät sendet Daten.

Das Funkgerät sendet einen Rufhinweis oder einen Notruf.

Blinkt grün

Das Funkgerät empfängt einen Ruf oder Daten.

Das Funkgerät fragt Übertragungen mittels Over-the-Air Programmierung ab.

Das Funkgerät erkennt Funkaktivität.

HINWEIS:
Diese Aktivität kann sich je nach Art des digitalen Protokolls auf den programmierten Kanal des Funkgeräts auswirken.

Es liegt keine LED-Anzeige vor, wenn das Funkgerät Funkaktivität in Capacity Plus erkennt.

Doppeltes grünes Blinken
Das Funkgerät empfängt einen Ruf oder Daten mit aktivierter Verschlüsselung.

Gelbes Dauerlicht
Das Funkgerät überwacht einen Betriebsfunkkanal.

Blinkt gelb
Das Funkgerät sucht nach Aktivität.

Das Funkgerät muss noch auf einen Rufhinweis antworten.

Alle Capacity Plus-Multi-Site-Kanäle sind belegt.

Doppeltes gelbes Blinken
Auf dem Funkgerät ist automatisches Roaming aktiviert.

Das Funkgerät sucht aktiv nach einem neuen Standort.

Das Funkgerät muss noch auf einen Gruppenruf-Hinweis antworten.

Das Funkgerät ist gesperrt.

Das Funkgerät ist im Capacity Plus-Modus nicht mit dem Repeater verbunden.

Alle Capacity Plus-Kanäle sind belegt.

7.3.3
Tones

Die folgenden Symbole werden über den Lautsprecher des Funkgeräts ausgegeben.

□
Hoher Ton

■
Tiefer Ton

7.3.3.1

Hinweistöne

Hinweistöne liefern einen akustischen Hinweis auf den Status, nachdem eine Aktion zum Durchführen einer Aufgabe ausgeführt wurde.

Positiver Hinweiston

Negativer Hinweiston

7.3.3.2

Töne

Hinweistöne sind hörbare Anzeigen zum Funkgerätestatus oder der Reaktion des Funkgeräts auf empfangene Daten.

Dauerton

Gleichmäßiger Ton. Wird ununterbrochen bis zum Beenden abgespielt.

Periodischer Ton

Wird periodisch je nach der über das Funkgerät konfigurierten Tonlänge abgespielt. Der Ton beginnt, stoppt und wiederholt sich.

Wiederholter Ton

Ein einzelner Ton, der sich wiederholt, bis der Benutzer ihn abschaltet.

Kurzton

Ertönt einmal für eine für das Funkgerät festgelegte Dauer.

7.4

Zonen- und Kanalwahl

In diesem Kapitel wird die Vorgehensweise zum Auswählen einer Zone oder eines Kanals auf Ihrem Funkgerät beschrieben. Eine Zone ist eine Gruppe von Kanälen.

Ihr Funkgerät unterstützt bis zu 1000 Kanäle und 250 Zonen mit maximal 160 Kanälen pro Zone.

Jeder Kanal kann für verschiedene Funktionen und/oder zur Unterstützung unterschiedlicher Gruppen von Benutzern programmiert werden.

7.4.1

Auswählen von Zonen

Führen Sie die Vorgehensweise zum Auswählen der gewünschten Zone auf Ihrem Funkgerät durch.

1 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie die programmierte Taste **Zonenauswahl**. Lesen Sie weiter unter Schritt 3.
- Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Zone`. Drücken Sie OK, um die Option auszuwählen.

Auf dem Display werden ✓ und die aktuelle Zone angezeigt.

3 Drücken Sie ▲ oder ▼ bis zur gewünschten Zone. Drücken Sie OK, um die Option auszuwählen.

Das Display zeigt kurz `<Zone> gewählt` an und wechselt dann zum Bildschirm der gewählten Zone.

7.4.2

Auswählen von Kanälen

Führen Sie die Vorgehensweise zum Auswählen des gewünschten Kanals auf Ihrem Funkgerät durch, nachdem Sie eine Zone ausgewählt haben.

Drehen Sie den **Kanalwahlschalter**, um den Kanal, die Funkgeräte-ID oder die Gruppen-ID auszuwählen.

7.5

Rufe

In diesem Kapitel wird erklärt, wie Rufe empfangen, beantwortet, getätigt oder abgebrochen werden.

Sie können einen Funkgerät-Alias oder eine Funkgerät-ID bzw. einen Gruppen-Alias oder eine Gruppen-ID wählen, nachdem Sie einen Kanal mithilfe einer der folgenden Funktionen ausgewählt haben:

Alias-Suche

Diese Methode wird für Gruppenrufe, Einzelrufe und Sammelrufe nur mit einem Tastenfeldmikrofon verwendet.

Kontaktliste

Diese Methode bietet direkten Zugriff auf die Kontaktliste.

Manuell wählen (über „Kontakte“)

Diese Methode wird für Einzelrufe und Telefonrufe nur mit einem Tastenfeldmikrofon verwendet.

Programmierte Zifferntasten

Diese Methode wird für Gruppenrufe, Einzelrufe und Sammelrufe nur mit einem Tastenfeldmikrofon verwendet.

HINWEIS:
Einer Zifferntaste kann jeweils nur ein Aliasname bzw. eine ID zugewiesen werden, Sie können aber einem Aliasnamen bzw. einer ID mehr als eine Zifferntaste zuweisen. Es können alle Zifferntasten auf einem Tastenfeldmikrofon zugewiesen werden. Weitere Informationen finden Sie unter Zuweisen von Einträgen zu programmierbaren Zifferntasten auf Seite 410.

Programmierte Schnellwahltaste

Diese Methode wird nur für Gruppen-, Einzel- und Telefonrufe verwendet.

Sie können einer **Eintastenzugang**-Taste durch kurzes oder langes Drücken einer programmierbaren Taste nur eine ID zuweisen. Am Funkgerät können mehrere **Schnellwahltasten** programmiert sein.

Programmierbare Taste

Diese Methode wird nur für Telefonrufe verwendet.

7.5.1
Gruppenanrufe

Ihr Funkgerät muss als Teil einer Gruppe konfiguriert sein, um einen Ruf von einer Gruppe zu empfangen oder an eine Gruppe von Benutzern zu senden.

7.5.1.1

Tätigen von Gruppenrufen

Führen Sie die Vorgehensweise zum Tätigen von Gruppenrufen auf Ihrem Funkgerät durch.

1 Führen Sie einen der folgenden Schritte aus:

- Wählen Sie einen Kanal mit dem aktiven Gruppen-Alias oder der aktiven Gruppen-ID.
- Drücken Sie die vorprogrammierte **Schnellwahltaste**.

2 Drücken Sie zum Durchführen des Rufs die **Sendetaste (PTT)**.

Die grüne LED leuchtet. Auf dem Display werden das **Gruppenrufsymbol** und der Gruppenruf-Aliasname angezeigt.

3 Führen Sie einen der folgenden Schritte aus:

- Warten Sie, bis der Freiton verklungen ist, und sprechen Sie deutlich in das Mikrofon.
- Warten Sie, bis der **PTT**-Mithörton verstummt, und sprechen Sie dann deutlich in das Mikrofon.

4 Lassen Sie die **PTT**-Taste los, um den Gesprächspartner zu hören.

Die grüne LED leuchtet, wenn das Zielfunkgerät antwortet. Im Display werden das **Gruppenruf**-Symbol, der Gruppenalias oder die -ID und der Alias oder die ID des sendenden Funkgeräts angezeigt.

5 Ist die Funktion „Kanal frei-Anzeige“ aktiviert, hören Sie einen kurzen Hinweiston, sobald die **Sendetaste (PTT)** am sendenden Funkgerät freigegeben wird, der Ihnen mitteilt, dass Sie nun auf diesem Kanal antworten können. Drücken Sie zum Beantworten des Anrufs die **Sendetaste** (PTT).

Der Anruf wird beendet, wenn es keine Sprachaktivität für einen festgelegten Zeitraum gibt. Das Funkgerät wechselt zu dem Bildschirm, auf dem Sie vor der Rufeinleitung waren.

7.5.1.2

Tätigen von Gruppenrufen mithilfe der Kontaktliste

Führen Sie die Vorgehensweise zum Tätigen von Gruppenrufen mithilfe der Kontaktliste auf Ihrem Funkgerät durch.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis Kontakte.Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis zum gewünschten Aliasnamen oder zur gewünschten ID.Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie zum Durchführen des Rufs die **Sendetaste (PTT)**.

Die grüne LED leuchtet.

5 Führen Sie einen der folgenden Schritte aus:

- Warten Sie, bis der Freiton verklungen ist, und sprechen Sie deutlich in das Mikrofon.
- Warten Sie, bis der **PTT**-Mithörton verstummt, und sprechen Sie dann deutlich in das Mikrofon.

6 Lassen Sie die **PTT**-Taste los, um den Gesprächspartner zu hören.

Die grüne LED leuchtet, wenn das Zielfunkgerät antwortet.Im Display werden das **Gruppenruf**-Symbol und ein Aliasname oder eine ID und der Aliasname oder die ID des sendenden Funkgeräts angezeigt.

7 Ist die Funktion „Kanal frei-Anzeige“ aktiviert, hören Sie einen kurzen Hinweiston, sobald die **Sendetaste (PTT)** am sendenden Funkgerät freigegeben wird, der Ihnen mitteilt, dass Sie nun auf diesem Kanal antworten können.Drücken Sie zum Beantworten des Anrufs die **Sendetaste** (PTT).

Der Anruf wird beendet, wenn es keine Sprachaktivität für einen festgelegten Zeitraum gibt.

7.5.1.3

Antworten auf Gruppenrufe

Ein Gruppenruf kann nur empfangen werden, wenn Ihr Funkgerät als Mitglied dieser Gruppe konfiguriert ist. Führen Sie die Vorgehensweise zum Antworten auf Gruppenrufe auf Ihrem Funkgerät durch.

Wenn Sie einen Gruppenruf empfangen:

- Die grüne LED blinkt.
- Auf dem Display wird das Symbol **Gruppenruf** in der oberen rechten Ecke angezeigt.
- In der ersten Textzeile wird der Aliasname des Anrufenden angezeigt.
- In der zweiten Textzeile wird der Gruppen-Aliasname angezeigt.
- Die Stummschaltung Ihres Funkgeräts wird aufgehoben, und der ankommende Anruf ist über den Lautsprecher zu hören.

1 Führen Sie einen der folgenden Schritte aus:

- Ist die Funktion „Kanal frei-Anzeige“ aktiviert, hören Sie einen kurzen Hinweiston, sobald die **Sendetaste (PTT)** am sendenden Funkgerät freigegeben wird, der Ihnen mitteilt, dass Sie nun auf diesem Kanal antworten können.Drücken Sie zum Beantworten des Anrufs die **Sendetaste** (PTT).
- Wenn die Sprachunterbrechungsfunktion aktiviert ist, drücken Sie die **Sendetaste (PTT)**, um den Ton des sendenden Funkgeräts zu unterbrechen und den Kanal freizumachen, damit Sie antworten können.

Die grüne LED leuchtet.

2 Führen Sie einen der folgenden Schritte aus:

- Warten Sie, bis der Freiton verklungen ist, und sprechen Sie deutlich in das Mikrofon.
- Warten Sie, bis der **PTT**-Mithörton verstummt, und sprechen Sie dann deutlich in das Mikrofon.

3 Lassen Sie die **PTT**-Taste los, um den Gesprächspartner zu hören.

Der Anruf wird beendet, wenn es keine Sprachaktivität für einen festgelegten Zeitraum gibt.

Wenn das Funkgerät einen Gruppenruf empfängt, während der Startbildschirm nicht angezeigt wird, wird der aktuelle

Bildschirm weiterhin angezeigt, bevor der Anruf beantwortet wird.

Halten Sie die Taste gedrückt, um zum Startbildschirm zurückzukehren und den Anrufer-Alias anzuzeigen, bevor Sie den Anruf beantworten.

7.5.2

Einzelrufe

Ein Einzelruf ist ein Anruf von einem einzelnen Funkgerät an ein anderes einzelnes Funkgerät.

Es gibt zwei Möglichkeiten, einen Einzelruf einzurichten. Der erste Typ baut den Ruf nach dem Durchführen einer Verfügbarkeitsprüfung auf und der zweite Typ baut den Ruf sofort auf. Ihr Händler hat nur einen dieser Typen in Ihr Funkgerät einprogrammiert.

Wenn Ihr Funkgerät so programmiert ist, dass es vor dem Aufbau eines Einzelrufs eine Verfügbarkeitsprüfung durchführt und das Zielgerät nicht verfügbar ist:

- Ein Hinweiston ertönt.
- Im Display wird ein negativer Kurzhinweis angezeigt.
- Das Funkgerät kehrt zum Menü zurück, bevor es die Verfügbarkeitsprüfung durchführt.

Weitere Informationen finden Sie unter Privacy auf Seite 455.

7.5.2.1

Tätigen von Einzelrufen

Ihr Funkgerät muss konfiguriert werden, um einen Einzelruf initiieren zu können. Wenn diese Funktion nicht aktiviert ist und Sie versuchen, einen Ruf einzuleiten, erklingt ein negativer Hinweiston. Führen Sie die Vorgehensweise zum Tätigen von Einzelrufen auf Ihrem Funkgerät durch.

1 Führen Sie einen der folgenden Schritte aus:
   - Wählen Sie einen Kanal mithilfe des aktiven Funkgerät-Alias oder der aktiven Funkgerät-ID.
   - Drücken Sie die vorprogrammierte **Schnellwahltaste**.

2 Drücken Sie zum Durchführen des Rufs die **Sendetaste (PTT)**.

   Die grüne LED leuchtet. Auf dem Display werden das **Einzelruf**-Symbol, der Teilnehmer-Alias und der Anrufstatus angezeigt.

3 Warten Sie, bis der Freiton verklungen ist, und sprechen Sie deutlich in das Mikrofon.

4 Lassen Sie die **PTT**-Taste los, um den Gesprächspartner zu hören.

Die grüne LED blinkt, wenn das Zielfunkgerät antwortet.

5 Ist die Funktion „Kanal frei-Anzeige“ aktiviert, hören Sie einen kurzen Hinweiston, sobald die **Sendetaste (PTT)** am sendenden Funkgerät freigegeben wird, der Ihnen mitteilt, dass Sie nun auf diesem Kanal antworten können.Drücken Sie zum Beantworten des Anrufs die **Sendetaste** (PTT).

Der Anruf wird beendet, wenn es keine Sprachaktivität für einen festgelegten Zeitraum gibt.Ein Hinweiston ertönt.Im Display wird `Ruf beendet` angezeigt.

7.5.2.2

Tätigen von Einzelrufen mithilfe der Kontaktliste

Führen Sie die Vorgehensweise zum Tätigen von Einzelrufen mithilfe der Kontaktliste durch.

1 Drücken Sie OK , um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Kontakte`.Drücken Sie OK , um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis zum gewünschten Aliasnamen oder zur gewünschten ID.Drücken Sie OK , um die Option auszuwählen.

4 Drücken Sie zum Durchführen des Rufs die **Sendetaste (PTT)**.

Wenn Sie die **Sendetaste (PTT)**freigeben, während das Funkgerät den Ruf aufbaut, bricht das Funkgerät

den Aufbau ab und kehrt zum vorhergehenden Bildschirm zurück.

Die grüne LED leuchtet. Im Display wird der Aliasname des Zielfunkgeräts angezeigt.

5 Warten Sie, bis der Freiton verklungen ist, und sprechen Sie deutlich in das Mikrofon.

6 Lassen Sie die **PTT**-Taste los, um den Gesprächspartner zu hören.

Die grüne LED blinkt, wenn das Zielfunkgerät antwortet. Im Display wird der Aliasname oder die ID des sendenden Benutzers angezeigt.

7 Ist die Funktion „Kanal frei-Anzeige“ aktiviert, hören Sie einen kurzen Hinweiston, sobald die **Sendetaste (PTT)** am sendenden Funkgerät freigegeben wird, der Ihnen mitteilt, dass Sie nun auf diesem Kanal antworten können. Drücken Sie zum Beantworten des Anrufs die **Sendetaste** (PTT).

Der Anruf wird beendet, wenn es keine Sprachaktivität für einen festgelegten Zeitraum gibt.Ein Hinweiston ertönt.Im Display wird `Ruf beendet` angezeigt.

7.5.2.3

Antworten auf Einzelrufe

Führen Sie die Vorgehensweise zum Antworten auf Einzelrufe auf Ihrem Funkgerät durch.

Wenn Sie einen Einzelruf empfangen, geschieht Folgendes:

- Die grüne LED blinkt.
- Das **Einzelrufsymbol** wird in der rechten oberen Ecke angezeigt.
- In der ersten Textzeile wird der Aliasname des Anrufenden angezeigt.
- Die Stummschaltung Ihres Funkgeräts wird aufgehoben, und der ankommende Anruf ist über den Lautsprecher zu hören.

1 Führen Sie einen der folgenden Schritte aus:

- Ist die Funktion „Kanal frei-Anzeige“ aktiviert, hören Sie einen kurzen Hinweiston, sobald die **Sendetaste (PTT)** am sendenden Funkgerät freigegeben wird, der Ihnen mitteilt, dass Sie nun auf diesem Kanal antworten können.Drücken Sie zum Beantworten des Anrufs die **Sendetaste** (PTT).

- Wenn die Rufunterbrechungstaste aktiviert ist, drücken Sie die **Sendetaste (PTT)**, um den laufenden unterbrechbaren Ruf zu unterbrechen und den Kanal freizumachen, damit Sie antworten können.

  Die grüne LED leuchtet.

2 Warten Sie, bis der Freiton verklungen ist, und sprechen Sie deutlich in das Mikrofon.

3 Lassen Sie die **PTT**-Taste los, um den Gesprächspartner zu hören.

  Der Anruf wird beendet, wenn es keine Sprachaktivität für einen festgelegten Zeitraum gibt.Ein Hinweiston ertönt. Im Display wird `Ruf beendet` angezeigt.

7.5.3

Rundumrufe

Ein Sammelruf ist ein Ruf von einem individuellen Funkgerät an alle anderen Funkgeräte auf dem Kanal. Ein Rundumruf wird für wichtige Durchsagen verwendet, die die volle Aufmerksamkeit des Benutzers erfordern. Die Benutzer auf dem Kanal können auf einen Sammelruf nicht antworten.

7.5.3.1

Tätigen von Rundumrufen

Ihr Funkgerät muss konfiguriert werden, um einen Rundumruf tätigen zu können. Führen Sie die Vorgehensweise zum Tätigen von Rundumrufen auf Ihrem Funkgerät durch.

1 Wählen Sie einen Kanal mithilfe des aktiven Rundumruf-Gruppen-Alias oder der aktiven relevanten ID.

2 Drücken Sie zum Durchführen des Rufs die **Sendetaste (PTT)**.

  Die grüne LED leuchtet. Auf dem Display werden das **Gruppenruf**-Symbol und `Sammelruf` angezeigt.

3 Führen Sie einen der folgenden Schritte aus:

- Warten Sie, bis der Freiton verklungen ist, und sprechen Sie deutlich in das Mikrofon.
- Warten Sie, bis der **PTT**-Mithörton verstummt, und sprechen Sie dann deutlich in das Mikrofon.

Benutzer auf dem Kanal können auf einen Sammelruf nicht antworten.

7.5.3.2

Empfangen von Rundumrufen

Wenn Sie einen Rundumruf empfangen, geschieht Folgendes:

- Ein Hinweiston ertönt.
- Die grüne LED blinkt.
- Auf dem Display wird das Symbol **Gruppenruf** in der oberen rechten Ecke angezeigt.
- In der ersten Textzeile wird die ID des Anrufer-Alias angezeigt.
- In der zweiten Zeile wird `Rundumruf` angezeigt.
- Die Stummschaltung Ihres Funkgeräts wird aufgehoben, und der ankommende Anruf ist über den Lautsprecher zu hören.

Das Funkgerät kehrt zu dem Bildschirm zurück, der vor dem Empfangen des Sammelrufs angezeigt wurde, wenn der Ruf beendet wird.

Sammelrufe werden jeweils ohne eine vorbestimmte Wartezeit beendet.

Ist die Funktion „Kanal frei-Anzeige“ aktiviert, hören Sie einen kurzen Hinweiston, sobald die **Sendetaste (PTT)** am sendenden Funkgerät freigegeben wird, der Ihnen mitteilt, dass Sie nun diesen Kanal verwenden können.

Auf einen Sammelruf kann nicht geantwortet werden.

HINWEIS:
Das Funkgerät unterbricht den Empfang eines Sammelrufs, wenn Sie während des Anrufs auf einen anderen Kanal schalten. Während eines Rundumrufs können Menüs nicht durchlaufen oder bearbeitet werden, bis der Ruf endet.

7.5.4

Selektivrufe

Ein Selektivruf ist ein Ruf von einem einzelnen Funkgerät an ein anderes einzelnes Funkgerät. In einem Analogsystem ist dies ein Einzelruf.

7.5.4.1

Tätigen von Selektivrufen

Ihr Funkgerät muss konfiguriert werden, um einen Selektivruf initiieren zu können. Befolgen Sie die

Vorgehensweise zum Tätigen von Selektivrufen auf Ihrem Funkgerät.

1 Wählen Sie einen Kanal mithilfe des aktiven Funkgerät-Alias oder der aktiven Funkgerät-ID.

2 Drücken Sie zum Durchführen des Rufs die **Sendetaste (PTT)**.

Die grüne LED leuchtet. Auf dem Display werden das **Einzelruf**-Symbol, der Teilnehmer-Alias und der Anrufstatus angezeigt.

3 Führen Sie einen der folgenden Schritte aus:

- Warten Sie, bis der Freiton verklungen ist, und sprechen Sie deutlich in das Mikrofon.
- Warten Sie, bis der **PTT**-Mithörton verstummt, und sprechen Sie dann deutlich in das Mikrofon.

4 Lassen Sie die **PTT**-Taste los, um den Gesprächspartner zu hören.

Die grüne LED leuchtet, wenn das Zielfunkgerät antwortet.

5 Ist die Funktion „Kanal frei-Anzeige“ aktiviert, hören Sie einen kurzen Hinweiston, sobald die **Sendetaste (PTT)** am sendenden Funkgerät freigegeben wird, der Ihnen mitteilt, dass Sie nun auf diesem Kanal antworten können.Drücken Sie zum Beantworten des Anrufs die **Sendetaste** (PTT).

Der Anruf wird beendet, wenn es keine Sprachaktivität für einen festgelegten Zeitraum gibt.

6 Im Display wird `Ruf beendet` angezeigt.

7.5.4.2

Antworten auf Selektivrufe

Führen Sie die Vorgehensweise zum Antworten auf Selektivrufe auf Ihrem Funkgerät durch.

Wenn Sie einen Selektivruf empfangen, geschieht Folgendes:

- Die grüne LED blinkt.
- In der ersten Textzeile werden das **Einzelruf**-Symbol und das Anrufer-Alias oder `Selektivruf` oder `Hinweis&Ruf` angezeigt.

- Die Stummschaltung Ihres Funkgeräts wird aufgehoben, und der ankommende Anruf ist über den Lautsprecher zu hören.

1 Drücken Sie zum Beantworten des Anrufs die **Sendetaste** (PTT).

Die grüne LED leuchtet.

2 Warten Sie, bis der Freiton verklungen ist, und sprechen Sie deutlich in das Mikrofon.

3 Lassen Sie die **PTT**-Taste los, um den Gesprächspartner zu hören.

Der Anruf wird beendet, wenn es keine Sprachaktivität für einen festgelegten Zeitraum gibt.Ein Hinweiston ertönt.Im Display wird `Ruf beendet` angezeigt.

7.5.5

Telefonrufe

Ein Telefonruf ist ein Ruf von einem einzelnen Funkgerät an ein anderes Telefon.

Wenn die Telefonanruffunktion in Ihrem Funkgerät nicht aktiviert ist:

- Auf dem Display wird `Nicht verfügb` angezeigt.
- Das Funkgerät schaltet den Ruf stumm.
- Das Funkgerät wechselt zum vorherigen Bildschirm, wenn der Anruf beendet wird.

Während des Telefonrufs versucht Ihr Funkgerät, den Ruf zu beenden, wenn:

- Sie die **Schnellwahl**-Taste mit dem vorkonfigurierten Schlussruf drücken.
- Sie den Schlussruf als zusätzliche Zeichen eingeben.

Während des Zugriffs auf den Kanal und der Übertragung des Zugangscodes bzw. Sperrcodes oder zusätzlicher Zeichen reagiert Ihr Funkgerät nur auf die Taste **An/Aus**, Taste **Lautstärke** und die **Kanalwahltasten bzw. -regler**. Ein Hinweiston erklingt bei jeder ungültigen Eingabe.

Drücken Sie während des Kanalzugriffs , um den Anrufversuch abzulehnen. Ein Hinweiston ertönt.

HINWEIS:
Weitere Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator.

7.5.5.1

Tätigen von Telefonrufen

Führen Sie die Vorgehensweise zum Tätigen von Telefonrufen auf Ihrem Funkgerät durch.

7.5.5.2

Tätigen von Telefonrufen mit der programmierbaren Telefon-Taste

Gehen Sie wie folgt vor, um einen Telefonanruf mit der programmierbaren Telefon-Taste zu tätigen.

1 Drücken Sie die programmierte **Telefon-**Taste, um auf die Liste der Telefoneinträge zuzugreifen.

2 Drücken Sie ▲ oder ▼ bis zum gewünschten Aliasnamen oder zur gewünschten ID.Drücken Sie OK, um die Option auszuwählen.

- Die grüne LED leuchtet. Das **Telefonruf**-Symbol wird in der rechten oberen Ecke angezeigt. In der ersten Textzeile wird der Funkgeräte-Alias angezeigt. In der zweiten Textzeile wird der Rufstatus angezeigt.
- Wenn die Rufeinrichtung erfolgreich war, ertönt der DTMF-Ton. Der Wählton des Telefonbenutzers erklingt. In der ersten Textzeile werden der Aliasname des Funkgeräts angezeigt. Das **Telefonruf**-Symbol wird in der rechten oberen Ecke angezeigt. In der zweiten Textzeile wird der Rufstatus angezeigt.
- War die Anrufeinrichtung nicht erfolgreich, wird ein Ton ausgegeben, und im Display wird `Telefonruf erfolglos` angezeigt. Ihr Funkgerät wechselt zum Eingabebildschirm für die Zugangsnummer. Wenn die Zugangsnummer in der Kontaktliste vorkonfiguriert wurde, wechselt das Funkgerät zu dem Bildschirm, auf dem Sie vor dem Einleiten des Rufs waren.

3 Drücken Sie die **Sendetaste (PTT)**, um zu sprechen. Lassen Sie die **PTT**-Taste los, um den Gesprächspartner zu hören.

4 Drücken Sie zum Beenden des Gesprächs.

- Der DTMF-Ton erklingt, und im Display wird `Telefonruf wird beendet` angezeigt.

- Wenn die Rufbeendigung erfolgreich eingerichtet wurde, erklingt ein Signalton, und im Display wird `Ruf beendet` angezeigt.
- War die Rufbeendigung nicht erfolgreich, kehrt das Funkgerät zum Telefonruf-Bildschirm zurück. Wiederholen Sie Schritt 3 und Schritt 4, oder warten Sie, bis der Telefonbenutzer den Ruf beendet.
- Wenn Sie die **Sendetaste** (PTT) auf dem Telefonkontakte-Bildschirm drücken, erklingt ein Hinweiston`Zum Anrufen OK drücken` angezeigt.
- Wenn der Telefonbenutzer den Ruf beendet, erklingt ein Hinweiston, und im Display wird, und im Display wird `Telefonruf beendet` angezeigt.

HINWEIS:
Drücken Sie während des Zugriffs auf den Kanal , um den Anrufversuch abzubrechen; es wird dann ein Hinweiston ausgegeben.

Wenn Sie während des Rufs bei vorkonfiguriertem Sperrcode den **Eintastenzugang** drücken oder den Sperrcode als zusätzliche Zeichen eingeben, versucht Ihr Funkgerät, den Ruf zu beenden.

7.5.5.3
Dualton-Mehrfrequenzverfahren (DTMF)

Das Dualton-Mehrfrequenzverfahren (DTMF) erlaubt den Betrieb des Funkgeräts in einem Funksystem mit einer Schnittstelle zu Telefonsystemen.

Der DTMF-Ton kann durch Deaktivieren sämtlicher Funkgerät-Hinweistöne ausgeschaltet werden. Weitere Informationen finden Sie unterEin-/Ausschalten der Funkgerät-Hinweistöne auf Seite 194.

7.5.5.3.1

Einleiten von DTMF-Anrufen

Gehen Sie wie folgt vor, um einen DTMF-Ruf auf Ihrem Funkgerät einzuleiten.

1 Halten Sie die **Sendetaste (PTT)** gedrückt.

2 Führen Sie einen der folgenden Schritte aus:

- Geben Sie die gewünschte Nummer zum Einleiten eines DTMF-Anrufs ein.
- Drücken Sie * zum Einleiten eines DTMF-Anrufs.
- Drücken Sie # zum Einleiten eines DTMF-Anrufs.

7.5.5.4

Antworten auf Telefonrufe als Einzelrufe

Führen Sie die Vorgehensweise zum Antworten auf Telefonrufe als Einzelrufe auf Ihrem Funkgerät durch.

Wenn Sie einen Telefonruf als Einzelruf empfangen, geschieht Folgendes:

- Auf dem Display wird das **Telefonruf**-Symbol in der oberen rechten Ecke angezeigt.
- Das Display zeigt den Anrufer-Alias oder `Telefonruf` an.

Wenn die Telefonruffunktion in Ihrem Funkgerät nicht aktiviert ist, wird in der ersten Zeile des Displays `Nicht verfügb` angezeigt, und das Funkgerät schaltet den Anruf stumm. Das Funkgerät wechselt zum vorherigen Bildschirm, wenn der Anruf beendet wird.

1 Drücken Sie zum Beantworten des Anrufs die **Sendetaste** (PTT).Lassen Sie die **PTT**-Taste los, um den Gesprächspartner zu hören.

2 Drücken Sie zum Beenden des Gesprächs.

Im Display wird die Meldung `Ruf beendet` angezeigt.
Wenn der Ruf erfolgreich beendet wurde:

- Ein Hinweiston ertönt.
- Im Display wird `Ruf beendet` angezeigt.

Wenn der Ruf nicht beendet werden kann, wechselt das Funkgerät zum Telefonruf-Bildschirm. Wiederholen Sie diesen Schritt, um den Anruf zu beenden, oder warten Sie, bis der Telefonbenutzer den Anruf beendet.

7.5.5.5

Antworten auf Telefonrufe als Gruppenrufe

Führen Sie die Vorgehensweise zum Antworten auf Telefonrufe als Gruppenrufe auf Ihrem Funkgerät durch.

Wenn Sie einen Telefonruf als Gruppenruf empfangen, geschieht Folgendes:

- Auf dem Display wird das **Telefonruf**-Symbol in der oberen rechten Ecke angezeigt.
- Das Display zeigt den Gruppen-Alias und `Telefonruf` an.

Wenn die Telefonruffunktion in Ihrem Funkgerät nicht aktiviert ist, wird in der ersten Zeile des Displays `Nicht verfügb` angezeigt, und das Funkgerät schaltet den Anruf stumm.

1 Drücken Sie zum Beantworten des Anrufs die **Sendetaste** (PTT).Lassen Sie die **PTT**-Taste los, um den Gesprächspartner zu hören.

2 Drücken Sie zum Beenden des Gesprächs.

Im Display wird die Meldung `Ruf beendet` angezeigt.
Wenn der Ruf erfolgreich beendet wurde:

- Ein Hinweiston ertönt.
- Im Display wird `Ruf beendet` angezeigt.

Wenn der Ruf nicht beendet werden kann, wechselt das Funkgerät zum Telefonruf-Bildschirm. Wiederholen Sie diesen Schritt, um den Anruf zu beenden, oder warten Sie, bis der Telefonbenutzer den Anruf beendet.

7.5.5.6

Antworten auf Telefonrufe als Sammelrufe

Wenn Sie einen Telefonruf als Sammelruf empfangen, können Sie den Telefonruf nur beantworten oder beenden, wenn dem Kanal der Sammelruf-Typ zugewiesen ist. Führen Sie die Vorgehensweise zum Antworten auf Telefonrufe als Sammelrufe auf Ihrem Funkgerät durch.

Wenn Sie einen Telefonruf als Rundumruf empfangen, geschieht Folgendes:

- Auf dem Display wird das **Telefonruf**-Symbol in der oberen rechten Ecke angezeigt.
- Das Display zeigt `Rundumruf` und `Telefonruf` an.

Wenn die Telefonruffunktion in Ihrem Funkgerät nicht aktiviert ist, wird in der ersten Zeile des Displays `Nicht verfügb` angezeigt, und das Funkgerät schaltet den Anruf stumm.

Das Funkgerät wechselt zum vorherigen Bildschirm, wenn der Anruf beendet wird.

1. Drücken Sie zum Beantworten des Anrufs die **Sendetaste** (PTT).
2. Lassen Sie die **PTT**-Taste los, um den Gesprächspartner zu hören.
3. Drücken Sie zum Beenden des Gesprächs.

   Im Display wird die Meldung `Ruf beendet` angezeigt.
   Wenn der Ruf erfolgreich beendet wurde:

   - Ein Hinweiston ertönt.
   - Auf dem Display wird `Sammelruf` und `Ruf beendet` angezeigt.

   Wenn der Ruf nicht beendet werden kann, wechselt das Funkgerät zum Telefonruf-Bildschirm. Wiederholen Sie Schritt 3, oder warten Sie, bis der Telefonbenutzer den Ruf beendet.

7.5.6

Abbrechen von Funkrufen

Mit dieser Funktion können Sie einen laufenden Gruppen- oder Einzelruf abbrechen, um den Kanal für Übertragungen freizugeben. Beispiel: Ein Funkgerät hat ein „blockiertes Mikrofon“, da die **Sprechtaste** versehentlich vom Benutzer

betätigt wurde. Ihr Funkgerät muss für die Nutzung dieser Funktion konfiguriert sein. Befolgen Sie die Vorgehensweise zum Abbrechen von Rufen auf Ihrem Funkgerät.

1 Drücken Sie die programmierte Taste zur **Rufunterbrechung**.

   Im Display wird `Fernschlusst.` angezeigt.

2 Warten Sie auf eine Quittierung.

   Bei erfolgreicher Durchführung:

   - Ein positiver Hinweiston erklingt.
   - Im Display wird `Fernschlusst. erfolg.` angezeigt.

   Bei nicht erfolgreicher Durchführung:

   - Ein negativer Hinweiston erklingt.
   - Im Display wird `Fernschlusst. fehlg.` angezeigt.

HINWEIS:
Weitere Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator.

7.6

Erweiterte Funktionen

In diesem Kapitel wird die Bedienung der Funktionen auf Ihrem Funkgerät beschrieben.

Ihr Händler oder Systemadministrator kann Ihr Funkgerät an Ihre speziellen Anforderungen und Bedürfnisse anpassen. Weitere Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator.

7.6.1

Bluetooth

Mit der Bluetooth-Funktion können Sie Ihr Funkgerät über eine Bluetooth-Verbindung mit einem Bluetooth-fähigen Gerät (Zubehör) verwenden. Ihr Funkgerät unterstützt Bluetooth-Geräte von Motorola Solutions sowie im Handel erhältliche (COTS) Bluetooth-fähige Geräte.

Bluetooth funktioniert innerhalb eines Umkreises von 10 m Sichtverbindung. Die Sichtverbindung ist ein hindernisfreier Weg zwischen Ihrem Funkgerät und Ihrem Bluetooth-fähigen Gerät. Um eine hohe Zuverlässigkeit zu erreichen, empfiehlt Motorola Solutions, das Funkgerät und das Zubehör nicht zu trennen.

Im Randbereich der Reichweite nehmen die Sprach- und Tonqualität stark ab, und die Übertragung hört sich fehlerhaft oder gebrochen an. Um dieses Problem zu beseitigen, verringern Sie die Entfernung zwischen Funkgerät und Bluetooth-fähigem Gerät (innerhalb der maximalen Reichweite von 10 m), um wieder einen klaren Audioempfang zu erhalten. Die Bluetooth-Funktion Ihres Funkgeräts hat in 10 m Reichweite eine maximale Leistung von 2,5 mW (4 dBm).

Ihr Funkgerät unterstützt bis zu drei simultane Bluetooth-Verbindungen mit Bluetooth-fähigen Geräten verschiedener Typen. Zum Beispiel einen Kopfhörer, einen Scanner und ein PTT-Only-Device (POD). Mehrere Verbindungen mit Bluetooth-fähigen Geräten derselben Art werden nicht unterstützt.

Weitere Angaben über die Funktionalität Ihres Bluetooth-fähigen Geräts können Sie der Bedienungsanleitung des jeweiligen Bluetooth-Geräts entnehmen.

Ihr Funkgerät stellt eine Verbindung zum Bluetooth-fähigen Gerät innerhalb der Reichweite her, das entweder die höchste Signalstärke hat oder mit dem bereits zuvor eine Verbindung hergestellt wurde. Während der Gerätesuche und der Kopplung darf weder das Bluetooth-fähige Gerät ausgeschaltet noch die Taste „Start/Zurück“ gedrückt werden, da der laufende Vorgang dadurch abgebrochen wird.

7.6.1.1

Aktivieren und Deaktivieren von Bluetooth

Führen Sie die Vorgehensweise zum Ein- und Ausschalten von Bluetooth durch.

1. Drücken Sie OK, um das Menü aufzurufen.
2. Drücken Sie ▲ oder ▼ bis `Bluetooth`. Drücken Sie OK, um die Option auszuwählen.
3. Drücken Sie ▲ oder ▼ bis `Mein Status`.

   Drücken Sie OK, um die Option auszuwählen.

   Im Display wird `Ein` und `Aus` angezeigt. Der derzeitige Status wird durch ein ✓ angezeigt.
4. Führen Sie einen der folgenden Schritte aus:

- Drücken Sie ▲ oder ▼ bis `Ein`. Drücken Sie OK, um die Option auszuwählen. Im Display wird ✓ neben `Ein` angezeigt.
- Drücken Sie ▲ oder ▼ bis `Aus`. Drücken Sie OK, um die Option auszuwählen. Im Display wird ✓ neben `Aus` angezeigt.

7.6.1.2

Verbinden mit Bluetooth-Geräten

Führen Sie die Vorgehensweise zum Verbinden mit Bluetooth-Geräten durch.

Schalten Sie das Bluetooth-fähige Gerät ein, und versetzen Sie es in den Kopplungsmodus.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Bluetooth`. Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis `Geräte`. Drücken Sie OK, um die Option auszuwählen.

4 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie ▲ oder ▼ bis zum gewünschten Gerät. Drücken Sie OK, um die Option auszuwählen.
- Drücken Sie ▲ oder ▼ bis `Geräte suchen`, um die verfügbaren Geräte zu suchen. Drücken Sie ▲ oder ▼ bis zum gewünschten Gerät. Drücken Sie OK, um die Option auszuwählen.

5 Drücken Sie ▲ oder ▼ bis `Verbinden`. Drücken Sie OK, um die Option auszuwählen.

Es sind möglicherweise zusätzliche Schritte erforderlich, um die Kopplung für Ihr Bluetooth-fähiges Gerät einzurichten. Weitere Informationen

finden Sie im Benutzerhandbuch des Bluetooth-fähigen Geräts.

Im Display wird `Verb.aufbau <Gerät>` angezeigt.

Warten Sie auf eine Quittierung.
Bei erfolgreicher Durchführung:

- Ein positiver Hinweiston erklingt.
- Im Display wird `<Gerät> verbunden` und das Symbol Bluetooth verbunden angezeigt.
- Im Display wird ✓ neben dem verbundenen Gerät angezeigt.

Bei nicht erfolgreicher Durchführung:

- Ein negativer Hinweiston erklingt.
- Im Display wird `Verb.aufbau fehlgeschl` angezeigt.

7.6.1.3
Verbinden mit Bluetooth-Geräten im erkennbaren Bluetooth-Modus

Führen Sie die Vorgehensweise zum Anschließen von Bluetooth-Geräten im Erkennungsmodus durch.

Schalten Sie das Bluetooth-fähige Gerät ein, und versetzen Sie es in den Kopplungsmodus.

1. Drücken Sie OK, um das Menü aufzurufen.
2. Drücken Sie ▲ oder ▼ bis `Bluetooth`. Drücken Sie OK, um die Option auszuwählen.
3. Drücken Sie ▲ oder ▼ bis `Gerätesuche`.

   Drücken Sie OK, um die Option auszuwählen. Ihr Funkgerät kann jetzt von anderen Bluetooth-fähigen Geräten für eine programmierte Dauer gefunden werden. Dies wird als „Erkennbarer Modus“ bezeichnet.

Warten Sie auf eine Quittierung.
Bei erfolgreicher Durchführung:

- Ein positiver Hinweiston erklingt.
- Im Display wird `<Gerät> verbunden` und das Symbol **Bluetooth verbunden** angezeigt.
- Im Display wird ✓ neben dem verbundenen Gerät angezeigt.

Bei nicht erfolgreicher Durchführung:

- Ein negativer Hinweiston erklingt.
- Im Display wird `Verb.aufbau fehlgeschl` angezeigt.

7.6.1.4

Trennen von Bluetooth-Geräten

Führen Sie die Vorgehensweise zum Verbinden von Bluetooth-Geräten durch.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Bluetooth`. Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis `Geräte`. Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis zum gewünschten Gerät. Drücken Sie OK, um die Option auszuwählen.

5 Drücken Sie ▲ oder ▼ bis `Trennen`. Drücken Sie OK, um die Option auszuwählen.

Im Display wird `<Gerät> wird getrennt` angezeigt.

Warten Sie auf eine Quittierung.

- Ein Hinweiston ertönt.
- Das Display zeigt `<Gerät> getrennt` und das Symbol **Bluetooth verbunden** wird ausgeblendet.
- ✓ Wird neben dem verbundenen Gerät nicht mehr angezeigt.

7.6.1.5

Umschalten des Audiosignals zwischen dem eingebauten Lautsprecher des Funkgeräts und dem Bluetooth-Gerät

Führen Sie die Vorgehensweise zum Umschalten der Audioausgabe zwischen dem internen Lautsprecher des Funkgeräts und dem Bluetooth-Gerät durch.

Drücken Sie die programmierte **Bluetooth-Audio-Umschalttaste**.

Im Display wird eines der folgenden Ergebnisse angezeigt:

- Ein Hinweiston ertönt. Das Display zeigt `Audio zu Funkg leiten` an.
- Ein Hinweiston ertönt. Im Display wird `Audio zu BT leiten` angezeigt.

7.6.1.6

Anzeigen von Gerätedetails

Führen Sie die Vorgehensweise zum Anzeigen der Gerätedetails auf Ihrem Funkgerät durch.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Bluetooth`. Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis `Geräte`. Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis zum gewünschten Gerät. Drücken Sie OK, um die Option auszuwählen.

5 Drücken Sie ▲ oder ▼ bis `Details`. Drücken Sie OK, um die Option auszuwählen.

7.6.1.7

Löschen eines Gerätenamens

Sie können ein nicht verbundenes Gerät aus der Liste der Bluetooth-fähigen Geräte entfernen.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Bluetooth`. Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis `Geräte`. Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis zum gewünschten Gerät. Drücken Sie OK, um die Option auszuwählen.

5 Drücken Sie ▲ oder ▼ bis `Löschen`. Drücken Sie OK, um die Option auszuwählen. Im Display wird `Gerät gelöscht` angezeigt.

7.6.1.8

Bluetooth-Mikrofonverstärker

Diese Funktion ermöglicht dem Benutzer die Steuerung der Mikrofonverstärkung des verbundenen Bluetooth-fähigen Geräts.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Bluetooth`. Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis `BT MikVerstärk.` Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis zum Typ des BT-Mikrofonverstärkers und den aktuellen Werten. Drücken Sie OK, um die Option auszuwählen. Sie können die Werte hier bearbeiten.

5 Drücken Sie ▲ oder ▼, um die Werte zu erhöhen oder zu senken. Drücken Sie OK, um die Option auszuwählen.

7.6.1.9

Permanent erkennbarer Bluetooth-Modus

Der permanent erkennbare Bluetooth-Modus muss vom Händler oder Systemadministratoren aktiviert werden.

HINWEIS:
Bei Aktivierung wird `Bluetooth` nicht im Menü angezeigt und Sie können **keine** für Bluetooth programmierbaren Tastenfunktionen verwenden.

Andere Bluetooth-fähige Geräte können den Standort Ihres Funkgeräts erkennen, sich aber nicht mit dem Funkgerät verbinden. Der permanent erkennbare Bluetooth-Modus ermöglicht dedizierten Geräten die Verwendung Ihrer Funkgerätposition zur Verarbeitung von Bluetooth-basierenden Standorten.

7.6.2

Innenbereich

HINWEIS:
Die Innenbereichs-Funktion ist verfügbar für Modelle mit neuester Software und Hardware. Weitere Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator.

„Innenbereich“ kann verwendet werden, um den Standort von Funkgerätbenutzern zu verfolgen. Wenn der Innenbereich aktiviert ist, ist das Funkgerät in einem begrenzt erkennbaren Modus. Dedizierte Bakensignale werden verwendet, um das Funkgerät aufzufinden und seine Position zu bestimmen.

7.6.2.1

Ein- und Ausschalten der Funktion Innenbereich

Sie können durch Ausführen einer der folgenden Aktionen die Funktion Innenbereich ein- oder ausschalten.

- Rufen Sie diese Funktion über das Menü auf.

  a. Drücken Sie OK, um das Menü aufzurufen.

  b. Drücken Sie ▲ oder ▼ bis `Bluetooth` und drücken Sie OK zum Auswählen.

  c. Drücken Sie ▲ oder ▼ `Innenbereich` und drücken Sie OK zum Auswählen.

  d. Drücken Sie OK, um die Funktion Innenbereich zu aktivieren.

  Das Display zeigt `Innenbereich ein` an. Das Gerät gibt einen positiven Hinweiston ab. Eines der folgenden Ereignisse tritt ein.

  - Wenn erfolgreich, wird das Symbol für den verfügbaren Innenbereich auf dem Startbildschirm angezeigt.

- Wenn nicht erfolgreich, wird im Display `Einschalten fehlgeschlagen` angezeigt. Das Gerät gibt einen negativen Hinweiston aus.

e. Drücken Sie OK zum Ausschalten der Funktion „Innenbereich“.

Das Display zeigt `Innenbereich aus` an. Das Gerät gibt einen positiven Hinweiston ab. Eines der folgenden Ereignisse tritt ein.

- Wenn erfolgreich, wird das Symbol für den verfügbaren Innenbereich auf dem Startbildschirm nicht mehr angezeigt.
- Wenn nicht erfolgreich, wird im Display `Ausschalten fehlgeschlagen` angezeigt. Das Gerät gibt einen negativen Hinweiston aus.

- Rufen Sie diese Funktion über die vorprogrammierte Taste auf.

a. Drücken Sie lang auf die vorprogrammierte Taste **Innenbereich**, um die Funktion „Innenbereich“ einzuschalten.

Das Display zeigt `Innenbereich ein` an. Das Gerät gibt einen positiven Hinweiston ab. Eines der folgenden Ereignisse tritt ein.

- Wenn erfolgreich, wird das Symbol für den verfügbaren Innenbereich auf dem Startbildschirm angezeigt.
- Wenn nicht erfolgreich, wird im Display `Einschalten fehlgeschlagen` angezeigt. Wenn nicht erfolgreich, ertönt ein negativer Hinweiston.

b. Drücken Sie die vorprogrammierte Taste **Innenbereich**, um die Funktion „Innenbereich“ auszuschalten.

Das Display zeigt `Innenbereich aus` an. Das Gerät gibt einen positiven Hinweiston ab. Eines der folgenden Ereignisse tritt ein.

- Wenn erfolgreich, wird das Symbol für den verfügbaren Innenbereich auf dem Startbildschirm nicht mehr angezeigt.

- Wenn nicht erfolgreich, wird im Display `Ausschalten fehlgeschlagen` angezeigt. Wenn nicht erfolgreich, ertönt ein negativer Hinweiston.

7.6.2.2

Zugriff auf Informationen eines Standort-Bakensignals in Innenbereichen

Gehen Sie wie folgt vor, um auf Informationen zu Innenbereich-Bakensignalen zuzugreifen.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Bluetooth` und drücken Sie OK zum Auswählen.

3 Drücken Sie ▲ oder ▼ `Innenbereich` und drücken Sie OK zum Auswählen.

4 Drücken Sie ▲ oder ▼ bis `Sender` und drücken Sie OK zum Auswählen.

Im Display werden Bakensignal-Informationen angezeigt.

7.6.3

Multi-Site-Bedienelemente

Diese Funktionen sind anwendbar, wenn Ihr aktueller Funkkanal Teil einer IP Site Connect- oder Capacity Plus – Mehrfachstandort-Konfiguration ist.

7.6.3.1

Starten einer manuellen Stationssuche

Führen Sie die Vorgehensweise zum Starten der manuellen Standortsuche aus, sobald die empfangene Signalstärke schwach ist, um einen Standort mit besserer Signalstärke zu finden.

1 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie die programmierte Taste **Manuelles Standort-Roaming**. Überspringen Sie die folgenden Schritte.

- Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Dienstprogramme`.Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis `Funkgeräteinstellungen`.Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis `Roaming`. Drücken Sie OK, um die Option auszuwählen.

5 Drücken Sie ▲ oder ▼ bis `Aktive Suche`.

Drücken Sie OK, um die Option auszuwählen.

Ein Hinweiston ertönt.Die grüne LED blinkt.Das Display zeigt `Stationssuche` an.

Sobald das Funkgerät einen neuen Standort gefunden hat, passiert Folgendes:

- Ein positiver Hinweiston erklingt.
- Die LED erlischt.
- Im Display wird `Station <Alias> gefunden` angezeigt.

Wenn das Funkgerät keinen neuen Standort gefunden hat, passiert Folgendes:

- Ein negativer Hinweiston erklingt.
- Die LED erlischt.
- Im Display wird `Auss. Reichw.` angezeigt.

Wird eine neue Station innerhalb der Reichweite gefunden, aber das Funkgerät kann keine Verbindung herstellen, passiert Folgendes:

- Ein negativer Hinweiston erklingt.
- Die LED erlischt.
- Im Display wird `Kanal belegt` angezeigt.

7.6.3.2
Funkstation sperren/entsperren

Wenn diese Option aktiviert ist, sucht das Funkgerät nur den aktuellen Standort. Ist diese Option deaktiviert, sucht

das Funkgerät neben dem aktuellen Standort auch nach anderen Standorten.

Drücken Sie die programmierte Taste **Funkstationsperr**e.

Wenn die **Standortsperre** eingeschaltet ist:

- Sie hören einen positiven Hinweiston, der darauf hinweist, dass das Funkgerät gesperrt ist und den aktuellen Standort nicht verlassen kann.
- Im Display wird `Station gesperrt` angezeigt.

Wenn die **Standortsperre** ausgeschaltet ist:

- Sie hören einen negativen Hinweiston, der darauf hinweist, dass das Funkgerät entsperrt ist.
- Im Display wird `Station entsperrt` angezeigt.

7.6.4
Repeater umgehen

Diese Funktion ermöglicht das Fortsetzen der Kommunikation, wenn Ihr Repeater nicht funktioniert oder wenn Ihr Funkgerät sich außerhalb der Reichweite des Repeaters, aber innerhalb der Reichweite weiterer Funkgeräte befindet.

Die Einstellung zum Umgehen des Repeaters bleibt auch nach dem Ausschalten des Geräts erhalten.

HINWEIS:
Diese Funktion ist nicht verfügbar in Capacity Plus-Single-Site-, Capacity Plus-Multi-Site- und CB-Kanälen, die sich auf derselben Frequenz befinden.

7.6.4.1
Umschalten zwischen Repeater umgehen und Repeater-Modi

Führen Sie die Vorgehensweise zum Umschalten zwischen Repeater umgehen und Repeater-Modi auf Ihrem Funkgerät durch.

1 Führen Sie einen der folgenden Schritte aus:
   - Drücken Sie die programmierte Taste **Repeater/ Talkaround**. Überspringen Sie die folgenden Schritte.
   - Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis

`Dienstprogramme`.Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis

`Funkgeräteinstellungen`.Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis `Repeater umg.`.

Drücken Sie OK, um die Option auszuwählen.

Wenn diese Option aktiviert ist, wird ✓ neben `Aktiviert` angezeigt.

Wenn diese Option deaktiviert ist, wird ✓ neben `Aktiviert` angezeigt.

Der Bildschirm wechselt automatisch zum vorherigen Bildschirm.

7.6.5

Überwachungsfunktion

Durch die Überwachungsfunktion wird vor der Übertragung gewährleistet, dass ein Kanal frei ist.

HINWEIS:
Diese Funktion gilt nicht für „Capacity Plus-Einzelstandort“ und „Capacity Plus-Mehrfachstandort“.

7.6.5.1

Überwachung von Kanälen

Gehen Sie wie folgt vor, um Kanäle zu überwachen.

1 Drücken Sie lange die programmierbare Taste **Überwachung**.

Am Display wird das **Monitor**-Symbol angezeigt, und die LED leuchtet gelb.
Wenn der Kanal verwendet wird:

- Im Display wird das **Monitorsymbol** angezeigt.
- Sie hören die Aktivität des Funkgeräts oder totale Stille.
- Die gelbe LED leuchtet.

Wenn der überwachte Kanal frei ist, hören Sie „weißes Rauschen“.

2 Drücken Sie die **Sendetaste (PTT)**, um zu sprechen. Lassen Sie die **PTT**-Taste los, um den Gesprächspartner zu hören.

7.6.5.2

Dauer-Monitor (Dauerüberwachung)

Die Funktion zur Dauerüberwachung wird verwendet, um einen gewählten Kanal kontinuierlich auf Aktivitäten zu überwachen.

7.6.5.2.1

Ein-/Ausschalten des Dauermonitors

Führen Sie die Vorgehensweise zum Ein- und Ausschalten des Dauermonitors auf Ihrem Funkgerät durch.

Drücken Sie die programmierte Taste **Dauermonitor**.

Wenn das Funkgerät in den Modus schaltet:

- Ein Hinweiston ertönt.
- Die gelbe LED leuchtet.
- Auf dem Display werden `DauerMon Ein` und das **Monitor**-Symbol angezeigt.

Wenn das Funkgerät den Modus beendet:

- Ein Hinweiston ertönt.
- Die gelbe LED erlischt.
- Auf dem Display wird `DauerMon aus` angezeigt.

7.6.6

Home-Kanalerinnerung

Diese Funktion aktiviert eine Erinnerung, wenn der Home-Kanal auf dem Funkgerät für eine gewisse Zeit nicht eingestellt ist.

Wenn diese Funktion über CPS aktiviert ist und der Home-Kanal auf dem Funkgerät für eine gewisse Zeit nicht eingestellt ist, erfolgt in regelmäßigen Abständen Folgendes:

- Der Erinnerungston und die Ansage des Home-Kanals erklingen.
- In der ersten Zeile des Displays wird `Nicht-` angezeigt.

- In der zweiten Zeile wird `Home-Kanal` angezeigt.

Sie können auf die Erinnerung durch eine der folgenden Aktionen reagieren:

- Kehren Sie zum Home-Kanal zurück.
- Schalten Sie die Erinnerung über die programmierbare Taste vorübergehend stumm.
- Legen Sie einen neuen Home-Kanal über die programmierbare Taste fest.

7.6.6.1

Stummschalten der Home-Kanalerinnerung

Wenn eine Home-Kanalerinnerung ertönt, können Sie die Erinnerung vorübergehend stummschalten.

Drücken Sie die programmierbare Taste **Home-Kanalerinnerung stummschalten**.

In der ersten Zeile des Displays wird `HCR` und in der zweiten Zeile `Stumm` angezeigt.

7.6.6.2

Einrichten eines neuen Home-Kanals

Wenn eine Home-Kanalerinnerung eintritt, können Sie einen neuen Home-Kanal einrichten.

1 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie die programmierbare Taste **Home-Kanal zurücksetzen**, um den aktuellen Kanal als neuen Home-Kanal festzulegen. Überspringen Sie die folgenden Schritte.
  In der ersten Zeile des Displays wird der Kanal-Aliasname und in der zweiten Zeile `Neuer Home-K.` angezeigt.
- Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Dienstprogramme`.Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis `Funkgeräteinstellungen`.Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis `Home-Kanal`. Drücken Sie OK, um die Option auszuwählen.

5 Drücken Sie ▲ oder ▼ bis zum gewünschten neuen Home-Kanal-Alias. Drücken Sie OK, um die Option auszuwählen.

Das Display zeigt ✓ neben dem ausgewählten Home-Kanal-Alias an.

7.6.7

Funkmodulprüfung

Mit dieser Funktion kann festgestellt werden, ob ein anderes Funkgerät im System aktiv ist, ohne den Benutzer des Funkgeräts zu stören. Am Zielfunkgerät wird keine hörbare oder sichtbare Anzeige der Kontrolle angezeigt. Ihr Funkgerät muss für die Nutzung dieser Funktion konfiguriert sein.

7.6.7.1

Senden von Funkgerät-Checks

Führen Sie die Vorgehensweise zum Senden von Funkgerät-Checks auf Ihrem Funkgerät durch.

1 Drücken Sie die programmierte Taste für **Funkgerät-Check**.

2 Drücken Sie ▲ oder ▼ bis zum gewünschten Aliasnamen oder zur gewünschten ID.Drücken Sie OK, um die Option auszuwählen.

Im Display wird eine Zwischenstand-Kurznotiz angezeigt und damit bestätigt, dass die Anfrage ausgeführt wird.Die grüne LED leuchtet.

Warten Sie auf eine Quittierung.

Beim Drücken von ↩, wenn das Funkgerät auf eine Bestätigung wartet, erklingt ein Ton, das Funkgerät beendet alle Einträge und beendet den Funkgerät-Check.

Bei erfolgreicher Durchführung:

- Ein positiver Hinweiston erklingt.
- Im Display wird ein positiver Kurzhinweis angezeigt.

Bei nicht erfolgreicher Durchführung:

- Ein negativer Hinweiston erklingt.
- Im Display wird ein negativer Kurzhinweis angezeigt.

Das Funkgerät wechselt wieder zum Funkgerätaliasnamen- oder -ID-Bildschirm.

7.6.8

Fernüberwachung

Diese Funktion wird verwendet, um das Mikrofon eines Zielfunkgeräts mit einem Teilnehmer-Alias oder einer -ID einzuschalten. Diese Funktion kann zur Fernüberwachung jeglicher hörbarer Aktivität rund um das Zielfunkgerät eingesetzt werden.

Es gibt zwei Arten von Fernüberwachung:

- Remote-Überwachung ohne Authentifizierung
- Remote-Überwachung mit Authentifizierung

Authentifizierte Fernüberwachung ist eine käufliche Funktion. Bei der authentifizierten Fernüberwachung ist eine Verifizierung erforderlich, wenn Ihr Funkgerät das Mikrofon eines Ziel-Funkgeräts einschaltet.

Wenn Ihr Funkgerät diese Funktion auf einem Ziel-Funkgerät mit Benutzerauthentifizierung initiiert, ist die Eingabe einer Passphrase erforderlich. Die Passphrase wird auf dem Ziel-Funkgerät über CPS vorprogrammiert.

Ihr Funkgerät und das Zielfunkgerät müssen beide für die Nutzung dieser Funktion konfiguriert sein.

Diese Funktion wird nach Ablauf einer vorprogrammierten Zeitdauer bzw. dann, wenn das Zielfunkgerät in Betrieb ist, ausgeschaltet.

7.6.8.1

Einleiten des Fernmonitors

Führen Sie die Vorgehensweise zum Einleiten der Fernüberwachung auf Ihrem Funkgerät durch.

1. Drücken Sie die programmierte Taste **Fern-Monitor**.
2. Drücken Sie ▲ oder ▼ bis zum gewünschten Aliasnamen oder zur gewünschten ID.
3. Drücken Sie OK, um die Option auszuwählen. Eines der folgenden Ereignisse tritt ein:
   - Im Display wird eine Zwischenstand-Kurznotiz angezeigt und damit bestätigt, dass die Anfrage ausgeführt wird. Die grüne LED leuchtet.

- Ein Bildschirm mit einer Passphrase wird angezeigt.

  Geben Sie die Passphrase ein. Drücken Sie OK, um fortzufahren.

  - Wenn die Passphrase korrekt ist, wird im Display eine Zwischenstand-Kurznotiz angezeigt und damit bestätigt, dass die Anfrage ausgeführt wird. Die grüne LED leuchtet.
  - Wenn die Passphrase nicht korrekt ist, wird im Display ein negativer Kurzhinweis angezeigt, und Sie kehren zum vorherigen Bildschirm zurück.

4 Warten Sie auf eine Quittierung.

Bei erfolgreicher Durchführung:

- Ein positiver Hinweiston erklingt.
- Im Display wird ein positiver Kurzhinweis angezeigt.
- Die Audiosignale vom überwachten Funkgerät werden für die programmierte Dauer wiedergegeben, und auf dem Display wird Fern angezeigt. Mon angezeigt. Nach Ablauf dieser Zeit ertönt ein Hinweiston, und die LED erlischt.

Bei nicht erfolgreicher Durchführung:

- Ein negativer Hinweiston erklingt.
- Im Display wird ein negativer Kurzhinweis angezeigt.

7.6.8.2

Einleiten der Fernüberwachung mithilfe der Kontaktliste

Führen Sie die Vorgehensweise zum Einleiten der Fernüberwachung auf Ihrem Funkgerät mithilfe der Kontaktliste durch.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis Kontakte.Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis zum gewünschten Aliasnamen oder zur gewünschten ID.Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis Fernmonitor.

5 Drücken Sie OK, um die Option auszuwählen. Eines der folgenden Ereignisse tritt ein:

- Im Display wird eine Zwischenstand-Kurznotiz angezeigt und damit bestätigt, dass die Anfrage ausgeführt wird. Die grüne LED leuchtet.
- Ein Bildschirm mit einer Passphrase wird angezeigt.

  Geben Sie die Passphrase ein. Drücken Sie OK, um fortzufahren.

  - Wenn die Passphrase korrekt ist, wird im Display eine Zwischenstand-Kurznotiz angezeigt und damit bestätigt, dass die Anfrage ausgeführt wird. Die grüne LED leuchtet.
  - Wenn die Passphrase nicht korrekt ist, wird im Display ein negativer Kurzhinweis angezeigt, und Sie kehren zum vorherigen Bildschirm zurück.

6 Warten Sie auf eine Quittierung.

Bei erfolgreicher Durchführung:

- Ein positiver Hinweiston erklingt.
- Im Display wird ein positiver Kurzhinweis angezeigt.
- Die Audiosignale vom überwachten Funkgerät werden für die programmierte Dauer wiedergegeben, und auf dem Display wird Fern angezeigt. Mon angezeigt. Nach Ablauf dieser Zeit ertönt ein Hinweiston, und die LED erlischt.

Bei nicht erfolgreicher Durchführung:

- Ein negativer Hinweiston erklingt.
- Im Display wird ein negativer Kurzhinweis angezeigt.

7.6.8.3

Einleiten der Fernüberwachung über manuelles Wählen

Führen Sie die Vorgehensweise zum Einleiten der Fernüberwachung auf Ihrem Funkgerät über manuelles Wählen durch.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Kontakte`. Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis `Man. Wählen`. Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis `Funkgerät-Nr.` Drücken Sie OK, um die Option auszuwählen.

5 Führen Sie einen der folgenden Schritte aus:

- Geben Sie den Funkgerät-Alias oder die ID ein, und drücken Sie OK, um fortzufahren.
- Bearbeiten Sie die zuvor gewählte ID, und drücken Sie OK, um fortzufahren.

6 Drücken Sie ▲ oder ▼ bis `Fernmonitor`.

7 Drücken Sie OK, um die Option auszuwählen. Eines der folgenden Ereignisse tritt ein:

- Im Display wird eine Zwischenstand-Kurznotiz angezeigt und damit bestätigt, dass die Anfrage ausgeführt wird. Die grüne LED leuchtet.
- Ein Bildschirm mit einer Passphrase wird angezeigt.

  Geben Sie die Passphrase ein. Drücken Sie OK, um fortzufahren.

  - Wenn die Passphrase korrekt ist, wird im Display eine Zwischenstand-Kurznotiz angezeigt und damit bestätigt, dass die

Anfrage ausgeführt wird. Die grüne LED leuchtet.

- Wenn die Passphrase nicht korrekt ist, wird im Display ein negativer Kurzhinweis angezeigt, und Sie kehren zum vorherigen Bildschirm zurück.

8 Warten Sie auf eine Quittierung.

Bei erfolgreicher Durchführung:

- Ein positiver Hinweiston erklingt.
- Im Display wird ein positiver Kurzhinweis angezeigt.
- Die Audiosignale vom überwachten Funkgerät werden für die programmierte Dauer wiedergegeben, und auf dem Display wird `Fern` angezeigt. `Mon` angezeigt. Nach Ablauf dieser Zeit ertönt ein Hinweiston, und die LED erlischt.

Bei nicht erfolgreicher Durchführung:

- Ein negativer Hinweiston erklingt.
- Im Display wird ein negativer Kurzhinweis angezeigt.

7.6.9

Scan-Listen

Scan-Listen werden erstellt und individuellen Kanälen oder Gruppen zugewiesen. Das Funkgerät sucht nach Sprachaktivität, indem es die in der Scan-Liste für den aktuellen Kanal oder die aktuelle Gruppe festgelegte Kanal- oder Gruppenfolge zyklisch durchläuft.

Ihr Funkgerät unterstützt bis zu 250 Scan-Listen mit jeweils höchstens 16 Mitgliedern pro Liste.

In jede Scan-Liste können sowohl analoge als auch digitale Einträge aufgenommen werden.

Kanäle können durch Bearbeiten einer Scan-Liste hinzugefügt, unterdrückt oder nach Priorität geordnet werden.

Sie können über die Bedienfeld-Programmierung eine neue Scanliste für Ihr Funkgerät erstellen. Unter Frontplattenprogrammierung auf Seite 181 finden Sie weitere Informationen.

Das **Priorität**-Symbol wird links vom Aliasnamen des Mitglieds angezeigt (wenn eingestellt) und gibt an, ob das Mitglied auf einer Kanalliste der Priorität 1 oder der Priorität 2 ist. Mehrere Priorität-1- oder Priorität-2-Kanäle in einer Scan-Liste sind nicht möglich. Ist Priorität auf **Kein** eingestellt, wird kein **Priorität**-Symbol angezeigt.

HINWEIS:
Diese Funktion ist nicht in Capacity Plus verfügbar.

7.6.9.1

Anzeigen von Einträgen in der Scan-Liste

Führen Sie Vorgehensweise zum Anzeigen von Einträgen in der Scan-Liste auf Ihrem Funkgerät durch.

1. Drücken Sie OK, um das Menü aufzurufen.
2. Drücken Sie ▲ oder ▼ bis `Scan`. Drücken Sie OK, um die Option auszuwählen.
3. Drücken Sie ▲ oder ▼ bis `Scan-Liste`. Drücken Sie OK, um die Option auszuwählen.
4. Drücken Sie ▲ oder ▼, um jeden Eintrag der Liste anzuzeigen.

7.6.9.2

Hinzufügen neuer Einträge zur Scan-Liste

Führen Sie die Vorgehensweise zum Hinzufügen neuer Einträge in die Scan-Liste auf Ihrem Funkgerät durch.

1. Drücken Sie OK, um das Menü aufzurufen.
2. Drücken Sie ▲ oder ▼ bis `Scan`. Drücken Sie OK, um die Option auszuwählen.
3. Drücken Sie ▲ oder ▼ bis `Scan-Liste`. Drücken Sie OK, um die Option auszuwählen.
4. Drücken Sie ▲ oder ▼ bis `Mitgl. hinzu`. Drücken Sie OK, um die Option auszuwählen.
5. Drücken Sie ▲ oder ▼ bis zum gewünschten Aliasnamen oder zur gewünschten ID.Drücken Sie OK, um die Option auszuwählen.

6 Drücken Sie ▲ oder ▼ bis zur gewünschten Prioritätsstufe. Drücken Sie OK, um die Option auszuwählen.

Im Display wird ein positives Kurzhinweissymbol angezeigt und dann `Andere hinzu?`.

7 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie ▲ oder ▼ bis `Ja`, um einen weiteren Eintrag hinzuzufügen. Drücken Sie OK, um die Option auszuwählen. Wiederholen Sie Schritt 5 und Schritt 6.
- Drücken Sie ▲ oder ▼ bis `Nein`, um die aktuelle Liste zu speichern. Drücken Sie OK, um die Option auszuwählen.

7.6.9.3

Löschen von Einträgen aus der Scan-Liste

Gehen Sie wie folgt vor, um Scanlisteneinträge zu löschen.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Scan`. Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis `Scan-Liste`. Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis zum gewünschten Aliasnamen oder zur gewünschten ID. Drücken Sie OK, um die Option auszuwählen.

5 Drücken Sie ▲ oder ▼ bis `Löschen`. Drücken Sie OK, um die Option auszuwählen.

Im Display wird `Eintrag löschen?` angezeigt.

6 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie ▲ oder ▼ bis Ja, um den Eintrag zu löschen. Drücken Sie OK, um die Option auszuwählen.
  Im Display wird ein positiver Kurzhinweis angezeigt.
- Drücken Sie ▲ oder ▼ bis Nein, um zum vorherigen Bildschirm zurückzukehren. Drücken Sie OK, um die Option auszuwählen.

7 Wiederholen Sie Schritt 4 bis Schritt 6 zum Löschen weiterer Einträge.

8 Drücken Sie ⮌ lang, um zum Startbildschirm zurückzukehren, nachdem alle gewünschten Aliasnamen oder IDs gelöscht wurden.

7.6.9.4

Einstellen der Priorität für Einträge in der Scan-Liste

Führen Sie die Vorgehensweise zum Festlegen des Prioritätsstatus von Scan-Listeneinträgen auf Ihrem Funkgerät durch.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis Scan. Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis Scan-Liste. Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis zum gewünschten Aliasnamen oder zur gewünschten ID. Drücken Sie OK, um die Option auszuwählen.

5 Drücken Sie ▲ oder ▼ bis `Priorit.bearb.`

Drücken Sie OK, um die Option auszuwählen.

6 Drücken Sie ▲ oder ▼ bis zur gewünschten Prioritätsstufe. Drücken Sie OK, um die Option auszuwählen.

Im Display wird ein positiver Kurzhinweis angezeigt, bevor wieder der vorhergehende Bildschirm angezeigt wird. Das **Priorität**-Symbol wird links neben dem Mitglieds-Alias angezeigt.

7.6.10

Scan

Das Funkgerät durchsucht die vorprogrammierte Scan-Liste des aktuellen Kanals auf Sprachaktivität, wenn Sie einen Scanvorgang starten.

HINWEIS:
Diese Funktion ist nicht in Capacity Plus verfügbar.

Während eines Dual-Mode Scans schaltet das Funkgerät, wenn Sie sich z. B. auf einem Digitalkanal befinden, automatisch auf einen Analogkanal, wenn es dort Sprachaktivität erfasst, und bleibt für die Dauer des Rufs auf dem Kanal. Umgekehrt gilt dasselbe.

Ein Scan kann auf eine von zwei Arten gestartet werden:

Kanalsuche (Manuell)
Das Funkgerät durchsucht alle Kanäle oder Gruppen Ihrer Scan-Liste. Bei Aufnahme des Scans startet das Funkgerät, je nach Einstellungen, automatisch auf dem/der zuletzt abgefragten „aktiven“ Kanal/Gruppe oder auf dem Kanal, von dem aus der Scan eingeleitet wurde.

Auto-Scan (Automatisch)
Das Funkgerät beginnt den Scan automatisch, wenn Sie einen Kanal oder eine Gruppe mit aktivierter Auto-Scan-Funktion auswählen.

7.6.10.1

Ein-/Ausschalten der Scan-Funktion

Führen Sie die Vorgehensweise zum Ein- und Ausschalten der Scan-Funktion Ihres Funkgeräts durch.

HINWEIS:
Während des Scans nimmt das Funkgerät ausschließlich auf seinem ausgewählten Kanal gesendete Daten (z. B. Textnachrichten, Ortsangabe oder PC-Daten) an.

1 Drehen Sie den **Kanalwahlschalter**, um einen mit einer Scanliste vorprogrammierten Kanal zu wählen.

2 Drücken Sie OK, um das Menü aufzurufen.

3 Drücken Sie ▲ oder ▼ bis `Scan`. Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis `Scan-Zust.`. Drücken Sie OK, um die Option auszuwählen.

5 Drücken Sie ▲ oder ▼ bis zum erforderlichen Scan-Zustand, und drücken Sie OK zum Auswählen

Wenn die Scan-Funktion aktiviert ist:

- Auf dem Display werden `Scan ein` und das **Scan**-Symbol angezeigt.
- Die gelbe LED blinkt.

Wenn die Scan-Funktion deaktiviert ist:

- Auf dem Display wird `Scan aus` angezeigt.
- Das **Scan**-Symbol wird nicht mehr angezeigt.
- Die LED erlischt.

7.6.10.2

Antworten auf Übertragungen während eines Scanvorgangs

Das Funkgerät stoppt während eines Suchlaufs auf einem Kanal oder bei einer Gruppe, sobald es Aktivität erfasst. Es bleibt während einer vorprogrammierten Zeitdauer, die „Standzeit“ genannt wird, auf diesem Kanal. Gehen Sie wie folgt vor, um Rufe während eines Scanvorgangs zu beantworten.

1 Ist die Funktion „Kanal frei-Anzeige“ aktiviert, hören Sie einen kurzen Hinweiston, sobald die **Sendetaste (PTT)** am sendenden Funkgerät freigegeben wird, der Ihnen mitteilt, dass Sie nun auf

diesem Kanal antworten können. Drücken Sie während der Standzeit die **Sendetaste (PPT)**.

Die grüne LED leuchtet.

2 Führen Sie einen der folgenden Schritte aus:

- Warten Sie, bis der Freiton verklungen ist, und sprechen Sie deutlich in das Mikrofon.
- Warten Sie, bis der **PTT**-Mithörton verstummt, und sprechen Sie dann deutlich in das Mikrofon.

3 Lassen Sie die **PTT**-Taste los, um den Gesprächspartner zu hören.

Das Funkgerät kehrt zum Suchen nach anderen Kanälen oder Gruppen zurück, wenn Sie nicht vor Ablauf der Standzeit antworten.

7.6.10.3

Unterdrücken von Störkanälen

Kommen auf einem Kanal andauernd Störgeräusche oder unerwünschte Rufe vor (sog. „Störkanal“), können Sie diesen Kanal vorübergehend wie folgt aus der Scanliste entfernen. Diese Funktion kann auf den als „ausgewählten Kanal“ designierten Kanal nicht angewandt werden. Führen Sie die Vorgehensweise zum Unterdrücken von Störkanälen auf Ihrem Funkgerät durch.

1 Wenn sich das Funkgerät auf einem unerwünschten oder störenden Kanal befindet, drücken Sie die vorprogrammierte Taste **Störkanal unterdrücken**, bis ein Ton erklingt.

2 Lassen Sie die vorprogrammierte Taste **Störkanal unterdrücken** los.

Der Störkanal wird unterdrückt.

7.6.10.4

Wiederaufnahme von Störkanälen

Führen Sie die Vorgehensweise zur Wiederaufnahme von Störkanälen auf Ihrem Funkgerät durch.

Führen Sie einen der folgenden Schritte aus:

- Schalten Sie das Funkgerät aus und dann wieder ein.
- Stoppen und starten Sie den Scan erneut über die vorprogrammierte **Scan**-Taste oder das Menü.

- Wechseln Sie mit dem **Kanalwahlschalter** den Kanal.

7.6.11

Auswahlverfahren nach Signalgüte (Vote-Scan)

Das Auswahlverfahren nach Signalgüte bietet in Gegenden, in denen mehrere Basisstationen identische Informationen auf verschiedenen Analogkanälen senden, eine flächendeckende Funkversorgung.

Ihr Funkgerät führt einen Suchlauf der Analogkanäle mehrerer Basisstationen durch und wählt dann das stärkste empfangene Signal aus. Sobald es das stärkste Signal ermittelt hat, empfängt das Funkgerät Übertragungen von dieser Basisstation.

Wenn ein Auswahlverfahren nach Signalgüte durchgeführt wird, blinkt die gelbe LED, und auf dem Display wird das Symbol für **Auswahlverfahren nach Signalgüte** angezeigt.

Gehen Sie ebenso wie in Antworten auf Übertragungen während eines Scanvorgangs auf Seite 406 beschrieben vor, um während eines Auswahlverfahrens nach Signalgüte auf eine Übertragung zu antworten.

7.6.12

Kontakteinstellungen

Über Kontakte wird Ihr Funkgerät mit einer Adressbuchfunktion ausgestattet. Jeder Eintrag entspricht einem Aliasnamen bzw. einer ID, die Sie zur Rufeinleitung verwenden. Die Einträge sind in alphabetischer Reihenfolge sortiert.

Jeder Eintrag wird je nach Kontext mit einem anderen Ruftyp assoziiert: Gruppenruf, Einzelruf, Standort-Rundumruf, PC-Ruf oder Zentralruf.

PC- und Zentralrufe sind mit Daten verbunden. Diese Ruftypen sind nur mit entsprechenden Anwendungen verfügbar. Ausführliche Informationen hierzu finden Sie in den Handbüchern der Datenanwendungen.

HINWEIS:
Vor jeder Zifferntaste, die einem Eintrag zugewiesen ist, wird eine Markierung angezeigt. Wenn sich die Markierung vor `Leer` befindet, haben Sie diesem Eintrag noch keine Zifferntaste zugewiesen.

Jeder Eintrag setzt sich aus den folgenden Feldern zusammen:

- Rufart

- Ruf-Alias
- Ruf-ID

HINWEIS:
Ist die Verschlüsselungsfunktion für einen Kanal aktiviert, können Sie auf diesem Kanal Gruppenrufe, Einzelrufe und Rundumrufe mit aktivierter Verschlüsselung durchführen. Ausschließlich Funkgeräte mit demselben Privacy-Key oder demselben Schlüsselwert und derselben Schlüssel-ID wie Ihr Funkgerät können die Übertragung entschlüsseln.

7.6.12.1

Hinzufügen neuer Kontakte

Führen Sie die Vorgehensweise zum Hinzufügen neuer Kontakte auf Ihrem Funkgerät durch.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Kontakte`.Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis `Neuer Kontakt`.

Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ zum Auswählen des Kontakttyps `Funkg.-Kontakt` oder

`Telefonkontakt`. Drücken Sie OK, um die Option auszuwählen.

5 Geben Sie die Nummer des Kontakts mit der

Tastatur ein, und drücken Sie OK, um fortzufahren.

6 Geben Sie den Namen des Kontakts mit der

Tastatur ein, und drücken Sie OK, um fortzufahren.

7 Drücken Sie ▲ oder ▼ bis zum gewünschten Ruftontyp. Drücken Sie OK, um die Option auszuwählen.

Ein positiver Hinweiston erklingt.Im Display wird ein positiver Kurzhinweis angezeigt.

7.6.12.2

Standardeinstellung für Kontakte

Führen Sie die Vorgehensweise für die Standardeinstellung für Kontakte auf Ihrem Funkgerät durch.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis Kontakte. Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis zum gewünschten Aliasnamen oder zur gewünschten ID.Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis AlsVorg.einst. Drücken Sie OK, um die Option auszuwählen.

Ein positiver Hinweiston erklingt.Im Display wird ein positiver Kurzhinweis angezeigt. Auf dem Display wird ✓ neben dem ausgewählten Standardalias oder der ausgewählten Standard-ID angezeigt.

7.6.12.3

Zuweisen von Einträgen zu programmierbaren Zifferntasten

Führen Sie die Vorgehensweise zum Zuweisen von Einträgen zu programmierbaren Zifferntasten auf Ihrem Funkgerät durch.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis Kontakte. Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis zum gewünschten Aliasnamen oder zur gewünschten ID.Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis `Progr.-Taste`.

Drücken Sie OK, um die Option auszuwählen.

5 Führen Sie einen der folgenden Schritte aus:

- Wenn die gewünschte Zifferntaste keinem Eintrag zugewiesen wurde, drücken Sie ▲ oder ▼ bis zur gewünschten Zifferntaste. Drücken Sie OK, um die Option auszuwählen.
- Wenn die gewünschte Zifferntaste einem Eintrag zugewiesen wurde, wird im Display `Die Taste ist bereits zugewiesen` und dann in der ersten Textzeile `Überschreiben?` angezeigt. Führen Sie einen der folgenden Schritte aus: Drücken Sie ▲ oder ▼ bis `Ja`. Drücken Sie OK, um die Option auszuwählen.

  Das Funkgerät gibt einen positiven Hinweiston aus, und im Display wird das positive Kurzhinweissymbol `Kontakt gesichert` sowie ein positiver Kurzhinweis angezeigt.

  Drücken Sie ▲ oder ▼ bis `Nein`, um zum vorherigen Schritt zurückzukehren.

7.6.12.4

Aufheben von Zuordnungen zwischen Einträgen und programmierbaren Zifferntasten

Führen Sie die Vorgehensweise zum Aufheben der Zuordnungen zwischen Einträgen und programmierbaren Zifferntasten auf Ihrem Funkgerät durch.

1 Führen Sie einen der folgenden Schritte aus:

- Halten Sie die programmierte Zifferntaste für den gewünschten Aliasnamen oder die ID gedrückt. Lesen Sie weiter unter Schritt 4.
- Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis Kontakte. Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis zum gewünschten Aliasnamen oder zur gewünschten ID. Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis Progr.-Taste. Drücken Sie OK, um die Option auszuwählen.

5 Drücken Sie ▲ oder ▼ bis Leer. Drücken Sie OK, um die Option auszuwählen.

Die erste Textzeile zeigt AlleT.löschen an.

6 Drücken Sie ▲ oder ▼ bis Ja. Drücken Sie OK, um die Option auszuwählen.

HINWEIS:
Die Verbindung zwischen einem Eintrag und seiner bzw. seinen vorprogrammierten Zifferntaste(n) wird aufgehoben, wenn der Eintrag gelöscht wird.

Ein positiver Hinweiston erklingt. Im Display wird Kontakt gespeichert angezeigt.
Der Bildschirm wechselt automatisch zum vorherigen Menü.

7.6.13

Rufanzeigeeinstellungen

Mit dieser Funktion können Funkgerätebenutzer Ruftöne für Rufe oder Textnachrichten konfigurieren.

7.6.13.1

Aktivieren und Deaktivieren von Ruftönen für Rufhinweise

Führen Sie die Vorgehensweise zum Aktivieren oder Deaktivieren von Ruftönen für Rufhinweise auf Ihrem Funkgerät durch.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis Dienstprogramme.Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis Funkgeräteinstellungen.Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis Hinweistöne.

Drücken Sie OK, um die Option auszuwählen.

5 Drücken Sie ▲ oder ▼ bis Ruftöne. Drücken Sie OK, um die Option auszuwählen.

6 Drücken Sie ▲ oder ▼ bis Hinweiston. Drücken Sie OK, um die Option auszuwählen.

7 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie ▲ oder ▼ bis zum gewünschten Hinweiston. Drücken Sie OK, um die Option auszuwählen.
  Auf dem Display wird ✓ und der ausgewählte Ton angezeigt.
- Drücken Sie ▲ oder ▼ bis Aus. Drücken Sie OK, um die Option auszuwählen.
  Wenn die Töne früher aktiviert wurden, wird auf dem Display ✓ neben Aus angezeigt.

  Wenn die Töne früher deaktiviert wurden, wird auf dem Display ✓ neben Aus angezeigt.

7.6.13.2

Aktivieren und Deaktivieren von Ruftönen für Einzelrufe

Führen Sie die Vorgehensweise zum Aktivieren oder Deaktivieren von Ruftönen für Einzelrufe auf Ihrem Funkgerät durch.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis Dienstprogramme.Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis Funkgeräteinstellungen.Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis Töne/Hinweistöne. Drücken Sie OK, um die Option auszuwählen.

5 Drücken Sie ▲ oder ▼ bis Ruftöne. Drücken Sie OK, um die Option auszuwählen.

6 Drücken Sie ▲ oder ▼ bis Einzelruf. Drücken Sie OK, um die Option auszuwählen.

Im Display wird ✓ neben Ein angezeigt, wenn Ruftöne für Einzelrufe aktiviert wurden.

Im Display wird ✓ neben Aus angezeigt, wenn Ruftöne für Einzelrufe aktiviert wurden.

7 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie ▲ oder ▼ bis zum gewünschten Hinweiston. Drücken Sie OK, um die Option auszuwählen.
  Auf dem Display wird ✓ und der ausgewählte Ton angezeigt.
- Drücken Sie ▲ oder ▼ bis Aus. Drücken Sie OK, um die Option auszuwählen.
  Wenn die Töne früher aktiviert wurden, wird auf dem Display ✓ neben Aus angezeigt.

  Wenn die Töne früher deaktiviert wurden, wird auf dem Display ✓ neben Aus angezeigt.

7.6.13.3

Aktivieren und Deaktivieren von Ruftönen für Selektivrufe

Führen Sie die Vorgehensweise zum Aktivieren oder Deaktivieren von Ruftönen für Selektivrufe auf Ihrem Funkgerät durch.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis Dienstprogramme.Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis Funkgeräteinstellungen.Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis Töne/Hinweistöne.

Drücken Sie OK, um die Option auszuwählen.

5 Drücken Sie ▲ oder ▼ bis Ruftöne. Drücken Sie OK, um die Option auszuwählen.

6 Drücken Sie ▲ oder ▼ bis Selektivruf.

Drücken Sie OK, um die Option auszuwählen.

Im Display wird ✓ und der aktuelle Hinweiston angezeigt.

7 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie ▲ oder ▼ bis zum gewünschten Hinweiston. Drücken Sie OK, um die Option auszuwählen.
  Auf dem Display wird ✓ und der ausgewählte Ton angezeigt.
- Drücken Sie ▲ oder ▼ bis Aus. Drücken Sie OK, um die Option auszuwählen.
  Wenn die Töne früher aktiviert wurden, wird auf dem Display ✓ neben Aus angezeigt.

Wenn die Töne früher deaktiviert wurden, wird auf dem Display ✓ neben Aus angezeigt.

7.6.13.4

Aktivieren und Deaktivieren von Ruftönen für Textnachrichten

Führen Sie die Vorgehensweise zum Aktivieren und Deaktivieren von Ruftönen für Textnachrichten auf Ihrem Funkgerät durch.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis Dienstprogramme. Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis Funkgeräteinstellungen. Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis Töne/Hinweistöne. Drücken Sie OK, um die Option auszuwählen.

5 Drücken Sie ▲ oder ▼ bis Ruftöne. Drücken Sie OK, um die Option auszuwählen.

6 Drücken Sie ▲ oder ▼ bis Textnachricht. Drücken Sie OK, um die Option auszuwählen.

Im Display wird ✓ und der aktuelle Hinweiston angezeigt.

7 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie ▲ oder ▼ bis zum gewünschten Hinweiston. Drücken Sie OK, um die Option auszuwählen.
  Auf dem Display wird ✓ und der ausgewählte Ton angezeigt.
- Drücken Sie ▲ oder ▼ bis Aus. Drücken Sie OK, um die Option auszuwählen.

Wenn die Töne früher aktiviert wurden, wird auf dem Display ✓ neben Aus angezeigt.

Wenn die Töne früher deaktiviert wurden, wird auf dem Display ✓ neben Aus angezeigt.

7.6.13.5

Aktivieren und Deaktivieren von Ruftönen für Telemetriestatus mit Text

Führen Sie die Vorgehensweise zum Aktivieren oder Deaktivieren von Ruftönen für den Telemetriestatus mit Text auf Ihrem Funkgerät durch.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis Dienstprogramme. Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis Funkgeräteinstellungen. Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis Hinweistöne. Drücken Sie OK, um die Option auszuwählen.

5 Drücken Sie ▲ oder ▼ bis Ruftöne. Drücken Sie OK, um die Option auszuwählen.

6 Drücken Sie ▲ oder ▼ bis Telemetrie. Drücken Sie OK, um die Option auszuwählen.

Der derzeitige Ton wird durch ein ✓ angezeigt.

7 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie ▲ oder ▼ bis zum gewünschten Hinweiston. Drücken Sie OK, um die Option auszuwählen.
  Im Display wird Ton <Nummer> ausgewählt angezeigt, und links neben dem eingestellten Ton wird ✓ eingeblendet.
- Drücken Sie ▲ oder ▼ bis Abschalten. Drücken Sie OK, um die Option auszuwählen.

Im Display wird `Telemetrie Ruft.Aus` angezeigt, und ein ✓ wird links neben `Abschalten` angezeigt.

7.6.13.6

Zuweisen von Ruftontypen

Sie können Ihr Funkgerät so konfigurieren, dass es einen von zehn vordefinierten Hinweistönen ausgibt, wenn es einen Rufhinweis oder eine Textnachricht von einem bestimmten Kontakt erhält. Wenn Sie die Liste der Ruftöne durchgehen, ertönt bei jedem Eintrag jeweils der eingestellte Rufton. Führen Sie die Vorgehensweise zum Zuweisen von Ruftontypen auf Ihrem Funkgerät durch.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Kontakte`. Drücken Sie OK, um die Option auszuwählen.

Die Einträge sind in alphabetischer Reihenfolge sortiert.

3 Drücken Sie ▲ oder ▼ bis zum gewünschten Aliasnamen oder zur gewünschten ID. Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis `Bearbeiten`. Drücken Sie OK, um die Option auszuwählen.

5 Drücken Sie OK, bis im Display das Menü `Rufton bearbeiten` angezeigt wird.

Ein ✓ zeigt den derzeit ausgewählten Ton an.

6 Drücken Sie ▲ oder ▼ bis zum gewünschten Hinweiston. Drücken Sie OK, um die Option auszuwählen.

Im Display wird ein positiver Kurzhinweis angezeigt.

7.6.13.7

Auswählen eines Rufhinweistyps

HINWEIS:
Die programmierte Taste **Klingelton** wird von Ihrem Händler oder Systemadministrator zugeordnet. Klären Sie mit Ihrem Händler oder Systemadministrator, wie das Funkgerät konfiguriert wurde.

Sie können die Funkrufe auf einen vorprogrammierten Vibrations-Ton einstellen. Wenn „Alle Töne“ deaktiviert ist, zeigt das Funkgerät das Symbol „Alle Töne stumm“ an. Wenn „Alle Töne“ aktiviert ist, wird der zugehörige Klingelton angezeigt.

Bei einem kurzen Klingelton vibriert das Funkgerät einmal. Bei einem sich wiederholenden Klingelton vibriert das Funkgerät mehrmals. Bei der Einstellung „Klingeln und Vibrieren“ gibt das Funkgerät bei einer eingehenden Übertragung (z. B. Rufhinweis oder Nachricht) einen speziellen Klingelton aus. Dieser klingt wie ein Bestätigungston oder ein Ton bei einem verpassten Ruf.

Für Funkgeräte mit Akkus, die die Funktion „Vibrieren“ unterstützen und an einem vibrierenden Gürtelclip befestigt sind, sind die zur Verfügung stehen Optionen für den Rufhinweistyp: Stumm, Klingeln, Vibrieren sowie Klingeln und Vibrieren.

Für Funkgeräte mit Akkus, die die Funktion „Vibrieren“ nicht unterstützen und nicht an einem vibrierenden Gürtelclip befestigt sind, ist der Rufhinweistyp automatisch auf „Klingeln“ eingestellt.Die verfügbaren Optionen für Rufhinweistypen sind „Stumm” und „Klingeln”.

Sie können einen Rufhinweistontyp durch eine der folgenden Maßnahmen auswählen.

- Drücken Sie die vorprogrammierte Taste **Art des Hinweistons bei Anruf**, um auf das Menü für die Art des Hinweistons zuzugreifen.
  a. Drücken Sie ▲ oder ▼ zu `Klingeln`, `Vibrieren`, `Klingeln und Vibrieren` oder `Stiller Klingelton` und drücken Sie OK zum Auswählen.
- Rufen Sie diese Funktion über das Menü auf.
  a. Drücken Sie OK, um das Menü aufzurufen.
  b. Drücken Sie ▲ oder ▼ zu `Einstellungen` und drücken Sie OK zum Auswählen.

c. Drücken Sie ▲ oder ▼ zu Funkgeräteinstellungen und drücken Sie OK zum Auswählen.

d. Drücken Sie ▲ oder ▼ zu Hinweistöne und drücken Sie OK zum Auswählen.

e. Drücken Sie ▲ oder ▼ zu Rufhinweistyp und drücken Sie OK zum Auswählen.

f. Drücken Sie ▲ oder ▼ bis Klingeln, Vibrieren, Klingeln und Vibrieren oder Still, und drücken Sie OK zum Auswählen.

7.6.13.8

Konfigurieren der Vibrationsart

HINWEIS:
Die programmierte Taste **Vibrationsart** wird von Ihrem Händler oder Systemadministrator zugeordnet. Klären Sie mit Ihrem Händler oder Systemadministrator, wie das Funkgerät konfiguriert wurde.

„Vibrationsart“ ist aktiviert, wenn der vibrierende Gürtelclip am Funkgerät mit einem Akku angeschlossen ist, der die Vibrationsfunktion unterstützt.

Sie können die Vibrationsart durch eine der folgenden Maßnahmen konfigurieren.

- Drücken Sie die vorprogrammierte Taste **Vibrationsart**, um auf das Menü „Vibrationsart“ zuzugreifen.

  a. Drücken Sie ▲ oder ▼ zu Kurz, Mittel oder Lang und drücken Sie OK zum Auswählen.

- Rufen Sie diese Funktion über das Menü auf.

  a. Drücken Sie OK, um das Menü aufzurufen.

  b. Drücken Sie ▲ oder ▼ zu Einstellungen und drücken Sie OK zum Auswählen.

  c. Drücken Sie ▲ oder ▼ zu Funkgeräteinstellungen und drücken Sie OK zum Auswählen.

d. Drücken Sie ▲ oder ▼ zu `Hinweistöne` und drücken Sie OK zum Auswählen.

e. Drücken Sie ▲ oder ▼ zu `Vibrationsart` und drücken Sie OK zum Auswählen.

f. Drücken Sie ▲ oder ▼ bis `Kurz`, `Mittel` oder `Lang`, und drücken Sie OK zum Auswählen.

7.6.13.9

Zunehmende Alarmtonlautstärke

Das Funkgerät kann so programmiert werden, dass Sie kontinuierlich erinnert werden, wenn ein Funkruf noch unbeantwortet ist. Dieser Dauerhinweis erfolgt dadurch, dass der Alarmton automatisch zunehmend lauter wird. Diese Funktion wird als Escalert bezeichnet. Führen Sie die Vorgehensweise für die zunehmende Lautstärke auf Ihrem Funkgerät aus.

7.6.14

Funktionen des Rufprotokolls

Das Funkgerät führt ein Protokoll aller kürzlich durchgeführten, beantworteten und entgangenen Einzelrufe. Das Rufprotokoll kann zur Ansicht und Verwaltung kürzlich durchgeführter Anrufe verwendet werden.

Die Rufhinweise zu entgangenen Anrufen werden in den Rufprotokollen aufgenommen; dies ist abhängig von der Systemkonfiguration Ihres Funkgeräts. In jeder Rufliste können die folgenden Funktionen durchgeführt werden:

- Aliasnamen oder IDs können in „Kontakte“ gespeichert werden
- Anruf löschen
- Details

7.6.14.1

Anzeigen der letzten Anrufe

Führen Sie die Vorgehensweise zum Anzeigen der letzten Rufe auf Ihrem Funkgerät durch.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Rufprotokoll`.

Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis zur gewünschten Liste. Zur Auswahl stehen die Listen `Verpasst`, `Beantwortet` und `Abgehend`.

Drücken Sie OK, um die Option auszuwählen.

Auf dem Display wird der neueste Eintrag angezeigt.

4 Drücken Sie ▲ oder ▼, um die Liste anzuzeigen.

Sie können einen Einzelruf mit dem Aliasnamen oder der ID auf dem Display starten, indem Sie die **PTT**-Taste drücken.

7.6.14.2

Anzeigen von Ruflistendetails

Gehen Sie wie folgt vor, um die Rufdetails auf Ihrem Funkgerät anzuzeigen.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Rufprotokoll`.

Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis zur gewünschten Liste.

Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis zum gewünschten Aliasnamen oder zur gewünschten ID. Drücken Sie OK, um die Option auszuwählen.

5 Drücken Sie ▲ oder ▼ bis `Details anzeigen`.

Drücken Sie OK, um die Option auszuwählen.

Auf dem Display werden die Rufdetails angezeigt.

7.6.14.3

Speichern von Aliasnamen oder IDs aus der Rufliste

Führen Sie die Vorgehensweise zum Speichern von Aliasnamen oder IDs auf Ihrem Funkgerät aus der Rufliste durch.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Rufprotokoll`.

Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis zur gewünschten Liste.

Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis zum gewünschten Aliasnamen oder zur gewünschten ID.Drücken Sie OK, um die Option auszuwählen.

5 Drücken Sie ▲ oder ▼ bis `Speichern`. Drücken Sie OK, um die Option auszuwählen.

Im Display wird ein blinkender Cursor angezeigt.

6 Geben Sie die übrigen Zeichen des gewünschten Aliasnamens ein. Drücken Sie OK, um die Option auszuwählen.

Eine ID kann ohne einen Aliasnamen gespeichert werden.

Im Display wird ein positiver Kurzhinweis angezeigt.

7.6.14.4

Löschen von Rufen aus der Rufliste

Gehen Sie wie folgt vor, um Rufe aus der Rufliste zu löschen.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Rufprotokoll`.

Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis zur gewünschten Liste.

Drücken Sie OK, um die Option auszuwählen.

Wenn die Liste leer ist:

- Ein Hinweiston ertönt.
- Auf dem Display wird `Liste leer` angezeigt.

4 Drücken Sie ▲ oder ▼ bis zum gewünschten Aliasnamen oder zur gewünschten ID.Drücken Sie OK, um die Option auszuwählen.

5 Drücken Sie ▲ oder ▼ bis `Eintrag löschen?`.

Drücken Sie OK, um die Option auszuwählen.

6 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie OK, um `Ja` auszuwählen und den Eintrag zu löschen.
  Im Display wird `Eintrag gelöscht` angezeigt.
- Drücken Sie ▲ oder ▼ bis `Nein`. Drücken Sie OK, um die Option auszuwählen.

Das Funkgerät wechselt zum vorherigen Bildschirm.

7.6.15
Rufhinweise

Das Paging mit Rufhinweis erlaubt Ihnen, einen bestimmten Funkgerätbenutzer dazu aufzufordern, Sie zurückzurufen.

Diese Funktion kann nur für Aliasnamen bzw. IDs von Funkgeräten eingesetzt werden und ist über das Menü via „Kontakte“ oder eine vorprogrammierte **Eintastenzugang**-Taste verfügbar.

7.6.15.1

Antworten auf Rufhinweise

Führen Sie die Vorgehensweise zum Antworten auf Rufhinweise auf Ihrem Funkgerät durch.

Wenn Sie einen Rufhinweis erhalten:

- Ein wiederholter Hinweiston erklingt.
- Die gelbe LED blinkt.
- Auf dem Display wird die Liste der Benachrichtigungen mit einem Rufhinweiseintrag mit dem Alias oder der ID des anrufenden Funkgeräts angezeigt.

  Anhängig von der Konfiguration durch den Händler oder Systemadministrator können Sie auf einen Rufhinweis folgendermaßen reagieren:

  - Drücken Sie die **Sendetaste (PTT)**, und antworten Sie dem Anrufer direkt mit einem Einzelruf.
  - Drücken Sie die **Sendetaste (PTT)**, um die Gesprächsgruppenkommunikation fortzuführen. Der Rufhinweis wird in die Option „Entgangene Rufe“ im Menü „Ruf-Log“ verschoben. Sie können aus dem Verlauf der entgangenen Rufe heraus dem Anrufer antworten.

Weitere Informationen finden Sie unter Benachrichtigungsliste auf Seite 179 und Funktionen des Rufprotokolls auf Seite 131.

7.6.15.2

Tätigen von Rufhinweisen

Führen Sie die Vorgehensweise zum Tätigen von Rufhinweisen auf Ihrem Funkgerät aus.

1. Drücken Sie die vorprogrammierte **Schnellwahltaste**.

   Im Display wird `Hinweiston` und der Aliasname oder die ID des Funkgeräts angezeigt. Die grüne LED leuchtet.

2. Warten Sie auf eine Quittierung.

   Wird die Rufhinweis-Quittierung empfangen, wird im Display der positive Kurzhinweis angezeigt.

   Wird die Rufhinweis-Quittierung nicht empfangen, wird im Display der negative Kurzhinweis angezeigt.

7.6.15.3

Tätigen von Rufhinweisen mithilfe der Kontaktliste

Führen Sie die Vorgehensweise zum Tätigen von Rufhinweisen mithilfe der Kontaktliste auf Ihrem Funkgerät durch.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis Kontakte. Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis zum gewünschten Aliasnamen oder zur gewünschten ID.Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis Hinweiston. Drücken Sie OK, um die Option auszuwählen.

Im Display wird Hinweiston und der Aliasname oder die ID des Funkgeräts angezeigt. Die grüne LED leuchtet.

5 Warten Sie auf eine Quittierung.

- Wird die Rufhinweis-Quittierung empfangen, wird im Display der positive Kurzhinweis angezeigt.
- Wird die Rufhinweis-Quittierung nicht empfangen, wird im Display der negative Kurzhinweis angezeigt.

7.6.16

Stummschaltmodus

Der Stummschalt-Modus stellt dem Benutzer eine Möglichkeit zur Verfügung, sämtliche akustischen Signale des Funkgeräts stummzuschalten.

Sobald der Stummschalt-Modus initiiert wurde, werden alle akustischen Signale stummgeschaltet, mit Ausnahme der

Funktionen mit höherer Priorität wie etwa Notfall-Funktionen.

Beim Beenden des Stummschalt-Modus nimmt das Funkgerät die Wiedergabe von laufenden Tönen oder Audio-Übertragungen wieder auf.

HINWEIS:
Dies ist eine käufliche Funktion. Weitere Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator.

7.6.16.1

Einschalten des Stummschalt-Modus

Führen Sie die Vorgehensweise zum Einschalten des Stummschalt-Modus durch.

Führen Sie einen der folgenden Schritte aus:

- Rufen Sie diese Funktion über die programmierte Taste **Stummschalt-Modus** auf.
- Der Zugriff auf diese Funktion erfolgt, indem Sie das Funkgerät kurzzeitig mit dem Display nach unten hinlegen.

Abhängig von Funkgerätemodell kann die Display nach unten-Funktion über das Funkgerätemenü oder vom Systemadministrator aktiviert werden. Weitere Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator.

WICHTIG:
Der Benutzer kann zu einem bestimmten Zeitpunkt nur die Totmann-Funktion oder die Display nach unten-Funktion aktivieren. Die beiden Funktionen können nicht gleichzeitig aktiviert werden.

HINWEIS:
Display nach unten Funktion gilt nur für DP4601e .

Folgendes geschieht, wenn der Stummschalt-Modus aktiviert ist:

- Positiver Hinweiston erklingt.
- Auf dem Display wird `Stummschalt-Modus Ein` angezeigt.
- Die rote LED beginnt zu blinken und blinkt weiter, bis der Stummschalt-Modus beendet wird.
- Auf dem Display wird das Symbol **Stummschalt-Modus** auf der Startseite angezeigt.
- Das Funkgerät wird stummgeschaltet.

- Der Stummschalt-Modus-Timer beginnt mit dem Countdown der konfigurierten Dauer.

7.6.16.2

Einstellen des Stummschalt-Modus-Timers

Der Stummschalt-Modus kann durch Einstellen des Stummschalt-Modus-Timers für eine vorkonfigurierte Dauer aktiviert werden. Die Timer-Dauer wird über das Funkgerätemenü konfiguriert und kann zwischen 0,5 und 6 Stunden betragen. Nach Ablauf des Timers wird der Stummschalt-Modus beendet.

Wenn der Timer bei 0 belassen wird, bleibt das Funkgerät unbeschränkt im Stummschalt-Modus, bis es wieder mit dem Display nach oben hingelegt oder die programmierte **Stummschalt-Modus**-Taste gedrückt wird.

HINWEIS:
Display nach unten-Funktion gilt nur für DP4601e.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Dienstprogramme`.Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis `Funkgeräteinstellungen`.Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis `Timer stummschalten`. Drücken Sie OK, um die Option auszuwählen.

5 Drücken Sie ▲ oder ▼ zum Bearbeiten des numerischen Werts jeder Ziffer, und drücken Sie OK.

7.6.16.3

Beenden des Stummschalt-Modus

Die Funktion kann automatisch beendet werden, sobald der Stummschalt-Modus-Timer abgelaufen ist.

Führen Sie einen der folgenden Schritte aus, um den Stummschalt-Modus manuell zu beenden:

- Drücken Sie die programmierte **Stummschalt-Modus**-Taste.
- Drücken Sie die **Sendetaste (PTT)** bei einem beliebigen Eintrag.
- Legen Sie das Funkgerät kurzzeitig mit dem Display nach unten hin.

HINWEIS:
Display nach unten-Funktion gilt nur für DP4601e.

Folgendes geschieht, wenn der Stummschalt-Modus deaktiviert ist:

- Negativer Hinweiston erklingt.
- Das Display zeigt `Stummschalt-Modus aus` an.
- Die blinkende rote LED schaltet sich aus.
- Das **Stummschalt-Modus**-Symbol verschwindet von der Startseite.
- Die Stummschaltung des Funkgeräts wird aufgehoben, und der Lautsprecherstatus wird wiederhergestellt.
- Wenn der Timer nicht abgelaufen ist, wird der Stummschalt-Modus-Timer gestoppt.

HINWEIS:
Der Stummschalt-Modus wird ebenfalls beendet, wenn der Benutzer Sprache überträgt oder auf einen nicht programmierten Kanal wechselt.

7.6.17
Notruf

Ein Notsignal dient dazu, auf eine kritische Situation aufmerksam zu machen. Sie können einen Notruf jederzeit absetzen, auch wenn es Aktivitäten auf dem aktuellen Kanal gibt.

Ihr Händler kann festlegen, wie lange die vorprogrammierte **Notruftaste** gedrückt werden muss, allerdings ist die Dauer für das lange Drücken die gleiche wie bei allen anderen Tasten:

Kurzer Tastendruck
Dauer zwischen 0,05 Sekunden und 0,75 Sekunden.

Langer Tastendruck
Dauer zwischen 1,00 und 3,75 Sekunden.

Die **Notruftaste** ist mit der Notruf-Ein/Aus-Funktion belegt. Für Informationen über die zugewiesene Funktionsweise der **Notruftaste** wenden Sie sich bitte an Ihren Händler.

HINWEIS:
Wenn ein kurzes Drücken der **Notruftaste** den Notrufmodus startet, beendet ein langes Drücken der gleichen Taste den Notrufmodus.

Wenn ein langes Drücken der **Notruftaste** den Notrufmodus startet, beendet ein kurzes Drücken der gleichen Taste den Notrufmodus.

Ihr Funkgerät unterstützt drei Arten von Notsignalen:

- Notrufalarm
- Notsignal mit Ruf
- Notsignal mit anschließender Sprache

HINWEIS:
Der vorprogrammierten Notruftaste kann jeweils nur **einer** der oben angeführten Notsignale zugewiesen werden.

Darüber hinaus gibt es vier unterschiedliche Notsignaltypen:

Regulär
Das Funkgerät überträgt ein Alarmsignal und gibt akustische und/oder optische Hinweise aus.

„Silent“
Das Funkgerät überträgt ein Alarmsignal und gibt keine akustischen und/oder optischen Hinweise aus. Das Funkgerät empfängt Rufe ohne Ton über den Lautsprecher, bis die programmierte Sendedauer für das *Notrufmikrofon* abgelaufen ist und/oder bis Sie die **Sendetaste (PTT)** drücken.

Still mit Sprache
Das Funkgerät überträgt ein Alarmsignal ohne akustische und optische Hinweise, erlaubt aber die Ausgabe eingehender Anrufe über den Lautsprecher. Wenn *Notrufmikrofon* aktiviert ist, erklingen eingehende Rufe nach dem Ende der programmierten Sendedauer für *Notrufmikrofon* über den Lautsprecher. Diese Hinweise erscheinen nur dann, wenn Sie die **Sendetaste (PTT)** drücken.

7.6.17.1
Senden von Notrufsignalen

Mit dieser Funktion senden Sie ein Notsignal, d. h. ein Signal ohne Sprache, das einen Hinweis auf einer Gruppe von Funkgeräten auslöst. Ihr Funkgerät gibt keine akustischen oder visuellen Signale während des Notrufmodus aus, wenn es stummgeschaltet ist.

Führen Sie die Vorgehensweise zum Senden von Notrufsignalen auf Ihrem Funkgerät durch.

1 Drücken Sie die programmierte **Notrufeinschalttaste**.

Sie sehen eines der folgenden Ergebnisse:

- Im Display wird `Tx Alarm` und der Aliasname des Zielgeräts angezeigt.
- Im Display wird `Tx Telegramm` und der Aliasname des Zielgeräts angezeigt.

Die grüne LED leuchtet. Das **Notruf**-Symbol wird angezeigt.

HINWEIS:
Wenn programmiert, erklingt der Notsuchton. Der Ton wird stummgeschaltet, wenn das Funkgerät Sprache sendet oder empfängt, und er stoppt, wenn das Funkgerät den Notruf-Modus verlässt. Der Notsuchton kann über CPS programmiert werden.

2 Warten Sie auf eine Quittierung.

Bei erfolgreicher Durchführung:

- Der Notrufton ertönt.
- Die rote LED blinkt.
- Im Display wird `Alarm gesendet` angezeigt.

Bei nicht erfolgreicher Durchführung, wenn alle Versuche durchgeführt wurden:

- Ein Hinweiston ertönt.
- Das Display zeigt `Alarm fehlg` an.

Das Funkgerät verlässt den Notsignalmodus und kehrt zum Ausgangsbildschirm zurück.

7.6.17.2

Senden von Notrufsignalen mit Ruf

Mithilfe dieser Funktion können Sie ein Notsignal mit Ruf an eine Gruppe von Funkgeräten senden. Nach erfolgter Quittierung durch ein Funkgerät in der Gruppe können die Funkgeräte der Gruppe auf einem vorprogrammierten Notrufkanal miteinander kommunizieren.
Führen Sie die Vorgehensweise zum Senden von Notrufsignalen mit Ruf auf Ihrem Funkgerät durch.

1 Drücken Sie die programmierte **Notrufeinschalttaste**.

Sie sehen Folgendes:

- Im Display wird `Tx Telegramm` und der Aliasname des Zielgeräts angezeigt.

Die grüne LED leuchtet. Das **Notruf**-Symbol wird angezeigt.

HINWEIS:
Wenn programmiert, erklingt der Notsuchton. Der Ton wird stummgeschaltet, wenn das Funkgerät Sprache sendet oder empfängt, und er stoppt, wenn das Funkgerät den Notruf-Modus verlässt.Der Notsuchton kann durch Ihren Händler oder Systemadministrator programmiert werden.

2 Warten Sie auf eine Quittierung.

Bei erfolgreicher Durchführung:

- Der Notrufton ertönt.
- Die rote LED blinkt.
- Im Display wird `Alarm gesendet` angezeigt.
- Sobald auf dem Display `Notruf` und die Zielgruppen-Aliasnamen anzeigt werden, wird das Funkgerät auf Notrufmodus geschaltet.

3 Drücken Sie zum Durchführen des Rufs die **Sendetaste (PTT)**.

Die grüne LED leuchtet. Das Display zeigt das **Gruppenruf**-Symbol an.

4 Führen Sie einen der folgenden Schritte aus:

- Warten Sie, bis der Freiton verklungen ist, und sprechen Sie deutlich in das Mikrofon.
- Warten Sie, bis der **PTT**-Mithörton verstummt, und sprechen Sie dann deutlich in das Mikrofon.

5 Lassen Sie die **PTT**-Taste los, um den Gesprächspartner zu hören.

Im Display werden der Anrufer und die Gruppen-Aliase angezeigt.

6 Ist die Funktion „Kanal frei-Anzeige“ aktiviert, hören Sie einen kurzen Hinweiston, sobald die **Sendetaste (PTT)** am sendenden Funkgerät freigegeben wird, der Ihnen mitteilt, dass Sie nun auf diesem Kanal antworten können. Drücken Sie zum Beantworten des Anrufs die **Sendetaste** (PTT).

7 Um den Notrufmodus nach dem Ruf zu verlassen, drücken Sie die Taste **Notruf aus**.

Das Funkgerät kehrt zum Startbildschirm zurück.

7.6.17.3

Notsignale mit anschließender Sprache

Mit dieser Funktion senden Sie ein Notsignal mit nachfolgendem Sprachruf an eine Gruppe von Funkgeräten. Ihr Funkgerät wird automatisch aktiviert, sodass Sie ohne Drücken der Sendetaste **(PTT)** mit der Funkgerätgruppe kommunizieren können. Dieser Modus mit aktiviertem Mikrofon wird auch *Notrufmikrofon* genannt.

Bei aktiviertem Notrufzyklusbetrieb werden für eine einprogrammierte Dauer der *Mikrofon-Bereitschaftsmodus* und die Empfangszeit abwechselnd wiederholt. Während des Notrufzyklusbetriebs werden empfangene Rufe über den Lautsprecher ausgegeben.

Wenn Sie während der vorprogrammierten Empfangszeit die Sendetaste **(PTT)** drücken, hören Sie einen Sperrton. Dieser Ton weist Sie darauf hin, dass Sie die Sendetaste **(PTT)** freigeben müssen. Das Funkgerät reagiert nicht auf das Drücken der Sendetaste **(PTT)** und bleibt im Notruf-Modus.

Wenn Sie die **Sendetaste (PTT)** bei aktiviertem *Hot Mic*-Modus drücken und sie bis nach Ablauf der Dauer des *Hot Mic*-Modus gedrückt halten, sendet das Funkgerät weiterhin, bis Sie die **Sendetaste (PTT)** loslassen.

Wird eine Notsignalanforderung nicht beantwortet, versucht das Funkgerät nicht noch einmal, die Anforderung zu senden, sondern ruft den *Mikrofon-Bereitschaftsmodus* direkt auf.

HINWEIS:
Von einigen Zubehörteilen wird der *Mikrofon-Bereitschaftsmodus* möglicherweise nicht unterstützt. Weitere Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator.

7.6.17.4

Senden von Notrufsignalen mit nachfolgendem Sprachruf

Führen Sie die Vorgehensweise zum Senden von Notrufsignalen mit nachfolgendem Sprachruf auf Ihrem Funkgerät durch.

1 Drücken Sie die programmierte **Notrufeinschalttaste**.

Sie sehen eines der folgenden Ergebnisse:

- Im Display wird `Tx Alarm` und der Aliasname des Zielgeräts angezeigt.
- Im Display wird `Tx Telegramm` und der Aliasname des Zielgeräts angezeigt.

Die grüne LED leuchtet. Das **Notruf**-Symbol wird angezeigt.

2 Sobald das Display `Alarm gesendet` anzeigt, sprechen Sie deutlich in das Mikrofon.

Das Funkgerät stoppt den Sendevorgang automatisch:

- Bei aktiviertem Notrufzyklusbetrieb endet die Dauer des Zyklus zwischen *Hot Mic* und dem Empfang von Rufen.
- Bei deaktiviertem Notrufzyklusbetrieb endet die Dauer des *Hot Mic*-Modus.

3 Drücken Sie zum Verlassen des Notrufmodus die **Notruf aus**-Taste.

Das Funkgerät kehrt zum Startbildschirm zurück.

7.6.17.5

Empfangen von Notrufsignalen

Führen Sie die Vorgehensweise zum Empfangen von Notrufsignalen auf Ihrem Funkgerät durch.

Wenn Sie ein Notrufsignal empfangen:

- Ein Hinweiston ertönt.
- Die rote LED blinkt.
- Das Display zeigt das **Notfall-**-Symbol und den Anrufer-Alias des Notrufenden. Im Fall von mehreren Notrufen werden alle Anrufer-Aliasnamen der Notrufenden in der Notsignal-Liste angezeigt.

1 Führen Sie einen der folgenden Schritte aus:

- Wenn es nur einen Alarm gibt, drücken Sie OK, um weitere Informationen anzuzeigen.
- Wenn es mehrere Alarme gibt, drücken Sie ▲ oder ▼ bis zum gewünschten Aliasnamen, und drücken Sie OK, um weitere Informationen anzuzeigen.

2 Drücken Sie OK, um die Aktionsoptionen anzuzeigen.

3 Drücken Sie ↩, und wählen Sie Ja, um die Alarmliste zu verlassen.

4 Drücken Sie OK, um das Menü aufzurufen.

5 Wählen Sie Alarmliste, um die Alarmliste wieder anzuzeigen.

7.6.17.6

Antworten auf Notrufsignale

Führen Sie die Vorgehensweise zum Antworten auf Notrufsignale auf Ihrem Funkgerät durch.

1 Vergewissern Sie sich, dass im Display die Alarmliste angezeigt wird. Drücken Sie ▲ oder ▼ bis zum gewünschten Aliasnamen oder zur gewünschten ID.

2 Ist die Funktion „Kanal frei-Anzeige“ aktiviert, hören Sie einen kurzen Hinweiston, sobald die **Sendetaste (PTT)** am sendenden Funkgerät freigegeben wird, der Ihnen mitteilt, dass Sie nun auf diesem Kanal antworten können. Um der gleichen Gruppe, an die auch das Notrufsignal gerichtet war, einen normalen Sprachruf (nicht Notruf) zu senden, drücken Sie die Sendetaste (**PTT**).

Die grüne LED leuchtet. Das Funkgerät bleibt im Notrufmodus.

3 Führen Sie einen der folgenden Schritte aus:

- Warten Sie, bis der Freiton verklungen ist, und sprechen Sie deutlich in das Mikrofon.
- Warten Sie, bis der **PTT**-Mithörton verstummt, und sprechen Sie dann deutlich in das Mikrofon.

4 Lassen Sie die **PTT**-Taste los, um den Gesprächspartner zu hören.

Wenn das Funkgerät, das den Notruf gesendet hat, antwortet:

- Die grüne LED blinkt.

- Im Display werden das **Gruppenruf**-Symbol und die ID, die ID des übertragenden Funkgeräts und die Alarmliste angezeigt.

Notrufsprache kann nur von dem Funkgerät gesendet werden, das den Notruf einleitet. Alle anderen Funkgeräte, einschließlich des Funkgeräts, das den Notruf empfängt, senden Sprache außerhalb des Notrufbetriebs.

7.6.17.7

Verlassen des Notruf-Modus nach dem Empfangen des Notrufs

Gehen Sie wie folgt vor, um den Notrufmodus nach dem Empfang eines Notfallalarms zu verlassen.

- Löschen Sie die Alarmobjekte.
- Schalten Sie das Funkgerät aus.

7.6.17.8

Neuinitialisierung des Notruf-Modus

Dieses Merkmal trifft nur auf das Funkgerät zu, das das Notsignal sendet. Führen Sie die Vorgehensweise zur Neuinitialisierung des Notruf-Modus auf Ihrem Funkgerät durch.

Führen Sie einen der folgenden Schritte aus:

- Wechseln Sie den Kanal, während sich das Funkgerät im Notruf-Modus befindet. Das Funkgerät verlässt den Notruf-Modus und leitet den Notruf erneut ein, wenn das Notsignal auf dem neuen Kanal aktiviert ist.
- Drücken Sie während der Initiierung/Übertragung eines Notrufs die programmierte **Notrufeinschalttaste**. Das Funkgerät verlässt den Modus und initialisiert den Notruf-Modus neu.

7.6.17.9

Verlassen des Notruf-Modus

Dieses Merkmal trifft nur auf das Funkgerät zu, das das Notsignal sendet.

Das Gerät beendet den Notruf-Modus in folgenden Fällen:

- Es wird eine Notrufalarmquittung empfangen (gilt nur für Notsignal).

- Alle Versuche, den Alarm zu senden, wurden bereits unternommen.
- Das Funkgerät wird ausgeschaltet.

HINWEIS:
Wenn das Funkgerät wieder eingeschaltet wird, leitet es den Notruf-Modus nicht automatisch wieder ein.

Führen Sie die Vorgehensweise zum Verlassen des Notruf-Modus auf Ihrem Funkgerät durch.

Führen Sie einen der folgenden Schritte aus:

- Drücken Sie die programmierte Taste **Notruf Aus**.
- Schalten Sie das Funkgerät aus und anschließend wieder ein, falls Ihr Funkgerät dazu programmiert wurde, auch nach Empfang einer Bestätigung auf dem Notrufkanal zu verbleiben.
- Wechseln Sie den Kanal zu einem Kanal, auf dem kein Notrufsystem konfiguriert ist.
  Auf dem Display wird `Kein Notruf` angezeigt.

7.6.17.10

Löschen Sie ein Alarmelement aus der Alarmliste

Befolgen Sie die Vorgehensweise, um die Alarmelemente aus der Alarmliste zu löschen und den Notruf-Modus zu verlassen.

1. Drücken Sie OK, um das Menü aufzurufen.
2. Drücken Sie ▲ oder ▼ bis `Alarmliste`. Drücken Sie OK, um die Option auszuwählen.
3. Drücken Sie ▲ oder ▼ bis zum gewünschten Alarmelement. Drücken Sie OK, um die Option auszuwählen.
4. Drücken Sie ▲ oder ▼ bis `Löschen`. Drücken Sie OK, um die Option auszuwählen.

7.6.18

Totmannfunktion

HINWEIS:
Totmannfunktion gilt nur für DP4601e .

Diese Funktion löst einen Notruf aus, falls sich die Bewegungen des Funkgeräts ändern, d. h. wenn das Funkgerät geneigt wird oder es sich während einer bestimmten Zeit bewegt bzw. nicht bewegt.

Wenn das Funkgerät während einer vorprogrammierten Zeit bewegt wurde, warnt es den Benutzer über eine Audioanzeige, dass eine Bewegungsänderung erkannt wurde.

Hat der Benutzer auch nach Ablauf des vordefinierten Ansprechzeit-Timers noch nicht quittiert, löst das Funkgerät einen Notrufalarm oder einen Notruf aus. Sie können den Ansprechzeit-Timer über CPS programmieren.

7.6.18.1

Ein-/Ausschalten der Totmann-Funktion

HINWEIS:
Die vorprogrammierte **Totmann**-Taste und die Totmanneinstellungen werden über CPS konfiguriert. Klären Sie mit Ihrem Händler oder Systemadministrator, wie das Funkgerät konfiguriert wurde.

Wenn Sie die Totmann-Funktion deaktivieren, ertönt mehrmals der programmierte Signalton, bis die Totmann-Funktion aktiviert wird. Ein Gerätefehlerton ertönt, wenn die Totmann-Funktion beim Einschalten nicht funktioniert. Der Gerätefehlerton ertönt so lange, bis das Funkgerät den normalen Betrieb wieder aufgenommen hat.

Sie können diese Funktion aktivieren bzw. deaktivieren, indem Sie eine der folgenden Aktionen ausführen:

- Drücken Sie die vorprogrammierte **Totmann**-Taste, um die Funktion ein- oder auszuschalten.
- Rufen Sie diese Funktion über das Menü auf.

  a. Drücken Sie OK , um das Menü aufzurufen.

b. Drücken Sie ▲ oder ▼ bis

`Dienstprogramme`.Drücken Sie OK , um die Option auszuwählen.

c. Drücken Sie ▲ oder ▼ bis

`Funkgeräteinstellungen`.Drücken Sie OK , um die Option auszuwählen.

d. Drücken Sie ▲ oder ▼ bis `Totmann`. Drücken Sie OK , um die Option auszuwählen.

Sie können durch Drücken von ◀ oder ▶ die ausgewählte Option ändern.

e. Drücken Sie OK, um die Totmann-Funktion zu aktivieren oder deaktivieren.

Wenn diese Option aktiviert ist, wird ✓ neben `Aktiviert` angezeigt.

Wenn diese Option deaktiviert ist, wird ✓ neben `Aktiviert` angezeigt.

Textnachrichten (SMS)

Ihr Funkgerät kann von einem anderen Funkgerät oder einer Textnachricht-Anwendung Daten empfangen, beispielsweise Textnachrichten.

Es gibt zwei Arten von Textnachrichten, DMR-Kurztextnachrichten (Digital Mobile Radio) und Textnachrichten. Die maximale Länge einer DMR-Kurztextnachricht beträgt 23 Zeichen. Die maximale Länge einer Textnachricht beträgt 280 Zeichen, einschließlich der Betreffzeile. Die Betreffzeile wird nur angezeigt, wenn Sie Nachrichten von E-Mail-Anwendungen empfangen.

HINWEIS:
Die maximale Länge gilt nur für Modelle mit der neuesten Software und Hardware. Bei Funkgerätemodellen mit älterer Software und Hardware beträgt die maximale Länge für eine Textnachricht 140 Zeichen. Weitere Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator.

In arabischer Sprache wird der Text von rechts nach links eingegeben.

7.6.19.1

Textnachrichten

Die Textnachrichten werden im Posteingang gespeichert und nach Eingang geordnet, d. h. die zuletzt eingegangene Nachricht steht an erster Stelle.

7.6.19.1.1

Anzeigen von Textnachrichten

Führen Sie die Vorgehensweise zum Anzeigen von Textnachrichten auf Ihrem Funkgerät durch.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Nachrichten`.

Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis `Inbox`. Drücken Sie OK, um die Option auszuwählen.

Wenn der Posteingang leer ist:

- Auf dem Display wird `Liste leer` angezeigt.
- Ein Ton erklingt, wenn der Tastaturton eingeschaltet ist.

4 Drücken Sie ▲ oder ▼ bis zur gewünschten Nachricht. Drücken Sie OK, um die Option auszuwählen.

Auf dem Display wird eine Betreffzeile angezeigt, wenn die Nachricht von einem E-Mail-Programm stammt.

7.6.19.1.2

Anzeigen von Telemetriestatus-Textnachrichten

Folgen Sie der Vorgehensweise zum Anzeigen einer Telemetriestatus-Textnachricht aus dem Posteingang.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Nachrichten`.

Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis `Inbox`. Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis zur gewünschten Nachricht. Drücken Sie OK, um die Option auszuwählen.

Telemetriestatus-Textnachrichten können Sie nicht beantworten.

Das Display zeigt `Telemetrie: <Telemetriestatus-Textnachricht>`.

5 Drücken Sie ⌂ lang, um zum Startbildschirm zurückzukehren.

7.6.19.1.3

Anzeigen gespeicherter Textnachrichten

Führen Sie die Vorgehensweise zum Anzeigen von gespeicherten Textnachrichten auf Ihrem Funkgerät durch.

1 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie die programmierte Taste **Textnachricht**. Lesen Sie weiter unter Schritt 3.
- Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Nachrichten`. Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis `Entwürfe`. Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis zur gewünschten Nachricht. Drücken Sie OK, um die Option auszuwählen.

7.6.19.1.4

Antworten auf Textnachrichten

Führen Sie die Vorgehensweise zum Antworten auf Textnachrichten auf Ihrem Funkgerät durch.

Wenn Sie eine Textnachricht erhalten:

- Auf dem Display wird die Benachrichtigungsliste mit dem Alias oder der ID des Absenders angezeigt.
- Auf dem Display wird das **Nachrichten**-Symbol angezeigt.

HINWEIS:
Wird die **Sendetaste (PTT)** gedrückt, verlässt das Funkgerät den Textnachrichten-Hinweisbildschirm und baut einen Einzel- oder Gruppenruf an den Sender der Nachricht auf.

1 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie ▲ oder ▼ bis `Lesen`. Drücken Sie OK, um die Option auszuwählen.
  Das Display zeigt die Textnachricht an. Auf dem Display wird eine Betreffzeile angezeigt, wenn die Nachricht von einem E-Mail-Programm stammt.
- Drücken Sie ▲ oder ▼ bis `Später lesen`.
  Drücken Sie OK, um die Option auszuwählen.
  Das Funkgerät kehrt zum vor Erhalt der Textnachricht angezeigten Bildschirm zurück.
- Drücken Sie ▲ oder ▼ bis `Löschen`. Drücken Sie OK, um die Option auszuwählen.

2 Drücken Sie ⌂, um zum Posteingang zurückzukehren.

7.6.19.1.5

Antworten auf Textnachrichten

Führen Sie die Vorgehensweise zum Antworten auf Textnachrichten auf Ihrem Funkgerät durch.

1 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie die programmierte Taste **Textnachricht**. Fahren Sie mit Schritt Schritt 3 fort.
- Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Nachrichten`.
Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis Inbox. Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis zur gewünschten Nachricht. Drücken Sie OK, um die Option auszuwählen.

Auf dem Display wird eine Betreffzeile angezeigt, wenn die Nachricht von einem E-Mail-Programm stammt.

5 Drücken Sie OK, um das Untermenü aufzurufen.

6 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie ▲ oder ▼ bis Antw.. Drücken Sie OK, um die Option auszuwählen.
- Drücken Sie ▲ oder ▼ bis KurzAw. Drücken Sie OK, um die Option auszuwählen.

Ein blinkender Cursor wird angezeigt. Sie können Ihre Nachricht bei Bedarf schreiben oder bearbeiten.

7 Drücken Sie OK, nachdem Sie die Nachricht erstellt haben.

Im Display wird eine Zwischenstand-Kurznotiz angezeigt und damit bestätigt, dass Ihre Nachricht gesendet wird.

8 Warten Sie auf eine Quittierung.

Bei erfolgreicher Durchführung:

- Ein Hinweiston ertönt.
- Im Display wird ein positiver Kurzhinweis angezeigt.

Bei nicht erfolgreicher Durchführung:

- Ein Hinweiston ertönt.
- Im Display wird ein negativer Kurzhinweis angezeigt.

- Das Funkgerät kehrt zum Bildschirm `Wiederholen` zurück.

7.6.19.1.6

Weiterleiten von Textnachrichten

Führen Sie die Vorgehensweise zum Weiterleiten von Textnachrichten auf Ihrem Funkgerät durch.

Auf dem Bildschirm `Wiederholen`:

1 Drücken Sie ▲ oder ▼ bis `Weiterleiten`, und drücken Sie dann OK, um dieselbe Nachricht an ein anderes Funkgerät, einen anderen Gruppen-Alias oder eine andere Gruppen-ID zu senden.

2 Drücken Sie ▲ oder ▼ bis zum gewünschten Aliasnamen oder zur gewünschten ID.Drücken Sie OK, um die Option auszuwählen.

Im Display wird eine Zwischenstand-Kurznotiz angezeigt und damit bestätigt, dass Ihre Nachricht gesendet wird.

3 Warten Sie auf eine Quittierung.

Bei erfolgreicher Durchführung:

- Ein positiver Hinweiston erklingt.
- Im Display wird ein positiver Kurzhinweis angezeigt.

Bei nicht erfolgreicher Durchführung:

- Ein negativer Hinweiston erklingt.
- Im Display wird ein negativer Kurzhinweis angezeigt.

7.6.19.1.7

Erneutes Senden von Textnachrichten

Führen Sie die Vorgehensweise zum erneuten Senden von Textnachrichten auf Ihrem Funkgerät durch.

Auf dem Bildschirm `Wiederholen`:

Drücken Sie OK, um dieselbe Nachricht erneut an denselben Aliasnamen oder dieselbe ID des Funkgeräts bzw. der Gruppe zu senden.

Bei erfolgreicher Durchführung:

- Ein positiver Hinweiston erklingt.
- Im Display wird ein positiver Kurzhinweis angezeigt.

Bei nicht erfolgreicher Durchführung:

- Ein negativer Hinweiston erklingt.
- Im Display wird ein negativer Kurzhinweis angezeigt.
- Das Funkgerät kehrt zum Bildschirm `Wiederholen` zurück.

7.6.19.1.8

Löschen von Textnachrichten aus dem Posteingang

Führen Sie die Vorgehensweise zum Löschen von Textnachrichten aus der Inbox auf Ihrem Funkgerät durch.

1 Führen Sie einen der folgenden Schritte aus:
   - Drücken Sie die programmierte Taste **Textnachricht**. Lesen Sie weiter unter Schritt 3.
   - Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Nachrichten`.

   Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis `Inbox`. Drücken Sie OK, um die Option auszuwählen.

   Wenn der Posteingang leer ist:
   - Auf dem Display wird `Liste leer` angezeigt.
   - Ein Hinweiston ertönt.

4 Drücken Sie ▲ oder ▼ bis zur gewünschten Nachricht. Drücken Sie OK, um die Option auszuwählen.

   Auf dem Display wird eine Betreffzeile angezeigt, wenn die Nachricht von einem E-Mail-Programm stammt.

5 Drücken Sie OK, um das Untermenü aufzurufen.

6 Drücken Sie ▲ oder ▼ bis Löschen. Drücken Sie OK, um die Option auszuwählen.

7 Drücken Sie ▲ oder ▼ bis Ja. Drücken Sie OK, um die Option auszuwählen.

Im Display wird ein positiver Kurzhinweis angezeigt. Anschließend wird wieder der Posteingang angezeigt.

7.6.19.1.9

Löschen aller Textnachrichten aus dem Posteingang

Führen Sie die Vorgehensweise zum Löschen aller Textnachrichten aus dem Posteingang auf Ihrem Funkgerät durch.

1 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie die programmierte Taste **Textnachricht**. Lesen Sie weiter unter Schritt 3.
- Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis Nachrichten.

Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis Inbox. Drücken Sie OK, um die Option auszuwählen.

Wenn der Posteingang leer ist:

- Auf dem Display wird Liste leer angezeigt.
- Ein Hinweiston ertönt.

4 Drücken Sie ▲ oder ▼ bis Alle löschen.

Drücken Sie OK, um die Option auszuwählen.

5 Drücken Sie ▲ oder ▼ bis Ja. Drücken Sie OK, um die Option auszuwählen.

Im Display wird ein positiver Kurzhinweis angezeigt.

7.6.19.1.10

Löschen gespeicherter Textnachrichten aus dem Entwurfsordner

Führen Sie die Vorgehensweise zum Löschen aller Textnachrichten aus dem Posteingang auf Ihrem Funkgerät durch.

1 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie die programmierte Taste **Textnachricht**. Lesen Sie weiter unter Schritt 3.
- Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Nachrichten`. Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis `Entwürfe`. Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis zur gewünschten Nachricht. Drücken Sie OK, um die Option auszuwählen.

5 Drücken Sie ▲ oder ▼ bis `Löschen`. Drücken Sie OK zum Löschen der Textnachricht.

7.6.19.2

Gesendete Textnachrichten

Nachdem eine Nachricht an ein anderes Funkgerät gesendet wurde, wird sie im Ordner „Ausgang“ gespeichert. Die zuletzt gesendete Textnachricht wird jeweils an die erste Stelle des Ordners „Ausgang“ gestellt. Sie können eine gesendete Textnachricht erneut senden, weiterleiten oder löschen.

Der Ordner „Ausgang“ kann bis zu 30 gesendete Nachrichten aufnehmen. Sobald der Ordner voll ist, wird die älteste Textnachricht im Ordner automatisch durch die als nächstes gesendete Textnachricht ersetzt.

Wenn Sie den Bildschirm zum Senden einer Nachricht verlassen, während die Nachricht gesendet wird, aktualisiert das Funkgerät den Status dieser Nachricht im

Ausgangsordner, ohne dies im Display oder durch Abgeben eines Hinweistons anzuzeigen.

Wechselt das Funkgerät in einen anderen Modus oder wird es ausgeschaltet, bevor der Status der Nachricht im Ordner „Ausgang“ aktualisiert wird, kann das Funkgerät die Übertragung anhängiger Nachrichten nicht abschließen und kennzeichnet diese automatisch mit dem Symbol für **Fehler beim Senden**.

Das Funkgerät unterstützt bis zu maximal fünf anhängige Nachrichten. Sind bereits fünf Nachrichten anhängig, d. h. noch zu senden, kann das Funkgerät keine weitere Nachricht senden und kennzeichnet diese automatisch mit dem Symbol für **Fehler beim Senden**.

Wenn Sie zu einem beliebigen Zeitpunkt lange drücken, kehrt das Funkgerät zum Startbildschirm zurück.

HINWEIS:
Wenn der Kanaltyp, z. B. konventioneller digitaler Kanal oder Capacity Plus-Kanal, nicht übereinstimmt, können nur gesendete Nachrichten bearbeitet, weitergeleitet oder gelöscht werden.

7.6.19.2.1

Anzeigen gesendeter Textnachrichten

Führen Sie die Vorgehensweise zum Anzeigen von gesendeten Nachrichten auf Ihrem Funkgerät durch.

1. Führen Sie einen der folgenden Schritte aus:
   - Drücken Sie die programmierte Taste **Textnachricht**. Lesen Sie weiter unter Schritt 3.
   - Drücken Sie OK, um das Menü aufzurufen.
2. Drücken Sie ▲ oder ▼ bis `Nachrichten`.

   Drücken Sie OK, um die Option auszuwählen.
3. Drücken Sie ▲ oder ▼ bis `Ausgang`. Drücken Sie OK, um die Option auszuwählen.

   Der Ordner für gesendete Nachrichten ist leer:
   - Auf dem Display wird `Liste leer` angezeigt.
   - Ein tiefer Ton erklingt, wenn der Tastaturton eingeschaltet ist.

4 Drücken Sie ▲ oder ▼ bis zur gewünschten Nachricht. Drücken Sie OK, um die Option auszuwählen.

Auf dem Display wird eine Betreffzeile angezeigt, wenn die Nachricht von einem E-Mail-Programm stammt.

7.6.19.2.2

Senden von gesendeten Textnachrichten

Gehen Sie wie folgt vor, um eine gesendete Textnachricht auf Ihr Funkgerät zu senden.

Wenn Sie eine gesendete Nachricht anzeigen:

1 Drücken Sie OK, während Sie die Nachricht anzeigen.

2 Drücken Sie ▲ oder ▼ bis `Wiederholen`.

Drücken Sie OK, um die Option auszuwählen.

Im Display wird eine Zwischenstand-Kurznotiz angezeigt und damit bestätigt, dass Ihre Nachricht gesendet wird.

3 Warten Sie auf eine Quittierung.

Bei erfolgreicher Durchführung:

- Ein positiver Hinweiston erklingt.
- Im Display wird ein positiver Kurzhinweis angezeigt.

Bei nicht erfolgreicher Durchführung:

- Ein negativer Hinweiston erklingt.
- Im Display wird ein negativer Kurzhinweis angezeigt.
- Das Funkgerät fährt mit dem Bildschirm `Wiederholen` fort. Weitere Informationen finden Sie unter Erneutes Senden von Textnachrichten auf Seite 161.

7.6.19.2.3

Löschen aller gesendeten Textnachrichten aus dem Ordner „Gesendete Elemente“

Führen Sie die Vorgehensweise zum Löschen aller gesendeten Textnachrichten aus den Ordner „Ausgang“ auf Ihrem Funkgerät durch.

1 Führen Sie einen der folgenden Schritte aus:
   - Drücken Sie die programmierte Taste **Textnachricht**. Lesen Sie weiter unter Schritt 3.
   - Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Nachrichten`.

   Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis `Ausgang`. Drücken Sie OK, um die Option auszuwählen.

   Der Ordner für gesendete Nachrichten ist leer:
   - Auf dem Display wird `Liste leer` angezeigt.
   - Ein Hinweiston ertönt.

4 Drücken Sie ▲ oder ▼ bis `Alle löschen`.

   Drücken Sie OK, um die Option auszuwählen.

5 Führen Sie einen der folgenden Schritte aus:
   - Drücken Sie ▲ oder ▼ bis `Ja`. Drücken Sie OK, um die Option auszuwählen.
     Im Display wird ein positiver Kurzhinweis angezeigt.
   - Drücken Sie ▲ oder ▼ bis `Nein`. Drücken Sie OK, um die Option auszuwählen.
     Das Funkgerät wechselt zum vorherigen Bildschirm.

7.6.19.3

Quick Text-Nachrichten

7.6.19.3.1

Senden von Quick Text-Nachrichten

Führen Sie die Vorgehensweise zum Senden von vordefinierten Quick Text-Nachrichten auf Ihrem Funkgerät an einen vordefinierten Aliasnamen durch.

1 Drücken Sie die vorprogrammierte **Schnellwahltaste**.

Im Display wird eine Zwischenstand-Kurznotiz angezeigt und damit bestätigt, dass Ihre Nachricht gesendet wird.

2 Warten Sie auf eine Quittierung.

Bei erfolgreicher Durchführung:

- Ein positiver Hinweiston erklingt.
- Im Display wird ein positiver Kurzhinweis angezeigt.

Bei nicht erfolgreicher Durchführung:

- Ein negativer Hinweiston erklingt.
- Im Display wird ein negativer Kurzhinweis angezeigt.
- Das Funkgerät fährt mit dem Bildschirm `Wiederholen` fort. Weitere Informationen finden Sie unter Erneutes Senden von Textnachrichten auf Seite 161.

7.6.20

Analog-Nachrichtengeber

Ihr Funkgerät kann vorprogrammierte Nachrichten aus der Nachrichtenliste an einen Funkgerät-Aliasnamen oder den Dispatcher senden.

7.6.20.1

Senden von MDC-Kodierungsnachrichten an Dispatcher

Führen Sie die Vorgehensweise beim Senden von MDC-Kodierungsnachrichten an Dispatcher auf Ihrem Funkgerät durch.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Nachricht`. Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis `Quick Text`. Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis zur gewünschten Nachricht. Drücken Sie OK, um die Option auszuwählen.

Im Display wird eine Zwischenstand-Kurznotiz angezeigt und damit bestätigt, dass Ihre Nachricht gesendet wird.

5 Warten Sie auf eine Quittierung.

Bei erfolgreicher Durchführung:

- Ein positiver Hinweiston erklingt.
- Im Display wird ein positiver Kurzhinweis angezeigt.

Bei nicht erfolgreicher Durchführung:

- Ein negativer Hinweiston erklingt.
- Im Display wird ein negativer Kurzhinweis angezeigt.

7.6.20.2

Senden von 5-Ton-Nachrichten an Kontakte

Gehen Sie wie folgt vor, um 5-Ton-Kodierungsnachrichten an Kontakte auf Ihrem Funkgerät zu senden.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Nachricht`. Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis `Quick Text`. Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis zur gewünschten Nachricht. Drücken Sie OK, um die Option auszuwählen.

5 Drücken Sie ▲ oder ▼ bis zum gewünschten Kontakt. Drücken Sie OK, um die Option auszuwählen.

Im Display wird eine Zwischenstand-Kurznotiz angezeigt und damit bestätigt, dass Ihre Nachricht gesendet wird.

6 Warten Sie auf eine Quittierung.

Bei erfolgreicher Durchführung:

- Ein positiver Hinweiston erklingt.
- Im Display wird ein positiver Kurzhinweis angezeigt.

Bei nicht erfolgreicher Durchführung:

- Ein negativer Hinweiston erklingt.
- Im Display wird ein negativer Kurzhinweis angezeigt.

HINWEIS:
Weitere Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator.

7.6.21

Analog-Status-Update

Ihr Funkgerät kann vorprogrammierte Nachrichten aus der Statusliste, die Ihre aktuelle Tätigkeit anzeigen, an einen Funkgerätkontakt (bei 5-Ton-Folge) oder den Dispatcher (für Motorola Data Communication-Systeme) senden.

Die zuletzt quittierte Nachricht steht in der Statusliste an oberster Stelle. Die anderen Nachrichten sind in alphanumerischer Reihenfolge geordnet.

7.6.21.1

Senden von Status-Updates an vorbestimmte Kontakte

Führen Sie die Vorgehensweise zum Senden von Status-Updates an vorbestimmte Kontakte auf Ihrem Funkgerät durch.

1 Drücken Sie ▲ oder ▼ bis `Status`. Drücken Sie OK, um die Option auszuwählen.

2 Drücken Sie ▲ oder ▼ bis zum gewünschten Status. Drücken Sie OK, um die Option auszuwählen.

Wenn Sie die **PTT**-Taste in der Statusliste für 5-Ton-Systeme drücken, sendet das Funkgerät das ausgewählte Status-Update und kehrt zur Startseite zurück, um einen Sprachruf zu initiieren.

3 Drücken Sie ▲ oder ▼ bis `AlsVorg.einst`.

Drücken Sie OK, um die Option auszuwählen.

Im Display wird eine Zwischenstand-Kurznotiz angezeigt und damit bestätigt, dass Ihr Status-Update gesendet wird.

4 Warten Sie auf eine Quittierung.

Bei erfolgreicher Durchführung:

- Ein positiver Hinweiston erklingt.
- Im Display wird ein positiver Kurzhinweis angezeigt.
- Auf dem Display wird ✓ neben dem quittierten Status angezeigt.

Bei nicht erfolgreicher Durchführung:

- Ein negativer Hinweiston erklingt.
- Im Display wird ein negativer Kurzhinweis angezeigt.
- Auf dem Display wird ✓ neben dem vorherigen Status angezeigt.

Weitere Informationen zum Festlegen des Standardkontakts für 5-Ton-Systeme finden Sie unter Standardeinstellung für Kontakte auf Seite 410.

7.6.21.2

Anzeigen von 5-Ton-Status-Details

Führen Sie die Vorgehensweise zum Anzeigen von 5-Ton-Status-Details auf Ihrem Funkgerät durch.

Es wird davon ausgegangen, dass Sie einen Software-Lizenzschlüssel erworben haben.

1 Drücken Sie ▲ oder ▼ bis `Status`. Drücken Sie OK, um die Option auszuwählen.

2 Drücken Sie ▲ oder ▼ bis zum gewünschten Status. Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis `Details anzeigen`. Drücken Sie OK, um die Option auszuwählen.

Im Display werden die Einzelheiten des ausgewählten Status angezeigt.

7.6.22

Privacy

Durch den Einsatz softwaregestützter Verschlüsselung verhindert diese Funktion, wenn aktiviert, unbefugtes Zuhören auf einem Kanal. Die Signalisierungs- und Benutzeridentifikationsteile einer Übertragung werden nicht verschlüsselt.

Um verschlüsselt senden zu können, muss die Verschlüsselung für den Kanal aktiviert sein, während dies für empfangende Funkgeräte nicht erforderlich ist. Kanäle mit aktivierter Verschlüsselung können weiterhin normale (unverschlüsselte) Übertragungen empfangen.

Die Verschlüsselungsfunktion wird nicht für alle Funkgerätmodelle angeboten oder kann unterschiedlich konfiguriert werden. Weitere Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator.

Ihr Funkgerät unterstützt zwei Verschlüsselungsarten, jedoch kann dem Funkgerät nur eine zugewiesen werden. Nämlich:

- Einfache Verschlüsselung
- Verbesserte Verschlüsselung

Zum Entschlüsseln eines verschlüsselten Rufs bzw. einer Datenübertragung muss Ihr Funkgerät mit demselben Verschlüsselungsschlüssel (für einfache Verschlüsselung) oder demselben Schlüsselwert und derselben Schlüssel-ID (für erweiterte Verschlüsselung) programmiert sein wie das sendende Funkgerät.

Wenn Sie einen verschlüsselten Ruf eines Funkgeräts mit einem anderen Verschlüsselungsschlüssel oder einem anderen Schlüsselwert und einer anderen Schlüssel-ID erhalten, hören Sie entweder eine entstellte Übertragung

(einfache Verschlüsselung) oder gar nichts (erweiterte Verschlüsselung).

Je nachdem, wie Ihr Funkgerät programmiert wurde, können Funkgeräte auf einem Kanal mit aktivierter Verschlüsselung weiterhin normale (unverschlüsselte) Übertragungen empfangen. Darüber hinaus kann das Funkgerät einen Warnton ausgeben oder nicht. Auch dies richtet sich danach, wie es programmiert wurde.

Die grüne LED leuchtet, während das Funkgerät sendet. Während des Empfangs eines Rufs mit aktivierter Verschlüsselung blinkt sie schnell.

HINWEIS:
Diese Funktion ist auf Citizens Band-Kanälen nicht verfügbar, die sich auf der gleichen Frequenz befinden.

7.6.22.1

Ein- und Ausschalten des Datenschutzes

Führen Sie die Vorgehensweise zum Ein- und Ausschalten der Verschlüsselung auf Ihrem Funkgerät durch.

1 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie die programmierte Taste **Verschlüsselung**. Überspringen Sie die nachfolgenden Schritte.
- Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Dienstprogramme`.Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis `Funkgeräteinstellungen`.Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis `Verschl.`. Drücken Sie OK, um die Option auszuwählen.

5 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie ▲ oder ▼ bis `Ein`. Drücken Sie OK, um die Option auszuwählen. Im Display wird ✓ neben `Ein` angezeigt.

- Drücken Sie ▲ oder ▼ bis Aus. Drücken Sie OK, um die Option auszuwählen. Im Display wird ✓ neben Aus angezeigt.

7.6.23

Antwortsperre

Anhand dieser Funktion können Sie verhindern, dass Ihr Funkgerät auf eingehende Übertragungen reagiert.

HINWEIS:
Dies ist eine käufliche Funktion. Klären Sie mit Ihrem Händler oder Systemadministrator, wie das Funkgerät konfiguriert wurde.

Wenn aktiviert, generiert das Funkgerät keine abgehenden Übertragungen in Antwort auf eingehende Übertragungen, wie etwa Funkgerätkontrolle, Rufhinweis, Funkgerät deaktivieren, Remote-Überwachung, Automatischer Registrierungsservice (ARS), Antwort auf Einzelrufe und Senden von GNSS-Standortberichten. Ihr Funkgerät kann keine Einzelrufbestätigungen empfangen, wenn diese Funktion aktiviert ist. Das Funkgerät kann jedoch manuell Übertragungen senden.

7.6.23.1

Ein-/Ausschalten der Antwortsperre

Führen Sie die Vorgehensweise zum Ein- oder Ausschalten der Antwortsperre auf Ihrem Funkgerät durch.

Drücken Sie die programmierte **Antwortsperre**-Taste.

Bei erfolgreicher Durchführung:

- Ein positiver Hinweiston erklingt.
- Im Display wird ein kurzzeitiger positiver Kurzhinweis angezeigt.

Bei nicht erfolgreicher Durchführung:

- Ein negativer Hinweiston erklingt.
- Im Display wird ein kurzzeitiger negativer Kurzhinweis angezeigt.

7.6.24

Sicherheit

Mit dieser Funktion können Sie jedes im System befindliche Funkgerät aktivieren oder deaktivieren.

So kann z. B. ein gestohlenes Funkgerät deaktiviert und damit unbrauchbar gemacht werden oder ein wiedergefundenes Funkgerät aktiviert werden.

Es gibt zwei Möglichkeiten, ein Funkgerät zu aktivieren oder zu deaktivieren, mit Authentifizierung und ohne Authentifizierung.

„Authentifiziertes Funkgerät deaktivieren“ ist eine käufliche Funktion. Beim authentifizierten Deaktivieren des Funkgeräts ist eine Verifizierung erforderlich, wenn Sie ein Funkgerät aktivieren oder deaktivieren. Wenn Ihr Funkgerät diese Funktion auf einem Ziel-Funkgerät mit Benutzerauthentifizierung initiiert, ist die Eingabe einer Passphrase erforderlich. Die Passphrase wird auf dem Ziel-Funkgerät über CPS vorprogrammiert.

Sie erhalten keine Bestätigung, wenn Sie während des Vorgangs „Funkgerät aktivieren“ oder „Funkgerät deaktivieren“ drücken.

HINWEIS:
Weitere Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator.

7.6.24.1

Deaktivieren von Funkgeräten

Führen Sie die Vorgehensweise zum Deaktivieren Ihres Funkgeräts durch.

1. Drücken Sie die vorprogrammierte **Funkgerät deaktivieren**-Taste.
2. Drücken Sie ▲ oder ▼ bis zum gewünschten Aliasnamen oder zur gewünschten ID.
3. Drücken Sie OK, um die Option auszuwählen. Eines der folgenden Ereignisse tritt ein:
   - Das Display zeigt `Funkg.deaktiv.: <Funkgeräte-Alias oder -ID>` an. Die grüne LED blinkt.
   - Ein Bildschirm mit einer Passphrase wird angezeigt.

     Geben Sie die Passphrase ein. Drücken Sie OK, um fortzufahren.
     - Wenn die Passphrase korrekt ist, wird im Display eine Zwischenstand-Kurznotiz angezeigt und damit bestätigt, dass die

Anfrage ausgeführt wird. Die grüne LED leuchtet.

- Wenn die Passphrase nicht korrekt ist, wird im Display ein negativer Kurzhinweis angezeigt, und Sie kehren zum vorherigen Bildschirm zurück.

4 Warten Sie auf eine Quittierung.

Bei erfolgreicher Durchführung:

- Ein positiver Hinweiston erklingt.
- Im Display wird ein positiver Kurzhinweis angezeigt.

Bei nicht erfolgreicher Durchführung:

- Ein negativer Hinweiston erklingt.
- Im Display wird ein negativer Kurzhinweis angezeigt.

7.6.24.2

Deaktivieren von Funkgeräten mithilfe der Kontaktliste

Führen Sie die Vorgehensweise zum Deaktivieren Ihres Funkgeräts mithilfe der Kontaktliste durch.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis Kontakte.Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis zum gewünschten Aliasnamen oder zur gewünschten ID.Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis FunkgDeak.

5 Drücken Sie OK, um die Option auszuwählen. Eines der folgenden Ereignisse tritt ein:

- Im Display wird `Funkgerät deakt.: <Funkgeräte-Alias oder -ID>` angezeigt. Die grüne LED blinkt.
- Ein Bildschirm mit einer Passphrase wird angezeigt.

  Geben Sie die Passphrase ein. Drücken Sie OK, um fortzufahren.

  - Wenn die Passphrase korrekt ist, wird im Display eine Zwischenstand-Kurznotiz angezeigt und damit bestätigt, dass die Anfrage ausgeführt wird. Die grüne LED leuchtet.
  - Wenn die Passphrase nicht korrekt ist, wird im Display ein negativer Kurzhinweis angezeigt, und Sie kehren zum vorherigen Bildschirm zurück.

6 Warten Sie auf eine Quittierung.

Bei erfolgreicher Durchführung:

- Ein positiver Hinweiston erklingt.
- Im Display wird ein positiver Kurzhinweis angezeigt.

Bei nicht erfolgreicher Durchführung:

- Ein negativer Hinweiston erklingt.
- Im Display wird ein negativer Kurzhinweis angezeigt.

7.6.24.3

Deaktivieren von Funkgeräten über manuelles Wählen

Führen Sie die Vorgehensweise zum Deaktivieren Ihres Funkgeräts über manuelles Wählen durch.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Kontakte`.Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis `Man. Wählen`.

Drücken Sie OK, um die Option auszuwählen.

4 Geben Sie die Funkgerät-ID ein, und drücken Sie OK, um fortzufahren.

5 Drücken Sie ▲ oder ▼ bis FunkgDeak.

6 Drücken Sie OK, um die Option auszuwählen. Eines der folgenden Ereignisse tritt ein:

- Im Display wird eine Zwischenstand-Kurznotiz angezeigt und damit bestätigt, dass die Anfrage ausgeführt wird. Die grüne LED blinkt.
- Ein Bildschirm mit einer Passphrase wird angezeigt.

  Geben Sie die Passphrase ein. Drücken Sie OK, um fortzufahren.

  - Wenn die Passphrase korrekt ist, wird im Display eine Zwischenstand-Kurznotiz angezeigt und damit bestätigt, dass die Anfrage ausgeführt wird. Die grüne LED leuchtet.
  - Wenn die Passphrase nicht korrekt ist, wird im Display ein negativer Kurzhinweis angezeigt, und Sie kehren zum vorherigen Bildschirm zurück.

7 Warten Sie auf eine Quittierung.

Bei erfolgreicher Durchführung:

- Ein positiver Hinweiston erklingt.
- Im Display wird ein positiver Kurzhinweis angezeigt.

Bei nicht erfolgreicher Durchführung:

- Ein negativer Hinweiston erklingt.
- Im Display wird ein negativer Kurzhinweis angezeigt.

7.6.24.4

Aktivieren von Funkgeräten

Führen Sie die Vorgehensweise zum Aktivieren Ihres Funkgeräts durch.

1 Drücken Sie die konfigurierte **Funkgerät aktivieren**-Taste.

2 Drücken Sie ▲ oder ▼ bis zum gewünschten Aliasnamen oder zur gewünschten ID.

3 Drücken Sie OK, um die Option auszuwählen. Eines der folgenden Ereignisse tritt ein:

- Das Display zeigt `Funkg.aktiv.: <Funkgeräte-Alias oder -ID>` an. Die grüne LED leuchtet.
- Ein Bildschirm mit einer Passphrase wird angezeigt.

  Geben Sie die Passphrase ein. Drücken Sie OK, um fortzufahren.

  - Wenn die Passphrase korrekt ist, wird im Display eine Zwischenstand-Kurznotiz angezeigt und damit bestätigt, dass die Anfrage ausgeführt wird. Die grüne LED leuchtet.
  - Wenn die Passphrase nicht korrekt ist, wird im Display ein negativer Kurzhinweis angezeigt, und Sie kehren zum vorherigen Bildschirm zurück.

4 Warten Sie auf eine Quittierung.

Bei erfolgreicher Durchführung:

- Ein positiver Hinweiston erklingt.
- Im Display wird ein positiver Kurzhinweis angezeigt.

Bei nicht erfolgreicher Durchführung:

- Ein negativer Hinweiston erklingt.
- Im Display wird ein negativer Kurzhinweis angezeigt.

7.6.24.5

Aktivieren von Funkgeräten mithilfe der Kontaktliste

Führen Sie die Vorgehensweise zum Aktivieren Ihres Funkgeräts mithilfe der Kontaktliste durch.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis Kontakte.Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis zum gewünschten Aliasnamen oder zur gewünschten ID.Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis FunkgAkt.

5 Drücken Sie OK, um die Option auszuwählen. Eines der folgenden Ereignisse tritt ein:

- Das Display zeigt Funkg.aktiv.: <Funkgeräte-Alias oder -ID> an. Die grüne LED leuchtet.
- Ein Bildschirm mit einer Passphrase wird angezeigt.

  Geben Sie die Passphrase ein. Drücken Sie OK, um fortzufahren.

  - Wenn die Passphrase korrekt ist, wird im Display eine Zwischenstand-Kurznotiz angezeigt und damit bestätigt, dass die Anfrage ausgeführt wird. Die grüne LED leuchtet.
  - Wenn die Passphrase nicht korrekt ist, wird im Display ein negativer Kurzhinweis angezeigt, und Sie kehren zum vorherigen Bildschirm zurück.

6 Warten Sie auf eine Quittierung.

Bei erfolgreicher Durchführung:

- Ein positiver Hinweiston erklingt.
- Im Display wird ein positiver Kurzhinweis angezeigt.

Bei nicht erfolgreicher Durchführung:

- Ein negativer Hinweiston erklingt.
- Im Display wird ein negativer Kurzhinweis angezeigt.

7.6.24.6

Aktivieren von Funkgeräten über manuelles Wählen

Führen Sie die Vorgehensweise zum Aktivieren Ihres Funkgeräts über manuelles Wählen durch.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis Kontakte.Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis Man. Wählen.

Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis Einzelruf. Drücken Sie OK, um die Option auszuwählen.

In der ersten Textzeile wird Funkgerät-Nr.: angezeigt.

5 Geben Sie die Funkgerät-ID ein, und drücken Sie OK, um fortzufahren.

6 Drücken Sie ▲ oder ▼ bis FunkgAkt.

7 Drücken Sie OK, um die Option auszuwählen. Eines der folgenden Ereignisse tritt ein:

- Die grüne LED leuchtet.
- Ein Bildschirm mit einer Passphrase wird angezeigt.

  Geben Sie die Passphrase ein. Drücken Sie OK, um fortzufahren.

  - Wenn die Passphrase korrekt ist, wird im Display eine Zwischenstand-Kurznotiz angezeigt und damit bestätigt, dass die Anfrage ausgeführt wird. Die grüne LED leuchtet.
  - Wenn die Passphrase nicht korrekt ist, wird im Display ein negativer Kurzhinweis angezeigt, und Sie kehren zum vorherigen Bildschirm zurück.

8 Warten Sie auf eine Quittierung.

Bei erfolgreicher Durchführung:

- Ein positiver Hinweiston erklingt.
- Im Display wird ein positiver Kurzhinweis angezeigt.

Bei nicht erfolgreicher Durchführung:

- Ein negativer Hinweiston erklingt.
- Im Display wird ein negativer Kurzhinweis angezeigt.

7.6.25

Alleinarbeiter

Der Alleinarbeiterschutz löst einen Notruf aus, wenn eine vordefinierte Zeit lang keine Benutzeraktivität erfasst wird, d. h. beispielsweise keine Taste am Funkgerät gedrückt wird oder der Kanalwahlschalter nicht betätigt wird.

Wurde während der einprogrammierten Dauer keine Benutzeraktivität erfasst, warnt das Funkgerät den Benutzer durch ein akustisches Signal vor, sobald der Inaktivitäts-Timer abgelaufen ist.

Hat der Benutzer auch nach Ablauf des vordefinierten Ansprechzeit-Timers noch nicht quittiert, löst das Funkgerät einen Notrufalarm aus.

Diese Funktion ist nur einem der folgenden Notrufalarme zugewiesen:

- Notrufalarm
- Notsignal mit Ruf
- Notsignal mit anschließender Sprache

Das Funkgerät bleibt im Notrufzustand, sodass weiterhin Sprachnachrichten gesendet werden können, bis die erforderlichen Maßnahmen ergriffen werden. Weitere Informationen zum Verlassen der Notruffunktion finden Sie unter Notruf auf Seite 429.

HINWEIS:
Weitere Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator.

7.6.26

Passwortgeschützter Zugriff auf das Funkgerät

Diese Funktion ermöglicht Ihnen die Beschränkung des Zugriffs auf das Funkgerät, indem ein Passwort abgefragt wird, wenn das Gerät eingeschaltet wird.

7.6.26.1

Zugreifen auf Funkgeräte mithilfe von Kennwörtern

Führen Sie die Vorgehensweise für das Zugreifen auf Ihr Funkgerät mit einem Passwort durch.

1 Geben Sie das aktuelle vierstellige Passwort ein.

- Drücken Sie ▲ oder ▼, um den numerischen Wert jeder Ziffer zu bearbeiten, und drücken Sie OK, um die Eingabe zu bestätigen und zur nächsten Ziffer zu gehen.

2 Drücken Sie OK, um das Passwort einzugeben.

Bei erfolgreicher Durchführung wird das Funkgerät eingeschaltet.
Bei nicht erfolgreicher Durchführung:

- Nach dem ersten und zweiten Versuch wird auf dem Display `Falsches Passwort` angezeigt. Wiederholen Sie Schritt 1.
- Nach dem dritten Versuch erscheint im Display `Falsches Passwort` und dann `Gerät gesperrt`. Ein Hinweiston ertönt. Die gelbe LED blinkt. Ihr Funkgerät wird 15 Minuten lang gesperrt.

HINWEIS:
Im gesperrten Status reagiert das Funkgerät nur auf Eingaben des **Ein-/Aus-/Lautstärkereglers** und der vorprogrammierten Taste **Hintergrundbeleuchtung**.

7.6.26.2

Ein-/Ausschalten der Passwortsperre

Führen Sie die Vorgehensweise zum Ein- und Ausschalten der Passwortsperre auf Ihrem Funkgerät durch.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Dienstprogramme`.

Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis

`Funkgeräteinstellungen`. Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis `Passw-Sperre`.

Drücken Sie OK, um die Option auszuwählen.

5 Geben Sie das aktuelle vierstellige Passwort ein.

- Über ein Tastenfeldmikrofon.
- Drücken Sie ▲ oder ▼, um den numerischen Wert jeder Ziffer zu bearbeiten, und drücken Sie OK, um die Eingabe zu bestätigen und zur nächsten Ziffer zu gehen.
  Bei der Passworteingabe ertönt mit jedem Drücken einer Taste ein positiver Hinweiston.

6 Drücken Sie OK, um das Passwort einzugeben.

Wenn das Passwort falsch ist, erscheint im Display `Falsches Passwort`, und das Funkgerät zeigt automatisch wieder das vorhergehende Menü an.

7 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie ▲ oder ▼ bis `Einschalten`.

  Drücken Sie OK, um die Option auszuwählen. Im Display wird ✓ neben `Einschalten` angezeigt.
- Drücken Sie ▲ oder ▼ bis `Abschalten`.

  Drücken Sie OK, um die Option auszuwählen. Im Display wird ✓ neben `Abschalten` angezeigt.

7.6.26.3

Entsperren von Funkgeräten

Im gesperrten Zustand kann Ihr Funkgerät keine Anrufe empfangen. Führen Sie die Vorgehensweise zum Entsperren Ihres Funkgeräts durch.

Führen Sie einen der folgenden Schritte aus:

- Wenn das Funkgerät eingeschaltet ist, warten Sie 15 Minuten, und wiederholen Sie dann die Schritte unter Zugreifen auf Funkgeräte mithilfe von Kennwörtern auf Seite 176, um auf das Funkgerät zuzugreifen.
- Wenn das Funkgerät ausgeschaltet ist, schalten Sie das Gerät ein. Ihr Funkgerät startet den 15-Minuten-Timer für die Sperre.
  Ein Hinweiston ertönt. Die gelbe LED blinkt. Im Display wird `Gerät gesperrt` angezeigt.

  Warten Sie 15 Minuten, und wiederholen Sie dann die Schritte unter Zugreifen auf Funkgeräte mithilfe von Kennwörtern auf Seite 176, um auf das Funkgerät zuzugreifen.

7.6.26.4

Ändern von Kennwörtern

Führen Sie die Vorgehensweise zum Ändern von Kennwörtern auf Ihrem Funkgerät durch.

1. Drücken Sie OK, um das Menü aufzurufen.
2. Drücken Sie ▲ oder ▼ bis `Dienstprogramme`.

   Drücken Sie OK, um die Option auszuwählen.
3. Drücken Sie ▲ oder ▼ bis

   `Funkgeräteinstellungen`. Drücken Sie OK, um die Option auszuwählen.
4. Drücken Sie ▲ oder ▼ bis `Passw-Sperre`.

   Drücken Sie OK, um die Option auszuwählen.
5. Geben Sie das aktuelle Passwort mit vier Ziffern ein,

   und drücken Sie OK, um fortzufahren.

Wenn das Passwort falsch ist, erscheint im Display `Falsches Passwort`, und das Funkgerät zeigt automatisch wieder das vorhergehende Menü an.

6 Drücken Sie ▲ oder ▼ bis `Passw.änd.` angezeigt wird. Drücken Sie OK, um die Option auszuwählen.

7 Geben Sie ein neues vierstelliges Passwort ein, und drücken Sie OK, um fortzufahren.

8 Geben Sie das neue vierstellige Passwort noch einmal ein, und drücken Sie OK, um fortzufahren.

Bei erfolgreicher Durchführung wird auf dem Display `Passwort geändert` angezeigt.
Bei nicht erfolgreicher Durchführung wird auf dem Display `PW stimmen nicht überein` angezeigt.

Der Bildschirm wechselt automatisch zum vorherigen Menü.

7.6.27

Benachrichtigungsliste

Ihr Funkgerät hat eine Mitteilungsliste, die alle Ihre „ungelesenen“ Ereignisse auf dem Kanal, wie z. B. ungelesene Textnachrichten, Telemetrienachrichten, verpasste Rufe und Rufhinweise sammelt.

Auf dem Display wird das **Benachrichtigungssymbol** angezeigt, wenn die Benachrichtigungsliste mindestens ein Ereignis enthält.

Die Liste unterstützt maximal 40 ungelesene Ereignisse. Wenn die Liste voll ist, ersetzt das nächste Ereignis automatisch den jeweils ältesten Listeneintrag. Die Ereignisse werden nach dem Lesen aus der Benachrichtigungsliste entfernt.

Für Textnachrichten, verpasste Rufe und Rufhinweise beträgt die maximale Anzahl 30 Textnachrichten und 10 verpasste Rufe bzw. Rufhinweise. Diese maximale Anzahl hängt von der Kapazität der einzelnen Funktionslisten ab (Jobtickets oder Textnachrichten, verpasste Rufe oder Rufhinweise).

7.6.27.1

Aufrufen der Mitteilungsliste

Führen Sie die Vorgehensweise zum Aufrufen der Mitteilungsliste auf Ihrem Funkgerät durch.

1 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie die programmierte Taste **Mitteilung**. Überspringen Sie die nachfolgenden Schritte.
- Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie OK, um das Menü aufzurufen.

3 Drücken Sie ▲ oder ▼ bis `Mitteilung`. Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis zum gewünschten Ereignis. Drücken Sie OK, um die Option auszuwählen.

Drücken Sie ↩ lang, um zum Startbildschirm zurückzukehren.

7.6.28

Auto-Range Transponder-System

Reichweite-Überwachungssystem (ARTS) ist eine rein analoge Funktion, die dazu dient, Sie zu informieren, wenn sich Ihr Funkgerät außerhalb der Reichweite anderer mit ARTS ausgestatteter Funkgeräte befindet.

Mit ARTS ausgestattete Funkgeräte senden oder empfangen in regelmäßigen Abständen Signale, um zu bestätigen, dass sich die Geräte innerhalb der Funkreichweite der anderen befinden.

Ihr Funkgerät bietet folgende Anzeigen zum Status:

Erster Hinweis

Ein Hinweiston ertönt.

Auf dem Display wird `Im Bereich` nach dem Aliasnamen des Kanals angezeigt.

ARTS-in-Reichweite-Hinweis

Ein Ton erklingt, wenn programmiert.

Auf dem Display wird `Im Bereich` nach dem Aliasnamen des Kanals angezeigt.

ARTS-außer-Reichweite-Hinweis

Ein Hinweiston ertönt. Die rote LED blinkt schnell.

Auf dem Display wird `Auss. Reichw.` abwechselnd mit der Startseite angezeigt.

HINWEIS:
Weitere Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator.

7.6.29

Over-the-Air Programmierung (OTAP)

Ihr Händler kann Ihr Funkgerät über Over-the-Air-Programmierung (OTAP) ohne physische Verbindung ferngesteuert aktualisieren. Darüber hinaus können auch einige Einstellungen über OTAP konfiguriert werden.

Wenn OTAP auf Ihrem Funkgerät aktiv ist, blinkt die grüne LED.

Wenn Ihr Funkgerät große Datenmengen empfängt:

- Das Display zeigt das Symbol **Große Datenmengen** an.
- Der Kanal ist belegt.
- Ein negativer Hinweiston erklingt, wenn Sie die **PTT**-Taste drücken.

Wenn OTAP abgeschlossen ist, je nach Konfiguration:

- Ein Hinweiston ertönt. Auf dem Display wird `Aktualisierung Neustart` angezeigt. Das Funkgerät wird durch Aus- und Einschalten neu gestartet.
- Sie können `Jetzt neu start.` oder `Später` auswählen. Wenn Sie `Später` auswählen, wechselt Ihr Funkgerät zum vorherigen Bildschirm. Auf dem Display wird das **OTAP-Verzögerungs-Timer**-Symbol angezeigt, bis der automatische Neustart erfolgt.

Wenn Ihr Funkgerät nach dem automatischen Neustart eingeschaltet wird:

- Bei erfolgreichem Abschluss wird auf dem Display `SW-Update abgeschlossen` angezeigt.
- Schlägt der Vorgang fehl, so zeigt das Display `SW-Update fehlg.` angezeigt.

Informationen zur aktualisierten Softwareversion finden Sie unter Überprüfen der Software-Aktualisierungsinformationen auf Seite 213.

7.6.30

Sendesperre

Anhand der Sendesperre können Benutzer alle Sendevorgänge auf dem Funkgerät blockieren.

HINWEIS:
Bluetooth und WLAN-Funktionen sind während der Sendesperre verfügbar.

7.6.30.1

Aktivieren der Sendesperre

Führen Sie die Vorgehensweise zum Aktivieren der Sendesperre durch.

Wählen Sie eine der folgenden Optionen aus:

- Drücken Sie ▲ oder ▼ bis `Tx-Sperre` und drücken Sie OK zum Auswählen.
- Drücken Sie die programmierbare Taste **Sendesperre**.

- Ein positiver Hinweiston erklingt.
- Im Display wird `Tx-Sperre ein` angezeigt.

HINWEIS:
Der Status der Sendesperre ändert sich nach dem Einschalten des Funkgeräts nicht.

7.6.30.2

Deaktivieren der Sendesperre

Führen Sie die Vorgehensweise zum Deaktivieren der Sendesperre durch.

Wählen Sie eine der folgenden Optionen aus:

- Drücken Sie ▲ oder ▼ bis `Tx-Sperre` und drücken Sie OK zum Auswählen.
- Drücken Sie die programmierbare Taste **Sendesperre**.

- Ein negativer Hinweiston erklingt. Übertragung erfolgt wieder im normalen Betrieb.
- Im Display wird `Tx-Sperre Aus` angezeigt.

7.6.31

Wi-Fi-Betrieb

Wi-Fi® ist eine eingetragene Marke der Wi-Fi Alliance®.

HINWEIS:
Diese Funktion gilt nur für DP4601e .

Diese Funktion ermöglicht Ihnen, ein WLAN-Netzwerk einzurichten und eine Verbindung damit herzustellen. Wi-Fi unterstützt Aktualisierungen an der Firmware des Funkgeräts, Codeplug und Ressourcen, wie z. B. Sprachpakete und Sprachansage.

7.6.31.1

Ein-/Ausschalten von WLAN

Die programmierte Taste **Ein-/Ausschalten von WLAN** wird von Ihrem Händler oder Systemadministrator zugeordnet. Klären Sie mit Ihrem Händler oder Systemadministrator, wie das Funkgerät konfiguriert wurde.

Sprachansagen für die vorprogrammierte Taste **WLAN ein oder aus** können über CPS gemäß den Benutzeranforderungen angepasst werden. Weitere Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator.

Sie können WLAN durch Ausführen einer der folgenden Aktionen ein- oder ausschalten.

- Drücken Sie die vorprogrammierte Taste **WLAN ein oder aus**. Die Sprachansage besagt: WLAN wird eingeschaltet oder WLAN wird ausgeschaltet.
- Rufen Sie diese Funktion über das Menü auf.

  a. Drücken Sie OK, um das Menü aufzurufen.

  b. Drücken Sie ▲ oder ▼ bis WLAN, und drücken Sie OK zum Auswählen.

  c. Drücken Sie ▲ oder ▼ bis WLAN ein und drücken Sie OK zum Auswählen.

  Drücken Sie OK, um WLAN zu aktivieren. Im Display wird ✓ neben Aktiviert angezeigt.

  Drücken Sie OK, um das WLAN zu deaktivieren. Neben Aktiviert wird kein ✓ mehr angezeigt.

7.6.31.2

Verbinden mit einem Access Point im Netzwerk

Wenn Sie WLAN einschalten, startet das Funkgerät einen Suchlauf und stellt eine Verbindung zu einem Access Point im Netzwerk her.

Sie können auch über das Menü eine Verbindung mit einem Access Point im Netzwerk herstellen.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `WLAN`, und drücken Sie OK zum Auswählen.

3 Drücken Sie ▲ oder ▼ bis `Netzwerke`, und drücken Sie OK zum Auswählen.

4 Drücken Sie ▲ oder ▼ bis zu einem Netzwerk-Access-Point, und drücken Sie OK zum Auswählen.

5 Drücken Sie ▲ oder ▼ bis `Verbinden`, und drücken Sie OK zum Auswählen.

Wenn die Verbindung erfolgreich hergestellt werden konnte, zeigt das Funkgerät einen Hinweis an, und der Access Point des Netzwerks wird in der Profilliste gespeichert.

7.6.31.3

Prüfen des WLAN-Verbindungsstatus

Führen Sie die Vorgehensweise zum Prüfen des WLAN-Verbindungsstatus durch.

Drücken Sie die vorprogrammierte Taste **Wi-Fi-Status abfragen**, um den Verbindungsstatus über eine Sprachansage abzurufen. Die Sprachansage besagt: Wi-Fi ist deaktiviert, Wi-Fi ist aktiviert, aber keine Verbindung, oder Wi-Fi ist aktiviert mit Verbindung.

- Das Display zeigt `WLAN Aus`, wenn WLAN ausgeschaltet ist.
- Das Display zeigt `WLAN Ein, Verbunden`, wenn das Funkgerät mit einem Netzwerk verbunden ist.

- Das Display zeigt `WLAN Ein, Nicht verbunden`, wenn das Funkgerät zwar eingeschaltet, aber nicht mit einem Netzwerk verbunden ist.

  Sprachansagen für die WLAN-Statusabfrageergebnisse können über CPS gemäß den Benutzeranforderungen angepasst werden. Weitere Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator.

  HINWEIS:
  Die programmierte Taste **Wi-Fi-Status abfragen** wird von Ihrem Händler oder Systemadministrator zugeordnet. Klären Sie mit Ihrem Händler oder Systemadministrator, wie das Funkgerät konfiguriert wurde.

7.6.31.4

Aktualisieren der Netzwerkliste

Gehen Sie wie folgt vor, um die Netzwerkliste zu aktualisieren.

- Gehen Sie wie folgt vor, um die Netzwerkliste über das Menü zu aktualisieren.

  a. Drücken Sie OK, um das Menü aufzurufen.

  b. Drücken Sie ▲ oder ▼ bis `WLAN`, und drücken Sie OK zum Auswählen.

  c. Drücken Sie ▲ oder ▼ bis `Netzwerke`, und drücken Sie OK zum Auswählen.

  Wenn Sie das Netzwerkmenü öffnen, aktualisiert das Funkgerät automatisch die Netzwerkliste.

- Wenn Sie sich bereits im Netzwerk-Menü befinden, führen Sie die folgende Maßnahme durch, um die Netzwerkliste zu aktualisieren.

  Drücken Sie ▲ oder ▼ zu `Aktualisieren` und drücken Sie OK zum Auswählen.

  Das Funkgerät aktualisiert sich und zeigt die neueste Netzwerkliste an.

7.6.31.5

Hinzufügen eines Netzwerks

Wenn ein bevorzugtes Netzwerk nicht in der Liste der verfügbaren Netzwerke angezeigt wird, führen Sie die

folgenden Maßnahmen durch, um ein Netzwerk hinzuzufügen.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis WLAN, und drücken Sie OK zum Auswählen.

3 Drücken Sie ▲ oder ▼ bis Netzwerke, und drücken Sie OK zum Auswählen.

4 Drücken Sie ▲ oder ▼ zu Netzwerk hinzufügen und drücken Sie OK zum Auswählen.

5 Geben Sie die SSID (Service Set Identifier) ein, und drücken Sie OK.

6 Drücken Sie ▲ oder ▼ zu Öffnen und drücken Sie OK zum Auswählen.

7 Geben Sie das Kennwort ein, und drücken Sie OK.

Das Funkgerät zeigt eine Bestätigung an, um darauf hinzuweisen, dass das Netzwerk erfolgreich gespeichert wurde.

7.6.31.6

Anzeigen von Details zu Netzwerk-Access-Points

Gehen Sie wie folgt vor, um die Details zu Netzwerk-Access-Points anzuzeigen.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis WLAN, und drücken Sie OK zum Auswählen.

3 Drücken Sie ▲ oder ▼ bis Netzwerke, und drücken Sie OK zum Auswählen.

4 Drücken Sie ▲ oder ▼ bis zu einem Netzwerk-Access-Point, und drücken Sie OK zum Auswählen.

5 Drücken Sie ▲ oder ▼ zu `Details anzeigen` und drücken Sie OK zum Auswählen.

Für einen verbundenen Netzwerk-Access Point werden die SSID (Service Set Identifier), der Sicherheitsmodus, die MAC-Adresse (Media Access Control) und die IP-Adresse (Internet Protocol) angezeigt.

Für einen nicht verbundenen Netzwerk-Access Point werden die SSID (Service Set Identifier) und der Sicherheitsmodus angezeigt.

7.6.31.7

Entfernen von Netzwerk-Access Points

Führen Sie die folgenden Aktionen aus, um Netzwerk-Access Points aus der Profilliste zu entfernen.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `WLAN`, und drücken Sie OK zum Auswählen.

3 Drücken Sie ▲ oder ▼ bis `Netzwerke`, und drücken Sie OK zum Auswählen.

4 Drücken Sie ▲ oder ▼ zum ausgewählten Netzwerk-Access Point und drücken Sie OK zum Auswählen.

5 Drücken Sie ▲ oder ▼ zu `Entfernen` und drücken Sie OK zum Auswählen.

6 Drücken Sie ▲ oder ▼ zu JA und drücken Sie OK zum Auswählen.

Das Funkgerät zeigt eine Bestätigung an, um darauf hinzuweisen, dass der ausgewählte Netzwerk-Access-Point erfolgreich entfernt wurde.

7.6.32

Frontplattenprogrammierung

Sie können bestimmte Funktionsparameter in der Frontplattenprogrammierung anpassen, um die Verwendung des Funkgeräts zu optimieren.

Die folgenden Tasten werden bei Bedarf verwendet, um durch die Funktionsparameter zu navigieren.

Nach oben/nach unten-Navigationstaste

Drücken Sie diese Taste, um horizontal oder vertikal durch die Optionen zu navigieren oder um Werte zu erhöhen oder zu verringern.

Menü-/OK-Taste

Drücken Sie diese Taste, um die Option zu wählen bzw. ein Untermenü aufzurufen.

Zurück-/Startbildschirm-Taste

Kurz drücken, um zum vorhergehenden Menü zurückzukehren oder um den Auswahlbildschirm zu verlassen.

Durch Gedrückthalten kehren Sie zum Startbildschirm zurück.

7.6.32.1

Eingabe von Frontplattenprogrammierung

Führen Sie die Vorgehensweise zum Aufrufen des Bedienfeld-Programmiermodus (FFP) auf Ihrem Funkgerät durch.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis Dienstprogramme.Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis `Funkgerät programmieren`. Drücken Sie OK, um die Option auszuwählen.

7.6.32.2

Bearbeiten von Parametern im FPP-Modus

Verwenden Sie bei der Navigation durch die Funktionsparameter die folgenden Tasten.

- ▲, ▼ – Zum Durchblättern von Optionen, Erhöhen/Verringern von Werten und um senkrecht zu navigieren.
- OK – Zum Wählen der Option bzw. zum Aufrufen eines Untermenüs.
- ↩ – Kurz drücken, um zum vorhergehenden Menü zurückzukehren oder um den Auswahlbildschirm zu verlassen. Gedrückt halten, um zum Ausgangsbildschirm zurückzukehren.

7.7

Energieversorgung

In diesem Kapitel wird die Verwendung der Einstellungsfunktionen auf Ihrem Funkgerät beschrieben.

7.7.1

Sperren und Entsperren der Tastatur

Führen Sie die Vorgehensweise zum Sperren und Entsperren der Tastatur des Funkgeräts durch.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Dienstprogramme`. Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis `Funkgeräteinstellungen`. Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis `TastSperre`. Drücken Sie OK, um die Option auszuwählen.

- Wenn die Tastatur gesperrt ist, erscheint im Display `Tastatur gesperrt`.
- Wenn die Tastatur nicht gesperrt ist, zeigt das Display `Tastatur nicht gesperrt` an.

Das Funkgerät kehrt zum Startbildschirm zurück.

7.7.2

Ein- oder Ausschalten der automatischen Rufweiterleitung

Ihr Funkgerät kann bei entsprechender Einstellung Rufe automatisch an ein anderes Funkgerät weiterleiten.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Dienstprogramme`. Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis `Funkgeräteinstellungen`.Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis `Rufweiterleitung`. Drücken Sie OK, um die Option auszuwählen.

5 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie ▲ oder ▼, um die Rufweiterleitung zu aktivieren. Wenn diese Option aktiviert ist, wird ✓ neben `Aktiviert` angezeigt.
- Drücken Sie ▲ oder ▼, um die Rufweiterleitung zu deaktivieren. Wenn diese Option deaktiviert ist, wird ✓ neben `Aktiviert` angezeigt.

7.7.3

Bestimmen des Kabeltyps

Führen Sie die folgenden Schritte aus, um den Kabeltyp auszuwählen, den Ihr Funkgerät verwendet.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Dienstprogramme`. Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis `Funkgeräteinstellungen`. Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis `Kabeltyp`. Drücken Sie OK, um die Option auszuwählen.

5 Drücken Sie ▲ oder ▼, um die ausgewählte Option zu ändern.

Der aktuelle Kabeltyp ist mit einem ✓ gekennzeichnet.

7.7.4

Flexible Empfangen-Liste

Mit der Funktion „Flexible Empfangen-Liste“ können Sie Mitglieder für die Empfänger-Gesprächsgruppenliste erstellen und zuweisen. Ihr Funkgerät unterstützt höchstens 16 Mitglieder in der Liste. Diese Funktion wird in Capacity Plus nicht unterstützt.

7.7.4.1

Ein-/Ausschalten der flexiblen Empfangen-Liste

Führen Sie die Vorgehensweise zum Ein- und Ausschalten der flexiblen Empfangen-Liste aus.

1 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie die programmierte Taste **Flexible Empfangen-Liste**. Überspringen Sie die folgenden Schritte.

- Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Flex. RX-Liste`.

Drücken Sie OK, um die Option auszuwählen.

3 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie ▲ oder ▼ bis `Einschalten`.

  Drücken Sie OK, um die Option auszuwählen. Ein positiver Hinweiston erklingt.

  Im Display wird ein positiver Kurzhinweis angezeigt.

- Drücken Sie ▲ oder ▼ bis `Abschalten`.

  Drücken Sie OK, um die Option auszuwählen. Ein negativer Hinweiston erklingt.

  Im Display wird ein negativer Kurzhinweis angezeigt.

7.7.4.2

Hinzufügen neuer Einträge zur flexiblen Empfängerliste

Befolgen Sie die Vorgehensweise zum Hinzufügen neuer Mitglieder zur Empfänger-Gesprächsgruppenliste.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Dienstprogramme`.

Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis

`Funkgeräteinstellungen`. Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis `Flex. RX-Liste`.

Drücken Sie OK, um die Option auszuwählen.

5 Drücken Sie ▲ oder ▼ bis `Liste anz/bearb`.

Drücken Sie OK, um die Option auszuwählen.

6 Drücken Sie ▲ oder ▼ bis `Mitgl. hinzu`.

Drücken Sie OK, um die Option auszuwählen.

7 Drücken Sie ▲ oder ▼ bis zum gewünschten Aliasnamen oder zur gewünschten ID. Drücken Sie OK, um die Option auszuwählen.

Im Display wird ein positives Kurzhinweissymbol angezeigt und dann `Andere hinzu?`.

8 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie ▲ oder ▼ bis `Ja`, um einen weiteren Eintrag hinzuzufügen. Drücken Sie OK, um die Option auszuwählen. Wiederholen Sie Schritt 7.
- Drücken Sie ▲ oder ▼ bis `Nein`, um die aktuelle Liste zu speichern. Drücken Sie OK, um die Option auszuwählen.

7.7.4.3

Löschen von Einträgen aus der flexiblen Empfangen-Liste

Befolgen Sie das Verfahren zum Löschen von Mitgliedern aus der Empfänger-Gesprächsgruppenliste Ihres Funkgeräts.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Dienstprogramme`.

Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis `Funkgeräteinstellungen`. Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis `Flex. RX-Liste`.

Drücken Sie OK, um die Option auszuwählen.

5 Drücken Sie ▲ oder ▼ bis `Liste anz/bearb`.

Drücken Sie [OK], um die Option auszuwählen.

6 Drücken Sie ▲ oder ▼ bis zum gewünschten Aliasnamen oder zur gewünschten ID. Drücken Sie [OK], um die Option auszuwählen.

7 Drücken Sie ▲ oder ▼ bis `Löschen`. Drücken Sie [OK], um die Option auszuwählen.

8 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie ▲ oder ▼ bis `Ja`, um den Eintrag zu löschen. Drücken Sie [OK], um die Option auszuwählen.
  Im Display wird ein positiver Kurzhinweis angezeigt.
- Drücken Sie ▲ oder ▼ bis `Nein`. Drücken Sie [OK], um die Option auszuwählen.
  Das Funkgerät wechselt zum vorherigen Bildschirm.

9 Wiederholen Sie Schritt 6 bis Schritt 8 zum Löschen weiterer Einträge.

10 Drücken Sie [↩] lang, um zum Startbildschirm zurückzukehren, nachdem alle gewünschten Aliasnamen oder IDs gelöscht wurden.

7.7.5
Einstellen des Menü-Timers

Mit dieser Funktion können Sie festlegen, wie lange Ihr Funkgerät das Menü anzeigt, bevor es automatisch wieder auf den Ausgangsbildschirm umschaltet. Folgen Sie den Anweisungen, um den Menü-Timer einzustellen.

1 Drücken Sie [OK], um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Dienstprogramme`.Drücken Sie [OK], um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis `Funkgeräteinstellungen`.Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis `Anzeige`. Drücken Sie OK, um die Option auszuwählen.

5 Drücken Sie ▲ oder ▼ bis `Menü-Timer`. Drücken Sie OK, um die Option auszuwählen.

6 Drücken Sie ▲ oder ▼ bis zur gewünschten Einstellung. Drücken Sie OK, um die Option auszuwählen.

7.7.6

Text-in-Sprache

Die Funktion Text-in-Sprache kann nur vom Händler oder Systemadministrator aktiviert werden. Wenn die Funktion Text in Speech aktiviert ist, wird die Sprachansage-Funktion automatisch deaktiviert. Wenn die Sprachansage-Funktion aktiviert ist, wird die Text-in-Sprache-Funktion automatisch deaktiviert.

Diese Funktion aktiviert die Sprachansage des Funkgeräts mit den folgenden Funktionen:

- Aktueller Kanal
- Aktuelle Zone
- Programmierbare Taste ein- bzw. aus
- Inhalt der empfangenen Textnachrichten
- Inhalt von empfangenen Job Tickets

Dieses Tonsignal kann bedarfsspezifisch eingestellt werden. Die Funktion ist besonders nützlich, wenn der Benutzer Schwierigkeiten hat, die Anzeige im Display zu lesen.

7.7.6.1

Einstellen von Text-in-Sprache

Folgen Sie den Schritten zur Einrichtung der Funktion Text-in-Sprache.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis Dienstprogramme.

Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis

Funkgeräteinstellungen. Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis Kanal-Ansage.

Drücken Sie OK, um die Option auszuwählen.

5 Drücken Sie ▲ oder ▼ bis zu einer der folgenden

Funktionen. Drücken Sie OK, um die Option auszuwählen.

Die verfügbaren Optionen lauten wie folgt:

- Alle
- Nachrichten
- Job Tickets
- Channel
- Zone
- Programmtaste

✓ wird neben der ausgewählten Einstellung angezeigt.

7.7.7
Aktivieren/Deaktivieren der Rückkopplungsunterdrückung (AFS)

Mit dieser Funktion können Sie die akustische Rückkopplung bei eingehenden Anrufen reduzieren. Befolgen Sie die Vorgehensweise zum Aktivieren bzw. Deaktivieren der Rückkopplungsunterdrückung (AFS) auf Ihrem Funkgerät.

1 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie die programmierte Taste **AR-Sperre**. Überspringen Sie die folgenden Schritte.
- Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis Dienstprogramme.

Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis

Funkgeräteinstellungen. Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis AR-Sperre. Drücken

Sie OK, um die Option auszuwählen.

5 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie OK, um die Sperre akustischer Rückkopplungen zu aktivieren.
- Drücken Sie OK, um die Sperre akustischer Rückkopplungen zu deaktivieren.

Wenn diese Option aktiviert ist, wird ✓ neben Aktiviert angezeigt.Wenn diese Option deaktiviert ist, wird ✓ neben Aktiviert angezeigt.

7.7.8

Einschalten/Ausschalten von GNSS

Das Global Navigation Satellite System (GNSS) ist ein Satellitennavigationssystem, das die genaue Position des Funkgeräts ortet. GNSS umfasst Global Positioning System (GPS) und Global Navigation Satellite System (GLONASS).

HINWEIS:
Ausgewählte Funkgerätmodelle bieten möglicherweise GPS und GLONASS. Die GNSS-Konstellation wird über CPS konfiguriert. Klären Sie mit Ihrem Händler oder Systemadministrator, wie das Funkgerät konfiguriert wurde.

1 Führen Sie einen der folgenden Schritte aus, um GNSS des Funkgeräts ein- oder auszuschalten.

- Drücken Sie die programmierte Taste **GNSS**.
- Drücken Sie OK, um das Menü aufzurufen. Fahren Sie mit dem nächsten Schritt fort.

2 Drücken Sie ▲ oder ▼ bis Dienstprogramme.

Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis Funkgeräteinstellungen. Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis GNSS. Drücken Sie OK, um die Option auszuwählen.

5 Drücken Sie OK, um GNSS zu aktivieren/deaktivieren.

Wenn diese Option aktiviert ist, wird ✓ neben Aktiviert angezeigt.
Wenn diese Option deaktiviert ist, wird ✓ neben Aktiviert angezeigt.

7.7.9

Ein-/Ausschalten des Startbildschirms

Sie können den Startbildschirm mithilfe der folgenden Vorgehensweise aktivieren oder deaktivieren.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis Dienstprogramme. Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis Funkgeräteinstellungen. Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis Anzeige. Drücken Sie OK, um die Option auszuwählen.

5 Drücken Sie ▲ oder ▼ bis Introbildschirm. Drücken Sie OK, um die Option auszuwählen.

6 Drücken Sie OK zum Aktivieren/Deaktivieren des Startbildschirms.

Im Display wird eines der folgenden Ergebnisse angezeigt:

- Wenn diese Option aktiviert ist, wird ✓ neben Aktiviert angezeigt.
- Wenn diese Option deaktiviert ist, wird ✓ neben Aktiviert angezeigt.

7.7.10

Ein-/Ausschalten der Funkgerät-Hinweistöne

Sie können bei Bedarf alle Töne des Funkgeräts aktivieren bzw. deaktivieren außer den Ton für eingehende Notrufe . Führen Sie die Vorgehensweise zum Ein- und Ausschalten von Tönen und Hinweisen auf Ihrem Funkgerät durch.

1 Führen Sie einen der folgenden Schritte aus:
   - Drücken Sie die programmierte Taste **Töne/ Hinweistöne**. Überspringen Sie die folgenden Schritte.
   - Drücken Sie OK , um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis Dienstprogramme.Drücken Sie OK , um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis Funkgeräteinstellungen.Drücken Sie OK , um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis Töne/Hinweistöne. Drücken Sie OK , um die Option auszuwählen.

5 Drücken Sie ▲ oder ▼ bis Alle Töne. Drücken Sie OK , um die Option auszuwählen.

6 Drücken Sie OK, um alle Töne und Hinweistöne zu aktivieren oder deaktivieren. Im Display wird eines der folgenden Ergebnisse angezeigt:
   - Wenn diese Option aktiviert ist, wird ✓ neben Aktiviert angezeigt.

- Wenn diese Option deaktiviert ist, wird ✓ neben `Aktiviert` angezeigt.

7.7.11

Einstellen der Abweichung der Hinweistonlautstärke

Diese Funktion stellt die Lautstärke der Hinweistöne ein, sodass sie höher oder niedriger als die Lautstärke für Sprache sein können. Führen Sie die Vorgehensweise zum Einstellen der Abweichung der Hinweistonlautstärke auf Ihrem Funkgerät durch.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Dienstprogramme`.

Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis

`Funkgeräteinstellungen`. Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis `Töne/Hinweise`.

Drücken Sie OK, um die Option auszuwählen.

5 Drücken Sie ▲ oder ▼ bis `Lautst.Offset`.

Drücken Sie OK, um die Option auszuwählen.

6 Drücken Sie ▲ oder ▼ bis zur gewünschten Lautstärkeabweichung.

Für jede Lautstärkeabweichung wird jeweils ein Ton in der entsprechenden Lautstärke ausgegeben.

7 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie OK, um die Option auszuwählen. Die gewünschte Lautstärkeabweichung wurde gespeichert.
- Drücken Sie ↩ zum Beenden. Die Änderungen werden verworfen.

7.7.12

Ein-/Ausschalten des Freitons

Führen Sie die Vorgehensweise zum Ein- und Ausschalten des Freitons auf Ihrem Funkgerät durch.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Dienstprogramme`.

Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis

`Funkgeräteinstellungen`. Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis `Töne/Hinweistöne`.

Drücken Sie OK, um die Option auszuwählen.

5 Drücken Sie ▲ oder ▼ bis `Freiton`. Drücken Sie

OK, um die Option auszuwählen.

6 Drücken Sie OK, um den Freiton zu aktivieren/deaktivieren.

Im Display wird eines der folgenden Ergebnisse angezeigt:

- Wenn diese Option aktiviert ist, wird ✓ neben `Aktiviert` angezeigt.
- Wenn diese Option deaktiviert ist, wird ✓ neben `Aktiviert` angezeigt.

7.7.13

Ein-/Ausschalten des Hinweistons beim Einschalten

Führen Sie die Vorgehensweise zum Ein- und Ausschalten des Hinweistons beim Einschaltton auf Ihrem Funkgerät durch.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis Dienstprogramme.

Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis

Funkgeräteinstellungen. Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis Töne/Hinweistöne.

Drücken Sie OK, um die Option auszuwählen.

5 Drücken Sie ▲ oder ▼ bis Einschalten.

Drücken Sie OK, um die Option auszuwählen.

6 Drücken Sie OK, um den Hinweiston beim Einschalten zu aktivieren/deaktivieren. Im Display wird eines der folgenden Ergebnisse angezeigt:

- Wenn diese Option aktiviert ist, wird ✓ neben Aktiviert angezeigt.
- Wenn diese Option deaktiviert ist, wird ✓ neben Aktiviert angezeigt.

7.7.14

Einstellen der Hinweistöne für Textnachrichten

Sie können den Hinweiston der Textnachricht für alle Einträge in der Kontaktliste anpassen. Führen Sie die Vorgehensweise zum Einstellen von Hinweistönen für Textnachrichten auf Ihrem Funkgerät durch.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis Kontakte. Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis zum gewünschten Aliasnamen oder zur gewünschten ID. Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis `Nachr.Hinweis`.

Drücken Sie OK, um die Option auszuwählen.

5 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie ▲ oder ▼ bis `Momentan`. Drücken Sie OK, um die Option auszuwählen.
  Im Display wird ✓ neben `Momentan` angezeigt.
- Drücken Sie ▲ oder ▼ bis `Wiederholt`.
  Drücken Sie OK, um die Option auszuwählen.
  Im Display wird ✓ neben `Wiederholt` angezeigt.

7.7.15

Leistungspegel

Die Sendeleistung kann für jeden Kanal hoch oder niedrig eingestellt werden.

Hoch
Erlaubt die Kommunikation mit relativ weit entfernten Funkgeräten.

Niedrig
Erlaubt die Kommunikation mit näher befindlichen Funkgeräten.

HINWEIS:
Diese Funktion ist auf Citizens Band-Kanälen nicht verfügbar, die sich auf der gleichen Frequenz befinden.

7.7.15.1

Einstellen der Sendeleistung

Führen Sie die Vorgehensweise zum Einstellen der Sendeleistung auf Ihrem Funkgerät durch.

1 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie die vorprogrammierte Taste **Leistungspegel**. Überspringen Sie die nachfolgenden Schritte.
- Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Dienstprogramme`.Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis Funkgeräteinstellungen.Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis Leistung. Drücken Sie OK, um die Option auszuwählen.

5 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie ▲ oder ▼ bis Hoch. Drücken Sie OK, um die Option auszuwählen.
  Im Display wird ✓ neben Hoch angezeigt.
- Drücken Sie ▲ oder ▼ bis Niedrig. Drücken Sie OK, um die Option auszuwählen.
  Im Display wird ✓ neben Niedrig angezeigt.

6 Drücken Sie ⌂ lang, um zum Startbildschirm zurückzukehren.

7.7.16

Anpassen der Displayhelligkeit

Führen Sie die Vorgehensweise zum Einstellen der Displayhelligkeit auf Ihrem Funkgerät durch.

1 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie die programmierte Taste **Helligkeit**. Überspringen Sie die folgenden Schritte.
- Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis Dienstprogramme. Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis Funkgeräteinstellungen. Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis Helligkeit. Drücken Sie OK, um die Option auszuwählen.
Im Display wird die Helligkeitsleiste angezeigt.

5 Drücken Sie ▲ oder ▼ , um die Displayhelligkeit zu erhöhen oder zu verringern. Drücken Sie OK , um die Option auszuwählen.

7.7.17

Einstellen der Displaybeleuchtung

Sie können den Timer für die Displaybeleuchtung des Funkgeräts nach Bedarf anpassen. Diese Einstellung gilt dann auch für die Beleuchtung der Menü-Navigationstasten und der Tastatur. Führen Sie die Vorgehensweise zum Einstellen des Timers der Beleuchtung Ihres Funkgeräts durch.

1 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie die programmierte **Beleuchtung**-Taste. Überspringen Sie die folgenden Schritte.
- Drücken Sie OK , um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Dienstprogramme`. Drücken Sie OK , um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis `Funkgeräteinstellungen`. Drücken Sie OK , um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis `Anzeige`. Drücken Sie OK , um die Option auszuwählen.

5 Drücken Sie ▲ oder ▼ bis `Beleuchtungstimer`. Drücken Sie OK , um die Option auszuwählen.

Wird die LED-Anzeige deaktiviert, wird die Beleuchtung des Displays und der Tastatur automatisch ausgeschaltet. Weitere Informationen finden Sie unterEin-/Ausschalten der LED-Anzeigen auf Seite 201.

7.7.18

Ein- und Ausschalten der automatischen

Hintergrundbeleuchtung (Bel.Autom.)

Sie können die Hintergrundbeleuchtung Ihres Funkgeräts aktivieren bzw. deaktivieren, sodass sie sich bei Bedarf automatisch einschaltet. Wenn diese Option aktiviert ist, wird die Hintergrundbeleuchtung eingeschaltet, wenn das Funkgerät einen Anruf empfängt, bei einem Ereignis der Benachrichtigungsliste oder bei einem Notsignal.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Dienstprogramme`.

Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis

`Funkgeräteinstellungen`. Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis `Bel.Autom.`.

5 Drücken Sie OK, um die Beleuchtungsautomatik zu aktivieren oder zu deaktivieren.

Im Display wird eines der folgenden Ergebnisse angezeigt:

- Wenn diese Option aktiviert ist, wird ✓ neben `Aktiviert` angezeigt.
- Wenn diese Option deaktiviert ist, wird ✓ neben `Aktiviert` angezeigt.

7.7.19

Rauschsperrenpegel

Der Rauschsperrenpegel kann so eingestellt werden, dass unerwünschte Rufe mit niedriger Signalstärke oder Kanäle mit ungewöhnlich intensiven Hintergrundgeräuschen unterdrückt werden.

Normal

Dies ist die Standardeinstellung.

Hoch

Diese Einstellung filtert unerwünschte Rufe und/oder störendes Hintergrundrauschen aus. Dabei kann es

jedoch sein, dass auch Rufe von weiter entfernten Standorten ausgefiltert werden.

HINWEIS:
Diese Funktion ist auf Citizens Band-Kanälen nicht verfügbar, die sich auf der gleichen Frequenz befinden.

7.7.19.1

Einstellen der Rauschsperrenstufen

Führen Sie die Vorgehensweise zum Einstellen des Rauschsperrenpegels auf Ihrem Funkgerät durch.

1 Führen Sie einen der folgenden Schritte aus:
- Drücken Sie die vorprogrammierte **Rauschsperre**-Taste. Überspringen Sie die folgenden Schritte.
- Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Dienstprogramme`.Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis `Funkgeräteinstellungen`.Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis `Rauschsp`. Drücken Sie OK, um die Option auszuwählen.

5 Führen Sie einen der folgenden Schritte aus:
- Drücken Sie ▲ oder ▼ bis `Normal`. Drücken Sie OK, um die Option auszuwählen.
  Im Display wird ✓ neben `Normal` angezeigt.
- Drücken Sie ▲ oder ▼ bis `Hoch`. Drücken Sie OK, um die Option auszuwählen.
  Im Display wird ✓ neben `Hoch` angezeigt.

Der Bildschirm wechselt automatisch zum vorherigen Menü.

7.7.20

Ein-/Ausschalten der LED-Anzeigen

Führen Sie die Vorgehensweise zum Ein- und Ausschalten der LED-Anzeigen auf Ihrem Funkgerät durch.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Dienstprogramme`.

Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis `Funkgeräteinstellungen`. Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis `LED-Anzeige`.

Drücken Sie OK, um die Option auszuwählen.

5 Drücken Sie OK, um die LED-Anzeige zu aktivieren/deaktivieren.

Im Display wird eines der folgenden Ergebnisse angezeigt:

- Wenn diese Option aktiviert ist, wird ✓ neben `Aktiviert` angezeigt.
- Wenn diese Option deaktiviert ist, wird ✓ neben `Aktiviert` angezeigt.

7.7.21

Einstellen der Sprachen

Führen Sie die Vorgehensweise zum Einstellen der Sprachen auf Ihrem Funkgerät durch.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Dienstprogramme`.

Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis `Funkgeräteinstellungen`.Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis `Sprachen`. Drücken Sie OK, um die Option auszuwählen.

5 Drücken Sie ▲ oder ▼ bis zur gewünschten Sprache. Drücken Sie OK, um die Option auszuwählen.

Auf dem Display wird ✓ neben der ausgewählten Sprache angezeigt.

7.7.22

Sprachgesteuerte Übertragung (VOX)

Mithilfe der sprachgesteuerten Übertragung (VOX) können Sie einen Ruf auf einem programmierten Kanal im Freisprechbetrieb einleiten. Während eines programmierten Zeitraums überträgt das Funkgerät automatisch, sobald das Mikrofon des VOX-fähigen Zubehörs eine gesprochene Benachrichtigung erfasst.

HINWEIS:
Diese Funktion ist auf Citizens Band-Kanälen nicht verfügbar, die sich auf der gleichen Frequenz befinden.

Um VOX zu aktivieren oder deaktivieren, führen Sie einen der folgenden Schritte aus:

- Schalten Sie das Funkgerät aus und dann wieder ein, um VOX zu aktivieren.
- Wechseln Sie den Kanal mithilfe des **Kanalwahlschalters**, um VOX zu aktivieren.
- Schalten Sie VOX über die vorprogrammierte **VOX**-Taste oder das Menü ein oder aus, um VOX zu aktivieren oder deaktivieren.
- Drücken Sie die **Sendetaste (PTT)** während des Funkgerätbetriebs, um VOX zu deaktivieren.

HINWEIS:
Diese Funktion kann nur an Funkgeräten ein- oder ausgeschaltet werden, bei denen die Funktion aktiviert wurde. Weitere Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator.

7.7.22.1

Ein-/Ausschalten der sprachgesteuerten Übertragung

Führen Sie die Vorgehensweise zum Ein- und Ausschalten von VOX auf Ihrem Funkgerät durch.

1 Führen Sie einen der folgenden Schritte aus:
- Drücken Sie die programmierte **VOX**-Taste. Überspringen Sie die nachfolgenden Schritte.
- Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis Dienstprogramme.Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis Funkgeräteinstellungen.Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis VOX. Drücken Sie OK, um die Option auszuwählen.

5 Führen Sie einen der folgenden Schritte aus:
- Drücken Sie ▲ oder ▼ bis Ein. Drücken Sie OK, um die Option auszuwählen. Im Display wird ✓ neben Ein angezeigt.
- Drücken Sie ▲ oder ▼ bis Aus. Drücken Sie OK, um die Option auszuwählen. Im Display wird ✓ neben Aus angezeigt.

HINWEIS:
Wenn der Freiton aktiviert ist, verwenden Sie ein Trigger-Wort, um den Anruf einzuleiten. Warten Sie das Ende des Freitons ab, und sprechen Sie dann deutlich in das Mikrofon. Weitere Informationen finden Sie unter Ein-/Ausschalten des Freitons auf Seite 196.

7.7.23

Ein-/Ausschalten der Zusatzkarten

Jeder Kanal unterstützt Zusatzkartenfunktionen, die programmierbaren Tasten zugewiesen werden können. Führen Sie die Vorgehensweise zum Ein- und Ausschalten der Zusatzkarten auf Ihrem Funkgerät durch.

Drücken Sie die programmierte Taste **Zusatzkarte**.

7.7.24

Ein-/Ausschalten der Kanalansage

Diese Funktion aktiviert die Sprachansage des Funkgeräts, sodass es die aktuelle Zone bzw. den aktuellen Kanal, die/der vom Benutzer gerade zugewiesen wurde, oder das Drücken einer programmierbaren Taste akustisch angibt. Die Ansage ist besonders nützlich, wenn der Benutzer Schwierigkeiten hat, die Anzeige im Display zu lesen.

Dieses Tonsignal kann kundenspezifisch eingestellt werden. Führen Sie die Vorgehensweise zum Ein- und Ausschalten der Kanal-Ansage auf Ihrem Funkgerät durch.

1 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie die programmierte **Kanal-Ansage**-Taste. Überspringen Sie die folgenden Schritte.
- Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Dienstprogramme`.Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis `Funkgeräteinstellungen`.Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis `Sprachansage`.

Drücken Sie OK, um die Option auszuwählen.

5 Drücken Sie OK, um die Sprachansage zu aktivieren oder zu deaktivieren.

- Wenn diese Option aktiviert ist, wird ✓ neben `Aktiviert` angezeigt.

- Wenn diese Option deaktiviert ist, wird ✓ neben `Aktiviert` angezeigt.

7.7.25

Ein-/Ausschalten der Digitalmikrofon-AGC

Die automatische Verstärkungsregelung (Automatic Gain Control, AGC) des Digitalmikrofons steuert die Mikrofonverstärkung des Funkgeräts beim Senden in einem digitalen System automatisch.
Diese Funktion unterdrückt laute Geräusche oder verstärkt leise Geräusche. Hierbei wird ein voreingestellter Wert verwendet, um eine konsistente Lautstärke zu gewährleisten. Befolgen Sie die Vorgehensweise zum Ein- oder Ausschalten der Digitalmikrofon-AGC auf Ihrem Funkgerät.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Dienstprogramme`. Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis `Funkgeräteinstellungen`. Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis `MikAGC-D`. Drücken Sie OK, um die Option auszuwählen.

5 Drücken Sie OK, um Digital Microphone AGC zu aktivieren oder zu deaktivieren.

Im Display wird eines der folgenden Ergebnisse angezeigt:

- Wenn diese Option aktiviert ist, wird ✓ neben `Aktiviert` angezeigt.
- Wenn diese Option deaktiviert ist, wird ✓ neben `Aktiviert` angezeigt.

7.7.26

Ein-/Ausschalten der Analogmikrofon-AGC

Die automatische Verstärkungsregelung (Automatic Gain Control, AGC) des Analogmikrofons steuert die Mikrofonverstärkung des Funkgeräts beim Senden in einem analogen System automatisch.
Diese Funktion unterdrückt laute Geräusche oder verstärkt leise Geräusche. Hierbei wird ein voreingestellter Wert verwendet, um eine konsistente Lautstärke zu gewährleisten. Befolgen Sie die Vorgehensweise zum Ein- oder Ausschalten der Analogmikrofon-AGC auf Ihrem Funkgerät.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Dienstprogramme`. Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis `Funkgeräteinstellungen`. Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis `MikAGC-A`. Drücken Sie OK, um die Option auszuwählen.

5 Drücken Sie OK, um Analogmikrofon-AGC zu aktivieren oder zu deaktivieren.

Im Display wird eines der folgenden Ergebnisse angezeigt:

- Wenn diese Option aktiviert ist, wird ✓ neben `Aktiviert` angezeigt.
- Wenn diese Option deaktiviert ist, wird ✓ neben `Aktiviert` angezeigt.

7.7.27

Umschalten des Audiosignals zwischen dem internen

Lautsprecher des Funkgeräts und dem kabelgebundenen Zubehör

Führen Sie die Vorgehensweise zum Umschalten der Audioausgabe zwischen dem internen Lautsprecher des Funkgeräts und dem kabelgebundenen Zubehör durch.

Sie können die Audioausgabe zwischen dem eingebauten Lautsprecher des Funkgeräts und dem Lautsprecher des kabelgebundenen Zubehörs hin- und herschalten, vorausgesetzt dass:

- Das kabelgebundene Zubehör mit Lautsprecher angeschlossen ist.
- Das Audiosignal nicht an ein externes Bluetooth-Zubehör weitergeleitet wurde.

Drücken Sie die programmierte **Audio-Umschalttaste**.

Wenn das Audiosignal geändert wurde, ertönt ein Hinweiston.

Das Ausschalten des Funkgeräts oder das Abnehmen des Zubehörs setzt die Audioausgabe auf die internen Lautsprecher des Funkgeräts zurück.

7.7.28

Ein-/Ausschalten der Lautstärkeregelung

Die Audiolautstärke Ihres Funkgeräts wird automatisch so geregelt, dass sie an aktuelle Hintergrundgeräusche in der Umgebung des Funkgeräts, einschließlich stationärer und nicht stationärer Geräuschquellen, angepasst und entsprechend kompensiert wird. Diese Funktion betrifft nur den Empfang und hat keinen Einfluss auf das Sende-Audio. Befolgen Sie die Vorgehensweise zum Ein- und Ausschalten der Lautstärkeregelung auf Ihrem Funkgerät.

HINWEIS:
Während einer Bluetooth-Sitzung ist diese Funktion nicht verfügbar.

1 Führen Sie einen der folgenden Schritte aus:
   - Drücken Sie die programmierte Taste **Intelligentes Audio**. Überspringen Sie die nachfolgenden Schritte.
   - Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis Dienstprogramme.

Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis

Funkgeräteinstellungen. Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis Intelligentes

Audio. Drücken Sie OK, um die Option auszuwählen.

5 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie ▲ oder ▼ bis Ein. Drücken Sie OK, um die Option auszuwählen. Im Display wird ✓ neben Ein angezeigt.
- Drücken Sie ▲ oder ▼ bis Aus. Drücken Sie OK, um die Option auszuwählen. Im Display wird ✓ neben Aus angezeigt.

7.7.29

Ein-/Ausschalten der Funktion „Vibrant-Verbesserung“

Sie können diese Funktion beim Sprechen in einer Sprache aktivieren, die viele alveolare Vibranten (rollendes „R“) enthält. Führen Sie die Vorgehensweise zum Ein- und Ausschalten der Funktion „Vibrant-Verbesserung“ auf Ihrem Funkgerät durch.

1 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie die programmierte Taste **Vibrant-Verbesserung**. Überspringen Sie die nachfolgenden Schritte.
- Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis

Dienstprogramme.Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis Funkgeräteinstellungen.Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis Trill-Ton-Erweiterung. Drücken Sie OK, um die Option auszuwählen.

5 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie ▲ oder ▼ bis Ein. Drücken Sie OK, um die Option auszuwählen. Im Display wird ✓ neben Ein angezeigt.
- Drücken Sie ▲ oder ▼ bis Aus. Drücken Sie OK, um die Option auszuwählen. Im Display wird ✓ neben Aus angezeigt.

7.7.30

Ein- und Ausschalten der dynamischen Mikrofonverzerrungssteuerung

Wenn diese Funktion eingeschaltet ist, kontrolliert das Funkgerät automatisch den Mikrofoneingang und passt den Verstärkungswert an, um Audioclipping zu vermeiden.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis Dienstprogramme. Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis Funkgeräteinstellungen. Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis Mik.-Verzerrung. Drücken Sie OK, um die Option auszuwählen.

5 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie OK, um die dynamische Mikrofonverzerrungssteuerung zu aktivieren. Wenn diese Option aktiviert ist, wird ✓ neben Aktiviert angezeigt.
- Drücken Sie OK, um die dynamische Mikrofonverzerrungssteuerung zu deaktivieren. Wenn diese Option deaktiviert ist, wird ✓ neben Aktiviert angezeigt.

7.7.31

Einstellen der Audioumgebung

Befolgen Sie die Vorgehensweise zum Einstellen der Audioumgebung Ihres Funkgeräts in Abhängigkeit zu Ihrer Umgebung.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis Dienstprogramme. Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis Funkgeräteinstellungen. Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis Audioumgebung. Drücken Sie OK, um die Option auszuwählen.

5 Drücken Sie ▲ oder ▼ bis zur gewünschten Einstellung. Drücken Sie OK, um die Option auszuwählen.

Die Einstellungen sind wie folgt:

- Wählen Sie Standard für die werkseitigen Voreinstellungen aus.
- Wählen Sie Laut aus, um die Lautstärke zu erhöhen, wenn Sie sich in geräuschvollen Umgebungen befinden.
- Wählen Sie Arbeitsgruppe, um das akustische Feedback zu reduzieren, wenn Sie eine Reihe

von Funkgeräten benutzen, die sich nahezu an derselben Position befinden.

Auf dem Display wird ✓ neben der ausgewählten Einstellung angezeigt.

7.7.32

Einstellen von Audio-Profilen

Führen Sie die Vorgehensweise zum Einstellen von Audio-Profilen auf Ihrem Funkgerät durch.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Dienstprogramme`.

Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis

`Funkgeräteinstellungen`. Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis `Audio-Profile`.

Drücken Sie OK, um die Option auszuwählen.

5 Drücken Sie ▲ oder ▼ bis zur gewünschten

Einstellung. Drücken Sie OK, um die Option auszuwählen.

Die Einstellungen sind wie folgt:

- Wählen Sie `Standard` zum Deaktivieren des zuvor ausgewählten Audioprofils und zum Zurückkehren zu den werkseitigen Voreinstellungen.
- Wählen Sie `Ebene 1`, `Ebene 2` oder `Ebene 3` für Audio-Profile zur Vermeidung von lärmbedingten Hörverlusten, die typisch für Erwachsene ab dem 40. Lebensjahr sind.
- Wählen Sie `Höhensteig.`, `Mittensteigerung`, oder `Basssteigerung` für Audio-Profile mit einem klareren, etwas nasaleren und einen tieferen Klang.

Auf dem Display wird ✓ neben der ausgewählten Einstellung angezeigt.

7.7.33

Allgemeine Informationen zum Funkgerät

In Ihrem Funkgerät sind Daten zu verschiedenen Parametern gespeichert.

Zu den allgemeinen Informationen Ihres Funkgeräts gehören:

- Akku-Informationen
- Funkgerät-Alias und Funkgeräte-ID
- Firmware- und Codeplug-Version
- Software-Aktualisierung
- GNSS-Informationen
- Standort-Informationen
- Anzeige der Empfangssignalstärke (RSSI)

HINWEIS:

Drücken Sie , um zum vorangehenden Bildschirm zurückzukehren. Drücken Sie lang, um zum Startbildschirm zurückzukehren. Das Funkgerät verlässt den aktuellen Bildschirm, sobald der Inaktivitäts-Timer abgelaufen ist.

7.7.33.1

Aufrufen der Akkudaten

Zeigt Akkuinformationen an.

1. Drücken Sie , um das Menü aufzurufen.
2. Drücken Sie ▲ oder ▼ bis `Dienstprogramme`.

   Drücken Sie , um die Option auszuwählen.
3. Drücken Sie ▲ oder ▼ bis `Geräteinfo`.Drücken Sie , um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis `Akku Info`.Drücken Sie OK, um die Option auszuwählen. Im Display werden Informationen zum Akku angezeigt.

HINWEIS:
Nur für **IMPRES**-Akkus: Wenn ein Akku in einem IMPRES-Ladegerät aufgefrischt werden muss, zeigt das Display `Akku auffrischen` an. Nach dem Auffrischen werden im Display Informationen zum Akku angezeigt.

7.7.33.2

Prüfen des Funkgerät-Alias und der ID

Führen Sie die Vorgehensweise zum Überprüfen des Funkgerät-Alias und der ID auf Ihrem Funkgerät durch.

1 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie die programmierte Taste **Funkgerät-Alias und ID**. Überspringen Sie die folgenden Schritte.
  Ein positiver Hinweiston erklingt.
  Sie können die programmierte Taste **Funkgerät-Alias und ID** drücken, um zum vorhergehenden Bildschirm zurückzukehren.
- Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Dienstprogramme`.
Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis `Geräte-Info`.
Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis `Meine ID`. Drücken Sie OK, um die Option auszuwählen.
In der ersten Textzeile wird der Funkgerät-Aliasname angezeigt. In der zweiten Textzeile wird die Funkgerät-ID angezeigt.

7.7.33.3

Überprüfen der Firmware- und Codeplug-Versionen

Führen Sie die Vorgehensweise zum Überprüfen der Firmware- und Codeplug-Version Ihres Funkgeräts durch.

1. Drücken Sie OK, um das Menü aufzurufen.
2. Drücken Sie ▲ oder ▼ bis `Dienstprogramme`.

   Drücken Sie OK, um die Option auszuwählen.
3. Drücken Sie ▲ oder ▼ bis `Geräte-Info`.

   Drücken Sie OK, um die Option auszuwählen.
4. Drücken Sie ▲ oder ▼ bis `Versionen`. Drücken Sie OK, um die Option auszuwählen.

   Im Display wird die aktuelle Firmware- und Codeplug-Version angezeigt.

7.7.33.4

Überprüfen der GNSS-Informationen

Sie können GNSS-Informationen Ihres Funkgeräts anzeigen, d. h. Werte wie die folgenden:

- Breitengrad
- Längengrad
- Höhe
- Richtung
- Geschwindigkeit
- Horizontal Dilution of Precision (HDOP – Streubreite der Messwerte in Horizontalrichtung)
- Satelliten
- Version

1. Drücken Sie OK, um das Menü aufzurufen.
2. Drücken Sie ▲ oder ▼ bis `Dienstprogramme`.

   Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis `Geräteinfo`. Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis `GNSS Info`. Drücken Sie OK, um die Option auszuwählen.

5 Drücken Sie ▲ oder ▼ bis zum gewünschten Element. Drücken Sie OK, um die Option auszuwählen. Im Display werden die gewünschten GNSS-Informationen angezeigt.

7.7.33.5

Überprüfen der Software-Aktualisierungsinformationen

Diese Funktion zeigt das Datum und die Zeit der letzten Softwareaktualisierung, die über Over-the-Air-Programming (OTAP) oder WLAN durchgeführt wurde. Führen Sie die Vorgehensweise zum Überprüfen der Softwareaktualisierungsfunktionen auf Ihrem Funkgerät durch.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Dienstprogramme`. Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis `Geräte-Info`. Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis `SW-Update`. Drücken Sie OK, um die Option auszuwählen.

Im Display werden das Datum und die Uhrzeit der letzten Software-Aktualisierung angezeigt.

Das Menü für die Software-Aktualisierung ist erst nach mindestens einer erfolgreichen OTAP- oder WLAN-Sitzung verfügbar. Weitere Informationen finden Sie unter Over-the-Air Programmierung (OTAP) auf Seite 471.

7.7.33.6

Anzeigen von Standort-Informationen

Befolgen Sie die Vorgehensweise, um den aktuellen Standortnamen anzuzeigen, an dem sich Ihr Funkgerät befindet.

1 Drücken Sie OK, um das Menü aufzurufen.

2 Drücken Sie ▲ oder ▼ bis `Dienstprogramme`.

Drücken Sie OK, um die Option auszuwählen.

3 Drücken Sie ▲ oder ▼ bis `Geräte-Info`.

Drücken Sie OK, um die Option auszuwählen.

4 Drücken Sie ▲ oder ▼ bis

`Standortinformationen`. Drücken Sie OK, um die Option auszuwählen.

Das Display zeigt den aktuellen Standortnamen an.

7.7.33.7

Anzeige der Empfangssignalstärke (RSSI)

Mit dieser Funktion können Sie die Werte für die Anzeige der Empfangssignalstärke (RSSI) ansehen.

Auf dem Display wird das **RSSI**-Symbol in der oberen rechten Ecke angezeigt. Unter Anzeigesymbole finden Sie weitere Informationen zum **RSSI**-Symbol.

7.7.33.7.1

Anzeigen von RSSI-Werten

Führen Sie die Vorgehensweise zum Anzeigen von RSSI-Werten auf Ihrem Funkgerät durch.

Auf dem Startbildschirm:

1 Drücken Sie innerhalb von fünf Sekunden ◀ dreimal und dann sofort ▶.

Im Display werden die aktuellen RSSI-Werte angezeigt.

2 Drücken Sie lang, um zum Startbildschirm zurückzukehren.

Garantie für Akkus und Ladegeräte

Produktgarantie

Die Produktgarantie stellt eine Garantie gegen verarbeitungsbedingte Defekte bei normaler Nutzung und normalem Betrieb dar.

Alle MOTOTRBO Akkus	24 Monate
IMPRES-Ladegeräte (Einzelladegeräte und Mehrfachladegeräte, ohne Display)	24 Monate
IMPRES-Ladegeräte (Mehrfachladegeräte mit Display)	12 Monate
Nickel-Metallhydrid- (NiMH) oder Lithium-Ionen-Akkus (Li-Ion)	12 Monate
IMPRES-Akkus bei ausschließlicher Verwendung mit IMPRES-Ladegeräten	18 Monate

Die Akkukapazitätsgarantie

Die Akkukapazitätsgarantie gewährleistet 80 % der Nennkapazität für die Laufzeit der Garantie.

Diese Seite wurde absichtlich leer gelassen.

Beschränkte Garantie

KOMMUNIKATIONSPRODUKTE VON MOTOROLA SOLUTIONS

I. UMFANG UND DAUER DES GARANTIEANSPRUCHS

Motorola Solutions, Inc. („Motorola Solutions“) garantiert hiermit, dass die von Motorola Solutions hergestellten Kommunikationsprodukte („Produkte“) ab dem Kaufdatum für die nachstehend aufgeführte Dauer unter normalem Gebrauch und Betrieb frei von Materialfehlern und Verarbeitungsmängeln sind.

DP-Serie Digitale Handsprech	24 Monate
Produktzubehör (mit Ausnahme von Akkus und Ladegeräten)	12 Monate

Motorola Solutions führt nach eigenem Ermessen innerhalb der Garantiezeit kostenlos die Reparatur des Produkts (mit Neu- oder erneuerten Teilen) durch oder ersetzt es (durch ein Neu- oder erneuertes Produkt) oder erstattet den Kaufpreis des Produkts, sofern das Produkt gemäß den Bedingungen dieser Garantie an Motorola Solutions retourniert wird. Ersatzteile oder -platinen stehen dann für den Rest der ursprünglichen Garantiezeit unter Garantie. Alle ersetzten Teile des Produkts werden Eigentum von Motorola Solutions.

Diese ausdrückliche eingeschränkte Garantie von Motorola Solutions gilt nur für den ursprünglichen Endabnehmer/Käufer und ist nicht übertragbar. Dies ist die vollständige Garantie für das von Motorola Solutions hergestellte Produkt. Motorola Solutions übernimmt keine Verpflichtungen oder Haftung für Ergänzungen oder Änderungen an dieser Garantie, außer in schriftlicher Form und von einem Handlungsbevollmächtigen von Motorola Solutions unterschrieben.

Sofern dies nicht in einem separaten Vertrag zwischen Motorola Solutions und dem ursprünglichen Endabnehmer/Käufer festgelegt wurde, gewährt Motorola Solutions keine Garantie für die Installation, Instandhaltung oder Wartung des Produkts.

Motorola Solutions übernimmt keinerlei Haftung für nicht von Motorola Solutions bereitgestellte Zusatzausrüstung, die an dem Produkt angebracht ist oder in Verbindung mit

dem Produkt verwendet wird, oder für den Betrieb des Produkts mit Zusatzausrüstung. Sämtliche Zusatzausrüstung ist ausdrücklich von dieser Garantie ausgeschlossen. Da jedes System, in dem das Produkt zur Anwendung kommen kann, individuell ist, übernimmt Motorola Solutions im Rahmen dieser Garantie keine Haftung für die Reichweite, die Abdeckung oder den Betrieb des Systems als Ganzes.

II. ALLGEMEINE GARANTIEBEDINGUNGEN

Diese Garantie stellt den maximalen Umfang der Verantwortlichkeiten von Motorola Solutions hinsichtlich des Produkts dar. Reparatur, Ersatz oder Kaufpreiserstattung nach Ermessen von Motorola Solutions sind die ausschließlichen Rechtsmittel des Verbrauchers. DIESE GARANTIE WIRD ANSTELLE ALLER ANDEREN AUSDRÜCKLICHEN GARANTIEN GEWÄHRT. ALLE KONKLUDENTEN GEWÄHRLEISTUNGEN, EINSCHLIESSLICH, OHNE EINSCHRÄNKUNG, DER KONKLUDENTEN GARANTIE DER MARKTGÄNGIGKEIT ODER EIGNUNG FÜR EINEN BESTIMMTEN ZWECK, SIND AUF DIE DAUER DIESER BESCHRÄNKTEN GARANTIE BEGRENZT. IN KEINEM FALL HAFTET MOTOROLA SOLUTIONS FÜR SCHÄDEN, DIE ÜBER DEN KAUFPREIS DES JEWEILIGEN PRODUKTS HINAUSGEHEN, ODER FÜR NUTZUNGSSCHÄDEN, ZEITVERLUST, UNANNEHMLICHKEITEN, ENTGANGENE GESCHÄFTSMÖGLICHKEITEN, ENTGANGENE GEWINNE ODER EINNAHMEN ODER ANDERE BEILÄUFIGE, SONDER- ODER FOLGESCHÄDEN, DIE IM ZUSAMMENHANG MIT DER NUTZUNG ODER NICHTVERWENDBARKEIT DES PRODUKTS ENTSTEHEN, UND ZWAR IM GRÖSSTMÖGLICHEN DURCH DAS ANWENDBARE RECHT GESTATTETEN UMFANG.

III. STAATSGESETZE (NUR FÜR USA):

EINIGE STAATEN VERBIETEN DIE EINSCHRÄNKUNG ODER DEN AUSSCHLUSS VON BEGLEIT- ODER FOLGESCHÄDEN ODER DIE BESCHRÄNKUNG DER GELTUNGSDAUER EINER KONKLUDENTEN GARANTIE, SO DASS DIE OBIGEN EINSCHRÄNKUNGEN ODER AUSSCHLÜSSE EVENTUELL NICHT ANWENDBAR SIND.

Diese Garantie gesteht Ihnen spezifische Rechte zu. Sie haben unter Umständen auch andere Rechte, die je nach Staat variieren.

IV. INANSPRUCHNAHME VON GARANTIELEISTUNGEN

Zur Inanspruchnahme von Garantieleistungen muss der Kaufnachweis (aus dem das Kaufdatum und die Seriennummer des Artikels hervorgehen) vorgelegt werden, und das Produkt muss unter Vorauszahlung der Versicherungs- und Frachtkosten einer autorisierten Garantieservicestelle zugestellt werden. Motorola Solutions erbringt die Garantieleistungen durch eine seiner autorisierten Garantieservicestellen. Wenden Sie sich zunächst an das Unternehmen, das Ihnen das Produkt verkauft hat (z. B. Händler oder Kommunikationsdienstleister). Dieses Unternehmen hilft Ihnen dann, die Garantieleistungen in Anspruch zu nehmen. In den USA und Kanada können Sie Motorola Solutions unter 1-800-927-2744 telefonisch kontaktieren.

V. HAFTUNGSAUSSCHLUSS

1 Defekte oder Schäden, die aus einer Verwendung des Produkts resultieren, die nicht der normalen und üblichen Art entspricht.

2 Defekte oder Schäden, die aus unsachgemäßer Handhabung, Unfällen, Wasserschäden oder Fahrlässigkeit resultieren.

3 Defekte oder Schäden, die aus unzulässigem Test oder Betrieb, unzulässiger Wartung oder Installation sowie unzulässigen Änderungen oder Adaptierungen resultieren.

4 Verlust oder Schäden an Antennen, soweit nicht direkt durch Material- und Verarbeitungsfehler verursacht.

5 Produkte, an denen unbefugte Produktänderungen, -zerlegungen oder -reparaturen (insbesondere Ergänzungen des Produkts durch nicht von Motorola Solutions gelieferte Geräte) vorgenommen werden, die sich negativ auf die Leistung des Produkts auswirken oder die normale Inspektion und Testläufe des Produkts im Rahmen der Garantie zur Beurteilung eines Garantieanspruchs stören.

6 Produkte, bei denen die Seriennummer entfernt oder unlesbar gemacht wurde.

7 Akkus, wenn:

- Dichtungen der Akkuzellengehäuse aufgebrochen wurden oder Zeichen einer Manipulation zeigen.
- Der Schaden oder Defekt durch Aufladen oder Verwenden des Akkus in Geräten oder unter Betriebsverhältnissen erfolgt ist, für die das Produkt nicht spezifiziert ist.

8 Frachtkosten zur Reparaturwerkstatt.

9 Ein Produkt, das aufgrund illegaler oder nicht autorisierter Änderung der Software/Firmware im Produkt nicht den von Motorola Solutions veröffentlichen Spezifikationen oder der angegebenen FCC-Zertifizierung entspricht, die für das Produkt zum Zeitpunkt der ersten Auslieferung durch Motorola Solutions gelten.

10 Kratzer oder kosmetische Schäden an Produktoberflächen, die den Betrieb des Produkts nicht beeinträchtigen.

11 Normaler und üblicher Verschleiß.

VI. PATENTE UND SOFTWARE-BEDINGUNGEN

Motorola Solutions übernimmt auf eigene Kosten die Verteidigung des Endbenutzers/Käufers gegen sämtliche vorgebrachten Klagen auf Basis eines Anspruchs, das Produkt oder eines seiner Bestandteile verstieße(n) gegen ein US-amerikanisches Patent, und Motorola Solutions kommt für gegen den Endbenutzer/Käufer durch ein Gerichtsurteil verhängte Kosten und Schadensersatzansprüche auf, die aus einer derartigen Klage resultieren. Eine derartige Verteidigung und Zahlungen unterliegen jedoch folgenden Bedingungen:

1 Motorola Solutions wird von einem solchen Käufer unverzüglich schriftlich über jede Ankündigung eines solchen Anspruchs benachrichtigt,

2 Motorola Solutions hat die alleinige Kontrolle über die Verteidigung gegen solche Klagen und alle Verhandlungen zu deren Schlichtung oder Vergleich, und

3 sollte ein derartiger Käufer Motorola Solutions nach deren Ermessen und auf deren Kosten erlauben, für einen derartigen Käufer das Recht zu erwerben, das Produkt oder Teile desselben weiterhin zu verwenden, zu ersetzen oder zu modifizieren, sodass es gegen keine Patente verstößt, oder einem derartigen Käufer eine Gutschrift für das Produkt oder die Bestandteile bzw. deren Abschreibungsrestwert ausstellt und seine Rückgabe annimmt, wenn das Produkt oder Teile davon Gegenstand (oder im Ermessen von Motorola Solutions wahrscheinlich Gegenstand) eines Anspruchs einer derartigen Verletzung eines US-amerikanischen Patents werden sollte(n). Der Abschreibungsrestwert ist ein von Motorola Solutions ermittelter, gleichwertiger Betrag pro Jahr über die Lebensdauer des Produkts oder dessen Teile.

Motorola Solutions übernimmt keine Haftung hinsichtlich Ansprüchen für Patentverletzungen, die auf einer

Kombination von hierunter geliefertem Produkt und Bestandteilen mit nicht von Motorola Solutions bereitgestellter/n Software, Vorrichtungen oder Geräten basieren. Des Weiteren lehnt Motorola Solutions jegliche Verantwortung für nicht von Motorola Solutions bereitgestellte Zusatzausrüstung oder Software ab, die in Verbindung mit dem Produkt benutzt wird. Das Vorangehende stellt die gesamte Haftung von Motorola Solutions hinsichtlich der Verletzung von Patenten durch das Produkt und dessen Bestandteile dar.

Für urheberrechtlich geschützte Motorola Solutions-Software liegen in den Vereinigten Staaten und anderen Ländern per Gesetz bestimmte Exklusivrechte für Motorola Solutions vor, wie z. B. das Exklusivrecht für die Vervielfältigung oder den Vertrieb von Kopien solcher Motorola Solutions-Software. Motorola Solutions-Software darf ausschließlich mit dem Produkt verwendet werden, in das diese Software ursprünglich integriert war, und die Software in einem derartigen Produkt darf nicht ersetzt, kopiert, verteilt und in irgendeiner Weise modifiziert oder zum Herstellen abgeleiteter Erzeugnisse verwendet werden. Kein anderer Gebrauch derartiger Motorola Solutions-Software, einschließlich Änderung, Modifikation, Reproduktion, Distribution oder Reverse Engineering bzw. Nachkonstruktion, aber nicht darauf begrenzt, und keine Ausübung von Rechten an derartiger Motorola Solutions-Software ist zulässig. Unter Patentschutz und Urheberrecht von Motorola Solutions wird keine Lizenz stillschweigend, durch Verwirkung eines Rechts oder auf sonstige Weise erteilt.

VII. ANWENDBARES RECHT

5.7.22.1 Desactivación de una radio..... 168
5.7.22.2 Desactivación de una radio mediante la lista de contactos.....169
5.7.22.3 Desactivación de una radio mediante marcación manual..... 170
5.7.22.4 Activación de una radio170
5.7.22.5 Activación de una radio mediante la lista de contactos....171
5.7.22.6 Activación de una radio mediante marcación manual.....172
5.7.23 Anulación de la radio..... 172
5.7.24 Operario aislado..... 173
5.7.25 Funciones de bloqueo por contraseña..... 173
5.7.25.1 Acceso a las radios mediante el uso de contraseñas 173
5.7.25.2 Activación o desactivación del bloqueo por contraseña..... 174
5.7.25.3 Desbloqueo de radios en estado de bloqueo..... 175
5.7.25.4 Cambio de contraseñas 175
5.7.26 Lista de notificaciones..... 176
5.7.26.1 Acceso a la lista de notificaciones..... 177
5.7.27 Programación a través del interfaz aire..... 177
5.7.28 Indicador de intensidad de la señal recibida.....178
5.7.28.1 Visualización de valores de RSSI..... 178
5.7.29 Programación del panel frontal.. 179

5.7.29.1 Acceso al modo Programación del panel frontal.. 179
5.7.29.2 Edición de los parámetros del modo FPP..... 179
5.7.30 Funcionamiento de Wi-Fi..... 180
5.7.30.1 Activación o desactivación del Wi-Fi..... 180
5.7.30.2 Conexión a un punto de acceso a la red.....181
5.7.30.3 Comprobación del estado de conexión Wi-Fi..... 181
5.7.30.4 Actualización de la lista de redes..... 182
5.7.30.5 Adición de una red..... 183
5.7.30.6 Visualización de los detalles de los puntos de acceso a la red.....183
5.7.30.7 Eliminación de los puntos de acceso a la red.....184
5.8 Herramientas..... 185
5.8.1 Bloqueo o desbloqueo del teclado..... 185
5.8.2 Identificación del tipo de cable.....186
5.8.3 Configuración del temporizador del menú..... 186
5.8.4 Reconocimiento de voz..... 187
5.8.4.1 Configurar reconocimiento de voz..... 187
5.8.5 Activación y desactivación del supresor de respuesta acústica.....188
5.8.6 Activación o desactivación del sistema global de navegación por satélite..... 189
5.8.7 Encendido y apagado de la pantalla inicial..... 190
5.8.8 Encendido y apagado de tonos/ alertas de la radio..... 190
5.8.9 Configuración de los niveles de diferencia de volumen de tonos y alertas..... 191
5.8.10 Activación o desactivación del tono Permiso para hablar..... 192
5.8.11 Activación o desactivación del tono de encendido..... 193
5.8.12 Configuración de los tonos de alerta de mensaje de texto..... 194
5.8.13 Niveles de potencia..... 194

5.8.13.1 Configuración de los niveles de potencia..... 195
5.8.14 Ajuste del brillo de la pantalla.... 195
5.8.15 Configuración del temporizador de la luz de fondo de la pantalla..... 196
5.8.16 Activación o desactivación de la luz de fondo..... 197
5.8.17 Encendido y apagado de los indicadores LED..... 198
5.8.18 Configuración de idiomas..... 198
5.8.19 Activación o desactivación de la tarjeta opcional..... 199
5.8.20 Activación o desactivación del indicador de voz.....199
5.8.21 Activación o desactivación del AGC del micrófono digital..... 200
5.8.22 Cambio de la salida de audio entre el altavoz interno de la radio y un accesorio con cables..... 201
5.8.23 Activación o desactivación del audio inteligente.....201
5.8.24 Activación o desactivación de la mejora de la vibración del habla..... 202
5.8.25 Activación y desactivación del control de distorsión dinámica del micrófono..... 203
5.8.26 Configuración del entorno de audio..... 203
5.8.27 Configuración de perfiles de audio..... 204
5.8.28 Información general de la radio. 205
5.8.28.1 Acceso a la información de la batería..... 206
5.8.28.2 Verificación de alias e ID de radio..... 206
5.8.28.3 Verificación de las versiones de firmware y de Codeplug.....207
5.8.28.4 Verificación de la información de GNSS..... 207
5.8.28.5 Verificación de la información sobre actualización de software..... 208
5.8.28.6 Mostrar la información del sitio.....209
Operaciones Connect Plus.....211

6.1 Controles de radio adicionales en el modo Connect Plus..... 211
6.1.1 Botón PTT (pulsar para hablar)... 211
6.1.2 Botones programables.....211
6.1.2.1 Funciones asignables de la radio..... 212
6.1.2.2 Funciones asignables de configuración o herramientas.....214
6.1.3 Identificación de los indicadores de estado en el modo Connect Plus.....214
6.1.3.1 Iconos de pantalla.....215
6.1.3.2 Iconos de llamada.....218
6.1.3.3 Iconos del menú avanzado..... 218
6.1.3.4 Iconos de Enviados.....219
6.1.3.5 Iconos del dispositivo Bluetooth.....220
6.1.3.6 Indicador LED..... 220
6.1.3.7 Tonos de indicador..... 221
6.1.3.8 Tono de alerta.....222
6.1.4 Cambio entre los modos de Connect Plus y no de Connect Plus..... 222
6.2 Realización y recepción de llamadas en modo Connect Plus..... 222
6.2.1 Selección de un emplazamiento..222
6.2.1.1 Solicitud de itinerancia... 223
6.2.1.2 Activar/desactivar bloqueo de sitio.....223
6.2.1.3 Restricción de sitios..... 224
6.2.2 Selección de una Zona..... 224
6.2.3 Uso de varias redes.....225
6.2.4 Selección de un tipo de llamada..225
6.2.5 Recepción y respuesta a llamadas de radios.....226
6.2.5.1 Recepción y respuesta a llamadas a grupo..... 226
6.2.5.2 Recepción y respuesta a llamadas privadas..... 227
6.2.5.3 Recepción de una llamada a todos en sitio..... 228
6.2.5.4 Recepción de una llamada telefónica privada..... 228
6.2.5.5 Recepción de una llamada telefónica de grupo de conversación.....229

6.2.5.6 Llamada telefónica multigrupo entrante..... 229
6.2.6 Realización de una llamada de radio.....229
6.2.6.1 Realización de una llamada con el mando selector de canales.....230
6.2.6.1.1 Realización de llamadas a grupo.....230
6.2.6.1.2 Realización de llamadas privadas..... 231
6.2.6.1.3 Realización de una llamada a todos en sitio.....232
6.2.6.1.4 Realización de una llamada multigrupo...233
6.2.6.1.5 Realización de llamadas privadas con el botón de Llamada por marcación rápida.....233
6.3 Funciones avanzadas en modo Connect Plus.....234
6.3.1 Recordatorio de canal de inicio... 234
6.3.1.1 Silenciar el recordatorio de canal de inicio..... 235
6.3.1.2 Configuración de un nuevo canal de inicio..... 235
6.3.2 Repliegue auto.....236
6.3.2.1 Indicaciones del modo Repliegue auto.....236
6.3.2.2 Realización/recepción de llamadas en modo de seguridad..... 237
6.3.2.3 Reanudación del funcionamiento normal.....238
6.3.3 Verificación de radio..... 238
6.3.3.1 Envío de una verificación de radio..... 239
6.3.4 Monitorización remota..... 240
6.3.4.1 Iniciación del monitor remoto.....240
6.3.5 Escaneo.....241
6.3.5.1 Inicio y detención del rastreo.....242
6.3.5.2 Respuesta a una transmisión durante un rastreo.. 242

6.3.6 Rastreo configurable por el usuario..... 243
6.3.7 Edición de la lista de rastreo.....244
6.3.8 Añadir o borrar un grupo a través del menú Añadir miembros.....245
6.3.9 Descripción de la operación de rastreo.....247
6.3.10 Escaneo de contestaciones.....248
6.3.11 Edición de la prioridad en un grupo de conversación..... 248
6.3.12 Configuración de contactos..... 250
6.3.12.1 Realización de una llamada privada desde Contactos.....250
6.3.12.2 Realización de una búsqueda de alias de llamada... 251
6.3.13 Configuración del indicador de llamada..... 252
6.3.13.1 Activación y desactivación de Timbres de llamada para Alertas de llamada 252
6.3.13.2 Activación y desactivación de timbres de llamada para llamadas privadas 253
6.3.13.3 Activación y desactivación de timbres de llamada para los mensajes de texto..... 254
6.3.13.4 Selección de un tipo de tono de alerta..... 255
6.3.13.5 Configuración del estilo de vibración.....256
6.3.13.6 Aumento del volumen del tono de alarma..... 257
6.3.14 Funciones del registro de llamadas..... 257
6.3.14.1 Visualización de llamadas recientes..... 257
6.3.14.2 Eliminación de una llamada de la lista de llamadas..258
6.3.14.3 Visualización de detalles desde una lista de llamadas.....258
6.3.15 Funcionamiento de las alertas de llamada..... 259

6.3.15.1 Respuesta a alertas de llamada..... 259
6.3.15.2 Realización de una alerta de llamada desde la lista de contactos.....260
6.3.15.3 Realización de una alerta de llamada con el botón de acceso de marcación rápida. 261
6.3.16 Modo Silenciar..... 261
6.3.16.1 Activación del modo Silenciar..... 261
6.3.16.2 Configuración del temporizador del modo Silenciar 262
6.3.16.3 Salida del modo Silenciar..... 263
6.3.17 Funcionamiento de emergencia 264
6.3.17.1 Recepción de una emergencia entrante..... 265
6.3.17.2 Almacenamiento de los detalles de emergencia en la lista de alarmas.....266
6.3.17.3 Eliminación de Detalles de emergencia..... 267
6.3.17.4 Respuesta a una llamada de emergencia.....267
6.3.17.5 Respuesta a una alerta de emergencia..... 268
6.3.17.6 Ignorar llamada de emergencia de retorno.....268
6.3.17.7 Inicio de una llamada de emergencia..... 269
6.3.17.8 Inicio de una llamada de emergencia con transmisión de voz posterior..... 269
6.3.17.9 Inicio de una alerta de emergencia..... 270
6.3.17.10 Salida del modo de emergencia..... 270
6.3.18 Alarmas de hombre caído.....271
6.3.18.1 Activación y desactivación de alarmas de hombre caído..... 273
6.3.18.2 Restablecimiento de alarmas de hombre caído..... 274
6.3.19 Señal.....275
6.3.19.1 Encendido y apagado de la señal.....275

6.3.19.2 Restablecimiento de la señal..... 276
6.3.20 Mensajes de texto.....277
6.3.20.1 Envío de mensajes de texto rápidos..... 278
6.3.20.2 Envío de un mensaje de texto rápido con el botón de acceso de marcación rápida..... 278
6.3.20.3 Gestión de mensajes de texto que no se han podido enviar..... 279
6.3.20.3.1 Reenvío de mensajes de texto..... 279
6.3.20.3.2 Transferencia de mensajes de texto..... 280
6.3.20.4 Gestión de mensajes de texto enviados.....280
6.3.20.4.1 Visualización de mensajes de texto enviados.....280
6.3.20.4.2 Envío de un mensaje de texto enviado 281
6.3.20.4.3 Eliminación de todos los mensajes de texto enviados de la carpeta Enviados..... 283
6.3.20.5 Recepción de mensajes de texto.....284
6.3.20.6 Lectura de mensajes de texto..... 284
6.3.20.7 Gestión de mensajes de texto recibidos.....284
6.3.20.7.1 Visualización de mensajes de texto desde el buzón.....285
6.3.20.7.2 Eliminación de mensajes de texto desde el buzón.....285
6.3.20.7.3 Eliminación de todos los mensajes de texto desde el buzón..... 286
6.3.21 Privacidad.....287
6.3.21.1 Realización de una llamada con la privacidad (codificación) activada..... 288
6.3.22 Seguridad..... 289

6.3.22.1 Desactivación de la radio..... 289
6.3.22.2 Habilitar radio..... 290
6.3.23 Funciones de bloqueo por contraseña..... 292
6.3.23.1 Acceso a la radio mediante contraseña..... 292
6.3.23.2 Activación o desactivación del bloqueo por contraseña..... 292
6.3.23.3 Desbloqueo de la radio en estado de bloqueo..... 293
6.3.23.4 Cambio de la contraseña..... 294
6.3.24 Funcionamiento de Bluetooth.... 295
6.3.24.1 Encendido y apagado de la función Bluetooth..... 296
6.3.24.2 Búsqueda y conexión con un dispositivo Bluetooth..... 296
6.3.24.3 Búsqueda y conexión desde un dispositivo Bluetooth (modo visible).....297
6.3.24.4 Desconexión de un dispositivo Bluetooth..... 298
6.3.24.5 Cambio de la salida de audio entre el altavoz interno de la radio y el dispositivo Bluetooth.....299
6.3.24.6 Visualización de detalles del dispositivo..... 299
6.3.24.7 Eliminación del nombre del dispositivo..... 299
6.3.24.8 Ganancia de micrófono Bluetooth.....300
6.3.24.9 Modo Bluetooth visible permanentemente.....301
6.3.25 Ubicación en interiores..... 301
6.3.25.1 Activación o desactivación de la ubicación en interiores..... 301
6.3.25.2 Acceso a la información de balizas de ubicación en interiores..... 303
6.3.26 Lista de notificaciones..... 304
6.3.26.1 Acceso a la lista de notificaciones..... 304
6.3.27 Funcionamiento de Wi-Fi.....304

6.3.27.1 Activación o desactivación del Wi-Fi..... 305
6.3.27.2 Conexión a un punto de acceso a la red.....305
6.3.27.3 Comprobación del estado de conexión Wi-Fi..... 306
6.3.27.4 Actualización de la lista de redes..... 307
6.3.27.5 Adición de una red..... 307
6.3.27.6 Visualización de los detalles de los puntos de acceso a la red.....308
6.3.27.7 Eliminación de los puntos de acceso a la red.....309
6.4 Herramientas..... 310
6.4.1 Encendido y apagado de tonos/ alertas de la radio..... 310
6.4.2 Configuración del nivel de diferencia de volumen del tono de alerta.....311
6.4.3 Activación o desactivación del tono Permiso para hablar..... 312
6.4.4 Activación o desactivación del tono de alerta de encendido..... 312
6.4.5 Configuración del nivel de potencia..... 313
6.4.6 Ajuste del brillo de la pantalla..... 314
6.4.7 Configuración del temporizador de la luz de fondo de la pantalla..... 315
6.4.8 Encendido y apagado de la pantalla inicial..... 316
6.4.9 Idioma..... 316
6.4.10 Encendido y apagado del indicador LED..... 317
6.4.11 Identificación del tipo de cable...318
6.4.12 Anuncio de voz..... 318
6.4.13 Configuración de la función de reconocimiento de voz.....319
6.4.14 Temporizador de menú.....320
6.4.15 Micrófono AGC digital (Mic AGC-D)..... 321
6.4.16 Audio inteligente..... 321
6.4.17 Activación y desactivación del supresor de respuesta acústica.....323
6.4.18 Activación y desactivación del control de distorsión dinámica del micrófono..... 324

6.4.19 Activación o desactivación del GNSS.....325
6.4.20 Acceso a la información general de la radio..... 326
6.4.20.1 Acceso a la información de la batería..... 326
6.4.20.2 Comprobación del grado de inclinación (acelerómetro).....327
6.4.20.3 Comprobación del índice de número de modelo de radio..... 328
6.4.20.4 Comprobación del elemento CRC del archivo de Codeplug de tarjeta opcional OTA.....328
6.4.20.5 Presentación del ID de sitio (número de sitio).....329
6.4.20.6 Comprobación de la información del sitio..... 330
6.4.20.7 Comprobación del ID de la radio..... 330
6.4.20.8 Verificación de la versión de firmware y de Codeplug.....331
6.4.20.9 Comprobación de actualizaciones..... 332
6.4.20.9.1 Archivo de firmware..... 333
6.4.20.9.2 Versión de firmware pendiente.....334
6.4.20.9.3 Porcentaje recibido de firmware pendiente..... 335
6.4.20.9.4 Descarga de firmware pendiente.....336
6.4.20.9.5 Archivo de frecuencia.....337
6.4.20.9.6 Verificación de la información de GNSS..339

Información importante sobre seguridad

Guía de exposición de energía a radiofrecuencia y seguridad del producto para radios bidireccionales portátiles

¡ATENCIÓN!

Esta radio está exclusivamente restringida al uso laboral. Antes de utilizar la radio, lea la guía de exposición a radiofrecuencia y seguridad del producto para radios bidireccionales portátiles, que contiene importantes instrucciones de funcionamiento para un uso seguro, así como información importante sobre la energía de radiofrecuencia y su control, en cumplimiento de las normas y normativas aplicables.

Para obtener una lista de las antenas, las baterías y otros accesorios aprobados por Motorola Solutions, visite el siguiente sitio web:

http://www.motorolasolutions.com

Esta página se ha dejado en blanco intencionadamente.

Versión del software

Todas las funciones que se describen en las secciones siguientes son compatibles con la versión del software **R02.08.05.0000** o posterior.

Consulte Verificación de las versiones de firmware y de Codeplug en la página 207 para determinar la versión del software de su radio.

Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información.

Esta página se ha dejado en blanco intencionadamente.

Copyright

Los productos de Motorola Solutions descritos en el presente documento pueden incluir programas informáticos de Motorola Solutions protegidos por derechos de copyright. Las leyes de los Estados Unidos y otros países garantizan determinados derechos exclusivos a Motorola Solutions sobre los programas informáticos protegidos por copyright. Por consiguiente, ningún programa informático de Motorola Solutions protegido por copyright incluido entre los productos de Motorola Solutions descritos en este documento podrá copiarse ni reproducirse de ninguna forma sin el consentimiento expreso por escrito de Motorola Solutions.

© 2017 Motorola Solutions, Inc. Todos los derechos reservados.

Ninguna parte de este documento se puede reproducir, transmitir, almacenar en un sistema de recuperación o traducir a ningún idioma o lenguaje informático, independientemente del formato o el medio, sin el consentimiento previo por escrito de Motorola Solutions, Inc.

Asimismo, la adquisición de los productos de Motorola Solutions no garantiza, ya sea de forma implícita o explícita, por impedimento legal o de la forma que fuese, ningún tipo de licencia bajo los derechos de autor, las patentes o las solicitudes de patentes de Motorola Solutions, excepto en los casos de uso de licencias normales no excluyentes sin regalías derivados de la ejecución de la ley en la venta de un producto.

Descargo de responsabilidad

Tenga en cuenta que determinadas características, funciones y prestaciones descritas en este documento podrían no ser aplicables a un sistema específico o incluirse en la licencia de uso de este; también pueden depender de las características particulares del terminal o de la configuración de ciertos parámetros. Póngase en contacto con su distribuidor o representante de Motorola Solutions para obtener más información.

Marcas comerciales

MOTOROLA, MOTO, MOTOROLA SOLUTIONS y el logotipo de la M estilizada son marcas comerciales o marcas comerciales registradas de Motorola Trademark Holdings, LLC y se utilizan bajo licencia. Todas las demás marcas comerciales son propiedad de sus respectivos propietarios.

Directiva de Residuos de Aparatos Eléctricos y Electrónicos (RAEE) de la Unión Europea

La directiva de Gestión de Residuos de Aparatos Eléctricos y Electrónicos de la Unión Europea requiere que los productos que se vendan en los países de la UE tengan tachado el símbolo de la papelera en la etiqueta del producto y, en algunos casos, en el embalaje.

De acuerdo con lo establecido en la directiva de Gestión de Residuos de Aparatos Eléctricos y Electrónicos, el símbolo de la papelera tachado significa que los clientes y los usuarios finales residentes en la UE no pueden desechar equipos eléctricos ni accesorios como residuos domésticos.

Los clientes o los usuarios finales de los países de la UE deben ponerse en contacto con el representante del proveedor o servicio local para obtener información sobre el sistema de recogida de desechos de su país.

Derechos de autor del software informático

Los productos de Motorola Solutions descritos en el presente manual pueden incluir programas informáticos de Motorola Solutions protegidos por derechos de copyright almacenados en memorias de semiconductores o en otro tipo de medios. Las leyes de los Estados Unidos y de otros países preservan ciertos derechos exclusivos de Motorola Solutions con respecto a los programas informáticos protegidos por derechos de autor, que incluyen, entre otros, el derecho exclusivo de copia o reproducción en cualquier formato de un programa informático protegido por derechos de autor. Por consiguiente, se prohíbe la copia, la reproducción, la modificación, el uso de técnicas de ingeniería inversa y la distribución de forma alguna de todo programa informático de Motorola Solutions protegido por copyright e incluido en los productos de Motorola Solutions descritos en el presente manual sin el consentimiento expreso por escrito de Motorola Solutions. Asimismo, la adquisición de los productos de Motorola Solutions no garantiza, de forma implícita ni explícita, por impedimento legal ni de ningún otro modo, ningún tipo de licencia en lo que respecta a los derechos de copyright, las patentes o las solicitudes de patentes de Motorola Solutions, excepto en los casos de uso de licencias normales y no excluyentes derivados de la ejecución de la ley en la venta de un producto.

La tecnología de codificación de voz AMBE+2™ que incluye este producto está protegida por derechos de propiedad intelectual, incluidos derechos de patente, copyrights y secretos comerciales de Digital Voice Systems, Inc.

Esta tecnología de codificación de voz tiene licencia exclusiva para su uso con este equipo de comunicaciones. Se prohíbe de forma explícita al usuario de esta tecnología descompilar, usar técnicas de ingeniería inversa, desmontar el código objeto o convertir de ninguna otra forma el código objeto en un formato legible.

Precauciones de manipulación

La radio portátil digital de la serie MOTOTRBO cumple las especificaciones IP67, lo que le permite soportar condiciones adversas como estar sumergidos en agua. En esta sección se describen algunas precauciones de manipulación básicas.

PRECAUCIÓN:
No desmonte la radio. Esto podría dañar las juntas de la radio y provocar filtraciones. El mantenimiento de la radio deberá realizarse únicamente en un servicio técnico equipado para probar y cambiar las juntas de la radio.

- Si la radio se ha sumergido en agua, agítela bien para eliminar el agua que pudiera haber quedado dentro de la rejilla del altavoz y del puerto del micrófono. Si quedara agua dentro podría afectar a la calidad del sonido.
- Si el área de contacto de la batería de la radio ha estado expuesta al agua, limpie y seque los contactos de la batería tanto en la radio, como en la batería, antes de volver a colocarla. El agua residual podría provocar un cortocircuito en la radio.
- Si la radio ha estado sumergida en una sustancia corrosiva (por ejemplo, agua salada), enjuague la radio y la batería con agua dulce y seque ambos componentes.
- Para limpiar las superficies exteriores de la radio, utilice una solución diluida de detergente suave de lavavajillas y agua dulce (por ejemplo, una cucharadita de detergente por cada 4 litros de agua).
- No bloquee nunca el conducto de ventilación (orificio) situado en el chasis de la radio, por debajo del contacto de la batería. Este conducto permite igualar la presión de la radio. Si lo hiciera, podrían producirse filtraciones dentro de la radio y el dispositivo perdería sus propiedades de ser sumergible.
- No obstruya ni cubra nunca el conducto de ventilación, ni siquiera con una etiqueta.
- Asegúrese de que ninguna sustancia aceitosa entre en contacto con el conducto de ventilación.
- La radio con antena conectada correctamente se ha diseñado para sumergirse a una profundidad máxima de 1 metro (3,28 pies), durante un máximo de 30 minutos. Rebasar cualquiera de estos límites o el uso de la radio sin antena, podría provocar daños en la radio.

- Al limpiar la radio, no utilice un pulverizador de chorro de alta presión, ya que excedería la presión de 1 metro de profundidad y podría provocar la filtración de agua en la radio.

Introducción

Esta guía del usuario describe el funcionamiento de las radios.

Es posible que el distribuidor o el administrador del sistema hayan personalizado la radio para satisfacer sus necesidades específicas. Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información.

Puede consultar con su distribuidor o administrador del sistema lo siguiente:

- ¿Se ha programado la radio con canales convencionales predeterminados?
- ¿Qué botones se han programado para acceder a otras funciones?
- ¿Qué accesorios opcionales pueden satisfacer sus necesidades?
- ¿Cuáles son las prácticas recomendadas de uso de las radios para una comunicación eficaz?
- ¿Qué procedimientos de mantenimiento contribuirán a incrementar la vida útil de la radio?

1.1

Información sobre los iconos

A lo largo de este documento, los iconos que se describen se utilizan para indicar las funciones admitidas con el modo analógico convencional o con el modo digital convencional.

Indica una función disponible **solo en modo analógico** convencional.

Indica una función disponible **solo en modo digital** convencional.

No se muestran iconos para las funciones que están disponibles en **ambos** modos convencionales (analógico y digital).

1.2

Modos analógico y digital convencionales

Cada canal de la radio se puede configurar como un canal analógico convencional o un canal digital convencional.

Algunas de las funciones no estarán disponibles al cambiar de modo digital a analógico. Los iconos de las funciones digitales reflejan este cambio mostrándose "atenuados". Las funciones deshabilitadas aparecen ocultas en el menú.

La radio también tiene funciones disponibles para los modos analógico y digital. Las pequeñas diferencias en la forma en que funciona cada función **no** afectan al funcionamiento de la radio.

NOTA:
La radio también cambia entre los modos analógico y digital durante un rastreo de modo doble. Consulte Rastreo en la página 394 para obtener más información.

1.3

IP Site Connect

Esta función permite que la radio amplíe la comunicación convencional más allá del alcance de un solo sitio mediante la conexión a diferentes sitios disponibles a través de una red IP (Protocolo de Internet). Se trata de un modo multisitio convencional.

Si la radio está fuera de alcance con respecto a un sitio y entra en el alcance de otro, la radio se conectará al repetidor del nuevo sitio para enviar o recibir transmisiones de datos o llamadas. Esto se puede realizar manual o automáticamente en función de los ajustes definidos.

Durante una búsqueda de sitios automática, la radio rastrea todos los sitios disponibles cuando la señal del sitio actual es débil o cuando la radio no puede detectar ninguna señal procedente del sitio actual. A continuación, la radio se ajusta al repetidor con el indicador de intensidad de la señal recibida (RSSI) más elevado.

Durante una búsqueda de sitios manual, la radio busca el siguiente sitio de la lista de navegación que tenga cobertura en ese momento (aunque tal vez no sea la señal más intensa) y se acopla al repetidor.

NOTA:
Cada canal solo puede tener activado el rastreo o el desplazamiento, pero no ambas opciones al mismo tiempo.

Los canales que tengan esta función activada pueden añadirse a una lista de navegación particular. La radio busca los canales en la lista de navegación durante la operación de navegación automática para localizar el mejor sitio. Una lista de navegación soporta un máximo de 16 canales, incluido el canal seleccionado.

NOTA:
No puede añadir ni eliminar manualmente una entrada de la lista de navegación. Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información.

1.4
Capacity Plus

Capacity Plus es un sistema troncal de nivel de entrada de un solo sitio y varios sitios. La troncalización dinámica de un solo sitio y de varios sitios ofrece mejor capacidad y cobertura.

1.4.1
Capacity Plus – Sitio único

Capacity Plus-Sitio único es una configuración troncal de un solo sitio del sistema de radio MOTOTRBO, que utiliza un conjunto de canales para que soporte cientos de usuarios y hasta 254 grupos. Esta función permite que la radio utilice de forma eficaz el número disponible de canales programados mientras se encuentra en el Modo Repetidor.

Oirá un tono indicador negativo si intenta acceder a una función que no esté disponible en Capacity Plus - Single Site al pulsar un botón programable.

La radio también tiene funciones que están disponibles en el modo digital convencional, IP Site Connect y Capacity Plus. Sin embargo, las pequeñas diferencias en la forma de funcionar de cada función no afectan al funcionamiento de la radio.

Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información sobre esta configuración.

1.4.2
Capacity Plus - Varios sitios

Capacity Plus-Varios sitios es una configuración troncal de varios canales del sistema de radio MOTOTRBO que combina lo mejor de las configuraciones Capacity Plus e IP Site Connect.

Capacity Plus-Varios sitios permite que su radio amplíe la comunicación troncal más allá del alcance de un solo sitio mediante la conexión a diferentes sitios disponibles conectados a través de una red IP. También proporciona una capacidad superior gracias al uso eficiente del número

disponible de canales programados combinados que soporta cada uno de los sitios disponibles.

Si la radio está fuera de rango con respecto a un sitio y entra en el alcance de otro, se conectará al repetidor del nuevo sitio para enviar o recibir transmisiones de datos o llamadas. Según la configuración, esto se realiza de forma automática o manual.

Si la radio se ha configurado para hacerlo de forma automática, rastrea todos los sitios disponibles cuando la señal del sitio actual sea débil o cuando la radio no pueda detectar ninguna señal del sitio actual. A continuación se ajusta al repetidor con el valor de RSSI más elevado.

En una búsqueda manual de sitio, la radio busca el siguiente sitio de la lista de navegación que tenga cobertura en ese momento (aunque tal vez no sea la señal más intensa) y se acopla a él.

Cualquier canal con Capacity Plus-Varios sitios activado puede añadirse a una lista de navegación particular. La radio busca esos canales durante la operación de navegación automática para localizar los mejores sitios.

NOTA:
No puede añadir ni eliminar manualmente una entrada de la lista de navegación. Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información.

De forma similar a Capacity Plus-Varios sitios, los iconos de las funciones que no son aplicables a Capacity Plus-Varios sitios no están disponibles en el menú. Oirá un tono indicador negativo si accede a una función que no esté disponible en Capacity Plus-Varios sitios al pulsar un botón programable.

Funcionamiento básico

En este capítulo se explican las operaciones para comenzar a utilizar la radio.

2.1

Carga de la batería

La radio recibe energía de una batería de níquel metal hidruro (NiMH) o de iones de litio.

- Para cumplir con los términos de la garantía y evitar daños, cargue la batería utilizando un cargador Motorola Solutions exactamente tal como se describe en la guía del usuario del cargador.

  Todos los cargadores pueden cargar únicamente baterías Motorola Solutions autorizadas. Es posible que no se puedan cargar otras baterías. Motorola Solutions recomienda que la radio permanezca apagada durante la carga.

- Cargue la batería IMPRES™ con un cargador IMPRES para optimizar la vida útil de la batería y los valiosos datos de la batería. Las baterías IMPRES que se cargan exclusivamente con cargadores IMPRES reciben una ampliación de la garantía de seis meses sobre la duración de la garantía estándar de la batería de primera calidad de Motorola Solutions.

- Cargue una batería nueva 14 o 16 horas antes del primer uso para conseguir un mejor rendimiento.

2.2

Colocación de la batería

Siga el procedimiento para colocar la batería en la radio.

Esta función de alerta de falta de coincidencia solo se aplica a las baterías IMPRES y las baterías no IMPRESS con un número de kit programado en la memoria de solo lectura programable y borrable (EPROM).

Si la radio está conectada con la batería incorrecta, se emitirá un tono grave de aviso, los LED parpadearán en rojo, se mostrará un mensaje de `Batería incorrecta`, y el Indicador de voz/Reconocimiento de voz emitirá un tono de aviso si el Indicador de voz/Reconocimiento de texto se carga a través de CPS.

El certificado de la radio quedará anulado si conecta una batería UL a una radio aprobada por FM o viceversa. La radio puede preprogramarse a través de CPS para alertarle si la batería no coincide. Consulte con el

distribuidor o administrador del sistema cómo se ha programado la radio.

1 Alinee la batería con las guías de la parte posterior de la radio.

2 Presione firmemente la batería y deslícela hacia arriba hasta que el cierre se coloque en su lugar.

3 Coloque el pestillo de la batería en la posición de cierre.

4 Para extraer la batería, apague la radio. Desplace el cierre de la batería con la marca **A** hasta la posición de apertura, deslice la batería hacia abajo y sáquela de las guías.

2.3

Colocación de la antena

Siga el procedimiento para acoplar la antena a la radio.

Asegúrese de que la radio está desconectada.

Coloque la antena en el receptáculo y gírela en el sentido de las agujas del reloj.

NOTA:
Para quitar la antena, gírela en el sentido contrario a las agujas del reloj.

PRECAUCIÓN:
Si es necesario cambiar la antena, asegúrese de que se utilizan únicamente antenas MOTOTRBO. Si no lo hace así, la radio resultará dañada.

2.4

Colocación de la funda de transporte

Siga el procedimiento para acoplar la funda de transporte a la radio.

1 Alinee las ranuras de la funda de transporte con las ranuras de la batería.

2 Presione hacia abajo hasta que oiga un clic.

2.5

Instalación de la cubierta del conector universal (cubierta antipolvo)

El conector universal está situado en el lateral de la antena de la radio. Se utiliza para conectar los accesorios MOTOTRBO a la radio. Siga el procedimiento para acoplar la cubierta antipolvo a la radio.

Vuelva a colocar la cubierta antipolvo cuando no se esté utilizando el conector universal.

1 Inserte el extremo en ángulo de la cubierta en las ranuras que hay por encima del conector universal.

2 Empuje la cubierta hacia abajo para fijar correctamente la cubierta antipolvo al conector universal.

3 Fije la cubierta del conector a la radio girando el tornillo en el sentido de las agujas del reloj.

2.6

Limpieza de la cubierta del conector universal (cubierta antipolvo)

Si la radio ha estado expuesta al agua, seque el conector universal antes de conectar un accesorio o sustituir la cubierta para el polvo. Si la radio ha estado expuesta a

agua salada o a contaminantes, realice el siguiente procedimiento para limpiarla.

1. Mezcle una cucharada de detergente suave para lavavajillas con cuatro litros de agua para obtener una solución al 0,5 %.
2. Limpie solo las superficies externas de la radio con la solución. Aplique la solución con moderación utilizando un cepillo rígido, no metálico de cerdas cortas.
3. Seque la radio por completo con un paño suave que no suelte pelusa. Asegúrese de que la superficie de contacto del conector universal está limpia y seca.
4. Aplique un bolígrafo lubricante o un limpiador DeoxIT GOLD (proveedor: CAIG Labs, número de referencia G100P) sobre la superficie de contacto del conector universal.
5. Conecte un accesorio al conector universal para comprobar la conectividad.

NOTA:
No sumerja la radio en agua. Asegúrese de que no quede detergente entre el conector universal, los controles o las hendiduras.

Limpie la radio una vez al mes por motivos de mantenimiento. Se recomienda que limpie la radio con más frecuencia si se encuentra en entornos exigentes, como una planta petroquímica o en un medio marino con una alta concentración de sal.

2.7 Extracción de la cubierta del conector universal (cubierta antipolvo)

Siga el procedimiento para extraer la cubierta antipolvo de la radio.

1. Presione el pestillo hacia abajo.
2. Levante la cubierta y deslice hacia abajo la cubierta antipolvo para extraerla del conector universal.

Vuelva a colocar la cubierta antipolvo cuando no se esté utilizando el conector universal.

2.8

Encendido de la radio

Siga el procedimiento para encender la radio.

Gire la **perilla de control de volumen/encendido/apagado** hacia la derecha hasta que oiga un clic.

Si es correcta:

- Suena un tono.
- El indicador LED verde se ilumina.
- La pantalla muestra `MOTOTRBO (TM)`, seguido de una imagen o un mensaje de bienvenida.
- La pantalla de inicio se ilumina.

Si la función Tonos/alertas está desactivada, no se oirá ningún tono al encenderse.

NOTA:
Durante el encendido inicial tras una actualización de la versión del software a **R02.07.00.0000** o posterior, se llevará a cabo una actualización del firmware de GNSS que durará 20 segundos. Tras la actualización, la radio se restablece y se vuelve a encender. La actualización de firmware solo se aplica a los modelos portátiles que cuentan con la última versión de software y hardware.

Compruebe la batería si la radio no se enciende. Asegúrese de que está cargada y conectada correctamente. Póngase en contacto con su distribuidor si la radio sigue sin encenderse.

2.9

Apagado de la radio

Siga el procedimiento para apagar la radio.

Gire el **botón de volumen/encendido/apagado** en el sentido contrario al de las agujas del reloj hasta que oiga un clic.

La pantalla mostrará el mensaje `Apagando`.

2.10

Ajuste del volumen

Siga el procedimiento para cambiar el nivel de volumen de la radio.

Lleve a cabo una de las siguientes acciones:

- Gire el **botón de volumen/encendido/apagado** en el sentido de las agujas del reloj para subir el volumen.
- Gire el **botón de volumen/encendido/apagado** en el sentido contrario a las agujas del reloj para bajar el volumen.

NOTA:
La radio se puede programar para que presente una diferencia de volumen mínima cuando no se pueda bajar el nivel de volumen más allá del volumen mínimo programado. Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información.

Esta página se ha dejado en blanco intencionadamente.

Controles de la radio

En este capítulo se explican los botones y las funciones para controlar la radio.

1 Selector de canales

2 Mando de control de encendido/apagado/volumen

3 Indicador LED

4 Botón lateral 1[1]

5 Botón PTT (pulsar para hablar)

6 Botón lateral 2[1]

7 Botón lateral 3[1]

8 Botón del panel frontal P1[1]

9 Botón de Menú/OK

10 Botón de navegación de 4 direcciones

11 Botón para volver e ir al inicio

12 Botón del panel frontal P2[1]

13 Pantalla

14 Micrófono

15 Altavoz

16 Conector universal para accesorios

17 Botón de emergencia[1]

18 Antena

[1] Estos botones son programables.

3.1

Uso del botón de navegación tetradireccional

Puede usar el disco de navegación en 4 direcciones, , para desplazarse por las opciones, aumentar o disminuir los valores y desplazarse verticalmente.

Categoría	Dirección	
	▲ o ▼	◀ o ▶
Menú	Navegación vertical	-
Listas	Navegación vertical	-
Ver detalles	Navegación vertical	Elemento anterior/ siguiente

Puede utilizar el botón de navegación tetradireccional, , como un número, alias o editor de texto personalizable.

Categoría de editor	Dirección	
	▲ o ▼	◀ o ▶
Número	-	Izquierda: elimina el último dígito Derecha: -
Alias	-	-
Texto personalizable	Mover el cursor arriba/abajo	Mover el cursor un carácter a la izquierda/ derecha
Valores numéricos	Aumentar/ disminuir	Mover el cursor un carácter a la izquierda/ derecha

WAVE

El entorno de voz de área ancha (WAVE™) proporciona un nuevo método de realización de llamadas entre dos radios.

Esta característica también es compatible con las llamadas entre radios y otros dispositivos con capacidades WAVE. Sin embargo, un canal WAVE debe estar configurado para utilizar esta función.

Cuando se encuentra en un canal WAVE, la radio no puede recibir llamadas de otros sistemas y solo puede recibir llamadas WAVE.

Si la radio se encuentra en un canal WAVE, la radio activa la conexión Wi-Fi automáticamente e inicia sesión en el servidor WAVE. Las llamadas WAVE se realizan cuando la radio está conectada a una red IP a través de Wi-Fi.

NOTA:
Esta función es aplicable únicamente a DP4601e.

Tabla 1: Iconos de pantalla de WAVE

Los siguientes iconos aparecen momentáneamente en la pantalla cuando WAVE está activada.

	WAVE conectada WAVE está conectada.
	WAVE desconectada WAVE está desconectada.

4.1

Configuración del Canal WAVE activo

Los canales WAVE se configuran mediante CPS. Siga el procedimiento para seleccionar el canal WAVE que desee.

1. Pulse OK para acceder al menú.
2. Pulse ▲ o ▼ para ir a `Canales de WAVE`. Pulse OK para seleccionar.
3. Pulse ▲ o ▼ para seleccionar el canal WAVE que desee. Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a `Establecer como activo`. Pulse OK para seleccionar.

La pantalla muestra ✓ junto al canal seleccionado.

4.2

Consulte la información del canal WAVE

Siga el procedimiento para consultar la información del canal WAVE.

1 Lleve a cabo una de las siguientes acciones:

- Pulse el botón programado **Lista de canales WAVE**. Omita los pasos siguientes.
- Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Canales de WAVE`. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para seleccionar el canal WAVE que desee. Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a `Ver detalles`. Pulse OK para seleccionar.

La pantalla muestra los detalles del canal WAVE.

4.3

Consulte la información de los puntos terminales WAVE

Siga el procedimiento para consultar la información de los puntos terminales WAVE.

1 Lleve a cabo una de las siguientes acciones:

- Pulse el botón programado **Contacto**. Saltar a paso 3.
- Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Puntos terminales`.

Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para seleccionar el punto terminal WAVE que desee. Pulse OK para seleccionar.

4 Pulse OK para seleccionar `Ver Detalles`.

La pantalla muestra los detalles del punto terminal WAVE.

4.4

Realización de llamadas de grupo

Siga el procedimiento para realizar llamadas grupales en un canal WAVE.

1 Seleccione el canal WAVE con el ID o alias de grupo requerido.

2 Pulse el botón **PTT** para realizar la llamada.

El indicador LED verde se ilumina. La primera línea de texto muestra el icono de **llamada grupal**. La segunda línea de texto muestra el alias de grupo WAVE.

3 Lleve a cabo una de las siguientes acciones:

- Espere hasta que acabe el tono de Permitir hablar (si está activado) y comience a hablar con claridad al micrófono.
- Espere a que finalice el efecto local de **PTT** (si está activado) y hable con claridad al micrófono.

4 Suelte el botón **PTT** para escuchar.

El indicador LED verde se ilumina cuando la radio de destino responde.La pantalla muestra el icono **Llamada grupal** y el alias o ID, y el alias o ID de la radio transmisora.

5 Si la función de indicación de canal libre está activada, oirá un breve tono de alerta en el momento en que la radio transmisora suelte el botón **PTT**, lo que señala que el canal está libre para que el usuario responda. Pulse el botón **PTT** para responder la llamada.

La llamada finalizará cuando no haya ninguna actividad de voz durante un periodo determinado. La

radio regresa a la pantalla en la que se encontraba antes de iniciar la llamada.

Operaciones de Capacity Max

Capacity Max es un canal de control basado en un sistema troncalizado de radio. Las funciones disponibles para los usuarios de radio en virtud de este sistema están disponibles en este capítulo.

5.1

Botón PTT (Pulsar para hablar)

El botón Pulsar para hablar **(PTT)** tiene dos funciones básicas:

- En el transcurso de una llamada, el botón **PTT** permite que la radio transmita a las demás radios de la llamada. El micrófono se activa cuando se pulsa el botón **PTT**.
- Cuando no hay ninguna llamada en curso, el botón **PTT** se utiliza para realizar una nueva llamada.

Para hablar, pulse de forma prolongada el botón **PTT**. Suelte el botón **PTT** para escuchar.

Si el tono Permiso para hablar está activado, espere a que finalice el tono de alerta breve antes de empezar a hablar.

5.2

Botones programables

En función de la duración de la pulsación de un botón, el distribuidor puede programar los botones programables como accesos directos a las funciones de la radio.

Pulsación corta
Pulsar y soltar el botón rápidamente.

Pulsación larga
Mantener pulsado el botón durante la duración programada.

NOTA:
Consulte Funcionamiento de emergencia en la página 418 para obtener más información sobre la duración programada del botón de **Emergencia**.

5.2.1

Funciones asignables de la radio

El distribuidor o administrador del sistema puede asignar las siguientes funciones de radio a los botones programables.

Perfiles de audio
Permite al usuario seleccionar el perfil de audio preferido.

Direccionamiento del audio
Alterna el direccionamiento del audio entre los altavoces interno y externo.

Conmutación de audio
Alterna el direccionamiento de audio entre el altavoz interno de la radio y el altavoz de un accesorio con cables.

Camb. audio Bluetooth®
Alterna el direccionamiento de audio entre el altavoz interno de la radio y el accesorio externo con tecnología Bluetooth.

Conexión de Bluetooth
Inicia una operación de detección y conexión de Bluetooth.

Desconexión de Bluetooth
Finaliza todas las conexiones Bluetooth en curso entre dispositivos habilitados para Bluetooth y la radio.

Bluetooth visible
Permite que la radio entre en el modo de Bluetooth visible.

Contactos
Proporciona acceso directo a la lista de contactos.

Alerta de llamada
Permite acceder directamente a la lista de contactos para que pueda seleccionar un contacto al que enviarle una alerta de llamada.

Registro de llamadas
Selecciona la lista del registro de llamadas.

Emergencia
Dependiendo de la programación, inicia o cancela una llamada o una alarma de emergencia.

Ubicación en interiores
Activa o desactiva la ubicación en interiores.

Audio inteligente
Permite activar o desactivar el Audio inteligente.

Marcación manual
Inicia una llamada privada al teclear cualquier ID de suscriptor.

Roam manual del sitio
Inicia la búsqueda de sitio manual.

Mic AGC
Activa o desactiva el control automático de ganancia (AGC) del micrófono interno.

Notificaciones
Proporciona acceso directo a la lista de notificaciones.

Acceso de marcación rápida
Inicia directamente una difusión, llamada privada, telefónica o a grupo, una alerta de llamada o un mensaje de texto rápido predefinidos.

Función de tarjeta opcional
Activa o desactiva las funciones de la tarjeta opcional para los canales compatibles con dicha tarjeta.

Teléfono
Proporciona acceso directo a la lista de contactos del teléfono.

Privacidad
Activa o desactiva la privacidad.

Alias e ID de radio
Proporciona el ID y alias de radio.

Monitorización remota
Enciende el micrófono de una radio de destino sin que proporcione ningún indicador.

Restablecer canal base
Configura un nuevo canal base.

Silenciar recordatorio de canal base
Silencia el recordatorio de canal de inicio.

Información del sitio
Muestra el nombre y el ID actual del sitio Capacity Max.

Reproduce los mensajes de voz de indicador del sitio actual si el indicador de voz está activado.

Bloqueo del sitio
Al habilitarlo, la radio solo buscará el emplazamiento actual. Si se deshabilita, la radio busca otros emplazamientos además del actual.

Estado
Selecciona el menú de lista de estado.

Control de telemetría
Controla el pin de salida en una radio local o remota.

Mensaje de texto
Selecciona el menú de mensajes de texto.

Mejora de la vibración del habla
Permite activar o desactivar esta función.

Activar/Desactivar indicador de voz
Activa o desactiva el indicador de voz.

Wi-Fi
Activa o desactiva el Wi-Fi.

Selección de zona
Permite seleccionar en una lista de zonas.

5.2.2

Funciones asignables de configuración o herramientas

Los siguientes ajustes o funciones de la radio se pueden asignar a los botones programables.

Tonos/alertas
Activa y desactiva todos los tonos y alertas.

Retroiluminación
Activa o desactiva la luz de fondo de la pantalla.

Brillo de luz de fondo
Ajusta el nivel de brillo.

Nivel de potencia
Alterna entre los niveles de potencia de transmisión alto y bajo.

5.2.3

Acceso a las funciones programadas

Siga el procedimiento para acceder a las funciones programadas de la radio.

1 Lleve a cabo una de las siguientes acciones:

- Pulse el botón programado. Continúe con el paso paso 3.
- Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a la función de menú y, a continuación, pulse OK para seleccionar una función o acceder a un submenú.

3 Lleve a cabo una de las siguientes acciones:

- Pulse para volver a la pantalla anterior.
- Pulse de forma prolongada para volver a la pantalla de inicio.

Tras un periodo de inactividad, la radio sale automáticamente del menú y vuelve a la pantalla de inicio.

5.3

Indicadores de estado

En este capítulo se explican los indicadores de audio y los tonos de audio que se utilizan en la radio.

5.3.1

Iconos

La pantalla de la radio muestra el estado, entradas de texto y entradas de menú. Los elementos siguientes son iconos que aparecen en la pantalla de la radio.

Tabla 2: Iconos de pantalla

Los siguientes iconos aparecen en la barra de estado ubicada en la parte superior de la pantalla de la radio. Los iconos se organizan de izquierda a derecha según orden de aparición o uso, y son específicos del canal.

	Batería El número de barras (0–4) indica la carga restante en la batería. El icono parpadea cuando el nivel de la batería es bajo.
	Bluetooth conectado La función Bluetooth está activada. El icono permanece iluminado cuando hay un dispositivo Bluetooth remoto conectado.
	Bluetooth no conectado La función Bluetooth está activada, pero no hay conectado ningún dispositivo Bluetooth remoto.
	Emergencia La radio está en modo Emergencia.
	GNSS disponible La función GNSS está activada. El icono permanece encendido cuando existe una posición definida disponible.
	GNSS no disponible La función GNSS está activada pero no recibe datos del satélite.

Tabla (continuación)…

Tabla (continuación)…

	Datos de gran volumen La radio está recibiendo datos de gran volumen y el canal está ocupado.
	Función de ubicación en interiores [2] El estado de ubicación en interiores está activado y disponible.
	Ubicación en interiores no disponible[2] El estado de ubicación en interiores está activado pero no está disponible debido a que el Bluetooth está desactivado o a que el Bluetooth ha suspendido el rastreo de las balizas.
	Modo Silenciar El modo Silenciar está activado y el altavoz está silenciado.
	Notificación Faltan uno o varios eventos en la lista de notificaciones.

Tabla (continuación)…

	Tarjeta opcional La tarjeta opcional está habilitada. (Solo en modelos habilitados para la tarjeta opcional)
	La tarjeta opcional no funciona La tarjeta opcional está deshabilitada.
5	**Temporizador de retardo de programación a través del interfaz aire** Indica el tiempo que queda hasta el reinicio automático de la radio.
L o H	**Nivel de potencia** La radio está configurada a potencia baja o la radio está configurada a potencia alta.
1	**Prioridad 1** Indica el grupo de conversación de prioridad 1.

Tabla (continuación)…

[2] Solo se aplica a los modelos que cuentan con la última versión de software y hardware.

	Prioridad 2 Indica el grupo de conversación de prioridad 2.
	Indicador de intensidad de la señal recibida (RSSI) El número de barras mostradas representa la intensidad de la señal de la radio. Cuatro barras indican la señal más intensa. Este icono solo se muestra durante la recepción.
	Inhibic. respuesta La inhibición de respuesta está activada.
	Solo timbre El modo de tono de llamada está habilitado.
	Seguro La función Privacidad está habilitada.

Tabla (continuación)…

	Tono de silencio El modo de tono de silencio está habilitado.
	Roaming entre sitios La función de roaming entre sitios está habilitada.
	Estado Indica un nuevo mensaje de estado.
	Desactivar tonos Los tonos están desactivados.
	Inseguro La función Privacidad está deshabilitada.
	Vibración El modo de vibración está habilitado.
	Vibración y tono El modo de vibración y tono está habilitado.

Tabla (continuación)…

	Wi-Fi: excelente[3] La señal de la red Wi-Fi es excelente.
	Wi-Fi: buena[3] La señal de la red Wi-Fi es buena.
	Wi-Fi: regular[3] La señal de la red Wi-Fi es regular
	Wi-Fi: deficiente[3] La señal de la red Wi-Fi es deficiente.
	Wi-Fi: no disponible[3] La señal de la red Wi-Fi no está disponible.

Tabla 3: Iconos del menú avanzado

Los siguientes iconos aparecen junto a los elementos de menú que ofrecen una elección entre dos opciones o como indicación de que hay un submenú que ofrece dos opciones.

	Casilla de verificación (marcada) Indica que la opción está seleccionada.
	Casilla de verificación (vacía) Indica que la opción no está seleccionada.
	Recuadro negro sólido Indica la opción seleccionada para el elemento de menú con un submenú.

Tabla 4: Iconos del dispositivo Bluetooth

Los siguientes iconos aparecen junto a los elementos en la lista de dispositivos habilitados para Bluetooth disponibles para indicar el tipo de dispositivo.

	Dispositivo de audio Bluetooth Dispositivo de audio habilitado para Bluetooth, por ejemplo, unos auriculares.

Tabla (continuación)…

[3] Solo se aplica a DP4601e

	Dispositivo de datos Bluetooth Dispositivo de datos habilitado para Bluetooth, por ejemplo, un escáner.
	Dispositivo PTT Bluetooth Dispositivo PTT habilitado para Bluetooth, por ejemplo, un dispositivo de PTT solo (POD).

Tabla 5: Iconos de llamada

Los siguientes iconos aparecen en la pantalla en el transcurso de una llamada. Estos iconos también aparecen en la lista de contactos para indicar el tipo de ID o de alias.

	Llamada de PC con Bluetooth Indica que hay una llamada de PC con Bluetooth en curso. En la lista de contactos, indica un alias (nombre) o ID (número) de llamada de PC con Bluetooth.
	Llamada de despacho El tipo de contacto Llamada de despacho se utiliza para enviar un mensaje de texto a un PC despachador a través de un servidor de mensajes de texto externo.
	Llamada a grupo/a todos Indica que hay una llamada a grupo o una llamada a todos en curso. En la lista de contactos, indica un alias (nombre) o ID (número) de grupo.
	Llamada individual de periférico no IP Indica que hay una llamada individual de periférico no IP en curso. En la lista de contactos, indica un alias (nombre) o ID (número) de suscriptor.
	Llamada a grupo de periférico no IP Indica que hay una llamada a grupo de periférico no IP en curso. En la lista de contactos, indica un alias (nombre) o ID (número) de grupo.

Tabla (continuación)…

Tabla (continuación)…

	Llamada individual de tarjeta opcional Indica que hay una llamada individual de tarjeta opcional en curso. En la lista de contactos, indica un alias (nombre) o ID (número) de suscriptor.
	Llamada a grupo de tarjeta opcional Indica que hay una llamada a grupo de tarjeta opcional en curso. En la lista de contactos, indica un alias (nombre) o ID (número) de grupo.
	Llamada telefónica como una llamada de grupo/llamada a todos Indica que hay una llamada telefónica como, por ejemplo, una llamada a grupo o una llamada a todos en curso. En la lista de contactos, indica un alias (nombre) o ID (número) de grupo.

Tabla (continuación)…

	Llamada telefónica como una llamada privada Indica que hay una llamada telefónica como una llamada privada en curso. En la lista de contactos, indica un alias (nombre) o ID (número) de teléfono.
	Llamada privada Indica que hay una llamada privada en curso. En la lista de contactos, indica un alias (nombre) o ID (número) de suscriptor.

Tabla 6: Iconos pequeños de aviso

Los siguientes iconos aparecen momentáneamente en la pantalla después de que se lleve a cabo una acción para realizar una tarea.

	Transmisión fallida (negativo) Error al realizar la acción.
	Transmisión correcta (positivo) La acción se ha realizado correctamente.

Tabla (continuación)…

	Transmisión en progreso (transición) Transmitiendo. Este icono se ve antes de la indicación de Transmisión correcta o Transmisión fallida.

Tabla 7: Iconos de elementos enviados

Los iconos que se indican a continuación aparecen en la esquina superior derecha de la pantalla en la carpeta Enviados.

o	**en curso** El mensaje de texto para un alias o ID de suscriptor está pendiente de transmisión y, a continuación, se espera confirmación. El mensaje de texto para un alias o ID de grupo está pendiente de transmisión.
o	**Mensaje individual o de grupo leído** El mensaje de texto se ha leído.

Tabla (continuación)…

o	**Mensaje individual o de grupo no leído** El mensaje de texto no se ha leído.
o	**Error de envío** No se ha podido enviar el mensaje de texto.
o	**Enviado correctamente** El mensaje de texto se ha enviado correctamente.

5.3.2

Indicador LED

El indicador LED muestra el estado de funcionamiento de la radio.

Rojo intermitente

La radio no ha superado la autocomprobación durante el encendido.

La radio está recibiendo una transmisión de emergencia.

La radio está transmitiendo con estado de batería baja.

La radio está fuera del rango de alcance, si se ha configurado un sistema de repetición de rango automático.

El modo Silenciar está activado.

Verde fijo

La radio se está encendiendo.

La radio está transmitiendo.

La radio está enviando una alerta de llamada o una transmisión de emergencia.

Verde intermitente

La radio está recibiendo una llamada o datos.

La radio está recuperando transmisiones de programación a través del interfaz aire.

La radio está detectando actividad a través del interfaz aire.

NOTA:
Esta actividad puede afectar o no al canal programado de la radio debido a la naturaleza del protocolo digital.

Verde intermitente doble

La radio está recibiendo una llamada o datos con la función de privacidad habilitada.

Amarillo fijo

La radio está en modo de Bluetooth visible.

Amarillo intermitente

La radio aún tiene que responder a una alerta de llamada.

Parpadeo doble en amarillo

La radio tiene la navegación automática activada.

La radio está buscando de forma activa un nuevo sitio.

La radio aún tiene que responder a una alerta de llamada a grupo.

La radio está bloqueada.

5.3.3
Tonos

A continuación se describen los tonos que suenan a través del altavoz de la radio.

☐

Tono agudo

Tono grave

5.3.3.1

Tonos de audio

Los tonos de audio le proporcionan indicaciones sonoras del estado de la radio o de la respuesta de la radio a los datos recibidos.

Tono continuo
Un sonido monótono. Suena continuadamente hasta que finaliza.

Tono periódico
Suena periódicamente dependiendo de la duración que haya establecido la radio. El tono empieza, se para y se repite.

Tono repetitivo
Suena un único tono que se repite hasta que lo apaga el usuario.

Tono momentáneo
Suena una vez por un periodo corto establecido por la radio.

5.3.3.2

Tonos de indicador

Los tonos de indicador proporcionan indicaciones audibles del estado después de realizar una acción para llevar a cabo una tarea.

Tono indicador positivo

Tono indicador negativo

5.4

Registro

Hay una serie de mensajes relacionados con el registro que puede recibir.

Registro

El registro se suele enviar al sistema durante el encendido, el cambio de grupo de conversación o el roaming entre sitios. Si una radio no puede efectuar el registro en un sitio, la radio intenta navegar a otro sitio automáticamente. La radio elimina temporalmente el sitio donde se intentó el registro de la lista de roaming.

La indicación significa que la radio está ocupada buscando un sitio al que navegar o que ha encontrado correctamente un sitio pero está esperando una respuesta de la radio a los mensajes de registro.

Cuando se muestra `Registro` en la radio, suena un tono y el indicador LED amarillo parpadea dos veces para indicar una búsqueda de sitio.

Si las indicaciones continúan, el usuario debe cambiar de ubicación o, si tiene permiso, navegar manualmente a otro sitio.

Fuera de alcance

Se considera que la radio se encuentra fuera de cobertura cuando esta no puede detectar una señal del sistema o del sitio actual. Esta indicación suele significar que la radio se encuentra fuera de cobertura geográfica de radiofrecuencia (RF) saliente.

Cuando se muestra `Fuera de cobert.` en la radio, se oye un tono repetitivo y el indicador LED rojo parpadea.

Póngase en contacto con su distribuidor o administrador del sistema si la radio sigue recibiendo indicaciones de fuera de cobertura en un área con buena cobertura de RF.

Error de afiliación de grupo de conversación

La radio intenta afiliarse al grupo de conversación especificado en los canales o Mando de posiciones unificado (UKP, del inglés Unified Knob Position) durante el registro.

Una radio que presenta un error de afiliación no puede realizar o recibir llamadas desde el grupo de conversación al que la radio está intentando afiliarse.

Si una radio no puede afiliarse a un grupo de conversación, se muestra `Alias UKP` en la pantalla de inicio con un fondo resaltado.

Póngase en contacto con su distribuidor o administrador del sistema si la radio recibe indicaciones de error de afiliación.

Registro deneg.

Se reciben indicadores de registro denegado cuando no se acepta el registro en el sistema.

La radio no indica al usuario el motivo específico por el que se ha denegado el registro. Normalmente, un registro se deniega cuando el operador del sistema ha desactivado el acceso de la radio al sistema.

Cuando se deniega el registro de una radio, se muestra `Registro denegado` en la radio y el indicador LED amarillo parpadea dos veces para indicar una búsqueda de sitio.

5.5

Selecciones de canales y zonas

En este capítulo se explican las operaciones para seleccionar una zona o un canal en la radio.

La radio se puede programar con un máximo de 250 zonas de Capacity Max, con un máximo de 160 canales por zona. Cada zona de Capacity Max contiene un máximo de 16 posiciones asignables.

5.5.1

Selección de zonas

Siga el procedimiento para seleccionar la zona que desee en la radio.

1 Lleve a cabo una de las siguientes acciones:
   - Pulse el botón **Selección de zona** programado. Continúe con el paso paso 3.
   - Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Zona`. Pulse OK para seleccionar.

   En la pantalla aparece ✓ y la zona actual.

3 Pulse ▲ o ▼ hasta llegar a la zona deseada.

   Pulse OK para seleccionar.

   La pantalla muestra `<Zona> seleccionada` momentáneamente y vuelve a la pantalla de la zona seleccionada.

5.5.2

Selección de un tipo de llamada

Utilice el mando selector de canales para seleccionar el tipo de llamada. Puede tratarse de una llamada de grupo, llamada de difusión, llamada a todos o llamada privada, en función de la programación de la radio. Si cambia el selector de canales a una posición diferente (que tenga un tipo de llamada asignada), la radio volverá a registrarse en el sistema Capacity Max. La radio se registrará con el ID de grupo de conversación que se haya programado para la nueva posición del selector de canales el nuevo tipo de llamada.

Dado que la radio no funciona cuando se selecciona un canal no programado, utilice el selector de canales para elegir en su lugar un canal programado.

Una vez se muestre la zona (si tiene varias zonas en la radio), gire el mando selector de canales programado para seleccionar el tipo de llamada.

5.5.3

Selección de un emplazamiento

Un emplazamiento ofrece cobertura para un área específica. En una red multisitio, la radio de Capacity Max buscará automáticamente un nuevo emplazamiento cuando el nivel de señal del emplazamiento en que esté registrada se reduzca hasta ser inaceptable.

El sistema Capacity Max es compatible con hasta 250 emplazamientos.

5.5.4

Solicitud de itinerancia

Una solicitud de itinerancia ordena a la radio buscar un emplazamiento diferente, aunque la señal que reciba del emplazamiento actual sea aceptable.

Si no se encuentran sitios disponibles:

- La pantalla de la radio indica `Buscando` y continúa buscando por la lista de sitios.
- La radio vuelve al sitio anterior si este sigue estando disponible.

NOTA:
es algo que programa el distribuidor.

Pulse el botón **Roam manual del sitio** programado.

Escuchará un tono que indica que la radio ha cambiado a un nuevo emplazamiento. En la pantalla aparecerá `ID del sitio <Número de sitio>`.

5.5.5

Activar/desactivar bloqueo de sitio

Al habilitarlo, la radio solo buscará el emplazamiento actual. Si se deshabilita, la radio busca otros emplazamientos además del actual.

Pulse el botón programado **Bloq. sitio**.

Si la función de **bloqueo de sitio** está activada:

- Se escuchará un tono indicador afirmativo, el cual señala que la radio se ha bloqueado en sitio actual.
- En la pantalla aparecerá `Site Locked` (Sitio bloq.).

Si la función de **bloqueo de sitio** está desactivada:

- Se oirá un tono indicador negativo, que señala que la radio está desbloqueada.
- En la pantalla aparecerá `Site Unlocked` (Sitio desbloq.).

5.5.6

Restricción de sitios

En el sistema Capacity Max, el administrador de la radio tiene la capacidad de decidir los sitios de red que puede utilizar o no la radio.

Para cambiar la lista de sitios permitidos o restringidos, no es necesario reprogramar la radio. Si la radio intenta registrarse en un sitio restringido, esta recibe indicación de que se ha denegado el sitio. A continuación, la radio buscará otro emplazamiento de red.

Cuando se presentan restricciones de sitio, la radio muestra `Registro denegado` y el indicador LED amarillo parpadea dos veces para indicar una búsqueda de sitio.

5.5.7

Troncal de sitio

Un sitio debe poder comunicarse con el controlador de funcionamiento troncal para que se considere como troncal del sistema.

Si el sitio no puede comunicarse con el controlador de funcionamiento troncal del sistema, la radio entra en el modo de funcionamiento troncal en sitio. Mientras se encuentra en el modo de funcionamiento troncal en sitio, la radio emite una indicación sonora y visual periódica al usuario para informarle de sus funciones limitadas.

Cuando la radio se encuentra en el modo de funcionamiento troncal en sitio, muestra `Troncal de sitio` y se oye un tono repetitivo.

Las radios que se encuentran en el modo de funcionamiento troncal en sitio podrán seguir realizando llamadas de voz individuales y de grupo, así como enviar mensajes de texto al resto de radios ubicadas en el mismo sitio. Las consolas de voz, los grabadores de registro, las puertas de enlace telefónicas y las aplicaciones de datos no se pueden comunicar con las radios en el sitio.

Una vez que se encuentre en el modo de funcionamiento troncal en sitio, una radio que participe en llamadas a varios sitios solo se podrá comunicar con otras radios ubicadas en el mismo sitio. La comunicación hacia y desde otros sitios se perdería.

NOTA:
Si existen varios sitios que cubren la ubicación actual de la radio y uno de ellos entra en el modo de funcionamiento troncal en sitio, las radios navegan a otro sitio si se encuentra en el área de cobertura.

5.6

Llamadas

En este capítulo se explican las operaciones para recibir, responder, realizar y finalizar llamadas.

Puede seleccionar un ID o alias de suscriptor, o un ID o alias de grupo después de haber seleccionado un canal mediante una de estas funciones:

Búsqueda de alias
Este método se utiliza solo para llamadas de grupo, llamadas privadas y llamadas a todos con un micrófono con teclado.

Lista de contactos
Este método proporciona acceso directo a la lista de contactos.

Marcación manual (a través de Contactos)
Este método se utiliza solo para llamadas telefónicas y llamadas privadas con un micrófono con teclado.

Teclas numéricas programadas
Este método se utiliza solo para llamadas de grupo, llamadas privadas y llamadas a todos con un micrófono con teclado.

NOTA:
Solo puede tener un ID o alias asignado a una tecla numérica, pero puede tener más de una tecla numérica asociada a un ID o alias. Se pueden asignar todas las teclas numéricas de un micrófono con teclado. Consulte Asignación de entradas a teclas numéricas programadas en la página 399 para obtener más información.

Botón de acceso de marcación rápida programado
Este método se utiliza solo para , llamadas de grupo, llamadas privadas y llamadas telefónicas.

Solo puede asignar un ID a un botón de **acceso de marcación rápida** mediante una pulsación larga o breve de un botón programable. La radio puede tener varios botones de **acceso de marcación rápida** programados.

Botón programable
Este método solo se utiliza para llamadas telefónicas.

5.6.1

Llamadas de grupo

La radio debe estar configurada como parte de un grupo para recibir una llamada del grupo de usuarios o realizar una llamada al mismo.

5.6.1.1

Realización de llamadas de grupo

Siga el procedimiento para realizar llamadas de grupo con la radio.

1 Lleve a cabo una de las siguientes acciones:

- Seleccione un canal con el ID o alias de grupo activo. Consulte Selección de un tipo de llamada en la página 76.
- Pulse el botón de **acceso de marcación rápida** programado.

2 Pulse el botón **PTT** para realizar la llamada.

El indicador LED verde se ilumina. La primera línea de texto muestra el icono de **llamada grupal**.

3 Lleve a cabo una de las siguientes acciones:

- Espere hasta que acabe el tono de Permitir hablar (si está activado) y comience a hablar con claridad al micrófono.
- Espere a que finalice el efecto local de **PTT** (si está activado) y hable con claridad al micrófono.

4 Suelte el botón **PTT** para escuchar.

El indicador LED verde se ilumina cuando la radio de destino responde. La pantalla muestra el icono **Llamada grupal** y el alias o ID, y el alias o ID de la radio transmisora.

5 Si la función de indicación de canal libre está activada, oirá un breve tono de alerta en el momento en que la radio transmisora suelte el botón **PTT**, lo que señala que el canal está libre para que el usuario responda. Pulse el botón **PTT** para responder la llamada.

La llamada finalizará cuando no haya ninguna actividad de voz durante un periodo determinado. La persona que ha iniciado la llamada puede pulsar para finalizar una llamada de grupo.

5.6.1.2

Realización de llamadas de grupo mediante la lista de contactos

Siga el procedimiento para realizar llamadas de grupo con la radio mediante la lista de contactos.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Contactos`. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir al ID o alias que desee.

Pulse OK para seleccionar.

4 Pulse el botón **PTT** para realizar la llamada.

El indicador LED verde se ilumina.
La primera línea muestra el alias o ID de suscriptor.
La segunda línea muestra `Llamd. grupo` y el icono **Llamd. grupo**.

5 Lleve a cabo una de las siguientes acciones:

- Espere hasta que acabe el tono de Permitir hablar (si está activado) y comience a hablar con claridad al micrófono.
- Espere a que finalice el efecto local de **PTT** (si está activado) y hable con claridad al micrófono.

6 Suelte el botón **PTT** para escuchar.

El indicador LED verde se ilumina cuando la radio de destino responde. La pantalla muestra el icono **Llamada grupal** y el alias o ID, y el alias o ID de la radio transmisora.

7 Si la función de indicación de canal libre está activada, oirá un breve tono de alerta en el momento en que la radio transmisora suelte el botón **PTT**, lo que señala que el canal está libre para que el usuario responda. Pulse el botón **PTT** para responder la llamada.

La llamada finalizará cuando no haya ninguna actividad de voz durante un periodo determinado. La persona que ha iniciado la llamada puede pulsar

para finalizar la llamada de grupo.

Se oye un tono breve. La pantalla muestra `Llamada finalizada`.

5.6.1.3

Respuesta a llamadas de grupo

Siga el procedimiento para responder a llamadas de grupo con la radio.

Al recibir una llamada de grupo:

- El indicador LED verde parpadea.
- La pantalla muestra el icono de **llamada grupal** en la esquina superior derecha.
- La primera línea de texto muestra el alias de la llamada entrante.
- La segunda línea de texto muestra el alias de la llamada de grupo.
- La radio desactiva el silencio y las llamadas entrantes suenan a través del altavoz.

1 Lleve a cabo una de las siguientes acciones:

- Si la función de indicación de canal libre está activada, oirá un breve tono de alerta en el momento en que la radio transmisora suelte el botón **PTT**, lo que señala que el canal está libre para que el usuario responda. Pulse el botón **PTT** para responder la llamada.
- Si la función de Interrupción de voz está activada, pulse el botón **PTT** para interrumpir el audio de la radio transmisora y liberar el canal para responder.

El indicador LED verde se ilumina.

2 Lleve a cabo una de las siguientes acciones:

- Espere hasta que acabe el tono de Permitir hablar (si está activado) y comience a hablar con claridad al micrófono.
- Espere a que finalice el efecto local de **PTT** (si está activado) y hable con claridad al micrófono.

3 Suelte el botón **PTT** para escuchar.

La llamada finalizará cuando no haya ninguna actividad de voz durante un periodo determinado.

5.6.2

Llamada de difusión

Una llamada de difusión es una llamada de voz de cualquier usuario a todo un grupo de conversación.

La función de llamada de difusión permite transmitir información al grupo de conversación solo al usuario que

inicia la llamada, mientras que los destinatarios de la llamada no pueden responder.

La persona que inicia la difusión también puede finalizar la llamada de difusión. Para recibir una llamada de un grupo de usuarios, o para llamar a un grupo de usuarios, la radio debe estar configurada como parte de un grupo.

5.6.2.1

Realización de llamadas de difusión

Siga el procedimiento para realizar llamadas de difusión con la radio.

1 Lleve a cabo una de las siguientes acciones:
   - Seleccione un canal con el ID o alias de grupo activo. Consulte Selección de un tipo de llamada en la página 76.
   - Pulse el botón de **acceso de marcación rápida** programado.

2 Pulse el botón **PTT** para realizar la llamada.

   El indicador LED verde se ilumina.La pantalla muestra el icono **Llamada grupal** y el alias.

3 Lleve a cabo una de las siguientes acciones:
   - Espere hasta que acabe el tono de Permitir hablar (si está activado) y comience a hablar con claridad al micrófono.
   - Espere a que finalice el efecto local de **PTT** (si está activado) y hable con claridad al micrófono.

   La persona que ha iniciado la llamada puede pulsar para finalizar la llamada de difusión.

5.6.2.2

Realización de llamadas de grupo mediante la lista de contactos

Siga el procedimiento para realizar llamadas de difusión con la radio mediante la lista de contactos.

1 Pulse para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Contactos`.Pulse para seleccionar.

3 Pulse ▲ o ▼ para ir al ID o alias que desee.Pulse OK para seleccionar.

4 Pulse el botón **PTT** para realizar la llamada.

El indicador LED verde parpadea.
La primera línea muestra el alias o ID de suscriptor.
La segunda línea muestra `Llamd. grupo` y el icono **Llamd. grupo**.

5 Lleve a cabo una de las siguientes acciones:

- Espere hasta que acabe el tono de Permitir hablar (si está activado) y comience a hablar con claridad al micrófono.
- Espere a que finalice el efecto local de **PTT** (si está activado) y hable con claridad al micrófono.

La persona que ha iniciado la llamada puede pulsar ⮌ para finalizar la llamada de difusión.

5.6.2.3

Recepción de llamadas de difusión

Siga el procedimiento para recibir una llamada de difusión en la radio.

Al recibir una llamada de difusión:

- El indicador LED verde parpadea.
- La pantalla muestra el icono de **llamada grupal** en la esquina superior derecha.
- La primera línea de texto muestra el alias de la llamada entrante.
- La segunda línea de texto muestra el alias de la llamada de grupo.
- La radio desactiva el silencio y las llamadas entrantes suenan a través del altavoz.

NOTA:
No se permite a los usuarios receptores contestar durante una llamada de difusión. La pantalla muestra `Contestación prohibida`. El tono de contestación prohibida sonará momentáneamente si se pulsa el botón **PTT** durante una llamada de difusión.

5.6.3

Llamada privada

Una llamada privada es una llamada de una radio individual a otra radio individual.

Existen dos formas de realizar una llamada privada.

- El primer tipo de llamada se denomina establecimiento de llamadas fuera del aire (OACSU, del inglés Off Air Call Set-Up). OACSU establece la llamada después de realizar una verificación de presencia de radio y finaliza la llamada automáticamente.
- El segundo tipo se denomina establecimiento de llamadas totalmente fuera del aire (FOACSU, del inglés Full Off Air Call Set-Up). FOACSU también establece la llamada después de realizar una verificación de presencia de radio. Sin embargo, las llamadas con FOACSU requieren la confirmación del usuario para finalizar la llamada y permiten al usuario aceptar o rechazar la llamada.

El administrador del sistema es quien configura el tipo de llamada.

Si la radio de destino no está disponible antes de configurar la llamada privada, ocurre lo siguiente:

- Suena un tono.
- La pantalla muestra un aviso pequeño negativo.
- La radio vuelve al menú anterior en el que estaba antes de empezar la verificación de presencia de radio.

NOTA:
Tanto la persona que ha iniciado la llamada como el receptor pueden finalizar una llamada privada en curso pulsando .

5.6.3.1

Realizar llamadas privadas

La radio debe programarse para poder iniciar una llamada privada. Si esta función no está activada, escuchará un tono indicador negativo cuando inicie la llamada. Siga el procedimiento para realizar llamadas privadas con la

radio.Si la radio de destino no está disponible, sonará un tono corto y la pantalla mostrará `Unidad no disponible`.

1 Lleve a cabo una de las siguientes acciones:
   - Seleccione un canal con el ID o alias de suscriptor activo. Consulte Selección de un tipo de llamada en la página 76.
   - Pulse el botón de **acceso de marcación rápida** programado.

2 Pulse el botón **PTT** para realizar la llamada.

   El indicador LED verde se ilumina.La pantalla muestra el icono de **llamada privada**, el alias de suscriptor y el estado de llamada.

3 Espere hasta que acabe el tono de Permitir hablar (si está activado) y comience a hablar con claridad al micrófono.

4 Suelte el botón **PTT** para escuchar.

   El indicador LED verde se ilumina cuando la radio de destino responde.

5 La llamada finalizará cuando no haya ninguna actividad de voz durante un periodo determinado.Se oirá un tono breve. La pantalla muestra `Llamada finalizada`.

   Tanto la persona que ha iniciado la llamada como el receptor pueden finalizar una llamada privada en curso pulsando .

5.6.3.2 Realización de llamadas privadas con el botón de Llamada por marcación rápida

La función Llamada por marcación rápida permite realizar fácilmente una llamada privada a un ID o alias de llamada privada predefinido. Esta función se puede asignar a la pulsación breve o prolongada de un botón programable.

Solo puede tener un alias o ID asignado a un botón de Llamada instantánea. La radio puede tener varios botones programados de Llamada por marcación rápida.

1 Pulse el botón programado de **Llamada instantánea** para efectuar una llamada privada al ID o alias de llamada privada predefinido.

2 Pulse el botón **PTT** para realizar la llamada.

El indicador LED se ilumina en color verde fijo.

La pantalla mostrará el ID o alias de llamada privada.

3 Espere hasta que acabe el tono Permitir hablar (si está activado) y hable con claridad al micrófono.

4 Suelte el botón **PTT** para escuchar.

Cuando la radio a la que se llama responda, el indicador LED parpadeará en verde.

Si no hay actividad de voz durante un periodo de tiempo predeterminado, la llamada finalizará.

Tanto la persona que ha iniciado la llamada como el receptor pueden finalizar una llamada privada en curso pulsando .

5.6.3.3

Realización de llamadas privadas mediante marcado manual

Siga el procedimiento para realizar llamadas privadas con la radio mediante marcado manual.

1 Pulse para acceder al menú.

2 Pulse o para ir a `Contactos`. Pulse para seleccionar.

3 Pulse o para ir a `Marcación manual`. Pulse para seleccionar.

4 Pulse ▲ o ▼ para ir a `Núm. radio`. Pulse OK para seleccionar.

5 Lleve a cabo una de las siguientes acciones:

- Introduzca el ID de suscriptor y pulse OK para continuar.
- Edite el ID de suscriptor marcado previamente y pulse OK para continuar.

6 Pulse el botón **PTT** para realizar la llamada.

El indicador LED verde se ilumina. La pantalla muestra el alias del destino.

7 Espere hasta que acabe el tono de Permitir hablar (si está activado) y comience a hablar con claridad al micrófono.

8 Suelte el botón **PTT** para escuchar.

El indicador LED verde se ilumina cuando la radio de destino responde. La pantalla muestra el ID o alias del usuario transmisor.

9 Si la función de indicación de canal libre está activada, oirá un breve tono de alerta en el momento en que la radio transmisora suelte el botón **PTT**, lo que señala que el canal está libre para que el usuario responda. Pulse el botón **PTT** para responder la llamada.

La llamada finalizará cuando no haya ninguna actividad de voz durante un periodo determinado.Suena un tono.La pantalla muestra `Llamada finalizada`.

5.6.3.4

Recepción de llamadas privadas

Cuando reciba llamadas privadas configuradas como llamadas de establecimiento de llamadas fuera del aire (OACSU, del inglés Off Air Call Set-Up):

- El indicador LED verde parpadea.

- El icono de **llamada privada** aparece en la esquina superior derecha.
- La primera línea de texto muestra el alias de la llamada entrante.
- La radio desactiva el silencio y las llamadas entrantes suenan a través del altavoz.

NOTA:
En función de la configuración de la radio, establecimiento de llamadas fuera del aire (OACSU) o establecimiento de llamadas totalmente fuera del aire (FOACSU), la respuesta a las llamadas privadas puede o no requerir la confirmación del usuario.

En la configuración con OACSU, la radio desactiva el silencio y la llamada se conecta automáticamente.

5.6.3.5

Aceptar llamadas privadas

Cuando reciba llamadas privadas configuradas como llamadas de establecimiento de llamadas totalmente fuera del aire (FOACSU, del inglés Full Off Air Call Set-Up):

- El indicador LED verde parpadea.
- El icono de **llamada privada** aparece en la esquina superior derecha.
- La primera línea de texto muestra el alias de la llamada entrante.

1. Para aceptar una llamada privada configurada como FOACSU, realice una de las siguientes acciones:
   - Pulse ▲ o ▼ para `Aceptar` y pulse OK para responder a una llamada privada.
   - Pulse el botón **PTT** en cualquier entrada.

   El indicador LED verde se ilumina.
2. Espere hasta que acabe el tono de Permitir hablar (si está activado) y comience a hablar con claridad al micrófono.
3. Suelte el botón **PTT** para escuchar.

   La llamada finalizará cuando no haya ninguna actividad de voz durante un periodo determinado.Suena un tono. La pantalla muestra `Llamada finalizada`.

NOTA:
Tanto la persona que ha iniciado la llamada como el receptor pueden finalizar una llamada privada en curso pulsando .

5.6.3.6

Rechazar llamadas privadas

Cuando reciba llamadas privadas configuradas como llamadas de establecimiento de llamadas totalmente fuera del aire (FOACSU, del inglés Full Off Air Call Set-Up):

- El indicador LED verde parpadea.
- El icono de **llamada privada** aparece en la esquina superior derecha.
- La primera línea de texto muestra el alias de la llamada entrante.

Para rechazar una llamada privada configurada como FOACSU, realice una de las siguientes acciones:

- Pulse ▲ o ▼ para Rechazar y pulse OK para rechazar una llamada privada.
- Pulse para rechazar una llamada privada.

5.6.4

Llamadas a todos

Una llamada a todos es una llamada de una radio individual a todas las radios del sitio o a todas las radios de un grupo de sitios, en función de la configuración del sistema.

Se utiliza para realizar anuncios importantes, que requieren una especial atención por parte del usuario. Los usuarios del sistema no pueden responder a una llamada a todos.

Capacity Max es compatible con la llamada a todos en sitio y la llamada a todos en varios sitios. El administrador del sistema puede configurar una o varias de estas opciones en la radio.

NOTA:
Los suscriptores pueden admitir llamadas a todos en todo el sistema, pero la infraestructura de Motorola Solutions no admite llamadas generales en todo el sistema.

5.6.4.1

Realización de llamadas a todos

La radio debe estar programada para poder realizar una llamada a todos. Siga el procedimiento para realizar llamadas a todos con la radio.

1 Seleccione un canal con el ID o alias de grupo de llamada a todos activo. Consulte Selección de un tipo de llamada en la página 76.

2 Pulse el botón **PTT** para realizar la llamada.

El indicador LED verde se ilumina.La pantalla muestra el icono de **llamada grupal** y `Llamada general`, `Llamada a todos en el sitio` o `Llamada multisitio` en función del tipo de configuración.

3 Lleve a cabo una de las siguientes acciones:

- Espere hasta que acabe el tono de Permitir hablar (si está activado) y comience a hablar con claridad al micrófono.
- Espere a que finalice el efecto local de **PTT** (si está activado) y hable con claridad al micrófono.

Los usuarios del canal no pueden responder a una llamada a todos.
La persona que ha iniciado la llamada puede pulsar el botón Cancelar programado para finalizar la llamada a todos.

5.6.4.2

Recepción de llamadas a todos

Al recibir una llamada general, sucede lo siguiente:

- Suena un tono.
- El indicador LED verde parpadea.
- La pantalla muestra el icono de **llamada grupal** en la esquina superior derecha.
- La primera línea de texto muestra el ID o alias del autor de la llamada.
- La segunda línea de texto muestra `Llamada general`, `Llamada a todos en el sitio` o `Llamada multisitio` en función del tipo de configuración.
- La radio desactiva el silencio y las llamadas entrantes suenan a través del altavoz.

La radio vuelve a la pantalla antes de recibir la llamada a todos cuando la llamada finaliza.

Si la función de indicación de canal libre está activada, oirá un breve tono de alerta cuando la radio transmisora suelte el botón **PTT**, lo que señala que el canal está libre para su uso. No puede responder a una llamada a todos.

NOTA:
La radio deja de recibir la llamada a todos si cambia a un canal distinto mientras está recibiendo la llamada. Durante una llamada a todos, no podrá realizar ningún movimiento de navegación ni edición en el menú hasta que la llamada finalice.

5.6.5

Llamadas telefónicas

Una llamada telefónica es una llamada de una radio individual a un teléfono.

En el modo Capacity Max, la radio puede recibir llamadas y contestar aunque la función de llamada telefónica esté desactivada.

La función de llamada telefónica se puede activar mediante la asignación y configuración de números de teléfono en el sistema. Consulte con el administrador del sistema cómo se ha programado la radio.

5.6.5.1

Realización de llamadas telefónicas con el botón de teléfono programable

Siga el procedimiento para realizar una llamada telefónica con el botón de teléfono programable.

1 Pulse el botón de **teléfono** programado para acceder a la lista de entradas del teléfono.

2 Pulse ▲ o ▼ para ir al ID o alias que desee.Pulse OK para seleccionar.

- El indicador LED verde se ilumina. El icono de **llamada telefónica** aparece en la esquina superior derecha. La primera línea de texto muestra el alias de suscriptor. La segunda línea de texto muestra el estado de la llamada.
- Si el establecimiento de llamada es correcto, suena el tono DTMF (doble tono de multifrecuencia). Se oye el tono de llamada del usuario del teléfono. La primera línea de texto muestra . El icono de **llamada telefónica** permanece en la esquina superior derecha. La

segunda línea de texto muestra el estado de la llamada.

- Si el establecimiento de llamada no se realizó correctamente, se oye un tono y la pantalla muestra `Llamada telefónica fallida`. La radio vuelve a la pantalla de introducción del código de acceso. Si el código de acceso se ha preconfigurado en la lista de contactos, la radio vuelve a la pantalla en la que se encontraba antes de iniciar la llamada.

3 Para hablar, pulse el botón **PTT**. Suelte el botón **PTT** para escuchar.

4 Para finalizar la llamada, pulse .

- Se oye el doble tono de multifrecuencia (DTMF) y la pantalla muestra `Finalizando llamada telefónica`.
- Si la finalización de llamada se realizó correctamente, suena un tono y la pantalla muestra `Llamada finalizada` .
- Si la finalización de la llamada no es correcta, la radio vuelve a la pantalla de llamada telefónica.

Repita paso 3 y paso 4 o espere a que el usuario del teléfono finalice la llamada.

- Al pulsar el botón **PTT** en la pantalla de contactos del teléfono, se oye un tono y la pantalla muestra `Pulse OK para realizar llmda`.
- Cuando el usuario del teléfono finaliza la llamada, se oye un tono y la pantalla muestra `Llam. final.`

NOTA:

durante el acceso al canal, pulse para descartar el intento de llamada y se oirá un tono.

durante la llamada, si pulsa el botón de **acceso de marcación rápida** con el código de finalización de acceso preconfigurado o introduce el código de finalización de acceso como dígitos adicionales, la radio intentará finalizar la llamada.

5.6.5.2

Respuesta a llamadas telefónicas como llamadas de grupo

Siga el procedimiento para responder a llamadas telefónicas como llamadas de grupo con la radio.

Al recibir una llamada telefónica como una llamada de grupo:

- La pantalla muestra el icono de **llamada telefónica** en la esquina superior derecha.
- La pantalla muestra `Llmda. teléf.`
- El indicador LED verde parpadea.
- La radio desactiva el silencio y las llamadas entrantes suenan a través del altavoz.

1. Pulse el botón **PTT** para responder la llamada.
2. Suelte el botón **PTT** para escuchar.
3. Para finalizar la llamada, pulse .

   La pantalla muestra `Finalizando llamada`.

NOTA:
Si la función de llamada telefónica no está activada en la radio, esta no puede finalizar una llamada telefónica como una llamada de grupo. El usuario del teléfono debe finalizar la llamada. Solo se permite al usuario receptor contestar durante la llamada.

Si la llamada finaliza correctamente:

- Suena un tono.
- La pantalla muestra `Llamada finalizada`.

Si la finalización de la llamada no es correcta, la radio vuelve a la pantalla de llamada telefónica. Repita paso 3 o espere a que el usuario del teléfono finalice la llamada.

5.6.5.3

Respuesta a llamadas telefónicas como llamadas a todos

Al recibir una llamada telefónica como una llamada a todos, la radio receptora no puede contestar ni responder. Tampoco se permite al usuario receptor finalizar la llamada a todos.

Al recibir una llamada telefónica como una llamada a todos:

- La pantalla muestra el icono de **llamada telefónica** en la esquina superior derecha.
- La pantalla muestra `Llamada general`, `Llamada a todos en sitio` o `Llamada multisitio`, en función del tipo de configuración y `llamada telefónica`.
- El indicador LED verde parpadea.
- La radio desactiva el silencio y las llamadas entrantes suenan a través del altavoz.

5.6.5.4

Respuesta a llamadas telefónicas como llamadas privadas

Siga el procedimiento para responder a llamadas telefónicas como llamadas privada con la radio.

Al recibir una llamada telefónica como una llamada privada:

- La pantalla muestra el icono de **llamada telefónica** en la esquina superior derecha.
- La pantalla muestra `Llmda. teléf.`
- El indicador LED verde parpadea.
- La radio desactiva el silencio y las llamadas entrantes suenan a través del altavoz.

1. Pulse el botón **PTT** para responder la llamada.
2. Suelte el botón **PTT** para escuchar.
3. Para finalizar la llamada, pulse .

   La pantalla muestra `Finalizando llamada`.

   NOTA:
   Si la función de llamada telefónica no está activada en la radio, esta no puede finalizar una llamada telefónica como una llamada privada. El usuario del teléfono debe finalizar la llamada. Solo se permite al usuario receptor contestar durante la llamada.

   Si la llamada finaliza correctamente:

   - Suena un tono.
   - La pantalla muestra `Llamada finalizada`.

   Si la finalización de la llamada no es correcta, la radio vuelve a la pantalla de llamada telefónica.

Repita paso 3 o espere a que el usuario del teléfono finalice la llamada.

5.6.6

Preferencia de llamada

La función de preferencia de llamada permite a una radio detener cualquier transmisión de voz en curso e iniciar una transmisión con prioridad.

Con la función de preferencia de llamada, el sistema se interrumpe y otorga preferencia a las llamadas en curso en casos en los que los canales de enlace no estén disponibles.

Las llamadas de mayor prioridad, como las llamadas de emergencia o las llamadas a todos hacen que la radio transmisora otorgue prioridad a la llamada de mayor prioridad. Si no hay otros canales de radiofrecuencia (RF) disponibles, la llamada de emergencia tiene preferencia sobre la llamada a todos.

5.6.7

Interrupción de voz

La interrupción de voz permite al usuario detener una transmisión de voz en curso.

Esta función utiliza la señalización por canal inverso para detener la transmisión de voz en curso de una radio si la radio que la interrumpe está configurada para la interrupción de voz y la radio transmisora está configurada para llamadas de voz interrumpibles. Además, la radio que interrumpe la transmisión puede enviar una transmisión de voz al participante durante la llamada detenida.

La función de Interrupción de voz mejora considerablemente la probabilidad de enviar correctamente una nueva transmisión a las partes interesadas cuando hay una llamada en curso.

El usuario puede acceder a la interrupción de voz solo si se ha configurado esta función en la radio. Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información.

5.6.7.1

Activación de la interrupción de voz

Siga el procedimiento para iniciar la interrupción de voz en la radio.

La radio debe estar programada para que pueda utilizarse esta función. Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información.

1 Para interrumpir la transmisión durante una llamada, pulse el botón **PPT**.

Si se interrumpe la transmisión en una radio, la pantalla muestra `Llamd. interrump`. La radio emite un tono indicador negativo hasta que se suelta el botón PTT.

2 Espere a que se produzca la confirmación.

Si es correcta:

- Suena un tono indicador positivo.

Si no es correcta:

- Suena un tono indicador negativo.

3 Lleve a cabo una de las siguientes acciones:

- Espere hasta que acabe el tono de Permitir hablar (si está activado) y comience a hablar con claridad al micrófono.
- Espere a que finalice el efecto local de **PTT** (si está activado) y hable con claridad al micrófono.

5.7

Funciones avanzadas

En este capítulo se explican cómo se utilizan las funciones disponibles en la radio.

Es posible que el distribuidor o el administrador del sistema hayan personalizado la radio para satisfacer sus necesidades específicas. Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información.

5.7.1

Cola de llamadas

Cuando no hay recursos disponibles para procesar una llamada, la cola de llamadas permite colocar a la solicitud de llamada en la cola del sistema para los siguientes recursos disponibles.

Se oye un tono de cola de llamada después de pulsar el botón **PTT** que indica que la radio ha entrado en el estado de cola de llamadas. El botón **PTT** puede soltarse cuando se escuche el tono de cola de llamadas.

Si la configuración de la llamada se ha realizado correctamente, ocurre lo siguiente:

- El indicador LED verde parpadea.
- Si está activado, se oirá el tono de permiso para hablar.
- La pantalla muestra el icono del tipo de llamada, el ID o alias.
- El usuario de radio dispone de hasta 4 segundos para pulsar el botón **PTT** y comenzar la transmisión de voz.

Si la configuración de la llamada no se ha realizado correctamente, ocurre lo siguiente:

- Si está activado, se oirá el tono de rechazo.
- En la pantalla se muestra el aviso de fallo momentáneamente.
- La llamada finaliza y la radio sale de la configuración de llamadas.

5.7.2

Exploración de grupo de conversación

Esta función permite que la radio busque y se una a llamadas de grupos definidos en una lista de grupos de recepción.

Cuando se activa el rastreo, el icono que lo indica aparece en la barra de estado y el indicador LED parpadea en amarillo. La radio desactiva el silencio de cualquier miembro en su lista de grupos de recepción.

Cuando se desactiva el rastreo, la radio no recibe transmisiones de ningún miembro de la lista de grupos de recepción, con excepción de las llamada a todos y del grupo de conversación seleccionado.

NOTA:
El rastreo de grupo de conversación se puede configurar mediante CPS. Consulte con el administrador del sistema cómo se ha programado la radio.

5.7.2.1

Activación o desactivación del rastreo de grupo de conversación

Siga el procedimiento para activar o desactivar el rastreo de grupo de conversación en la radio.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a Rastreo. Pulse OK para seleccionar.

3 Lleve a cabo una de las siguientes acciones:

- Pulse ▲ o ▼ para ir a Activar. Pulse OK para seleccionar.
- Pulse ▲ o ▼ para ir a Desactivar. Pulse OK para seleccionar.

Si la función de rastreo está activada:

- La pantalla muestra Exploración activada y el icono de **exploración**.
- El indicador LED parpadea en amarillo.
- Suena un tono indicador positivo.

Si la función de rastreo está desactivada:

- La pantalla muestra Exploración desactivada.
- El icono de **exploración** desaparece.
- El indicador LED se apaga.
- Suena un tono indicador negativo.

5.7.3

Lista de grupos de recepción

La lista de grupos de recepción es una función que le permite crear y asignar miembros a la lista de rastreo de grupo de conversación.

La lista se crea cuando se programa la radio y determina qué grupos se pueden rastrear. La radio puede admitir un máximo de 16 miembros en esta lista.

Si la radio se programa para editar la lista de rastreo, podrá:

- Añadir/eliminar grupos de conversación.
- Añadir, eliminar y/o editar la prioridad de los grupos de conversación. Consulte la Edición de la prioridad en un grupo de conversación en la página 101.
- Añadir, eliminar y/o editar la afiliación de los grupos de conversación. Consulte la Adición de una afiliación de grupo de conversación en la página 102 y la Eliminación de una afiliación de grupo de conversación en la página 103.
- Reemplazar la lista de rastreo actual por una nueva.

IMPORTANTE:
Para añadir miembros a la lista, se debe configurar el grupo de conversación en la radio primero.

NOTA:
El administrador del sistema programa la lista de grupos de recepción. Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información.

5.7.4

Monitor de prioridad

La función de monitor de prioridad permite a la radio recibir las transmisiones de los grupos de conversación con mayor prioridad automáticamente incluso si se encuentra en una llamada de grupo de conversación.

La radio se sale de la llamada de grupo de conversación de menor prioridad para irse a la de mayor prioridad.

NOTA:
Solamente se puede acceder a esta función si la función rastreo de grupo de conversación está activada.

La función de monitor de prioridad se aplica únicamente a los miembros en la lista de grupos de recepción. Hay dos grupos de conversación prioritarios: Prioridad 1 (P1) y Prioridad 2 (P2). P1 tiene mayor prioridad que P2. En un sistema Capacity Max, la radio recibe transmisiones en función del orden de prioridad siguiente:

1. Llamada de emergencia para el grupo de conversación P1
2. Llamada de emergencia para el grupo de conversación P2
3. Llamada de emergencia para grupos de conversación no prioritarios en la lista de grupos de recepción
4. Llamada a todos
5. Llamada de grupo de conversación P1
6. Llamada de grupo de conversación P2
7. Grupos de conversación no prioritarios en la lista de grupos de recepción

Consulte Edición de la prioridad en un grupo de conversación en la página 101 para obtener más información sobre cómo añadir, eliminar y/o editar la prioridad de los grupos de conversación en la lista de rastreo.

NOTA:
Esta función la programa el administrador del sistema. Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información.

5.7.4.1

Edición de la prioridad en un grupo de conversación

En el menú de rastreo de grupo de conversación puede ver o editar la prioridad de un grupo de conversación.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a Rastreo. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a Ver/editar lista. Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir al grupo de conversación deseado. Pulse OK para seleccionar.

La prioridad actual se indica mediante un icono de **Prioridad 1** o **Prioridad 2** junto al grupo de conversación.

5 Pulse ▲ o ▼ para ir a Edit. prioridad. Pulse OK para seleccionar.

6 Pulse ▲ o ▼ para seleccionar el nivel de prioridad que desee. Pulse OK para seleccionar.

Si Prioridad 1 o Prioridad 2 se ha asignado a otro grupo de conversación, puede elegir sobrescribir la prioridad actual. Cuando la pantalla muestra ¿Reemplazar?, pulse ▲ o ▼ para elegir las opciones siguientes:

- No para volver al paso anterior.
- Sí para sobrescribir la prioridad.

La pantalla muestra un aviso pequeño positivo antes de volver a la pantalla anterior. El icono de prioridad aparece junto al grupo de conversación.

5.7.5

Afiliación de varios grupos de conversación

En un sistema Capacity Max, la radio se puede configurar para disponer de hasta siete grupos de conversación en un emplazamiento.

De los 16 grupos de conversación de la lista de grupos de recepción, es posible asignar un máximo de siete de ellos como grupos de conversación de afiliación. El grupo de conversación seleccionado y los grupos de conversación prioritarios se afilian automáticamente.

NOTA:
Esta función la programa el administrador del sistema. Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información.

5.7.5.1

Adición de una afiliación de grupo de conversación

Siga este procedimiento para añadir una afiliación de grupo de conversación.

1. Pulse OK para acceder al menú.
2. Pulse ▲ o ▼ para ir a `Rastreo`. Pulse OK para seleccionar.
3. Pulse ▲ o ▼ para ir a `Ver/editar lista`. Pulse OK para seleccionar.
4. Pulse ▲ o ▼ para ir al ID o alias de grupo de conversación deseado. Pulse OK para seleccionar.

   El estado de afiliación se muestra en `Ver/editar lista`. La pantalla muestra ■ junto al ID o alias de grupo de conversación seleccionado.
5. Pulse ▲ o ▼ para ir a `Editar afiliación`. Pulse OK para seleccionar.
6. Lleve a cabo una de las siguientes acciones:

- Pulse ▲ o ▼ para ir a `Encendido`. Pulse OK para seleccionar.
- Pulse ▲ o ▼ para ir a `Apagado`. Pulse OK para seleccionar.

Cuando se selecciona `Encendido`, aparece ● junto al ID o alias de grupo de conversación.

Si la afiliación se ha realizado correctamente, la pantalla muestra ✓ junto al ID o alias de grupo de conversación seleccionado.

Si la afiliación no se ha realizado correctamente, ● se queda junto al ID o alias de grupo de conversación.

NOTA:
La radio muestra `Lista llena` cuando se selecciona un máximo de siete grupos de conversación para la afiliación en la lista de rastreo. Para seleccionar un nuevo grupo de conversación para la afiliación, elimine un grupo de conversación que esté afiliado actualmente para dejar espacio para una nueva adición. Consulte Eliminación de una afiliación de grupo de conversación en la página 103 para obtener más información.

5.7.5.2

Eliminación de una afiliación de grupo de conversación

Cuando la lista de afiliación está llena y desea seleccionar un nuevo grupo de conversación para la afiliación, elimine un grupo de conversación afiliado actualmente para dejar espacio para la nueva adición. Siga el procedimiento para eliminar una afiliación de grupo de conversación.

1. Pulse OK para acceder al menú.
2. Pulse ▲ o ▼ para ir a `Rastreo`. Pulse OK para seleccionar.
3. Pulse ▲ o ▼ para ir a `Ver/editar lista`. Pulse OK para seleccionar.
4. Pulse ▲ o ▼ para ir al ID o alias de grupo de conversación deseado. Pulse OK para seleccionar.

El estado de afiliación se muestra en `Ver/editar lista`. La pantalla muestra ■ junto al ID o alias de grupo de conversación seleccionado.

5 Pulse ▲ o ▼ para ir a `Editar afiliación`.

Pulse OK para seleccionar.

6 Pulse ▲ o ▼ para ir a `Apagado`. Pulse OK para seleccionar.

Cuando se selecciona `Apagado`, ■ desaparece de junto el ID o alias del grupo de conversación.

5.7.6

Contestación

La función de contestación permite le permite responder a una transmisión durante el escaneo.

Si la radio escanea una llamada de la lista de rastreo de grupo seleccionable y pulsa el botón **PTT** durante una llamada escaneada, el funcionamiento de la radio dependerá de si la contestación estaba habilitada o deshabilitada durante la programación de la radio.

Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información.

Contestación deshabilitada

La radio abandona la llamada escaneada e intenta transmitir el contacto para la posición de canal seleccionada en ese momento. Cuando finalice el tiempo muerto de llamada al contacto seleccionado actualmente, la radio regresa al canal de inicio y se inicia el temporizador de tiempo muerto de rastreo. La radio reanudará el escaneo de grupo una vez finalice el temporizador de tiempo muerto de rastreo.

Contestación habilitada

Si pulsa el botón **PTT** durante el tiempo muerto de grupo de la llamada escaneada, la radio intentará transmitir al grupo escaneado.

NOTA:
Si escanea una llamada para un grupo que no está asignado a una posición de canal en la zona que esté seleccionada en ese momento y la llamada se termina, tendrá que cambiar a la zona correspondiente y seleccionar a continuación la posición de canal del grupo para poder hablar con ese grupo.

5.7.7

Bluetooth

Esta función permite utilizar la radio con un dispositivo activado para Bluetooth (accesorio) mediante una conexión Bluetooth. La radio soporta dispositivos activados para Bluetooth de Motorola Solutions y disponibles en el mercado (COTS).

La conexión Bluetooth funciona dentro de un rango de 10 m (32 pies) de la línea de visión. Esta es una línea sin obstáculos entre la radio y el dispositivo habilitado para Bluetooth. Para que funcione con un alto grado de fiabilidad, Motorola Solutions recomienda no separar la radio y el accesorio.

En las zonas periféricas de recepción, la calidad tanto del tono como de la voz comenzará a sonar "distorsionada" o "entrecortada". Para corregir este problema, debe colocar la radio y el dispositivo habilitado para Bluetooth más cerca el uno del otro (dentro del rango de 10 metros [32 pies] definido) para volver a recibir el audio con claridad. La función Bluetooth de la radio tiene una potencia máxima de 2,5 mW (4 dBm) dentro del rango de 10 m (32 pies).

La radio puede soportar hasta tres conexiones Bluetooth simultáneas con dispositivos habilitados para Bluetooth de tipos únicos. Por ejemplo, un auricular, un escáner y un dispositivo de PTT solo (POD). Las múltiples conexiones con dispositivos habilitados para Bluetooth del mismo tipo no están soportadas.

Consulte el manual del usuario de su dispositivo Bluetooth para obtener más detalles sobre todas las capacidades del mismo.

La radio se conecta al dispositivo habilitado para Bluetooth con intensidad de la señal más fuerte dentro del rango de alcance o a uno al que ya se haya conectado en una sesión anterior. No apague el dispositivo habilitado para Bluetooth ni pulse el botón para volver al inicio durante las operaciones de búsqueda y conexión, ya que la operación se cancelaría.

5.7.7.1

Encendido y apagado de la función Bluetooth

Siga el procedimiento para encender y apagar el Bluetooth.

1 Pulse para acceder al menú.

2 Pulse ▲ o ▼ para ir a Bluetooth. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a Mi estado. Pulse OK para seleccionar.

La pantalla muestra Enc. y Apaga.. El estado actual se indica mediante ✓ .

4 Lleve a cabo una de las siguientes acciones:

- Pulse ▲ o ▼ para ir a Encendido. Pulse OK para seleccionar. La pantalla muestra ✓ junto a Enc.
- Pulse ▲ o ▼ para ir a Apagado. Pulse OK para seleccionar. La pantalla muestra ✓ junto a Apagado.

5.7.7.2

Conexión a dispositivos Bluetooth

Siga el procedimiento para conectarse a dispositivos Bluetooth.

Encienda el dispositivo habilitado para Bluetooth y colóquelo en modo de acoplamiento.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a Bluetooth. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a Dispositivos Pulse OK para seleccionar.

4 Lleve a cabo una de las siguientes acciones:

- Pulse ▲ o ▼ para seleccionar el dispositivo deseado. Pulse OK para seleccionar.
- Pulse ▲ o ▼ para ir a Buscar dispos. y encontrar los dispositivos disponibles. Pulse ▲

o ▼ para seleccionar el dispositivo deseado.

Pulse OK para seleccionar.

5

Pulse ▲ o ▼ para `Conectar`. Pulse OK para seleccionar.

Su dispositivo habilitado para Bluetooth puede requerir pasos adicionales para que se complete el acoplamiento. Consulte el manual de usuario de su dispositivo habilitado para Bluetooth.

La pantalla muestra `Conectando a <dispositivo>`.

Espere a que se produzca la confirmación.
Si es correcta:

- Suena un tono indicador positivo.
- La pantalla muestra `<Dispositivo> conectado` y el icono de **Bluetooth conectado.**
- La pantalla muestra ✓ junto al dispositivo conectado.

Si no es correcta:

- Suena un tono indicador negativo.
- La pantalla muestra `Error conexión`.

5.7.7.3

Conexión a dispositivos Bluetooth en el modo de detección

Siga el procedimiento para conectarse a dispositivos Bluetooth en modo de detección.

Encienda el dispositivo habilitado para Bluetooth y colóquelo en modo de acoplamiento.

1

Pulse OK para acceder al menú.

2

Pulse ▲ o ▼ para ir a `Bluetooth`. Pulse OK para seleccionar.

3

Pulse ▲ o ▼ para ir a `Encontrarme`. Pulse OK para seleccionar. Otros dispositivos habilitados para Bluetooth pueden detectar ahora la radio durante un tiempo programado. Esto se denomina modo visible.

Espere a que se produzca la confirmación.
Si es correcta:

- Suena un tono indicador positivo.

- La pantalla muestra `<Dispositivo> conectado` y el icono de **Bluetooth conectado.**
- La pantalla muestra ✓ junto al dispositivo conectado.

Si no es correcta:

- Suena un tono indicador negativo.
- La pantalla muestra `Error conexión`.

5.7.7.4

Desconexión de dispositivos Bluetooth

Siga el procedimiento para desconectarse de dispositivos Bluetooth.

1. Pulse OK para acceder al menú.
2. Pulse ▲ o ▼ para ir a `Bluetooth`. Pulse OK para seleccionar.
3. Pulse ▲ o ▼ para ir a `Disposit.` Pulse OK para seleccionar.
4. Pulse ▲ o ▼ para seleccionar el dispositivo deseado. Pulse OK para seleccionar.
5. Pulse ▲ o ▼ para ir a `Desconectar`. Pulse OK para seleccionar.

   La pantalla muestra `Descon. de <dispositivo>`.

Espere a que se produzca la confirmación.

- Suena un tono.
- La pantalla muestra `<Dispositivo> desconectado` y desaparece el icono de **Bluetooth conectado.**
- ✓ desaparece junto al dispositivo conectado.

5.7.7.5

Cambio de la salida de audio entre el altavoz interno de la radio y el dispositivo Bluetooth

Siga el procedimiento para alternar la salida de audio entre el altavoz interno de la radio y el dispositivo Bluetooth externo.

Pulse el botón programado **Camb. audio BT**.

La pantalla muestra uno de los siguientes resultados:

- Suena un tono. La pantalla muestra `Redirig. audio a radio`.
- Suena un tono. La pantalla muestra `Redirig. audio a Bluetooth`.

5.7.7.6

Visualización de detalles del dispositivo

Siga el procedimiento para ver los detalles del dispositivo en la radio.

1. Pulse OK para acceder al menú.
2. Pulse ▲ o ▼ para ir a `Bluetooth`. Pulse OK para seleccionar.
3. Pulse ▲ o ▼ para ir a `Disposit.` Pulse OK para seleccionar.
4. Pulse ▲ o ▼ para seleccionar el dispositivo deseado. Pulse OK para seleccionar.
5. Pulse ▲ o ▼ para ir a `Ver detalles`. Pulse OK para seleccionar.

5.7.7.7

Eliminación del nombre del dispositivo

Puede eliminar un dispositivo desconectado de la lista de dispositivos habilitados para Bluetooth.

1. Pulse OK para acceder al menú.
2. Pulse ▲ o ▼ para ir a `Bluetooth`. Pulse OK para seleccionar.
3. Pulse ▲ o ▼ para ir a `Disposit.` Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para seleccionar el dispositivo deseado. Pulse OK para seleccionar.

5 Pulse ▲ o ▼ para ir a `Eliminar`. Pulse OK para seleccionar. La pantalla muestra `Disposit. eliminado`.

5.7.7.8

Ajuste de los valores ganancia del micrófono Bluetooth

Permite el control del valor de ganancia del micrófono en dispositivos habilitados para Bluetooth conectados.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Bluetooth`. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a `Gan. micro BT`. Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir al tipo Gan. micro BT y los valores actuales. Para editar los valores, pulse OK para realizar la selección.

5 Pulse ▲ o ▼ para aumentar o reducir los valores. Pulse OK para seleccionar.

5.7.7.9

Modo Bluetooth visible permanentemente

El modo Bluetooth visible permanentemente debe activarlo el distribuidor o el administrador del sistema.

NOTA:
Si está activado, `Bluetooth`**no** se muestra en el menú y no puede utilizar ninguna de las funciones del botón programable de Bluetooth.

Otros dispositivos habilitados para Bluetooth podrán localizar la radio pero no se podrán conectar a la misma. El modo Bluetooth visible permanentemente permite que los dispositivos dedicados utilicen la posición de la radio en procesos de localización basados en Bluetooth.

5.7.8

Ubicación en interiores

NOTA:
La función de ubicación en interiores solo se aplica a los modelos que cuentan con la última versión de software y hardware. Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información.

La ubicación en áreas interiores puede utilizarse para realizar un seguimiento de la ubicación de los usuarios de la radio. Cuando Ubicación en interiores está activada, la radio se encuentra en un modo de detección limitado. Las balizas limitadas se utilizan para ubicar la radio y determinar su posición.

5.7.8.1

Activación o desactivación de la ubicación en interiores

Realice una de las siguientes acciones para activar o desactivar la ubicación en interiores.

- Acceda a esta función mediante el menú.

  a. Pulse OK para acceder al menú.

  b. Pulse ▲ o ▼ para ir a `Bluetooth` y pulse OK para seleccionar.

  c. Pulse ▲ o ▼ para ir a `Ubicación en interiores` y pulse OK para seleccionar.

  d. Pulse OK para activar la ubicación en interiores.

  La pantalla mostrará `Ubicación en interiores activada`. Oirá un tono indicador positivo.
  Ocurrirá una de las siguientes situaciones:

  - Si se realiza correctamente, aparecerá el icono Ubicación en interiores disponible en la pantalla de inicio.

- Si no se realiza correctamente, la pantalla muestra `Activación errónea`. Oirá un tono indicador negativo.

e. Pulse OK para apagar la ubicación en áreas interiores.

La pantalla mostrará `Ubicación en interiores desactivada`. Oirá un tono indicador positivo.
Ocurrirá una de las siguientes situaciones:

- Si se realiza correctamente, desaparecerá el icono Ubicación en interiores disponible en la pantalla de inicio.
- Si no se realiza correctamente, la pantalla muestra `Desactivación errónea`. Oirá un tono indicador negativo.

- Acceda a esta función con el botón programable.

a. Pulse de manera prolongada el botón **Ubicación en áreas interiores** para activar la ubicación en áreas interiores.

La pantalla mostrará `Ubicación en interiores activada`. Oirá un tono indicador positivo.
Ocurrirá una de las siguientes situaciones:

- Si se realiza correctamente, aparecerá el icono Ubicación en interiores disponible en la pantalla de inicio.
- Si no se realiza correctamente, la pantalla muestra `Activación errónea`. Si no se realiza correctamente, oirá un tono indicador negativo.

b. Pulse el botón **Ubicación en áreas interiores** para activar la ubicación en áreas interiores.

La pantalla mostrará `Ubicación en interiores desactivada`. Oirá un tono indicador positivo.
Ocurrirá una de las siguientes situaciones:

- Si se realiza correctamente, desaparecerá el icono Ubicación en interiores disponible en la pantalla de inicio.

- Si no se realiza correctamente, la pantalla muestra `Desactivación errónea`. Si no se realiza correctamente, oirá un tono indicador negativo.

5.7.8.2

Acceso a la información de balizas de ubicación en interiores

Siga el procedimiento para acceder la información de las señales periódicas de la ubicación en áreas interiores.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Bluetooth` y pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a `Ubicación en interiores` y pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a `Balizas` y pulse OK para seleccionar.

En la pantalla aparece la información de las balizas.

5.7.9

Controles de varios sitios

Estas funciones están disponibles cuando el actual canal de radio está configurado para un sistema Capacity Max.

5.7.9.1

Inicio de una búsqueda de sitio manual

Siga el procedimiento para iniciar una búsqueda de sitio manual cuando la intensidad de la señal recibida sea débil para intentar encontrar un sitio con mejor señal.

1 Lleve a cabo una de las siguientes acciones:

- Pulse el botón **Roam manual del sitio** programado. Omita los pasos siguientes.
- Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a Herramientas.Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a Config. radio.Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a Roaming. Pulse OK para seleccionar.

5 Pulse ▲ o ▼ para ir a Búsq. activa. Pulse OK para seleccionar.

Suena un tono.El indicador LED verde parpadea.La pantalla muestra Buscando sitio.

Si la radio encuentra un nuevo sitio:

- Suena un tono indicador positivo.
- El indicador LED se apaga.
- La pantalla muestra Sitio <Alias> localizado.

Si la radio no logra encontrar un nuevo sitio:

- Suena un tono indicador negativo.
- El indicador LED se apaga.
- La pantalla muestra Fuera de cobert.

Si hay un sitio nuevo dentro de la cobertura, pero la radio no es capaz de conectarse con él:

- Suena un tono indicador negativo.
- El indicador LED se apaga.
- La pantalla muestra Canal ocupado.

5.7.9.2
Activar/desactivar bloqueo de sitio

Al habilitarlo, la radio solo buscará el emplazamiento actual. Si se deshabilita, la radio busca otros emplazamientos además del actual.

Pulse el botón programado **Bloq. sitio**.

Si la función de **bloqueo de sitio** está activada:

- Se escuchará un tono indicador afirmativo, el cual señala que la radio se ha bloqueado en sitio actual.

- En la pantalla aparecerá `Site Locked` (Sitio bloq.).

Si la función de **bloqueo de sitio** está desactivada:

- Se oirá un tono indicador negativo, que señala que la radio está desbloqueada.
- En la pantalla aparecerá `Site Unlocked` (Sitio desbloq.).

5.7.9.3

Acceso a lista de sitios cercanos

Esta función permite al usuario comprobar la lista de sitios adyacentes del sitio de inicio actual. Siga el procedimiento para acceder a la lista de sitios vecinos:

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Herramientas`.Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a `Info. radio`. Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a `Sitios vecinos`. Pulse OK para seleccionar.

5.7.10

Recordatorio de canal de inicio

Esta función activa un recordatorio cuando la radio no está configurada en el canal de inicio durante un período de tiempo.

Si esta función está activada cuando la radio no está configurada en el canal de inicio durante un periodo de tiempo, ocurrirá lo siguiente:

- El tono de recordatorio de canal de inicio y el anuncio suenan.
- La primera línea de la pantalla muestra `Sin`.
- La segunda línea muestra `Canal de inicio`.

5.7.10.1

Silenciar el recordatorio de canal de inicio

Cuando suena el recordatorio del canal de inicio, puede silenciarlo temporalmente.

Pulse el botón programable **Silenciar recordatorio del canal de inicio**.

La primera línea de la pantalla muestra `HCR` y la segunda línea muestra `silenciado`.

5.7.10.2

Configuración de nuevos canales de inicio

Cuando se activa el recordatorio del canal de inicio, puede configurar un nuevo canal de inicio.

1 Lleve a cabo una de las siguientes acciones:

- Pulse el botón programable **Restablecer canal de inicio** para establecer el canal actual como nuevo canal de inicio. Omita los pasos siguientes.

  La primera línea de la pantalla muestra el alias del canal y la segunda línea muestra `Nuevo canal principal`.

- Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Herramientas`.Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a `Config. radio`.Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a `Canal de inicio`. Pulse OK para seleccionar.

5 Pulse ▲ o ▼ para ir al nuevo alias de canal de inicio que desee. Pulse OK para seleccionar.

La pantalla muestra ✓ junto al alias de canal de inicio seleccionado.

5.7.11

Monitorización remota

Esta función se utiliza para encender el micrófono de una radio de destino con un alias o ID de suscriptor. Se puede utilizar esta función para supervisar de manera remota toda la actividad audible alrededor de la radio de destino.

La radio y la radio de destino deben estar programadas para que pueda utilizarse esta función.

Cuando se inicia, el LED verde parpadea una única vez en la radio de destino. Esta función se detiene automáticamente después de la duración programada o cuando se esté realizando cualquier operación en la radio de destino.

5.7.11.1

Iniciación del monitor remoto

Siga el procedimiento para iniciar el monitor remoto en la radio.

1 Pulse el botón **Monitor remoto** programado.

2 Pulse ▲ o ▼ para ir al ID o alias que desee.Pulse OK para seleccionar.

La pantalla muestra un pequeño aviso de transición que indica que la solicitud está en curso. El indicador LED verde se ilumina.

3 Espere a que se produzca la confirmación.

Si es correcta:

- Suena un tono indicador positivo.
- La pantalla muestra un pequeño aviso positivo.
- El audio de la radio que está siendo monitorizada comienza a reproducirse durante un periodo de tiempo programado, y la pantalla muestra `Monitor remot.`. Cuando el temporizador indica que se ha agotado el tiempo, suena un tono de alerta y el indicador LED se apaga.

Si no es correcta:

- Suena un tono indicador negativo.
- La pantalla muestra un aviso pequeño negativo.

5.7.11.2

Inicio del monitor remoto mediante la lista de contactos

Siga el procedimiento para iniciar el monitor remoto en la radio mediante la lista de contactos.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Contactos`.Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir al ID o alias que desee.Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a `Monitor remoto`. Pulse OK para seleccionar.

La pantalla muestra un pequeño aviso de transición que indica que la solicitud está en curso. El indicador LED verde se ilumina.

5 Espere a que se produzca la confirmación.

Si es correcta:

- Suena un tono indicador positivo.
- La pantalla muestra un pequeño aviso positivo.
- El audio de la radio que está siendo monitorizada comienza a reproducirse durante un periodo de tiempo programado, y la pantalla muestra `Monitor remot.`. Cuando el temporizador indica que se ha agotado el tiempo, suena un tono de alerta y el indicador LED se apaga.

Si no es correcta:

- Suena un tono indicador negativo.
- La pantalla muestra un aviso pequeño negativo.

5.7.11.3

Inicio del monitor remoto mediante marcado manual

Siga el procedimiento para iniciar el monitor remoto en la radio mediante el marcado manual.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a Contactos. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a Marcdo. manual. Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a Núm. radio. Pulse OK para seleccionar.

5 Lleve a cabo una de las siguientes acciones:

- Introduzca el ID o alias de suscriptor y pulse OK para continuar.
- Edite el ID marcado previamente y pulse OK para continuar.

6 Pulse ▲ o ▼ para ir a Monitor remoto. Pulse OK para seleccionar.

La pantalla muestra un pequeño aviso de transición que indica que la solicitud está en curso. El indicador LED verde se ilumina.

7 Espere a que se produzca la confirmación.

Si es correcta:

- Suena un tono indicador positivo.
- La pantalla muestra un pequeño aviso positivo.
- El audio de la radio que está siendo monitorizada comienza a reproducirse durante un periodo de tiempo programado, y la pantalla muestra Monitor remot.. Cuando el temporizador indica que se ha agotado el tiempo, suena un tono de alerta y el indicador LED se apaga.

Si no es correcta:

- Suena un tono indicador negativo.
- La pantalla muestra un aviso pequeño negativo.

5.7.12

Configuración de contactos

La función Contactos proporciona a la radio una "agenda". Cada entrada corresponde a un alias o ID que utiliza para realizar una llamada. Las entradas están ordenadas alfabéticamente.

Cada entrada, según el contexto, se asocia con los diferentes tipos de llamadas: Llamada grupal, llamada privada, llamada de difusión, llamada a todos en el sitio, llamada a todos en varios sitios, llamada de PC o llamada de despacho.

La llamada de PC o la llamada de despacho están relacionadas con los datos. Solo están disponibles con las aplicaciones. Consulte la documentación de aplicaciones de datos para obtener más información.

Además, el menú Contactos le permite asignar a cada entrada una o más teclas numéricas programadas en el micrófono con teclado. Si una entrada está asignada a una tecla numérica, la radio puede realizar un marcado rápido de la entrada.

NOTA:
Verá una marca de verificación delante de cada tecla numérica que esté asignada a una entrada. Si la marca se encuentra delante de `Vacío`, no se ha asignado una tecla numérica a la entrada.

Cada entrada dentro de Contactos muestra la siguiente información:

- Tipo de llamada
- Alias de la llamada
- ID de llamada

NOTA:
Si está activada la función Privacidad en un canal, podrá realizar llamadas de grupo, llamadas privadas, llamadas a todos y llamadas telefónicas con la privacidad activada en dicho canal. Solo las radios de destino con la misma clave de privacidad o con el mismo valor de clave e ID de clave que su radio podrán desencriptar la transmisión.

5.7.12.1

Asignación de entradas a teclas numéricas programadas

Siga el procedimiento para asignar entradas a teclas numéricas programables en la radio.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Contactos`. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir al ID o alias que desee.

Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a `Clave del programa`.

Pulse OK para seleccionar.

5 Lleve a cabo una de las siguientes acciones:

- Si la tecla numérica deseada no se ha asignado a una entrada, pulse ▲ o ▼ para seleccionar la tecla numérica que desee. Pulse OK para seleccionar.
- Si la tecla numérica ya se ha asignado a una entrada, la pantalla mostrará el mensaje `La tecla ya está asignada` y, a continuación, en la primera línea de texto de la pantalla aparecerá el mensaje `¿Reemplazar?` Lleve a cabo una de las siguientes acciones:

  Pulse ▲ o ▼ para elegir `Sí`. Pulse OK para seleccionar.

  La radio emite un tono indicador positivo y la pantalla muestra `Contacto guardado` y un aviso pequeño positivo.

  Pulse ▲ o ▼ para elegir `No` y volver al paso anterior.

5.7.12.2

Eliminación de asociaciones entre entradas y teclas numéricas programadas

Siga el procedimiento para eliminar las asociaciones entre las entradas y las teclas numéricas programables en la radio.

1 Lleve a cabo una de las siguientes acciones:

- Mantenga pulsada la tecla numérica programada del ID o el alias que desee. Continúe con el paso paso 4.
- Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Contactos`. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir al ID o alias que desee.

Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a `Clave del programa`.

Pulse OK para seleccionar.

5 Pulse ▲ o ▼ para ir a `Vacío`. Pulse OK para seleccionar.

La primera línea de texto muestra `¿Borrar todas las teclas?`.

6 Pulse ▲ o ▼ para elegir `Sí`. Pulse OK para seleccionar.

NOTA:
Cuando se elimina una entrada, la asociación entre esta y sus teclas numéricas programadas también se elimina.

Suena un tono indicador positivo. En la pantalla aparecerá `Contacto guardado`.
La pantalla vuelve automáticamente al menú anterior.

5.7.12.3

Adición de nuevos contactos

Siga el procedimiento para añadir nuevos contactos a la radio.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Contactos`.Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para `Contacto nuevo`. Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para seleccionar el tipo de contacto `Contacto radio` o `Contacto tel.` Pulse OK para seleccionar.

5 Introduzca el número de contacto con el teclado y pulse OK para continuar.

6 Introduzca el nombre del contacto con el teclado y pulse OK para continuar.

7 Pulse ▲ o ▼ para el tipo de timbre que desee.

Pulse OK para seleccionar.

Suena un tono indicador positivo.La pantalla muestra un pequeño aviso positivo.

5.7.13

Configuración del indicador de llamada

Esta función permite que los usuario de la radio configuren los tono de timbre de llamada y de mensaje de texto.

5.7.13.1

Activación o desactivación de los timbres de llamada para las llamadas privadas

Siga el procedimiento para activar o desactivar los timbres de llamada para las llamadas privadas en la radio.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Herramientas`. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a `Config. radio`. Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a `Tonos/alertas`. Pulse OK para seleccionar.

5 Pulse ▲ o ▼ para ir a `Timbres de llamada`. Pulse OK para seleccionar.

6 Pulse ▲ o ▼ para ir a `Llamada privada`. Pulse OK para seleccionar.

7 Lleve a cabo una de las siguientes acciones:

- Pulse ▲ o ▼ para seleccionar el tono que desee. Pulse OK para seleccionar.
  La pantalla mostrará ✓ junto al tono seleccionado.
- Pulse ▲ o ▼ para ir a `Apagado`. Pulse OK para seleccionar.
  Si los tonos de llamada se activaron previamente, en la pantalla aparecerá ✓ junto a `Apagado`.

Si los tonos de llamada se desactivaron previamente, en la pantalla no aparecerá ✓ junto a Apagado.

5.7.13.2

Activación o desactivación de los timbres de llamada para los mensajes de texto

Siga el procedimiento para activar o desactivar los timbres de llamada para los mensajes de texto en la radio.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a Herramientas. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a Config. radio. Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a Tonos/alertas. Pulse OK para seleccionar.

5 Pulse ▲ o ▼ para ir a Timbres de llamada. Pulse OK para seleccionar.

6 Pulse ▲ o ▼ para ir a Mensaje de texto. Pulse OK para seleccionar.

La pantalla mostrará ✓ y el tono actual.

7 Lleve a cabo una de las siguientes acciones:

- Pulse ▲ o ▼ para seleccionar el tono que desee. Pulse OK para seleccionar.
  La pantalla mostrará ✓ junto al tono seleccionado.
- Pulse ▲ o ▼ para ir a Apagado. Pulse OK para seleccionar.

Si los tonos de llamada se activaron previamente, en la pantalla aparecerá ✓ junto a Apagado.

Si los tonos de llamada se desactivaron previamente, en la pantalla no aparecerá ✓ junto a Apagado.

5.7.13.3

Activación o desactivación de los timbres de llamada para las alertas de llamada

Siga el procedimiento para activar o desactivar los timbres de llamada para las alerta de llamada en la radio.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a Herramientas.Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a Config. radio.Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a Tonos/alerta. Pulse OK para seleccionar.

5 Pulse ▲ o ▼ para ir a Timbres de llamada. Pulse OK para seleccionar.

6 Pulse ▲ o ▼ para ir a Alerta de llamada. Pulse OK para seleccionar.

7 Lleve a cabo una de las siguientes acciones:

- Pulse ▲ o ▼ para seleccionar el tono que desee. Pulse OK para seleccionar. La pantalla mostrará ✓ junto al tono seleccionado.
- Pulse ▲ o ▼ para ir a Apagado. Pulse OK para seleccionar.

Si los tonos de llamada se activaron previamente, en la pantalla aparecerá ✓ junto a Apagado.

Si los tonos de llamada se desactivaron previamente, en la pantalla no aparecerá ✓ junto a Apagado.

5.7.13.4

Activación o desactivación de los timbres de llamada para el estado de telemetría con texto

Siga el procedimiento para activar o desactivar los timbres de llamada para los estados de telemetría en la radio.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a Herramientas. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a Config. radio. Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a Tonos/alerta. Pulse OK para seleccionar.

5 Pulse ▲ o ▼ para ir a Timbres de llamada. Pulse OK para seleccionar.

6 Pulse ▲ o ▼ para ir a Telemetría. Pulse OK para seleccionar.

El tono actual queda indicado por un ✓ .

7 Lleve a cabo una de las siguientes acciones:

- Pulse ▲ o ▼ para seleccionar el tono que desee. Pulse OK para seleccionar.
  En la pantalla aparecerá Tono <Número> seleccionado y un ✓ a la izquierda del tono seleccionado.

- Pulse ▲ o ▼ para ir a `Desactivar`. Pulse OK para seleccionar.
  En la pantalla aparecerá `Timbre telemet. apag.` y un ✓ a la izquierda de `Apagar`.

5.7.13.5

Asignación de tipos de timbre

La radio puede programarse para que utilice el sonido de uno de los diez tonos de llamada predefinidos cuando reciba una alerta de llamada o un mensaje de texto de un contacto determinado. La radio reproducirá todos los tipos de timbre al ir desplazándose por la lista. Siga el procedimiento para asignar estilos de tono de la radio.

1. Pulse OK para acceder al menú.
2. Pulse ▲ o ▼ para ir a `Contactos`. Pulse OK para seleccionar.

   Las entradas están ordenadas alfabéticamente.
3. Pulse ▲ o ▼ para ir al ID o alias que desee.

   Pulse OK para seleccionar.
4. Pulse ▲ o ▼ para ir a `Editar`. Pulse OK para seleccionar.
5. Pulse OK hasta que la pantalla muestre el menú `Edit. tono`.

   Un ✓ indica el tono seleccionado actual.
6. Pulse ▲ o ▼ para seleccionar el tono que desee.

   Pulse OK para seleccionar.

   La pantalla muestra un pequeño aviso positivo.

5.7.13.6

Selección de un tipo de tono de alerta

NOTA:
El botón **Tono de alerta** programado se lo asigna su distribuidor o administrador del sistema. Consulte con el distribuidor o administrador del sistema cómo se ha programado la radio.

Puede programar las llamadas de radio para una única llamada de vibración predeterminada. Si el estado Todos tonos está deshabilitado, la radio mostrará el icono de Silencio de Todos tonos. Si el estado Todos tonos está habilitado, se mostrará el tipo de tono de alerta relacionado.

La radio vibra una vez si se trata de un estilo de timbre momentáneo. La radio vibra repetidamente si se trata de un estilo de timbre repetitivo. Cuando se ajuste en Tono y vibración, la radio emitirá un tono de llamada específico si hay una transacción de radio entrante (por ejemplo, Alerta de llamada o Mensaje). Suena como un tono indicador positivo o una llamada perdida.

En las radios con baterías compatibles con la función de vibración y que están acopladas a un clip para el cinturón con vibración, las opciones de tono de alerta son Silencio, Tono, Vibración y Tono y vibración.

En las radios con baterías no compatibles con la función de vibración y que no están acopladas a un clip para el cinturón con vibración, el tono de alerta se establece automáticamente en Tono.Las opciones disponibles para el tono de alerta son Silencio y Tono.

Realice las siguientes acciones para seleccionar un tono de alerta.

- Pulse el botón programado **Tono de alerta** para acceder al menú Tono de alerta.
  a. Pulse ▲ o ▼ para seleccionar `Tono`, `Vibración`, `Tono y vibración` o `Silencio` y pulse OK para seleccionar.
- Acceda a esta función mediante el menú.
  a. Pulse OK para acceder al menú.
  b. Pulse ▲ o ▼ para acceder a `Utilidades` y pulse OK para seleccionar.
  c. Pulse ▲ o ▼ para acceder a `Configuración de la radio` y pulse OK para seleccionar.

d. Pulse ▲ o ▼ para acceder a Tonos/Alertas y pulse OK para seleccionar.

e. Pulse ▲ o ▼ para acceder a Tono de alerta y pulse OK para seleccionar.

f. Pulse ▲ o ▼ para seleccionar Tono, Vibración, Tono y vibración o Silencio y pulse OK para seleccionar.

5.7.13.7

Configuración del estilo de vibración

NOTA:
El botón **Estilo de vibración** programado se lo asigna su distribuidor o administrador del sistema. Consulte con el distribuidor o administrador del sistema cómo se ha programado la radio.

El estilo de vibración se activa cuando el clip para el cinturón con vibración está conectado a la radio con una batería compatible con la función de vibración.

Realice una de las siguientes acciones para configurar el estilo de vibración.

- Pulse el botón programado **Estilo de vibración** para acceder al menú Estilo de vibración.

  a. Pulse ▲ o ▼ para seleccionar Corta, Media o Larga y pulse OK para seleccionar.

- Acceda a esta función en el menú.

  a. Pulse OK para acceder al menú.

  b. Pulse ▲ o ▼ para acceder a Utilidades y pulse OK para seleccionar.

  c. Pulse ▲ o ▼ para acceder a Configuración de la radio y pulse OK para seleccionar.

  d. Pulse ▲ o ▼ para acceder a Tonos/Alertas y pulse OK para seleccionar.

  e. Pulse ▲ o ▼ para acceder a Estilo de vibración y pulse OK para seleccionar.

f. Pulse ▲ o ▼ para seleccionar `Corta`, `Media` o `Larga` y pulse OK para seleccionar.

5.7.13.8

Aumento del volumen del tono de alarma

La radio puede programarse para que le avise continuamente cada vez que una llamada de radio se quede sin responder. Esto se realiza mediante un aumento automático y progresivo del volumen del tono de alarma. Esta función se conoce como Escalert. Siga el procedimiento para aumentar el volumen del tono de alarma de la radio.

5.7.14

Funciones del registro de llamadas

La radio realiza el seguimiento de todas las llamadas privadas recientes: salientes, respondidas y perdidas. El registro de llamada se utiliza para visualizar y gestionar las llamadas recientes.

Puede que las alertas de llamadas perdidas se incluyan en los registros de llamadas, en función de la configuración del sistema de la radio. Puede realizar las siguientes tareas en cada una de las listas de llamadas:

- Guardar un alias o un ID en los contactos
- Eliminar llamada
- Ver detalles

5.7.14.1

Visualización de llamadas recientes

Siga el procedimiento para ver las llamadas recientes en la radio.

1. Pulse OK para acceder al menú.
2. Pulse ▲ o ▼ para ir a `Registro de llamadas`. Pulse OK para seleccionar.
3. Pulse ▲ o ▼ para ir a la lista de preferidos. Las opciones son `Perdidas`, `Respondidas` y `Salientes`.

Pulse OK para seleccionar.

La pantalla muestra la entrada más reciente.

4 Pulse ▲ o ▼ para ver la lista.

Puede iniciar una llamada privada con el alias o ID que aparece en pantalla en ese momento. Para ello, pulse el botón **PTT**.

5.7.14.2

Almacenamiento de ID o alias desde la lista de llamadas

Siga el procedimiento para almacenar ID o alias en la radio desde la lista de llamadas.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Registro de llamadas`.

Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a la lista que desee. Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir al ID o alias que desee.

Pulse OK para seleccionar.

5 Pulse ▲ o ▼ para ir a `Store` (Guardar). Pulse OK para seleccionar.

La pantalla muestra un cursor intermitente.

6 Introduzca el resto de caracteres del alias que desee. Pulse OK para seleccionar.

Puede almacenar un ID sin alias.

La pantalla muestra un pequeño aviso positivo.

5.7.14.3

Eliminación de llamadas desde la lista de llamadas

Siga el procedimiento para eliminar llamadas de la radio desde la lista de llamadas.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Registro de llamadas`.
Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a la lista que desee. Pulse OK para seleccionar.
Si la lista está vacía:
- Suena un tono.
- La pantalla muestra `Lista vacía`.

4 Pulse ▲ o ▼ para ir al ID o alias que desee.
Pulse OK para seleccionar.

5 Pulse ▲ o ▼ para ir a `¿Borrar entrada?` Pulse OK para seleccionar.

6 Lleve a cabo una de las siguientes acciones:
- Pulse OK para seleccionar `Sí` y borrar la entrada.
  La pantalla muestra `Entrada eliminada`.
- Pulse ▲ o ▼ para seleccionar `No`. Pulse OK para seleccionar.
  La radio vuelve a la pantalla anterior.

5.7.14.4

Visualización de detalles desde la lista de llamadas

Siga el procedimiento para ver los detalles de la lista de llamadas en la radio.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Registro de llamadas`.

Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a la lista que desee. Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir al ID o alias que desee.

Pulse OK para seleccionar.

5 Pulse ▲ o ▼ para ir a `Ver detalles`. Pulse OK para seleccionar.

La pantalla muestra los detalles.

5.7.15

Funcionamiento de las alertas de llamada

Los avisos de alertas de llamada le permiten avisar a un usuario determinado de radio para que vuelva a llamarle cuando pueda.

Esta función solamente se aplica a los alias o ID de suscriptor y se puede acceder a ella a través del menú mediante Contactos o un botón programado de **acceso de marcación rápida**.

En Capacity Max, la función de alerta de llamada permite a un usuario de radio o a un despachador enviar una alerta a otro usuario de radio solicitando que vuelva a llamar a la radio que inicia la comunicación cuando se encuentre disponible. La función no conlleva ninguna comunicación por voz.

El distribuidor o el administrador del sistema pueden configurar el funcionamiento de las alertas de llamada de dos formas:

- La radio se configura para que el usuario pueda pulsar el botón **PTT** para responder directamente a la persona que ha iniciado la llamada mediante la realización de una llamada privada.

- La radio se configura para que el usuario pueda pulsar el botón **PTT** y continuar con otra comunicación con el grupo de conversación. Al pulsar el botón **PTT** en la entrada de alerta de llamada el usuario no podrá responder a la persona que inició la llamada. El usuario debe navegar hasta la opción Registro de llamadas perdidas en el menú Registro de llamadas y responder a la alerta de llamada desde allí.

Una llamada privada de establecimiento de llamada fuera del aire (OACSU) permite al usuario responder de forma inmediata, mientras que una llamada privada de establecimiento de llamadas totalmente fuera del aire (FOACSU) requiere la confirmación del usuario para establecer la llamada. Por tanto, se recomienda utilizar las llamadas de tipo OACSU para la función de alerta de llamada. Consulte Llamada privada en la página 85.

5.7.15.1
Realización de alertas de llamada

Siga el procedimiento para realizar alertas de llamada con la radio.

1 Pulse el botón de **acceso de marcación rápida** programado.

La pantalla muestra `Alerta de llamada` y el ID o alias de suscriptor. El indicador LED verde se ilumina.

2 Espere a que se produzca la confirmación.

Si se recibe la confirmación de la alerta de llamada, la pantalla mostrará un aviso pequeño positivo.

Si no se recibe ninguna confirmación de la alerta de llamada, la pantalla mostrará un aviso pequeño negativo.

5.7.15.2
Realización de alertas de llamada mediante la lista de contactos

Siga el procedimiento para realizar alertas de llamada con la radio mediante la lista de contactos.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a Contactos. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir al ID o alias que desee.Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a Alerta de llamada.

Pulse OK para seleccionar.

La pantalla muestra Alerta de llamada y el ID o alias de suscriptor. El indicador LED verde se ilumina.

5 Espere a que se produzca la confirmación.

- Si se recibe la confirmación de la alerta de llamada, la pantalla mostrará un aviso pequeño positivo.
- Si no se recibe ninguna confirmación de la alerta de llamada, la pantalla mostrará un aviso pequeño negativo.

5.7.15.3

Respuesta a alertas de llamada

Siga el procedimiento para responder a alertas de llamada con la radio.

Cuando se recibe una alerta de llamada:

- Se oye un tono repetitivo.
- El indicador LED parpadea en amarillo.
- La pantalla muestra la lista de notificaciones y aparece una alerta de llamada con el alias o ID de la radio que realiza la llamada.

En función de la configuración de su distribuidor o administrador del sistema, puede responder a una alerta de llamada realizando una de las siguientes opciones:

- Pulse el botón **PTT** para responder con una llamada privada directamente a la persona que llama.
- Pulse el botón **PTT** para continuar la comunicación normal con el grupo de conversación.
  La alerta de llamada se mueve a la opción de llamadas perdidas en el menú Registro de

llamadas. Puede responder al autor de la llamada perdida desde el registro de llamadas perdidas.

Consulte Lista de notificaciones en la página 176 y Funciones del registro de llamadas en la página 131 para obtener más información.

5.7.16

Modo Silenciar

El modo Silenciar ofrece al usuario la opción de silenciar todos los indicadores de audio de la radio.

Cuando se inicia el modo Silenciar, se silencian todos los indicadores de audio de la radio, con excepción de las funciones con mayor prioridad como las operaciones de emergencia.

Cuando se sale del modo Silenciar, la radio vuelve a utilizar tonos y transmisiones de audio.

NOTA:
Se trata de una función adquirible. Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información.

5.7.16.1

Activación del modo Silenciar

Siga el procedimiento para activar el modo Silenciar.

Lleve a cabo una de las siguientes acciones:

- Acceda a esta función a través del botón programable **Modo Silenciar**.
- Acceda a esta función colocando la radio boca abajo momentáneamente.

En función del modelo de radio, la función boca abajo se puede activar desde el menú de la radio o si lo hace el administrador del sistema. Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información.

IMPORTANTE:
Los usuarios no pueden activar la función Man Down o boca abajo a la vez. No es posible tener ambas funciones activas simultáneamente.

NOTA:
La función boca abajo solo se aplica a DP4601e .

Cuando se activa el modo Silenciar ocurre lo siguiente:

- Suena un tono indicador positivo.
- La pantalla muestra `Modo de silenciado activado.`
- La luz LED roja empieza a parpadear y sigue haciéndolo hasta que se sale del modo Silenciar.
- Se muestra el icono del **Modo Silenciar** en la pantalla de inicio.
- La radio está silenciada.
- El temporizador del modo Silenciar comienza la cuenta atrás que tiene configurada.

5.7.16.2

Configuración del temporizador del modo Silenciar

Es posible activar la función modo Silenciar durante un periodo preconfigurado de tiempo mediante la configuración del temporizador del modo Silenciar. La duración del temporizador se configura en el menú de la radio y puede variar de 30 minutos a 6 horas. Cuando el temporizador expira, se sale del modo Silenciar.

Si el temporizador se queda en 0, la radio se queda en el modo Silenciar durante un periodo de tiempo indefinido hasta que la radio se pone boca arriba o se pulsa el botón programado **Modo Silenciar**.

NOTA:
La función boca abajo solo se aplica a DP4601e.

1. Pulse OK para acceder al menú.
2. Pulse ▲ o ▼ para ir a `Herramientas`.Pulse OK para seleccionar.
3. Pulse ▲ o ▼ para ir a `Config. radio`.Pulse OK para seleccionar.
4. Pulse ▲ o ▼ para ir a `Temp. silenc.`. Pulse OK para seleccionar.
5. Pulse ▲ o ▼ para editar el valor numérico de cada dígito y pulse OK.

5.7.16.3

Salida del modo Silenciar

Se puede salir de esta función automáticamente cuando expira el temporizador del modo Silenciar.

Lleve a cabo una de las siguientes operaciones para salir del modo Silenciar manualmente:

- Pulse el botón programado **Modo Silenciar**.
- Pulse el botón **PTT** en cualquier entrada.
- Coloque la radio boca arriba durante un momento.

NOTA:
La función boca abajo solo se aplica a DP4601e.

Cuando se desactiva el modo Silenciar ocurre lo siguiente:

- Suena el tono indicador negativo.
- La pantalla muestra el `Modo de silenciado apagado`.
- El LED que parpadea en rojo se apaga.
- El icono del **modo Silenciar** desaparece de la pantalla de inicio.
- La radio desactiva el silencio y se restaura el estado del altavoz.
- Si el temporizador del modo Silenciar no ha expirado, se detiene.

NOTA:
También se sale del modo Silenciar si el usuario transmite voz o cambia a un canal sin programar.

5.7.17

Funcionamiento de emergencia

Una alarma de emergencia se utiliza para indicar una situación crítica. Es posible iniciar una alarma de emergencia en cualquier momento, incluso cuando haya actividad en el canal actual.

En Capacity Max, la radio receptora solo admite una sola alarma de emergencia a la vez. Si se ha iniciado, una segunda alarma de emergencia anulará la primera alarma.

Cuando se recibe una alarma de emergencia, el receptor puede optar por eliminar la alarma y salir de la lista de alarmas o responder a la alarma de emergencia pulsando el botón **PTT** y transmitiendo el mensaje de voz de no emergencia.

Su distribuidor o administrador del sistema puede establecer la duración de la pulsación del botón **Emergencia** programado, excepto para la pulsación larga, que es similar a la del resto de botones:

Pulsación corta
Duración entre 0,05 y 0,75 segundos.

Pulsación larga
Duración entre 1 y 3,75 segundos.

El botón **Emergencia** se asigna junto con la función Emergencia activada/desactivada. Póngase en contacto con su distribuidor para obtener información acerca del funcionamiento asignado al botón **Emergencia**.

NOTA:
Si la pulsación corta del botón **Emergencia** está asignada a la activación del modo de emergencia, la pulsación larga del botón **Emergencia** se asignará a la salida del modo de emergencia.

Si la pulsación larga del botón **Emergencia** está asignada a la activación del modo de emergencia, la pulsación corta del botón **Emergencia** se asignará a la salida del modo de emergencia.

La radio soporta tres alarmas de emergencia:

- Alarma de emergencia
- Alarma de emergencia con llamada
- Alarma de emergencia con transmisión de voz posterior

Además, todas las alarmas tienen los siguientes tipos:

Normal
La radio transmite una señal de alarma y utiliza un indicador visual o sonoro.

Silencio
La radio transmite una señal de alarma sin utilizar ningún indicador sonoro ni visual. La radio recibe llamadas sin ningún sonido a través del altavoz, hasta que el periodo programado de transmisión con el *micrófono activo* finaliza o se pulsa el botón **PTT**.

Silencio con voz
La radio transmite una señal de alarma sin ningún indicador sonoro ni visual, pero permite que las llamadas entrantes suenen a través del altavoz. Si el *micrófono activo* está activado, las llamadas entrantes sonarán a través del altavoz una vez que el periodo programado de transmisión con el *micrófono activo* haya finalizado. Los indicadores solo aparecen al pulsar el botón **PTT**.

NOTA:
Solo se puede asignar **una** de las alarmas de emergencia anteriores al botón Emergencia programado.

5.7.17.1

Envío de alarmas de emergencia

Esta función permite enviar una alarma de emergencia, una señal sin voz, que activa una indicación de alerta en un grupo de radios. Siga el procedimiento para enviar alarmas de emergencia con la radio.

La radio no muestra ningún indicador sonoro o visual durante el modo de emergencia cuando está configurada en Silencio.

1 Pulse el botón programado **Emergencia activada**.

Verá uno de los siguientes resultados:

- La pantalla muestra `Alarma Tx` y el alias de destino.
- La pantalla muestra `Telegrama Tx` y el alias de destino.

El indicador LED verde se ilumina. Aparece el icono de **emergencia**.

NOTA:
Si se ha programado, suena el tono de búsqueda de emergencia. Este tono se silencia cuando la radio transmite o recibe voz y se detiene cuando la radio sale del modo de emergencia. El distribuidor o administrador del sistema pueden programar el tono de búsqueda de emergencia.

2 Espere a que se produzca la confirmación.

Si es correcta:

- Suena el tono de emergencia.
- El indicador LED verde parpadea.
- La pantalla muestra `Alarma enviada`.

Si no se realiza correctamente tras agotar todos los reintentos:

- Suena un tono.
- La pantalla muestra `Alarma fallida`.

La radio sale del modo de alarma de emergencia y vuelve a la pantalla de inicio.

NOTA:
Cuando se configura la función de solo alarma de emergencia, el proceso de emergencia consta únicamente del envío de la alarma de emergencia. La emergencia finaliza cuando se recibe una confirmación del sistema o cuando se han agotado los intentos de acceso al canal.

Ninguna llamada de voz se asocia al envío de una alarma de emergencia cuando funciona como solo alarma de emergencia.

5.7.17.2

Envío de alarmas de emergencia con llamada

Esta función permite enviar una alarma de emergencia con llamada a un grupo de radios o a un despachador. Tras el reconocimiento de la infraestructura que esté dentro del grupo, un grupo de radios puede comunicarse a través de un canal de emergencia programado.

La radio debe tener configurada la alarma de emergencia y llamada para realizar una llamada de emergencia tras el proceso de alarma.

1 Pulse el botón **Emergen. enc.** programado.

La pantalla muestra `Alarma Tx` y el alias de destino. Aparece el icono de **emergencia**.El indicador LED verde se ilumina.

NOTA:
Si se ha programado, suena el tono de búsqueda de emergencia. Este tono se silencia cuando la radio transmite o recibe voz y se detiene cuando la radio sale del modo de emergencia.

Si se recibe correctamente la confirmación de alarma de emergencia:

- Suena el tono de emergencia.
- El indicador LED verde parpadea.
- La pantalla muestra `Alarma enviada`.
- La radio entra en el modo de llamada de emergencia cuando la pantalla muestra `Emergencia` y el alias del grupo de destino.

Si no se recibe correctamente la confirmación de alarma de emergencia:

- Se han agotado todos los reintentos.
- Suena un tono grave.
- La pantalla muestra `Alarma fallida`.
- La radio sale del modo de alarma de emergencia.

2 Pulse el botón **PTT** para iniciar una transmisión de voz.

El indicador LED verde se ilumina.La pantalla muestra el icono de **llamada a grupo**.

3 Lleve a cabo una de las siguientes acciones:

- Espere hasta que acabe el tono de Permitir hablar (si está activado) y comience a hablar con claridad al micrófono.
- Espere a que finalice el efecto local de **PTT** (si está activado) y hable con claridad al micrófono.

4 Suelte el botón **PTT** para escuchar.

La pantalla muestra los alias de grupo y de autor de llamada.

5 Si la función de indicación de canal libre está activada, oirá un breve tono de alerta en el momento en que la radio transmisora suelte el botón **PTT**, lo que señala que el canal está libre para que el usuario responda. Pulse el botón **PTT** para responder la llamada.

6 Pulse el botón **Emergencia desactivada** programado para salir del modo de emergencia.

La radio volverá a la pantalla de inicio.

NOTA:
Dependerá de la programación de la radio que pueda escuchar o no el tono Permiso para hablar. El distribuidor de la radio o el administrador del sistema podrán proporcionarle más información sobre cómo se ha programado la radio para las emergencias.

La persona que ha iniciado la llamada de emergencia puede pulsar para finalizar una llamada de emergencia en curso. La radio vuelve al estado de llamada inactiva, pero la pantalla de llamada de emergencia permanece abierta.

5.7.17.3

Envío de alarmas de emergencia con transmisión de voz posterior

Esta función permite enviar una alarma de emergencia con transmisión de voz posterior a un grupo de radios. El micrófono de la radio se activa de manera automática y le permite comunicarse con el grupo de radios sin tener que pulsar el botón **PTT**. El estado de micrófono activado también se conoce como *micrófono de emergencia*.

Si la radio tiene el modo de ciclo de emergencias activado, las repeticiones de *micrófono activo* y el periodo de recepción se realizan con una duración programada. Durante el modo de ciclo de emergencias, las llamadas recibidas suenan a través del altavoz.

Si pulsa el botón **PTT** durante el periodo de recepción programado, escuchará un tono de prohibición que indica que debe soltar el botón **PTT**. La radio ignora que se ha pulsado el botón **PTT** y permanece en modo de emergencia.

Si pulsa el botón **PTT** mientras el *micrófono de emergencia* está conectado y lo mantiene pulsado después de que haya terminado esta conexión, la radio seguirá transmitiendo hasta que suelte el botón **PTT**.

si se produce un error en la solicitud de la alarma de emergencia, la radio no intenta enviar de nuevo la solicitud y entra directamente en el estado de *micrófono activo*.

NOTA:
Puede que ciertos accesorios no admitan el *micrófono de emergencia*. Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información.

Siga el procedimiento para enviar alarmas de emergencia mediante voz con la radio.

1 Pulse el botón **Emergen. enc.** programado.

Verá uno de estos resultados:

- La pantalla muestra `Alarma Tx` y el alias de destino.
- La pantalla muestra `Telegrama Tx` y el alias de destino.

El indicador LED verde se ilumina. Aparece el icono de **emergencia**.

2 Cuando la pantalla muestre `Alarma enviada`, hable con claridad al micrófono.

La radio detiene automáticamente la transmisión:

- Cuando el tiempo de duración del ciclo entre el *micrófono de emergencia* y las llamadas recibidas se agota, si el modo de ciclo de emergencia está activado.
- La conexión del *micrófono activo* termina si el modo de ciclo de emergencia está desactivado.

3 Pulse el botón **Emergencia desactivada** programado para salir del modo de emergencia.

La radio volverá a la pantalla de inicio.

5.7.17.4

Recepción de alarmas de emergencia

La radio receptora solo admite una sola alarma de emergencia a la vez. Si se ha iniciado, una segunda alarma de emergencia anulará la primera alarma. Siga el procedimiento para recibir y ver alarmas de emergencia en la radio.

Cuando se recibe una alarma de emergencia:

- Suena un tono.
- El LED rojo parpadea.
- La pantalla muestra la lista de alarmas de emergencia, el ID o alias del grupo de conversación de emergencia, y el ID o alias de la radio transmisora.

1 Pulse OK para ver la alarma.

2 Pulse OK para ver las opciones de acción y los detalles de la entrada en la lista de alarmas.

3 Pulse y seleccione `Sí` para salir de la lista de alarmas.

La radio vuelve a la pantalla de inicio con un **icono de emergencia** que se muestra en la parte superior y que indica que no se ha resuelto la alarma de emergencia. El **icono de emergencia** desaparece cuando se elimina la entrada de la lista de alarmas.

4 Pulse OK para acceder al menú.

5 Seleccione `Lista de alarmas` para volver a ver la lista de alarmas.

5.7.17.5

Respuesta a alarmas de emergencia

Cuando se recibe una alarma de emergencia, el receptor puede optar por eliminar la alarma y salir de la lista de alarmas o responder a la alarma de emergencia pulsando el botón **PTT** y transmitiendo el mensaje de voz de no emergencia. Siga el procedimiento para responder a alertas de emergencia con la radio.

1 Si la indicación de alarma de emergencia está activada, la lista de alarmas de emergencia aparecerá cuando la radio reciba una alarma de emergencia. Pulse ▲ o ▼ para ir al ID o alias que desee.

2 Si la función de indicación de canal libre está activada, oirá un breve tono de alerta en el momento en que la radio transmisora suelte el botón **PTT**, lo que señala que el canal está libre para que el usuario responda. Pulse el botón **PTT** para transmitir el mensaje de voz de no emergencia al mismo grupo al que se envió la alarma de emergencia.

El indicador LED verde se ilumina.

3 Lleve a cabo una de las siguientes acciones:

- Espere hasta que acabe el tono de Permitir hablar (si está activado) y comience a hablar con claridad al micrófono.

- Espere a que finalice el efecto local de **PTT** (si está activado) y hable con claridad al micrófono.

4 Suelte el botón **PTT** para escuchar.

Cuando la radio que inicia la emergencia responde:

- El LED rojo parpadea.
- La pantalla muestra el icono de **llamada de emergencia**, el ID o alias del grupo de conversación de emergencia, y el ID o alias de la radio transmisora.

NOTA:
Si la indicación de llamada de emergencia no está activada, la pantalla muestra el icono de **llamada de grupo**, el ID o alias del grupo de conversación de emergencia, y el ID o alias de la radio transmisora.

5.7.17.6

Respuesta a alarmas de emergencia con llamada

Siga el procedimiento para responder a alarmas de emergencia mediante llamada con la radio.

Cuando se recibe una llamada de emergencia:

- El tono de llamada de emergencia suena si la indicación de llamada de emergencia y el tono de descodificación de llamada de emergencia están activados. El tono de llamada de emergencia no sonará si solo está activada la indicación de llamada emergencia.
- La pantalla muestra el icono de **llamada de emergencia** en la esquina superior derecha.
- La línea de texto muestra el ID o alias del grupo de conversación de emergencia, y el ID o alias de la radio transmisora.
- La radio desactiva el silencio y las llamadas entrantes suenan a través del altavoz.

1 Si la función de indicación de canal libre está activada, oirá un breve tono de alerta en el momento en que la radio transmisora suelte el botón **PTT**, lo que señala que el canal está libre para que el usuario responda. Pulse el botón **PTT** para responder la llamada.

El indicador LED verde se ilumina.

2 Espere hasta que acabe el tono de Permitir hablar (si está activado) y comience a hablar con claridad al micrófono.

3 Suelte el botón **PTT** para escuchar.

Cuando la radio que inicia la emergencia responde:

- El LED rojo parpadea.
- La pantalla muestra el icono de **llamada de emergencia**, el ID o alias del grupo de conversación de emergencia, y el ID o alias de la radio transmisora.

NOTA:
Si la indicación de llamada de emergencia no está activada, la pantalla muestra el icono de **llamada de grupo**, el ID o alias del grupo de conversación de emergencia, y el ID o alias de la radio transmisora.

5.7.18

Mensaje de estado

Esta función permite al usuario enviar mensajes de estado a otras radios.

La lista de estado rápido se configura mediante CPS-RM y contiene un máximo de 99 estados.

La longitud máxima de cada mensaje de estado es de 16 caracteres.

NOTA:
Cada estado cuenta con un valor digital correspondiente que va de 0 a 99. Se puede especificar un alias para cada estado de modo que se pueda acceder a él con facilidad.

5.7.18.1

Envío de mensajes de estado

Siga el procedimiento siguiente para enviar un mensaje de estado.

1 Lleve a cabo una de las siguientes acciones:

- Pulse el botón de **acceso de marcación rápida** programado. Omita los pasos siguientes.
- Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Estado`. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a `Estado rápido`. Pulse OK para seleccionar.

4 Pulse ▲ o ▼ hasta llegar al mensaje de estado que desee. Pulse OK para seleccionar.

5 Pulse ▲ o ▼ para ir al ID o alias de suscriptor o de grupo deseado. Pulse OK para seleccionar.

Si es correcta:

- Suena un tono indicador positivo.
- El indicador LED se apaga.
- La pantalla muestra un aviso pequeño positivo momentáneamente antes de volver a la pantalla `Estado rápido`.
- La pantalla muestra ✓ junto al mensaje de estado enviado.

Si no es correcta:

- Suena un tono indicador negativo.
- El indicador LED se apaga.
- La pantalla muestra un aviso pequeño de fallo momentáneamente antes de volver a la pantalla `Estado rápido`.

5.7.18.2

Envío de un mensaje de estado mediante el botón programable

Siga el procedimiento para enviar un mensaje de estado mediante el botón programable.

1 Pulse el botón programado **Mensaje de estado**.

2 Pulse ▲ o ▼ hasta llegar al mensaje de estado que desee. Pulse OK para seleccionar. Se muestra la lista de contactos.

3 Pulse ▲ o ▼ para ir al ID o alias de suscriptor o de grupo deseado. Pulse OK para seleccionar.

Si es correcta:

- Suena un tono indicador positivo.
- El indicador LED se apaga.
- La pantalla muestra un aviso pequeño positivo momentáneamente antes de volver a la pantalla `Estado rápido`.
- La pantalla muestra ✓ junto al mensaje de estado enviado.

Si no es correcta:

- Suena un tono indicador negativo.
- El indicador LED se apaga.
- La pantalla muestra un aviso pequeño de fallo momentáneamente antes de volver a la pantalla `Estado rápido`.

5.7.18.3

Envío de un mensaje de estado mediante la lista de contactos

Siga el procedimiento para enviar un mensaje de estado mediante la lista de contactos.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Contactos`. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir al ID o alias de suscriptor o de grupo deseado. Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a `Enviar estado`. Pulse OK para seleccionar.

5 Pulse ▲ o ▼ hasta llegar al mensaje de estado que desee. Pulse OK para seleccionar.

Si es correcta:

- Suena un tono indicador positivo.
- El indicador LED se apaga.
- La pantalla muestra un aviso pequeño positivo momentáneamente antes de volver a la pantalla `Estado rápido`.
- La pantalla muestra ✓ junto al mensaje de estado enviado.

Si no es correcta:

- Suena un tono indicador negativo.
- El indicador LED se apaga.
- La pantalla muestra un aviso pequeño de fallo momentáneamente antes de volver a la pantalla `Estado rápido`.

5.7.18.4

Envío de mensajes de estado mediante marcado manual

Siga el procedimiento para enviar un mensaje de estado mediante marcado manual.

1. Pulse OK para acceder al menú.
2. Pulse ▲ o ▼ para ir a `Contactos`. Pulse OK para seleccionar.
3. Pulse ▲ o ▼ para ir a `Marcdo. manual`. Pulse OK para seleccionar.
4. Pulse ▲ o ▼ para ir a `Núm. radio`. Pulse OK para seleccionar.
5. Introduzca el ID o alias de suscriptor o de grupo que desee y pulse OK para continuar.
6. Pulse ▲ o ▼ para ir a `Enviar estado`. Pulse OK para seleccionar.

7 Pulse ▲ o ▼ hasta llegar al mensaje de estado que desee. Pulse OK para seleccionar.

Si es correcta:

- Suena un tono indicador positivo.
- El indicador LED se apaga.
- La pantalla muestra un aviso pequeño positivo momentáneamente antes de volver a la pantalla `Estado rápido`.
- La pantalla muestra ✓ junto al mensaje de estado enviado.

Si no es correcta:

- Suena un tono indicador negativo.
- El indicador LED se apaga.
- La pantalla muestra un aviso pequeño de fallo momentáneamente antes de volver a la pantalla `Estado rápido`.

5.7.18.5

Visualización de mensajes de estado del usuario

Siga el procedimiento para ver mensajes de estado.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Estado`. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a `Buzón`. Pulse OK para seleccionar.

4 Pulse ▲ o ▼ hasta llegar al mensaje de estado que desee. Pulse OK para seleccionar.

El usuario de la radio puede ver el contenido del mensaje de estado.

También es posible ver los mensajes de estado recibidos si se accede a la lista de notificaciones. Consulte Lista de

notificaciones en la página 176 para obtener más información.

5.7.18.6

Respuesta a mensajes de estado

Siga el procedimiento para responder a mensajes de estado.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a Estado. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a Buzón. Pulse OK para seleccionar.

4 Pulse ▲ o ▼ hasta llegar al mensaje de estado que desee. Pulse OK para seleccionar.

5 Se muestra el contenido del estado. Pulse OK para seleccionar.

6 Pulse ▲ o ▼ para ir a Responder. Pulse OK para seleccionar.

7 Pulse ▲ o ▼ hasta llegar al mensaje de estado que desee. Pulse OK para seleccionar.

Si es correcta:

- Suena un tono indicador positivo.
- El indicador LED se apaga.
- La pantalla muestra un aviso pequeño positivo antes de volver a la pantalla Buzón.
- La pantalla muestra ✓ junto al mensaje de estado enviado.

Si no es correcta:

- Suena un tono indicador negativo.
- El indicador LED se apaga.

- La pantalla muestra un aviso de error momentáneamente antes de volver a la pantalla Buzón.

5.7.18.7

Eliminación de un mensaje de estado

Siga el procedimiento para eliminar un mensaje de estado de la radio.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a Estado. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a Buzón. Pulse OK para seleccionar.

4 Pulse ▲ o ▼ hasta llegar al mensaje de estado que desee. Pulse OK para seleccionar.

5 Se muestra el contenido del estado. Pulse OK para seleccionar.

6 Pulse ▲ o ▼ para ir a Eliminar. Pulse OK para seleccionar.

7 Pulse ▲ o ▼ para elegir Sí. Pulse OK para seleccionar.

- La pantalla muestra un aviso pequeño positivo antes de volver a la pantalla Buzón.

5.7.18.8

Eliminación de todos los mensajes de estado

Siga el procedimiento para eliminar todos los mensajes de estados desde la radio.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Estado`. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a `Buzón`. Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a `Eliminar todo`. Pulse OK para seleccionar.

5 Pulse ▲ o ▼ para elegir `Sí`. Pulse OK para seleccionar.

- La pantalla muestra `Lista vacía`.

5.7.19

Mensajes de texto

La radio puede recibir datos como, por ejemplo, un mensaje de texto, de otra radio o una aplicación de mensajes de texto.

Existen dos tipos de mensajes de texto: mensajes de texto y mensajes de texto breves DMR (Radio móvil digital). La longitud máxima de un mensaje de texto breve DMR es de 23 caracteres. La longitud máxima de un mensaje de texto es de 280 caracteres, incluida la línea de asunto. La línea de asunto solo aparece al recibir mensajes desde las aplicaciones de correo electrónico.

NOTA:
La longitud máxima de caracteres se aplica solo a los modelos con la última versión de software y hardware. Para modelos de radio con software y hardware más antiguo, la longitud máxima de un mensaje de texto es de 140 caracteres. Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información.

Para el árabe, la orientación de la entrada de texto es de derecha a izquierda.

5.7.19.1

Mensajes de texto

Los mensajes de texto se guardan en un buzón y se ordenan según el mensaje recibido más recientemente.

La radio sale de la pantalla actual cuando el temporizador de inactividad se agota. mantenga pulsado , en cualquier momento, para volver a la pantalla de inicio.

5.7.19.1.1

Visualización de los mensajes de texto

Siga el procedimiento para ver los mensajes de texto en la radio.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Mensajes`. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a `Buzón`. Pulse OK para seleccionar.

Si el buzón está vacío:

- La pantalla muestra `Lista vacía`.
- Si el tono de teclado está activado, sonará un tono.

4 Pulse ▲ o ▼ para ir al mensaje que desee. Pulse OK para seleccionar.

Si el mensaje procede de una aplicación de correo electrónico, en la pantalla aparecerá una línea de asunto.

5.7.19.1.2

Visualización de mensajes de texto de estado de telemetría

Siga el procedimiento para ver un mensaje de texto de estado de telemetría desde el buzón de entrada.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Mensajes`. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a `Buzón`. Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir al mensaje que desee. Pulse OK para seleccionar.

No puede responder a un mensaje de texto de estado de telemetría.

La pantalla muestra `Telemetría:. <Mensaje de texto de estado>`.

5 Mantenga pulsado para volver a la pantalla de inicio.

5.7.19.1.3

Visualización de mensajes de texto guardados

Siga el procedimiento para ver los mensajes de texto guardados en la radio.

1 Lleve a cabo una de las siguientes acciones:

- Pulse el botón **Mensaje txt** programado. Continúe con el paso paso 3.
- Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Mensajes`. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a `Borradores`. Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir al mensaje que desee. Pulse OK para seleccionar.

5.7.19.1.4

Respuesta a mensajes de texto

Siga el procedimiento para responder a mensajes de texto con la radio.

Al recibir un mensaje de texto:

- La pantalla muestra la lista de notificaciones con el alias o ID del remitente.
- La pantalla muestra el icono de **mensaje**.

NOTA:
La radio sale de la pantalla de alerta de mensaje de texto y realiza una llamada privada o de grupo al remitente del mensaje si se pulsa el botón **PTT**.

1 Lleve a cabo una de las siguientes acciones:

- Pulse ▲ o ▼ para ir a `Leer`. Pulse OK para seleccionar.
  La pantalla muestra el mensaje de texto. Si el mensaje procede de una aplicación de correo electrónico, en la pantalla aparecerá una línea de asunto.
- Pulse ▲ o ▼ para ir a `Leer luego`. Pulse OK para seleccionar.
  La radio vuelve a la pantalla en la que se encontraba antes de recibir el mensaje de texto.
- Pulse ▲ o ▼ para ir a `Eliminar`. Pulse OK para seleccionar.

2 Pulse para volver a la bandeja de entrada.

5.7.19.1.5

Respuesta a mensajes de texto con mensajes de texto rápido

1 Lleve a cabo una de las siguientes acciones:

- Pulse el botón **Mensaje txt** programado. Continúe en el paso 3.
- Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Mensajes`. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a `Buzón`. Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir al mensaje que desee. Pulse OK para seleccionar.

Si el mensaje procede de una aplicación de correo electrónico, en la pantalla aparecerá una línea de asunto.

5 Pulse OK para acceder al submenú.

6 Lleve a cabo una de las siguientes acciones:

- Pulse ▲ o ▼ para ir a `Responder`. Pulse OK para seleccionar.
- Pulse ▲ o ▼ para ir a `Resp. ráp.` Pulse OK para seleccionar.

Aparece un cursor intermitente. Puede escribir o editar el mensaje, si es necesario.

7 Pulse OK cuando termine de redactar el mensaje.

La pantalla muestra un aviso pequeño de transición, que confirma que se está enviando el mensaje.

8 Espere a que se produzca la confirmación.

Si es correcta:

- Suena un tono.
- La pantalla muestra un pequeño aviso positivo.

Si no es correcta:

- Suena un tono.
- La pantalla muestra un aviso pequeño negativo.
- La radio vuelve a la pantalla de la opción `Reenviar`.

5.7.19.1.6

Transferencia de mensajes de texto

Siga el procedimiento para transferir mensajes de texto con la radio.

En la pantalla de la opción `Reenviar`:

1 Pulse ▲ o ▼ para ir a `Transferir` y, a continuación, pulse OK para enviar el mismo mensaje a otro suscriptor, o ID o alias de grupo.

2 Pulse ▲ o ▼ para ir al ID o alias que desee.

Pulse OK para seleccionar.

La pantalla muestra un aviso pequeño de transición, que confirma que se está enviando el mensaje.

3 Espere a que se produzca la confirmación.

Si es correcta:

- Suena un tono.
- La pantalla muestra un pequeño aviso positivo.

Si no es correcta:

- Suena un tono.
- La pantalla muestra un aviso pequeño negativo.

5.7.19.1.7

Reenvío de mensajes de texto

Siga el procedimiento para reenviar mensajes de texto con la radio.

En la pantalla de la opción `Volver a enviar`:

Pulse OK para volver a enviar el mismo mensaje al mismo alias o ID de grupo o suscriptor.

Si es correcta:

- Suena un tono indicador positivo.
- La pantalla muestra un pequeño aviso positivo.

Si no es correcta:

- Suena un tono indicador negativo.
- La pantalla muestra un aviso pequeño negativo.
- La radio vuelve a la pantalla de la opción `Volver a enviar`.

5.7.19.1.8

Eliminación de todos los mensajes de texto desde el buzón

Siga el procedimiento para eliminar todos los mensajes de texto desde el buzón de la radio.

1 Lleve a cabo una de las siguientes acciones:
- Pulse el botón **Mensaje txt** programado. Continúe con el paso paso 3.
- Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Mensajes`. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a `Buzón`. Pulse OK para seleccionar.

Si el buzón está vacío:
- La pantalla muestra `Lista vacía`.
- Suena un tono.

4 Pulse ▲ o ▼ para ir a `Eliminar todo`. Pulse OK para seleccionar.

5 Pulse ▲ o ▼ para elegir `Sí`. Pulse OK para seleccionar.

La pantalla muestra un pequeño aviso positivo.

5.7.19.1.9

Eliminación de mensajes de texto guardados desde la carpeta Borrador

Siga el procedimiento para eliminar los mensajes de texto guardados del borrador de la radio.

1 Lleve a cabo una de las siguientes acciones:
- Pulse el botón **Mensaje txt** programado. Continúe con el paso paso 3.
- Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a Mensajes. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a Borradores. Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir al mensaje que desee. Pulse OK para seleccionar.

5 Pulse ▲ o ▼ para ir a Eliminar. Pulse OK para eliminar el mensaje de texto.

5.7.19.2

Envío de mensajes de texto

Cuando se envía un mensaje a otra radio, este se guarda en la carpeta Enviados. El último mensaje de texto enviado siempre se añade al principio de la carpeta Enviados. Puede enviar, transmitir o eliminar un mensaje de texto enviado.

La carpeta Enviados es capaz de almacenar los 30 últimos mensajes enviados como máximo. Cuando esté llena, el siguiente mensaje de texto que se envíe sustituirá automáticamente al mensaje de texto más antiguo de la carpeta.

Si sale de la pantalla de envío de mensajes mientras se envía el mensaje, la radio actualiza el estado del mensaje en la carpeta Enviados sin realizar ninguna indicación en la pantalla ni mediante un sonido.

Si la radio cambia de modo o se apaga antes de que se actualice el estado del mensaje en la carpeta Enviados, la radio no puede terminar de enviar los mensajes en curso y los marca automáticamente con un icono de **error de envío**.

La radio admite un máximo de cinco mensajes en curso al mismo tiempo. En este tiempo, la radio no puede enviar mensajes nuevos y los marca automáticamente con un icono de **error de envío**.

Si mantiene pulsado ↩ en cualquier momento, la radio volverá a la pantalla de inicio.

NOTA:
Si el tipo de canal (por ejemplo, un canal digital convencional o Capacity Plus) no coincide, solo podrá editar, transferir o borrar un mensaje enviado.

5.7.19.2.1

Visualización de mensajes de texto enviados

Siga el procedimiento para ver los mensajes de texto enviados en la radio.

1 Lleve a cabo una de las siguientes acciones:
- Pulse el botón **Mensaje txt** programado. Continúe con el paso paso 3.
- Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Mensajes`. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a `Enviados`. Pulse OK para seleccionar.

Si la carpeta Enviados está vacía:
- La pantalla muestra `Lista vacía`.
- Si el tono de teclado está activado, sonará un tono bajo.

4 Pulse ▲ o ▼ para ir al mensaje que desee. Pulse OK para seleccionar.

Si el mensaje procede de una aplicación de correo electrónico, en la pantalla aparecerá una línea de asunto.

5.7.19.2.2

Envío de mensajes de texto enviados

Siga el procedimiento para enviar mensajes de texto enviados con la radio.

Si está viendo un mensaje enviado:

1 Pulse OK .

2 Pulse ▲ o ▼ para ir a `Reenviar`. Pulse OK para seleccionar.

La pantalla muestra un aviso pequeño de transición, que confirma que se está enviando el mensaje.

3 Espere a que se produzca la confirmación.

Si es correcta:

- Suena un tono.
- La pantalla muestra un pequeño aviso positivo.

Si no es correcta:

- Suena un tono.
- La pantalla muestra un aviso pequeño negativo.
- La radio accede a la pantalla de la opción `Reenviar`. Consulte Reenvío de mensajes de texto en la página 160 para obtener más información.

5.7.19.2.3

Eliminación de todos los mensajes de texto enviados desde la carpeta Enviados

Siga el procedimiento para eliminar todos los mensajes de texto enviados de la radio desde la carpeta Enviados.

1 Lleve a cabo una de las siguientes acciones:

- Pulse el botón **Mensaje txt** programado. Continúe con el paso paso 3.
- Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Mensajes`. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a `Enviados`. Pulse OK para seleccionar.

Si la carpeta Enviados está vacía:

- La pantalla muestra `Lista vacía`.
- Suena un tono.

4 Pulse ▲ o ▼ para ir a `Eliminar todo`. Pulse OK para seleccionar.

5 Lleve a cabo una de las siguientes acciones:

- Pulse ▲ o ▼ para elegir `Sí`. Pulse OK para seleccionar.
  La pantalla muestra un pequeño aviso positivo.
- Pulse ▲ o ▼ para seleccionar `No`. Pulse OK para seleccionar.
  La radio vuelve a la pantalla anterior.

5.7.19.3

Mensajes de texto rápidos

5.7.19.3.1

Envío de mensajes de texto rápidos

Siga el procedimiento para enviar mensajes de texto rápidos predefinidos de la radio a alias predefinidos.

1 Pulse el botón de **acceso de marcación rápida** programado.

La pantalla muestra un aviso pequeño de transición, que confirma que se está enviando el mensaje.

2 Espere a que se produzca la confirmación.

Si es correcta:

- Suena un tono indicador positivo.
- La pantalla muestra un pequeño aviso positivo.

Si no es correcta:

- Suena un tono indicador negativo.
- La pantalla muestra un aviso pequeño negativo.
- La radio accede a la pantalla de la opción `Reenviar`. Consulte Reenvío de mensajes de texto en la página 160 para obtener más información.

5.7.20

Privacidad

Esta función ayuda a evitar que los usuarios no autorizados escuchen conversaciones en un canal mediante el uso de una solución de cifrado basada en software. Las partes de señalización e identificación de usuario de una transmisión no se mezclan.

La radio debe tener la privacidad habilitada en el canal para enviar una transmisión con la privacidad habilitada, aunque no es un requisito necesario para recibir una transmisión. Mientras se encuentra en un canal con la privacidad habilitada, la radio puede recibir transmisiones claras o descodificadas.

La radio es compatible con la privacidad mejorada.

Para descodificar una llamada o transmisión de datos que tiene la privacidad activada, la radio debe estar programada para tener el mismo valor de clave e ID de clave para la privacidad que la radio transmisora.

Si la radio recibe una llamada codificada que tenga un valor de clave e ID de clave distintos, no oirá nada en absoluto (privacidad mejorada).

En un canal con la privacidad activada, la radio puede recibir llamadas claras o descodificadas, en función de cómo se haya programado. Además, puede reproducir un tono de aviso o no, en función de cómo se haya programado.

NOTA:
Esta función no se aplica a canales de Banda Ciudadana que estén en la misma frecuencia.

El indicador LED se ilumina en color verde cuando la radio transmite y parpadea rápidamente cuando recibe una transmisión con la función de privacidad activada.

NOTA:
Es posible que algunos modelos de radio no ofrezcan esta función de privacidad o la configuración sea diferente. Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información.

5.7.20.1

Activación o desactivación de la privacidad

Siga el procedimiento para activar o desactivar la privacidad en la radio.

1 Lleve a cabo una de las siguientes acciones:

- Pulse el botón **Privacidad** programado. Omita los pasos que se indican a continuación.
- Pulse OK para acceder al menú.

2 Pulse OK para seleccionar.

3 Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a `Privacidad`. Pulse OK para seleccionar.

5 Lleve a cabo una de las siguientes acciones:

- Pulse ▲ o ▼ para ir a `Encendido`. Pulse OK para seleccionar. La pantalla muestra ✓ junto a `Enc.`
- Pulse ▲ o ▼ para ir a `Apagado`. Pulse OK para seleccionar. La pantalla muestra ✓ junto a `Apagado`.

5.7.21

Inhibic. respuesta

Esta función ayuda a prevenir que la radio responda a cualquier transmisión entrante.

NOTA:
Se trata de una función adquirible. Consulte con el distribuidor o administrador del sistema cómo se ha programado la radio.

Si se activa, la radio no genera ninguna transmisión saliente en respuesta a transmisiones entrantes, tales como Verificación de radio, Alerta de llamada, Desactivación de radio, Monitorización remota, Servicio de registro automático (ARS), Respuesta a mensajes privados y envío de informes de ubicación GNSS. La radio no puede recibir llamadas privadas confirmadas cuando se activa esta función. Sin embargo, la radio puede enviar transmisiones manualmente.

5.7.21.1

Activación/desactivación de la inhibición de respuesta

Siga el procedimiento para activar o desactivar la inhibición de respuesta en la radio.

Pulse el botón de **Inhib. resp.** programado.

Si es correcta:

- Suena un tono indicador positivo.
- La pantalla muestra un aviso pequeño positivo momentáneamente.

Si no es correcta:

- Suena un tono indicador negativo.
- La pantalla muestra un aviso pequeño negativo momentáneamente.

5.7.22

Desactivar/reactivar

Esta función puede habilitar o deshabilitar cualquier radio del sistema. Por ejemplo, puede que el distribuidor o administrador del sistema quiera deshabilitar una radio robada para evitar que una persona no autorizada la utilice y luego activarla cuando la recupere.

Es posible desactivar o activar una radio mediante la consola o un comando iniciado por otra radio.

Cuando se desactiva una radio, esta emitirá un tono indicador negativo y la pantalla de inicio muestra `Canal denegado`.

Cuando la radio está bloqueada, no puede solicitar ni recibir ningún servicio de iniciativa del usuario en el sistema donde se está realizando el procedimiento Bloquear. Sin embargo, la radio puede cambiar a otro sistema. La radio continua enviando informes de ubicación de GNSS y puede controlarse de forma remota cuando está bloqueada.

NOTA:
Puede que el distribuidor o administrador del sistema quiera desactivar una radio de forma permanente. Consulte Anulación de la radio en la página 172 para obtener más información.

5.7.22.1

Desactivación de una radio

Siga el procedimiento para desactivar una radio.

1 Pulse el botón **Deshab. radio** programado.

2 Pulse ▲ o ▼ para ir al ID o alias que desee.Pulse OK para seleccionar.

La pantalla muestra `Deshab. radio: <Alias o ID de suscriptor>`.El indicador LED verde parpadea.

3 Espere a que se produzca la confirmación.

Si es correcta:

- Suena un tono indicador positivo.
- La pantalla muestra un pequeño aviso positivo.

Si no es correcta:

- Suena un tono indicador negativo.
- La pantalla muestra un aviso pequeño negativo.

5.7.22.2

Desactivación de una radio mediante la lista de contactos

Siga el procedimiento para desactivar una radio mediante la lista de contactos.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Contactos`.Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir al ID o alias que desee.Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a `Desactivación radio`.

Pulse OK para seleccionar.

La pantalla muestra `Desactivación radio: <<ID o alias del suscriptor>`. El indicador LED verde parpadea.

5 Espere a que se produzca la confirmación.

Si es correcta:

- Suena un tono indicador positivo.
- La pantalla muestra un pequeño aviso positivo.

Si no es correcta:

- Suena un tono indicador negativo.
- La pantalla muestra un aviso pequeño negativo.

5.7.22.3

Desactivación de una radio mediante marcación manual

Siga el procedimiento para desactivar una radio mediante marcación manual.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a Contactos.Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a Marcdo. manual. Pulse OK para seleccionar.

4 Introduzca el ID de suscriptor y pulse OK para continuar.

5 Pulse ▲ o ▼ para ir a Deshab. radio. Pulse OK para seleccionar.

La pantalla muestra un pequeño aviso de transición que indica que la solicitud está en curso. El indicador LED verde parpadea.

6 Espere a que se produzca la confirmación.

Si es correcta:

- Suena un tono indicador positivo.
- La pantalla muestra un pequeño aviso positivo.

Si no es correcta:

- Suena un tono indicador negativo.
- La pantalla muestra un aviso pequeño negativo.

5.7.22.4

Activación de una radio

Siga el procedimiento para activar una radio.

1 Pulse el botón **Habilitar radio** programado.

2 Pulse ▲ o ▼ para ir al ID o alias que desee.Pulse OK para seleccionar.

La pantalla muestra `Habilitar radio: <Alias o ID de suscriptor>`.El indicador LED verde se ilumina.

3 Espere a que se produzca la confirmación.

Si es correcta:

- Suena un tono indicador positivo.
- La pantalla muestra un pequeño aviso positivo.

Si no es correcta:

- Suena un tono indicador negativo.
- La pantalla muestra un aviso pequeño negativo.

5.7.22.5

Activación de una radio mediante la lista de contactos

Siga el procedimiento para activar una radio mediante la lista de contactos.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Contactos`.Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir al ID o alias que desee.Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a `Habilitar radio`. Pulse OK para seleccionar.

La pantalla muestra `Habilitar radio: <Alias o ID de suscriptor>`.El indicador LED verde se ilumina.

5 Espere a que se produzca la confirmación.

Si es correcta:

- Suena un tono indicador positivo.
- La pantalla muestra un pequeño aviso positivo.

Si no es correcta:

- Suena un tono indicador negativo.
- La pantalla muestra un aviso pequeño negativo.

5.7.22.6

Activación de una radio mediante marcación manual

Siga el procedimiento para activar una radio mediante marcación manual.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Contactos`.Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a `Marcdo. manual`. Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a `Llamada privada`. Pulse OK para seleccionar.

La primera línea de texto muestra `Núm. radio:`.

5 Introduzca el ID de suscriptor y pulse OK para continuar.

6 Pulse ▲ o ▼ para ir a `Habilitar radio`. Pulse OK para seleccionar.

El indicador LED verde se ilumina.

5.7.23

Anulación de la radio

Esta función es una medida de seguridad mejorada que restringe el acceso no autorizado a la radio.

Anulación de la radio hace que la radio deje de funcionar. Por ejemplo, el distribuidor o el administrador del sistema querría desactivar una radio robada o extraviada para evitar un uso no autorizado.

Cuando se enciende, una radio desactivada muestra momentáneamente `Radio desactivado` en la pantalla para indicar el estado de desactivación.

NOTA:
Solo se puede volver a activar una radio anulada en un depósito de servicio de Motorola Solutions. Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información.

5.7.24

Operario aislado

Esta función solicita que se envíe un mensaje de emergencia si no hay actividad del usuario durante un periodo de tiempo predefinido, como cualquier pulsación de un botón de la radio o activación del selector de canales.

Tras un periodo programado de tiempo de inactividad por parte del usuario, la radio avisa de antemano mediante un indicador de audio cuando el temporizador de inactividad se agota.

Si el usuario todavía no ha confirmado la recepción antes de que finalice el recordatorio predefinido del temporizador, la radio iniciará una condición de emergencia en función de cómo la haya configurado el distribuidor o el administrador del sistema.

Consulte Funcionamiento de emergencia en la página 139 para obtener más información.

NOTA:
Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información.

5.7.25

Funciones de bloqueo por contraseña

Esta función le permite restringir el acceso a la radio al solicitar una contraseña cuando el dispositivo está activado.

5.7.25.1

Acceso a las radios mediante el uso de contraseñas

Siga el procedimiento para acceder a la radio mediante el uso de una contraseña.

1 Introduzca la contraseña de cuatro dígitos actual.

- Pulse ▲ o ▼ para editar el valor numérico de cada dígito y, a continuación, pulse OK para acceder y avanzar hasta el siguiente dígito.

2 Pulse OK para introducir la contraseña.

Si es correcta, se encenderá la radio.
Si no es correcta:

- Tras el primer y segundo intento, la pantalla mostrará `Contraseña incorr.` Repita paso 1.
- Tras el tercer intento, en la pantalla aparecerá `Contraseña incorr.` y, a continuación, `Radio bloqueada`. Suena un tono. El indicador LED parpadeará dos veces en amarillo. La radio entrará en estado de bloqueo durante 15 minutos.

NOTA:
En estado bloqueado, la radio solo responde a las entradas del **botón de volumen/ encendido/apagado** y del botón **Luz fondo**.

5.7.25.2

Activación o desactivación del bloqueo por contraseña

Siga el procedimiento para activar o desactivar el bloqueo por contraseña en la radio.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Herramientas`. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a `Config. radio`. Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a `Bloq. contras.` Pulse OK para seleccionar.

5 Introduzca la contraseña de cuatro dígitos actual.

- Utilice un micrófono con teclado.

- Pulse ▲ o ▼ para editar el valor numérico de cada dígito y, a continuación, pulse OK para acceder y avanzar hasta el siguiente dígito.
  Se oirá un tono indicador positivo cada vez que se introduce un dígito.

6 Pulse OK para introducir la contraseña.

Si la contraseña es incorrecta, la pantalla mostrará `Contraseña incorr.` y volverá automáticamente al menú anterior.

7 Lleve a cabo una de las siguientes acciones:

- Pulse ▲ o ▼ para ir a `Activar`. Pulse OK para seleccionar.
  La pantalla muestra ✓ junto a `Activar`.
- Pulse ▲ o ▼ para ir a `Desactivar`. Pulse OK para seleccionar.
  La pantalla muestra ✓ junto a `Desactivar`.

5.7.25.3

Desbloqueo de radios en estado de bloqueo

En estado bloqueado, la radio no puede recibir ninguna llamada. Siga el procedimiento para desbloquear la radio en estado bloqueado.

Lleve a cabo una de las siguientes acciones:

- Si la radio está encendida, espere 15 minutos y, a continuación, repita los pasos de la sección Acceso a las radios mediante el uso de contraseñas en la página 173 para acceder a la radio.
- Si la radio está apagada, enciéndala. La radio reinicia el temporizador de 15 minutos del estado bloqueado. Suena un tono. El indicador LED parpadeará dos veces en amarillo. La pantalla muestra `Radio bloqueada`.

  Espere 15 minutos y, a continuación, repita los pasos de la sección Acceso a las radios mediante el uso de contraseñas en la página 173 para acceder a la radio.

5.7.25.4

Cambio de contraseñas

Siga el procedimiento para cambiar las contraseñas de la radio.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Herramientas`. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a `Config. radio`. Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a `Bloq. contras`. Pulse OK para seleccionar.

5 Introduzca la contraseña de cuatro dígitos actual y pulse OK para continuar.

Si la contraseña es incorrecta, la pantalla mostrará `Contraseña incorr.` y volverá automáticamente al menú anterior.

6 Pulse ▲ o ▼ para ir a `Camb. contras`. Pulse OK para seleccionar.

7 Introduzca una contraseña de cuatro dígitos nueva y pulse OK para continuar.

8 Vuelva a introducir la nueva contraseña de cuatro dígitos y pulse OK para continuar.

Si el cambio se realiza correctamente, en la pantalla aparecerá el mensaje `Contraseña cambiada`.
Si el cambio no se realiza correctamente, en la pantalla aparecerá el mensaje `Contraseñas no coinciden`.

La pantalla vuelve automáticamente al menú anterior.

5.7.26

Lista de notificaciones

La radio dispone de una lista de notificaciones que incluye todos los eventos sin leer del canal, como por ejemplo, mensajes de texto sin leer, mensajes de telemetría, llamadas perdidas y alertas de llamadas.

La pantalla muestra el icono de **notificación** si la lista de notificaciones tiene uno o más eventos.

La lista admite un máximo de 40 eventos sin leer. Cuando la lista está completa, el siguiente evento reemplaza automáticamente al evento más antiguo. Una vez leídos los eventos, se eliminan de la lista de notificaciones.

Para mensajes de texto, eventos de llamada y alerta de llamada perdida, el número máximo son 30 mensajes de texto y 10 llamadas o alertas de llamadas perdidas. El número máximo depende de la capacidad de la lista de funciones individual (fichas de trabajo, mensajes de texto o llamadas o alertas de llamadas perdidas).

5.7.26.1

Acceso a la lista de notificaciones

Siga el procedimiento para acceder a la lista de notificaciones de la radio.

1 Lleve a cabo una de las siguientes acciones:
   - Pulse el botón **Notificación** programado. Omita los pasos que se indican a continuación.
   - Pulse OK para acceder al menú.

2 Pulse OK para acceder al menú.

3 Pulse ▲ o ▼ para ir a `Notificación`. Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para seleccionar el evento que desee. Pulse OK para seleccionar.

   Pulse de forma prolongada para volver a la pantalla de inicio.

5.7.27

Programación a través del interfaz aire

El distribuidor puede actualizar la radio de forma remota mediante la programación inalámbrica (OTAP) sin ninguna conexión física. Además, algunos ajustes también se pueden configurar con OTAP.

Cuando la radio ejecuta OTAP, el LED verde parpadea.

Cuando la radio recibe datos de gran volumen:

- La pantalla muestra el icono de **datos de gran volumen**.

- El canal está ocupado.
- Suena un tono negativo si se pulsa el **PTT**.

Cuando OTAP finaliza, según la configuración:

- Suena un tono. La pantalla muestra `Actualizando Reiniciando`. La radio se reinicia apagándose y encendiéndose de nuevo.
- Puede seleccionar `Reiniciar ahora` o `Posponer`. Si selecciona `Posponer`, la radio vuelve a la pantalla anterior. La pantalla muestra el icono de **temporizador de retardo OTAP** hasta que se produzca el reinicio automático.

Cuando la radio se enciende tras el reinicio automático:

- Si se realiza correctamente, la pantalla muestra `Actual. soft. completada`.
- Si no se realiza correctamente, la pantalla muestra `Actual. soft. fallida`.

Consulte Verificación de la información sobre actualización de software en la página 208 para la versión actualizada del software.

5.7.28

Indicador de intensidad de la señal recibida

Esta función permite ver los valores del indicador de intensidad de la señal recibida (RSSI).

La pantalla muestra el icono de **RSSI** en la esquina superior derecha. Consulte Iconos de pantalla para obtener más información sobre el icono de **RSSI**.

5.7.28.1

Visualización de valores de RSSI

Siga el procedimiento para ver los valores de RSSI en la radio.

Cuando se encuentre en la pantalla de inicio:

1. Pulse ◀ tres veces y pulse inmediatamente ▶, todo ello en cinco segundos.

   La pantalla muestra los valores de RSSI actuales.

2. Pulse de forma prolongada ⮌ para volver a la pantalla de inicio.

5.7.29

Programación del panel frontal

Puede personalizar determinados parámetros de función en Programación del panel frontal (FPP) para mejorar el uso de la radio.

Utilice los siguientes botones según sea necesario mientras navega por los parámetros de función.

Botón de navegación arriba/abajo

Pulse para desplazarse por las opciones en posición horizontal o vertical, o para aumentar o reducir los valores.

Botón de Menú/OK

Pulse para seleccione la opción o entrar a un submenú.

Botón para volver e ir al inicio

Pulse brevemente para volver al menú anterior o para salir de la pantalla de selección.

Mantenga pulsado en cualquier momento para volver a la pantalla de inicio.

5.7.29.1

Acceso al modo Programación del panel frontal

Siga el procedimiento para entrar al modo de programación del panel frontal en la radio.

1. Pulse OK para acceder al menú.
2. Pulse ▲ o ▼ para ir a `Herramientas`.Pulse OK para seleccionar.
3. Pulse ▲ o ▼ para ir a `Programar radio`. Pulse OK para seleccionar.

5.7.29.2

Edición de los parámetros del modo FPP

Utilice los siguientes botones según sea necesario mientras navega por los parámetros de función.

- ▲ , ▼ : desplácese por las opciones, aumente o disminuya valores, o navegue verticalmente.

- : seleccione la opción o acceda a un submenú.
- : pulse brevemente para volver al menú anterior o para salir de la pantalla de selección. Manténgalo pulsado para volver a la pantalla de inicio.

5.7.30

Funcionamiento de Wi-Fi

Wi-Fi® es una marca comercial registrada de Wi-Fi Alliance®.

NOTA:
Esta función solo se aplica a DP4601e only.

Esta función le permite configurar y conectarse a una red Wi-Fi. Wi-Fi es compatible con las actualizaciones de firmware de la radio, el Codeplug y recursos, como paquetes de idiomas o de anuncio de voz.

5.7.30.1

Activación o desactivación del Wi-Fi

El botón **Activar o desactivar Wi-Fi** programado se lo asigna su distribuidor o administrador del sistema.

Consulte con el distribuidor o administrador del sistema cómo se ha programado la radio.

Los anuncios de voz para el botón programado **Activar o desactivar Wi-Fi** se pueden personalizar mediante CPS en función de los requisitos del usuario. Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información.

Realice una de las siguientes acciones para activar o desactivar el Wi-Fi.

- Pulse el botón programado **Activar o desactivar Wi-Fi**. El anuncio de voz emite un sonido de activación o desactivación del Wi-Fi.
- Acceda a esta función en el menú.

  a. Pulse para acceder al menú.

  b. Pulse o para acceder a `Wi-Fi` y pulse para seleccionar.

  c. Pulse o para acceder a `Wi-Fi activ.` y pulse para seleccionar.

Pulse OK para activar el Wi-Fi. La pantalla muestra ✓ junto a Activado.

Pulse OK para apagar el Wi-Fi. Desaparece ✓ junto a Habilitado.

5.7.30.2

Conexión a un punto de acceso a la red

Cuando activa el Wi-Fi, la radio busca y se conecta a un punto de acceso a la red.

También puede conectarse a un punto de acceso a la red a través del menú.

1. Pulse OK para acceder al menú.
2. Pulse ▲ o ▼ para acceder a Wi-Fi y pulse OK para seleccionar.
3. Pulse ▲ o ▼ para acceder a Redes y pulse OK para seleccionar.
4. Pulse ▲ o ▼ para acceder a un punto de acceso a la red y pulse OK para seleccionar.
5. Pulse ▲ o ▼ para Conectar y pulse OK para seleccionar.

Si la conexión se realiza correctamente, la radio muestra un aviso y se guarda el punto de acceso a la red en la lista de perfiles.

5.7.30.3

Comprobación del estado de conexión Wi-Fi

Siga el procedimiento para comprobar el estado de conexión Wi-Fi.

Pulse el botón programado **Consulta del estado de la conexión Wi-Fi** para consultar el estado de conexión mediante el Anuncio de voz. El Anuncio de voz emite un sonido cuando el Wi-Fi está desactivado, si el Wi-Fi está

activado pero no está conectado o si el Wi-Fi está activado y conectado.

- La pantalla muestra `Wi-Fi desact.` cuando el Wi-Fi está desactivado.
- La pantalla muestra `Wi-Fi activ., conectado` cuando la radio está conectada a la red.
- La pantalla muestra `Wi-Fi activ., desconectado` cuando el Wi-Fi está activado pero la radio no está conectada a ninguna red.

  Los anuncios de voz para los resultados de la consulta del estado de la conexión Wi-Fi se pueden personalizar mediante CPS en función de los requisitos del usuario. Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información.

  NOTA:
  El botón **Consulta del estado de la conexión Wi-Fi** programado se lo asigna su distribuidor o administrador del sistema. Consulte con el distribuidor o administrador del sistema cómo se ha programado la radio.

5.7.30.4

Actualización de la lista de redes

Siga el procedimiento para actualizar la lista de redes.

- Realice las siguientes acciones para actualizar la lista de redes con el menú.

  a. Pulse OK para acceder al menú.

  b. Pulse ▲ o ▼ para acceder a `Wi-Fi` y pulse OK para seleccionar.

  c. Pulse ▲ o ▼ para acceder a `Redes` y pulse OK para seleccionar.

  Al acceder al menú Redes, la radio actualiza automáticamente la lista de redes.

- Si ya se encuentra en el menú Redes, lleve a cabo la siguiente acción para actualizar la lista de redes.

  Pulse ▲ o ▼ para `Actualizar` y pulse OK para seleccionar.

  La radio se actualiza y muestra la lista de redes más actualizada.

5.7.30.5

Adición de una red

Si una red preferida no está en la lista de redes disponibles, realice las siguientes acciones para añadir una red.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para acceder a Wi-Fi y pulse OK para seleccionar.

3 Pulse ▲ o ▼ para acceder a Redes y pulse OK para seleccionar.

4 Pulse ▲ o ▼ para Añadir red y pulse OK para seleccionar.

5 Introduzca el identificador de conjuntos de servicios (SSID) y pulse OK .

6 Pulse ▲ o ▼ para Abrir y pulse OK para seleccionar.

7 Ingrese la contraseña y pulse OK .

La radio muestra un miniaviso positivo para indicar que la red se ha guardado correctamente.

5.7.30.6

Visualización de los detalles de los puntos de acceso a la red

Siga el procedimiento para ver los detalles de los puntos de acceso a la red.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para acceder a Wi-Fi y pulse OK para seleccionar.

3 Pulse ▲ o ▼ para acceder a Redes y pulse OK para seleccionar.

4 Pulse ▲ o ▼ para acceder a un punto de acceso a la red y pulse OK para seleccionar.

5 Pulse ▲ o ▼ para acceder a Ver detalles y pulse OK para seleccionar.

En los puntos de acceso conectados a la red se muestra el identificador de conjunto de servicios (SSID), el modo de seguridad, la dirección de control de acceso a los medios (MAC) y el protocolo de Internet (IP).

En los puntos de acceso no conectados a la red se muestra solo el identificador de conjunto de servicios (SSID) y el modo de seguridad.

5.7.30.7

Eliminación de los puntos de acceso a la red

Realice las siguientes acciones para eliminar los puntos de acceso a la red de la lista de perfiles.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para acceder a Wi-Fi y pulse OK para seleccionar.

3 Pulse ▲ o ▼ para acceder a Redes y pulse OK para seleccionar.

4 Pulse ▲ o ▼ para acceder al punto de acceso a la red seleccionada y pulse OK para seleccionar.

5 Pulse ▲ o ▼ para Eliminar y pulse OK para seleccionar.

6 Pulse ▲ o ▼ para seleccionar `Sí` y pulse OK para seleccionar.

La radio muestra un miniaviso positivo para indicar que el punto de acceso a la red seleccionada se ha eliminado correctamente.

5.8

Herramientas

En este capítulo se explican cómo se utilizan las herramientas disponibles en la radio.

5.8.1

Bloqueo o desbloqueo del teclado

Siga el procedimiento para bloquear o desbloquear el teclado de la radio.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Herramientas`. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a `Config. radio`. Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a `Bloq. teclado`. Pulse OK para seleccionar.

- Si el teclado está bloqueado, la pantalla muestra `Teclado bloqueado`.
- Si el teclado está desbloqueado, la pantalla muestra `Teclado desbloqueado`.

La radio volverá a la pantalla de inicio.

5.8.2

Identificación del tipo de cable

Realice los siguientes pasos para seleccionar el tipo de cable que utiliza la radio.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a Herramientas. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a Config. radio. Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a Tipo de cable. Pulse OK para seleccionar.

5 Pulse ▲ o ▼ para cambiar la opción seleccionada.

El tipo de cable actual aparece con un símbolo ✓ .

5.8.3

Configuración del temporizador del menú

Puede definir el periodo de tiempo que su radio permanecerá en el menú antes de cambiar automáticamente a la pantalla de inicio. Siga el procedimiento para configurar el temporizador del menú.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a Herramientas.Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a Config. radio.Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a Pantalla. Pulse OK para seleccionar.

5 Pulse ▲ o ▼ para ir a `Tempor. menú`. Pulse OK para seleccionar.

6 Pulse ▲ o ▼ para ir al ajuste que desee. Pulse OK para seleccionar.

5.8.4

Reconocimiento de voz

La función de reconocimiento de voz solo puede activarla su distribuidor o administrador del sistema. Si la función de reconocimiento de voz está activada, la función de anuncio de voz se desactiva automáticamente. Si la función de anuncio de voz está activada, la función de reconocimiento de voz se desactiva automáticamente.

Esta función permite que la radio indique acústicamente lo siguiente:

- Canal actual
- Zona actual
- Función de botón programable activada o desactivada
- Contenido de los mensajes de texto recibidos
- Contenido de las asignaciones de tarea recibidas

Este indicador de audio puede personalizarse según los requisitos del cliente. Esta función es especialmente útil cuando el usuario tiene dificultades para leer el contenido que se muestra en la pantalla.

5.8.4.1

Configurar reconocimiento de voz

Siga el procedimiento para definir la función de reconocimiento de voz.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Herramientas`. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a `Config. radio`. Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a `Anuncio de voz`. Pulse OK para seleccionar.

5 Pulse ▲ o ▼ para ir a una de las siguientes funciones: Pulse OK para seleccionar.

Las funciones disponibles son las siguientes:

- `Todo`
- `Mensajes`
- `Asignaciones de tarea`
- `Separación`
- `Zona`
- `Botón programable`

Aparece ✓ junto a la configuración seleccionada.

5.8.5

Activación y desactivación del supresor de respuesta acústica

Esta función le permite minimizar la respuesta acústica de las llamadas recibidas.

1 pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para acceder a `Utilidades` y pulse OK para seleccionar.

3 Pulse ▲ o ▼ para acceder a `Configuración de la radio` y pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a `Supresor de AF` y pulse OK para seleccionar.

También puede utilizar los botones ◀ o ▶ para cambiar la opción seleccionada.

5 Lleve a cabo una de las siguientes acciones.

- Pulse OK para activar el supresor de respuesta acústica. La pantalla muestra ✓ junto a `Activado`.
- Pulse OK para desactivar el supresor de respuesta acústica. Desaparece ✓ junto a `Habilitado`.

5.8.6

Activación o desactivación del sistema global de navegación por satélite

El sistema global de navegación por satélite (GNSS) es un sistema de navegación vía satélite que determina la ubicación exacta de la radio. GNSS incluye el sistema de posicionamiento global (GPS) y el sistema de navegación por satélite global (GLONASS).

NOTA:
Los modelos de radio seleccionados pueden ofrecer GPS y GLONASS. La constelación de GNSS se configura a través de CPS. Consulte con el distribuidor o administrador del sistema cómo se ha programado la radio.

1 Realice el siguiente paso para activar o desactivar el GNSS en la radio.
   - Pulse el botón **GNSS** programado.
   - Pulse OK para acceder al menú. Continúe con el paso siguiente.

2 Pulse ▲ o ▼ para ir a `Herramientas`. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a `Config. radio`. Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir `GNSS`. Pulse OK para seleccionar.

5 Pulse OK para habilitar o deshabilitar el GNSS.

Si está activado, ✓ aparece junto a Activado.
Si se desactiva, ✓ junto a Activado desaparece.

5.8.7

Encendido y apagado de la pantalla inicial

Puede habilitar y deshabilitar la pantalla inicial siguiendo el procedimiento.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a Herramientas. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a Config. radio. Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a Pantalla. Pulse OK para seleccionar.

5 Pulse ▲ o ▼ para ir a la pantalla inicial.

Pulse OK para seleccionar.

6 Pulse OK para habilitar o deshabilitar la pantalla de introducción.

La pantalla muestra uno de los siguientes resultados:

- Si está activado, ✓ aparece junto a Activado.
- Si se desactiva, ✓ junto a Activado desaparece.

5.8.8

Encendido y apagado de tonos/ alertas de la radio

Puede habilitar y deshabilitar todos los tonos y todas las alertas de la radio, siempre que lo necesite, excepto el tono de alerta de emergencia entrante. . Siga el

procedimiento para activar o desactivar los tonos y las alertas en la radio.

1 Lleve a cabo una de las siguientes acciones:
   - Pulse el botón **Tonos/alertas** programado. Omita los pasos siguientes.
   - Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Herramientas`.Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a `Config. radio`.Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a `Tonos/alertas`. Pulse OK para seleccionar.

5 Pulse ▲ o ▼ para ir a `Todos los tonos`. Pulse OK para seleccionar.

6 Pulse OK para activar o desactivar todos los tonos y alertas. La pantalla muestra uno de los siguientes resultados:
   - Si está activado, ✓ aparece junto a `Activado`.
   - Si se desactiva, ✓ junto a `Activado` desaparece.

5.8.9

Configuración de los niveles de diferencia de volumen de tonos y alertas

Esta función ajusta el volumen de los tonos o las alertas, permitiendo que sea más alto o más bajo que el volumen de voz. Siga el procedimiento para definir los niveles de diferencia de volumen tonos y alertas de la radio.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Herramientas`. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a `Config. radio`. Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a `Tonos/alertas`. Pulse OK para seleccionar.

5 Pulse ▲ o ▼ para ir a `Dif. volumen`. Pulse OK para seleccionar.

6 Pulse ▲ o ▼ para ir al nivel de diferencia de volumen que desee.

Con cada nivel de diferencia de volumen correspondiente, suena un tono de confirmación.

7 Lleve a cabo una de las siguientes acciones:

- Pulse OK para seleccionar. Se guarda el nivel de diferencia de volumen necesario.
- Pulse para salir. Los cambios se descartan.

5.8.10

Activación o desactivación del tono Permiso para hablar

Siga el procedimiento para activar o desactivar el tono Permiso para hablar en la radio.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Herramientas`. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a `Config. radio`. Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a `Tonos/alertas`. Pulse OK para seleccionar.

5 Pulse ▲ o ▼ para ir a `Permitir hablar`. Pulse OK para seleccionar.

6 Pulse OK para activar o desactivar el tono de Permitir hablar.

La pantalla muestra uno de los siguientes resultados:

- Si está activado, ✓ aparece junto a Activado.
- Si se desactiva, ✓ junto a Activado desaparece.

5.8.11

Activación o desactivación del tono de encendido

Siga el procedimiento para activar o desactivar el tono de encendido en la radio.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a Herramientas. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a Config. radio. Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a Tonos/alertas. Pulse OK para seleccionar.

5 Pulse ▲ o ▼ para ir a Encendido. Pulse OK para seleccionar.

6 Pulse OK para activar o desactivar el tono de encendido. La pantalla muestra uno de los siguientes resultados:

- Si está activado, ✓ aparece junto a Activado.
- Si se desactiva, ✓ junto a Activado desaparece.

5.8.12

Configuración de los tonos de alerta de mensaje de texto

Puede personalizar el tono de alerta de mensaje de texto de cada entrada de la lista de contactos. Siga el procedimiento para definir los tonos de alerta de mensaje de texto en la radio.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a Contactos. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir al ID o alias que desee.

Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a Alerta mensaje. Pulse OK para seleccionar.

5 Lleve a cabo una de las siguientes acciones:

- Pulse ▲ o ▼ para ir a Momentáneo. Pulse OK para seleccionar.
  La pantalla muestra ✓ junto a Momentáneo.
- Pulse ▲ o ▼ para ir a Repetitivo. Pulse OK para seleccionar.
  La pantalla muestra ✓ junto a Repetitivo.

5.8.13

Niveles de potencia

Puede personalizar el nivel de potencia de cada canal de la radio en alto o bajo.

Alta
Permite la comunicación con radios situadas a una distancia considerable de usted.

Baja
Permite la comunicación con radios más cercanas.

NOTA:
Esta función no se aplica a canales de Banda Ciudadana que estén en la misma frecuencia.

5.8.13.1

Configuración de los niveles de potencia

Siga el procedimiento para definir los niveles de potencia en la radio.

1 Lleve a cabo una de las siguientes acciones:

- Pulse el botón de **nivel de potencia** programado. Omita los pasos que se indican a continuación.
- Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a Herramientas.Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a Config. radio.Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a Potencia. Pulse OK para seleccionar.

5 Lleve a cabo una de las siguientes acciones:

- Pulse ▲ o ▼ para ir a Alta. Pulse OK para seleccionar.
  La pantalla muestra ✓ junto a Alta.
- Pulse ▲ o ▼ para ir a Baja. Pulse OK para seleccionar.
  La pantalla muestra ✓ junto a Baja.

6 Pulse de forma prolongada ↩ para volver a la pantalla de inicio.

5.8.14

Ajuste del brillo de la pantalla

Siga el procedimiento para ajustar el brillo de la pantalla de la radio.

1 Lleve a cabo una de las siguientes acciones:

- Pulse el botón **Brillo** programado. Omita los pasos siguientes.

- Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a Herramientas. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a Config. radio. Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a Brillo. Pulse OK para seleccionar.

La pantalla muestra una barra de progreso.

5 Pulse ▲ o ▼ para aumentar o reducir el brillo de la pantalla. Pulse OK para seleccionar.

5.8.15

Configuración del temporizador de la luz de fondo de la pantalla

Puede ajustar el temporizador de la luz de fondo de la pantalla de la radio según sea necesario. La configuración también afecta a los botones de navegación por el menú y a la luz de fondo del teclado, según corresponda. Siga el procedimiento para definir el temporizador de la luz de fondo de la radio.

1 Lleve a cabo una de las siguientes acciones:

- Pulse el botón **Luz de fondo** programado. Omita los pasos siguientes.
- Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a Herramientas. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a Config. radio. Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a Pantalla. Pulse OK para seleccionar.

5 Pulse ▲ o ▼ para ir a Temporizador de luz de fondo. Pulse OK para seleccionar.

La luz de fondo de la pantalla y la del teclado se apagan automáticamente si el indicador LED está desactivado. Consulte Encendido y apagado de los indicadores LED en la página 198 para obtener más información.

5.8.16

Activación o desactivación de la luz de fondo

La luz de fondo de la radio se puede activar o desactivar automáticamente si fuera necesario. Si está activada, la luz de fondo se enciende cuando la radio recibe una llamada, un evento de la lista de notificaciones o una alarma de emergencia.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a Herramientas. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a Config. radio. Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a Luz de fondo auto.

5 Pulse OK para habilitar o deshabilitar la luz de fondo automática.

La pantalla muestra uno de los siguientes resultados:

- Si está activado, ✓ aparece junto a Activado.
- Si se desactiva, ✓ junto a Activado desaparece.

5.8.17

Encendido y apagado de los indicadores LED

Siga el procedimiento para activar o desactivar los indicadores LED en la radio.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a Herramientas. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a Config. radio. Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a Indicador LED. Pulse OK para seleccionar.

5 Pulse OK para habilitar o deshabilitar el indicador LED.

La pantalla muestra uno de los siguientes resultados:

- Si está activado, ✓ aparece junto a Activado.
- Si se desactiva, ✓ junto a Activado desaparece.

5.8.18

Configuración de idiomas

Siga el procedimiento para definir los idiomas en la radio.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a Herramientas. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a Config. radio.Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a `Idiomas`. Pulse OK para seleccionar.

5 Pulse ▲ o ▼ para ir al idioma que desee. Pulse OK para seleccionar.

La pantalla muestra ✓ junto al idioma seleccionado.

5.8.19

Activación o desactivación de la tarjeta opcional

Se pueden asignar capacidades para tarjetas opcionales dentro de cada canal a botones programables. Siga el procedimiento para activar o desactivar la tarjeta opcional en la radio.

Pulse el botón programable **Tarjeta opcional**.

5.8.20

Activación o desactivación del indicador de voz

Esta función permite a la radio indicar de forma sonora o mediante la pulsación de botón programable la zona o el canal que el usuario acaba de presionar.
Esto es especialmente útil cuando el usuario tiene dificultades para leer el contenido que se muestra en la pantalla.

Este indicador de audio puede personalizarse según los requisitos del cliente. Siga el procedimiento para activar o desactivar el indicador de voz.

1 Lleve a cabo una de las siguientes acciones:

- Pulse el botón **Indicador de voz** programado. Omita los pasos siguientes.
- Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Herramientas`.Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a Config. radio.Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a Indicador de voz. Pulse OK para seleccionar.

5 Pulse OK para activar o desactivar Indicador de voz.

- Si está activado, ✓ aparece junto a Activado.
- Si se desactiva, ✓ junto a Activado desaparece.

5.8.21

Activación o desactivación del AGC del micrófono digital

El control automático de ganancia (AGC) del micrófono digital controla automáticamente la ganancia del micrófono de la radio durante la transmisión en un sistema digital. Esta función elimina el audio alto o mejora el audio claro para un valor predeterminado con el fin de ofrecer un nivel de audio constante. Siga el procedimiento para activar o desactivar el AGC del micrófono digital en la radio.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a Herramientas. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a Config. radio. Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a AGC mic digital. Pulse OK para seleccionar.

5 Pulse OK para activar o desactivar el AGC del micrófono digital.

La pantalla muestra uno de los siguientes resultados:

- Si está activado, ✓ aparece junto a Activado.

- Si se desactiva, ✓ junto a `Activado` desaparece.

5.8.22

Cambio de la salida de audio entre el altavoz interno de la radio y un accesorio con cables

Siga el procedimiento para alternar la salida de audio entre el altavoz interno de la radio y el accesorio con cables.

Puede alternar la salida de audio entre el altavoz interno de la radio y el altavoz de un accesorio con cables siempre que:

- El accesorio con cables con altavoz esté conectado.
- El audio no se dirija a un accesorio externo con Bluetooth.

Pulse el botón programable **Conmutación de audio**.

Suena un tono cuando la ruta de audio ha cambiado.

Si se apaga la radio o se quita el accesorio, se restablece la salida de audio en el altavoz interno de la radio.

5.8.23

Activación o desactivación del audio inteligente

La radio ajusta automáticamente el volumen de audio para superar el ruido de fondo actual del entorno, incluidas las fuentes de ruido estacionarias y no estacionarias. Esta función es de solo recepción y no afecta a la transmisión de audio. Siga el procedimiento para activar o desactivar el audio inteligente en la radio.

NOTA:
Esta función no está disponible durante una sesión Bluetooth.

1 Lleve a cabo una de las siguientes acciones:
   - Pulse el botón programado **Audio inteligente**. Omita los pasos que se indican a continuación.
   - Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Herramientas`. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a `Config. radio`. Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a `Audio inteligente`. Pulse OK para seleccionar.

5 Lleve a cabo una de las siguientes acciones:

- Pulse ▲ o ▼ para ir a `Encendido`. Pulse OK para seleccionar. La pantalla muestra ✓ junto a `Enc.`
- Pulse ▲ o ▼ para ir a `Apagado`. Pulse OK para seleccionar. La pantalla muestra ✓ junto a `Apagado`.

5.8.24

Activación o desactivación de la mejora de la vibración del habla

Puede activar esta función cuando esté hablando en un idioma que contenga muchas palabras con pronunciación alveolar (R vibrante). Siga el procedimiento para activar o desactivar la mejora de la vibración del habla en la radio.

1 Lleve a cabo una de las siguientes acciones:

- Pulse el botón **Mejora de la vibración del habla** programado. Omita los pasos que se indican a continuación.
- Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Herramientas`.Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a `Config. radio`.Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a `Mejora de trino`. Pulse OK para seleccionar.

5 Lleve a cabo una de las siguientes acciones:

- Pulse ▲ o ▼ para ir a Encendido. Pulse OK para seleccionar. La pantalla muestra ✓ junto a Enc.
- Pulse ▲ o ▼ para ir a Apagado. Pulse OK para seleccionar. La pantalla muestra ✓ junto a Apagado.

5.8.25

Activación y desactivación del control de distorsión dinámica del micrófono

Esta función permite que la radio supervise automáticamente la entrada del micrófono y ajuste la ganancia del micrófono para evitar la saturación del audio.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a Herramientas. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a Config. radio. Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a Distorsión del micrófono. Pulse OK para seleccionar.

5 Lleve a cabo una de las siguientes acciones:

- Pulse OK para habilitar el control de distorsión dinámica del micrófono. Si está activado, ✓ aparece junto a Activado.
- Pulse OK para deshabilitar el control de distorsión dinámica del micrófono. Si se desactiva, ✓ junto a Activado desaparece.

5.8.26

Configuración del entorno de audio

Siga el procedimiento para definir el entorno de audio en la radio según el ambiente.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a Herramientas. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a Config. radio. Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a Entorno audio. Pulse OK para seleccionar.

5 Pulse ▲ o ▼ para ir al ajuste que desee. Pulse OK para seleccionar.

La configuración es la siguiente:

- Elija Predeterminado para restablecer la configuración predeterminada de fábrica.
- Elija Alto para aumentar el nivel de sonoridad del altavoz cuando se utiliza en entornos ruidosos.
- Elija Grupo de Trabajo para reducir la respuesta acústica cuando se utiliza con un grupo de radios que están cerca las unas de las otras.

La pantalla muestra ✓ junto al ajuste seleccionado.

5.8.27

Configuración de perfiles de audio

Siga el procedimiento para definir los perfiles de audio en la radio.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a Herramientas. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a Config. radio. Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a `Perfiles de audio`.

Pulse OK para seleccionar.

5 Pulse ▲ o ▼ para ir al ajuste que desee. Pulse OK para seleccionar.

La configuración es la siguiente:

- Elija `Predeterminado` para desactivar el perfil de audio seleccionado anteriormente y volver a la configuración predeterminada de fábrica.
- Elija `Nivel 1`, `Nivel 2` o `Nivel 3` para perfiles de audio destinados a compensar pérdida auditiva provocada por el ruido, algo típico en adultos mayores de 40 años.
- Elija `Aumento de agudos`, `Aumento de medios` o `Aumento de graves` para perfiles de audio que se ajustan a su preferencia de sonidos más metálicos, más nasales o más profundos.

La pantalla muestra ✓ junto al ajuste seleccionado.

5.8.28

Información general de la radio

La radio contiene información sobre varios parámetros generales.

La información general de la radio es la siguiente:

- Información sobre las baterías.
- Alias e ID de radio.
- Versiones de firmware y codeplug.
- Actualización del software.
- Información de GNSS.
- Información del sitio.
- Indicador de intensidad de la señal recibida.

NOTA:

Pulse para volver a la pantalla anterior. Pulse de forma prolongada para volver a la pantalla de inicio. La radio sale de la pantalla actual cuando el temporizador de inactividad se agota.

5.8.28.1

Acceso a la información de la batería

Se muestra la información de la batería de la radio.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Herramientas`. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para acceder a `Info. del radio`Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a `Información de la batería`.Pulse OK para seleccionar. En la pantalla aparece la información de la batería.

NOTA:
Solo para baterías **IMPRES**: Si la batería necesita reacondicionamiento en un cargador IMPRES, en la pantalla se mostrará el mensaje `Reacondic. batería`. Una vez finalizado el proceso de reacondicionamiento, en la pantalla aparece la información de la batería.

5.8.28.2

Verificación de alias e ID de radio

Siga el procedimiento para comprobar el ID y alias de la radio.

1 Lleve a cabo una de las siguientes acciones:

- Pulse el botón programado **Alias e ID de radio**. Omita los pasos siguientes.
  Suena un tono indicador positivo.

  También puede pulsar el botón programado **Alias e ID de radio** para volver a la pantalla anterior.

- Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a Herramientas. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a Info. radio. Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a Mi ID. Pulse OK para seleccionar.

La primera línea de texto muestra el alias de radio. La segunda línea de texto muestra el ID de radio.

5.8.28.3

Verificación de las versiones de firmware y de Codeplug

Siga el procedimiento para comprobar las versiones de firmware y de Codeplug de la radio.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a Herramientas. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a Info. radio. Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a Versiones. Pulse OK para seleccionar.

La pantalla muestra las versiones de firmware y de Codeplug actuales.

5.8.28.4

Verificación de la información de GNSS

Muestra la información de GNSS de la radio, como los valores de:

- Latitud
- Longitud
- Altitud
- Dirección

- Velocidad
- Dilución de precisión horizontal (HDOP)
- Satélites
- Versión

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a Herramientas. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a Info. del radio. Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a Información de GNSS. Pulse OK para seleccionar.

5 Pulse ▲ o ▼ para ir al elemento deseado. Pulse OK para seleccionar. La pantalla muestra la información de GNSS solicitada.

5.8.28.5

Verificación de la información sobre actualización de software

Esta función muestra la fecha y la hora de la última actualización de software llevada a cabo mediante OTAP o Wi-Fi. Siga el procedimiento para comprobar la información sobre actualización de software de la radio.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a Herramientas. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a Info. radio. Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a Actualiz. SW. Pulse OK para seleccionar.

La pantalla muestra la fecha y la hora de la última actualización de software.

El menú de actualización del software solo está disponible después de que se haya producido al menos una sesión de OTAP o Wi-Fi correcta. Consulte Programación a través del interfaz de aire en la página 457 para obtener más información.

5.8.28.6

Mostrar la información del sitio

Siga el procedimiento para mostrar el nombre del sitio en el que está encendida la radio.

1. Pulse OK para acceder al menú.
2. Pulse ▲ o ▼ para ir a `Herramientas`. Pulse OK para seleccionar.
3. Pulse ▲ o ▼ para ir a `Info. radio`. Pulse OK para seleccionar.
4. Pulse ▲ o ▼ para ir a `Info. sitio`. Pulse OK para seleccionar.

La pantalla muestra el nombre de sitio actual.

Esta página se ha dejado en blanco intencionadamente.

Operaciones Connect Plus

Connect Plus es una completa solución de trunking basada en tecnología DMR. Connect Plus utiliza un canal de control dedicado para canalizar las solicitudes y asignaciones. Las funciones disponibles para los usuarios de radio en virtud de este sistema están disponibles en este capítulo.

6.1

Controles de radio adicionales en el modo Connect Plus

En este capítulo se explican los controles de radio adicionales disponibles para el usuario de radio a través de opciones preprogramadas, es decir, botones programables y asignable a funciones de la radio.

6.1.1

Botón PTT (pulsar para hablar)

El botón PTTsituado en un lateral de la radio tiene dos funciones principales:

- En el transcurso de una llamada, el botón **PTT** permite que la radio transmita a las demás radios de la llamada.

  Mantenga pulsado el botón **PTT** para hablar. Suelte el botón **PTT** para escuchar.

  El micrófono se activa cuando se pulsa el botón **PTT**.
- Cuando no hay ninguna llamada en curso, el botón **PTT** se utiliza para realizar una nueva llamada (consulte Realización de una llamada de radio en la página 229).

Si el tono Permiso para hablar (consulte Activación o desactivación del tono Permiso para hablar en la página 312) está habilitado, espere a que finalice el breve tono de alerta antes de empezar a hablar.

6.1.2

Botones programables

Su distribuidor puede definir los botones programables como accesos directos a funciones de la radio según la duración de la pulsación del botón:

Pulsación corta
Pulsar y soltar el botón rápidamente.

Pulsación larga
Mantener pulsado el botón durante la duración programada.

NOTA:
La duración programada de pulsación de botones se puede aplicar a todas las funciones o configuraciones de la radio o herramientas asignables. Consulte Funcionamiento de emergencia en la página 264 para obtener más información sobre la duración programada del botón de *Emergencia*.

6.1.2.1

Funciones asignables de la radio

Activar/desactivar señal
Habilita o deshabilita la función de señal. Exige la adquisición de la función de Man Down de Connect Plus.

Restablecer señal
Restablece (cancela) el tono de señal, sin desactivar la función de señal. Exige la adquisición de la función de Man Down de Connect Plus.

Camb. audio Bluetooth®
Alterna el direccionamiento de audio entre el altavoz interno de la radio y el accesorio externo con tecnología Bluetooth.

Conexión de Bluetooth
Inicia una operación de detección y conexión de Bluetooth.

Desconexión de Bluetooth
Finaliza todas las conexiones Bluetooth en curso entre dispositivos habilitados para Bluetooth y la radio.

Bluetooth visible
Permite que la radio entre en el modo de Bluetooth visible.

Cancelar cola de ocupado
Sale del modo Ocupado tras iniciar una llamada de no emergencia en la Cola de espera. Las llamadas de emergencia, una vez aceptadas en la Cola de espera, no se pueden cancelar.

Registro de llamadas
Selecciona la lista del registro de llamadas.

Anuncio de canal
Reproduce mensajes de voz de anuncio de canal y de zona para el canal actual.

Contactos
Proporciona acceso directo a la lista de contactos.

Emergencia en./ap.
Dependiendo de la programación, inicia o cancela una llamada o una alarma de emergencia.

Ubicación en interiores
Activa o desactiva la ubicación en interiores.

Audio inteligente
Permite activar o desactivar el Audio inteligente.

Activar/desactivar alarmas de Man Down
Activa o desactiva todas las alarmas de Man Down configuradas. Exige la adquisición de la función de Man Down de Connect Plus.

Restablecer alarmas de Man Down
Si se pulsa mientras se reproduce un tono de alerta de la función de Man Down, el tono se cancela y se restablecen todos los temporizadores de la función, pero no se deshabilitan las alarmas de Man Down. Requiere la adquisición de la función de Man Down.

Marcación manual
Dependiendo de la programación, inicia una llamada privada o telefónica al teclear cualquier ID de suscriptor o número de teléfono.

Acceso de marcación rápida
Inicia directamente una llamada privada, una alerta de llamada o un mensaje de texto rápido o la función Retorno a inicio predefinidos.

Privacidad
Activa o desactiva la privacidad.

Verificación de radio
Determina si una radio se encuentra activa en un sistema.

Habilitar radio
Permite activar de forma remota una radio de destino.

Desactivación de la radio
Permite desactivar de forma remota una radio de destino.

Monitorización remota
Enciende el micrófono de una radio de destino sin que proporcione ningún indicador.

Restablecer canal base
Configura un nuevo canal base.

Tipo de timbre de alerta
Ofrece al usuario acceso directo a la configuración del tono de alerta.

Solicitud de itinerancia
Permite buscar un emplazamiento diferente.

Rastreo
Permite activar o desactivar el rastreo.

Silenciar recordatorio de canal base
Silencia el recordatorio de canal de inicio.

Activar/desactivar bloqueo de sitio
Al habilitarlo, la radio solo buscará el emplazamiento actual. Si se deshabilita, la radio busca otros emplazamientos además del actual.

Mensaje de texto
Selecciona el menú de mensajes de texto.

Estilo de vibración
Configura el estilo de vibración.

Activar/Desactivar indicador de voz
Activa o desactiva el indicador de voz.

Wi-Fi
Activa o desactiva el Wi-Fi.

Zona
Permite seleccionar en una lista de zonas.

6.1.2.2

Funciones asignables de configuración o herramientas

Supresor AF
Activa o desactiva el supresor de respuesta acústica.

Todos los tonos/alertas.
Activa y desactiva todos los tonos y alertas.

Retroiluminación
Activa o desactiva la luz de fondo de la pantalla.

Brillo de luz de fondo
Ajusta el nivel de brillo.

Modo de pantalla
Activa o desactiva el modo de pantalla día/noche.

Sistema de satélite de navegación global (GNSS)
Activa o desactiva el sistema de navegación vía satélite.

Nivel de potencia
Alterna entre los niveles de potencia de transmisión alto y bajo.

Sin asignar
Indica que aún no se ha asignado una función al botón.

6.1.3

Identificación de los indicadores de estado en el modo Connect Plus

La pantalla de la radio muestra el estado, entradas de texto y entradas de menú.

6.1.3.1

Iconos de pantalla

Los elementos siguientes son iconos que aparecen en la pantalla de la radio. Los iconos se muestran en la barra de estado, ordenados a la izquierda, en orden de aparición/uso y para un canal específico.

	Indicador de intensidad de la señal recibida (RSSI) El número de barras mostradas representa la intensidad de la señal de la radio. Cuatro barras indican la señal más intensa. Este icono solo se muestra durante la recepción.
	Bluetooth no conectado La función Bluetooth está activada, pero no hay conectado ningún dispositivo Bluetooth remoto.
	Bluetooth conectado La función Bluetooth está activada. El icono permanece iluminado cuando hay un dispositivo Bluetooth remoto conectado.
	Datos de gran volumen La radio está recibiendo datos de gran volumen y el canal está ocupado.
	Ubicación en interiores disponible [4] El estado de ubicación en interiores está activado y disponible.
	Función de ubicación en interiores no disponible [4] El estado de ubicación en interiores está activado pero no está disponible debido a que el Bluetooth está desactivado o a que el Bluetooth ha suspendido el rastreo de las balizas.
	Modo Silenciar

Tabla (continuación)…

Tabla (continuación)…

[4] Solo se aplica a los modelos que cuentan con la última versión de software y hardware

	El modo Silenciar está activado y el altavoz está silenciado.
	Notificación Faltan uno o varios eventos en la lista de notificaciones.
L o H	**Nivel de potencia** La radio está configurada a potencia baja o la radio está configurada a potencia alta.
	Desactivar tonos Los tonos están desactivados.
	Tarjeta opcional La tarjeta opcional está habilitada.
	La tarjeta opcional no funciona La tarjeta opcional está deshabilitada.
	GNSS disponible La función GPS/GNSS está activada. El icono permanece encendido cuando existe una posición definida disponible.

Tabla (continuación)…

	GNSS no disponible/Fuera del rango La función GPS/GNSS está activada pero no recibe datos del satélite.
	Rastreo La función de rastreo está habilitada.
	Emergencia La radio está en modo Emergencia.
	Seguro La función Privacidad está habilitada.
	Inseguro La función Privacidad está deshabilitada.
	Roaming entre sitios La función de roaming entre sitios está habilitada.
	Batería El número de barras (0-4) indica la carga restante en la batería. Parpadea cuando el nivel de la batería es bajo.

Tabla (continuación)…

	Contacto El contacto por radio está disponible.
	Registro de llamadas Registro de llamadas de radio.
	Mensaje Mensaje entrante.
	Solo timbre El modo de tono de llamada está habilitado.
	Tono de silencio El modo de tono de silencio está habilitado.
	Vibración El modo de vibración está habilitado.

Tabla (continuación)…

	Vibración y tono El modo de vibración y tono está habilitado.
	Wi-Fi: excelente [5] La señal de la red Wi-Fi es excelente.
	Wi-Fi: buena [5] La señal de la red Wi-Fi es buena.
	Wi-Fi: regular [5] La señal de la red Wi-Fi es regular.
	Wi-Fi: deficiente [5] La señal de la red Wi-Fi es deficiente.
	Wi-Fi: no disponible[5].[6] La señal de la red Wi-Fi no está disponible.

[5] Solo se aplica a DP4601e
[6]

6.1.3.2

Iconos de llamada

Los siguientes iconos aparecen en la pantalla de la radio en el transcurso de una llamada. Estos iconos también aparecen en la lista Contactos para indicar el tipo de ID.

	Llamada privada Indica que hay una llamada privada en curso. En la lista de contactos, indica un alias (nombre) o ID (número) de suscriptor.
	Llamada a grupo/a todos en sitio Indica que hay en curso una llamada a grupo o una llamada a todos en sitio. En la lista de contactos, indica un alias (nombre) o ID (número) de grupo.
	Llamada telefónica como una llamada privada Indica que hay una llamada telefónica como una llamada privada en curso.

6.1.3.3

Iconos del menú avanzado

Los siguientes iconos aparecen junto a los elementos de menú que ofrecen una elección entre dos opciones o como indicación de que hay un submenú que ofrece dos opciones.

	Casilla de verificación (vacía) Indica que la opción no está seleccionada.
	Casilla de verificación (marcada) Indica que la opción está seleccionada.
	Recuadro negro sólido Indica la opción seleccionada para el elemento de menú con un submenú.

6.1.3.4

Iconos de Enviados

Los iconos que se indican a continuación aparecen en la esquina superior derecha de la pantalla de la radio en la carpeta de elementos enviados.

O	**Enviado correctamente** El mensaje de texto se ha enviado correctamente.
O	**Error de envío** El mensaje de texto no se ha enviado.
O	**en curso** • El mensaje de texto para un alias o ID de grupo está pendiente de transmisión. • El mensaje de texto para un alias o ID de suscriptor está pendiente de transmisión y, a continuación, se espera confirmación.
O	**Mensaje individual o de grupo leído** El mensaje de texto se ha leído.
O	**Mensaje individual o de grupo no leído** El mensaje de texto no se ha leído.

Tabla (continuación)…

6.1.3.5

Iconos del dispositivo Bluetooth

Los siguientes iconos también aparecen junto a los elementos en la lista de dispositivos habilitados para Bluetooth disponibles para indicar el tipo de dispositivo.

	Dispositivo de datos Bluetooth Dispositivo de datos habilitado para Bluetooth, por ejemplo, un escáner.
	Dispositivo de audio Bluetooth Dispositivo de audio habilitado para Bluetooth, por ejemplo, unos auriculares.
	Dispositivo PTT Bluetooth Dispositivo PTT habilitado para Bluetooth, por ejemplo, un dispositivo de PTT solo (POD).

6.1.3.6

Indicador LED

El indicador LED muestra el estado de funcionamiento de la radio.

Rojo intermitente	La batería no coincide, la radio está transmitiendo con un nivel bajo de batería, recibiendo una transmisión de emergencia, ha fallado la comprobación automática al encenderse o ha salido del rango de rango si la radio está configurada con un sistema de repetición de rango automático. El modo Silenciar está activado.
Rojo intermitente rápido	La radio está recibiendo una transferencia de archivos a través del interfaz aire (archivo de firmware de tarjeta opcional, archivo de frecuencia de red o archivo de Codeplug de tarjeta opcional) o está actualizándose con un nuevo archivo de firmware de tarjeta opcional.

Tabla (continuación)…

Verde y amarillo intermitentes	La radio está recibiendo una alerta de llamada, ha recibido un mensaje de texto o el rastreo está activado y recibe de forma activa.
Amarillo fijo	La radio está en modo de Bluetooth visible.
Parpadeo doble en amarillo	La radio está buscando de forma activa un nuevo sitio.
Amarillo intermitente	La radio está recibiendo una alerta de llamada o el rastreo está habilitado pero inactivo (la radio permanecerá en silencio para cualquier actividad).
Verde fijo	La radio está encendiéndose o transmitiendo.
Verde intermitente	La radio se está encendiendo y está recibiendo una llamada o datos.
Parpadeo verde doble	La radio está recibiendo una llamada con la privacidad habilitada.

6.1.3.7

Tonos de indicador

A continuación se describen los tonos que suenan a través del altavoz de la radio.

Tono agudo	☐	Tono grave	■

Los tonos de indicador proporcionan indicaciones audibles del estado después de realizar una acción para llevar a cabo una tarea.

■☐	Tono indicador positivo
☐■	Tono indicador negativo

6.1.3.8

Tono de alerta

Los tonos de alerta le proporcionan indicaciones sonoras del estado de la radio o de la respuesta de la radio a los datos recibidos.

Tono continuo	Un sonido monótono. Suena continuadamente hasta que finaliza.
Tono periódico	Suena periódicamente dependiendo de la duración que haya establecido la radio. El tono empieza, se para y se repite.
Tono repetitivo	Suena un único tono que se repite hasta que lo apaga el usuario.
Tono momentáneo	Suena solo una vez durante un breve periodo de tiempo establecido por la radio.

6.1.4

Cambio entre los modos de Connect Plus y no de Connect Plus

Para cambiar a un modo que no sea de Connect Plus, si el distribuidor o el administrador del sistema lo ha programado, tendrá que cambiar a otra zona. Consulte a su distribuidor o administrador del sistema para comprobar si se ha programado la radio con zonas no de Connect Plus y qué funciones hay disponibles en dichas zonas.

6.2

Realización y recepción de llamadas en modo Connect Plus

En esta sección se explican las operaciones generales de la radio y las funciones de llamada de las que dispone.

6.2.1

Selección de un emplazamiento

Un emplazamiento ofrece cobertura para un área específica. Los emplazamientos de Connect Plus disponen

de un controlador de emplazamiento y un máximo de 15 repetidores. En una red multiemplazamiento, la radio de Connect Plus buscará automáticamente un nuevo emplazamiento cuando el nivel de señal del emplazamiento en que esté registrada se reduzca hasta ser inaceptable.

6.2.1.1
Solicitud de itinerancia

Una solicitud de itinerancia ordena a la radio buscar un emplazamiento diferente, aunque la señal que reciba del emplazamiento actual sea aceptable.

Si no se encuentran sitios disponibles:

- La radio muestra `Búsqueda` y `el alias del canal seleccionado` y continúa buscando por la lista de sitios.
- La radio vuelve al sitio anterior si este sigue estando disponible.

NOTA:
es algo que programa el distribuidor.

Pulse el botón programado de **Solicitud de itinerancia**.

Escuchará un tono que indica que la radio ha cambiado a un nuevo emplazamiento. En la pantalla aparecerá `ID del sitio <Número de sitio>`.

6.2.1.2
Activar/desactivar bloqueo de sitio

Al habilitarlo, la radio solo buscará el emplazamiento actual. Si se deshabilita, la radio busca otros emplazamientos además del actual.

Pulse el botón programado **Bloq. sitio**.

Si la función de **bloqueo de sitio** está activada:

- Se escuchará un tono indicador afirmativo, el cual señala que la radio se ha bloqueado en sitio actual.
- En la pantalla aparecerá `Site Locked` (Sitio bloq.).

Si la función de **bloqueo de sitio** está desactivada:

- Se oirá un tono indicador negativo, que señala que la radio está desbloqueada.
- En la pantalla aparecerá `Site Unlocked` (Sitio desbloq.).

6.2.1.3

Restricción de sitios

El administrador del sistema de la radio de Connect Plus tiene la capacidad de decidir los emplazamientos de red que puede utilizar o no la radio. Para cambiar la lista de emplazamientos permitidos o restringidos, no es necesario reprogramar la radio. Si la radio intenta registrarse en un emplazamiento restringido, verá un breve mensaje con esta información: `Sitio <número determinado> no permitido`. A continuación, la radio buscará otro emplazamiento de red.

6.2.2

Selección de una Zona

La radio se puede programar con un máximo de 16 zonas de Connect Plus, cada una de las cuales admite un máximo de 16 posiciones asignables en el mando del selector de canales.

Cada posición asignable del mando puede emplearse para iniciar uno de estos tipos de llamada de voz:

- Llamada de grupo
- Llamada multigrupo
- Llamada a todos en el emplazamiento
- Llamada privada

1 Realice la siguiente acción para acceder a la función Zona:

Controles de la radio	Pasos
Botón Selección de zona programado	Pulse el botón **Selección de zona** programado.
Menú de la radio	**a** pulse OK para acceder al menú.

Controles de la radio	Pasos
	b Pulse ▲ o ▼ para acceder a `Zona` y pulse OK para seleccionar.

La zona actual se muestra y aparece con un ✓ .

2 Seleccione la zona deseada.

Control de radio	Pasos
▲ o ▼	Pulse ▲ o ▼ y desplácese a la zona deseada.

3 Pulse OK para seleccionar.

La pantalla muestra `<Zona> seleccionada` momentáneamente y vuelve a la pantalla de la zona seleccionada.

6.2.3

Uso de varias redes

Si la radio se ha programado para utilizar varias redes de Connect Plus, puede seleccionar una red diferente cambiando a la zona de Connect Plus que esté asignada a la red deseada. Estas asignaciones de zona-red las configura el distribuidor mediante programación de la radio.

6.2.4

Selección de un tipo de llamada

Utilice el mando selector de canales para seleccionar el tipo de llamada. Puede tratarse de una llamada de grupo, llamada multigrupo, llamada a todos en sitio o llamada privada, en función de la programación de la radio. Si cambia el selector de canales a una posición diferente (que tenga un tipo de llamada asignada), la radio volverá a registrarse en el emplazamiento de Connect Plus. La radio se registrará con el ID de grupo de registro que se haya programado para la nueva posición del selector de canales el nuevo tipo de llamada.

Si selecciona una posición que no tiene ningún tipo de llamada asignada, la radio emitirá un tono continuo y en la pantalla aparecerá `Sin programar`. Dado que la radio no funciona cuando se selecciona un canal no programado,

utilice el selector de canales para elegir en su lugar un canal programado.

Una vez se muestre la zona (si tiene varias zonas en la radio), gire el mando selector de canales programado para seleccionar el tipo de llamada.

6.2.5

Recepción y respuesta a llamadas de radios

Una vez que se haya mostrado el canal, el ID de suscriptor o el tipo de llamada, podrá recibir y responder llamadas.

El indicador LED se ilumina en verde fijo mientras la radio está transmitiendo y parpadea en verde cuando está recibiendo.

NOTA:
El indicador LED se ilumina en verde fijo mientras la radio está transmitiendo y parpadea dos veces en verde cuando la radio está recibiendo una llamada que tiene la privacidad habilitada . Para descodificar una llamada que tiene la privacidad habilitada, la radio debe tener la misma clave de privacidad O BIEN la misma clave e ID de clave (programadas por el distribuidor) que la radio transmisora (la radio desde la que recibe la llamada).

Consulte Privacidad en la página 287 para obtener más información.

6.2.5.1

Recepción y respuesta a llamadas a grupo

Para recibir una llamada de un grupo de usuarios, la radio debe estar configurada como parte de ese grupo.

Si recibe una llamada a grupo (desde la pantalla de inicio), el indicador LED parpadea en verde.El icono de llamada a grupo aparece en la esquina superior derecha. La primera

línea de texto muestra el alias de la llamada entrante. La segunda línea de texto muestra el alias de la llamada a grupo. La radio desactiva el silencio y las llamadas entrantes suenan a través del altavoz de la radio.

1. Mantenga la radio en posición vertical a una distancia de entre 2,5 y 5 cm (1-2 pulgadas) de la boca.

   El indicador LED se ilumina en color verde fijo.

2. Espere hasta que acabe uno de los tonos Permitir hablar (si está habilitado) y hable con claridad al micrófono.

3. Suelte el botón **PTT** para escuchar.

   Si no hay actividad de voz durante un periodo de tiempo predeterminado, la llamada finalizará.

NOTA:
Consulte Realización de llamadas a grupo en la página 230 para obtener más información sobre cómo realizar una llamada a grupo.

6.2.5.2

Recepción y respuesta a llamadas privadas

Una llamada privada es una llamada de una radio individual a otra radio individual.

Cuando reciba una llamada privada, el LED parpadea en verde. El icono de llamada privada aparece en la esquina superior derecha. La primera línea de texto muestra el alias de la llamada entrante. La radio desactiva el silencio y las llamadas entrantes suenan a través del altavoz de la radio.

1. Mantenga la radio en posición vertical a una distancia de entre 2,5 y 5 cm (1-2 pulgadas) de la boca.

2. Pulse el botón **PTT** para responder la llamada.

   El indicador LED se ilumina en color verde fijo.

3. Espere hasta que acabe el tono Permitir hablar (si está activado) y hable con claridad al micrófono.

4. Suelte el botón **PTT** para escuchar.

Si no hay actividad de voz durante un periodo de tiempo predeterminado, la llamada finalizará.

Se oye un tono breve. La pantalla muestra `Llamada finalizada`.

Consulte Realización de llamadas privadas en la página 231 para obtener detalles sobre la realización de una llamada privada.

6.2.5.3

Recepción de una llamada a todos en sitio

Una llamada a todos en sitio es la que procede de una radio concreta y va dirigida a todas las radios de tal emplazamiento. Se utiliza para realizar anuncios importantes que requieren la atención total del usuario.

Cuando recibe una llamada a todos en el emplazamiento, suena un tono y el indicador LED parpadea en verde.

El icono de llamada de grupo aparece en la esquina superior derecha. La primera línea de texto muestra el alias de la llamada entrante. La segunda línea de texto muestra `Llamada a todos en el emplazamiento`. La radio desactiva el silencio y las llamadas entrantes suenan a través del altavoz de la radio.

Una vez que la llamada a todos en sitio finaliza, la radio vuelve a la pantalla en la que estaba antes de recibir la llamada. Una llamada a todos en sitio no espera un periodo de tiempo predeterminado antes de finalizar.

Las llamadas a todos en el emplazamiento no admiten respuesta.

NOTA:
Consulte Realización de una llamada a todos en sitio en la página 232 para obtener más detalles sobre cómo realizar llamadas a todos en sitio.

La radio deja de recibir la llamada a todos en sitio si cambia a un canal distinto mientras está recibiendo la llamada. Durante una llamada a todos en el emplazamiento, no podrá utilizar ninguna función de los botones programables hasta que termine la llamada.

6.2.5.4

Recepción de una llamada telefónica privada

Cuando reciba una llamada telefónica privada, aparecerá el icono de llamada telefónica como una llamada privada

en la esquina superior derecha. En la primera línea de texto se muestra `Llmda. teléf.`

1 Mantenga pulsado el botón **PTT** para contestar y hablar. Suelte el botón **PTT** para escuchar.

2 Mantenga pulsado para terminar la llamada.

La primera línea de la pantalla muestra `Finalizando`. La segunda línea de la pantalla muestra `Llmda. teléf...` La pantalla vuelve a la pantalla de llamada telefónica.
La pantalla muestra `Llamada finalizada`.

6.2.5.5

Recepción de una llamada telefónica de grupo de conversación

Cuando reciba una llamada telefónica de grupo de conversación, aparecerá el icono de llamada de grupo en la esquina superior derecha. La primera línea de texto muestra `Llamada1`.

Pulse el botón **PTT** para hablar y suéltelo para escuchar.

6.2.5.6

Llamada telefónica multigrupo entrante

Cuando reciba una llamada telefónica multigrupo, aparecerá el icono de llamada a grupo en la esquina superior derecha. En la primera línea de texto se muestra `Llamada multigrupo`. La radio desactiva el silencio y las llamadas a grupo entrantes suenan a través del altavoz de la radio.

6.2.6

Realización de una llamada de radio

Después de seleccionar el canal, puede seleccionar un ID o alias de suscriptor, o el ID o alias de grupo, mediante el uso de:

- El mando del selector de canales.
- Un botón de **acceso instantáneo** programado: la función de acceso instantáneo permite realizar

fácilmente una llamada privada a un ID predefinido. Esta función se puede asignar a la pulsación breve o prolongada de un botón programable. Solo puede asignar un ID a un botón de **acceso instantáneo**. La radio puede tener varios botones de **acceso instantáneo** programados.

- La lista de contactos (consulte Configuración de contactos en la página 250).

NOTA:
La radio debe tener la función de privacidad activada en el canal para enviar una transmisión con la privacidad activada. Solo las radios de destino que dispongan del mismo valor de clave e ID de clave podrán descifrar la transmisión.

Consulte Privacidad en la página 287 para obtener más información.

6.2.6.1

Realización de una llamada con el mando selector de canales

Esta función permite a los usuarios de la radio realizar diferentes tipos de llamadas: llamada grupal, llamada privada, llamada a todos en el sitio, llamada de multigrupo.

6.2.6.1.1

Realización de llamadas a grupo

Para llamar a un grupo de usuarios, la radio deberá estar configurada como parte de ese grupo.

1. Seleccione el canal con el ID o alias de grupo activo. Consulte Selección de un tipo de llamada en la página 225.
2. Mantenga la radio en posición vertical a una distancia de entre 2,5 y 5 cm (1-2 pulgadas) de la boca.
3. Pulse el botón **PTT** para realizar la llamada.

   El indicador LED se ilumina en verde fijo. El icono de llamada a grupo aparece en la esquina superior derecha. La primera línea del texto muestra el alias de la llamada a grupo.
4. Espere hasta que acabe el tono Permitir hablar (si está activado) y hable con claridad al micrófono.
5. Suelte el botón **PTT** para escuchar.

Cuando la radio de destino responda, el indicador LED parpadeará en verde, se activará el sonido de la radio y la respuesta se oirá a través del altavoz de la radio. Se muestra en la pantalla el icono de llamada a grupo, el ID o alias de grupo y el ID o alias de la radio transmisora.

Si no hay actividad de voz durante un periodo de tiempo predeterminado, la llamada finalizará. La radio regresa a la pantalla en la que se encontraba antes de iniciar la llamada.

6.2.6.1.2

Realización de llamadas privadas

Aunque puede recibir o responder a una llamada privada iniciada a través de una radio individual autorizada, su radio deberá estar programada para que pueda iniciar una llamada privada.

Oirá un tono indicador negativo cuando realice una llamada privada a través de Lista de contactos, registro de llamadas, el botón de **acceso de marcación rápida,**o el botón selector de canales, si esta función no está activada.

Utilice las funciones Mensaje de texto o Alerta de llamada para contactar con una radio específica. Consulte Mensajes de texto en la página 155 o Funcionamiento de las alertas de llamada en la página 259 para obtener más información.

1 Lleve a cabo una de las siguientes acciones.
   - Seleccione el canal con el alias o ID de suscriptor activo. Consulte Selección de un tipo de llamada en la página 225.
   - Pulse el botón de **acceso de marcación rápida** programado.

2 Mantenga la radio en posición vertical a una distancia de entre 2,5 y 5 cm (1-2 pulgadas) de la boca.

3 Pulse el botón **PTT** para realizar la llamada.

   El indicador LED se ilumina en color verde fijo. El icono de Llamada privada aparece en la esquina superior derecha. La primera línea de texto muestra el alias del suscriptor de destino. La segunda línea de texto muestra el estado de la llamada.

4 Espere hasta que acabe el tono Permitir hablar (si está activado) y hable con claridad al micrófono.

5 Suelte el botón **PTT** para escuchar.

Cuando la radio de destino responda, el indicador LED parpadeará en verde.

Si no hay actividad de voz durante un periodo de tiempo predeterminado, la llamada finalizará. Se oye un tono breve. La pantalla muestra `Llamada finalizada`.

Puede que la radio esté programada para realizar una verificación de presencia de radio antes de configurar la llamada privada. Si la radio de destino no está disponible, oirá un tono breve y verá un aviso pequeño negativo en la pantalla.

6.2.6.1.3

Realización de una llamada a todos en sitio

Esta función permite transmitir a todos los usuarios del emplazamiento que no estén realizando otra llamada en ese momento. La radio debe estar programada para que pueda utilizarse esta función.

Los usuarios del canal/sitio no pueden responder a una llamada a todos en el emplazamiento.

1. Seleccione el canal con el alias de grupo de llamada a todos en el emplazamiento activo. Consulte Selección de un tipo de llamada en la página 225.
2. Mantenga la radio en posición vertical a una distancia de entre 2,5 y 5 cm (1-2 pulgadas) de la boca.
3. Pulse el botón **PTT** para realizar la llamada.

   El indicador LED se ilumina en color verde fijo. El icono de llamada de grupo aparece en la esquina superior derecha. La primera línea de texto muestra el mensaje `Site All Call` (Llamada a todos en el emplazamiento).
4. Espere hasta que acabe el tono Permitir hablar (si está activado) y hable con claridad al micrófono.

6.2.6.1.4

Realización de una llamada multigrupo

Esta función permite transmitir a todos los usuarios de varios grupos. La radio debe estar programada para que pueda utilizarse esta función.

NOTA:
los usuarios de los grupos no pueden responder a una llamada multigrupo.

1 Gire el selector de canales para elegir el ID o alias de grupo.

2 Pulse el botón **PTT** para realizar la llamada.

El indicador LED se ilumina en color verde fijo. La pantalla mostrará el ID o alias de multigrupo.

Espere hasta que acabe el tono Permitir hablar (si está activado) y hable con claridad al micrófono.

6.2.6.1.5

Realización de llamadas privadas con el botón de Llamada por marcación rápida

NOTA:
la pulsación de los botones programables debe efectuarse desde la pantalla de inicio.

La función Llamada por marcación rápida permite realizar fácilmente una llamada privada a un ID o alias de llamada privada predefinido. Esta función se puede asignar a la pulsación breve o prolongada de un botón programable.

SOLO puede tener un alias o ID asignado a un botón de Llamada por marcación rápida. La radio puede tener varios botones programados de Llamada por marcación rápida.

1 Pulse el botón programado de **Llamada instantánea** para efectuar una llamada privada al ID o alias de llamada privada predefinido.

2 Mantenga la radio en posición vertical a una distancia de entre 2,5 y 5 cm (1-2 pulgadas) de la boca.

3 Pulse el botón **PTT** para realizar la llamada.

El indicador LED se ilumina en color verde fijo.

La pantalla mostrará el ID o alias de llamada privada.

4 Espere hasta que acabe el tono Permitir hablar (si está activado) y hable con claridad al micrófono.

5 Suelte el botón **PTT** para escuchar.

Cuando la radio a la que se llama responda, el indicador LED parpadeará en verde.

Si no hay actividad de voz durante un periodo de tiempo predeterminado, la llamada finalizará.

6.3

Funciones avanzadas en modo Connect Plus

En este capítulo se explican cómo se utilizan las funciones disponibles en la radio.

6.3.1

Recordatorio de canal de inicio

Esta función activa un recordatorio cuando la radio no está configurada en el canal de inicio durante un período de tiempo.

Si esta función está activada a través del CPS, el tono de recordatorio de canal de inicio y el anuncio suenan, la primera línea de la pantalla muestra `Sin` y la segunda línea muestra `canal principal` periódicamente cuando la radio no está configurada en el canal de inicio durante un período de tiempo.

Puede responder al recordatorio realizando una de las acciones siguientes:

- Volver al canal de inicio.
- Silenciar el recordatorio temporalmente con el botón programable.
- Establecer un nuevo canal principal con el botón programable.

6.3.1.1

Silenciar el recordatorio de canal de inicio

Cuando se activa el recordatorio del canal de inicio, puede silenciarlo temporalmente mediante la siguiente acción.

Pulse el botón programable **Silenciar recordatorio del canal de inicio**.

La primera línea de la pantalla muestra `HCR` y la segunda línea muestra `silenciado`.

6.3.1.2

Configuración de un nuevo canal de inicio

Cuando se activa el recordatorio del canal de inicio, puede configurar un nuevo canal de inicio mediante la realización de una de las siguientes acciones:

- Pulse el botón programable **Restablecer canal principal**.

  La primera línea de la pantalla muestra el alias del canal y la segunda línea muestra `Nuevo canal principal`.

- Establecer un nuevo canal de inicio desde el menú:

  a. pulse OK para acceder al menú.

  b. Pulse ▲ o ▼ para acceder a `Utilidades` y pulse OK para seleccionar.

  c. Pulse ▲ o ▼ para acceder a `Configuración de la radio` y pulse OK para seleccionar.

d. Pulse ▲ o ▼ para acceder a `Canal principal` y pulse OK para seleccionar.

e. Seleccione en la lista de canales válidos.

La pantalla muestra ✓ junto al alias de canal de inicio seleccionado.

6.3.2

Repliegue auto

Repliegue auto es una función del sistema que permite seguir realizando y recibiendo llamadas que no sean de emergencia en el contacto de grupo seleccionado cuando se producen determinados tipos de fallo del sistema Connect Plus.

Si se presenta uno de estos fallos, la radio prueba a itinerar a otro emplazamiento diferente de Connect Plus. Este proceso de búsqueda puede dar lugar a que la radio localice un emplazamiento de Connect Plus que funcione o un "canal de repliegue" (si la radio tiene habilitada la función de repliegue automático). Un canal de repliegue es un repetidor que normalmente forma parte de un emplazamiento de Connect Plus que funciona, pero que no puede comunicar en ese momento con su controlador de emplazamiento o con la red de Connect Plus. En el modo de seguridad, el repetidor funciona como un repetidor digital independiente. El modo de seguridad automática solo da soporte a las llamadas de grupo no de emergencia. Ningún otro tipo de llamada tiene soporte en el modo de seguridad.

6.3.2.1

Indicaciones del modo Repliegue auto

Cuando la radio utilice un canal de repliegue escuchará el "tono de repliegue" intermitente aproximadamente cada 15 segundos (excepto al transmitir). La pantalla muestra periódicamente el mensaje "Canal de repliegue". La radio solo permite el uso de PTT en el grupo de contacto seleccionado (llamada de grupo, llamada multigrupo o llamada a todos en sitio). No podrá realizar ningún otro tipo de llamada.

6.3.2.2

Realización/recepción de llamadas en modo de seguridad

NOTA:
únicamente escuchan las llamadas las radios que controlan el mismo canal de seguridad y que están seleccionadas en el mismo grupo. Las llamadas no se conectan a otros emplazamientos o repetidores. En el modo de seguridad no están disponibles las llamadas de voz de emergencia ni las alertas de emergencia. Si se pulsa el botón de emergencia en el modo de seguridad, la radio emitirá un tono de pulsación de tecla no válida. Las radios con pantalla también presentarán el mensaje "Función no disponible".

Las llamadas privadas (de radio a radio) y telefónicas no están disponibles en el modo de repliegue. Si se intenta realizar una llamada a un contacto privado, se recibe un tono de denegación. En este punto, deberá seleccionar el contacto de grupo que le interese. Además, tampoco hay soporte para las llamadas de monitor remoto, alerta de llamada, verificación de radio, habilitación de radio, deshabilitación de radio, mensajería de texto, actualizaciones de ubicación y datos de paquete.

Ni hay soporte de acceso de canal de tráfico mejorado (ETCA, Enhanced Traffic Channel Access) en el modo Repliegue auto. Si dos usuarios (o más) pulsan el botón **PTT** al mismo tiempo (o casi al mismo tiempo), es posible que ambas radios transmitan hasta que se suelte el botón **PTT**. En tal caso, cabe la posibilidad de que ninguna de las transmisiones sea comprensible para las radios receptoras.

La realización de llamadas en el modo de seguridad es similar al funcionamiento normal. Basta con seleccionar el contacto de grupo que se desee utilizar (mediante el método de selección de canal normal de la radio) y, a continuación, pulsar el botón **PTT** para iniciar la llamada. Es posible que otro grupo ya esté utilizando el canal. En tal caso, se recibe un tono de ocupado y en la pantalla aparece “Canal ocupado”. Puede seleccionar los contactos de grupo, multigrupo o llamada a todos en sitio con el método normal de selección de canal de la radio. Mientras la radio funciona en el canal de seguridad, el funcionamiento de multigrupo es idéntico al de los demás grupos. Solo las radios seleccionadas en ese momento en el mismo multigrupo pueden escucharlo.

6.3.2.3

Reanudación del funcionamiento normal

Cuando el emplazamiento vuelva al funcionamiento normal mientras la radio esté dentro del alcance del repetidor de seguridad, la radio saldrá automáticamente del modo Repliegue auto. Se oye un “beep” de registro cuando la radio se registra correctamente. Si cree que se encuentra dentro del alcance de un emplazamiento que funciona (que no está en modo Repliegue auto), puede pulsar el botón de solicitud de itinerancia (si está programado en su radio) para forzar que la radio busque un emplazamiento disponible y se registre en él. Si ningún otro emplazamiento está disponible, la radio volverá al modo de seguridad automática una vez finalizada la búsqueda. Si pierde la cobertura del repetidor de seguridad, la radio entrará en el modo de búsqueda (en la pantalla aparecerá `Buscando`).

6.3.3

Verificación de radio

Si está activada, esta función le permite determinar si hay otra radio activa en un sistema sin tener que molestar al usuario de dicha radio. No se muestran notificaciones visuales ni sonoras en la radio de destino.

Esta función solo se aplica a los ID o alias de suscriptor.

6.3.3.1

Envío de una verificación de radio

1 Acceso a la función de verificación de radio.

Control de radio	Pasos
Botón Verificación de radio programado	**a** Pulse el botón programable **Verificación de radio**. **b** Pulse ▲ o ▼ hasta llegar al alias o ID de suscriptor que desee y pulse OK para seleccionar.
Menú	**a** pulse OK para acceder al menú. **b** Pulse ▲ o ▼ para ir a `Contactos` y pulse OK para seleccionar. **c** Pulse ▲ o ▼ hasta llegar al alias o ID de suscriptor que desee y pulse OK para seleccionar. **d** Pulse ▲ o ▼ para acceder a `Verificar radio` y pulse OK para seleccionar.

La pantalla muestra el alias de destino, lo que indica que la solicitud está en curso. El indicador LED se ilumina en color verde fijo.

2 Espere a que se produzca la confirmación.

Si la radio de destino está activa en el sistema, se reproducirá un tono y en la pantalla aparecerá `Radio objet. disponible.`

Si la radio de destino no está activa en el sistema, se reproducirá un tono y la pantalla mostrará `Radio objet. no disponible.`

La radio vuelve a la pantalla de alias o ID de suscriptor cuando se inicia a través del menú.

La radio vuelve a la pantalla de inicio si se inicia a través del botón programable.

6.3.4

Monitorización remota

Utilice la función Monitor remoto para encender el micrófono de una radio de destino (solo el alias o ID de suscriptor). El LED verde parpadeará una vez en el suscriptor de destino. Se puede utilizar esta función para supervisar de manera remota toda la actividad audible alrededor de la radio de destino.

La radio debe estar programada para que pueda utilizarse esta función.

6.3.4.1

Iniciación del monitor remoto

NOTA:
El monitor remoto se detiene automáticamente después de la duración programada o cuando se intenta iniciar una transmisión, cambiar los canales o apagar la radio.

1 Acceder a la función Monitor remoto.

Control de radio	Pasos
Botón Monitor remoto programado	**a** Pulse el botón **Monitor remoto** programado. **b** Pulse ▲ o ▼ hasta llegar al alias o ID de suscriptor que desee y pulse OK para seleccionar.
Menú	**a** pulse OK para acceder al menú.

Control de radio	Pasos
	b Pulse ▲ o ▼ para ir a `Contactos` y pulse OK para seleccionar. **c** Pulse ▲ o ▼ hasta llegar al alias o ID de suscriptor que desee y pulse OK para seleccionar. **d** Pulse ▲ o ▼ para ir a `Marcación manual` y pulse OK para seleccionar. **e** Pulse ▲ o ▼ para ir a `Mon. remoto` y pulse OK para seleccionar.

La primera línea de texto muestra el mensaje `Monitor remot.`. La segunda línea de texto muestra el alias de destino, lo que indica que la solicitud está en curso. El indicador LED se ilumina en color verde intermitente.

2 Espere a que se produzca la confirmación.

Si es correcto, suena un tono indicador positivo y en la pantalla aparece `Mon. remot. correcto`. La radio comienza a reproducir el audio de la radio que se supervisa durante la duración programada y la pantalla muestra `Monitor remot.`, seguido del alias de destino. Cuando el temporizador indica que se ha agotado el tiempo, la radio emite un tono de alerta y el indicador LED se apaga.

Si no es correcto, la radio emite un tono indicador negativo y en la pantalla aparece `Error mon. remot.`

6.3.5
Escaneo

Esta función permite que la radio busque y se una a llamadas de grupos definidos en una lista de rastreo preprogramada. Cuando se activa el rastreo, el icono que lo indica aparece en la barra de estado y el indicador LED parpadea en amarillo cuando esté inactivo.

6.3.5.1

Inicio y detención del rastreo

NOTA:
Este procedimiento activa o desactiva la función de Rastreo para todas las zonas de Connect Plus con el mismo ID de red que la zona seleccionada actualmente. Es importante tener en cuenta que incluso cuando la función de rastreo se activa mediante este procedimiento ésta puede estar desactivada para algunos grupos (o todos) de la lista de rastreo. Consulte Edición de la lista de rastreo en la página 244 para obtener más información.

Puede encender y apagar el rastreo pulsando el botón **Rastreo** programado**O** siguiendo el procedimiento que se describe a continuación.

1 pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Rastrear` y pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a `Encender` o `Apagar` y pulse OK para seleccionar.

- La pantalla muestra `Rastreo activado` si el rastreo está activado.
- El menú Rastreo muestra `Apagar` si el rastreo está activado.
- La pantalla muestra `Rastreo desactivado` si el rastreo está desactivado.
- El menú Rastreo muestra `Encender` si el rastreo está desactivado.

6.3.5.2

Respuesta a una transmisión durante un rastreo

Durante el rastreo, la radio se detiene en un grupo en el que detecte actividad. La radio busca continuamente a

cualquier miembro de la lista de rastreo cuando está inactivo en el canal de control.

1 Mantenga la radio en posición vertical a una distancia de entre 2,5 y 5 cm (1-2 pulgadas) de la boca.

2 Pulse el botón **PTT** durante el tiempo muerto.

El indicador LED se ilumina en color verde fijo.

3 Espere hasta que acabe el tono Permitir hablar (si está activado) y hable con claridad al micrófono.

4 Suelte el botón **PTT** para escuchar.

Si no responde dentro del periodo de tiempo muerto, la radio vuelve a realizar el rastreo de otros grupos.

6.3.6

Rastreo configurable por el usuario

Si el menú Editar lista está activado, el usuario puede agregar y eliminar los miembros del menú Añadir miembro. Un miembro de la lista de rastreo debe ser un contacto de grupo habitual (p. ej., no llamada a todos en sitio o multigrupo/llamada a todos por toda la red) que esté asignado a una posición del selector de canales en una zona de Connect Plus con el mismo ID de red que la zona seleccionada actualmente. El alias del grupo de conversación no debe coincidir con ningún grupo de conversación que se haya incluido en la actual lista de rastreo de la zona.

El rastreo se puede habilitar o deshabilitar desde el menú o con la pulsación del botón programado de **Activar/ desactivar rastreo**.

Esta función solo se admite cuando no hay una llamada en curso en la radio. Cuando se está escuchando una llamada, no se puede escanear la existencia de otras llamadas a grupo, por lo que no podrá saber si hay alguna en progreso. Una vez finalizada su llamada, la radio volverá al intervalo de tiempo del canal de control y podrá escanear los grupos de la lista de rastreo.

6.3.7

Edición de la lista de rastreo

NOTA:
Si la entrada de la lista de rastreo corresponde al grupo seleccionado en ese momento, escuchará la actividad de ese grupo con independencia de que en la lista aparezca o no una marca de verificación. Siempre que una radio no esté ocupada con una llamada, escuchará la actividad de su grupo seleccionado, multigrupo y llamada a todos en sitio, así como el grupo de reversión de emergencia predeterminado (si está configurada para uno). Esta operación no se puede desactivar. Si se activa el Rastreo, la radio también escuchará la actividad de los miembros activos de la lista de rastreo de zona.

La lista de rastreo determina qué grupos se pueden escanear. Se crea al programar la radio. Si la radio se programa para permitir que se edite la lista de rastreo, podrá:

- Habilitar/deshabilitar el rastreo para los grupos concretos de la lista.
- Agregar y borrar miembros desde el menú Agregar miembro. Consulte la Añadir o borrar un grupo a través del menú Añadir miembros en la página 245.

NOTA:
Un miembro de la lista de rastreo debe ser un contacto de grupo habitual (no llamada a todos en sitio o multigrupo/llamada a todos por toda la red) que esté asignado a una posición del selector de canales en una zona de Connect Plus con el mismo ID de red que la zona seleccionada actualmente.
El alias del grupo de conversación no debe coincidir con ningún grupo de conversación que se haya incluido en la actual lista de rastreo de la zona.

1 pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Ver/editar lista` y pulse OK para seleccionar.

3 Pulse ▲ o ▼ hasta el nombre de grupo que desee.

Si hay una marca de verificación delante del nombre del grupo, el rastreo está habilitado para ese grupo.

Si no hay ninguna marca de verificación delante del nombre del grupo, el rastreo está deshabilitado para ese grupo.

4 OK para seleccionar el grupo que desee.

La pantalla muestra Activar si el rastreo está desactivado actualmente para el grupo.

La pantalla muestra Desactivar si el rastreo está activado actualmente para el grupo.

5 Seleccione la opción mostrada (Activar o Desactivar) y pulse OK para seleccionar.

En función de la opción seleccionada, la radio muestra de forma momentánea Rastreo activado o Rastreo desactivado como confirmación.

La radio muestra la lista de rastreo de zonas de nuevo. Si el rastreo está activado para el grupo, la marca de verificación se muestra delante el nombre del grupo. Si el rastreo está deshabilitado para el grupo, la marca de verificación se borra de delante del nombre del grupo.

6.3.8

Añadir o borrar un grupo a través del menú Añadir miembros

La radio Connect Plus no permite colocar un número de grupo duplicado o un alias de grupo duplicado en una lista de rastreo de zona (o mostrarlo como “candidato de rastreo”). Por lo tanto, la lista de “candidatos de rastreo” descrita en paso 6 y paso 7 cambia en ocasiones después de agregar o borrar un grupo de la lista de rastreo de zona.

Si la radio se ha programado para permitirle editar la lista de rastreo, puede usar el menú Añadir miembros para agregar un grupo a la lista de rastreo de la zona seleccionada en ese momento o eliminar un grupo de la lista de rastreo de la zona seleccionada en ese momento.

1 pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a la opción de rastreo y pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a <Añadir miembros> y pulse OK para seleccionar.

La pantalla muestra Añadir miembros de zona n (n = número de zona de Connect Plus de la primera zona de Connect Plus de la radio con el mismo ID de red que la zona seleccionada actualmente).

4 Lleve a cabo una de las siguientes acciones.

- Si el grupo que desea agregar a la lista de rastreo está asignado a una posición del selector de canales en dicha zona, vaya a paso 6.
- Si el grupo que desea agregar a la lista de rastreo está asignado a una posición del selector de canales en una zona de Connect Plus distinta, vaya a paso 5.

5 Pulse ▲ o ▼ para desplazarse por una lista de zonas de Connect Plus que tienen el mismo ID de red que la zona seleccionada actualmente.

6 Después de localizar la zona de Connect Plus donde el grupo deseado está asignado a una posición en el selector de canales, pulse OK para seleccionar.

La radio muestra la primera entrada de una lista de grupos asignados a una posición del canal en dicha zona. Los grupos de la lista se denominan “candidatos de rastreo” porque se pueden agregar a la lista de rastreo de la zona seleccionada en ese momento (o ya se encuentran en la lista de rastreo de la zona).

Si la zona no tiene ningún grupo que se pueda agregar a la lista de rastreo, la radio indica Sin candidatos.

7 Pulse ▲ o ▼ para desplazarse por la lista de grupos de candidatos.

Si aparece un signo más (+) justo antes del alias de grupo, indica que el grupo está ya en la lista de rastreo de la zona seleccionada.

Si no aparece el signo más (+) justo antes del alias, el grupo no se encuentra en la lista de rastreo, pero es posible agregarlo.

8

Pulse OK cuando aparezca el alias de grupo deseado.

Si este grupo no figura en la lista de rastreo de la zona que está seleccionada, aparece el mensaje `Agregar` (alias de grupo).

Si este grupo ya figura en la lista de rastreo de la zona que está seleccionada, aparece el mensaje `Borrar` (alias de grupo).

9

Pulse OK para aceptar el mensaje que se muestra (`Agregar` o `Borrar`).

Si borra un grupo de la lista, sabrá que la operación se ha llevado a cabo correctamente porque el signo más (+) ya no aparecerá justo antes del alias.

Si añade un grupo a la lista, sabrá que la operación se ha llevado a cabo correctamente porque el signo más (+) aparecerá antes del alias.

Si intenta agregar un grupo y la lista ya está llena, la radio muestra `Lista llena`. Si esto sucede, será necesario suprimir un grupo de la lista de rastreo antes de añadir uno nuevo.

10

Cuando haya terminado, pulse tantas veces como sea necesario para volver al menú que desee.

6.3.9

Descripción de la operación de rastreo

NOTA:
si la radio se une a una llamada de un miembro de la lista de rastreo de zona de una zona distinta y el temporizador de colgado de llamada expira antes de que haya podido responder, tiene que navegar a la zona y al canal de la lista de miembros de rastreo y comenzar una nueva llamada.

Hay algunas circunstancias en las que puede perder llamadas de los grupos de su lista de rastreo. Es algo normal por los motivos que se indican a continuación; la radio no tendrá ningún problema en estos casos. Se trata del funcionamiento normal del rastreo con Connect Plus.

- La función de rastreo no está activada (compruebe que el icono de rastreo aparece en pantalla).

- El miembro de la lista de rastreo se ha desactivado desde el menú (consulte Edición de la lista de rastreo en la página 244).
- Ya está participando en una llamada.
- No hay ningún miembro del grupo de rastreo registrado en su emplazamiento (solo para sistemas multiemplazamiento).

6.3.10

Escaneo de contestaciones

Si la radio escanea una llamada de la lista de rastreo de grupo seleccionable y pulsa el botón **PTT** durante una llamada escaneada, el funcionamiento de la radio dependerá de si el escaneo de contestaciones estaba habilitado o deshabilitado durante la programación de la radio. Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información.

Escaneo de contestaciones deshabilitado

La radio abandona la llamada escaneada e intenta transmitir el contacto para la posición de canal seleccionada en ese momento. Cuando finalice el tiempo muerto de llamada al contacto seleccionado actualmente, la radio regresa al canal de inicio y se inicia el temporizador de tiempo muerto de escaneo. La radio reanudará el escaneo de grupo una vez finalice el temporizador de tiempo muerto de escaneo.

Escaneo de contestaciones habilitado

Si pulsa el botón **PTT** durante el tiempo muerto de grupo de la llamada escaneada, la radio intentará transmitir al grupo escaneado.

NOTA:
Si escanea una llamada para un grupo que no está asignado a una posición de canal en la zona que esté seleccionada en ese momento y supera el tiempo muerto de la llamada, tendrá que cambiar a la zona correspondiente y seleccionar a continuación la posición de canal del grupo para poder hablar con ese grupo.

6.3.11

Edición de la prioridad en un grupo de conversación

La función de monitor prioritario permite a la radio recibir las transmisiones del grupo de conversación con mayor prioridad automáticamente cuando está en otra llamada. Suena un tono cuando la radio cambia a la llamada con mayor prioridad.

Hay dos niveles de prioridad para los grupos de conversación: `P1` y `P2`. `P1` tiene mayor prioridad que `P2`.

NOTA:
Si se configura el ID del grupo de revisión de emergencia en el CPS de la tarjeta opcional MOTOTRBO Connect Plus, habrá tres niveles de prioridad para los grupos de conversación: P0, P1 y P2. P0 es el ID del grupo de revisión de emergencia permanente y cuenta con prioridad máxima. Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Rastrear` y pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a `Ver/editar lista` y pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir al grupo de conversación deseado y pulse OK para seleccionar.

5 Pulse ▲ o ▼ para ir a `Editar prioridad` y pulse OK para seleccionar.

6 Pulse ▲ o ▼ para ir al nivel de prioridad que desee y pulse OK para seleccionar.

La pantalla muestra un aviso pequeño positivo antes de volver a la pantalla anterior. El icono de prioridad aparecerá a la izquierda del grupo de conversación.

6.3.12

Configuración de contactos

NOTA:
Puede agregar o editar los ID de suscriptor para los contactos de Connect Plus. La eliminación de los ID de suscriptor solo la puede realizar su distribuidor. Si la función Privacidad está activada en un canal, puede realizar llamadas de voz privadas en ese canal. Únicamente las radios de destino que posean la misma clave de privacidad o bien el mismo valor de clave e ID de clave que su radio podrán descodificar la transmisión.

El acceso a listas de contactos depende de la configuración de zona:

- Si solo tiene una zona configurada en la radio, la lista de contactos muestra directamente la lista de la zona actual seleccionada.
- Si hay varias zonas configuradas en la radio, la carpeta de contactos de zona muestra todas las zonas que tienen el ID de red idéntico a la zona actual seleccionada. El usuario puede acceder a los contactos en estas zonas.

La función Contactos proporciona a la radio una "agenda". Cada entrada corresponde a un alias o ID que utiliza para realizar una llamada.

Cada zona proporciona una lista de contactos con hasta 100 contactos. Están disponibles los siguientes tipos de contactos:

- Llamada privada
- Llamada de grupo
- Llamada multigrupo
- Llamada de voz All call en sitio
- Mensaje de texto All call en sitio
- Llamada de despacho

El tipo de contacto Llamada de despacho se utiliza para enviar un mensaje de texto a un PC despachador a través de un servidor de mensajes de texto externo.

6.3.12.1

Realización de una llamada privada desde Contactos

1 pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Contactos` y pulse OK para seleccionar.

Las entradas están ordenadas alfabéticamente.

3 Mantenga la radio en posición vertical a una distancia de entre 2,5 y 5 cm (1-2 pulgadas) de la boca.

4 Pulse el botón **PTT** para realizar la llamada.

El indicador LED se ilumina en color verde fijo. La pantalla muestra el alias del destino.

5 Espere hasta que acabe el tono Permitir hablar (si está activado) y hable con claridad al micrófono.

6 Suelte el botón **PTT** para escuchar.

Cuando la radio a la que se llama responda, el indicador LED parpadeará en verde y la pantalla mostrará el ID del usuario que transmite.

Si no hay actividad de voz durante un periodo de tiempo predeterminado, la llamada finalizará.

Se oye un tono breve. La pantalla muestra `Llamada finalizada`.

6.3.12.2

Realización de una búsqueda de alias de llamada

También puede utilizar la búsqueda de alias o alfanumérica para recuperar el alias de suscriptor que desee.

Esta función solo se puede aplicar si se encuentra en Contactos.

1 pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Contactos` y pulse OK para seleccionar.

Las entradas están ordenadas alfabéticamente.

3 Introduzca el primer carácter del alias que desee y, a continuación, pulse el botón ▲ o ▼ para localizarlo.

4 Mantenga la radio en posición vertical a una distancia de entre 2,5 y 5 cm (1-2 pulgadas) de la boca.

5 Pulse el botón **PTT** para realizar la llamada.

El indicador LED se ilumina en color verde fijo. La pantalla muestra el alias del destino.

6 Espere hasta que acabe el tono Permitir hablar (si está activado) y hable con claridad al micrófono.

7 Suelte el botón **PTT** para escuchar.

Cuando la radio a la que se llama responda, el indicador LED parpadeará en verde.

Si no hay actividad de voz durante un periodo de tiempo predeterminado, la llamada finalizará.

La pantalla muestra `Llam. final.`

6.3.13

Configuración del indicador de llamada

Esta función permite que los usuario de la radio configuren los tono de timbre de llamada y de mensaje de texto.

6.3.13.1

Activación y desactivación de Timbres de llamada para Alertas de llamada

Puede seleccionar, activar o desactivar los tonos de timbre para una alerta de llamada recibida.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para acceder a `Utilidades` y pulse OK para seleccionar.

3 Pulse ▲ o ▼ para acceder a `Configuración de la radio` y pulse OK para seleccionar.

4 Pulse ▲ o ▼ para acceder a `Tonos/Alertas` y pulse OK para seleccionar.

5 Pulse ▲ o ▼ para acceder a `Timbres llamd.` y pulse OK para seleccionar.

6 Pulse ▲ o ▼ para acceder a `Alerta llamd.` y pulse OK para seleccionar.

El tono actual queda indicado por un ✓ .

7 Pulse ▲ o ▼ para ir al tono deseado y pulse OK para seleccionar.

Aparece ✓ junto al tono seleccionado.

6.3.13.2

Activación y desactivación de timbres de llamada para llamadas privadas

Puede activar o desactivar los tonos de timbre de una llamada privada recibida.

1 pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para acceder a `Utilidades` y pulse OK para seleccionar.

3 Pulse ▲ o ▼ para acceder a `Configuración de la radio` y pulse OK para seleccionar.

4 Pulse ▲ o ▼ para acceder a `Tonos/Alertas` y pulse OK para seleccionar.

5 Pulse ▲ o ▼ para acceder a `Timbres llamada` y pulse OK para seleccionar.

6 Pulse ▲ o ▼ para ir a `Llamada privada` y pulse OK para seleccionar.

6.3.13.3

Activación y desactivación de timbres de llamada para los mensajes de texto

Puede activar o desactivar los tonos de timbre para un mensaje de texto recibido.

1 pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para acceder a `Utilidades` y pulse OK para seleccionar.

3 Pulse ▲ o ▼ para acceder a `Configuración de la radio` y pulse OK para seleccionar.

4 Pulse ▲ o ▼ para acceder a `Tonos/Alertas` y pulse OK para seleccionar.

5 Pulse ▲ o ▼ para acceder a `Timbres llamada` y pulse OK para seleccionar.

6 Pulse ▲ o ▼ para ir a `Mensajes de texto` y pulse OK para seleccionar.

El tono actual queda indicado por un ✓ .

7 Pulse ▲ o ▼ para ir al tono deseado y pulse OK para seleccionar.

Aparece ✓ junto al tono seleccionado.

6.3.13.4

Selección de un tipo de tono de alerta

NOTA:
El botón **Tono de alerta** programado se lo asigna su distribuidor o administrador del sistema. Consulte con el distribuidor o administrador del sistema cómo se ha programado la radio.

Puede programar las llamadas de radio para una única llamada de vibración predeterminada. Si el estado Todos tonos está deshabilitado, la radio mostrará el icono de Silencio de Todos tonos. Si el estado Todos tonos está habilitado, se mostrará el tipo de tono de alerta relacionado.

La radio vibra una vez si se trata de un estilo de timbre momentáneo. La radio vibra repetidamente si se trata de un estilo de timbre repetitivo. Cuando se ajuste en Tono y vibración, la radio emitirá un tono de llamada específico si hay una transacción de radio entrante (por ejemplo, Alerta de llamada o Mensaje). Suena como un tono indicador positivo o una llamada perdida.

En las radios con baterías compatibles con la función de vibración y que están acopladas a un clip para el cinturón con vibración, las opciones de tono de alerta son Silencio, Tono, Vibración y Tono y vibración.

En las radios con baterías no compatibles con la función de vibración y que no están acopladas a un clip para el cinturón con vibración, el tono de alerta se establece automáticamente en Tono.Las opciones disponibles para el tono de alerta son Silencio y Tono.

Realice las siguientes acciones para seleccionar un tono de alerta.

- Pulse el botón programado **Tono de alerta** para acceder al menú Tono de alerta.
  a. Pulse ▲ o ▼ para seleccionar `Tono`, `Vibración`, `Tono y vibración` o `Silencio` y pulse OK para seleccionar.
- Acceda a esta función mediante el menú.
  a. Pulse OK para acceder al menú.
  b. Pulse ▲ o ▼ para acceder a `Utilidades` y pulse OK para seleccionar.
  c. Pulse ▲ o ▼ para acceder a `Configuración de la radio` y pulse OK para seleccionar.

d. Pulse ▲ o ▼ para acceder a Tonos/Alertas y pulse OK para seleccionar.

e. Pulse ▲ o ▼ para acceder a Tono de alerta y pulse OK para seleccionar.

f. Pulse ▲ o ▼ para seleccionar Tono, Vibración, Tono y vibración o Silencio y pulse OK para seleccionar.

6.3.13.5

Configuración del estilo de vibración

NOTA:
El botón **Estilo de vibración** programado se lo asigna su distribuidor o administrador del sistema. Consulte con el distribuidor o administrador del sistema cómo se ha programado la radio.

El estilo de vibración se activa cuando el clip para el cinturón con vibración está conectado a la radio con una batería compatible con la función de vibración.

Realice una de las siguientes acciones para configurar el estilo de vibración.

- Pulse el botón programado **Estilo de vibración** para acceder al menú Estilo de vibración.

  a. Pulse ▲ o ▼ para seleccionar Corta, Media o Larga y pulse OK para seleccionar.

- Acceda a esta función en el menú.

  a. Pulse OK para acceder al menú.

  b. Pulse ▲ o ▼ para acceder a Utilidades y pulse OK para seleccionar.

  c. Pulse ▲ o ▼ para acceder a Configuración de la radio y pulse OK para seleccionar.

  d. Pulse ▲ o ▼ para acceder a Tonos/Alertas y pulse OK para seleccionar.

  e. Pulse ▲ o ▼ para acceder a Estilo de vibración y pulse OK para seleccionar.

f. Pulse ▲ o ▼ para seleccionar Corta, Media o Larga y pulse OK para seleccionar.

6.3.13.6

Aumento del volumen del tono de alarma

Puede programar su radio para que le avise continuamente cada vez que una llamada de radio se quede sin responder. Esto se realiza mediante un aumento automático y progresivo del volumen del tono de alarma. Esta función se conoce como Escalert.

6.3.14

Funciones del registro de llamadas

La radio realiza el seguimiento de todas las llamadas privadas recientes: salientes, respondidas y perdidas. Utilice la función de registro de llamada para visualizar y gestionar las llamadas recientes.

Puede realizar las siguientes tareas en cada una de las listas de llamadas:

- Eliminar
- Ver detalles

6.3.14.1

Visualización de llamadas recientes

Las listas son Perdidos, Respondidas y Salientes.

1 pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para acceder a Registro de llamadas y pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a la lista que desee y pulse OK para seleccionar.

La pantalla muestra la entrada más reciente en la parte superior de la lista.

4 Pulse ▲ o ▼ para ver la lista.

Pulse el botón **PTT** para iniciar una llamada privada con el ID o alias seleccionado actualmente.

6.3.14.2

Eliminación de una llamada de la lista de llamadas

1 pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para acceder a `Registro de llamadas` y pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a la lista deseada y pulse OK para seleccionar.

Si selecciona una lista de llamadas y no contiene entradas, en la pantalla aparece `Lista vacía`.

4 Pulse ▲ o ▼ hasta llegar al alias o ID que desee y pulse OK para seleccionar.

5 Pulse ▲ o ▼ para `Eliminar` y pulse OK para seleccionar.

6 Lleve a cabo una de las siguientes acciones:

- Pulse OK para seleccionar `Sí` y eliminar la entrada. La pantalla muestra `Entrada eliminada`.
- Pulse ▲ o ▼ para ir a `No` y pulse el botón OK para volver a la pantalla anterior.

6.3.14.3

Visualización de detalles desde una lista de llamadas

1 pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para acceder a `Registro de llamadas` y pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a la lista deseada y pulse OK para seleccionar.

4 Pulse ▲ o ▼ hasta llegar al alias o ID que desee y pulse OK para seleccionar.

5 Pulse ▲ o ▼ para acceder a `Ver detalles` y pulse OK para seleccionar.

La pantalla muestra los detalles de la lista de llamadas.

6.3.15

Funcionamiento de las alertas de llamada

Los avisos de alertas de llamada le permiten avisar a un usuario determinado de radio para que vuelva a llamarle cuando pueda.

A esta función se accede a través del menú mediante contactos.

6.3.15.1

Respuesta a alertas de llamada

Siga el procedimiento para responder a alertas de llamada con la radio.

Cuando se recibe una alerta de llamada:

- Se oye un tono repetitivo.
- El indicador LED parpadea en amarillo.
- La pantalla muestra la lista de notificaciones y aparece una alerta de llamada con el alias o ID de la radio que realiza la llamada.

En función de la configuración de su distribuidor o administrador del sistema, puede responder a una alerta de llamada realizando una de las siguientes opciones:

- Pulse el botón **PTT** para responder con una llamada privada directamente a la persona que llama.
- Pulse el botón **PTT** para continuar la comunicación normal con el grupo de conversación.
  La alerta de llamada se mueve a la opción de llamadas perdidas en el menú Registro de llamadas. Puede responder al autor de la

llamada perdida desde el registro de llamadas perdidas.

Consulte Lista de notificaciones en la página 176 y Funciones del registro de llamadas en la página 131 para obtener más información.

6.3.15.2

Realización de una alerta de llamada desde la lista de contactos

1 pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Contactos` y pulse OK para seleccionar.

3 Siga uno de los pasos que se describe a continuación para seleccionar el alias o ID de suscriptor:

- seleccione el alias de suscriptor directamente
- Pulse ▲ o ▼ hasta el alias del suscriptor requerido y pulse OK para seleccionar.

4 Pulse ▲ o ▼ para acceder a `Alerta de llamada` y pulse OK para seleccionar.

La pantalla muestra `Alerta de llamada: <alias o ID del suscriptor>Alerta llamd.` y el alias o ID del suscriptor, lo cual indica que la alerta de llamada se ha enviado.

El indicador LED se ilumina en color verde fijo cuando la radio envía la alerta de llamada.

Si se recibe la confirmación de la alerta de llamada, la pantalla muestra `Alerta de llamada correcta`.

Si no se recibe la confirmación de la alerta de llamada, la pantalla muestra `Error alerta de llamada`.

6.3.15.3

Realización de una alerta de llamada con el botón de acceso de marcación rápida

Pulse el botón de **acceso de marcación rápida** programado para realizar una alerta de llamada a un alias predefinido.

La pantalla muestra `Alerta llamd.` y el alias o ID de suscriptor, lo cual indica que la alerta de llamada se ha enviado.
El indicador LED se ilumina en color verde fijo cuando la radio envía la alerta de llamada.

Si se recibe la confirmación de la alerta de llamada, la pantalla muestra `Alerta llamd. correcta`.

Si se recibe la confirmación de la alerta de llamada, la pantalla muestra `Error alerta llamd.`.

6.3.16

Modo Silenciar

El modo Silenciar ofrece al usuario la opción de silenciar todos los indicadores de audio de la radio.

Cuando se inicia el modo Silenciar, se silencian todos los indicadores de audio de la radio, con excepción de las funciones con mayor prioridad como las operaciones de emergencia.

Cuando se sale del modo Silenciar, la radio vuelve a utilizar tonos y transmisiones de audio.

NOTA:
Se trata de una función adquirible. Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información.

6.3.16.1

Activación del modo Silenciar

Siga el procedimiento para activar el modo Silenciar.

Lleve a cabo una de las siguientes acciones:

- Acceda a esta función a través del botón programable **Modo Silenciar**.
- Acceda a esta función colocando la radio boca abajo momentáneamente.

En función del modelo de radio, la función boca abajo se puede activar desde el menú de la radio o si lo hace el administrador del sistema. Póngase en

contacto con el distribuidor o el administrador del sistema para obtener más información.

IMPORTANTE:
Los usuarios no pueden activar la función Man Down o boca abajo a la vez. No es posible tener ambas funciones activas simultáneamente.

NOTA:
La función boca abajo solo se aplica a DP4601e .

Cuando se activa el modo Silenciar ocurre lo siguiente:

- Suena un tono indicador positivo.
- La pantalla muestra `Modo de silenciado activado.`
- La luz LED roja empieza a parpadear y sigue haciéndolo hasta que se sale del modo Silenciar.
- Se muestra el icono del **Modo Silenciar** en la pantalla de inicio.
- La radio está silenciada.
- El temporizador del modo Silenciar comienza la cuenta atrás que tiene configurada.

6.3.16.2

Configuración del temporizador del modo Silenciar

Es posible activar la función modo Silenciar durante un periodo preconfigurado de tiempo mediante la configuración del temporizador del modo Silenciar. La duración del temporizador se configura en el menú de la radio y puede variar de 30 minutos a 6 horas. Cuando el temporizador expira, se sale del modo Silenciar.

Si el temporizador se queda en 0, la radio se queda en el modo Silenciar durante un periodo de tiempo indefinido hasta que la radio se pone boca arriba o se pulsa el botón programado **Modo Silenciar**.

NOTA:
La función boca abajo solo se aplica a DP4601e.

1. Pulse OK para acceder al menú.
2. Pulse ▲ o ▼ para ir a `Herramientas`.Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a `Config. radio`.Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a `Temp. silenc.`. Pulse OK para seleccionar.

5 Pulse ▲ o ▼ para editar el valor numérico de cada dígito y pulse OK.

6.3.16.3

Salida del modo Silenciar

Se puede salir de esta función automáticamente cuando expira el temporizador del modo Silenciar.

Lleve a cabo una de las siguientes operaciones para salir del modo Silenciar manualmente:

- Pulse el botón programado **Modo Silenciar**.
- Pulse el botón **PTT** en cualquier entrada.
- Coloque la radio boca arriba durante un momento.

NOTA:
La función boca abajo solo se aplica a DP4601e.

Cuando se desactiva el modo Silenciar ocurre lo siguiente:

- Suena el tono indicador negativo.
- La pantalla muestra el `Modo de silenciado apagado`.
- El LED que parpadea en rojo se apaga.
- El icono del **modo Silenciar** desaparece de la pantalla de inicio.
- La radio desactiva el silencio y se restaura el estado del altavoz.
- Si el temporizador del modo Silenciar no ha expirado, se detiene.

NOTA:
También se sale del modo Silenciar si el usuario transmite voz o cambia a un canal sin programar.

6.3.17

Funcionamiento de emergencia

NOTA:
Si la radio se programa para iniciar una emergencia de tipo "Silencio" o "Silencio con voz", en la mayoría de los casos sale automáticamente del funcionamiento silencioso una vez concluida la llamada de emergencia o alerta de emergencia. Una excepción a esta regla se presenta cuando se configura "Alerta emerg." como modo de emergencia y "Silencio" como tipo de emergencia. Si la radio se programa de este modo, el funcionamiento silencioso continúa hasta que se cancela mediante la pulsación del botón **PTT** o del botón que se haya configurado para desactivar la emergencia.

En el modo Repliegue auto de Connect Plus, no se admiten las llamadas de voz de emergencia ni la alertas de emergencia. Si desea obtener información adicional, consulte Repliegue auto en la página 236.

Una llamada de emergencia se utiliza para indicar una situación crítica. Se pueden iniciar en cualquier momento y desde cualquier pantalla, incluso si hay actividad en el canal actual. La pulsación del botón de **Emergencia** inicia el modo de emergencia programado. Dicho modo de emergencia programado también se puede iniciar con la activación de la función opcional de hombre caído. La función de emergencia se puede desactivar en la radio.

Su distribuidor puede establecer la duración de la pulsación del botón **Emergencia** programado, excepto para la presión prolongada, que es similar a la del resto de botones:

Pulsación corta
Entre 0,05 y 0,75 segundos.

Pulsación larga
Entre 1,00 y 3,75 segundos.

El botón **Emergencia** se asigna junto con la función Emergencia activada/desactivada. Póngase en contacto con su distribuidor para obtener información acerca del funcionamiento asignado al botón **Emergencia**.

- Si la pulsación corta del botón **Emergencia** está asignada a la activación del modo de emergencia, la pulsación larga del botón **Emergencia** se asignará a la salida del modo de emergencia.
- Si la pulsación larga del botón **Emergencia** está asignada a la activación del modo de emergencia, la pulsación corta del botón **Emergencia** se asignará a la salida del modo de emergencia.

Cuando se selecciona la radio para una zona de Connect Plus, da soporte a tres modos de emergencia:

Llamada de emergencia
Será necesario pulsar el botón **PTT** para hablar en el timeslot de emergencia asignado.

Llamada de emergencia con transmisión de voz posterior
Para la primera transmisión en la ranura de tiempo de emergencia asignada, el micrófono se activa automáticamente y se puede hablar sin pulsar el botón **PTT**. El micrófono permanece activo así durante el periodo de tiempo que se ha programado en la radio. En las transmisiones siguientes de la misma llamada de emergencia será necesario pulsar el botón **PTT**.

Alerta de emergencia
Una alerta de emergencia no es una llamada de voz. Se trata de una notificación de emergencia que se envía a las radios que están configuradas para recibir estas alertas. La radio envía una alerta de emergencia a través del canal de control del emplazamiento en que esté registrada en ese momento. Las radios de la red de Connect Plus que estén programadas a tal fin recibirán la alerta de emergencia (con independencia del emplazamiento de red en que estén registradas).

Solo se puede asignar uno de los modos de emergencia al botón de emergencia por zona. Además, cada modo de emergencia presenta los siguientes tipos:

Normal
La radio transmite una señal de alarma y utiliza un indicador visual o sonoro.

Silencio
La radio transmite una señal de alarma sin utilizar ningún indicador sonoro ni visual. La radio suprime todo sonido o indicación visual de la emergencia hasta que se pulse el botón **PTT** para comenzar a transmitir voz.

Silencio con voz
Tiene el mismo funcionamiento que el modo Silencio, excepto en que la radio activa algunas transmisiones de voz.

6.3.17.1
Recepción de una emergencia entrante

La radio se puede programar para que emita un tono de alerta y también muestre información sobre la emergencia entrante. Si así se ha programado, al recibir la emergencia entrante, la pantalla muestra la pantalla de detalles de la emergencia, con el icono de emergencia, el alias o ID de la radio que ha solicitado la emergencia, el contacto de grupo

que se usa para la emergencia y una línea de información adicional. La información adicional es el nombre de la zona que contiene el contacto de grupo.

En la actualidad, la radio solo muestra las emergencias descodificadas más recientes. Si se recibe una nueva emergencia antes de borrar la anterior, los detalles de la nueva emergencia sustituyen a los de la emergencia anterior.

En función de la programación de la radio, la pantalla de detalles de emergencia (o pantalla de lista de alarmas) permanecerá en la pantalla de la radio incluso después de finalizada la emergencia. Puede guardar los detalles de la emergencia en la lista de alarmas o puede borrarlos según se describe en las siguientes secciones.

6.3.17.2

Almacenamiento de los detalles de emergencia en la lista de alarmas

Guardar los detalles de emergencia en la lista de alarmas le permite ver nuevamente los detalles más adelante seleccionando la lista de alarmas en el menú principal.

1 Mientras se muestra la pantalla de detalles de emergencia (o la lista de alarmas), pulse .

Aparece la pantalla de **salida de la lista de alarmas**.

2 Realice una de las siguientes acciones:

- Seleccione **Sí** y pulse OK para guardar los detalles de emergencia en la lista de alarmas y para salir de la pantalla de detalles de emergencia (o lista de alarmas).
- Seleccione **No** y pulse OK para volver a la pantalla de detalles de emergencia (o lista de alarmas).

6.3.17.3

Eliminación de Detalles de emergencia

1 Mientras se muestra la pantalla de detalles de emergencia, pulse .

Se muestra la pantalla **Borrar**.

2 Realice una de las siguientes acciones:

- Seleccione **Sí** y pulse para borrar los detalles de emergencia.
- Seleccione **No** y pulse para volver a la pantalla de detalles de emergencia.

6.3.17.4

Respuesta a una llamada de emergencia

NOTA:
Si no responde a la llamada de emergencia dentro del tiempo de colgado de llamada de emergencia, esta finalizará. Si desea hablar con el grupo después de que se haya superado el tiempo de colgado de llamada de emergencia, debe seleccionar primero la posición del canal asignada al grupo (si no está ya seleccionada). A continuación, pulse **PTT** para iniciar una llamada de no emergencia al grupo.

1 Al recibir una llamada de emergencia, pulse cualquier botón para detener todas las indicaciones de llamada de emergencia recibidas.

2 Pulse el botón **PTT** para iniciar una transmisión de voz en el grupo de emergencia.

Todas las radios que supervisen este grupo escucharán su transmisión.

3 Espere hasta que acabe el tono Permitir hablar (si está activado) y hable con claridad al micrófono.

El indicador LED verde se iluminará.

4 Suelte el botón **PTT** para escuchar.

Cuando la radio que inicia la emergencia responde, el indicador LED parpadea en verde. Se muestra en la pantalla el icono de llamada a grupo, el ID de grupo y el ID de la radio transmisora.

6.3.17.5

Respuesta a una alerta de emergencia

NOTA:
El contacto de grupo que se usa para la alerta de emergencia no debe usarse para la comunicación de voz. Esto podría evitar que otras radios envíen y reciban alertas de emergencia en el mismo grupo.

Una alerta de emergencia desde un radio indica que el usuario se encuentra en una situación de urgencia. Para responder a la alerta, inicie una llamada privada a la radio que ha declarado la emergencia, inicie una llamada de grupo al grupo de conversación designado, envíe una alerta de llamada a la radio, inicie una solicitud de monitorización remota de esa radio, etc. La respuesta adecuada la determinará su organización y la situación concreta.

6.3.17.6

Ignorar llamada de emergencia de retorno

Esta función mejorada proporciona una opción para que la radio ignore una llamada de emergencia de retorno activa.

Para activar Omitir llamada de emergencia de retorno, la radio debe configurarse en el software de programación del cliente Connect Plus (CPCPS).

Cuando la función está activada, la radio no muestra las indicaciones de llamada de emergencia y no recibe el audio del ID del grupo de reversión de emergencia predeterminado.

Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información.

6.3.17.7

Inicio de una llamada de emergencia

NOTA:
Si la radio se establece en Silencio, no ofrecerá ningún sonido o indicador visual durante el modo de emergencia hasta que se pulse el botón **PTT** para iniciar una transmisión de voz.
Si la radio se establece en Silencio con voz, inicialmente no emite ningún sonido o indicador visual de estar en el modo de emergencia. Sin embargo, la radio se activa para las transmisiones de las radios que respondan a la emergencia. Los indicadores de emergencia solo aparecen después de pulsar el botón **PTT** para iniciar una transmisión de voz desde la radio.

En los modos "Silencio" y "Silencio con voz", la radio sale automáticamente del funcionamiento silencioso cuando termina la llamada de emergencia.

1 Pulse el botón programado de **Emergencia**.

2 Pulse el botón **PTT** para iniciar una transmisión de voz en el grupo de emergencia.

Cuando suelte el botón **PTT**, la llamada de emergencia continuará durante el periodo establecido como Tiempo de colgado de llamada de emergencia.

Si pulsa el botón **PTT** durante este tiempo, la llamada de emergencia proseguirá.

6.3.17.8

Inicio de una llamada de emergencia con transmisión de voz posterior

La radio se debe programar para este tipo de funcionamiento.

Cuando tiene habilitada esta operación, si se pulsa el botón programado de **Emergencia** y la radio recibe la asignación de timeslot, el micrófono se activa automáticamente sin pulsar el botón **PTT**. El estado de micrófono activado también se conoce como “micrófono activo”. El micrófono activo funciona con la primera transmisión de la radio durante la llamada de emergencia. En las transmisiones siguientes de la misma llamada de emergencia será necesario pulsar el botón **PTT**.

1 Pulse el botón programado de **Emergencia**.

2 El micrófono permanece activo como micrófono activo durante el tiempo que especifique la programación del Codeplug de la radio.

Mientras tanto, el LED se iluminará en verde.

3 Mantenga pulsado el botón **PTT** para hablar durante más tiempo del programado.

6.3.17.9

Inicio de una alerta de emergencia

NOTA:
Si la radio se programa para "Silencio" o "Silencio con voz", no proporcionará ningún sonido o indicación visual de que envía una alerta de emergencia. Si se programa para "Silencio", el funcionamiento silencioso continuará indefinidamente hasta que se pulse el botón PTT o el botón programado de "Emergencia desactivada". Si se programa para "Silencio con voz", la radio cancelará automáticamente el funcionamiento silencioso cuando el controlador de emplazamiento difunda la alerta de emergencia.

Pulse el botón naranja de **Emergencia**.

Al transmitir la alerta de emergencia al controlador del emplazamiento, la pantalla de la radio muestra el icono de Emergencia, el contacto de grupo utilizado para la alerta de emergencia y la `Alarma de transmisión`.

Cuando la alerta de emergencia se haya enviado correctamente y se esté emitiendo para que la escuchen otras radios, se reproducirá un tono indicador positivo y en la pantalla de la radio aparecerá `Alarma enviada`. Si la alerta de emergencia no se envía correctamente, se reproducirá un tono indicador negativo y en la pantalla de la radio aparecerá `Error alarma`.

6.3.17.10

Salida del modo de emergencia

NOTA:
Si la llamada de emergencia finaliza por expiración del tiempo de colgado de llamada de emergencia, pero la condición de emergencia sigue presente, pulse nuevamente el botón de **Emergencia** para reiniciar el proceso.

Si inicia una alerta de emergencia presionando el botón **Emergencia** programado, la radio sale automáticamente del modo de emergencia tras recibir una respuesta del sistema Connect Plus.

Después de iniciar una llamada de emergencia mediante la pulsación del botón **Emergencia** programado, se asigna automáticamente un canal a la radio en cuanto queda disponible. Una vez transmitido el mensaje que indica la emergencia, no se puede cancelar la llamada de emergencia. No obstante, si el botón se ha pulsado accidentalmente o la emergencia ya ha pasado, puede que quiera comunicarlo por el canal asignado. Cuando suelte el botón **PTT**, la llamada de emergencia se cancela una vez expira el tiempo de colgado de llamada de emergencia.

Si la radio se ha configurado para emergencia con transmisión de voz posterior, utilice el tiempo asignado al micrófono de emergencia para explicar el error y, a continuación, pulse y suelte el botón **PTT** para interrumpir la transmisión. La llamada de emergencia se interrumpe cuando se agota el tiempo de colgado de llamada de emergencia.

6.3.18

Alarmas de hombre caído

NOTA:
Esta función solo se aplica a DP4600e/DP4601e.

En el modo de seguridad no están disponibles las alarmas de hombre caído. Si desea obtener información adicional, consulte Repliegue auto en la página 236.

En esta sección se describe la función de hombre caído de Connect Plus. Se trata de una función adquirible que puede aplicarse o no a su radio.

La radio portátil de Connect Plus se puede habilitar y programar para una o varias alarmas de hombre caído. El distribuidor o administrador del sistema de radio podrá informarle de si esta función se aplica a su radio y de las alarmas de hombre caído específicas que se hayan programado y activado.

Si la radio se ha programado para una o varias alarmas de hombre caído de las siguientes, es importante que conozca el funcionamiento de la alarma, las indicaciones (tonos) que emite la radio y la acción que debe ejecutar.

La finalidad de las alarmas de hombre caído es alertar a otros usuarios de que podría estar en peligro. Esto se consigue mediante la programación de la radio para que detecte un determinado ángulo de inclinación, la falta de

movimiento o el movimiento, en función de la alarma de hombre caído que esté activada. Si la radio detecta un tipo de movimiento no permitido que no se corrige durante un determinado periodo de tiempo, empieza a reproducir un tono de alerta (si así se ha programado). Entonces, deberá ejecutar una o varias acciones correctivas, conforme se analiza a continuación, en función de la alarma de hombre caído que se haya activado en la radio. Si no se ejecuta ninguna acción correctiva dentro de un periodo de tiempo determinado, la radio inicia automáticamente una emergencia (llamada de emergencia o alerta de emergencia).

- **Alarma de inclinación:** si la radio permanece inclinada con el ángulo especificado o uno superior durante cierto tiempo, reproduce un tono de alerta (si así se ha programado). Para evitar que la radio inicie automáticamente una llamada de emergencia o alerta de emergencia, vuelva a colocarla en posición vertical inmediatamente.
- **Alarma por falta de movimiento:** cuando la radio está quieta durante un periodo de tiempo determinado, reproduce un tono de alerta (si así se ha programado). Para evitar que inicie automáticamente una llamada de emergencia o alerta de emergencia, mueva la radio inmediatamente.
- **Alarma por movimiento:** cuando la radio se mueve durante un periodo de tiempo determinado, reproduce un tono de alerta (si así se ha programado). Para evitar que inicie automáticamente una llamada de emergencia o alerta de emergencia, detenga el movimiento de la radio inmediatamente.

Su distribuidor o administrador del sistema de radio podrá informarle (en su caso) sobre qué alarma de las anteriores se ha activado mediante la programación de la radio. Es posible tener activadas al mismo tiempo las alarmas de inclinación y de falta de movimiento. En tal caso, el tono de alerta se reproduce cuando la radio detecta la primera incidencia de movimiento.

En lugar de realizar las acciones correctivas descritas anteriormente, también puede evitar que la radio inicie la llamada de emergencia o alerta de emergencia con un botón programable, siempre que se haya configurado de este modo. De ello tratan las dos secciones siguientes.

6.3.18.1

Activación y desactivación de alarmas de hombre caído

NOTA:
La configuración y el botón programado **Man Down** se configuran con CPS. Consulte con el distribuidor o administrador del sistema cómo se ha programado la radio.

Si establece la función Man Down con el mayor nivel de sensibilidad y define el estilo de vibración en alto, la radio limitará automáticamente el estilo de vibración al nivel medio. Esta función evita que el nivel alto del estilo de vibración active la función de emergencia Man Down.

El procedimiento para activar o desactivar las alarmas de hombre caído depende de cómo se haya programado la radio. Si se ha programado con un botón de Activar/desactivar alarmas de hombre caído, utilice dicho botón a tal fin. Se aplica a todas las alarmas de hombre caído habilitadas para la radio.

Cuando se utiliza el botón programable para activar las alarmas de hombre caído, la radio reproduce un tono que se va haciendo más agudo y muestra un breve mensaje de confirmación.

Para escuchar los tonos descritos anteriormente al activar y desactivar las alarmas de hombre caído, tanto la radio MOTOTRBO como la tarjeta opcional de Connect Plus deben tener activados los tonos del teclado.

Si la radio se ha programado para activar o desactivar las alarmas de hombre caído a través del menú, realice el siguiente procedimiento.

1. pulse OK para acceder al menú.
2. Pulse ▲ o ▼ para acceder a `Utilidades` y pulse OK para seleccionar.
3. Pulse ▲ o ▼ para ir a `Connect Plus` y pulse OK para seleccionar.
4. Pulse ▲ o ▼ para ir a `Alarmas de hombre caído` y pulse OK para seleccionar.

   Si la alarma de hombre caído está desactivada, se muestra la opción `Activar`.

Si la alarma de hombre caído está activada, se muestra la opción Desactivar.

5 Pulse ▲ o ▼ para Activar o Desactivar y pulse OK para seleccionar.

6.3.18.2

Restablecimiento de alarmas de hombre caído

Si la radio tiene programado el botón para restablecer alarmas de hombre caído o la opción de menú Alarmas de hombre caído, es posible restablecer las alarmas de hombre caído sin necesidad de activarlas o desactivarlas. Con ello se detendrá cualquier tono de alerta de hombre caído que se esté reproduciendo en ese momento y además se restablecerán los temporizadores de alarmas. Sin embargo, aún será necesario corregir la incidencia de movimiento con la acción correctora correspondiente según se ha descrito en la sección de alarmas de hombre caído. Si la incidencia de movimiento no se corrige dentro del periodo de tiempo establecido, el tono de alerta volverá a reproducirse.

El procedimiento para restablecer las alarmas de hombre caído depende de la programación de la radio. Si se ha programado con un botón para restablecer alarmas de hombre caído, utilice dicho botón para restablecerlas. Se aplica a todas las alarmas de hombre caído habilitadas para la radio.

En el caso de utilizar el botón programable para restablecer las alarmas de hombre caído, la radio muestra un breve mensaje de confirmación.

Si la radio se ha programado para que las alarmas de hombre caído se restablezcan a través del menú, utilice el procedimiento siguiente.

1 pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para acceder a Utilidades y pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a Connect Plus y pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a `Alarmas de hombre caído` y pulse OK para seleccionar.

5 Pulse ▲ o ▼ para ir a `Restablecer` y pulse OK para seleccionar.

La radio muestra una breve mensaje de confirmación.

6.3.19

Señal

En esta sección se describe la función Señal. Forma parte de la función adquirible Man Down de Connect Plus. Su distribuidor o el administrador del sistema de radio podrá informarle de si es aplicable a su radio.

Si la radio tiene habilitada y programada alguna de las alarmas de Man Down, también puede tener activada la función Señal.

Así, si la radio inicia automáticamente una llamada de emergencia o alerta de emergencia por una alarma de hombre caído y tiene activada la función Señal, emitirá periódicamente un tono muy agudo, aproximadamente cada diez segundos. El intervalo puede variar en función de si se habla por la radio. El objetivo del tono de señal es ayudar a que los rastreadores le localicen. Si la radio también tiene habilitada la "señal visual", se activará su retroiluminación durante unos segundos cada vez que se reproduzca el tono de señal.

Puede detener la reproducción del tono de señal con un botón programable, si así se ha configurado la radio. De ello tratan las dos secciones siguientes. Si la radio no tiene un botón programable o una opción de menú específicos, para detener el tono de señal basta con apagar y encender la radio o cambiar a una zona diferente (si la radio se ha programado para más de una zona).

6.3.19.1

Encendido y apagado de la señal

El procedimiento para activar o desactivar la señal dependerá de la forma en la que se haya programado la radio. Si se ha programado con un botón de Activar/desactivar señal, utilícelo para habilitar o deshabilitar la función.

- Cuando se utiliza el botón programable para activar la señal, la radio reproduce un tono que se va haciendo más agudo y muestra un breve mensaje de confirmación.

- Cuando se utiliza el botón programable para desactivar la señal, la radio reproduce un tono que se va haciendo más grave y muestra un breve mensaje de confirmación.

Para escuchar los tonos descritos anteriormente al activar y desactivar la señal, tanto la radio MOTOTRBO como la tarjeta opcional de Connect Plus deben tener activados los tonos del teclado. Si la radio se ha programado para activar o desactivar la señal a través del menú, use el procedimiento siguiente.

1 pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para acceder a `Utilidades` y pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a `Connect Plus` y pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a `Señal periódica` y pulse OK para seleccionar.

Si la `Señal periódica` está desactivada actualmente, se muestra la opción `Activar`.

Si la `Señal periódica` está activada actualmente, se muestra la opción `Desactivar`.

5 Pulse ▲ o ▼ para `Activar` o `Desactivar` y pulse OK para seleccionar.

La radio muestra un breve mensaje para confirmar que la Señal de hombre caído se ha habilitado (o deshabilitado).

6.3.19.2
Restablecimiento de la señal

Si la radio tiene programado el botón de Restablecer señal o la opción de menú Señal, es posible restablecer la señal. Con ello se detendrá el tono de señal (así como la señal visual) sin necesidad de desactivar la función. El procedimiento para restablecer la señal depende de la programación de la radio. Si se ha programado con el botón de Restablecer señal, utilícelo a tal fin. En el caso de utilizar el botón programable para restablecer las alarmas de hombre caído, la radio muestra un breve mensaje de confirmación. Si la radio se ha programado para

restablecer la señal a través del menú, use el procedimiento siguiente.

1 pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para acceder a `Utilidades` y pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a `Connect Plus` y pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a `Señal periódica` y pulse OK para seleccionar.

5 Pulse ▲ o ▼ para ir a `Restablecer` y pulse OK para seleccionar.

La radio muestra una breve mensaje de confirmación.

6.3.20

Mensajes de texto

La radio puede recibir datos como, por ejemplo, un mensaje de texto, de otra radio o una aplicación de mensajes de texto.

Existen dos tipos de mensajes de texto: mensajes de texto y mensajes de texto breves DMR (Radio móvil digital). La longitud máxima de un mensaje de texto breve DMR es de 23 caracteres. La longitud máxima de un mensaje de texto es de 280 caracteres, incluida la línea de asunto. La línea de asunto solo aparece al recibir mensajes desde las aplicaciones de correo electrónico.

NOTA:
La longitud máxima de caracteres se aplica solo a los modelos con la última versión de software y hardware. Para modelos de radio con software y hardware más antiguo, la longitud máxima de un mensaje de texto es de 140 caracteres. Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información.

Para el árabe, la orientación de la entrada de texto es de derecha a izquierda.

6.3.20.1

Envío de mensajes de texto rápidos

La radio admite un máximo de 10 mensajes de texto rápidos, que es la configuración programada por el distribuidor.

Mientras se predefinen los mensajes de texto rápido, puede editar cada mensaje antes de enviarlo.

Si está enviando el mensaje, realice las siguientes acciones para seleccionar un destinatario:

- Pulse ▲ o ▼ hasta llegar al alias que desee y pulse OK para seleccionar.
- Pulse ▲ o ▼ para ir a `Marcación manual` y pulse OK para seleccionar. La primera línea de la pantalla muestra `Núm.:`. La segunda línea de la pantalla muestra un cursor intermitente. Introduzca el ID o alias del suscriptor y pulse OK.

La pantalla mostrará `Enviando mensaje` para confirmar que se está enviando el mensaje.

Si el mensaje se envía correctamente, se reproducirá un tono y en la pantalla aparecerá `Mensaje enviado`.

Si el mensaje no se puede enviar, se reproducirá un tono grave y la pantalla mostrará `Envío de mensaje fallido`.

Si no se ha podido enviar el mensaje, la radio regresa a la pantalla de la opción `Reenviar` (consulte Gestión de mensajes de texto que no se han podido enviar en la página 279).

6.3.20.2

Envío de un mensaje de texto rápido con el botón de acceso de marcación rápida

Puede enviar mensajes de texto rápidos mediante el botón programable programado por el distribuidor.

Pulse el botón de **acceso de marcación rápida** programado para enviar un mensaje de texto rápido predefinido a un alias predefinido.

La pantalla mostrará `Enviando mensaje` para confirmar que se está enviando el mensaje.

Si el mensaje se envía, se reproducirá un tono y en la pantalla aparecerá `Mensaje enviado .`

Si el mensaje no se puede enviar, se reproducirá un tono bajo y en la pantalla aparecerá `Envío de mensaje fallido .`

Si no se ha podido enviar el mensaje, la radio regresa a la pantalla de la opción `Volver a enviar` (consulte Gestión de mensajes de texto que no se han podido enviar en la página 279).

6.3.20.3

Gestión de mensajes de texto que no se han podido enviar

Puede seleccionar una de las siguientes opciones mientras se encuentra en la pantalla de la opción `Volver a enviar`:

- Volver a enviar
- Adelante

6.3.20.3.1

Reenvío de mensajes de texto

Pulse OK para volver a enviar el mismo mensaje al mismo alias o ID de grupo/suscriptor.

Si el mensaje se ha enviado correctamente, suena un tono y la pantalla muestra un aviso pequeño positivo.

Si no se puede enviar el mensaje, la pantalla mostrará un aviso pequeño negativo.

6.3.20.3.2

Transferencia de mensajes de texto

Seleccione `Transferir` para remitir el mensaje a otro ID o alias de suscriptor/grupo.

1 Pulse ▲ o ▼ para acceder a `Reenviar` y pulse OK para seleccionar.

2 Para seleccionar el destinatario del mensaje, pulse ▲ o ▼ hasta llegar al alias o ID que desee y pulse OK para seleccionar.

La pantalla mostrará `Enviando mensaje` para confirmar que se está enviando el mensaje.

Si el mensaje se envía correctamente, se reproducirá un tono y en la pantalla aparecerá `Mensaje enviado`.

Si el mensaje no se puede enviar, se reproducirá un tono grave y la pantalla mostrará `Envío de mensaje fallido`.

6.3.20.4

Gestión de mensajes de texto enviados

Cuando se envía un mensaje a otra radio, este se guarda en Enviados. El último mensaje de texto enviado se añade al principio de la lista de Enviados.

La carpeta Enviados es capaz de almacenar los 30 últimos mensajes enviados como máximo. Cuando esté llena, el siguiente mensaje de texto que se envíe sustituirá automáticamente al mensaje de texto más antiguo de la carpeta.

NOTA:

mantenga pulsado ↩, en cualquier momento, para volver a la pantalla de inicio.

6.3.20.4.1

Visualización de mensajes de texto enviados

1 Acceder a la función **Mensaje de texto**.

Controles de la radio	Pasos
Botón Mensaje txt. programado	Pulse el botón **Mensaje txt** programado.
Menú	**a** pulse OK para acceder al menú. **b** Pulse ▲ o ▼ para `Mensajes` y pulse OK para seleccionar.

2 Pulse ▲ o ▼ para ir a `Elementos enviados` y pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir al mensaje requerido y pulse OK para seleccionar.

El icono situado en la esquina superior derecha de la pantalla indica el estado del mensaje (consulte Iconos de Enviados en la página 219).

6.3.20.4.2

Envío de un mensaje de texto enviado

Puede seleccionar una de las siguientes opciones mientras visualiza un mensaje de texto enviado:

- Reenviar
- Adelante
- Eliminar

1 Vuelva a pulsar OK mientras visualiza el mensaje.

2 ▲ o ▼ para ir a una de las siguientes funciones y pulse OK para seleccionar.

Opción	Pasos
Adelante	Seleccione `Transferir` para enviar el mensaje de texto seleccionado a otro alias o ID de grupo/suscriptor

Opción	Pasos
	(consulte Transferencia de mensajes de texto en la página 280).
Eliminar	Seleccione Borrar para borrar el mensaje de texto.
Reenviar	Seleccione Reenviar para reenviar el mensaje de texto seleccionado al mismo ID o alias de grupo/suscriptor. En la pantalla aparecerá Enviando mensaje para confirmar que se está enviando el mismo mensaje a la misma radio de destino. Si el mensaje se envía correctamente, se reproducirá un tono y en la pantalla aparecerá Mensaje enviado. Si el mensaje no se puede enviar, se reproducirá un tono grave y la pantalla mostrará Envío de mensaje fallido.

Opción	Pasos
	Si no se ha podido enviar el mensaje, la radio regresa a la pantalla de la opción Reenviar. Pulse OK para volver a enviar el mensaje al mismo alias o ID de grupo/suscriptor.

Si sale de la pantalla de envío de mensajes mientras se envía el mensaje, la radio actualiza el estado del mensaje en la carpeta Enviados sin realizar ninguna indicación visual ni de audio.

Si la radio cambia de modo o se apaga antes de que se actualice el estado del mensaje en la carpeta Enviados, la radio no puede terminar de enviar los mensajes en curso y los marca automáticamente con un icono de **error de envío**.

La radio admite un máximo de cinco mensajes en curso al mismo tiempo. En este tiempo, la radio no puede enviar mensajes nuevos y los marca automáticamente con un icono de **error de envío**.

6.3.20.4.3

Eliminación de todos los mensajes de texto enviados de la carpeta Enviados

1 Acceder a la función **Mensaje de texto**.

Controles de la radio	Pasos
Botón Mensaje txt. programado	Pulse el botón **Mensaje txt** programado.
Menú	**a** Pulse OK para acceder al menú. **b** Pulse ▲ o ▼ para `Mensajes` y pulse OK para seleccionar.

2 Pulse ▲ o ▼ para ir a `Elementos enviados` y pulse OK para seleccionar.

Si selecciona `Enviados` y no contiene ningún mensaje de texto, en la pantalla aparece `Lista vacía`.

3 Pulse ▲ o ▼ para ir a `Eliminar todo` y pulse OK para seleccionar.

4 Seleccione una de las siguientes.

- Pulse ▲ o ▼ para ir a `Sí` y pulse OK para seleccionar. La pantalla muestra un aviso pequeño positivo.
- Pulse ▲ o ▼ para ir a `No` y pulse OK para volver a la pantalla anterior.

6.3.20.5

Recepción de mensajes de texto

Cuando la radio recibe un mensaje, la pantalla muestra la lista de notificaciones con el alias o ID del remitente y el icono de mensaje.

Puede seleccionar una de las siguientes opciones cuando reciba un mensaje de texto:

- Leer
- Leer luego
- Eliminar

6.3.20.6

Lectura de mensajes de texto

1 Pulse ▲ o ▼ para ir a `¿Desea leer?` y pulse OK para seleccionar.

Se abre el mensaje seleccionado en el buzón.

2 Lleve a cabo una de las siguientes acciones:

- Pulse OK para volver a la bandeja de entrada.
- Pulse OK por segunda vez para responder, reenviar o eliminar el mensaje de texto.

6.3.20.7

Gestión de mensajes de texto recibidos

Utilice el buzón para gestionar sus mensajes de texto. El buzón puede almacenar un máximo de 30 mensajes.

Los mensajes de texto del buzón se ordenan por antigüedad.

La radio admite las siguientes opciones para los mensajes de texto:

- Adelante
- Eliminar
- Eliminar todo

NOTA:
Si el tipo de canal no coincide, solo podrá transferir, borrar o borrar todos los mensajes recibidos.

mantenga pulsado , en cualquier momento, para volver a la pantalla de inicio.

6.3.20.7.1

Visualización de mensajes de texto desde el buzón

1 pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para Mensajes y pulse OK para seleccionar.

3 Pulse ▲ o ▼ para Bandeja de entrada y pulse OK para seleccionar.

4 Pulse ▲ o ▼ paraver los mensajes.

5 Lleve a cabo una de las siguientes acciones:

- Pulse OK para seleccionar el mensaje actual y pulse OK de nuevo para responder, transferir o borrar el mensaje.
- Pulse de forma prolongada para volver a la pantalla de inicio.

6.3.20.7.2

Eliminación de mensajes de texto desde el buzón

1 Acceder a la función **Mensaje de texto**.

Controles de la radio	Pasos
Botón Mensaje txt. programado	Pulse el botón **Mensaje txt** programado.
Menú	**a** pulse OK para acceder al menú. **b** Pulse ▲ o ▼ para Mensajes y pulse OK para seleccionar.

2 Pulse ▲ o ▼ para `Bandeja de entrada` y pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir al mensaje deseado y pulse OK para seleccionar.

4 Pulse OK una vez más para acceder al submenú.

5 Pulse ▲ o ▼ para `Eliminar` y pulse OK para seleccionar.

6 Pulse ▲ o ▼ para ir a `Sí` y pulse OK para seleccionar.

La pantalla muestra `Mensaje eliminado` y la pantalla vuelve al Buzón.

6.3.20.7.3

Eliminación de todos los mensajes de texto desde el buzón

1 Acceder a la función **Mensaje de texto**.

Controles de la radio	Pasos
Botón Mensaje txt. programado	Pulse el botón **Mensaje txt** programado.
Menú	**a** pulse OK para acceder al menú. **b** Pulse ▲ o ▼ para `Mensajes` y pulse OK para seleccionar.

2 Pulse ▲ o ▼ para `Bandeja de entrada` y pulse OK para seleccionar.

Si selecciona `Bandeja de entrada` y no contiene ningún mensaje de texto, en la pantalla aparece `Lista vacía.`

3 Pulse ▲ o ▼ para ir a `Eliminar todo` y pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a `Sí` y pulse OK para seleccionar.

En la pantalla aparecerá `Buzón vacío.`

6.3.21
Privacidad

Si está habilitada, esta función ayuda a evitar que los usuarios no autorizados escuchen conversaciones en un canal mediante el uso de una solución de cifrado basada en software. Las partes de señalización e identificación de usuario de una transmisión no se mezclan.

La radio debe tener la privacidad activada en la posición del selector de canales actual para enviar una transmisión con la privacidad activada, aunque no es un requisito necesario para recibir una transmisión. Mientras se encuentra en una posición del selector de canales con la privacidad activada, la radio puede recibir transmisiones claras (descodificadas).

La radio es compatible con la privacidad mejorada.

Para descodificar una transmisión de datos que tiene la privacidad activada, la radio debe estar programada para tener el mismo valor de clave e ID de clave (para la privacidad mejorada) que la radio que transmite.

Si la radio recibe una llamada codificada que tenga un valor de clave e ID de clave distintos, no oirá nada en absoluto (privacidad mejorada).

Si la radio tiene un tipo de privacidad asignado, la pantalla inicial muestra el icono de seguridad activada o el de seguridad desactivada, excepto cuando la radio envíe o reciba una llamada o alarma de emergencia.

El indicador LED se ilumina en color verde fijo mientras la radio transmite y parpadea rápidamente cuando recibe una transmisión con la función de privacidad habilitada.

Puede acceder a esta función mediante alguna de las acciones siguientes:

- Pulse el botón programable **Privacidad** para activar o desactivar esta función.
- El uso del menú de la radio, como se describe en los pasos que aparecen a continuación.

NOTA:
Puede que algunos modelos de radio no ofrezcan esta función de privacidad. Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información.

1 pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para acceder a `Utilidades` y pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a `Configuración de la radio` o ▲ o ▼ para ir a `Connect Plus` y pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a `Privacidad mejorada`.

Si la pantalla muestra `Encender`, pulse OK para activar la privacidad. La radio muestra un mensaje para confirmar la selección.

Si la pantalla muestra `Apagar`, pulse OK para desactivar la privacidad. La radio muestra un mensaje para confirmar la selección.

Si la radio tiene un tipo de privacidad asignado, aparecen el icono de seguridad activada o el de seguridad desactivada en la barra de estado, excepto cuando la radio envíe o reciba una alerta de emergencia.

6.3.21.1
Realización de una llamada con la privacidad (codificación) activada

Active la privacidad con el botón de privacidad programado o mediante el menú. La radio debe tener la función Privacidad habilitada para la posición de canal seleccionada en ese momento para que pueda enviar

transmisiones con la privacidad activada. Si la posición de canal seleccionada en el momento tiene activada la privacidad, todas las transmisiones de voz que realice la radio estarán codificadas. Esto incluye la llamada de grupo, la llamada multigrupo, la respuesta a las llamadas escaneadas, la llamada a todos en sitio, la llamada de emergencia y la llamada privada. Solo las radios que dispongan del mismo valor de clave e ID de clave podrán descifrar la transmisión.

6.3.22

Seguridad

Puede habilitar o deshabilitar cualquier radio del sistema. Por ejemplo, puede que quiera deshabilitar una radio robada para evitar que el ladrón la utilice y luego activarla cuando la recupere.

NOTA:
las funciones Deshabilitar radio y Habilitar radio están restringidas a las radios que tengan activadas estas funciones. Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información.

6.3.22.1

Desactivación de la radio

1 Para acceder a esta función lleve a cabo alguna de las acciones siguientes:

Controles de la radio	Pasos
Botón Desactivación radio	**a** Pulse el botón **Desactivación radio** programado. **b** Pulse ▲ o ▼ hasta llegar al alias o ID que desee y pulse OK para seleccionar.
Menú de la radio	**a** pulse OK para acceder al menú. **b** Pulse ▲ o ▼ para ir a `Contactos` y pulse OK para seleccionar. Las entradas están ordenadas alfabéticamente.

Controles de la radio	Pasos
	c Siga uno de los pasos que se describe a continuación para seleccionar el alias o ID de suscriptor: • Seleccione el alias o ID que desee directamente. • Pulse ▲ o ▼ hasta llegar al alias o ID que desee y pulse OK para seleccionar. **d** Pulse ▲ o ▼ para acceder a `Desactivación radio` y pulse OK para seleccionar.

La pantalla muestra `Desactivación radio: <<ID o alias de destino>` y el indicador LED parpadea en verde.

2 Espere la confirmación.

Si se realiza correctamente, se reproducirá un tono y la pantalla mostrará `Desh. radio correcto`.

Si hay algún problema, se emitirá un tono grave y en la pantalla aparecerá `Error desh. radio`.

6.3.22.2

Habilitar radio

1 Para acceder a esta función lleve a cabo alguna de las acciones siguientes:

Controles de la radio	Pasos
Botón Habilitar radio	**a** Pulse el botón **Habilitar radio** programado. **b** Pulse ▲ o ▼ hasta llegar al alias o ID que desee y pulse OK para seleccionar.

Controles de la radio	Pasos
Menú de la radio	**a** Pulse OK para acceder al menú. **b** Pulse ▲ o ▼ para ir a `Contactos` y pulse OK para seleccionar. Las entradas están ordenadas alfabéticamente. **c** Siga uno de los pasos que se describe a continuación para seleccionar el alias o ID de suscriptor • Seleccione el alias o ID que desee directamente. • Pulse ▲ o ▼ hasta llegar al alias o ID que desee y pulse OK para seleccionar.

Controles de la radio	Pasos
	d Pulse ▲ o ▼ para acceder a `Activar radio` y pulse OK para seleccionar.

La pantalla muestra `Activar radio: <<ID o alias de suscriptor>` y el indicador LED se ilumina en verde fijo.

2 Espere la confirmación.

Si se realiza correctamente, suena un tono indicador positivo y la pantalla muestra `Habilitar radio correcto.`

Si hay algún problema, suena un tono indicador negativo y en la pantalla aparecerá `Error habilitar radio.`

6.3.23

Funciones de bloqueo por contraseña

Si está habilitada, esta función solo le permite acceder a la radio si introduce la contraseña correcta al encenderla.

6.3.23.1

Acceso a la radio mediante contraseña

1 Encienda la radio.

La radio emite un tono continuo.

2 Introduzca su contraseña de cuatro dígitos actual. Pulse ▲ o ▼ para editar el valor numérico de cada dígito. Cada dígito cambia a •. Pulse ▶ para pasar al siguiente dígito. Pulse OK para confirmar la selección.

Oirá un tono indicador positivo cada vez que pulse un dígito. Pulse ◀ para borrar cada • de la pantalla.

La radio emite un tono indicador negativo si pulsa ◀ cuando la línea está vacía o si pulsa más de cuatro dígitos.

Si la contraseña es correcta, la radio se enciende. Consulte Encendido de la radio en la página 52.

Si la contraseña es incorrecta, la pantalla muestra `Contraseña incorr.`. Repita paso 2.

La tercera vez que introduce una contraseña incorrecta, la pantalla muestra el mensaje `Contraseña incorr.` y, a continuación, `Radio bloqueada`. Suena un tono y el indicador LED parpadea dos veces en amarillo.

NOTA:
En estado bloqueado, la radio no puede recibir ninguna llamada, ni siquiera llamadas de emergencia.

6.3.23.2

Activación o desactivación del bloqueo por contraseña

1 pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para acceder a `Utilidades` y pulse OK para seleccionar.

3 Pulse ▲ o ▼ para acceder a `Configuración de la radio` y pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a `Bloqueo de contraseña` y pulse OK para seleccionar.

5 Introduzca la contraseña de cuatro dígitos.

Consulte paso 2 en Acceso a la radio mediante contraseña en la página 292.

6 Pulse OK para continuar.

Si la contraseña es incorrecta, la pantalla muestra `Contraseña incorr.` y automáticamente vuelve al menú anterior.

7 Si la contraseña introducida en el paso anterior es correcta, pulse OK para activar o desactivar el bloqueo por contraseña.

La pantalla muestra ✓ junto a Activado.

Desaparece ✓ junto a Habilitado.

6.3.23.3 Desbloqueo de la radio en estado de bloqueo

1 Encienda la radio si se ha apagado después de la situación de bloqueo.

Suena un tono y el indicador LED parpadea dos veces en amarillo. La pantalla muestra `Radio bloqueada`.

2 Espere 15 minutos.

La radio reinicia el temporizador de 15 minutos del estado de bloqueo cuando enciende la radio.

3 Repitapaso 1 y paso 2 en Acceso a la radio mediante contraseña en la página 292.

6.3.23.4

Cambio de la contraseña

1 pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para acceder a `Utilidades` y pulse OK para seleccionar.

3 Pulse ▲ o ▼ para acceder a `Configuración de la radio` y pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a `Bloqueo de contraseña` y pulse OK para seleccionar.

5 Introduzca la contraseña de cuatro dígitos.

Consulte paso 2 en Acceso a la radio mediante contraseña en la página 292.

6 Pulse OK para continuar.

Si la contraseña es incorrecta, la pantalla muestra `Contraseña incorr.` y automáticamente vuelve al menú anterior.

7 Si la contraseña introducida en el paso anterior es correcta, ▲ o ▼ para ir a `Camb. contras.` y pulse OK para seleccionar.

8 Introduzca una nueva contraseña de cuatro dígitos.

Consulte paso 2 en Acceso a la radio mediante contraseña en la página 292.

9 Vuelva a escribir la contraseña de cuatro dígitos introducida previamente. Consulte paso 2 en Acceso a la radio mediante contraseña en la página 292.

10 Pulse OK para continuar.

Si la contraseña que ha vuelto a escribir se corresponde con la que había introducido

previamente, la pantalla mostrará `Contraseña cambiada`.

Si la contraseña que ha vuelto a escribir **NO** coincide con la nueva contraseña introducida previamente, la pantalla mostrará `Contraseñas no coinciden`.

La pantalla vuelve automáticamente al menú anterior.

6.3.24

Funcionamiento de Bluetooth

NOTA:
Si se desactiva a través de CPS, se deshabilitarán todas las funciones relacionadas con Bluetooth y se eliminará la base de datos del dispositivo Bluetooth.

Esta función permite utilizar la radio con un dispositivo habilitado para Bluetooth (accesorio) mediante una conexión Bluetooth. La radio soporta dispositivos activados para Bluetooth de Motorola Solutions y disponibles en el mercado (COTS).

La conexión Bluetooth funciona dentro de un rango de 10 metros (32 pies) de la línea de visión. Esta es una línea sin obstáculos entre la radio y el dispositivo habilitado para Bluetooth.

No es aconsejable dejar la radio lejos y esperar que el dispositivo habilitado para Bluetooth funcione con un alto grado de fiabilidad cuando están separados.

En las zonas periféricas de recepción, la calidad tanto del tono como de la voz comenzará a sonar "distorsionada" o "entrecortada". Para corregir este problema, basta con acercar más la radio y el dispositivo habilitado para Bluetooth entre sí (dentro del alcance definido de 10 metros/32 pies) para volver a recibir el audio con claridad. La función Bluetooth de la radio cuenta con una potencia máxima de 2,5 mW (4 dBm) en el alcance de 10 metros (32 pies).

La radio puede soportar hasta 4 conexiones Bluetooth simultáneas con dispositivos con Bluetooth de distinto tipo. Por ejemplo, unos auriculares y un dispositivo de PTT solo (POD). Las múltiples conexiones con dispositivos habilitados para Bluetooth del mismo tipo no están soportadas.

Consulte el manual de usuario del dispositivo activado para Bluetooth correspondiente para obtener más información sobre todas sus capacidades.

6.3.24.1

Encendido y apagado de la función Bluetooth

1 pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a Bluetooth y pulse OK para seleccionar.

3 Pulse ▲ o ▼ para acceder a Mi estado y pulse OK para seleccionar.

La pantalla muestra Activado y Desactivado. El estado actual se indica mediante ✓ .

4 Lleve a cabo una de las siguientes acciones:

- Pulse ▲ o ▼ para ir a Activado y pulse OK para seleccionar. La pantalla muestra Activado y aparece ✓ a la izquierda del estado seleccionado.
- Pulse ▲ o ▼ para ir a Desactivado y pulse OK para seleccionar. La pantalla muestra Desactivado y aparece ✓ a la izquierda del estado seleccionado.

6.3.24.2

Búsqueda y conexión con un dispositivo Bluetooth

No apague el dispositivo habilitado para Bluetooth ni pulse ⮌ durante las operaciones de búsqueda y conexión, ya que la operación se cancelaría.

1 Encienda el dispositivo habilitado para Bluetooth y colóquelo en modo de acoplamiento. Consulte el manual del usuario del dispositivo habilitado para Bluetooth correspondiente.

2 En la radio, pulse OK para acceder al menú.

3 Pulse ▲ o ▼ para ir a `Bluetooth` y pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a `Dispositivos` y pulse OK para seleccionar.

5 Lleve a cabo una de las siguientes acciones:

- Pulse ▲ o ▼ para ir al dispositivo deseado y pulse OK para seleccionar.
- Pulse ▲ o ▼ para ir a `Buscar dispositivos` y encontrar los dispositivos disponibles. Pulse ▲ o ▼ para ir al dispositivo deseado y pulse OK para seleccionar.

6 Pulse ▲ o ▼ para `Conectar` y pulse OK para seleccionar.

La pantalla muestra `Conectando a <nombre dis>`. Su dispositivo habilitado para Bluetooth puede requerir pasos adicionales para que se complete el acoplamiento. Consulte el manual del usuario del dispositivo habilitado para Bluetooth correspondiente.

Si se realiza correctamente, la pantalla de la radio muestra `<dispositivo> conectado`. Suena un tono y aparece ✓ junto al dispositivo conectado. El icono de Bluetooth conectado aparece en la barra de estado.

Si no se realizó correctamente, la pantalla de radio mostrará `Error conexión`.

6.3.24.3 Búsqueda y conexión desde un dispositivo Bluetooth (modo visible)

No desactive el Bluetooth ni apague la radio durante la búsqueda y conexión, ya que podría cancelar la operación.

1 Active Bluetooth.

Consulte Encendido y apagado de la función Bluetooth en la página 296.

2 pulse OK para acceder al menú.

3 Pulse ▲ o ▼ para ir a Bluetooth y pulse OK para seleccionar.

4 Pulse ▲ o ▼ para Encontrarme y pulse OK para seleccionar.

Otros dispositivos habilitados para Bluetooth pueden detectar ahora la radio durante un tiempo programado. Esto se denomina modo visible.

5 Encienda el dispositivo habilitado para Bluetooth y acóplelo con la radio.

Consulte el manual del usuario del dispositivo habilitado para Bluetooth correspondiente.

6.3.24.4

Desconexión de un dispositivo Bluetooth

1 En la radio, pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a Bluetooth y pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a Dispositivos y pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir al dispositivo deseado y pulse OK para seleccionar.

5 Pulse ▲ o ▼ para acceder a Desconectar y pulse OK para seleccionar.

La pantalla muestra Descon. de <dispositivo>
El dispositivo habilitado para Bluetooth puede requerir pasos adicionales para que se complete la desconexión. Consulte el manual del usuario del dispositivo habilitado para Bluetooth correspondiente.

La pantalla de radio muestra <Dispositivo> desconectado. Suena un tono indicador positivo y ✓

desaparece junto al dispositivo conectado. Desaparece el icono de Bluetooth conectado de la barra de estado

6.3.24.5

Cambio de la salida de audio entre el altavoz interno de la radio y el dispositivo Bluetooth

Puede alternar la salida de audio entre el altavoz interno de la radio y el accesorio externo habilitado para Bluetooth.

Pulse el botón programado **Camb. audio BT**.

- Suena un tono y la pantalla muestra `Redirig. audio a radio`.
- Suena un tono y la pantalla muestra `Redirig. audio a Bluetooth`.

6.3.24.6

Visualización de detalles del dispositivo

1 pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Bluetooth` y pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a `Dispositivos` y pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir al dispositivo deseado y pulse OK para seleccionar.

5 Pulse ▲ o ▼ para acceder a `Ver detalles` y pulse OK para seleccionar.

6.3.24.7

Eliminación del nombre del dispositivo

Puede eliminar un dispositivo desconectado de la lista de dispositivos habilitados para Bluetooth.

1 pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Bluetooth` y pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a `Dispositivos` y pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir al dispositivo deseado y pulse OK para seleccionar.

5 Pulse ▲ o ▼ para `Eliminar` y pulse OK para seleccionar.

La pantalla muestra `Disposit. eliminado`.

6.3.24.8

Ganancia de micrófono Bluetooth

Permite controlar el valor de ganancia del micrófono del dispositivo habilitado para Bluetooth conectado.

1 pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Bluetooth` y pulse OK para seleccionar.

3 Pulse ▲ o ▼ para acceder a `Ganancia de micrófono BT` y pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir al tipo Ganancia de micrófono BT y los valores actuales.

Para editar los valores, pulse OK para seleccionar.

5 Pulse ▲ o ▼ para aumentar o disminuir los valores y pulse OK para seleccionar.

6.3.24.9

Modo Bluetooth visible permanentemente

NOTA:
El modo Bluetooth visible permanentemente solo puede activarse en MOTOTRBO CPS. Si está activado, el elemento `Bluetooth`**no** se mostrará en el Menú y**no** podrá utilizar las funciones de botones programables para Bluetooth.

Otros dispositivos habilitados para Bluetooth podrán localizar la radio pero no se podrán conectar a la misma. Esto permite que los dispositivos dedicados utilicen la posición de la radio en procesos de localización basados en Bluetooth.

Encienda el dispositivo habilitado para Bluetooth y acóplelo con la radio. Consulte el manual de usuario correspondiente del dispositivo habilitado para Bluetooth.

6.3.25

Ubicación en interiores

NOTA:
La función de ubicación en interiores solo se aplica a los modelos que cuentan con la última versión de software y hardware. Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información.

La ubicación en áreas interiores puede utilizarse para realizar un seguimiento de la ubicación de los usuarios de la radio. Cuando Ubicación en interiores está activada, la radio se encuentra en un modo de detección limitado. Las balizas limitadas se utilizan para ubicar la radio y determinar su posición.

6.3.25.1

Activación o desactivación de la ubicación en interiores

Realice una de las siguientes acciones para activar o desactivar la ubicación en interiores.

- Acceda a esta función mediante el menú.

  a. Pulse OK para acceder al menú.

b. Pulse ▲ o ▼ para ir a `Bluetooth` y pulse OK para seleccionar.

c. Pulse ▲ o ▼ para ir a `Ubicación en interiores` y pulse OK para seleccionar.

d. Pulse OK para activar la ubicación en interiores.

La pantalla mostrará `Ubicación en interiores activada`. Oirá un tono indicador positivo.
Ocurrirá una de las siguientes situaciones:

- Si se realiza correctamente, aparecerá el icono Ubicación en interiores disponible en la pantalla de inicio.
- Si no se realiza correctamente, la pantalla muestra `Activación errónea`. Oirá un tono indicador negativo.

e. Pulse OK para apagar la ubicación en áreas interiores.

La pantalla mostrará `Ubicación en interiores desactivada`. Oirá un tono indicador positivo.
Ocurrirá una de las siguientes situaciones:

- Si se realiza correctamente, desaparecerá el icono Ubicación en interiores disponible en la pantalla de inicio.
- Si no se realiza correctamente, la pantalla muestra `Desactivación errónea`. Oirá un tono indicador negativo.

- Acceda a esta función con el botón programable.

a. Pulse de manera prolongada el botón **Ubicación en áreas interiores** para activar la ubicación en áreas interiores.

La pantalla mostrará `Ubicación en interiores activada`. Oirá un tono indicador positivo.
Ocurrirá una de las siguientes situaciones:

- Si se realiza correctamente, aparecerá el icono Ubicación en interiores disponible en la pantalla de inicio.
- Si no se realiza correctamente, la pantalla muestra `Activación errónea`. Si no se realiza correctamente, oirá un tono indicador negativo.

b. Pulse el botón **Ubicación en áreas interiores** para activar la ubicación en áreas interiores.

La pantalla mostrará `Ubicación en interiores desactivada`. Oirá un tono indicador positivo.
Ocurrirá una de las siguientes situaciones:

- Si se realiza correctamente, desaparecerá el icono Ubicación en interiores disponible en la pantalla de inicio.
- Si no se realiza correctamente, la pantalla muestra `Desactivación errónea`. Si no se realiza correctamente, oirá un tono indicador negativo.

6.3.25.2

Acceso a la información de balizas de ubicación en interiores

Siga el procedimiento para acceder la información de las señales periódicas de la ubicación en áreas interiores.

1. Pulse OK para acceder al menú.
2. Pulse ▲ o ▼ para ir a `Bluetooth` y pulse OK para seleccionar.
3. Pulse ▲ o ▼ para ir a `Ubicación en interiores` y pulse OK para seleccionar.
4. Pulse ▲ o ▼ para ir a `Balizas` y pulse OK para seleccionar.

En la pantalla aparece la información de las balizas.

6.3.26

Lista de notificaciones

La radio dispone de una lista de notificaciones que incluye todos los eventos "sin leer" del canal, como por ejemplo, mensajes de texto sin leer, llamadas perdidas y alertas de llamadas.

El icono de notificación aparece en la barra de estado cuando la lista de notificaciones tiene uno o más eventos.

La lista admite un máximo de 40 eventos sin leer. Cuando está completa, el siguiente evento reemplaza automáticamente al evento más antiguo.

NOTA:
Una vez leídos los eventos, se eliminan de la lista de notificaciones.

6.3.26.1

Acceso a la lista de notificaciones

Siga el procedimiento para acceder a la lista de notificaciones de la radio.

1 pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Notificación` y pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir al evento deseado y pulse OK para seleccionar.

Mantenga pulsado para volver a la pantalla de inicio.

6.3.27

Funcionamiento de Wi-Fi

Wi-Fi® es una marca comercial registrada de Wi-Fi Alliance®.

NOTA:
Esta función solo se aplica a DP4601e only.

Esta función le permite configurar y conectarse a una red Wi-Fi. Wi-Fi es compatible con las actualizaciones de firmware de la radio, el Codeplug y recursos, como paquetes de idiomas o de anuncio de voz.

6.3.27.1

Activación o desactivación del Wi-Fi

El botón **Activar o desactivar Wi-Fi** programado se lo asigna su distribuidor o administrador del sistema. Consulte con el distribuidor o administrador del sistema cómo se ha programado la radio.

Los anuncios de voz para el botón programado **Activar o desactivar Wi-Fi** se pueden personalizar mediante CPS en función de los requisitos del usuario. Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información.

Realice una de las siguientes acciones para activar o desactivar el Wi-Fi.

- Pulse el botón programado **Activar o desactivar Wi-Fi**. El anuncio de voz emite un sonido de activación o desactivación del Wi-Fi.
- Acceda a esta función en el menú.

  a. Pulse OK para acceder al menú.

  b. Pulse ▲ o ▼ para acceder a `Wi-Fi` y pulse OK para seleccionar.

  c. Pulse ▲ o ▼ para acceder a `Wi-Fi activ.` y pulse OK para seleccionar.

  Pulse OK para activar el Wi-Fi. La pantalla muestra ✓ junto a `Activado`.

  Pulse OK para apagar el Wi-Fi. Desaparece ✓ junto a `Habilitado`.

6.3.27.2

Conexión a un punto de acceso a la red

Cuando activa el Wi-Fi, la radio busca y se conecta a un punto de acceso a la red.

También puede conectarse a un punto de acceso a la red a través del menú.

1. Pulse OK para acceder al menú.

2. Pulse ▲ o ▼ para acceder a `Wi-Fi` y pulse OK para seleccionar.

3 Pulse ▲ o ▼ para acceder a `Redes` y pulse OK para seleccionar.

4 Pulse ▲ o ▼ para acceder a un punto de acceso a la red y pulse OK para seleccionar.

5 Pulse ▲ o ▼ para `Conectar` y pulse OK para seleccionar.

Si la conexión se realiza correctamente, la radio muestra un aviso y se guarda el punto de acceso a la red en la lista de perfiles.

6.3.27.3

Comprobación del estado de conexión Wi-Fi

Siga el procedimiento para comprobar el estado de conexión Wi-Fi.

Pulse el botón programado **Consulta del estado de la conexión Wi-Fi** para consultar el estado de conexión mediante el Anuncio de voz. El Anuncio de voz emite un sonido cuando el Wi-Fi está desactivado, si el Wi-Fi está activado pero no está conectado o si el Wi-Fi está activado y conectado.

- La pantalla muestra `Wi-Fi desact.` cuando el Wi-Fi está desactivado.
- La pantalla muestra `Wi-Fi activ., conectado` cuando la radio está conectada a la red.
- La pantalla muestra `Wi-Fi activ., desconectado` cuando el Wi-Fi está activado pero la radio no está conectada a ninguna red.

  Los anuncios de voz para los resultados de la consulta del estado de la conexión Wi-Fi se pueden personalizar mediante CPS en función de los requisitos del usuario. Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información.

NOTA:
El botón **Consulta del estado de la conexión Wi-Fi** programado se lo asigna su distribuidor o administrador del sistema. Consulte con el distribuidor o administrador del sistema cómo se ha programado la radio.

6.3.27.4

Actualización de la lista de redes

Siga el procedimiento para actualizar la lista de redes.

- Realice las siguientes acciones para actualizar la lista de redes con el menú.

  a. Pulse OK para acceder al menú.

  b. Pulse ▲ o ▼ para acceder a `Wi-Fi` y pulse OK para seleccionar.

  c. Pulse ▲ o ▼ para acceder a `Redes` y pulse OK para seleccionar.

  Al acceder al menú Redes, la radio actualiza automáticamente la lista de redes.

- Si ya se encuentra en el menú Redes, lleve a cabo la siguiente acción para actualizar la lista de redes.

  Pulse ▲ o ▼ para `Actualizar` y pulse OK para seleccionar.

  La radio se actualiza y muestra la lista de redes más actualizada.

6.3.27.5

Adición de una red

Si una red preferida no está en la lista de redes disponibles, realice las siguientes acciones para añadir una red.

1. Pulse OK para acceder al menú.
2. Pulse ▲ o ▼ para acceder a `Wi-Fi` y pulse OK para seleccionar.
3. Pulse ▲ o ▼ para acceder a `Redes` y pulse OK para seleccionar.

4 Pulse ▲ o ▼ para `Añadir red` y pulse OK para seleccionar.

5 Introduzca el identificador de conjuntos de servicios (SSID) y pulse OK .

6 Pulse ▲ o ▼ para `Abrir` y pulse OK para seleccionar.

7 Ingrese la contraseña y pulse OK .

La radio muestra un miniaviso positivo para indicar que la red se ha guardado correctamente.

6.3.27.6

Visualización de los detalles de los puntos de acceso a la red

Siga el procedimiento para ver los detalles de los puntos de acceso a la red.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para acceder a `Wi-Fi` y pulse OK para seleccionar.

3 Pulse ▲ o ▼ para acceder a `Redes` y pulse OK para seleccionar.

4 Pulse ▲ o ▼ para acceder a un punto de acceso a la red y pulse OK para seleccionar.

5 Pulse ▲ o ▼ para acceder a `Ver detalles` y pulse OK para seleccionar.

En los puntos de acceso conectados a la red se muestra el identificador de conjunto de servicios (SSID), el modo de seguridad, la dirección de control de acceso a los medios (MAC) y el protocolo de Internet (IP).

En los puntos de acceso no conectados a la red se muestra solo el identificador de conjunto de servicios (SSID) y el modo de seguridad.

6.3.27.7

Eliminación de los puntos de acceso a la red

Realice las siguientes acciones para eliminar los puntos de acceso a la red de la lista de perfiles.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para acceder a `Wi-Fi` y pulse OK para seleccionar.

3 Pulse ▲ o ▼ para acceder a `Redes` y pulse OK para seleccionar.

4 Pulse ▲ o ▼ para acceder al punto de acceso a la red seleccionada y pulse OK para seleccionar.

5 Pulse ▲ o ▼ para `Eliminar` y pulse OK para seleccionar.

6 Pulse ▲ o ▼ para seleccionar `Sí` y pulse OK para seleccionar.

La radio muestra un miniaviso positivo para indicar que el punto de acceso a la red seleccionada se ha eliminado correctamente.

6.4

Herramientas

En este capítulo se explican cómo se utilizan las herramientas disponibles en la radio.

6.4.1

Encendido y apagado de tonos/ alertas de la radio

Puede habilitar y deshabilitar los tonos y alertas de la radio (excepto el tono de alerta de emergencia entrante) siempre que lo necesite.

Pulse el botón programable **Todos los tonos/alertas** para activar o desactivar todos los tonos o siga el procedimiento que se describe a continuación para acceder a esta función a través del menú de la radio.

1 pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para acceder a `Herramientas` y pulse OK para seleccionar.

3 Pulse ▲ o ▼ para acceder a `Configuración de la radio` y pulse OK para seleccionar.

4 Pulse ▲ o ▼ para acceder a `Tonos/Alertas` y pulse OK para seleccionar.

5 Pulse ▲ o ▼ para ir a `Todos los tonos` y pulse OK para seleccionar.

6 Pulse OK para habilitar/deshabilitar todos los tonos y alertas.

La pantalla muestra ✓ junto a `Activado`.

Desaparece ✓ junto a `Habilitado`.

6.4.2

Configuración del nivel de diferencia de volumen del tono de alerta

Si es necesario, puede ajustar el nivel de diferencia de volumen del tono de alerta. Esta función ajusta el volumen de los tonos/alertas, permitiendo que sea más alto o más bajo que el volumen de voz.

1 pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para acceder a `Utilidades` y pulse OK para seleccionar.

3 Pulse ▲ o ▼ para acceder a `Configuración de la radio` y pulse OK para seleccionar.

4 Pulse ▲ o ▼ para acceder a `Tonos/Alertas` y pulse OK para seleccionar.

5 Pulse ▲ o ▼ para ir a `Compensación volumen` y pulse OK para seleccionar.

6 Pulse ▲ o ▼ hasta llegar al valor de volumen que desee.

La radio emite un tono de respuesta con cada valor de volumen correspondiente.

7 Lleve a cabo una de las siguientes acciones:

- Pulse OK para mantener el valor de volumen que desee que aparezca.
- Pulse ↩ para salir sin cambiar la configuración actual de diferencia de volumen.

6.4.3

Activación o desactivación del tono Permiso para hablar

Puede activar y desactivar el tono Permiso para hablar siempre que sea necesario.

1 pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para acceder a `Utilidades` y pulse OK para seleccionar.

3 Pulse ▲ o ▼ para acceder a `Configuración de la radio` y pulse OK para seleccionar.

4 Pulse ▲ o ▼ para acceder a `Tonos/Alertas` y pulse OK para seleccionar.

5 Pulse ▲ o ▼ para ir a `Permitir hablar` y pulse OK para seleccionar.

También puede utilizar ◀ o ▶ para cambiar la opción seleccionada.

6 Pulse OK para habilitar/deshabilitar el tono de Permitir hablar.

La pantalla muestra ✓ junto a `Activado`.

Desaparece ✓ junto a `Habilitado`.

6.4.4

Activación o desactivación del tono de alerta de encendido

Puede activar y desactivar el tono de alerta de encendido si es necesario.

1 pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para acceder a `Utilidades` y pulse OK para seleccionar.

3 Pulse ▲ o ▼ para acceder a Configuración de la radio y pulse OK para seleccionar.

4 Pulse ▲ o ▼ para acceder a Tonos/Alertas y pulse OK para seleccionar.

5 Pulse ▲ o ▼ para Encendido y pulse OK para seleccionar.

También puede utilizar ◀ o ▶ para cambiar la opción seleccionada.

6 Pulse OK para habilitar/deshabilitar el tono de alerta de encendido.

La pantalla muestra ✓ junto a Activado.

Desaparece ✓ junto a Habilitado.

6.4.5

Configuración del nivel de potencia

Puede personalizar el nivel de potencia de la radio a alto o bajo en cada zona de Connect Plus.

Alto permite la comunicación con los sitios de torre en modo Connect Plus ubicados a una distancia considerable de usted. Bajo permite la comunicación con sitios de torre en modo Connect Plus más cercanos.

Pulse el botón **Nivel potencia** programado para alternar entre los niveles de potencia de transmisión alta y baja.

Siga el procedimiento que se describe a continuación para acceder a esta función a través del menú de la radio.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para acceder a Herramientas y pulse OK para seleccionar.

3 Pulse ▲ o ▼ para acceder a Configuración de la radio y pulse OK para seleccionar.

4 Pulse ▲ o ▼ para Potencia y pulse OK para seleccionar.

5 Pulse ▲ o ▼ para ir a la configuración que desee y pulse OK para seleccionar.

✓ aparece junto al ajuste seleccionado. Mantenga pulsado ↩ en cualquier momento, para volver a la pantalla de inicio.

La pantalla vuelve al menú anterior.

6.4.6

Ajuste del brillo de la pantalla

Puede ajustar el brillo de la pantalla de la radio según sea necesario.

NOTA:
Si la opción Brillo automático está activada, no se podrá ajustar el brillo de la pantalla.

1 pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para acceder a Utilidades y pulse OK para seleccionar.

3 Pulse ▲ o ▼ para acceder a Configuración de la radio y pulse OK para seleccionar.

4 Pulse ▲ o ▼ para acceder a Pantalla y pulse OK para seleccionar.

5 Pulse ▲ o ▼ para ir a Brillo y pulse OK para seleccionar.

La pantalla muestra una barra de progreso.

6 Pulse ◀ para disminuir el brillo de la pantalla o pulse ▶ para aumentar el brillo de la pantalla. Seleccione desde la configuración 1 a la 8. Pulse OK para confirmar la selección.

6.4.7

Configuración del temporizador de la luz de fondo de la pantalla

Puede establecer el temporizador de la luz de fondo de la pantalla de la radio según sea necesario. La configuración también afecta a los botones de navegación por el menú y a la luz de fondo del teclado, según corresponda.

Pulse el botón programado **Luz fondo** para modificar la configuración de la luz de fondo o siga el procedimiento que se describe a continuación para acceder a esta función a través del menú de la radio.

La luz de fondo de la pantalla y la luz de fondo del teclado se apagan automáticamente si los indicadores LED están desactivados (consulte Encendido y apagado del indicador LED en la página 317).

1 pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para acceder a `Herramientas` y pulse OK para seleccionar.

3 Pulse ▲ o ▼ para acceder a `Configuración de la radio` y pulse OK para seleccionar.

4 Pulse ▲ o ▼ para acceder a `Pantalla` y pulse OK para seleccionar.

5 Pulse ▲ o ▼ para ir a `Temporizador de la luz de fondo` y pulse OK para seleccionar.

Puede utilizar ◀ o ▶ para cambiar la opción seleccionada.

6.4.8

Encendido y apagado de la pantalla inicial

Puede habilitar y deshabilitar la pantalla inicial siempre que sea necesario.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para acceder a Herramientas y pulse OK para seleccionar.

3 Pulse ▲ o ▼ para acceder a Configuración de la radio y pulse OK para seleccionar.

4 Pulse ▲ o ▼ para acceder a Pantalla y pulse OK para seleccionar.

5 Pulse ▲ o ▼ para ir a Pantalla inicial y pulse OK para seleccionar.

También puede utilizar ◀ o ▶ para cambiar la opción seleccionada.

6 Pulse OK para activar/desactivar la pantalla de inicio.

La pantalla muestra ✓ junto a Activado.

Desaparece ✓ junto a Habilitado.

6.4.9

Idioma

Puede configurar la pantalla de la radio para que aparezca en el idioma que desee.

1 pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para acceder a Utilidades y pulse OK para seleccionar.

3 Pulse ▲ o ▼ para acceder a `Configuración de la radio` y pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a `Idiomas` y pulse OK para seleccionar.

También puede utilizar ◀ o ▶ para cambiar la opción seleccionada.

5 Pulse ▲ o ▼ hasta el idioma que desee y OK para activar. Aparece ✓ junto al idioma seleccionado.

6.4.10

Encendido y apagado del indicador LED

Puede habilitar y deshabilitar el indicador LED siempre que sea necesario.

1 pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para acceder a `Utilidades` y pulse OK para seleccionar.

3 Pulse ▲ o ▼ para acceder a `Configuración de la radio` y pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a `Indicador LED` y pulse OK para seleccionar.

También puede utilizar ◀ o ▶ para cambiar la opción seleccionada.

5 Pulse OK para activar/desactivar los indicadores LED.

La pantalla muestra ✓ junto a `Activado`.

Desaparece ✓ junto a `Habilitado`.

6.4.11

Identificación del tipo de cable

Puede seleccionar el tipo de cable que utiliza la radio.

1 pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para acceder a `Utilidades` y pulse OK para seleccionar.

3 Pulse ▲ o ▼ para acceder a `Configuración de la radio` y pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a `Tipo de cable` y pulse OK para seleccionar.

También puede utilizar ◀ o ▶ para cambiar la opción seleccionada.

5 El tipo de cable actual aparece con un símbolo ✓ .

6.4.12

Anuncio de voz

Esta función permite a la radio indicar de forma sonora o mediante la pulsación de botón programable la zona o el canal que el usuario acaba de asignar. Este indicador de audio puede personalizarse según los requisitos del cliente. Esto es especialmente útil cuando el usuario tiene dificultades para leer el contenido que se muestra en la pantalla.

1 pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para acceder a `Utilidades` y pulse OK para seleccionar.

3 Pulse ▲ o ▼ para acceder a `Configuración de la radio` y pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a `Anuncio de voz` y pulse OK para seleccionar.

También puede utilizar ◀ o ▶ para cambiar la opción seleccionada.

5 Lleve a cabo una de las siguientes acciones:

- Pulse OK para activar Anuncio de voz. La pantalla muestra ✓ junto a `Activado`.
- Pulse OK para desactivar Anuncio de voz. Desaparece ✓ junto a `Activado`.

6.4.13

Configuración de la función de reconocimiento de voz

NOTA:
La función de reconocimiento de voz solo puede activarse mediante CPS de MOTOTRBO. Si está activada, la función de anuncio de voz se desactiva automáticamente, y viceversa. Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información.

Esta función permite que la radio indique acústicamente lo siguiente:

- Canal actual
- Zona actual
- Función de botón programable activada o desactivada
- Contenido de los mensajes de texto recibidos
  - Pulse el botón programable **Anuncio de voz** para activar o desactivar la función.
  - Este indicador de audio puede personalizarse según los requisitos del cliente. Esto es especialmente útil cuando el usuario tiene dificultades para leer el contenido que se muestra en la pantalla.

a. pulse OK para acceder al menú.

b. Pulse ▲ o ▼ para acceder a `Utilidades` y pulse OK para seleccionar.

c. Pulse ▲ o ▼ para acceder a `Configuración de la radio` y pulse OK para seleccionar.

d. Pulse ▲ o ▼ para ir a `Anuncio de voz` y pulse OK para seleccionar.

e. Pulse ▲ o ▼ para ir a `Mensajes` o `Botón programable` y pulse OK para seleccionar.

También puede utilizar ◀ o ▶ para cambiar la opción seleccionada.

✓ Aparece junto a la configuración seleccionada.

6.4.14

Temporizador de menú

Defina el periodo de tiempo que su radio permanecerá en el menú antes de cambiar automáticamente a la pantalla de inicio.

1 pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para acceder a `Utilidades` y pulse OK para seleccionar.

3 Pulse ▲ o ▼ para acceder a `Configuración de la radio` y pulse OK para seleccionar.

4 Pulse ▲ o ▼ para acceder a `Pantalla` y pulse OK para seleccionar.

5 Pulse ▲ o ▼ para acceder a `Temporizador del menú` y pulse OK para seleccionar.

6 Pulse ▲ o ▼ hasta llegar a la configuración que desee y pulse OK para seleccionar.

6.4.15

Micrófono AGC digital (Mic AGC-D)

Esta función controla automáticamente la ganancia del micrófono de la radio mientras transmite en un sistema digital. Elimina el audio alto o mejora el audio claro para un valor predeterminado con el fin de ofrecer un nivel de audio constante.

1 pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para acceder a `Herramientas` y pulse OK para seleccionar.

3 Pulse ▲ o ▼ para acceder a `Configuración de la radio` y pulse OK para seleccionar.

También puede utilizar ◀ o ▶ para cambiar la opción seleccionada.

4 Pulse ▲ o ▼ para ir a `Mic AGC-D` y pulse OK para seleccionar.

5 Lleve a cabo una de las siguientes acciones:

- Pulse OK para activar **Mic AGC-D** . La pantalla muestra ✓ junto a`Activado` .
- Pulse OK para deshabilitar **Mic AGC-D** (Mic AGC digital). La marca ✓ desaparece junto a `Activado`

6.4.16

Audio inteligente

La radio puede ajustar automáticamente el volumen de audio para superar el ruido de fondo del entorno, incluidas todas las fuentes de ruido estacionario y no estacionario. Esta función es de solo recepción y no afecta a la transmisión de audio.

NOTA:
Esta función no está disponible durante una sesión Bluetooth.

1 pulse OK para acceder al menú.

Control de radio	Pasos
Menú	**a** pulse OK para acceder al menú. **b** Pulse ▲ o ▼ para acceder a `Configuración de la radio` y pulse OK para seleccionar. **c** Pulse ▲ o ▼ para acceder a `Configuración de la radio` y pulse OK para seleccionar.
	d Pulse ▲ o ▼ para ir a `Audio inteligente` y pulse OK para seleccionar. **NOTA:** También puede utilizar ◀ o ▶ para cambiar la opción seleccionada. **e** Lleve a cabo una de las siguientes acciones: • Pulse OK para activar el Audio inteligente. La pantalla muestra ✓ junto a `Activado`. • Pulse OK para desactivar el Audio inteligente. Desaparece ✓ junto a `Habilitado`.

2 Pulse ▲ o ▼ para acceder a `Utilidades` y pulse OK para seleccionar.

3 Pulse ▲ o ▼ para acceder a `Configuración de la radio` y pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a `Audio inteligente` y pulse OK para seleccionar.

5 Lleve a cabo una de las siguientes acciones:

- Pulse OK para activar el Audio inteligente. La pantalla muestra ✓ junto a `Activado`.
- Pulse OK para desactivar el Audio inteligente. Desaparece ✓ junto a `Habilitado`.

6.4.17

Activación y desactivación del supresor de respuesta acústica

Esta función le permite minimizar la respuesta acústica de las llamadas recibidas.

1 pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para acceder a `Utilidades` y pulse OK para seleccionar.

3 Pulse ▲ o ▼ para acceder a `Configuración de la radio` y pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a `Supresor de AF` y pulse OK para seleccionar.

También puede utilizar ◀ o ▶ para cambiar la opción seleccionada.

5 Lleve a cabo una de las siguientes acciones.

- Pulse OK para activar el supresor de respuesta acústica. La pantalla muestra ✓ junto a `Activado`.
- Pulse OK para desactivar el supresor de respuesta acústica. Desaparece ✓ junto a `Habilitado`.

6.4.18

Activación y desactivación del control de distorsión dinámica del micrófono

Esta función permite que la radio supervise automáticamente la entrada del micrófono y ajuste la ganancia del micrófono para evitar la saturación del audio.

1 pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para acceder a `Utilidades` y pulse OK para seleccionar.

3 Pulse ▲ o ▼ para acceder a `Configuración de la radio` y pulse OK para seleccionar.

También puede utilizar ◀ o ▶ para cambiar la opción seleccionada.

4 Pulse ▲ o ▼ para ir a `Distorsión mic` y pulse OK para seleccionar.

5 Lleve a cabo una de las siguientes acciones:

- Pulse OK para habilitar el control de distorsión dinámica del micrófono. La pantalla muestra ✓ junto a Activado.
- Pulse OK para desactivar el control de distorsión dinámica del micrófono. Desaparece ✓ junto a Habilitado.

6.4.19

Activación o desactivación del GNSS

El sistema global de navegación por satélite (GNSS) es un sistema de navegación vía satélite que determina la ubicación exacta de la radio. GNSS incluye el sistema de posicionamiento global (GPS) y el sistema de navegación por satélite global (GLONASS).

NOTA:
Los modelos de radio seleccionados pueden ofrecer GPS y GLONASS. La constelación de GNSS se configura a través de CPS. Consulte con el distribuidor o administrador del sistema cómo se ha programado la radio.

1 Lleve a cabo una de las siguientes acciones:

- Pulse el botón **GNSS** programado para activar o desactivar la función. Omita los pasos siguientes.
- Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Herramientas`. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a `Config. radio`. Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a `GNSS`. Pulse OK para seleccionar.

5 Pulse OK para habilitar/deshabilitar el GNSS.

Si está activado, ✓ aparece junto a `Activado`.

Si se desactiva, ✓ junto a `Activado` desaparece.

Consulte la sección Verificación de la información de GNSS en la página 339 para obtener más detalles sobre la recuperación de información de GNSS.

6.4.20

Acceso a la información general de la radio

La radio contiene información sobre lo siguiente:

- Batería
- Grado de inclinación (acelerómetro)
- Índice numérico del modelo de radio
- CRC del Codeplug de la tarjeta opcional a través del aire (OTA)
- Número de sitio
- Información del sitio
- Alias e ID de radio
- Versiones de firmware y Codeplug
- Información de GNSS

Pulse en cualquier momento para volver a la pantalla anterior o pulse durante unos segundos para volver a la pantalla de inicio. La radio sale de la pantalla actual cuando el temporizador de inactividad se agota.

6.4.20.1

Acceso a la información de la batería

Se muestra la información de la batería de la radio.

1 pulse para acceder al menú.

2 Pulse ▲ o ▼ para acceder a `Herramientas` y pulse para seleccionar.

3 Pulse ▲ o ▼ para acceder a `Info. del radio` y pulse para seleccionar.

4 Pulse ▲ o ▼ para acceder a `Información de la batería` y pulse para seleccionar.

En la pantalla aparece la información de la batería.

SOLO para baterías **IMPRES**: Si la batería necesita reacondicionamiento en un cargador IMPRES, en la pantalla se mostrará el mensaje `Reacondic. batería`. Una vez finalizado el proceso de

reacondicionamiento, en la pantalla aparece la información de la batería.

6.4.20.2

Comprobación del grado de inclinación (acelerómetro)

NOTA:
La medida en la pantalla indica el grado de inclinación en el momento en que se pulsa OK para aceptar la opción `Acelerómetro`. Si cambia el ángulo de la radio después de pulsar OK, la radio no modifica la medida que se muestra en la pantalla. Seguirá mostrando la medida tomada al pulsar OK.

Si en la radio portátil se han habilitado las alarmas de hombre caído, presenta una opción en el menú para comprobar cómo se mide el grado de inclinación. Se trata de una práctica función cuando el distribuidor o administrador del sistema de radio utiliza MOTOTRBO Connect Plus Option Board CPS para configurar el ángulo que desencadenará la activación de la alarma de inclinación.

1. pulse OK para acceder al menú.
2. Pulse ▲ o ▼ para acceder a `Utilidades` y pulse OK para seleccionar.
3. Pulse ▲ o ▼ para acceder a `Info. del radio` y pulse OK para seleccionar.
4. Incline el radio en el ángulo que activa la alarma de inclinación.
5. Pulse ▲ o ▼ para ir al `Acelerómetro` y pulse OK para seleccionar.

   En la pantalla aparecerá el ángulo de inclinación (desviación de la posición vertical perpendicular) de la radio en grados (por ejemplo: `62 grad.`) Con este dato de referencia, utilice MOTOTRBO Connect Plus Option Board CPS para configurar el ángulo de activación en 60 grados (el valor más próximo

programable). Los temporizadores de la alarma de inclinación se activarán cuando el ángulo sea mayor o igual que 60 grados.

6.4.20.3

Comprobación del índice de número de modelo de radio

Este número de índice identifica el hardware específico del modelo de radio. Quizás se lo pida el administrador del sistema cuando prepare un nuevo Codeplug de tarjeta opcional para la radio.

1 pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para acceder a `Herramientas` y pulse OK para seleccionar.

3 Pulse ▲ o ▼ para acceder a `Info. del radio` y pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a `Índice modelo` y pulse OK para seleccionar.

En la pantalla aparecerá el índice de número de modelo.

6.4.20.4

Comprobación del elemento CRC del archivo de Codeplug de tarjeta opcional OTA

Siga las instrucciones que se indican a continuación cuando el administrador del sistema le pida que consulte el elemento CRC (comprobación de redundancia cíclica) del archivo de Codeplug de tarjeta opcional OTA. Esta opción solo aparece si la tarjeta opcional ha recibido OTA la última actualización del Codeplug.

1 pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para acceder a `Utilidades` y pulse OK para seleccionar.

3 Pulse ▲ o ▼ para acceder a `Info. del radio` y pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a `OB OTA CPcrc` y pulse OK para seleccionar.

En la pantalla aparecerán algunas letras y números. Comunique esta información al administrador del sistema de radio exactamente como aparece.

6.4.20.5

Presentación del ID de sitio (número de sitio)

NOTA:
Si en ese momento la radio no está registrada en ningún emplazamiento, la pantalla mostrará `No registrado`.

Cuando se registra con un emplazamiento de Connect Plus, la radio muestra brevemente el ID de emplazamiento. Tras registrarse, en general no presenta este número. Para visualizar el número de sitio registrado, actúe como se indica a continuación:

1 pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para acceder a `Utilidades` y pulse OK para seleccionar.

3 Pulse ▲ o ▼ para acceder a `Info. del radio` y pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a `Número del sitio` y pulse OK para seleccionar.

En la pantalla aparecerán el ID de red y el número de sitio.

6.4.20.6

Comprobación de la información del sitio

NOTA:
Si en ese momento la radio no está registrada en ningún emplazamiento, la pantalla mostrará `No registrado`.

La función de información del sitio proporciona información que puede resultarle útil al técnico de servicio. Consta de la siguiente información:

- Número del repetidor del canal de control actual.
- RSSI: el último valor de intensidad de la señal medido desde el repetidor del canal de control.
- Lista de vecinos enviada por el repetidor del canal de control (cinco números separados por comas).

Si se le pide que use esta función, indique la información mostrada exactamente como aparece en la pantalla.

1 pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para acceder a `Utilidades` y pulse OK para seleccionar.

3 Pulse ▲ o ▼ para acceder a `Info. del radio` y pulse OK para seleccionar.

4 Pulse ▲ o ▼ para acceder a `Información del sitio` y pulse OK para seleccionar.
La pantalla muestra la información del sitio.

6.4.20.7

Comprobación del ID de la radio

Esta función muestra el ID de la radio.

Siga el procedimiento que se describe a continuación para acceder a esta función a través de la pantalla de la radio.

1 pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para acceder a `Utilidades` y pulse OK para seleccionar.

3 Pulse ▲ o ▼ para acceder a `Info. del radio` y pulse OK para seleccionar.

4 Pulse ▲ o ▼ para acceder a `Mi ID` y pulse OK para seleccionar.

En la pantalla aparecerá el ID de radio.

6.4.20.8

Verificación de la versión de firmware y de Codeplug

Muestra la versión del firmware de la radio.

1 pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para acceder a `Utilidades` y pulse OK para seleccionar.

3 Pulse ▲ o ▼ para acceder a `Info. del radio` y pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a `Versiones` y pulse OK para seleccionar.

La pantalla muestra una lista con la siguiente información:

- Versión de firmware (radio)
- Versión de Codeplug (radio)
- Versión de firmware de tarjeta opcional
- Versión de frecuencia de tarjeta opcional
- Versión de hardware de tarjeta opcional
- Versión de Codeplug de tarjeta opcional

6.4.20.9

Comprobación de actualizaciones

Connect Plus proporciona la capacidad de actualizar determinados archivos (Codeplug de tarjeta opcional, archivo de frecuencia de red y archivo de firmware de tarjeta opcional) a través del interfaz aire (OTA).

NOTA:
Póngase en contacto con el distribuidor o el administrador de red para determinar si esta característica se ha activado en la radio.

Cualquier radio con pantalla de Connect Plus tiene la capacidad de mostrar el elemento CRC del archivo de Codeplug de tarjeta opcional OTA, la versión de archivo de frecuencia o la versión de archivo de firmware de tarjeta opcional actuales a través de una opción del menú. Además, las radios con pantalla que tienen activada la transferencia de archivos a través de la interfaz aire pueden mostrar la versión de un "archivo pendiente". Un "archivo pendiente" es un archivo de frecuencia o de firmware de tarjeta opcional cuya existencia conoce la radio de Connect Plus a través de los mensajes del sistema, pero del que aún no ha recopilado todos los paquetes. En el caso de las radios con pantalla de Connect Plus, el menú presenta opciones para:

- Ver el número de versión del archivo pendiente.
- Ver el porcentaje de paquetes recopilados hasta el momento.
- Solicitar que la radio de Connect Plus reanude la recopilación de paquetes de archivo.

Cuando la radio tiene habilitada la transferencia de archivos de Connect Plus a través del interfaz aire, en ocasiones puede unirse automáticamente a una transferencia de archivos sin que el usuario de la radio reciba una notificación previa. Mientras la radio está recopilando paquetes del archivo, el LED parpadea con rapidez en rojo y la radio muestra el icono de datos de gran volumen en la barra de estado de la pantalla de inicio.

NOTA:
La radio de Connect Plus no puede recopilar paquetes de archivo y recibir llamadas al mismo tiempo. Si desea cancelar la transferencia de archivos, pulse y suelte el botón **PTT**. Así, la radio solicitará una llamada al nombre de contacto seleccionado y cancelará la transferencia de archivos hasta que el proceso se reanude más tarde.

El proceso de transferencia de archivos puede volver a empezar por diversos motivos. El primer ejemplo se aplica

a todos los tipos de archivo a través del interfaz aire. Los demás solo se aplican al archivo de frecuencia de red y al archivo de firmware de tarjeta opcional:

- El administrador del sistema de radio reinicia la transferencia de archivos a través del interfaz aire.
- El tiempo predefinido de la tarjeta opcional se agota, lo que provoca que esta reanude automáticamente el proceso de recopilar paquetes.
- Sin que se haya agotado el tiempo establecido, el usuario de la radio solicita que se reanude la transferencia de archivos a través de la opción del menú.

Cuando la radio de Connect Plus termina de descargar todos los paquetes de archivo, debe actualizarse con ese archivo recién adquirido. En lo que se refiere al archivo de frecuencia de red, se trata de un proceso automático que no precisa el reinicio de la radio. En el caso del archivo de Codeplug de tarjeta opcional, es un proceso automático que provoca una breve interrupción del servicio mientras la tarjeta opcional carga la información del Codeplug nuevo y vuelve a adquirir un emplazamiento de red. El tiempo que tarde en actualizarse la radio con el archivo de firmware de tarjeta opcional nuevo dependerá de la configuración que haya establecido el distribuidor o administrador del sistema. O bien lo hará inmediatamente tras recopilar todos los paquetes de archivo, o bien esperará hasta la próxima vez en que el usuario active la radio.

NOTA:
Consulte con el distribuidor o administrador del sistema cómo se ha programado la radio.

El proceso de actualización a un nuevo archivo de firmware de tarjeta opcional tarda unos segundos y es necesario que la tarjeta opcional de Connect Plus reinicie la radio. Una vez que comience la actualización, el usuario de la radio no podrá realizar o recibir llamadas hasta que el proceso finalice. Durante el proceso, la pantalla de la radio le indica al usuario que no debe apagar la radio.

6.4.20.9.1
Archivo de firmware

La siguiente sección proporciona información sobre el firmware de la radio.

6.4.20.9.1.1

Firmware actualizado

NOTA:
Si el firmware de tarjeta opcional no está actualizado (y si la radio ha recopilado parcialmente una versión más reciente del firmware de tarjeta opcional), la radio muestra una lista con opciones adicionales; `Versión`, `%recibido` y `Descarga`.

1 pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para acceder a `Utilidades` y pulse OK para seleccionar.

3 Pulse ▲ o ▼ para acceder a `Info. del radio` y pulse OK para seleccionar.

4 Pulse ▲ o ▼ para acceder a `Actualizaciones` y pulse OK para seleccionar.

5 Pulse ▲ o ▼ para acceder a `Firmware` y pulse OK para seleccionar.

En la pantalla aparecerá `Firmware actualizado`.

6.4.20.9.2

Versión de firmware pendiente

1 pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para acceder a `Utilidades` y pulse OK para seleccionar.

3 Pulse ▲ o ▼ para acceder a `Info. del radio` y pulse OK para seleccionar.

4 Pulse ▲ o ▼ para acceder a `Actualizaciones` y pulse OK para seleccionar.

5 Pulse ▲ o ▼ para acceder a `Firmware` y pulse OK para seleccionar.

6 Pulse ▲ o ▼ para ir a `Versión` y pulse OK para seleccionar.

Si hay un archivo de firmware de tarjeta opcional pendiente, la pantalla muestra el número de la versión de firmware pendiente.

Si hay un archivo de firmware de tarjeta opcional pendiente, la pantalla muestra `Firmware actualizado`.

6.4.20.9.3

Porcentaje recibido de firmware pendiente

1 pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para acceder a `Utilidades` y pulse OK para seleccionar.

3 Pulse ▲ o ▼ para acceder a `Info. del radio` y pulse OK para seleccionar.

4 Pulse ▲ o ▼ para acceder a `Actualizaciones` y pulse OK para seleccionar.

5 Pulse ▲ o ▼ para acceder a `Firmware` y pulse OK para seleccionar.

6 Pulse ▲ o ▼ para acceder a `%Recibido` y pulse OK para seleccionar.

La pantalla mostrará el porcentaje de paquetes de archivo de firmware recibidos hasta ese momento.

NOTA:
Cuando sea del 100%, habrá que apagar y encender la radio para que comience la actualización del firmware.

6.4.20.9.4

Descarga de firmware pendiente

Si la radio de Connect Plus dispone de un archivo parcial por una transferencia OTA de archivo de firmware de tarjeta opcional inconclusa, la unidad reanudará automáticamente la transferencia (si aún está vigente) cuando se agote el tiempo establecido en un temporizador interno. Si desea que la unidad continúe con la transferencia del archivo de firmware de tarjeta opcional en curso antes de que se agote dicho tiempo, utilice la opción Descarga descrita anteriormente.

1 pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para acceder a `Utilidades` y pulse OK para seleccionar.

3 Pulse ▲ o ▼ para acceder a `Info. del radio` y pulse OK para seleccionar.

4 Pulse ▲ o ▼ para acceder a `Actualizaciones` y pulse OK para seleccionar.

5 Pulse ▲ o ▼ para acceder a `Firmware` y pulse OK para seleccionar.

6 Pulse ▲ o ▼ para acceder a `Descargar` y pulse OK para seleccionar.

La pantalla muestra lo siguiente:

Descarga disponible	`Iniciar descarga`
Sin descargas disponibles	`Descarga no disponible`

7 Lleve a cabo una de las siguientes acciones:

- Seleccione `Sí` y pulse OK para iniciar la descarga.

- Seleccione No y pulse OK para volver al menú anterior.

6.4.20.9.5

Archivo de frecuencia

La siguiente sección proporciona información sobre el archivo de frecuencia de la radio.

6.4.20.9.5.1

Archivo de frecuencia actualizado

NOTA:
Si el archivo de frecuencia no está actualizado (y si la radio ha recopilado parcialmente una versión más reciente del archivo de frecuencia) la radio muestra una lista con opciones adicionales; Versión, %recibido y Descarga.

1 pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para acceder a Utilidades y pulse OK para seleccionar.

3 Pulse ▲ o ▼ para acceder a Info. del radio y pulse OK para seleccionar.

4 Pulse ▲ o ▼ para acceder a Frecuencia y pulse OK para seleccionar.

La pantalla mostrará Archivo frec. actualizado.

6.4.20.9.5.2

Versión de archivo de frecuencia pendiente

1 pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para acceder a Utilidades y pulse OK para seleccionar.

3 Pulse ▲ o ▼ para acceder a Info. del radio y pulse OK para seleccionar.

4 Pulse ▲ o ▼ para acceder a `Actualizaciones` y pulse OK para seleccionar.

5 Pulse ▲ o ▼ para acceder a `Frecuencia` y pulse OK para seleccionar.

6 Pulse ▲ o ▼ para ir a `Versión` y pulse OK para seleccionar.

Si hay un archivo de frecuencia pendiente, la pantalla muestra el número de versión del archivo de frecuencia pendiente.

6.4.20.9.5.3

Porcentaje recibido de archivo de frecuencia pendiente

1 pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para acceder a `Utilidades` y pulse OK para seleccionar.

3 Pulse ▲ o ▼ para acceder a `Info. del radio` y pulse OK para seleccionar.

4 Pulse ▲ o ▼ para acceder a `Actualizaciones` y pulse OK para seleccionar.

5 Pulse ▲ o ▼ para acceder a `%Recibido` y pulse OK para seleccionar.

La pantalla mostrará el porcentaje de paquetes de archivo de frecuencia recibidos hasta ese momento.

6.4.20.9.5.4

Descarga de archivo de frecuencia pendiente

Si la radio de Connect Plus dispone de un archivo parcial por una transferencia OTA de archivo de frecuencia de red inconclusa, la unidad reanudará automáticamente la transferencia (si aún está vigente) cuando se agote el

tiempo establecido en un temporizador interno. Si desea que la unidad continúe con la transferencia del archivo de frecuencia de red en curso antes de que se agote dicho tiempo, utilice la opción Descarga descrita a continuación.

1 pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para acceder a `Utilidades` y pulse OK para seleccionar.

3 Pulse ▲ o ▼ para acceder a `Info. del radio` y pulse OK para seleccionar.

4 Pulse ▲ o ▼ para acceder a `Actualizaciones` y pulse OK para seleccionar.

5 Pulse ▲ o ▼ para acceder a `Frecuencia` y pulse OK para seleccionar.

6 Pulse ▲ o ▼ para acceder a `Descargar` y pulse OK para seleccionar.

Descarga no disponible en este momento	`Descarga no disponible`
Descarga disponible en este momento	`Iniciar descarga`

7 Lleve a cabo una de las siguientes acciones:

- Seleccione `Sí` y pulse para iniciar la descarga.
- Seleccione `No` y pulse para volver al menú anterior.

6.4.20.9.6

Verificación de la información de GNSS

Muestra la información de GNSS de la radio, como los valores de:

- Latitud
- Longitud

- Altitud
- Dirección
- Velocidad
- Dilución de precisión horizontal (HDOP)
- Satélites
- Versión

1 pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para acceder a `Utilidades` y pulse OK para seleccionar.

3 Pulse ▲ o ▼ para acceder a `Info. del radio` y pulse OK para seleccionar.

4 Pulse ▲ o ▼ para acceder a `Información de GNSS` y pulse OK para seleccionar.

5 Pulse ▲ o ▼ para ir al elemento deseado y pulse OK para seleccionar.

La pantalla muestra la información de GNSS solicitada.

Consulte Activación o desactivación del GNSS en la página 325 para obtener más información sobre GNSS.

Otros sistemas

Las funciones disponibles para los usuarios de radio en virtud de este sistema están disponibles en este capítulo.

7.1

Botón PTT (Pulsar para hablar)

El botón Pulsar para hablar **(PTT)** tiene dos funciones básicas:

- En el transcurso de una llamada, el botón **PTT** permite que la radio transmita a las demás radios de la llamada. El micrófono se activa cuando se pulsa el botón **PTT**.
- Cuando no hay ninguna llamada en curso, el botón **PTT** se utiliza para realizar una nueva llamada.

Para hablar, pulse de forma prolongada el botón **PTT**. Suelte el botón **PTT** para escuchar.

Si el tono Permiso para hablar está activado, espere a que finalice el tono de alerta breve antes de empezar a hablar.

7.2

Botones programables

En función de la duración de la pulsación de un botón, el distribuidor puede programar los botones programables como accesos directos a las funciones de la radio.

Pulsación corta
Pulsar y soltar el botón rápidamente.

Pulsación larga
Mantener pulsado el botón durante la duración programada.

NOTA:
Consulte Funcionamiento de emergencia en la página 418 para obtener más información sobre la duración programada del botón de **Emergencia**.

7.2.1

Funciones asignables de la radio

Las siguientes funciones de radio se pueden asignar a los botones programables.

Perfiles de audio
Permite al usuario seleccionar el perfil de audio preferido.

Conmutación de audio
Alterna el direccionamiento de audio entre el altavoz interno de la radio y el altavoz de un accesorio con cables.

Camb. audio Bluetooth®
Alterna el direccionamiento de audio entre el altavoz interno de la radio y el accesorio externo con tecnología Bluetooth.

Conexión de Bluetooth
Inicia una operación de detección y conexión de Bluetooth.

Desconexión de Bluetooth
Finaliza todas las conexiones Bluetooth en curso entre dispositivos habilitados para Bluetooth y la radio.

Bluetooth visible
Permite que la radio entre en el modo de Bluetooth visible.

Alerta de llamada
Permite acceder directamente a la lista de contactos para que pueda seleccionar un contacto al que enviarle una alerta de llamada.

Reenvío de llamadas
Activa o desactiva la transferencia de llamadas.

Registro de llamadas
Selecciona la lista del registro de llamadas.

Anuncio de canal
Reproduce mensajes de voz de anuncio de canal y de zona para el canal actual.

Contactos
Proporciona acceso directo a la lista de contactos.

Emergencia
Dependiendo de la programación, inicia o cancela una llamada o una alarma de emergencia.

Ubicación en interiores
Activa o desactiva la ubicación en interiores.

Audio inteligente
Permite activar o desactivar el Audio inteligente.

Itinerancia manual del sitio[7]
Inicia la búsqueda de sitio manual.

Mic AGC
Activa o desactiva el control automático de ganancia (AGC) del micrófono interno.

[7] No aplicable a Capacity Plus.

Monitor
Monitoriza un canal seleccionado en busca de actividad.

Notificaciones
Proporciona acceso directo a la lista de notificaciones.

Eliminación de canal con ruido[7]
Elimina temporalmente de la lista de rastreo un canal no deseado, exceptuando el canal seleccionado. El canal seleccionado se refiere a la combinación de zona/canal seleccionada por el usuario desde la que se inicia el rastreo.

Acceso de marcación rápida
Inicia directamente una llamada privada, telefónica o a grupo, una alerta de llamada, un mensaje de texto rápido o la función Retorno a inicio predefinidos.

Función de tarjeta opcional
Activa o desactiva las funciones de la tarjeta opcional para los canales compatibles con dicha tarjeta.

Monitorización permanente [7]
Monitoriza un canal seleccionado por todo el tráfico de radios hasta que se desactiva la función.

Teléfono
Proporciona acceso directo a la lista de contactos del teléfono.

Privacidad
Activa o desactiva la privacidad.

Alias e ID de radio
Proporciona el ID y alias de radio.

Verificación de radio
Determina si una radio se encuentra activa en un sistema.

Habilitar radio
Permite activar de forma remota una radio de destino.

Desactivación de la radio
Permite desactivar de forma remota una radio de destino.

Monitorización remota
Enciende el micrófono de una radio de destino sin que proporcione ningún indicador.

Repetidor/modo directo[7]
Alterna entre el uso de un repetidor y la comunicación directa con otra radio.

Silenciar recordatorio de canal base
Silencia el recordatorio de canal de inicio.

Rastreo[8]
Permite activar o desactivar el rastreo.

Información del sitio
Muestra el nombre y el ID de Capacity Plus-Varios sitios del sitio actual.

Reproduce los mensajes de voz de indicador del sitio actual si el indicador de voz está activado.

Bloqueo del sitio[7]
Al habilitarlo, la radio solo buscará el emplazamiento actual. Si se deshabilita, la radio busca otros emplazamientos además del actual.

Estado
Selecciona el menú de lista de estado.

Control de telemetría
Controla el pin de salida en una radio local o remota.

Mensaje de texto
Selecciona el menú de mensajes de texto.

Desactivación remota de la interrupción de transmisión
Detiene una llamada en curso que se puede interrumpir para liberar el canal.

Mejora de la vibración del habla
Permite activar o desactivar esta función.

Activar/Desactivar indicador de voz
Activa o desactiva el indicador de voz.

Transmisión activada por voz (VOX)
Activa o desactiva VOX.

Wi-Fi
Activa o desactiva el Wi-Fi.

Selección de zona
Permite seleccionar en una lista de zonas.

7.2.2

Funciones asignables de configuración o herramientas

Los siguientes ajustes o funciones de la radio se pueden asignar a los botones programables.

Tonos/alertas
Activa y desactiva todos los tonos y alertas.

Retroiluminación
Activa o desactiva la luz de fondo de la pantalla.

Brillo de luz de fondo
Ajusta el nivel de brillo.

[8] No aplicable a Capacity Plus - Sitio único.

Nivel de potencia

Alterna entre los niveles de potencia de transmisión alto y bajo.

7.2.3

Acceso a las funciones programadas

Siga el procedimiento para acceder a las funciones programadas de la radio.

1 Lleve a cabo una de las siguientes acciones:

- Pulse el botón programado. Continúe con el paso paso 3.
- Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a la función de menú y, a continuación, pulse OK para seleccionar una función o acceder a un submenú.

3 Lleve a cabo una de las siguientes acciones:

- Pulse para volver a la pantalla anterior.
- Pulse de forma prolongada para volver a la pantalla de inicio.

Tras un periodo de inactividad, la radio sale automáticamente del menú y vuelve a la pantalla de inicio.

7.3

Indicadores de estado

En este capítulo se explican los indicadores de audio y los tonos de audio que se utilizan en la radio.

7.3.1

Iconos

La pantalla de la radio muestra el estado, entradas de texto y entradas de menú. Los elementos siguientes son iconos que aparecen en la pantalla de la radio.

Tabla 8: Iconos de pantalla

Los siguientes iconos aparecen en la barra de estado ubicada en la parte superior de la pantalla de la radio. Los iconos se organizan de izquierda a derecha según orden de aparición o uso, y son específicos del canal.

	Batería El número de barras (0–4) indica la carga restante en la batería. El icono parpadea cuando el nivel de la batería es bajo.
	Bluetooth conectado La función Bluetooth está activada. El icono permanece iluminado cuando hay un dispositivo Bluetooth remoto conectado.

Tabla (continuación)…

	Bluetooth no conectado La función Bluetooth está activada, pero no hay conectado ningún dispositivo Bluetooth remoto.
	Registro de llamadas Registro de llamadas de radio.
	Contacto El contacto por radio está disponible.
	Emergencia La radio está en modo Emergencia.
	Lista de recepción flexible La lista de recepción flexible está habilitada.
	GNSS disponible La función GNSS está activada. El icono permanece encendido cuando existe una posición definida disponible.

Tabla (continuación)…

	GNSS no disponible La función GNSS está activada pero no recibe datos del satélite.
	Datos de gran volumen La radio está recibiendo datos de gran volumen y el canal está ocupado.
	Función de ubicación en interiores [9] El estado de ubicación en interiores está activado y disponible.
	Ubicación en interiores no disponible[9] El estado de ubicación en interiores está activado pero no está disponible debido a que el Bluetooth está desactivado o a que el Bluetooth ha suspendido el rastreo de las balizas.
	Mensaje Mensaje entrante.

Tabla (continuación)…

	Monitor Se está monitorizando el canal seleccionado.
	Modo Silenciar El modo Silenciar está activado y el altavoz está silenciado.
	Notificación Faltan uno o varios eventos en la lista de notificaciones.
	Tarjeta opcional La tarjeta opcional está habilitada. (Solo en modelos habilitados para la tarjeta opcional)
	La tarjeta opcional no funciona La tarjeta opcional está deshabilitada.

Tabla (continuación)…

[9] Solo se aplica a los modelos que cuentan con la última versión de software y hardware.

5	**Temporizador de retardo de programación a través del interfaz aire** Indica el tiempo que queda hasta el reinicio automático de la radio.
L o H	**Nivel de potencia** La radio está configurada a potencia baja o la radio está configurada a potencia alta.
	Indicador de intensidad de la señal recibida (RSSI) El número de barras mostradas representa la intensidad de la señal de la radio. Cuatro barras indican la señal más intensa. Este icono solo se muestra durante la recepción.
	Inhibic. respuesta La inhibición de respuesta está activada.

Tabla (continuación)…

	Solo timbre El modo de tono de llamada está habilitado.
	Rastreo [10] La función de rastreo está habilitada.
	Rastreo: Prioridad 1[10] La radio detecta actividad en el canal/grupo designado como Prioridad 1.
	Rastreo: Prioridad 2[10] La radio detecta actividad en el canal/grupo designado como Prioridad 2.
	Seguro La función Privacidad está habilitada.
	Tono de silencio El modo de tono de silencio está habilitado.

Tabla (continuación)…

[10] No disponible en Capacity Plus.

	Roaming entre sitios [11] La función de roaming entre sitios está habilitada.
	Modo directo[10] Si no hay un repetidor, la radio está configurada para establecer comunicación directa de radio a radio.
	Desactivar tonos Los tonos están desactivados.
	Inseguro La función Privacidad está deshabilitada.
	Vibración El modo de vibración está habilitado.
	Vibración y tono El modo de vibración y tono está habilitado.

Tabla (continuación)…

	Rastreo de aceptación La función de rastreo de aceptación está habilitada.
	Wi-Fi: excelente[12] La señal de la red Wi-Fi es excelente.
	Wi-Fi: buena[12] La señal de la red Wi-Fi es buena.
	Wi-Fi: regular[12] La señal de la red Wi-Fi es regular
	Wi-Fi: deficiente[12] La señal de la red Wi-Fi es deficiente.
	Wi-Fi: no disponible[12] La señal de la red Wi-Fi no está disponible.

[11] No aplicable a Capacity Plus - Sitio único
[12] Solo se aplica a DP4601e

Tabla 9: Iconos del menú avanzado

Los siguientes iconos aparecen junto a los elementos de menú que ofrecen una elección entre dos opciones o como indicación de que hay un submenú que ofrece dos opciones.

	Casilla de verificación (marcada) Indica que la opción está seleccionada.
	Casilla de verificación (vacía) Indica que la opción no está seleccionada.
	Recuadro negro sólido Indica la opción seleccionada para el elemento de menú con un submenú.

Tabla 10: Iconos del dispositivo Bluetooth

Los siguientes iconos aparecen junto a los elementos en la lista de dispositivos habilitados para Bluetooth disponibles para indicar el tipo de dispositivo.

	Dispositivo de audio Bluetooth Dispositivo de audio habilitado para Bluetooth, por ejemplo, unos auriculares.
	Dispositivo de datos Bluetooth Dispositivo de datos habilitado para Bluetooth, por ejemplo, un escáner.
	Dispositivo PTT Bluetooth Dispositivo PTT habilitado para Bluetooth, por ejemplo, un dispositivo de PTT solo (POD).

Tabla 11: Iconos de llamada

Los siguientes iconos aparecen en la pantalla en el transcurso de una llamada. Estos iconos también aparecen en la lista de contactos para indicar el tipo de ID o de alias.

	Llamada de PC con Bluetooth Indica que hay una llamada de PC con Bluetooth en curso.

Tabla (continuación)…

	En la lista de contactos, indica un alias (nombre) o ID (número) de llamada de PC con Bluetooth.
	Llamada de despacho El tipo de contacto Llamada de despacho se utiliza para enviar un mensaje de texto a un PC despachador a través de un servidor de mensajes de texto externo.
	Llamada a grupo/a todos Indica que hay una llamada a grupo o una llamada a todos en curso. En la lista de contactos, indica un alias (nombre) o ID (número) de grupo.
	Llamada individual de periférico no IP Indica que hay una llamada individual de periférico no IP en curso. En la lista de contactos, indica un alias (nombre) o ID (número) de suscriptor.

Tabla (continuación)…

	Llamada a grupo de periférico no IP Indica que hay una llamada a grupo de periférico no IP en curso. En la lista de contactos, indica un alias (nombre) o ID (número) de grupo.
	Llamada individual de tarjeta opcional Indica que hay una llamada individual de tarjeta opcional en curso. En la lista de contactos, indica un alias (nombre) o ID (número) de suscriptor.
	Llamada a grupo de tarjeta opcional Indica que hay una llamada a grupo de tarjeta opcional en curso. En la lista de contactos, indica un alias (nombre) o ID (número) de grupo.

Tabla (continuación)…

	Llamada telefónica como una llamada de grupo/llamada a todos Indica que hay una llamada telefónica como, por ejemplo, una llamada a grupo o una llamada a todos en curso. En la lista de contactos, indica un alias (nombre) o ID (número) de grupo.
	Llamada telefónica como una llamada privada Indica que hay una llamada telefónica como una llamada privada en curso. En la lista de contactos, indica un alias (nombre) o ID (número) de teléfono.
	Llamada privada Indica que hay una llamada privada en curso. En la lista de contactos, indica un alias (nombre) o ID (número) de suscriptor.

Tabla 12: Iconos pequeños de aviso

Los siguientes iconos aparecen momentáneamente en la pantalla después de que se lleve a cabo una acción para realizar una tarea.

	Transmisión fallida (negativo) Error al realizar la acción.
	Transmisión correcta (positivo) La acción se ha realizado correctamente.
	Transmisión en progreso (transición) Transmitiendo. Este icono se ve antes de la indicación de Transmisión correcta o Transmisión fallida.

Tabla 13: Iconos de elementos enviados

Los iconos que se indican a continuación aparecen en la esquina superior derecha de la pantalla en la carpeta Enviados.

o	**en curso** El mensaje de texto para un alias o ID de suscriptor está pendiente de transmisión y, a continuación, se espera confirmación. El mensaje de texto para un alias o ID de grupo está pendiente de transmisión.
o	**Mensaje individual o de grupo leído** El mensaje de texto se ha leído.
o	**Mensaje individual o de grupo no leído** El mensaje de texto no se ha leído.

Tabla (continuación)…

o	**Error de envío** No se ha podido enviar el mensaje de texto.
o	**Enviado correctamente** El mensaje de texto se ha enviado correctamente.

7.3.2

Indicadores LED

Los indicadores LED muestran el estado de funcionamiento de la radio.

Rojo intermitente

La radio está indicando una falta de coincidencia de la batería.

La radio no ha superado la autocomprobación durante el encendido.

La radio está recibiendo una transmisión de emergencia.

La radio está transmitiendo con estado de batería baja.

La radio está fuera del rango de alcance, si se ha configurado un sistema de repetición de rango automático.

El modo Silenciar está activado.

Verde fijo

La radio se está encendiendo.

La radio está transmitiendo.

La radio está enviando una alerta de llamada o una transmisión de emergencia.

Verde intermitente

La radio está recibiendo una llamada o datos.

La radio está recuperando transmisiones de programación inalámbrica.

La radio está detectando actividad a través del interfaz aire.

NOTA:
Esta actividad puede afectar o no al canal programado de la radio debido a la naturaleza del protocolo digital.

En Capacity Plus, no hay indicación LED cuando la radio está detectando actividad a través del interfaz aire.

Verde intermitente doble

La radio está recibiendo una llamada o datos con la función de privacidad habilitada.

Amarillo fijo

La radio está supervisando un canal convencional.

Amarillo intermitente

La radio está rastreando actividad.

La radio aún tiene que responder a una alerta de llamada.

Toda los canales Capacity Plus-Varios sitios están ocupados.

Parpadeo doble en amarillo

La radio tiene la navegación automática activada.

La radio está buscando de forma activa un nuevo sitio.

La radio aún tiene que responder a una alerta de llamada a grupo.

La radio está bloqueada.

La radio no está conectada al repetidor mientras está en Capacity Plus.

Todos los canales de Capacity Plus están ocupados.

7.3.3

Tonos

A continuación se describen los tonos que suenan a través del altavoz de la radio.

Tono agudo

Tono grave

7.3.3.1

Tonos de indicador

Los tonos de indicador proporcionan indicaciones audibles del estado después de realizar una acción para llevar a cabo una tarea.

Tono indicador positivo

Tono indicador negativo

7.3.3.2

Tonos de audio

Los tonos de audio le proporcionan indicaciones sonoras del estado de la radio o de la respuesta de la radio a los datos recibidos.

Tono continuo

Un sonido monótono. Suena continuadamente hasta que finaliza.

Tono periódico

Suena periódicamente dependiendo de la duración que haya establecido la radio. El tono empieza, se para y se repite.

Tono repetitivo

Suena un único tono que se repite hasta que lo apaga el usuario.

Tono momentáneo

Suena una vez por un periodo corto establecido por la radio.

7.4

Selecciones de canales y zonas

En este capítulo se explican las operaciones para seleccionar una zona o un canal en la radio. Una zona es un conjunto de canales.

La radio es compatible con un máximo de 1000 canales y 250 zonas, con un máximo de 160 canales por zona.

Cada canal puede programarse con diferentes funciones y/o admitir grupos diferentes de usuarios.

7.4.1

Selección de zonas

Siga el procedimiento para seleccionar la zona que desee en la radio.

1 Lleve a cabo una de las siguientes acciones:

- Pulse el botón **Selección de zona** programado. Continúe con el paso paso 3.
- Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Zona`. Pulse OK para seleccionar.

En la pantalla aparece ✓ y la zona actual.

3 Pulse ▲ o ▼ hasta llegar a la zona deseada.

Pulse OK para seleccionar.

La pantalla muestra `<Zona> seleccionada` momentáneamente y vuelve a la pantalla de la zona seleccionada.

7.4.2

Selección de canales

Siga el procedimiento para seleccionar el canal deseado en la radio después de haber seleccionado una zona.

Gire el mando **selector de canales** para seleccionar el canal, ID de suscriptor o ID de grupo.

7.5

Llamadas

En este capítulo se explican las operaciones para recibir, responder, realizar y finalizar llamadas.

Puede seleccionar un ID o alias de suscriptor, o un ID o alias de grupo después de haber seleccionado un canal mediante una de estas funciones:

Búsqueda de alias
Este método se utiliza solo para llamadas de grupo, llamadas privadas y llamadas a todos con un micrófono con teclado.

Lista de contactos
Este método proporciona acceso directo a la lista de contactos.

Marcación manual (a través de Contactos)
Este método se utiliza solo para llamadas telefónicas y llamadas privadas con un micrófono con teclado.

Teclas numéricas programadas
Este método se utiliza solo para llamadas de grupo, llamadas privadas y llamadas a todos con un micrófono con teclado.

NOTA:
Solo puede tener un ID o alias asignado a una tecla numérica, pero puede tener más de una tecla numérica asociada a un ID o alias. Se pueden asignar todas las teclas numéricas de un micrófono con teclado. Consulte Asignación de entradas a teclas numéricas programadas en la página 399 para obtener más información.

Botón de acceso de marcación rápida programado
Este método se utiliza solo para , llamadas de grupo, llamadas privadas y llamadas telefónicas.

Solo puede asignar un ID a un botón de **acceso de marcación rápida** mediante una pulsación larga o breve de un botón programable. La radio puede tener varios botones de **acceso de marcación rápida** programados.

Botón programable
Este método solo se utiliza para llamadas telefónicas.

7.5.1

Llamadas de grupo

La radio debe estar configurada como parte de un grupo para recibir una llamada del grupo de usuarios o realizar una llamada al mismo.

7.5.1.1

Realización de llamadas a grupo

Siga el procedimiento para realizar llamadas a grupo con la radio.

1 Lleve a cabo una de las siguientes acciones:

- Seleccione un canal con el ID o alias de grupo activo.
- Pulse el botón de **acceso de marcación rápida** programado.

2 Pulse el botón **PTT** para realizar la llamada.

El indicador LED verde se ilumina. La pantalla muestra el icono de **llamada a grupo y el** alias de llamada a grupo.

3 Lleve a cabo una de las siguientes acciones:

- Espere hasta que acabe el tono de Permitir hablar (si está activado) y comience a hablar con claridad al micrófono.
- Espere a que finalice el efecto local de **PTT** (si está activado) y hable con claridad al micrófono.

4 Suelte el botón **PTT** para escuchar.

El indicador LED verde se ilumina cuando la radio de destino responde. La pantalla muestra el icono de **Llamada a grupo** y el alias o ID de grupo, y el alias o ID de la radio transmisora.

5 Si la función de indicación de canal libre está activada, oirá un breve tono de alerta en el momento en que la radio transmisora suelte el botón **PTT**, lo que señala que el canal está libre para que el usuario responda. Pulse el botón **PTT** para responder la llamada.

La llamada finalizará cuando no haya ninguna actividad de voz durante un periodo determinado. La radio regresa a la pantalla en la que se encontraba antes de iniciar la llamada.

7.5.1.2

Realización de llamadas de grupo mediante la lista de contactos

Siga el procedimiento para realizar llamadas de grupo con la radio mediante la lista de contactos.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a Contactos.Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir al ID o alias que desee.Pulse OK para seleccionar.

4 Pulse el botón **PTT** para realizar la llamada.

El indicador LED verde se ilumina.

5 Lleve a cabo una de las siguientes acciones:

- Espere hasta que acabe el tono de Permitir hablar (si está activado) y comience a hablar con claridad al micrófono.
- Espere a que finalice el efecto local de **PTT** (si está activado) y hable con claridad al micrófono.

6 Suelte el botón **PTT** para escuchar.

El indicador LED verde se ilumina cuando la radio de destino responde.La pantalla muestra el icono **Llamada grupal** y el alias o ID, y el alias o ID de la radio transmisora.

7 Si la función de indicación de canal libre está activada, oirá un breve tono de alerta en el momento en que la radio transmisora suelte el botón **PTT**, lo que señala que el canal está libre para que el usuario responda.Pulse el botón **PTT** para responder la llamada.

La llamada finalizará cuando no haya ninguna actividad de voz durante un periodo determinado.

7.5.1.3

Respuesta a llamadas a grupo

Para recibir una llamada de un grupo de usuarios, la radio debe estar configurada como parte de ese grupo. Siga el procedimiento para responder a llamadas a grupo con la radio.

Al recibir una llamada a grupo:

- El indicador LED verde parpadea.
- La pantalla muestra el icono de **llamada a grupo** en la esquina superior derecha.

- La primera línea de texto muestra el alias de la llamada entrante.
- La segunda línea de texto muestra el alias de la llamada a grupo.
- La radio desactiva el silencio y las llamadas entrantes suenan a través del altavoz.

1 Lleve a cabo una de las siguientes acciones:

- Si la función de indicación de canal libre está activada, oirá un breve tono de alerta en el momento en que la radio transmisora suelte el botón **PTT**, lo que señala que el canal está libre para que el usuario responda.Pulse el botón **PTT** para responder la llamada.
- Si la función de Interrupción de voz está activada, pulse el botón **PTT** para interrumpir el audio de la radio transmisora y liberar el canal para responder.

El indicador LED verde se ilumina.

2 Lleve a cabo una de las siguientes acciones:

- Espere hasta que acabe el tono de Permitir hablar (si está activado) y comience a hablar con claridad al micrófono.
- Espere a que finalice el efecto local de **PTT** (si está activado) y hable con claridad al micrófono.

3 Suelte el botón **PTT** para escuchar.

La llamada finalizará cuando no haya ninguna actividad de voz durante un periodo determinado.

Si la radio recibe una Llamada a grupo mientras no se encuentra en la pantalla de Inicio, permanece en la pantalla actual antes de responder la llamada.

Mantenga pulsado para volver a la pantalla de inicio y ver el alias de autor de llamada antes de responder.

7.5.2

Llamadas privadas

Una llamada privada es una llamada de una radio individual a otra radio individual.

Existen dos formas de realizar una llamada privada. El primer tipo realiza la llamada después de realizar una verificación de presencia de radio, mientras que el

segundo tipo inicia la llamada inmediatamente. Su distribuidor solo puede programar uno de estos tipos de llamada en la radio.

Si la radio está programada para realizar una verificación de presencia de radio antes de realizar la llamada privada y la radio de destino no está disponible:

- Suena un tono.
- La pantalla muestra un aviso pequeño negativo.
- La radio vuelve al menú anterior en el que estaba antes de empezar la verificación de presencia de radio.

Consulte Privacidad en la página 442 para obtener más información.

7.5.2.1

Realizar llamadas privadas

La radio debe programarse para poder iniciar una llamada privada. Si esta función no está activada, sonará un tono indicador negativo cuando inicie la llamada. Siga el procedimiento para realizar llamadas privadas con la radio.

1 Lleve a cabo una de las siguientes acciones:

- Seleccione un canal con el ID o alias de suscriptor activo.
- Pulse el botón de **acceso de marcación rápida** programado.

2 Pulse el botón **PTT** para realizar la llamada.

El indicador LED verde se ilumina. La pantalla muestra el icono de **llamada privada**, el alias de suscriptor y el estado de llamada.

3 Espere hasta que acabe el tono de Permitir hablar (si está activado) y comience a hablar con claridad al micrófono.

4 Suelte el botón **PTT** para escuchar.

El indicador LED verde parpadea cuando la radio de destino responde.

5 Si la función de indicación de canal libre está activada, oirá un breve tono de alerta en el momento en que la radio transmisora suelte el botón **PTT**, lo que señala que el canal está libre para que el usuario responda.Pulse el botón **PTT** para responder la llamada.

La llamada finalizará cuando no haya ninguna actividad de voz durante un periodo determinado.Suena un tono.La pantalla muestra `Llamada finalizada`.

7.5.2.2

Realización de llamadas privadas mediante la lista de contactos

Siga el procedimiento para realizar llamadas privadas con la radio mediante la lista de contactos.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Contactos`.Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir al ID o alias que desee.Pulse OK para seleccionar.

4 Pulse el botón **PTT** para realizar la llamada.

Si suelta el botón **PTT** mientras la radio configura la llamada, se sale sin ninguna indicación y se vuelve a la pantalla anterior.

El indicador LED verde se ilumina. La pantalla muestra el alias del destino.

5 Espere hasta que acabe el tono de Permitir hablar (si está activado) y comience a hablar con claridad al micrófono.

6 Suelte el botón **PTT** para escuchar.

El indicador LED verde parpadea cuando la radio de destino responde. La pantalla muestra el ID o alias del usuario transmisor.

7 Si la función de indicación de canal libre está activada, oirá un breve tono de alerta en el momento en que la radio transmisora suelte el botón **PTT**, lo que señala que el canal está libre para que el usuario responda. Pulse el botón **PTT** para responder la llamada.

La llamada finalizará cuando no haya ninguna actividad de voz durante un periodo

determinado.Suena un tono.La pantalla muestra `Llamada finalizada`.

7.5.2.3

Respuesta a llamadas privadas

Siga el procedimiento para responder a llamadas privadas con la radio.

Al recibir una llamada privada:

- El indicador LED verde parpadea.
- El icono de **llamada privada** aparece en la esquina superior derecha.
- La primera línea de texto muestra el alias de la llamada entrante.
- La radio desactiva el silencio y las llamadas entrantes suenan a través del altavoz.

1 Lleve a cabo una de las siguientes acciones:

- Si la función de indicación de canal libre está activada, oirá un breve tono de alerta en el momento en que la radio transmisora suelte el botón **PTT**, lo que señala que el canal está libre para que el usuario responda.Pulse el botón **PTT** para responder la llamada.
- Si la función Desconexión remota de Interrupción/Transmisión está activada, pulse el botón **PTT** para detener una llamada en curso que se puede interrumpir y liberar el canal para responder.

El indicador LED verde se ilumina.

2 Espere hasta que acabe el tono de Permitir hablar (si está activado) y comience a hablar con claridad al micrófono.

3 Suelte el botón **PTT** para escuchar.

La llamada finalizará cuando no haya ninguna actividad de voz durante un periodo determinado.Suena un tono. La pantalla muestra `Llamada finalizada`.

7.5.3

Llamadas a todos

Una llamada a todos es una llamada de una radio individual a todas las radios del canal. Se utiliza para

realizar anuncios importantes, que requieren una especial atención por parte del usuario. Los usuarios del canal no pueden responder a una llamada a todos.

7.5.3.1

Realización de llamadas a todos

La radio debe estar programada para poder realizar una llamada a todos. Siga el procedimiento para realizar llamadas a todos con la radio.

1 Seleccione un canal con el ID o alias de grupo de llamada a todos activo.

2 Pulse el botón **PTT** para realizar la llamada.

El indicador LED verde se ilumina. La pantalla muestra el icono de **llamada a grupo** y `Llamada a todos`.

3 Lleve a cabo una de las siguientes acciones:

- Espere hasta que acabe el tono de Permitir hablar (si está activado) y comience a hablar con claridad al micrófono.
- Espere a que finalice el efecto local de **PTT** (si está activado) y hable con claridad al micrófono.

Los usuarios del canal no pueden responder a una llamada a todos.

7.5.3.2

Recepción de llamadas a todos

Al recibir una llamada a todos:

- Suena un tono.
- El indicador LED verde parpadea.
- La pantalla muestra el icono de **llamada grupal** en la esquina superior derecha.
- La primera línea de texto muestra el ID o alias del autor de la llamada.
- La segunda línea de texto muestra `Llamada general`.
- La radio desactiva el silencio y las llamadas entrantes suenan a través del altavoz.

La radio vuelve a la pantalla antes de recibir la llamada a todos cuando la llamada finaliza.

Una llamada a todos no espera un periodo predeterminado antes de finalizar.

Si la función de indicación de canal libre está activada, oirá un breve tono de alerta cuando la radio transmisora

suelte el botón **PTT**, lo que señala que el canal está libre para su uso.

No puede responder a una llamada a todos.

NOTA:
La radio deja de recibir la llamada a todos si cambia a un canal distinto mientras está recibiendo la llamada. Durante una llamada general, no podrá realizar ningún movimiento de navegación ni edición en el menú hasta que la llamada finalice.

7.5.4

Llamadas selectivas

Una llamada selectiva es una llamada de una radio individual a otra radio individual. Se trata de una llamada privada en un sistema analógico.

7.5.4.1

Realización de llamadas selectivas

La radio debe estar programada para poder iniciar una llamada selectiva. Siga el procedimiento para realizar llamadas selectivas con la radio.

1 Seleccione un canal con el ID o alias de suscriptor activo.

2 Pulse el botón **PTT** para realizar la llamada.

El indicador LED verde se ilumina. La pantalla muestra el icono de **llamada privada**, el alias de suscriptor y el estado de llamada.

3 Lleve a cabo una de las siguientes acciones:

- Espere hasta que acabe el tono de Permitir hablar (si está activado) y comience a hablar con claridad al micrófono.
- Espere a que finalice el efecto local de **PTT** (si está activado) y hable con claridad al micrófono.

4 Suelte el botón **PTT** para escuchar.

El indicador LED verde se ilumina cuando la radio de destino responde.

5 Si la función de indicación de canal libre está activada, oirá un breve tono de alerta en el momento en que la radio transmisora suelte el botón **PTT**, lo que señala que el canal está libre para que el

usuario responda.Pulse el botón **PTT** para responder la llamada.

La llamada finalizará cuando no haya ninguna actividad de voz durante un periodo determinado.

6 La pantalla muestra `Llamada finalizada`.

7.5.4.2

Respuesta a llamadas selectivas

Siga el procedimiento para responder a llamadas selectivas con la radio.

Cuando recibe una llamada selectiva:

- El indicador LED verde parpadea.
- La primera línea de texto muestra el icono de **llamada privada** y el alias de autor de llamada o `Llamd. select.` o `Ale. con llam.`
- La radio desactiva el silencio y las llamadas entrantes suenan a través del altavoz.

1 Pulse el botón **PTT** para responder la llamada.

El indicador LED verde se ilumina.

2 Espere hasta que acabe el tono de Permitir hablar (si está activado) y comience a hablar con claridad al micrófono.

3 Suelte el botón **PTT** para escuchar.

La llamada finalizará cuando no haya ninguna actividad de voz durante un periodo determinado.Suena un tono.La pantalla muestra `Llamada finalizada`.

7.5.5

Llamadas telefónicas

Una llamada telefónica es una llamada de una radio individual a un teléfono.

Si la función de llamada telefónica no está activada en la radio:

- La pantalla muestra `No disponible`.
- La radio silencia la llamada.
- La radio vuelve a la pantalla anterior al finalizar la llamada.

Durante una llamada telefónica, la radio intenta finalizar la llamada cuando:

- Se pulsa el botón de **acceso de marcación rápida** con el código de salida configurado previamente.
- Se introduce el código de salida como la entrada de dígitos adicionales.

Durante el acceso al canal, el código de salida o de acceso, o la transmisión de dígitos adicionales, la radio solo responde a los botones o mandos de **encendido/ apagado** , **control de volumen** y **selector de canales**. Se oye un tono en cada entrada no válida.

Durante el acceso al canal, pulse para descartar el intento de llamada. Suena un tono.

NOTA:
Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información.

7.5.5.1

Realización de llamadas telefónicas

Siga el procedimiento para realizar llamadas telefónicas con la radio.

7.5.5.2

Realización de llamadas telefónicas con el botón de teléfono programable

Siga el procedimiento para realizar una llamada telefónica con el botón de teléfono programable.

1 Pulse el botón de **teléfono** programado para acceder a la lista de entradas del teléfono.

2 Pulse ▲ o ▼ para ir al ID o alias que desee.Pulse OK para seleccionar.

- El indicador LED verde se ilumina. El icono de **llamada telefónica** aparece en la esquina superior derecha. La primera línea de texto muestra el alias de suscriptor. La segunda línea de texto muestra el estado de la llamada.
- Si el establecimiento de llamada es correcto, suena el tono DTMF (doble tono de multifrecuencia). Se oye el tono de llamada del usuario del teléfono. La primera línea de texto muestra . El icono de **llamada telefónica** permanece en la esquina superior derecha. La

segunda línea de texto muestra el estado de la llamada.

- Si el establecimiento de llamada no se realizó correctamente, se oye un tono y la pantalla muestra `Llamada telefónica fallida`. La radio vuelve a la pantalla de introducción del código de acceso. Si el código de acceso se ha preconfigurado en la lista de contactos, la radio vuelve a la pantalla en la que se encontraba antes de iniciar la llamada.

3 Para hablar, pulse el botón **PTT**. Suelte el botón **PTT** para escuchar.

4 Para finalizar la llamada, pulse .

- Se oye el doble tono de multifrecuencia (DTMF) y la pantalla muestra `Finalizando llamada telefónica`.
- Si la finalización de llamada se realizó correctamente, suena un tono y la pantalla muestra `Llamada finalizada` .
- Si la finalización de la llamada no es correcta, la radio vuelve a la pantalla de llamada telefónica.

Repita paso 3 y paso 4 o espere a que el usuario del teléfono finalice la llamada.

- Al pulsar el botón **PTT** en la pantalla de contactos del teléfono, se oye un tono y la pantalla muestra `Pulse OK para realizar llmda`.
- Cuando el usuario del teléfono finaliza la llamada, se oye un tono y la pantalla muestra `Llam. final.`

NOTA:

durante el acceso al canal, pulse para descartar el intento de llamada y se oirá un tono.

durante la llamada, si pulsa el botón de **acceso de marcación rápida** con el código de finalización de acceso preconfigurado o introduce el código de finalización de acceso como dígitos adicionales, la radio intentará finalizar la llamada.

7.5.5.3

Multifrecuencia de doble tono

La función Multifrecuencia de doble tono (DTMF) permite que la radio funcione en el marco del sistema de radiofrecuencia con un interfaz al sistema telefónico.

El tono DTMF puede desactivarse inhabilitando todos los tonos y todas las alertas del radioteléfono. Consulte Encendido y apagado de tonos/alertas de la radio en la página 190 para obtener más información.

7.5.5.3.1

Inicio de llamadas DTMF

Siga el procedimiento para iniciar llamadas DTMF en la radio.

1 Mantenga pulsado el botón **PTT**.

2 Lleve a cabo una de las siguientes acciones:

- Introduzca el número deseado para iniciar una llamada DTMF.
- Pulse * desea iniciar una llamada DTMF.
- Pulse # desea iniciar una llamada DTMF.

7.5.5.4

Respuesta a llamadas telefónicas como llamadas privadas

Siga el procedimiento para responder a llamadas telefónicas como llamadas privada con la radio.

Al recibir una llamada telefónica como una llamada privada:

- La pantalla muestra el icono de **llamada telefónica** en la esquina superior derecha.
- La pantalla muestra el alias de la llamada entrante o `Llamada telf.`.

Si la función de llamada telefónica no está activada en la radio, la primera línea de la pantalla muestra `No disponible` y la radio silencia la llamada. La radio vuelve a la pantalla anterior al finalizar la llamada.

1 Pulse el botón **PTT** para responder la llamada.Suelte el botón **PTT** para escuchar.

2 Para finalizar la llamada, pulse .

La pantalla muestra `Finalizando llamada`.
Si la llamada finaliza correctamente:

- Suena un tono.
- La pantalla muestra `Llamada finalizada`.

Si la finalización de la llamada no es correcta, la radio vuelve a la pantalla de llamada telefónica. Repita este paso o espere a que el usuario del teléfono finalice la llamada.

7.5.5.5

Respuesta a llamadas telefónicas como llamadas de grupo

Siga el procedimiento para responder a llamadas telefónicas como llamadas de grupo con la radio.

Al recibir una llamada telefónica como una llamada de grupo:

- La pantalla muestra el icono de **llamada telefónica** en la esquina superior derecha.
- La pantalla muestra el alias de grupo y `Llamada telf.`.

Si la función de llamada telefónica no está activada en la radio, la primera línea de la pantalla muestra `No disponible` y la radio silencia la llamada.

1 Pulse el botón **PTT** para responder la llamada.Suelte el botón **PTT** para escuchar.

2 Para finalizar la llamada, pulse .

La pantalla muestra `Finalizando llamada`.
Si la llamada finaliza correctamente:

- Suena un tono.
- La pantalla muestra `Llamada finalizada`.

Si la finalización de la llamada no es correcta, la radio vuelve a la pantalla de llamada telefónica. Repita este paso o espere a que el usuario del teléfono finalice la llamada.

7.5.5.6

Respuesta a llamadas telefónicas como llamadas a todos

Al recibir una llamada telefónica como una llamada a todos, puede responder a la llamada o finalizarla únicamente si se asigna un tipo de llamada a todos al canal. Siga el procedimiento para responder a llamadas telefónicas como llamadas a todos con la radio.

Al recibir una llamada telefónica como una llamada a todos:

- La pantalla muestra el icono de **llamada telefónica** en la esquina superior derecha.
- La pantalla muestra `Llmda. a todos` y `Llamada telf.`

Si la función de llamada telefónica no está activada en la radio, la primera línea de la pantalla muestra `No disponible` y la radio silencia la llamada.

La radio vuelve a la pantalla anterior al finalizar la llamada.

1 Pulse el botón **PTT** para responder la llamada.

2 Suelte el botón **PTT** para escuchar.

3 Para finalizar la llamada, pulse .

La pantalla muestra `Finalizando llamada`.
Si la llamada finaliza correctamente:

- Suena un tono.
- La pantalla muestra `Llmda. a todos` y `Llam. final.`

Si la finalización de la llamada no es correcta, la radio vuelve a la pantalla de llamada telefónica. Repita paso 3 o espere a que el usuario del teléfono finalice la llamada.

7.5.6

Interrupción de llamadas de radio

Esta función permite detener una llamada privada o de grupo con el fin de liberar el canal para la transmisión. Por ejemplo, si una radio experimenta un problema de "micrófono atascado" cuando el usuario pulsa accidentalmente el botón **PTT**. La radio debe estar programada para que pueda utilizarse esta función. Siga el procedimiento para detener las llamadas en la radio.

1 Pulse el botón **Desactivación remota de la interrupción de transmisión** programado.

En la pantalla aparece `Descon. remota`.

2 Espere a que se produzca la confirmación.

Si es correcta:

- Suena un tono indicador positivo.
- En la pantalla aparece `Desc. rem. correcta`.

Si no es correcta:

- Suena un tono indicador negativo.
- En la pantalla aparece `Error desc. rem.`

NOTA:
Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información.

7.6

Funciones avanzadas

En este capítulo se explican cómo se utilizan las funciones disponibles en la radio.

Es posible que el distribuidor o el administrador del sistema hayan personalizado la radio para satisfacer sus necesidades específicas. Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información.

7.6.1

Bluetooth

Esta función permite utilizar la radio con un dispositivo activado para Bluetooth (accesorio) mediante una conexión Bluetooth. La radio soporta dispositivos activados para Bluetooth de Motorola Solutions y disponibles en el mercado (COTS).

La conexión Bluetooth funciona dentro de un rango de 10 m (32 pies) de la línea de visión. Esta es una línea sin obstáculos entre la radio y el dispositivo habilitado para Bluetooth. Para que funcione con un alto grado de fiabilidad, Motorola Solutions recomienda no separar la radio y el accesorio.

En las zonas periféricas de recepción, la calidad tanto del tono como de la voz comenzará a sonar "distorsionada" o "entrecortada". Para corregir este problema, debe colocar la radio y el dispositivo habilitado para Bluetooth más cerca el uno del otro (dentro del rango de 10 metros [32 pies] definido) para volver a recibir el audio con claridad. La

función Bluetooth de la radio tiene una potencia máxima de 2,5 mW (4 dBm) dentro del rango de 10 m (32 pies).

La radio puede soportar hasta tres conexiones Bluetooth simultáneas con dispositivos habilitados para Bluetooth de tipos únicos. Por ejemplo, un auricular, un escáner y un dispositivo de PTT solo (POD). Las múltiples conexiones con dispositivos habilitados para Bluetooth del mismo tipo no están soportadas.

Consulte el manual del usuario de su dispositivo Bluetooth para obtener más detalles sobre todas las capacidades del mismo.

La radio se conecta al dispositivo habilitado para Bluetooth con intensidad de la señal más fuerte dentro del rango de alcance o a uno al que ya se haya conectado en una sesión anterior. No apague el dispositivo habilitado para Bluetooth ni pulse el botón para volver al inicio durante las operaciones de búsqueda y conexión, ya que la operación se cancelaría.

7.6.1.1
Encendido y apagado de la función Bluetooth

Siga el procedimiento para encender y apagar el Bluetooth.

1. Pulse OK para acceder al menú.
2. Pulse ▲ o ▼ para ir a `Bluetooth`. Pulse OK para seleccionar.
3. Pulse ▲ o ▼ para ir a `Mi estado`. Pulse OK para seleccionar.

   La pantalla muestra `Enc.` y `Apaga.`. El estado actual se indica mediante ✓ .
4. Lleve a cabo una de las siguientes acciones:
   - Pulse ▲ o ▼ para ir a `Encendido`. Pulse OK para seleccionar. La pantalla muestra ✓ junto a `Enc.`
   - Pulse ▲ o ▼ para ir a `Apagado`. Pulse OK para seleccionar. La pantalla muestra ✓ junto a `Apagado`.

7.6.1.2

Conexión a dispositivos Bluetooth

Siga el procedimiento para conectarse a dispositivos Bluetooth.

Encienda el dispositivo habilitado para Bluetooth y colóquelo en modo de acoplamiento.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Bluetooth`. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a `Dispositivos` Pulse OK para seleccionar.

4 Lleve a cabo una de las siguientes acciones:

- Pulse ▲ o ▼ para seleccionar el dispositivo deseado. Pulse OK para seleccionar.
- Pulse ▲ o ▼ para ir a `Buscar dispos.` y encontrar los dispositivos disponibles. Pulse ▲ o ▼ para seleccionar el dispositivo deseado. Pulse OK para seleccionar.

5 Pulse ▲ o ▼ para `Conectar`. Pulse OK para seleccionar.

Su dispositivo habilitado para Bluetooth puede requerir pasos adicionales para que se complete el acoplamiento. Consulte el manual de usuario de su dispositivo habilitado para Bluetooth.

La pantalla muestra `Conectando a <dispositivo>`.

Espere a que se produzca la confirmación.
Si es correcta:

- Suena un tono indicador positivo.
- La pantalla muestra `<Dispositivo> conectado` y el icono de **Bluetooth conectado.**
- La pantalla muestra ✓ junto al dispositivo conectado.

Si no es correcta:

- Suena un tono indicador negativo.
- La pantalla muestra `Error conexión`.

7.6.1.3

Conexión a dispositivos Bluetooth en el modo de detección

Siga el procedimiento para conectarse a dispositivos Bluetooth en modo de detección.

Encienda el dispositivo habilitado para Bluetooth y colóquelo en modo de acoplamiento.

1. Pulse OK para acceder al menú.
2. Pulse ▲ o ▼ para ir a `Bluetooth`. Pulse OK para seleccionar.
3. Pulse ▲ o ▼ para ir a `Encontrarme`. Pulse OK para seleccionar. Otros dispositivos habilitados para Bluetooth pueden detectar ahora la radio durante un tiempo programado. Esto se denomina modo visible.

Espere a que se produzca la confirmación.
Si es correcta:

- Suena un tono indicador positivo.
- La pantalla muestra `<Dispositivo> conectado` y el icono de **Bluetooth conectado.**
- La pantalla muestra ✓ junto al dispositivo conectado.

Si no es correcta:

- Suena un tono indicador negativo.
- La pantalla muestra `Error conexión`.

7.6.1.4

Desconexión de dispositivos Bluetooth

Siga el procedimiento para desconectarse de dispositivos Bluetooth.

1. Pulse OK para acceder al menú.
2. Pulse ▲ o ▼ para ir a `Bluetooth`. Pulse OK para seleccionar.
3. Pulse ▲ o ▼ para ir a `Disposit.` Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para seleccionar el dispositivo deseado. Pulse OK para seleccionar.

5 Pulse ▲ o ▼ para ir a `Desconectar`. Pulse OK para seleccionar.

La pantalla muestra `Descon. de <dispositivo>`.

Espere a que se produzca la confirmación.

- Suena un tono.
- La pantalla muestra `<Dispositivo> desconectado` y desaparece el icono de **Bluetooth conectado.**
- ✓ desaparece junto al dispositivo conectado.

7.6.1.5

Cambio de la salida de audio entre el altavoz interno de la radio y el dispositivo Bluetooth

Siga el procedimiento para alternar la salida de audio entre el altavoz interno de la radio y el dispositivo Bluetooth externo.

Pulse el botón programado **Camb. audio BT**.

La pantalla muestra uno de los siguientes resultados:

- Suena un tono. La pantalla muestra `Redirig. audio a radio.`
- Suena un tono. La pantalla muestra `Redirig. audio a Bluetooth.`

7.6.1.6

Visualización de detalles del dispositivo

Siga el procedimiento para ver los detalles del dispositivo en la radio.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Bluetooth`. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a `Disposit.` Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para seleccionar el dispositivo deseado. Pulse OK para seleccionar.

5 Pulse ▲ o ▼ para ir a `Ver detalles`. Pulse OK para seleccionar.

7.6.1.7

Eliminación del nombre del dispositivo

Puede eliminar un dispositivo desconectado de la lista de dispositivos habilitados para Bluetooth.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Bluetooth`. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a `Disposit.` Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para seleccionar el dispositivo deseado. Pulse OK para seleccionar.

5 Pulse ▲ o ▼ para ir a `Eliminar`. Pulse OK para seleccionar. La pantalla muestra `Disposit. eliminado.`

7.6.1.8

Ganancia de micrófono Bluetooth

Esta función permite al usuario controlar el valor de la ganancia del micrófono dispositivo habilitado para Bluetooth conectado.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Bluetooth`. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a `Gan. micro BT`. Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir al tipo Gan. micro BT y los valores actuales. Pulse OK para seleccionar. Puede editar los valores aquí.

5 Pulse ▲ o ▼ para aumentar o reducir los valores. Pulse OK para seleccionar.

7.6.1.9

Modo Bluetooth visible permanentemente

El modo Bluetooth visible permanentemente debe activarlo el distribuidor o el administrador del sistema.

NOTA:
Si está activado, `Bluetooth`**no** se muestra en el menú y no puede utilizar ninguna de las funciones del botón programable de Bluetooth.

Otros dispositivos habilitados para Bluetooth podrán localizar la radio pero no se podrán conectar a la misma. El modo Bluetooth visible permanentemente permite que los dispositivos dedicados utilicen la posición de la radio en procesos de localización basados en Bluetooth.

7.6.2

Ubicación en interiores

NOTA:
La función de ubicación en interiores solo se aplica a los modelos que cuentan con la última versión de software y hardware. Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información.

La ubicación en áreas interiores puede utilizarse para realizar un seguimiento de la ubicación de los usuarios de la radio. Cuando Ubicación en interiores está activada, la radio se encuentra en un modo de detección limitado. Las balizas limitadas se utilizan para ubicar la radio y determinar su posición.

7.6.2.1

Activación o desactivación de la ubicación en interiores

Realice una de las siguientes acciones para activar o desactivar la ubicación en interiores.

- Acceda a esta función mediante el menú.

  a. Pulse OK para acceder al menú.

  b. Pulse ▲ o ▼ para ir a `Bluetooth` y pulse OK para seleccionar.

  c. Pulse ▲ o ▼ para ir a `Ubicación en interiores` y pulse OK para seleccionar.

  d. Pulse OK para activar la ubicación en interiores.

  La pantalla mostrará `Ubicación en interiores activada`. Oirá un tono indicador positivo.
  Ocurrirá una de las siguientes situaciones:

  - Si se realiza correctamente, aparecerá el icono Ubicación en interiores disponible en la pantalla de inicio.
  - Si no se realiza correctamente, la pantalla muestra `Activación errónea`. Oirá un tono indicador negativo.

  e. Pulse OK para apagar la ubicación en áreas interiores.

  La pantalla mostrará `Ubicación en interiores desactivada`. Oirá un tono indicador positivo.
  Ocurrirá una de las siguientes situaciones:

  - Si se realiza correctamente, desaparecerá el icono Ubicación en interiores disponible en la pantalla de inicio.
  - Si no se realiza correctamente, la pantalla muestra `Desactivación errónea`. Oirá un tono indicador negativo.

- Acceda a esta función con el botón programable.

a. Pulse de manera prolongada el botón **Ubicación en áreas interiores** para activar la ubicación en áreas interiores.

La pantalla mostrará `Ubicación en interiores activada`. Oirá un tono indicador positivo.
Ocurrirá una de las siguientes situaciones:

- Si se realiza correctamente, aparecerá el icono Ubicación en interiores disponible en la pantalla de inicio.
- Si no se realiza correctamente, la pantalla muestra `Activación errónea`. Si no se realiza correctamente, oirá un tono indicador negativo.

b. Pulse el botón **Ubicación en áreas interiores** para activar la ubicación en áreas interiores.

La pantalla mostrará `Ubicación en interiores desactivada`. Oirá un tono indicador positivo.
Ocurrirá una de las siguientes situaciones:

- Si se realiza correctamente, desaparecerá el icono Ubicación en interiores disponible en la pantalla de inicio.
- Si no se realiza correctamente, la pantalla muestra `Desactivación errónea`. Si no se realiza correctamente, oirá un tono indicador negativo.

7.6.2.2

Acceso a la información de balizas de ubicación en interiores

Siga el procedimiento para acceder la información de las señales periódicas de la ubicación en áreas interiores.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Bluetooth` y pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a `Ubicación en interiores` y pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a Balizas y pulse OK para seleccionar.

En la pantalla aparece la información de las balizas.

7.6.3

Controles de varios sitios

Estas funciones están disponibles cuando el canal actual de la radio forma parte de una conexión del sitio IP o Capacity Plus-Varios sitios.

7.6.3.1

Inicio de una búsqueda de sitio manual

Siga el procedimiento para iniciar una búsqueda de sitio manual cuando la intensidad de la señal recibida sea débil para intentar encontrar un sitio con mejor señal.

1 Lleve a cabo una de las siguientes acciones:
   - Pulse el botón **Roam manual del sitio** programado. Omita los pasos siguientes.
   - Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a Herramientas.Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a Config. radio.Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a Roaming. Pulse OK para seleccionar.

5 Pulse ▲ o ▼ para ir a Búsq. activa. Pulse OK para seleccionar.

   Suena un tono.El indicador LED verde parpadea.La pantalla muestra Buscando sitio.

Si la radio encuentra un nuevo sitio:

- Suena un tono indicador positivo.
- El indicador LED se apaga.
- La pantalla muestra Sitio <Alias> localizado.

Si la radio no logra encontrar un nuevo sitio:

- Suena un tono indicador negativo.
- El indicador LED se apaga.
- La pantalla muestra `Fuera de cobert.`

Si hay un sitio nuevo dentro de la cobertura, pero la radio no es capaz de conectarse con él:

- Suena un tono indicador negativo.
- El indicador LED se apaga.
- La pantalla muestra `Canal ocupado.`

7.6.3.2

Activar/desactivar bloqueo de sitio

Al habilitarlo, la radio solo buscará el emplazamiento actual. Si se deshabilita, la radio busca otros emplazamientos además del actual.

Pulse el botón programado **Bloq. sitio**.

Si la función de **bloqueo de sitio** está activada:

- Se escuchará un tono indicador afirmativo, el cual señala que la radio se ha bloqueado en sitio actual.
- En la pantalla aparecerá `Site Locked` (Sitio bloq.).

Si la función de **bloqueo de sitio** está desactivada:

- Se oirá un tono indicador negativo, que señala que la radio está desbloqueada.
- En la pantalla aparecerá `Site Unlocked` (Sitio desbloq.).

7.6.4

Modo directo

Esta función permite al usuario de la radio seguir comunicándose cuando el repetidor no esté operativo, o cuando la radio esté fuera del alcance del repetidor pero dentro de la cobertura de otras radios.

La configuración del modo Directo se mantiene incluso después de haber apagado la radio.

NOTA:
Esta función no se aplica a Capacity Plus-Sitio único, Capacity Plus-Varios sitios y canales de Banda Ciudadana que estén en la misma frecuencia.

7.6.4.1

Alternancia entre los modos Repetidor y Directo

Siga el procedimiento para alternar entre los modos Repetidor y Directo en la radio.

1 Lleve a cabo una de las siguientes acciones:

- Pulse el botón **Repetidor/Talkaround** programado. Omita los pasos siguientes.
- Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a Herramientas.Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a Config. radio.Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a Modo directo. Pulse OK para seleccionar.

Si está activado, ✓ aparece junto a Activado.

Si se desactiva, ✓ junto a Activado desaparece.

La pantalla vuelve automáticamente a la pantalla anterior.

7.6.5

Función de monitorización

La función de monitorización se utiliza para asegurarse de que un canal está libre antes de transmitir.

NOTA:
Esta función no es compatible con los modos Capacity Plus – Sitio único y Capacity Plus – Varios sitios.

7.6.5.1

Monitorización de canales

Realice este procedimiento para monitorizar los canales.

1 Pulse de forma prolongada el botón programado de **Monitorización**.

El icono de **Monitorización** se muestra en la pantalla y el indicador LED se ilumina en amarillo fijo.

Si el canal está en uso:

- La pantalla muestra el icono **Monitorización**
- Se escucha la actividad de la radio o un silencio total.
- El indicador LED amarillo se ilumina.

Si el canal monitorizado está libre, oirá un "ruido blanco".

2 Para hablar, pulse el botón **PTT**. Suelte el botón **PTT** para escuchar.

7.6.5.2

Monitorización permanente

Utilice la función Monitorización permanente para supervisar de manera continua la actividad de un canal seleccionado.

7.6.5.2.1

Activación o desactivación de la monitorización permanente

Siga el procedimiento para activar o desactivar la monitorización permanente en la radio.

Pulse el botón **Monitor permanente** programado.

Cuando la radio entra en modo:

- Se oye un tono de alerta.
- El indicador LED amarillo se ilumina.
- La pantalla muestra `Monitorización permanente activada` y el icono de **monitorización**.

Cuando la radio sale del modo:

- Se oye un tono de alerta.
- El indicador LED amarillo se apaga.
- La pantalla muestra `Monitorización permanente desactivada`.

7.6.6

Recordatorio de canal de inicio

Esta función activa un recordatorio cuando la radio no está configurada en el canal de inicio durante un período de tiempo.

Si está función está activada a través del CPS, cuando la radio no está configurada en el canal de inicio durante un período de tiempo, ocurrirá lo siguiente:

- El tono de recordatorio de canal de inicio y el anuncio suenan.
- La primera línea de la pantalla muestra `Sin`.
- La segunda línea muestra `Canal de inicio`.

Puede responder al recordatorio realizando una de las acciones siguientes:

- Volver al canal de inicio.
- Silenciar el recordatorio temporalmente con el botón programable.
- Establecer un nuevo canal principal con el botón programable.

7.6.6.1

Silenciar el recordatorio de canal de inicio

Cuando suena el recordatorio del canal de inicio, puede silenciarlo temporalmente.

Pulse el botón programable **Silenciar recordatorio del canal de inicio**.

La primera línea de la pantalla muestra `HCR` y la segunda línea muestra `silenciado`.

7.6.6.2

Configuración de nuevos canales de inicio

Cuando se activa el recordatorio del canal de inicio, puede configurar un nuevo canal de inicio.

1 Lleve a cabo una de las siguientes acciones:
   - Pulse el botón programable **Restablecer canal de inicio** para establecer el canal actual como nuevo canal de inicio. Omita los pasos siguientes.

La primera línea de la pantalla muestra el alias del canal y la segunda línea muestra `Nuevo canal principal.`

- Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Herramientas`.Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a `Config. radio`.Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a `Canal de inicio`. Pulse OK para seleccionar.

5 Pulse ▲ o ▼ para ir al nuevo alias de canal de inicio que desee. Pulse OK para seleccionar.

La pantalla muestra ✓ junto al alias de canal de inicio seleccionado.

7.6.7

Verificación de radio

Esta función le permite determinar si hay otra radio activa en un sistema sin tener que molestar al usuario de la radio. No se muestran notificaciones visuales ni sonoras en la radio de destino. La radio debe estar programada para que pueda utilizarse esta función.

7.6.7.1

Envío de verificaciones de radio

Siga el procedimiento para enviar verificaciones de radio con la radio.

1 Pulse el botón programable **Verificar radio**.

2 Pulse ▲ o ▼ para ir al ID o alias que desee.Pulse OK para seleccionar.

La pantalla muestra un pequeño aviso de transición que indica que la solicitud está en curso.El indicador LED verde se ilumina.

Espere a que se produzca la confirmación.

Si pulsa cuando la radio espera la confirmación, se oirá un tono, la radio finalizará todos los reintentos y saldrá del modo de verificación de radio.

Si es correcta:

- Suena un tono indicador positivo.
- La pantalla muestra un pequeño aviso positivo.

Si no es correcta:

- Suena un tono indicador negativo.
- La pantalla muestra un aviso pequeño negativo.

La radio volverá a la pantalla de alias o ID de suscriptor.

7.6.8

Monitorización remota

Esta función se utiliza para encender el micrófono de una radio de destino con un ID o alias de suscriptor. Se puede utilizar esta función para supervisar de manera remota toda la actividad audible alrededor de la radio de destino.

Hay dos tipos de monitorización remota:

- Monitorización remota sin autenticación
- Monitorización remota con autenticación.

La monitorización remota autenticada es una función adquirible. En la monitorización remota autenticada, se necesita una verificación cuando la radio enciende el micrófono de una radio de destino.

Cuando la radio inicia esta función en una radio de destino con autenticación de usuarios, se necesita una frase de paso. La frase de paso se preprograma en la radio de destino mediante CPS.

La radio y la radio de destino deben estar programadas para que pueda utilizarse esta función.

Esta función se detiene después de la duración programada o cuando se esté realizando cualquier operación en la radio de destino.

7.6.8.1

Iniciación del monitor remoto

Siga el procedimiento para iniciar el monitor remoto en la radio.

1. Pulse el botón **Monitor remoto** programado.
2. Pulse ▲ o ▼ para ir al ID o alias que desee.

3 Pulse OK para seleccionar. Ocurrirá una de las siguientes situaciones:

- La pantalla muestra un pequeño aviso de transición que indica que la solicitud está en curso. El indicador LED verde se ilumina.
- Aparece una pantalla de frase de paso.

  Introduzca la frase de paso. Pulse OK para continuar.

  - Si la frase de paso es correcta, la pantalla muestra un pequeño aviso de transición que indica que la solicitud está en curso. El indicador LED verde se ilumina.
  - Si la frase de paso no es correcta, la pantalla muestra un pequeño aviso negativo y vuelve a la pantalla anterior.

4 Espere a que se produzca la confirmación.

Si es correcta:

- Suena un tono indicador positivo.
- La pantalla muestra un pequeño aviso positivo.
- El audio de la radio que está siendo monitorizada comienza a reproducirse durante un periodo de tiempo programado, y la pantalla muestra `Monitor remot.`. Cuando el temporizador indica que se ha agotado el tiempo, suena un tono de alerta y el indicador LED se apaga.

Si no es correcta:

- Suena un tono indicador negativo.
- La pantalla muestra un aviso pequeño negativo.

7.6.8.2
Inicio del monitor remoto mediante la lista de contactos

Siga el procedimiento para iniciar el monitor remoto en la radio mediante la lista de contactos.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Contactos`.Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir al ID o alias que desee.Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a `Monitor remoto`.

5 Pulse OK para seleccionar. Ocurrirá una de las siguientes situaciones:

- La pantalla muestra un pequeño aviso de transición que indica que la solicitud está en curso. El indicador LED verde se ilumina.
- Aparece una pantalla de frase de paso.

  Introduzca la frase de paso. Pulse OK para continuar.

  - Si la frase de paso es correcta, la pantalla muestra un pequeño aviso de transición que indica que la solicitud está en curso. El indicador LED verde se ilumina.
  - Si la frase de paso no es correcta, la pantalla muestra un pequeño aviso negativo y vuelve a la pantalla anterior.

6 Espere a que se produzca la confirmación.

Si es correcta:

- Suena un tono indicador positivo.
- La pantalla muestra un pequeño aviso positivo.
- El audio de la radio que está siendo monitorizada comienza a reproducirse durante un periodo de tiempo programado, y la pantalla muestra `Monitor remot.`. Cuando el temporizador indica que se ha agotado el tiempo, suena un tono de alerta y el indicador LED se apaga.

Si no es correcta:

- Suena un tono indicador negativo.
- La pantalla muestra un aviso pequeño negativo.

7.6.8.3

Inicio del monitor remoto mediante el marcado manual

Siga el procedimiento para iniciar el monitor remoto en la radio mediante el marcado manual.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a Contactos. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a Marcdo. manual. Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a Núm. radio. Pulse OK para seleccionar.

5 Lleve a cabo una de las siguientes acciones:

- Introduzca el ID o alias de suscriptor y pulse OK para continuar.
- Edite el ID marcado previamente y pulse OK para continuar.

6 Pulse ▲ o ▼ para ir a Monitor remoto.

7 Pulse OK para seleccionar. Ocurrirá una de las siguientes situaciones:

- La pantalla muestra un pequeño aviso de transición que indica que la solicitud está en curso. El indicador LED verde se ilumina.
- Aparece una pantalla de frase de paso.

  Introduzca la frase de paso. Pulse OK para continuar.

  - Si la frase de paso es correcta, la pantalla muestra un pequeño aviso de transición que indica que la solicitud está en curso. El indicador LED verde se ilumina.
  - Si la frase de paso no es correcta, la pantalla muestra un pequeño aviso negativo y vuelve a la pantalla anterior.

8 Espere a que se produzca la confirmación.

Si es correcta:

- Suena un tono indicador positivo.
- La pantalla muestra un pequeño aviso positivo.

- El audio de la radio que está siendo monitorizada comienza a reproducirse durante un periodo de tiempo programado, y la pantalla muestra `Monitor remot.`. Cuando el temporizador indica que se ha agotado el tiempo, suena un tono de alerta y el indicador LED se apaga.

Si no es correcta:

- Suena un tono indicador negativo.
- La pantalla muestra un aviso pequeño negativo.

7.6.9

Listas de rastreo

Las listas de rastreo se crean y asignan a canales o grupos individuales. La radio rastrea actividad de voz alternando entre la secuencia canal o grupo especificada en la lista de rastreo del canal o grupo actual.

La radio soporta hasta 250 listas de rastreo, con un máximo de 16 miembros por lista.

Cada lista de rastreo soporta una combinación de entradas analógicas y digitales.

Puede añadir, eliminar o dar prioridad a los canales al editar la lista de rastreo.

Puede adjuntar una nueva lista de rastreo a su radio a través de la Programación del panel frontal. Consulte Programación del panel frontal en la página 179 para obtener más información.

Si está configurado, el icono de **prioridad** aparecerá a la izquierda del alias de miembro para indicar si el miembro se encuentra en una lista de canal de Prioridad 1 o de Prioridad 2. No puede tener varios canales de Prioridad 1 o Prioridad 2 en una lista de rastreo. No se muestra ningún icono de **prioridad** si la prioridad se define como **Ninguno**.

NOTA:
esta función no se aplica a Capacity Plus.

7.6.9.1

Visualización de entradas de la lista de rastreo

Siga el procedimiento para ver las entradas de la lista de rastreo en la radio.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a Rastreo. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a Lista de rastreo. Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ver cada miembro de la lista.

7.6.9.2

Adición de nuevas entradas a la lista de rastreo

Siga el procedimiento para añadir nuevas entradas a la lista de rastreo en la radio.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a Rastreo. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a Lista de rastreo. Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para Añadir miembro. Pulse OK para seleccionar.

5 Pulse ▲ o ▼ para ir al ID o alias que desee.Pulse OK para seleccionar.

6 Pulse ▲ o ▼ para seleccionar el nivel de prioridad que desee. Pulse OK para seleccionar.

La pantalla mostrará un pequeño aviso positivo y, a continuación, ¿Añadir otros?.

7 Lleve a cabo una de las siguientes acciones:

- Pulse ▲ o ▼ para ir a Sí y añadir otra entrada. Pulse OK para seleccionar. Repita paso 5 y paso 6.

- Pulse ▲ o ▼ para ir a No y guardar la lista actual. Pulse OK para seleccionar.

7.6.9.3

Eliminación de entradas desde la lista de rastreo

Siga el procedimiento para eliminar entradas desde la lista de rastreo.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a Rastreo. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a Lista de rastreo. Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir al ID o alias que desee.

Pulse OK para seleccionar.

5 Pulse ▲ o ▼ para ir a Eliminar. Pulse OK para seleccionar.

La pantalla muestra ¿Eliminar entrada?.

6 Lleve a cabo una de las siguientes acciones:

- Pulse ▲ o ▼ para elegir Sí y eliminar la entrada. Pulse OK para seleccionar.
  La pantalla muestra un pequeño aviso positivo.
- Pulse ▲ o ▼ para elegir No y volver a la pantalla anterior. Pulse OK para seleccionar.

7 Repita de paso 4 a paso 6 para borrar otras entradas.

8 Mantenga pulsado para volver a la pantalla de inicio después de eliminar todos los ID o alias que desee.

7.6.9.4

Configuración de la prioridad de las entradas de la lista de rastreo

Siga el procedimiento para definir prioridades para las entradas de la lista de rastreo de la radio.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Rastreo`. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a `Lista de rastreo`. Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir al ID o alias que desee. Pulse OK para seleccionar.

5 Pulse ▲ o ▼ para ir a `Edit. prioridad`. Pulse OK para seleccionar.

6 Pulse ▲ o ▼ para seleccionar el nivel de prioridad que desee. Pulse OK para seleccionar.

La pantalla muestra un aviso pequeño positivo antes de volver a la pantalla anterior. El icono de **prioridad** aparece a la izquierda del alias de miembro.

7.6.10

Rastreo

La radio se desplaza por la lista de rastreo programada para el canal actual en busca de actividad de voz cuando comienza el proceso de rastreo.

NOTA:
esta función no se aplica a Capacity Plus.

Durante un rastreo de modo doble, si se encuentra en un canal digital y la radio se acopla a un canal analógico, cambiará automáticamente del modo digital al analógico durante la llamada. Esto también sucede en la situación inversa.

Hay dos formas de iniciar el rastreo:

Rastreo de canal principal (manual)

La radio rastrea todos los canales o grupos de la lista de rastreo. Al iniciar el rastreo, la radio puede (según la configuración) empezar automáticamente en el canal o grupo activo en el que se realizó el último rastreo o en el canal en el que se inició el rastreo.

Rastreo automático (automático)

La radio empieza el rastreo automáticamente al seleccionar un canal o grupo que tiene activado el rastreo automático.

7.6.10.1

Activación o desactivación del rastreo

Siga el procedimiento para activar o desactivar la función de rastreo en la radio.

NOTA:
Mientras realiza el rastreo, la radio solo acepta datos (por ejemplo: mensajes de texto, ubicación o datos de PC) si los recibe en el canal seleccionado.

1. Gire el **selector de canales** para seleccionar un canal programado con una lista de rastreo.
2. Pulse OK para acceder al menú.
3. Pulse ▲ o ▼ para ir a `Rastreo`. Pulse OK para seleccionar.
4. Pulse ▲ o ▼ para ir a `Estad. rastreo`. Pulse OK para seleccionar.
5. Pulse ▲ o ▼ para ir al estado de rastreo que desee y pulse OK para realizar la selección.

Si la función de rastreo está activada:

- La pantalla muestra `Exploración activada` y el icono de **exploración**.
- El indicador LED parpadea en amarillo.

Si la función de rastreo está desactivada:

- La pantalla muestra `Exploración desactivada`.
- El icono de **exploración** desaparece.
- El indicador LED se apaga.

7.6.10.2

Respuesta a transmisiones durante el rastreo

Durante el rastreo, la radio se detiene en un canal o grupo en el que detecte actividad. La radio se mantiene en ese canal durante el tiempo programado, conocido como "tiempo muerto". Siga el procedimiento para responder a transmisiones durante el rastreo.

1 Si la función de indicación de canal libre está activada, oirá un breve tono de alerta en el momento en que la radio transmisora suelte el botón **PTT**, lo que señala que el canal está libre para que el usuario responda. Pulse el botón **PTT** durante el tiempo muerto.

   El indicador LED verde se ilumina.

2 Lleve a cabo una de las siguientes acciones:

   - Espere hasta que acabe el tono de Permitir hablar (si está activado) y comience a hablar con claridad al micrófono.
   - Espere a que finalice el efecto local de **PTT** (si está activado) y hable con claridad al micrófono.

3 Suelte el botón **PTT** para escuchar.

   Si no responde durante el tiempo muerto, la radio volverá a explorar otros canales o grupos.

7.6.10.3

Eliminación de canales con ruido

Si un canal produce llamadas no deseadas o ruidos de forma continua (lo que se llama un canal "con ruido"), se puede eliminar temporalmente de la lista de rastreo. Esta posibilidad no se aplica al canal designado como canal seleccionado. Siga el procedimiento para eliminar canales con ruido de la radio.

1 Si la radio "se acopla" a un canal no deseado o con ruido, pulse el botón **Eliminar canal no deseado** programado hasta que escuche un tono.

2 Suelte el botón programado **Eliminar canal no deseado**.

   El canal con ruido se elimina.

7.6.10.4

Restauración de canales con ruido

Siga el procedimiento para restaurar canales con ruido en la radio.

Lleve a cabo una de las siguientes acciones:

- Apague la radio y vuelva a encenderla.
- Detenga y reinicie el rastreo mediante el menú o el botón programado **Rastreo**.
- Cambie el canal mediante el **mando selector de canales**.

7.6.11

Rastreo de aceptación

El rastreo de aceptación le proporciona un área amplia de cobertura en zonas donde hay múltiples estaciones base transmitiendo información idéntica en distintos canales analógicos.

La radio rastrea canales analógicos de múltiples estaciones base y lleva a cabo un proceso de votación para seleccionar la señal de mayor intensidad recibida.

Una vez establecida la señal, la radio recibe las transmisiones desde la estación base.

Durante un rastreo de aceptación, el indicador LED amarillo parpadea y la pantalla muestra el icono de **rastreo de aceptación**.

Siga el mismo procedimiento descrito en Respuesta a transmisiones durante el rastreo en la página 396 para responder a una transmisión durante un rastreo de aceptación.

7.6.12

Configuración de contactos

La función Contactos proporciona a la radio una "agenda". Cada entrada corresponde a un alias o ID que utiliza para realizar una llamada. Las entradas están ordenadas alfabéticamente.

Cada entrada, según el contexto, se asocia con los diferentes tipos de llamadas: Llamada a grupo, llamada privada, llamada a todos, llamada de PC o llamada de despacho.

La llamada de PC o la llamada de despacho están relacionadas con los datos. Solo están disponibles con las aplicaciones. Consulte la documentación de aplicaciones de datos para obtener más información.

NOTA:
Verá una marca de verificación delante de cada tecla numérica que esté asignada a una entrada. Si la marca se encuentra delante de `Vacío`, no se ha asignado una tecla numérica a la entrada.

Cada entrada dentro de Contactos muestra la siguiente información:

- Tipo de llamada
- Alias de la llamada
- ID de llamada

NOTA:
Si la función Privacidad está activada en un canal, puede realizar llamadas a grupo con privacidad activa, llamadas privadas y llamadas a todos en dicho canal. Solo las radios de destino con la misma clave de privacidad o con el mismo valor de clave e ID de clave que su radio podrán desencriptar la transmisión.

7.6.12.1

Adición de nuevos contactos

Siga el procedimiento para añadir nuevos contactos a la radio.

1. Pulse OK para acceder al menú.
2. Pulse ▲ o ▼ para ir a `Contactos`.Pulse OK para seleccionar.
3. Pulse ▲ o ▼ para `Contacto nuevo`. Pulse OK para seleccionar.
4. Pulse ▲ o ▼ para seleccionar el tipo de contacto `Contacto radio` o `Contacto tel.` Pulse OK para seleccionar.
5. Introduzca el número de contacto con el teclado y pulse OK para continuar.
6. Introduzca el nombre del contacto con el teclado y pulse OK para continuar.

7 Pulse ▲ o ▼ para el tipo de timbre que desee.

Pulse OK para seleccionar.

Suena un tono indicador positivo.La pantalla muestra un pequeño aviso positivo.

7.6.12.2

Configuración de contacto predeterminado

Siga el procedimiento para definir el contacto predeterminado en la radio.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a Contactos. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir al ID o alias que desee.Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a Estab. predet. Pulse OK para seleccionar.

Suena un tono indicador positivo.La pantalla muestra un pequeño aviso positivo. La pantalla muestra ✓ junto al ID o alias predeterminado seleccionado.

7.6.12.3

Asignación de entradas a teclas numéricas programadas

Siga el procedimiento para asignar entradas a teclas numéricas programables en la radio.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a Contactos. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir al ID o alias que desee.Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a `Clave del programa`.

Pulse OK para seleccionar.

5 Lleve a cabo una de las siguientes acciones:

- Si la tecla numérica deseada no se ha asignado a una entrada, pulse ▲ o ▼ para seleccionar la tecla numérica que desee. Pulse OK para seleccionar.
- Si la tecla numérica ya se ha asignado a una entrada, la pantalla mostrará el mensaje `La tecla ya está asignada` y, a continuación, en la primera línea de texto de la pantalla aparecerá el mensaje `¿Reemplazar?` Lleve a cabo una de las siguientes acciones:

  Pulse ▲ o ▼ para elegir `Sí`. Pulse OK para seleccionar.

  La radio emite un tono indicador positivo y la pantalla muestra `Contacto guardado` y un aviso pequeño positivo.

  Pulse ▲ o ▼ para elegir `No` y volver al paso anterior.

7.6.12.4

Eliminación de asociaciones entre entradas y teclas numéricas programadas

Siga el procedimiento para eliminar las asociaciones entre las entradas y las teclas numéricas programables en la radio.

1 Lleve a cabo una de las siguientes acciones:

- Mantenga pulsada la tecla numérica programada del ID o el alias que desee. Continúe con el paso paso 4.
- Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a Contactos. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir al ID o alias que desee.

Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a Clave del programa.

Pulse OK para seleccionar.

5 Pulse ▲ o ▼ para ir a Vacío. Pulse OK para seleccionar.

La primera línea de texto muestra ¿Borrar todas las teclas?.

6 Pulse ▲ o ▼ para elegir Sí. Pulse OK para seleccionar.

NOTA:
Cuando se elimina una entrada, la asociación entre esta y sus teclas numéricas programadas también se elimina.

Suena un tono indicador positivo. En la pantalla aparecerá Contacto guardado.
La pantalla vuelve automáticamente al menú anterior.

7.6.13

Configuración del indicador de llamada

Esta función permite que los usuario de la radio configuren los tono de timbre de llamada y de mensaje de texto.

7.6.13.1

Activación o desactivación de los timbres de llamada para las alertas de llamada

Siga el procedimiento para activar o desactivar los timbres de llamada para las alerta de llamada en la radio.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a Herramientas.Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a Config. radio.Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a Tonos/alerta. Pulse OK para seleccionar.

5 Pulse ▲ o ▼ para ir a Timbres de llamada. Pulse OK para seleccionar.

6 Pulse ▲ o ▼ para ir a Alerta de llamada. Pulse OK para seleccionar.

7 Lleve a cabo una de las siguientes acciones:

- Pulse ▲ o ▼ para seleccionar el tono que desee. Pulse OK para seleccionar.
  La pantalla mostrará ✓ junto al tono seleccionado.

- Pulse ▲ o ▼ para ir a Apagado. Pulse OK para seleccionar.
  Si los tonos de llamada se activaron previamente, en la pantalla aparecerá ✓ junto a Apagado.

  Si los tonos de llamada se desactivaron previamente, en la pantalla no aparecerá ✓ junto a Apagado.

7.6.13.2

Activación o desactivación de los timbres de llamada para las llamadas privadas

Siga el procedimiento para activar o desactivar los timbres de llamada para las llamadas privadas en la radio.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a Herramientas.Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a Config. radio.Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a Tonos/alertas. Pulse OK para seleccionar.

5 Pulse ▲ o ▼ para ir a Timbres de llamada. Pulse OK para seleccionar.

6 Pulse ▲ o ▼ para ir a Llamada privada. Pulse OK para seleccionar.

La pantalla muestra ✓ junto a Activado si los timbres de llamada privada están activados.

La pantalla muestra ✓ junto a Apagado si los Timbres de llamada privada están desactivados.

7 Lleve a cabo una de las siguientes acciones:

- Pulse ▲ o ▼ para seleccionar el tono que desee. Pulse OK para seleccionar.
  La pantalla mostrará ✓ junto al tono seleccionado.
- Pulse ▲ o ▼ para ir a Apagado. Pulse OK para seleccionar.
  Si los tonos de llamada se activaron previamente, en la pantalla aparecerá ✓ junto a Apagado.

  Si los tonos de llamada se desactivaron previamente, en la pantalla no aparecerá ✓ junto a Apagado.

7.6.13.3

Activación o desactivación de los timbres de llamada para las llamadas selectivas

Siga el procedimiento para activar o desactivar los timbres de llamada para las llamadas selectivas en la radio.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a Herramientas.Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a Config. radio.Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a Tonos/alertas. Pulse OK para seleccionar.

5 Pulse ▲ o ▼ para ir a Timbres de llamada.

Pulse OK para seleccionar.

6 Pulse ▲ o ▼ para ir a Llamada selectiva.

Pulse OK para seleccionar.

La pantalla mostrará ✓ y el tono actual.

7 Lleve a cabo una de las siguientes acciones:

- Pulse ▲ o ▼ para seleccionar el tono que desee. Pulse OK para seleccionar.
  La pantalla mostrará ✓ junto al tono seleccionado.
- Pulse ▲ o ▼ para ir a Apagado. Pulse OK para seleccionar.
  Si los tonos de llamada se activaron previamente, en la pantalla aparecerá ✓ junto a Apagado.

Si los tonos de llamada se desactivaron previamente, en la pantalla no aparecerá ✓ junto a Apagado.

7.6.13.4

Activación o desactivación de los timbres de llamada para los mensajes de texto

Siga el procedimiento para activar o desactivar los timbres de llamada para los mensajes de texto en la radio.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a Herramientas. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a Config. radio. Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a Tonos/alertas. Pulse OK para seleccionar.

5 Pulse ▲ o ▼ para ir a Timbres de llamada. Pulse OK para seleccionar.

6 Pulse ▲ o ▼ para ir a Mensaje de texto. Pulse OK para seleccionar.

La pantalla mostrará ✓ y el tono actual.

7 Lleve a cabo una de las siguientes acciones:

- Pulse ▲ o ▼ para seleccionar el tono que desee. Pulse OK para seleccionar.
  La pantalla mostrará ✓ junto al tono seleccionado.
- Pulse ▲ o ▼ para ir a Apagado. Pulse OK para seleccionar.

Si los tonos de llamada se activaron previamente, en la pantalla aparecerá ✓ junto a Apagado.

Si los tonos de llamada se desactivaron previamente, en la pantalla no aparecerá ✓ junto a Apagado.

7.6.13.5

Activación o desactivación de los timbres de llamada para el estado de telemetría con texto

Siga el procedimiento para activar o desactivar los timbres de llamada para los estados de telemetría en la radio.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a Herramientas. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a Config. radio. Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a Tonos/alerta. Pulse OK para seleccionar.

5 Pulse ▲ o ▼ para ir a Timbres de llamada. Pulse OK para seleccionar.

6 Pulse ▲ o ▼ para ir a Telemetría. Pulse OK para seleccionar.

El tono actual queda indicado por un ✓ .

7 Lleve a cabo una de las siguientes acciones:

- Pulse ▲ o ▼ para seleccionar el tono que desee. Pulse OK para seleccionar.
  En la pantalla aparecerá Tono <Número> seleccionado y un ✓ a la izquierda del tono seleccionado.

- Pulse ▲ o ▼ para ir a Desactivar. Pulse OK para seleccionar.
  En la pantalla aparecerá Timbre telemet. apag. y un ✓ a la izquierda de Apagar.

7.6.13.6

Asignación de tipos de timbre

La radio puede programarse para que utilice el sonido de uno de los diez tonos de llamada predefinidos cuando reciba una alerta de llamada o un mensaje de texto de un contacto determinado. La radio reproducirá todos los tipos de timbre al ir desplazándose por la lista. Siga el procedimiento para asignar estilos de tono de la radio.

1. Pulse OK para acceder al menú.
2. Pulse ▲ o ▼ para ir a Contactos. Pulse OK para seleccionar.

   Las entradas están ordenadas alfabéticamente.
3. Pulse ▲ o ▼ para ir al ID o alias que desee.

   Pulse OK para seleccionar.
4. Pulse ▲ o ▼ para ir a Editar. Pulse OK para seleccionar.
5. Pulse OK hasta que la pantalla muestre el menú Edit. tono.

   Un ✓ indica el tono seleccionado actual.
6. Pulse ▲ o ▼ para seleccionar el tono que desee.

   Pulse OK para seleccionar.

   La pantalla muestra un pequeño aviso positivo.

7.6.13.7

Selección de un tipo de tono de alerta

NOTA:
El botón **Tono de alerta** programado se lo asigna su distribuidor o administrador del sistema. Consulte con el distribuidor o administrador del sistema cómo se ha programado la radio.

Puede programar las llamadas de radio para una única llamada de vibración predeterminada. Si el estado Todos tonos está deshabilitado, la radio mostrará el icono de Silencio de Todos tonos. Si el estado Todos tonos está habilitado, se mostrará el tipo de tono de alerta relacionado.

La radio vibra una vez si se trata de un estilo de timbre momentáneo. La radio vibra repetidamente si se trata de un estilo de timbre repetitivo. Cuando se ajuste en Tono y vibración, la radio emitirá un tono de llamada específico si hay una transacción de radio entrante (por ejemplo, Alerta de llamada o Mensaje). Suena como un tono indicador positivo o una llamada perdida.

En las radios con baterías compatibles con la función de vibración y que están acopladas a un clip para el cinturón con vibración, las opciones de tono de alerta son Silencio, Tono, Vibración y Tono y vibración.

En las radios con baterías no compatibles con la función de vibración y que no están acopladas a un clip para el cinturón con vibración, el tono de alerta se establece automáticamente en Tono.Las opciones disponibles para el tono de alerta son Silencio y Tono.

Realice las siguientes acciones para seleccionar un tono de alerta.

- Pulse el botón programado **Tono de alerta** para acceder al menú Tono de alerta.
  a. Pulse ▲ o ▼ para seleccionar `Tono`, `Vibración`, `Tono y vibración` o `Silencio` y pulse OK para seleccionar.
- Acceda a esta función mediante el menú.
  a. Pulse OK para acceder al menú.
  b. Pulse ▲ o ▼ para acceder a `Utilidades` y pulse OK para seleccionar.
  c. Pulse ▲ o ▼ para acceder a `Configuración de la radio` y pulse OK para seleccionar.

d. Pulse ▲ o ▼ para acceder a `Tonos/Alertas` y pulse OK para seleccionar.

e. Pulse ▲ o ▼ para acceder a `Tono de alerta` y pulse OK para seleccionar.

f. Pulse ▲ o ▼ para seleccionar `Tono`, `Vibración`, `Tono y vibración` o `Silencio` y pulse OK para seleccionar.

7.6.13.8

Configuración del estilo de vibración

NOTA:
El botón **Estilo de vibración** programado se lo asigna su distribuidor o administrador del sistema. Consulte con el distribuidor o administrador del sistema cómo se ha programado la radio.

El estilo de vibración se activa cuando el clip para el cinturón con vibración está conectado a la radio con una batería compatible con la función de vibración.

Realice una de las siguientes acciones para configurar el estilo de vibración.

- Pulse el botón programado **Estilo de vibración** para acceder al menú Estilo de vibración.

  a. Pulse ▲ o ▼ para seleccionar `Corta`, `Media` o `Larga` y pulse OK para seleccionar.

- Acceda a esta función en el menú.

  a. Pulse OK para acceder al menú.

  b. Pulse ▲ o ▼ para acceder a `Utilidades` y pulse OK para seleccionar.

  c. Pulse ▲ o ▼ para acceder a `Configuración de la radio` y pulse OK para seleccionar.

  d. Pulse ▲ o ▼ para acceder a `Tonos/Alertas` y pulse OK para seleccionar.

  e. Pulse ▲ o ▼ para acceder a `Estilo de vibración` y pulse OK para seleccionar.

f. Pulse ▲ o ▼ para seleccionar Corta, Media o Larga y pulse OK para seleccionar.

7.6.13.9

Aumento del volumen del tono de alarma

La radio puede programarse para que le avise continuamente cada vez que una llamada de radio se quede sin responder. Esto se realiza mediante un aumento automático y progresivo del volumen del tono de alarma. Esta función se conoce como Escalert. Siga el procedimiento para aumentar el volumen del tono de alarma de la radio.

7.6.14

Funciones del registro de llamadas

La radio realiza el seguimiento de todas las llamadas privadas recientes: salientes, respondidas y perdidas. El registro de llamada se utiliza para visualizar y gestionar las llamadas recientes.

Puede que las alertas de llamadas perdidas se incluyan en los registros de llamadas, en función de la configuración del sistema de la radio. Puede realizar las siguientes tareas en cada una de las listas de llamadas:

- Guardar un alias o un ID en los contactos
- Eliminar llamada
- Ver detalles

7.6.14.1

Visualización de llamadas recientes

Siga el procedimiento para ver las llamadas recientes en la radio.

1. Pulse OK para acceder al menú.
2. Pulse ▲ o ▼ para ir a Registro de llamadas. Pulse OK para seleccionar.
3. Pulse ▲ o ▼ para ir a la lista de preferidos. Las opciones son Perdidas, Respondidas y Salientes.

Pulse OK para seleccionar.

La pantalla muestra la entrada más reciente.

4 Pulse ▲ o ▼ para ver la lista.

Puede iniciar una llamada privada con el alias o ID que aparece en pantalla en ese momento. Para ello, pulse el botón **PTT**.

7.6.14.2

Visualización de los detalles de la lista de llamadas

Siga el procedimiento para ver los detalles de las llamadas en la radio.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Registro de llamadas`.

Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a la lista que desee. Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir al ID o alias que desee.

Pulse OK para seleccionar.

5 Pulse ▲ o ▼ para ir a `Ver detalles`. Pulse OK para seleccionar.

La pantalla muestra los detalles de las llamadas.

7.6.14.3

Almacenamiento de ID o alias desde la lista de llamadas

Siga el procedimiento para almacenar ID o alias en la radio desde la lista de llamadas.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Registro de llamadas`.

Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a la lista que desee. Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir al ID o alias que desee.Pulse OK para seleccionar.

5 Pulse ▲ o ▼ para ir a `Store` (Guardar). Pulse OK para seleccionar.

La pantalla muestra un cursor intermitente.

6 Introduzca el resto de caracteres del alias que desee. Pulse OK para seleccionar.

Puede almacenar un ID sin alias.

La pantalla muestra un pequeño aviso positivo.

7.6.14.4

Eliminación de llamadas desde la lista de llamadas

Siga el procedimiento para eliminar llamadas desde la lista de llamadas.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Registro de llamadas`.

Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a la lista que desee. Pulse OK para seleccionar.

Si la lista está vacía:

- Suena un tono.
- La pantalla muestra `Lista vacía`.

4 Pulse ▲ o ▼ para ir al ID o alias que desee.Pulse OK para seleccionar.

5 Pulse ▲ o ▼ para ir a ¿Eliminar entrada? Pulse OK para seleccionar.

6 Lleve a cabo una de las siguientes acciones:

- Pulse OK para seleccionar Sí y eliminar la entrada.
  La pantalla muestra Entrada eliminada.
- Pulse ▲ o ▼ para seleccionar No. Pulse OK para seleccionar.

La radio vuelve a la pantalla anterior.

7.6.15

Funcionamiento de las alertas de llamada

La localización por alerta de llamada permite avisar al usuario de una radio en particular de que debe responder la llamada.

Esta función solamente se aplica a los alias o ID de suscriptor y se puede acceder a ella a través del menú mediante Contactos o un botón programado de **acceso instantáneo**.

7.6.15.1

Respuesta a alertas de llamada

Siga el procedimiento para responder a alertas de llamada con la radio.

Cuando se recibe una alerta de llamada:

- Se oye un tono repetitivo.
- El indicador LED parpadea en amarillo.

- La pantalla muestra la lista de notificaciones y aparece una alerta de llamada con el alias o ID de la radio que realiza la llamada.

  En función de la configuración de su distribuidor o administrador del sistema, puede responder a una alerta de llamada realizando una de las siguientes opciones:

  - Pulse el botón **PTT** para responder con una llamada privada directamente a la persona que llama.
  - Pulse el botón **PTT** para continuar la comunicación normal con el grupo de conversación.
    La alerta de llamada se mueve a la opción de llamadas perdidas en el menú Registro de llamadas. Puede responder al autor de la llamada perdida desde el registro de llamadas perdidas.

Consulte Lista de notificaciones en la página 176 y Funciones del registro de llamadas en la página 131 para obtener más información.

7.6.15.2

Realización de alertas de llamada

Siga el procedimiento para realizar alertas de llamada con la radio.

1. Pulse el botón de **acceso de marcación rápida** programado.

   La pantalla muestra `Alerta de llamada` y el ID o alias de suscriptor. El indicador LED verde se ilumina.

2. Espere a que se produzca la confirmación.

   Si se recibe la confirmación de la alerta de llamada, la pantalla mostrará un aviso pequeño positivo.

   Si no se recibe ninguna confirmación de la alerta de llamada, la pantalla mostrará un aviso pequeño negativo.

7.6.15.3

Realización de alertas de llamada mediante la lista de contactos

Siga el procedimiento para realizar alertas de llamada con la radio mediante la lista de contactos.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Contactos`. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir al ID o alias que desee.Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a `Alerta de llamada`.

Pulse OK para seleccionar.

La pantalla muestra `Alerta de llamada` y el ID o alias de suscriptor. El indicador LED verde se ilumina.

5 Espere a que se produzca la confirmación.

- Si se recibe la confirmación de la alerta de llamada, la pantalla mostrará un aviso pequeño positivo.
- Si no se recibe ninguna confirmación de la alerta de llamada, la pantalla mostrará un aviso pequeño negativo.

7.6.16

Modo Silenciar

El modo Silenciar ofrece al usuario la opción de silenciar todos los indicadores de audio de la radio.

Cuando se inicia el modo Silenciar, se silencian todos los indicadores de audio de la radio, con excepción de las funciones con mayor prioridad como las operaciones de emergencia.

Cuando se sale del modo Silenciar, la radio vuelve a utilizar tonos y transmisiones de audio.

NOTA:
Se trata de una función adquirible. Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información.

7.6.16.1

Activación del modo Silenciar

Siga el procedimiento para activar el modo Silenciar.

Lleve a cabo una de las siguientes acciones:

- Acceda a esta función a través del botón programable **Modo Silenciar**.
- Acceda a esta función colocando la radio boca abajo momentáneamente.

En función del modelo de radio, la función boca abajo se puede activar desde el menú de la radio o si lo hace el administrador del sistema. Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información.

IMPORTANTE:
Los usuarios no pueden activar la función Man Down o boca abajo a la vez. No es posible tener ambas funciones activas simultáneamente.

NOTA:
La función boca abajo solo se aplica a DP4601e .

Cuando se activa el modo Silenciar ocurre lo siguiente:

- Suena un tono indicador positivo.
- La pantalla muestra `Modo de silenciado activado.`
- La luz LED roja empieza a parpadear y sigue haciéndolo hasta que se sale del modo Silenciar.
- Se muestra el icono del **Modo Silenciar** en la pantalla de inicio.
- La radio está silenciada.
- El temporizador del modo Silenciar comienza la cuenta atrás que tiene configurada.

7.6.16.2

Configuración del temporizador del modo Silenciar

Es posible activar la función modo Silenciar durante un periodo preconfigurado de tiempo mediante la configuración del temporizador del modo Silenciar. La duración del temporizador se configura en el menú de la radio y puede variar de 30 minutos a 6 horas. Cuando el temporizador expira, se sale del modo Silenciar.

Si el temporizador se queda en 0, la radio se queda en el modo Silenciar durante un periodo de tiempo indefinido hasta que la radio se pone boca arriba o se pulsa el botón programado **Modo Silenciar**.

NOTA:
La función boca abajo solo se aplica a DP4601e.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Herramientas`.Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a `Config. radio`.Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a `Temp. silenc.`. Pulse OK para seleccionar.

5 Pulse ▲ o ▼ para editar el valor numérico de cada dígito y pulse OK.

7.6.16.3

Salida del modo Silenciar

Se puede salir de esta función automáticamente cuando expira el temporizador del modo Silenciar.

Lleve a cabo una de las siguientes operaciones para salir del modo Silenciar manualmente:

- Pulse el botón programado **Modo Silenciar**.
- Pulse el botón **PTT** en cualquier entrada.
- Coloque la radio boca arriba durante un momento.

NOTA:
La función boca abajo solo se aplica a DP4601e.

Cuando se desactiva el modo Silenciar ocurre lo siguiente:

- Suena el tono indicador negativo.
- La pantalla muestra el `Modo de silenciado apagado`.
- El LED que parpadea en rojo se apaga.
- El icono del **modo Silenciar** desaparece de la pantalla de inicio.

- La radio desactiva el silencio y se restaura el estado del altavoz.
- Si el temporizador del modo Silenciar no ha expirado, se detiene.

NOTA:
También se sale del modo Silenciar si el usuario transmite voz o cambia a un canal sin programar.

7.6.17

Funcionamiento de emergencia

Una alarma de emergencia se utiliza para indicar una situación crítica. Es posible iniciar una alarma de emergencia en cualquier momento, incluso cuando haya actividad en el canal actual.

Su distribuidor puede establecer la duración de la pulsación del botón **Emergencia** programado, excepto para la presión prolongada, que es similar a la del resto de botones:

Pulsación corta
Duración entre 0,05 y 0,75 segundos.

Pulsación larga
Duración entre 1 y 3,75 segundos.

El botón **Emergencia** se asigna junto con la función Emergencia activada/desactivada. Póngase en contacto con su distribuidor para obtener información acerca del funcionamiento asignado al botón **Emergencia**.

NOTA:
Si se pulsa brevemente el botón **Emergencia** se inicia el modo de emergencia, a continuación, una presión prolongada permite que la radio salga del modo de emergencia.

Si una presión prolongada del botón **Emergencia** inicia el modo de emergencia, a continuación, una pulsación breve permite que la radio salga del modo de emergencia.

La radio soporta tres alarmas de emergencia:

- Alarma de emergencia
- Alarma de emergencia con llamada
- Alarma de emergencia con transmisión de voz posterior

NOTA:
Solo se puede asignar una de las alarmas de emergencia anteriores al botón **Emergencia** programado.

Además, todas las alarmas tienen los siguientes tipos:

Normal
La radio transmite una señal de alarma y utiliza un indicador visual o sonoro.

Silencio
La radio transmite una señal de alarma sin utilizar ningún indicador sonoro ni visual. La radio recibe llamadas sin ningún sonido a través del altavoz, hasta que el periodo programado de transmisión con el *micrófono activo* finaliza o se pulsa el botón **PTT**.

Silencio con voz
La radio transmite una señal de alarma sin ningún indicador sonoro ni visual, pero permite que las llamadas entrantes suenen a través del altavoz. Si el *micrófono de emergencia* está activado, las llamadas entrantes sonarán a través del altavoz una vez que el periodo programado de transmisión con el *micrófono activo* haya finalizado. Los indicadores solo aparecen al pulsar el botón **PTT**.

7.6.17.1

Envío de alarmas de emergencia

Esta función permite enviar una alarma de emergencia, una señal sin voz, que activa una indicación de alerta en un grupo de radios. La radio no muestra ningún indicador sonoro o visual durante el modo de emergencia cuando está configurada en Silencio.

Siga el procedimiento para enviar alarmas de emergencia con la radio.

1 Pulse el botón **Emergen. enc.** programado.

Verá uno de estos resultados:

- La pantalla muestra `Alarma Tx` y el alias de destino.
- La pantalla muestra `Telegrama Tx` y el alias de destino.

El indicador LED verde se ilumina. Aparece el icono de **emergencia**.

NOTA:
Si se ha programado, suena el tono de búsqueda de emergencia. Este tono se silencia cuando la radio transmite o recibe voz y se detiene cuando la radio sale del modo de emergencia. El tono de búsqueda de emergencia se puede programar a través del CPS.

2 Espere a que se produzca la confirmación.

Si es correcta:

- Suena el tono de emergencia.
- El LED rojo parpadea.
- La pantalla muestra `Alarma enviada`.

Si no se realiza correctamente tras agotar todos los reintentos:

- Suena un tono.
- La pantalla muestra `Alarma fallida`.

La radio sale del modo de alarma de emergencia y vuelve a la pantalla de inicio.

7.6.17.2

Envío de alarmas de emergencia con llamada

Esta función permite enviar una alarma de emergencia con llamada a un grupo de radios. Tras el reconocimiento de una radio que esté dentro del grupo, el grupo de radios puede comunicarse a través de un canal de emergencia programado.

Siga el procedimiento para enviar alarmas de emergencia mediante llamada con la radio.

1 Pulse el botón **Emergen. enc.** programado.

Verá lo siguiente:

- La pantalla muestra `Telegrama Tx` y el alias de destino.

El indicador LED verde se ilumina. Aparece el icono de **emergencia**.

NOTA:
Si se ha programado, suena el tono de búsqueda de emergencia. Este tono se silencia cuando la radio transmite o recibe voz y se detiene cuando la radio sale del modo de emergencia.El distribuidor o administrador del sistema pueden programar el tono de búsqueda de emergencia.

2 Espere a que se produzca la confirmación.

Si es correcta:

- Suena el tono de emergencia.
- El LED rojo parpadea.

- La pantalla muestra `Alarma enviada`.
- La radio entra en el modo de llamada de emergencia cuando la pantalla muestra `Emergencia` y el alias del grupo de destino.

3 Pulse el botón **PTT** para realizar la llamada.

El indicador LED verde se ilumina. La pantalla muestra el icono de **llamada grupal**.

4 Lleve a cabo una de las siguientes acciones:

- Espere hasta que acabe el tono de Permitir hablar (si está activado) y comience a hablar con claridad al micrófono.
- Espere a que finalice el efecto local de **PTT** (si está activado) y hable con claridad al micrófono.

5 Suelte el botón **PTT** para escuchar.

La pantalla muestra los alias de grupo y de autor de llamada.

6 Si la función de indicación de canal libre está activada, oirá un breve tono de alerta en el momento en que la radio transmisora suelte el botón **PTT**, lo que señala que el canal está libre para que el usuario responda. Pulse el botón **PTT** para responder la llamada.

7 Para salir del modo de emergencia cuando finaliza la llamada, pulse el botón **Emergencia desactivada** .

La radio volverá a la pantalla de inicio.

7.6.17.3

Alarmas de emergencia con transmisión de voz posterior

Esta función permite enviar una alarma de emergencia con transmisión de voz posterior a un grupo de radios. El micrófono de la radio se activa de manera automática y le permite comunicarse con el grupo de radios sin tener que pulsar el botón **PTT**. El estado de micrófono activado también se conoce como *micrófono activo*.

Si la radio tiene el modo de ciclo de emergencias activado, las repeticiones de *micrófono activo* y el periodo de recepción se realizan con una duración programada.

Durante el modo de ciclo de emergencias, las llamadas recibidas suenan a través del altavoz.

Si pulsa el botón **PTT** durante el periodo de recepción programado, escuchará un tono de prohibición que indica que debe soltar el botón **PTT**. La radio ignora que se ha pulsado el botón **PTT** y permanece en modo de emergencia.

Si pulsa el botón **PTT** mientras el *micrófono activo* está conectado y lo mantiene pulsado después de que haya terminado esta conexión, la radio seguirá transmitiendo hasta que suelte el botón **PTT**.

si se produce un error en la solicitud de la alarma de emergencia, la radio no intenta enviar de nuevo la solicitud y entra directamente en el estado de *micrófono activo*.

NOTA:
Puede que ciertos accesorios no admitan el *micrófono activo*. Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información.

7.6.17.4

Envío de alarmas de emergencia con transmisión de voz posterior

Siga el procedimiento para enviar alarmas de emergencia mediante voz con la radio.

1 Pulse el botón **Emergen. enc.** programado.

Verá uno de estos resultados:

- La pantalla muestra `Alarma Tx` y el alias de destino.
- La pantalla muestra `Telegrama Tx` y el alias de destino.

El indicador LED verde se ilumina. Aparece el icono de **emergencia**.

2 Cuando la pantalla muestre `Alarma enviada`, hable con claridad al micrófono.

La radio detiene automáticamente la transmisión:

- Cuando el tiempo de duración del ciclo entre el *micrófono de emergencia* y las llamadas recibidas se agota, si el modo de ciclo de emergencia está activado.

- La conexión del *micrófono activo* termina si el modo de ciclo de emergencia está desactivado.

3 Pulse el botón **Emergencia desactivada** programado para salir del modo de emergencia.

La radio volverá a la pantalla de inicio.

7.6.17.5

Recepción de alarmas de emergencia

Siga el procedimiento para recibir alarmas de emergencia en la radio.

Cuando se recibe una alarma de emergencia:

- Suena un tono.
- El LED rojo parpadea.
- La pantalla muestra el icono **Emergencia** y el alias de la persona que llama de emergencia o, si hay más de una alarma, se muestran todos los alias de autor de llamada de emergencia en la lista de alarmas.

1 Lleve a cabo una de las siguientes acciones:

- Si solo hay una alarma, pulse OK para ver más detalles.
- Si hay más de una alarma, pulse ▲ o ▼ para ir al alias deseado y, a continuación, pulse OK para ver más detalles.

2 Pulse OK para ver las opciones de acción.

3 Pulse ↩ y seleccione `Sí` para salir de la lista de alarmas.

4 Pulse OK para acceder al menú.

5 Seleccione `Lista de alarmas` para volver a ver la lista de alarmas.

7.6.17.6

Respuesta a alarmas de emergencia

Siga el procedimiento para responder a alertas de emergencia con la radio.

1 Asegúrese de que en la pantalla se muestra la lista de alarmas. Pulse ▲ o ▼ para ir al ID o alias que desee.

2 Si la función de indicación de canal libre está activada, oirá un breve tono de alerta en el momento en que la radio transmisora suelte el botón **PTT**, lo que señala que el canal está libre para que el usuario responda. Pulse el botón **PTT** para transmitir el mensaje de voz de no emergencia al mismo grupo al que se envió la alarma de emergencia.

   El indicador LED verde se ilumina. La radio se mantiene en el modo de emergencia.

3 Lleve a cabo una de las siguientes acciones:

   - Espere hasta que acabe el tono de Permitir hablar (si está activado) y comience a hablar con claridad al micrófono.
   - Espere a que finalice el efecto local de **PTT** (si está activado) y hable con claridad al micrófono.

4 Suelte el botón **PTT** para escuchar.

   Cuando la radio que inicia la emergencia responde:

   - El indicador LED verde parpadea.
   - La pantalla muestra el icono **Llamd. grupo**, el ID de la radio transmisora y la lista de alarmas.

El mensaje de voz de emergencia solo puede transmitirse mediante la radio que inicia la emergencia. Todas las demás radios, incluida la radio que recibe la emergencia, transmiten mensajes de voz de no emergencia.

7.6.17.7

Salida del modo de emergencia tras recibir la alarma de emergencia

Realice alguna de estas acciones para salir del modo de emergencia tras recibir la alarma de emergencia:

- Elimine los elementos de alarma.
- Apague la radio.

7.6.17.8

Reinicio del modo de emergencia

Esta función solo se aplica a la radio que envía la alarma de emergencia. Siga el procedimiento para reiniciar el modo de emergencia en la radio.

Lleve a cabo una de las siguientes acciones:

- Cambia el canal mientras la radio se encuentra en modo de emergencia. Si la alarma de emergencia está habilitada en el nuevo canal, la radio sale del modo de emergencia y reinicia la emergencia.
- Pulse el botón **Emergencia activada** programado durante un estado de transmisión/inicio de emergencia. Esto provoca que la radio salga de este estado y reinicie la emergencia.

7.6.17.9

Salida del modo de emergencia

Esta función solo se aplica a la radio que envía la alarma de emergencia.

La radio sale del modo de emergencia:

- Si se recibe una confirmación (solo para alarma de emergencia).
- Si se han agotado todos los intentos de enviar la alarma.
- La radio se apaga.

NOTA:
La radio no volverá a reiniciar automáticamente el modo de emergencia cuando se vuelva a encender.

Siga el procedimiento para salir del modo de emergencia de la radio.

Lleve a cabo una de las siguientes acciones:

- Pulse el botón **Emergencia desactivada** programado.
- Apague la radio y, a continuación, vuelve a encenderla si se ha programado que la radio permanezca en el canal de retorno de emergencia incluso después de recibir la confirmación.
- Cambie el canal a un canal nuevo que no tiene el sistema de emergencia configurado.
  La pantalla muestra `Sin emergencia`.

7.6.17.10

Eliminación de un elemento de alarma de la lista de alarmas

Siga el procedimiento para eliminar los elementos de alarma de la lista de alarmas, para salir del modo de emergencia.

1. Pulse OK para acceder al menú.
2. Pulse ▲ o ▼ para ir a `Lista alar.` Pulse OK para seleccionar.
3. Pulse ▲ o ▼ para seleccionar el elemento de alarma que desee. Pulse OK para seleccionar.
4. Pulse ▲ o ▼ para ir a `Eliminar`. Pulse OK para seleccionar.

7.6.18

Hombre caído

NOTA:
La función de Man Down solo se aplica a DP4601e .

Esta función solicita que se envíe un mensaje de emergencia si hay un cambio en el movimiento de la radio, como inclinación, movimiento o falta de movimiento durante un tiempo predefinido.

Cuando cambia el movimiento de la radio durante un periodo de tiempo programado, esta avisa al usuario de que se han detectado cambios en el movimiento a través de un indicador de audio.

Si el usuario sigue sin confirmarlo antes de que se agote el temporizador de recordatorio predefinido, la radio inicia una llamada o una alarma de emergencia. Puede programar el temporizador de recordatorio con el CPS.

7.6.18.1

Activación y desactivación de la función Man Down

NOTA:
La configuración y el botón programado **Man Down** se configuran con CPS. Consulte con el distribuidor o administrador del sistema cómo se ha programado la radio.

Si desactiva Man Down, el tono de alerta programado sonará varias veces hasta que se active la función. Oirá un tono de error del dispositivo si falla el encendido de la función Man Down. El tono de error del dispositivo seguirá sonando hasta que la radio vuelva al funcionamiento normal.

Puede activar o desactivar a esta función mediante alguna de las acciones siguientes.

- Pulse el botón programado **Man Down** para activar o desactivar la función.
- Acceda a esta función en el menú.

  a. Pulse OK para acceder al menú.

  b. Pulse ▲ o ▼ para ir a `Herramientas`.Pulse OK para seleccionar.

  c. Pulse ▲ o ▼ para ir a `Config. radio`.Pulse OK para seleccionar.

  d. Pulse ▲ o ▼ para ir a `Man Down`. Pulse OK para seleccionar.

  También puede utilizar ◀ o ▶ para cambiar la opción seleccionada.

  e. Pulse OK para activar o desactivar Man Down.

  Si está activado, ✓ aparece junto a `Activado`.

  Si se desactiva, ✓ junto a `Activado` desaparece.

7.6.19

Mensajes de texto

La radio puede recibir datos como, por ejemplo, un mensaje de texto, de otra radio o una aplicación de mensajes de texto.

Existen dos tipos de mensajes de texto: mensajes de texto y mensajes de texto breves DMR (Radio móvil digital). La longitud máxima de un mensaje de texto breve DMR es de 23 caracteres. La longitud máxima de un mensaje de texto es de 280 caracteres, incluida la línea de asunto. La línea de asunto solo aparece al recibir mensajes desde las aplicaciones de correo electrónico.

NOTA:
La longitud máxima de caracteres se aplica solo a los modelos con la última versión de software y hardware. Para modelos de radio con software y hardware más antiguo, la longitud máxima de un mensaje de texto es de 140 caracteres. Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información.

Para el árabe, la orientación de la entrada de texto es de derecha a izquierda.

7.6.19.1

Mensajes de texto

Los mensajes de texto se guardan en un buzón y se ordenan según el mensaje recibido más recientemente.

7.6.19.1.1

Visualización de los mensajes de texto

Siga el procedimiento para ver los mensajes de texto en la radio.

1. Pulse OK para acceder al menú.
2. Pulse ▲ o ▼ para ir a `Mensajes`. Pulse OK para seleccionar.
3. Pulse ▲ o ▼ para ir a `Buzón`. Pulse OK para seleccionar.

   Si el buzón está vacío:

   - La pantalla muestra `Lista vacía`.
   - Si el tono de teclado está activado, sonará un tono.

4 Pulse ▲ o ▼ para ir al mensaje que desee. Pulse OK para seleccionar.

Si el mensaje procede de una aplicación de correo electrónico, en la pantalla aparecerá una línea de asunto.

7.6.19.1.2

Visualización de mensajes de texto de estado de telemetría

Siga el procedimiento para ver un mensaje de texto de estado de telemetría desde el buzón de entrada.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Mensajes`. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a `Buzón`. Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir al mensaje que desee. Pulse OK para seleccionar.

No puede responder a un mensaje de texto de estado de telemetría.

La pantalla muestra `Telemetría:. <Mensaje de texto de estado>`.

5 Mantenga pulsado para volver a la pantalla de inicio.

7.6.19.1.3

Visualización de mensajes de texto guardados

Siga el procedimiento para ver los mensajes de texto guardados en la radio.

1 Lleve a cabo una de las siguientes acciones:

- Pulse el botón **Mensaje txt** programado. Continúe con el paso paso 3.

- Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Mensajes`. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a `Borradores`. Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir al mensaje que desee. Pulse OK para seleccionar.

7.6.19.1.4

Respuesta a mensajes de texto

Siga el procedimiento para responder a mensajes de texto con la radio.

Al recibir un mensaje de texto:

- La pantalla muestra la lista de notificaciones con el alias o ID del remitente.
- La pantalla muestra el icono de **mensaje**.

NOTA:
La radio sale de la pantalla de alerta de mensaje de texto y realiza una llamada privada o de grupo al remitente del mensaje si se pulsa el botón **PTT**.

1 Lleve a cabo una de las siguientes acciones:

- Pulse ▲ o ▼ para ir a `Leer`. Pulse OK para seleccionar.
  La pantalla muestra el mensaje de texto. Si el mensaje procede de una aplicación de correo electrónico, en la pantalla aparecerá una línea de asunto.
- Pulse ▲ o ▼ para ir a `Leer luego`. Pulse OK para seleccionar.
  La radio vuelve a la pantalla en la que se encontraba antes de recibir el mensaje de texto.
- Pulse ▲ o ▼ para ir a `Eliminar`. Pulse OK para seleccionar.

2 Pulse ↩ para volver a la bandeja de entrada.

7.6.19.1.5

Respuesta a los mensajes de texto

Siga el procedimiento para responder a los mensajes de texto en la radio.

1 Lleve a cabo una de las siguientes acciones:

- Pulse el botón **Mensaje txt** programado. Continúe en el paso paso 3.
- Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Mensajes`. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a `Buzón`. Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir al mensaje que desee. Pulse OK para seleccionar.

Si el mensaje procede de una aplicación de correo electrónico, en la pantalla aparecerá una línea de asunto.

5 Pulse OK para acceder al submenú.

6 Lleve a cabo una de las siguientes acciones:

- Pulse ▲ o ▼ para ir a `Responder`. Pulse OK para seleccionar.
- Pulse ▲ o ▼ para ir a `Resp. ráp.` Pulse OK para seleccionar.

Aparece un cursor intermitente. Puede escribir o editar el mensaje, si es necesario.

7 Pulse OK cuando termine de redactar el mensaje.

La pantalla muestra un aviso pequeño de transición, que confirma que se está enviando el mensaje.

8 Espere a que se produzca la confirmación.

Si es correcta:

- Suena un tono.
- La pantalla muestra un pequeño aviso positivo.

Si no es correcta:

- Suena un tono.
- La pantalla muestra un aviso pequeño negativo.
- La radio vuelve a la pantalla de la opción `Reenviar`.

7.6.19.1.6

Transferencia de mensajes de texto

Siga el procedimiento para transferir mensajes de texto con la radio.

En la pantalla de la opción `Volver a enviar`:

1 Pulse ▲ o ▼ para ir a `Transferir` y, a continuación, pulse OK para enviar el mismo mensaje a otro suscriptor, o ID o alias de grupo.

2 Pulse ▲ o ▼ para ir al ID o alias que desee.Pulse OK para seleccionar.

La pantalla muestra un aviso pequeño de transición, que confirma que se está enviando el mensaje.

3 Espere a que se produzca la confirmación.

Si es correcta:

- Suena un tono indicador positivo.
- La pantalla muestra un pequeño aviso positivo.

Si no es correcta:

- Suena un tono indicador negativo.
- La pantalla muestra un aviso pequeño negativo.

7.6.19.1.7

Reenvío de mensajes de texto

Siga el procedimiento para reenviar mensajes de texto con la radio.

En la pantalla de la opción `Volver a enviar`:

Pulse OK para volver a enviar el mismo mensaje al mismo alias o ID de grupo o suscriptor.

Si es correcta:

- Suena un tono indicador positivo.
- La pantalla muestra un pequeño aviso positivo.

Si no es correcta:

- Suena un tono indicador negativo.
- La pantalla muestra un aviso pequeño negativo.
- La radio vuelve a la pantalla de la opción `Volver a enviar`.

7.6.19.1.8

Eliminación de mensajes de texto desde el buzón

Siga el procedimiento para eliminar mensajes de texto desde el buzón de la radio.

1 Lleve a cabo una de las siguientes acciones:
   - Pulse el botón **Mensaje txt** programado. Continúe con el paso paso 3.
   - Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Mensajes`. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a `Buzón`. Pulse OK para seleccionar.

   Si el buzón está vacío:
   - La pantalla muestra `Lista vacía`.
   - Suena un tono.

4 Pulse ▲ o ▼ para ir al mensaje que desee. Pulse OK para seleccionar.

Si el mensaje procede de una aplicación de correo electrónico, en la pantalla aparecerá una línea de asunto.

5 Pulse OK para acceder al submenú.

6 Pulse ▲ o ▼ para ir a `Eliminar`. Pulse OK para seleccionar.

7 Pulse ▲ o ▼ para elegir `Sí`. Pulse OK para seleccionar.

La pantalla muestra un pequeño aviso positivo. La pantalla vuelve al buzón.

7.6.19.1.9

Eliminación de todos los mensajes de texto desde el buzón

Siga el procedimiento para eliminar todos los mensajes de texto desde el buzón de la radio.

1 Lleve a cabo una de las siguientes acciones:

- Pulse el botón **Mensaje txt** programado. Continúe con el paso paso 3.
- Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Mensajes`. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a `Buzón`. Pulse OK para seleccionar.

Si el buzón está vacío:

- La pantalla muestra `Lista vacía`.
- Suena un tono.

4 Pulse ▲ o ▼ para ir a `Eliminar todo`. Pulse OK para seleccionar.

5 Pulse ▲ o ▼ para elegir `Sí`. Pulse OK para seleccionar.

La pantalla muestra un pequeño aviso positivo.

7.6.19.1.10

Eliminación de mensajes de texto guardados desde la carpeta Borrador

Siga el procedimiento para eliminar los mensajes de texto guardados del borrador de la radio.

1 Lleve a cabo una de las siguientes acciones:

- Pulse el botón **Mensaje txt** programado. Continúe con el paso paso 3.
- Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Mensajes`. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a `Borradores`. Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir al mensaje que desee. Pulse OK para seleccionar.

5 Pulse ▲ o ▼ para ir a `Eliminar`. Pulse OK para eliminar el mensaje de texto.

7.6.19.2

Envío de mensajes de texto

Cuando se envía un mensaje a otra radio, este se guarda en la carpeta Enviados. El último mensaje de texto enviado siempre se añade al principio de la carpeta Enviados. Puede enviar, transmitir o eliminar un mensaje de texto enviado.

La carpeta Enviados es capaz de almacenar los 30 últimos mensajes enviados como máximo. Cuando esté llena, el siguiente mensaje de texto que se envíe sustituirá automáticamente al mensaje de texto más antiguo de la carpeta.

Si sale de la pantalla de envío de mensajes mientras se envía el mensaje, la radio actualiza el estado del mensaje en la carpeta Enviados sin realizar ninguna indicación en la pantalla ni mediante un sonido.

Si la radio cambia de modo o se apaga antes de que se actualice el estado del mensaje en la carpeta Enviados, la radio no puede terminar de enviar los mensajes en curso y los marca automáticamente con un icono de **error de envío**.

La radio admite un máximo de cinco mensajes en curso al mismo tiempo. En este tiempo, la radio no puede enviar mensajes nuevos y los marca automáticamente con un icono de **error de envío**.

Si mantiene pulsado en cualquier momento, la radio volverá a la pantalla de inicio.

NOTA:
Si el tipo de canal (por ejemplo, un canal digital convencional o Capacity Plus) no coincide, solo podrá editar, transferir o borrar un mensaje enviado.

7.6.19.2.1

Visualización de mensajes de texto enviados

Siga el procedimiento para ver los mensajes de texto enviados en la radio.

1 Lleve a cabo una de las siguientes acciones:
   - Pulse el botón **Mensaje txt** programado. Continúe con el paso paso 3.
   - Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Mensajes`. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a `Enviados`. Pulse OK para seleccionar.

Si la carpeta Enviados está vacía:

- La pantalla muestra `Lista vacía`.
- Si el tono de teclado está activado, sonará un tono bajo.

4 Pulse ▲ o ▼ para ir al mensaje que desee. Pulse OK para seleccionar.

Si el mensaje procede de una aplicación de correo electrónico, en la pantalla aparecerá una línea de asunto.

7.6.19.2.2

Envío de mensajes de texto enviados

Siga el procedimiento para enviar mensajes de texto enviados con la radio.

Si está viendo un mensaje enviado:

1 Pulse OK mientras visualiza el mensaje.

2 Pulse ▲ o ▼ para ir a `Reenviar`. Pulse OK para seleccionar.

La pantalla muestra un aviso pequeño de transición, que confirma que se está enviando el mensaje.

3 Espere a que se produzca la confirmación.

Si es correcta:

- Suena un tono indicador positivo.
- La pantalla muestra un pequeño aviso positivo.

Si no es correcta:

- Suena un tono indicador negativo.
- La pantalla muestra un aviso pequeño negativo.
- La radio accede a la pantalla de la opción `Volver a enviar`. Consulte Reenvío de mensajes de texto en la página 160 para obtener más información.

7.6.19.2.3

Eliminación de todos los mensajes de texto enviados desde la carpeta Enviados

Siga el procedimiento para eliminar todos los mensajes de texto enviados de la radio desde la carpeta Enviados.

1 Lleve a cabo una de las siguientes acciones:

- Pulse el botón **Mensaje txt** programado. Continúe con el paso paso 3.
- Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Mensajes`. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a `Enviados`. Pulse OK para seleccionar.

Si la carpeta Enviados está vacía:

- La pantalla muestra `Lista vacía`.
- Suena un tono.

4 Pulse ▲ o ▼ para ir a `Eliminar todo`. Pulse OK para seleccionar.

5 Lleve a cabo una de las siguientes acciones:

- Pulse ▲ o ▼ para elegir `Sí`. Pulse OK para seleccionar.
  La pantalla muestra un pequeño aviso positivo.
- Pulse ▲ o ▼ para seleccionar `No`. Pulse OK para seleccionar.
  La radio vuelve a la pantalla anterior.

7.6.19.3

Mensajes de texto rápidos

7.6.19.3.1

Envío de mensajes de texto rápidos

Siga el procedimiento para enviar mensajes de texto rápidos predefinidos de la radio a alias predefinidos.

1 Pulse el botón de **acceso de marcación rápida** programado.

La pantalla muestra un aviso pequeño de transición, que confirma que se está enviando el mensaje.

2 Espere a que se produzca la confirmación.

Si es correcta:

- Suena un tono indicador positivo.
- La pantalla muestra un pequeño aviso positivo.

Si no es correcta:

- Suena un tono indicador negativo.
- La pantalla muestra un aviso pequeño negativo.
- La radio accede a la pantalla de la opción `Reenviar`. Consulte Reenvío de mensajes de texto en la página 160 para obtener más información.

7.6.20

Codificación de mensajes analógicos

La radio puede enviar mensajes preprogramados desde la lista de mensajes a un alias de radio o a un operador.

7.6.20.1

Envío de mensajes con codificación MDC a los operadores

Siga el procedimiento para enviar mensajes con codificación MDC a los operadores con la radio.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Mensaje`. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a `Texto rápido`. Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir al mensaje que desee. Pulse OK para seleccionar.

La pantalla muestra un aviso pequeño de transición, que confirma que se está enviando el mensaje.

5 Espere a que se produzca la confirmación.

Si es correcta:

- Suena un tono indicador positivo.
- La pantalla muestra un pequeño aviso positivo.

Si no es correcta:

- Suena un tono indicador negativo.
- La pantalla muestra un aviso pequeño negativo.

7.6.20.2

Envío de mensajes con codificación de cinco tonos a los contactos

Siga el procedimiento para enviar mensajes con codificación de cinco tonos a los contactos con la radio.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Mensaje`. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a `Texto rápido`. Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir al mensaje que desee. Pulse OK para seleccionar.

5 Pulse ▲ o ▼ hasta llegar al contacto que desee. Pulse OK para seleccionar.

La pantalla muestra un aviso pequeño de transición, que confirma que se está enviando el mensaje.

6 Espere a que se produzca la confirmación.

Si es correcta:

- Suena un tono indicador positivo.

- La pantalla muestra un pequeño aviso positivo.

Si no es correcta:

- Suena un tono indicador negativo.
- La pantalla muestra un aviso pequeño negativo.

NOTA:
Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información.

7.6.21

Actualización de estado analógico

La radio está habilitada para enviar mensajes preprogramados desde la lista de estados que indica su actividad actual a un contacto de radio (en sistemas de cinco tonos) o al operador (en sistemas Motorola Data Communication).

El último mensaje de confirmación de recepción se mantiene en la parte superior de la lista de estados. Los demás mensajes se organizan en orden alfanumérico.

7.6.21.1

Envío de actualizaciones de estado a contactos predefinidos

Siga el procedimiento para enviar actualizaciones de estado a contactos predefinidos con la radio.

1. Pulse ▲ o ▼ para ir a `Estado`. Pulse OK para seleccionar.
2. Pulse ▲ o ▼ hasta llegar al estado que desee.

   Pulse OK para seleccionar.

   Si pulsa el botón **PTT** mientras se encuentra en la lista de sistemas de cinco tonos, la radio enviará la actualización de estado seleccionada y volverá a la pantalla de inicio para iniciar una llamada de voz.
3. Pulse ▲ o ▼ para ir a `Estab. predet.` Pulse OK para seleccionar.

   La pantalla muestra un aviso pequeño de transición, que confirma que se está enviando la actualización de estado.

4 Espere a que se produzca la confirmación.

Si es correcta:

- Suena un tono indicador positivo.
- La pantalla muestra un pequeño aviso positivo.
- La pantalla muestra ✓ junto al estado de confirmación.

Si no es correcta:

- Suena un tono indicador negativo.
- La pantalla muestra un aviso pequeño negativo.
- La pantalla muestra ✓ junto al estado anterior.

Consulte Configuración de contacto predeterminado en la página 399 para obtener más información sobre cómo configurar el contacto predeterminado para los sistemas de cinco tonos.

7.6.21.2

Visualización de detalles de estado de 5 tonos

Siga el procedimiento para ver los detalles de estado de 5 tonos en la radio.

Se asume que ha adquirido la clave de licencia del software.

1 Pulse ▲ o ▼ para ir a `Estado`. Pulse OK para seleccionar.

2 Pulse ▲ o ▼ hasta llegar al estado que desee.

Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a `Ver detalles`. Pulse OK para seleccionar.

La pantalla muestra detalles del estado seleccionado.

7.6.22

Privacidad

Esta función ayuda a evitar que los usuarios no autorizados escuchen conversaciones en un canal mediante el uso de una solución de cifrado basada en software. Las partes de señalización e identificación de usuario de una transmisión no se mezclan.

La radio debe tener la privacidad habilitada en el canal para enviar una transmisión con la privacidad habilitada, aunque no es un requisito necesario para recibir una transmisión. Mientras se encuentra en un canal con la privacidad habilitada, la radio puede recibir transmisiones claras o descodificadas.

Es posible que algunos modelos de radio no ofrezcan la función de privacidad o la configuración sea diferente. Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información.

La radio admite dos tipos de privacidad, pero solo se puede asignar una a la radio. Los tipos de privacidad son los siguientes:

- Privacidad básica
- Privacidad mejorada

Para descodificar una llamada o una transmisión de datos que tiene la privacidad activada, la radio debe estar programada para tener la misma clave de privacidad (para Privacidad básica) o, el mismo valor de clave e ID de clave (para Privacidad mejorada) que la radio transmisora.

Si la radio recibe una llamada codificada con una clave de privacidad distinta o bien, un valor de clave e ID de clave distintos, el usuario oye una transmisión distorsionada (Privacidad básica) o nada en absoluto (Privacidad mejorada).

En un canal con la privacidad activada, la radio puede recibir llamadas claras o descodificadas, en función de cómo se haya programado. Además, puede reproducir un tono de aviso o no, en función de cómo se haya programado.

El indicador LED se ilumina en color verde cuando la radio transmite y parpadea rápidamente cuando recibe una transmisión con la función de privacidad activada.

NOTA:
Esta función no se aplica a canales de Banda Ciudadana que estén en la misma frecuencia.

7.6.22.1

Activación o desactivación de la privacidad

Siga el procedimiento para activar o desactivar la privacidad en la radio.

1 Lleve a cabo una de las siguientes acciones:
   - Pulse el botón **Privacidad** programado. Omita los pasos que se indican a continuación.

- Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a Herramientas.Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a Config. radio.Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a Privacidad. Pulse OK para seleccionar.

5 Lleve a cabo una de las siguientes acciones:

- Pulse ▲ o ▼ para ir a Encendido. Pulse OK para seleccionar. La pantalla muestra ✓ junto a Enc.
- Pulse ▲ o ▼ para ir a Apagado. Pulse OK para seleccionar. La pantalla muestra ✓ junto a Apagado.

7.6.23

Inhibic. respuesta

Esta función ayuda a prevenir que la radio responda a cualquier transmisión entrante.

NOTA:
Se trata de una función adquirible. Consulte con el distribuidor o administrador del sistema cómo se ha programado la radio.

Si se activa, la radio no genera ninguna transmisión saliente en respuesta a transmisiones entrantes, tales como Verificación de radio, Alerta de llamada, Desactivación de radio, Monitorización remota, Servicio de registro automático (ARS), Respuesta a mensajes privados y envío de informes de ubicación GNSS. La radio no puede recibir llamadas privadas confirmadas cuando se activa esta función. Sin embargo, la radio puede enviar transmisiones manualmente.

7.6.23.1

Activación/desactivación de la inhibición de respuesta

Siga el procedimiento para activar o desactivar la inhibición de respuesta en la radio.

Pulse el botón de **Inhib. resp.** programado.

Si es correcta:

- Suena un tono indicador positivo.
- La pantalla muestra un aviso pequeño positivo momentáneamente.

Si no es correcta:

- Suena un tono indicador negativo.
- La pantalla muestra un aviso pequeño negativo momentáneamente.

7.6.24

Seguridad

Esta función puede habilitar o deshabilitar cualquier radio del sistema.

Por ejemplo, puede que quiera deshabilitar una radio robada para evitar que una persona no autorizada la utilice y luego activarla cuando la recupere.

Hay dos maneras de activar o desactivar una radio, con autenticación o sin autenticación.

La desactivación de radio autenticada es una función adquirible. Con la desactivación de radio autenticada, se necesita una verificación para activar o desactivar una radio. Cuando la radio inicia esta función en una radio de destino con autenticación de usuarios, se necesita una frase de paso. La frase de paso se preprograma en la radio de destino mediante CPS.

No recibirá ninguna confirmación si pulsa durante las operaciones de activar radio o desactivar radio.

NOTA:
Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información.

7.6.24.1

Desactivando las radios

Siga el procedimiento para desactivar la radio.

1. Pulse el botón **Desactivar radio** programado.
2. Pulse ▲ o ▼ para ir al ID o alias que desee.
3. Pulse OK para seleccionar. Ocurrirá una de las siguientes situaciones:

- La pantalla muestra `Deshab. radio: <ID o alias del suscriptor>`. El indicador LED verde parpadea.
- Aparece una pantalla de frase de paso.

  Introduzca la frase de paso. Pulse OK para continuar.

  - Si la frase de paso es correcta, la pantalla muestra un pequeño aviso de transición que indica que la solicitud está en curso. El indicador LED verde se ilumina.
  - Si la frase de paso no es correcta, la pantalla muestra un pequeño aviso negativo y vuelve a la pantalla anterior.

4 Espere a que se produzca la confirmación.

Si es correcta:

- Suena un tono indicador positivo.
- La pantalla muestra un pequeño aviso positivo.

Si no es correcta:

- Suena un tono indicador negativo.
- La pantalla muestra un aviso pequeño negativo.

7.6.24.2

Desactivación de las radios mediante la lista de contactos

Siga el procedimiento para desactivar la radio mediante la lista de contactos.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Contactos`.Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir al ID o alias que desee.Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a `Desactivación radio`.

5 Pulse OK para seleccionar. Ocurrirá una de las siguientes situaciones:

- La pantalla muestra `Desactivación radio: <<ID o alias del suscriptor>`. El indicador LED verde parpadea.
- Aparece una pantalla de frase de paso.

  Introduzca la frase de paso. Pulse OK para continuar.

  - Si la frase de paso es correcta, la pantalla muestra un pequeño aviso de transición que indica que la solicitud está en curso. El indicador LED verde se ilumina.
  - Si la frase de paso no es correcta, la pantalla muestra un pequeño aviso negativo y vuelve a la pantalla anterior.

6 Espere a que se produzca la confirmación.

Si es correcta:

- Suena un tono indicador positivo.
- La pantalla muestra un pequeño aviso positivo.

Si no es correcta:

- Suena un tono indicador negativo.
- La pantalla muestra un aviso pequeño negativo.

7.6.24.3

Desactivación de las radios mediante marcación manual

Siga el procedimiento para desactivar la radio mediante marcación manual.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Contactos`.Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a `Marcdo. manual`. Pulse OK para seleccionar.

4 Introduzca el ID de suscriptor y pulse OK para continuar.

5 Pulse ▲ o ▼ para ir a `Deshab. radio`.

6 Pulse OK para seleccionar. Ocurrirá una de las siguientes situaciones:

- La pantalla muestra un pequeño aviso de transición que indica que la solicitud está en curso. El indicador LED verde parpadea.
- Aparece una pantalla de frase de paso.

  Introduzca la frase de paso. Pulse OK para continuar.

  - Si la frase de paso es correcta, la pantalla muestra un pequeño aviso de transición que indica que la solicitud está en curso. El indicador LED verde se ilumina.
  - Si la frase de paso no es correcta, la pantalla muestra un pequeño aviso negativo y vuelve a la pantalla anterior.

7 Espere a que se produzca la confirmación.

Si es correcta:

- Suena un tono indicador positivo.
- La pantalla muestra un pequeño aviso positivo.

Si no es correcta:

- Suena un tono indicador negativo.
- La pantalla muestra un aviso pequeño negativo.

7.6.24.4

Activación de las radios

Siga el procedimiento para activar la radio.

1 Pulse el botón **Habilitar radio** programado.

2 Pulse ▲ o ▼ para ir al ID o alias que desee.

3 Pulse OK para seleccionar. Ocurrirá una de las siguientes situaciones:

- La pantalla muestra `Activar radio: <ID o alias del suscriptor>`. El indicador LED verde se ilumina.
- Aparece una pantalla de frase de paso.

Introduzca la frase de paso. Pulse OK para continuar.

- Si la frase de paso es correcta, la pantalla muestra un pequeño aviso de transición que indica que la solicitud está en curso. El indicador LED verde se ilumina.
- Si la frase de paso no es correcta, la pantalla muestra un pequeño aviso negativo y vuelve a la pantalla anterior.

4 Espere a que se produzca la confirmación.

Si es correcta:

- Suena un tono indicador positivo.
- La pantalla muestra un pequeño aviso positivo.

Si no es correcta:

- Suena un tono indicador negativo.
- La pantalla muestra un aviso pequeño negativo.

7.6.24.5

Activación de las radios mediante la lista de contactos

Siga el procedimiento para activar la radio mediante la lista de contactos.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Contactos`.Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir al ID o alias que desee.Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a `Habilitar radio`.

5 Pulse OK para seleccionar. Ocurrirá una de las siguientes situaciones:

- La pantalla muestra `Activar radio: <ID o alias del suscriptor>`. El indicador LED verde se ilumina.

- Aparece una pantalla de frase de paso.

  Introduzca la frase de paso. Pulse OK para continuar.

  - Si la frase de paso es correcta, la pantalla muestra un pequeño aviso de transición que indica que la solicitud está en curso. El indicador LED verde se ilumina.
  - Si la frase de paso no es correcta, la pantalla muestra un pequeño aviso negativo y vuelve a la pantalla anterior.

6 Espere a que se produzca la confirmación.

Si es correcta:

- Suena un tono indicador positivo.
- La pantalla muestra un pequeño aviso positivo.

Si no es correcta:

- Suena un tono indicador negativo.
- La pantalla muestra un aviso pequeño negativo.

7.6.24.6

Activación de las radios mediante marcación manual

Siga el procedimiento para activar la radio mediante marcación manual.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Contactos`.Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a `Marcación manual`. Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a `Llamada privada`. Pulse OK para seleccionar.

La primera línea de texto muestra `Núm. radio:`.

5 Introduzca el ID de suscriptor y pulse OK para continuar.

6 Pulse ▲ o ▼ para ir a `Habilitar radio`.

7 Pulse OK para seleccionar. Ocurrirá una de las siguientes situaciones:

- El indicador LED verde se ilumina.
- Aparece una pantalla de frase de paso.

  Introduzca la frase de paso. Pulse OK para continuar.

  - Si la frase de paso es correcta, la pantalla muestra un pequeño aviso de transición que indica que la solicitud está en curso. El indicador LED verde se ilumina.
  - Si la frase de paso no es correcta, la pantalla muestra un pequeño aviso negativo y vuelve a la pantalla anterior.

8 Espere a que se produzca la confirmación.

Si es correcta:

- Suena un tono indicador positivo.
- La pantalla muestra un pequeño aviso positivo.

Si no es correcta:

- Suena un tono indicador negativo.
- La pantalla muestra un aviso pequeño negativo.

7.6.25

Operario aislado

Esta función solicita que se envíe un mensaje de emergencia si no hay actividad del usuario durante un periodo de tiempo predefinido, como cualquier pulsación de un botón de la radio o la selección de canales.

Tras un periodo programado de tiempo de inactividad por parte del usuario, la radio avisa de antemano mediante un indicador de audio cuando el temporizador de inactividad se agota.

Si el usuario sigue sin confirmarlo antes de que se agote el temporizador de recordatorio predefinido, la radio inicia una alarma de emergencia.

Únicamente se asigna a esta función una de las siguientes alarmas de emergencia:

- Alarma de emergencia
- Alarma de emergencia con llamada

- Alarma de emergencia con transmisión de voz posterior

La radio permanece en el estado de emergencia, lo que permite que se emitan mensajes de voz hasta que se realice una acción. Consulte Funcionamiento de emergencia en la página 418 para obtener más información sobre las formas para salir del modo de emergencia.

NOTA:
Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información.

7.6.26

Funciones de bloqueo por contraseña

Esta función le permite restringir el acceso a la radio al solicitar una contraseña cuando el dispositivo está activado.

7.6.26.1

Acceso a las radios mediante el uso de contraseñas

Siga el procedimiento para acceder a la radio mediante el uso de una contraseña.

1 Introduzca la contraseña de cuatro dígitos actual.
   - Pulse ▲ o ▼ para editar el valor numérico de cada dígito y, a continuación, pulse OK para acceder y avanzar hasta el siguiente dígito.

2 Pulse OK para introducir la contraseña.

   Si es correcta, se encenderá la radio.
   Si no es correcta:
   - Tras el primer y segundo intento, la pantalla mostrará `Contraseña incorr.` Repita paso 1.
   - Tras el tercer intento, en la pantalla aparecerá `Contraseña incorr.` y, a continuación, `Radio bloqueada`. Suena un tono. El indicador LED parpadeará dos veces en amarillo. La radio entrará en estado de bloqueo durante 15 minutos.

NOTA:
En estado bloqueado, la radio solo responde a las entradas del **botón de volumen/ encendido/apagado** y del botón **Luz fondo**.

7.6.26.2

Activación o desactivación del bloqueo por contraseña

Siga el procedimiento para activar o desactivar el bloqueo por contraseña en la radio.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Herramientas`. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a `Config. radio`. Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a `Bloq. contras.` Pulse OK para seleccionar.

5 Introduzca la contraseña de cuatro dígitos actual.

- Utilice un micrófono con teclado.
- Pulse ▲ o ▼ para editar el valor numérico de cada dígito y, a continuación, pulse OK para acceder y avanzar hasta el siguiente dígito.
  Se oirá un tono indicador positivo cada vez que se introduce un dígito.

6 Pulse OK para introducir la contraseña.

Si la contraseña es incorrecta, la pantalla mostrará `Contraseña incorr.` y volverá automáticamente al menú anterior.

7 Lleve a cabo una de las siguientes acciones:

- Pulse ▲ o ▼ para ir a `Activar`. Pulse OK para seleccionar.
  La pantalla muestra ✓ junto a `Activar`.

- Pulse ▲ o ▼ para ir a `Desactivar`. Pulse OK para seleccionar.
  La pantalla muestra ✓ junto a `Desactivar`.

7.6.26.3

Desbloqueo de radios en estado de bloqueo

En estado bloqueado, la radio no puede recibir ninguna llamada. Siga el procedimiento para desbloquear la radio en estado bloqueado.

Lleve a cabo una de las siguientes acciones:

- Si la radio está encendida, espere 15 minutos y, a continuación, repita los pasos de la sección Acceso a las radios mediante el uso de contraseñas en la página 173 para acceder a la radio.
- Si la radio está apagada, enciéndala. La radio reinicia el temporizador de 15 minutos del estado bloqueado. Suena un tono. El indicador LED parpadeará dos veces en amarillo. La pantalla muestra `Radio bloqueada`.

Espere 15 minutos y, a continuación, repita los pasos de la sección Acceso a las radios mediante el uso de contraseñas en la página 173 para acceder a la radio.

7.6.26.4

Cambio de contraseñas

Siga el procedimiento para cambiar las contraseñas de la radio.

1. Pulse OK para acceder al menú.
2. Pulse ▲ o ▼ para ir a `Herramientas`. Pulse OK para seleccionar.
3. Pulse ▲ o ▼ para ir a `Config. radio`. Pulse OK para seleccionar.
4. Pulse ▲ o ▼ para ir a `Bloq. contras.` Pulse OK para seleccionar.

5 Introduzca la contraseña de cuatro dígitos actual y pulse OK para continuar.

Si la contraseña es incorrecta, la pantalla mostrará `Contraseña incorr.` y volverá automáticamente al menú anterior.

6 Pulse ▲ o ▼ para ir a `Camb. contras.` Pulse OK para seleccionar.

7 Introduzca una contraseña de cuatro dígitos nueva y pulse OK para continuar.

8 Vuelva a introducir la nueva contraseña de cuatro dígitos y pulse OK para continuar.

Si el cambio se realiza correctamente, en la pantalla aparecerá el mensaje `Contraseña cambiada`.
Si el cambio no se realiza correctamente, en la pantalla aparecerá el mensaje `Contraseñas no coinciden`.

La pantalla vuelve automáticamente al menú anterior.

7.6.27

Lista de notificaciones

La radio dispone de una lista de notificaciones que incluye todos los eventos sin leer del canal, como por ejemplo, mensajes de texto sin leer, mensajes de telemetría, llamadas perdidas y alertas de llamadas.

La pantalla muestra el icono de **notificación** si la lista de notificaciones tiene uno o más eventos.

La lista admite un máximo de 40 eventos sin leer. Cuando la lista está completa, el siguiente evento reemplaza automáticamente al evento más antiguo. Una vez leídos los eventos, se eliminan de la lista de notificaciones.

Para mensajes de texto, eventos de llamada y alerta de llamada perdida, el número máximo son 30 mensajes de texto y 10 llamadas o alertas de llamadas perdidas. El número máximo depende de la capacidad de la lista de funciones individual (fichas de trabajo, mensajes de texto o llamadas o alertas de llamadas perdidas).

7.6.27.1

Acceso a la lista de notificaciones

Siga el procedimiento para acceder a la lista de notificaciones de la radio.

1 Lleve a cabo una de las siguientes acciones:
   - Pulse el botón **Notificación** programado. Omita los pasos que se indican a continuación.
   - Pulse OK para acceder al menú.

2 Pulse OK para acceder al menú.

3 Pulse ▲ o ▼ para ir a `Notificación`. Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para seleccionar el evento que desee. Pulse OK para seleccionar.

   Pulse de forma prolongada para volver a la pantalla de inicio.

7.6.28

Sistema de repetición de rango automático

El sistema de repetición de rango automático (ARTS) es una función solo analógica diseñada para informarle de que la radio está fuera de cobertura de otras radios equipadas con ARTS.

Las radios equipadas con ARTS transmiten o reciben señales periódicamente para confirmar que se encuentran dentro del alcance de las otras.

La radio proporciona las siguientes indicaciones de estado:

Alerta de primera conexión

Suena un tono.

La pantalla muestra `En alcance` tras el alias de canal.

Alerta dentro de cobertura de ARTS

Suena un tono, si está programado.

La pantalla muestra `En alcance` tras el alias de canal.

Alerta fuera de cobertura de ARTS

Suena un tono. El LED rojo parpadea rápidamente.

En la pantalla se alterna el mensaje `Fuera de alcance` y la pantalla de inicio.

NOTA:
Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información.

7.6.29

Programación a través del interfaz de aire

El distribuidor puede actualizar la radio de forma remota mediante la programación inalámbrica (OTAP) sin ninguna conexión física. Además, algunos ajustes también se pueden configurar con OTAP.

Cuando la radio ejecuta OTAP, el LED verde parpadea.

Cuando la radio recibe datos de gran volumen:

- La pantalla muestra el icono de **datos de gran volumen**.
- El canal está ocupado.
- Suena un tono negativo si se pulsa el **PTT**.

Cuando OTAP finaliza, según la configuración:

- Suena un tono. La pantalla muestra `Actualizando Reiniciando`. La radio se reinicia apagándose y encendiéndose de nuevo.
- Puede seleccionar `Reiniciar ahora` o `Posponer`. Si selecciona `Posponer`, la radio vuelve a la pantalla anterior. La pantalla muestra el icono de **temporizador de retardo OTAP** hasta que se produzca el reinicio automático.

Cuando la radio se enciende tras el reinicio automático:

- Si se realiza correctamente, la pantalla muestra `Actual. soft. completada.`
- Si no se realiza correctamente, la pantalla muestra `Actual. soft. fallida.`

Consulte Verificación de la información sobre actualización de software en la página 208 para la versión actualizada del software.

7.6.30

Bloqueo de transmisión

La función de bloqueo de transmisión permite a los usuarios bloquear todas las transmisiones de la radio.

NOTA:
Las funciones de Bluetooth y Wi-Fi están disponibles en el modo de bloqueo de transmisión.

7.6.30.1

Activación de la inhibición de transmisión

Siga el procedimiento para activar la inhibición de transmisión.

Realice una de las siguientes acciones:

- Pulse ▲ o ▼ para ir a `Inhib. Tx` y pulse OK para seleccionar.
- Pulse el botón programable **Bloq. transmis.**

- Suena un tono indicador positivo.
- La pantalla muestra `Inhibición de Tx activado.`

NOTA:
El estado de la inhibición de transmisión no cambia una vez que la radio se enciende.

7.6.30.2

Desactivación de la inhibición de transmisión

Siga el procedimiento para desactivar la inhibición de transmisión.

Realice una de las siguientes acciones:

- Pulse ▲ o ▼ para ir a `Inhib. Tx` y pulse OK para seleccionar.
- Pulse el botón programable **Bloq. transmis.**

- Suena un tono indicador negativo. La transmisión vuelve a funcionar con normalidad.
- La pantalla muestra `Inhibición de Tx desactivado.`

7.6.31

Funcionamiento de Wi-Fi

Wi-Fi® es una marca comercial registrada de Wi-Fi Alliance®.

NOTA:
Esta función solo se aplica a DP4601e only.

Esta función le permite configurar y conectarse a una red Wi-Fi. Wi-Fi es compatible con las actualizaciones de firmware de la radio, el Codeplug y recursos, como paquetes de idiomas o de anuncio de voz.

7.6.31.1

Activación o desactivación del Wi-Fi

El botón **Activar o desactivar Wi-Fi** programado se lo asigna su distribuidor o administrador del sistema. Consulte con el distribuidor o administrador del sistema cómo se ha programado la radio.

Los anuncios de voz para el botón programado **Activar o desactivar Wi-Fi** se pueden personalizar mediante CPS en función de los requisitos del usuario. Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información.

Realice una de las siguientes acciones para activar o desactivar el Wi-Fi.

- Pulse el botón programado **Activar o desactivar Wi-Fi**. El anuncio de voz emite un sonido de activación o desactivación del Wi-Fi.
- Acceda a esta función en el menú.

a. Pulse OK para acceder al menú.

b. Pulse ▲ o ▼ para acceder a `Wi-Fi` y pulse OK para seleccionar.

c. Pulse ▲ o ▼ para acceder a `Wi-Fi activ.` y pulse OK para seleccionar.

Pulse OK para activar el Wi-Fi. La pantalla muestra ✓ junto a `Activado`.

Pulse OK para apagar el Wi-Fi. Desaparece ✓ junto a `Habilitado`.

7.6.31.2

Conexión a un punto de acceso a la red

Cuando activa el Wi-Fi, la radio busca y se conecta a un punto de acceso a la red.

También puede conectarse a un punto de acceso a la red a través del menú.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para acceder a Wi-Fi y pulse OK para seleccionar.

3 Pulse ▲ o ▼ para acceder a Redes y pulse OK para seleccionar.

4 Pulse ▲ o ▼ para acceder a un punto de acceso a la red y pulse OK para seleccionar.

5 Pulse ▲ o ▼ para Conectar y pulse OK para seleccionar.

Si la conexión se realiza correctamente, la radio muestra un aviso y se guarda el punto de acceso a la red en la lista de perfiles.

7.6.31.3

Comprobación del estado de conexión Wi-Fi

Siga el procedimiento para comprobar el estado de conexión Wi-Fi.

Pulse el botón programado **Consulta del estado de la conexión Wi-Fi** para consultar el estado de conexión mediante el Anuncio de voz. El Anuncio de voz emite un sonido cuando el Wi-Fi está desactivado, si el Wi-Fi está activado pero no está conectado o si el Wi-Fi está activado y conectado.

- La pantalla muestra Wi-Fi desact. cuando el Wi-Fi está desactivado.
- La pantalla muestra Wi-Fi activ., conectado cuando la radio está conectada a la red.
- La pantalla muestra Wi-Fi activ., desconectado cuando el Wi-Fi está activado pero la radio no está conectada a ninguna red.

  Los anuncios de voz para los resultados de la consulta del estado de la conexión Wi-Fi se pueden personalizar mediante CPS en función de los requisitos del usuario. Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información.

NOTA:
El botón **Consulta del estado de la conexión Wi-Fi** programado se lo asigna su distribuidor o administrador del sistema. Consulte con el distribuidor o administrador del sistema cómo se ha programado la radio.

7.6.31.4

Actualización de la lista de redes

Siga el procedimiento para actualizar la lista de redes.

- Realice las siguientes acciones para actualizar la lista de redes con el menú.

  a. Pulse OK para acceder al menú.

  b. Pulse ▲ o ▼ para acceder a `Wi-Fi` y pulse OK para seleccionar.

  c. Pulse ▲ o ▼ para acceder a `Redes` y pulse OK para seleccionar.

  Al acceder al menú Redes, la radio actualiza automáticamente la lista de redes.

- Si ya se encuentra en el menú Redes, lleve a cabo la siguiente acción para actualizar la lista de redes.

  Pulse ▲ o ▼ para `Actualizar` y pulse OK para seleccionar.

  La radio se actualiza y muestra la lista de redes más actualizada.

7.6.31.5

Adición de una red

Si una red preferida no está en la lista de redes disponibles, realice las siguientes acciones para añadir una red.

1. Pulse OK para acceder al menú.
2. Pulse ▲ o ▼ para acceder a `Wi-Fi` y pulse OK para seleccionar.
3. Pulse ▲ o ▼ para acceder a `Redes` y pulse OK para seleccionar.

4 Pulse ▲ o ▼ para Añadir red y pulse OK para seleccionar.

5 Introduzca el identificador de conjuntos de servicios (SSID) y pulse OK .

6 Pulse ▲ o ▼ para Abrir y pulse OK para seleccionar.

7 Ingrese la contraseña y pulse OK .

La radio muestra un miniaviso positivo para indicar que la red se ha guardado correctamente.

7.6.31.6

Visualización de los detalles de los puntos de acceso a la red

Siga el procedimiento para ver los detalles de los puntos de acceso a la red.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para acceder a Wi-Fi y pulse OK para seleccionar.

3 Pulse ▲ o ▼ para acceder a Redes y pulse OK para seleccionar.

4 Pulse ▲ o ▼ para acceder a un punto de acceso a la red y pulse OK para seleccionar.

5 Pulse ▲ o ▼ para acceder a `Ver detalles` y pulse OK para seleccionar.

En los puntos de acceso conectados a la red se muestra el identificador de conjunto de servicios (SSID), el modo de seguridad, la dirección de control de acceso a los medios (MAC) y el protocolo de Internet (IP).

En los puntos de acceso no conectados a la red se muestra solo el identificador de conjunto de servicios (SSID) y el modo de seguridad.

7.6.31.7

Eliminación de los puntos de acceso a la red

Realice las siguientes acciones para eliminar los puntos de acceso a la red de la lista de perfiles.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para acceder a `Wi-Fi` y pulse OK para seleccionar.

3 Pulse ▲ o ▼ para acceder a `Redes` y pulse OK para seleccionar.

4 Pulse ▲ o ▼ para acceder al punto de acceso a la red seleccionada y pulse OK para seleccionar.

5 Pulse ▲ o ▼ para `Eliminar` y pulse OK para seleccionar.

6 Pulse ▲ o ▼ para seleccionar `Sí` y pulse OK para seleccionar.

La radio muestra un miniaviso positivo para indicar que el punto de acceso a la red seleccionada se ha eliminado correctamente.

7.6.32

Programación del panel frontal

Puede personalizar determinados parámetros de función en Programación del panel frontal (FPP) para mejorar el uso de la radio.

Utilice los siguientes botones según sea necesario mientras navega por los parámetros de función.

Botón de navegación arriba/abajo

Pulse para desplazarse por las opciones en posición horizontal o vertical, o para aumentar o reducir los valores.

Botón de Menú/OK

Pulse para seleccione la opción o entrar a un submenú.

Botón para volver e ir al inicio

Pulse brevemente para volver al menú anterior o para salir de la pantalla de selección.

Mantenga pulsado en cualquier momento para volver a la pantalla de inicio.

7.6.32.1

Acceso al modo Programación del panel frontal

Siga el procedimiento para entrar al modo de programación del panel frontal en la radio.

1. Pulse OK para acceder al menú.
2. Pulse ▲ o ▼ para ir a `Herramientas`.Pulse OK para seleccionar.
3. Pulse ▲ o ▼ para ir a `Programar radio`. Pulse OK para seleccionar.

7.6.32.2

Edición de los parámetros del modo FPP

Utilice los siguientes botones según sea necesario mientras navega por los parámetros de función.

- ▲ , ▼ : desplácese por las opciones, aumente o disminuya valores, o navegue verticalmente.

- OK : seleccione la opción o acceda a un submenú.
- : pulse brevemente para volver al menú anterior o para salir de la pantalla de selección. Manténgalo pulsado para volver a la pantalla de inicio.

7.7

Herramientas

En este capítulo se explican cómo se utilizan las herramientas disponibles en la radio.

7.7.1

Bloqueo o desbloqueo del teclado

Siga el procedimiento para bloquear o desbloquear el teclado de la radio.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Herramientas`. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a `Config. radio`. Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a `Bloq. teclado`. Pulse OK para seleccionar.

- Si el teclado está bloqueado, la pantalla muestra `Teclado bloqueado`.
- Si el teclado está desbloqueado, la pantalla muestra `Teclado desbloqueado`.

La radio volverá a la pantalla de inicio.

7.7.2

Activación o desactivación de la transferencia de llamadas automática

Puede habilitar la radio para que transfiera automáticamente llamadas de voz a otra radio.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a Herramientas. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a Config. radio.Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a Reenvío de llamadas. Pulse OK para seleccionar.

5 Lleve a cabo una de las siguientes acciones:

- Pulse ▲ o ▼ para activar el reenvío de llamadas. Si está activado, ✓ aparece junto a Activado.
- Pulse ▲ o ▼ para desactivar el reenvío de llamadas. Si se desactiva, ✓ junto a Activado desaparece.

Identificación del tipo de cable

Realice los siguientes pasos para seleccionar el tipo de cable que utiliza la radio.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a Herramientas. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a Config. radio. Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a Tipo de cable. Pulse OK para seleccionar.

5 Pulse ▲ o ▼ para cambiar la opción seleccionada.

El tipo de cable actual aparece con un símbolo ✓ .

7.7.3

7.7.4

Lista de recepción flexible

La lista de recepción flexible es una función que le permite crear y asignar miembros en la lista del grupo de conversación de recepción. La radio puede admitir un máximo de 16 miembros en la lista. Esta función es compatible en Capacity Plus.

7.7.4.1

Activación o desactivación de la lista de recepción flexible

Siga el procedimiento para activar o desactivar la lista de recepción flexible.

1 Lleve a cabo una de las siguientes acciones:

- Pulse el botón **Lista de recepción flexible** programado. Omita los pasos siguientes.
- Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Lista Flex Rx`. Pulse OK para seleccionar.

3 Lleve a cabo una de las siguientes acciones:

- Pulse ▲ o ▼ para ir a `Activar`. Pulse OK para seleccionar.
  Suena un tono indicador positivo.

  La pantalla muestra un pequeño aviso positivo.
- Pulse ▲ o ▼ para ir a `Desactivar`. Pulse OK para seleccionar.
  Suena un tono indicador negativo.

  La pantalla muestra un aviso pequeño negativo.

7.7.4.2

Adición de nuevas entradas a la lista de recepción flexible

Siga el procedimiento para añadir nuevos miembros a la lista del grupo de conversación de recepción.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a Herramientas. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a Config. radio. Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a Lista Flex Rx. Pulse OK para seleccionar.

5 Pulse ▲ o ▼ para ir a Ver/editar lista. Pulse OK para seleccionar.

6 Pulse ▲ o ▼ para Añadir miembro. Pulse OK para seleccionar.

7 Pulse ▲ o ▼ para ir al ID o alias que desee.

Pulse OK para seleccionar.

La pantalla mostrará un pequeño aviso positivo y, a continuación, ¿Añadir otros?.

8 Lleve a cabo una de las siguientes acciones:

- Pulse ▲ o ▼ para ir a Sí y añadir otra entrada. Pulse OK para seleccionar. Repita paso 7.
- Pulse ▲ o ▼ para ir a No y guardar la lista actual. Pulse OK para seleccionar.

7.7.4.3

Eliminación de entradas de la lista de recepción flexible

Siga el procedimiento para eliminar todos los miembros de la lista del grupo de conversación de recepción de la radio.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a Herramientas. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a `Config. radio`. Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a `Lista Flex Rx`. Pulse OK para seleccionar.

5 Pulse ▲ o ▼ para ir a `Ver/editar lista`. Pulse OK para seleccionar.

6 Pulse ▲ o ▼ para ir al ID o alias que desee.

Pulse OK para seleccionar.

7 Pulse ▲ o ▼ para ir a `Eliminar`. Pulse OK para seleccionar.

8 Lleve a cabo una de las siguientes acciones:

- Pulse ▲ o ▼ para elegir `Sí` y eliminar la entrada. Pulse OK para seleccionar.
  La pantalla muestra un pequeño aviso positivo.
- Pulse ▲ o ▼ para seleccionar `No`. Pulse OK para seleccionar.
  La radio vuelve a la pantalla anterior.

9 Repita de paso 6 a paso 8 para borrar otras entradas.

10 Mantenga pulsado para volver a la pantalla de inicio después de eliminar todos los ID o alias que desee.

7.7.5
Configuración del temporizador del menú

Puede definir el periodo de tiempo que su radio permanecerá en el menú antes de cambiar automáticamente a la pantalla de inicio. Siga el procedimiento para configurar el temporizador del menú.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a Herramientas.Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a Config. radio.Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a Pantalla. Pulse OK para seleccionar.

5 Pulse ▲ o ▼ para ir a Tempor. menú. Pulse OK para seleccionar.

6 Pulse ▲ o ▼ para ir al ajuste que desee. Pulse OK para seleccionar.

7.7.6

Reconocimiento de voz

La función de reconocimiento de voz solo puede activarla su distribuidor o administrador del sistema. Si la función de reconocimiento de voz está activada, la función de anuncio de voz se desactiva automáticamente. Si la función de anuncio de voz está activada, la función de reconocimiento de voz se desactiva automáticamente.

Esta función permite que la radio indique acústicamente lo siguiente:

- Canal actual
- Zona actual
- Función de botón programable activada o desactivada
- Contenido de los mensajes de texto recibidos
- Contenido de las asignaciones de tarea recibidas

Este indicador de audio puede personalizarse según los requisitos del cliente. Esta función es especialmente útil cuando el usuario tiene dificultades para leer el contenido que se muestra en la pantalla.

7.7.6.1

Configurar reconocimiento de voz

Siga el procedimiento para definir la función de reconocimiento de voz.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a Herramientas. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a Config. radio. Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a Anuncio de voz. Pulse OK para seleccionar.

5 Pulse ▲ o ▼ para ir a una de las siguientes funciones: Pulse OK para seleccionar.

Las funciones disponibles son las siguientes:

- Todo
- Mensajes
- Asignaciones de tarea
- Separación
- Zona
- Botón programable

Aparece ✓ junto a la configuración seleccionada.

7.7.7

Activación y desactivación del supresor de respuesta acústica

Esta función le permite minimizar la respuesta acústica de las llamadas recibidas. Siga el procedimiento para activar o desactivar el supresor de respuesta acústica en la radio.

1 Lleve a cabo una de las siguientes acciones:

- Pulse el botón **Supresor de AF** programado. Omita los pasos siguientes.
- Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a Herramientas. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a `Config. radio`. Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a `Supresor de AF`. Pulse OK para seleccionar.

5 Lleve a cabo una de las siguientes acciones:

- Pulse OK para activar el supresor de respuesta acústica.
- Pulse OK para desactivar el supresor de respuesta acústica.

Si está activado, ✓ aparece junto a `Activado`.Si se desactiva, ✓ junto a `Activado` desaparece.

7.7.8

Activación o desactivación del sistema global de navegación por satélite

El sistema global de navegación por satélite (GNSS) es un sistema de navegación vía satélite que determina la ubicación exacta de la radio. GNSS incluye el sistema de posicionamiento global (GPS) y el sistema de navegación por satélite global (GLONASS).

NOTA:
Los modelos de radio seleccionados pueden ofrecer GPS y GLONASS. La constelación de GNSS se configura a través de CPS. Consulte con el distribuidor o administrador del sistema cómo se ha programado la radio.

1 Realice el siguiente paso para activar o desactivar el GNSS en la radio.

- Pulse el botón **GNSS** programado.
- Pulse OK para acceder al menú. Continúe con el paso siguiente.

2 Pulse ▲ o ▼ para ir a Herramientas. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a Config. radio. Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir GNSS. Pulse OK para seleccionar.

5 Pulse OK para habilitar o deshabilitar el GNSS.

Si está activado, ✓ aparece junto a Activado.
Si se desactiva, ✓ junto a Activado desaparece.

7.7.9

Encendido y apagado de la pantalla inicial

Puede habilitar y deshabilitar la pantalla inicial siguiendo el procedimiento.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a Herramientas. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a Config. radio. Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a Pantalla. Pulse OK para seleccionar.

5 Pulse ▲ o ▼ para ir a la pantalla inicial.

Pulse OK para seleccionar.

6 Pulse OK para habilitar o deshabilitar la pantalla de introducción.

La pantalla muestra uno de los siguientes resultados:

- Si está activado, ✓ aparece junto a Activado.

- Si se desactiva, ✓ junto a Activado desaparece.

7.7.10

Encendido y apagado de tonos/ alertas de la radio

Puede habilitar y deshabilitar todos los tonos y todas las alertas de la radio, siempre que lo necesite, excepto el tono de alerta de emergencia entrante. . Siga el procedimiento para activar o desactivar los tonos y las alertas en la radio.

1 Lleve a cabo una de las siguientes acciones:
   - Pulse el botón **Tonos/alertas** programado. Omita los pasos siguientes.
   - Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a Herramientas.Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a Config. radio.Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a Tonos/alertas. Pulse OK para seleccionar.

5 Pulse ▲ o ▼ para ir a Todos los tonos. Pulse OK para seleccionar.

6 Pulse OK para activar o desactivar todos los tonos y alertas. La pantalla muestra uno de los siguientes resultados:
   - Si está activado, ✓ aparece junto a Activado.
   - Si se desactiva, ✓ junto a Activado desaparece.

7.7.11

Configuración de los niveles de diferencia de volumen de tonos y alertas

Esta función ajusta el volumen de los tonos o las alertas, permitiendo que sea más alto o más bajo que el volumen de voz. Siga el procedimiento para definir los niveles de diferencia de volumen tonos y alertas de la radio.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Herramientas`. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a `Config. radio`. Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a `Tonos/alertas`. Pulse OK para seleccionar.

5 Pulse ▲ o ▼ para ir a `Dif. volumen`. Pulse OK para seleccionar.

6 Pulse ▲ o ▼ para ir al nivel de diferencia de volumen que desee.

Con cada nivel de diferencia de volumen correspondiente, suena un tono de confirmación.

7 Lleve a cabo una de las siguientes acciones:

- Pulse OK para seleccionar. Se guarda el nivel de diferencia de volumen necesario.
- Pulse ↩ para salir. Los cambios se descartan.

7.7.12

Activación o desactivación del tono Permiso para hablar

Siga el procedimiento para activar o desactivar el tono Permiso para hablar en la radio.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a Herramientas. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a Config. radio. Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a Tonos/alertas. Pulse OK para seleccionar.

5 Pulse ▲ o ▼ para ir a Permitir hablar. Pulse OK para seleccionar.

6 Pulse OK para activar o desactivar el tono de Permitir hablar.

La pantalla muestra uno de los siguientes resultados:

- Si está activado, ✓ aparece junto a Activado.
- Si se desactiva, ✓ junto a Activado desaparece.

7.7.13

Activación o desactivación del tono de encendido

Siga el procedimiento para activar o desactivar el tono de encendido en la radio.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a Herramientas. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a Config. radio. Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a Tonos/alertas. Pulse OK para seleccionar.

5 Pulse ▲ o ▼ para ir a Encendido. Pulse OK para seleccionar.

6 Pulse OK para activar o desactivar el tono de encendido. La pantalla muestra uno de los siguientes resultados:

- Si está activado, ✓ aparece junto a Activado.
- Si se desactiva, ✓ junto a Activado desaparece.

7.7.14

Configuración de los tonos de alerta de mensaje de texto

Puede personalizar el tono de alerta de mensaje de texto de cada entrada de la lista de contactos. Siga el procedimiento para definir los tonos de alerta de mensaje de texto en la radio.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a Contactos. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir al ID o alias que desee.

Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a Alerta mensaje. Pulse OK para seleccionar.

5 Lleve a cabo una de las siguientes acciones:

- Pulse ▲ o ▼ para ir a Momentáneo. Pulse OK para seleccionar.
  La pantalla muestra ✓ junto a Momentáneo.
- Pulse ▲ o ▼ para ir a Repetitivo. Pulse OK para seleccionar.
  La pantalla muestra ✓ junto a Repetitivo.

7.7.15

Niveles de potencia

Puede personalizar el nivel de potencia de cada canal de la radio en alto o bajo.

Alta
Permite la comunicación con radios situadas a una distancia considerable de usted.

Baja
Permite la comunicación con radios más cercanas.

NOTA:
Esta función no se aplica a canales de Banda Ciudadana que estén en la misma frecuencia.

7.7.15.1

Configuración de los niveles de potencia

Siga el procedimiento para definir los niveles de potencia en la radio.

1 Lleve a cabo una de las siguientes acciones:

- Pulse el botón de **nivel de potencia** programado. Omita los pasos que se indican a continuación.
- Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Herramientas`.Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a `Config. radio`.Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a `Potencia`. Pulse OK para seleccionar.

5 Lleve a cabo una de las siguientes acciones:

- Pulse ▲ o ▼ para ir a `Alta`. Pulse OK para seleccionar.
  La pantalla muestra ✓ junto a `Alta`.

- Pulse ▲ o ▼ para ir a Baja. Pulse OK para seleccionar.
  La pantalla muestra ✓ junto a Baja.

6 Pulse de forma prolongada para volver a la pantalla de inicio.

7.7.16

Ajuste del brillo de la pantalla

Siga el procedimiento para ajustar el brillo de la pantalla de la radio.

1 Lleve a cabo una de las siguientes acciones:
- Pulse el botón **Brillo** programado. Omita los pasos siguientes.
- Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a Herramientas. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a Config. radio. Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a Brillo. Pulse OK para seleccionar.
La pantalla muestra una barra de progreso.

5 Pulse ▲ o ▼ para aumentar o reducir el brillo de la pantalla. Pulse OK para seleccionar.

7.7.17

Configuración del temporizador de la luz de fondo de la pantalla

Puede ajustar el temporizador de la luz de fondo de la pantalla de la radio según sea necesario. La configuración también afecta a los botones de navegación por el menú y a la luz de fondo del teclado, según corresponda. Siga el procedimiento para definir el temporizador de la luz de fondo de la radio.

1 Lleve a cabo una de las siguientes acciones:
   - Pulse el botón **Luz de fondo** programado. Omita los pasos siguientes.
   - Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Herramientas`. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a `Config. radio`. Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a `Pantalla`. Pulse OK para seleccionar.

5 Pulse ▲ o ▼ para ir a `Temporizador de luz de fondo`. Pulse OK para seleccionar.

La luz de fondo de la pantalla y la del teclado se apagan automáticamente si el indicador LED está desactivado.

Consulte Encendido y apagado de los indicadores LED en la página 198 para obtener más información.

7.7.18

Activación o desactivación de la luz de fondo

La luz de fondo de la radio se puede activar o desactivar automáticamente si fuera necesario. Si está activada, la luz de fondo se enciende cuando la radio recibe una llamada, un evento de la lista de notificaciones o una alarma de emergencia.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Herramientas`. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a `Config. radio`. Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a `Luz de fondo auto`.

5 Pulse OK para habilitar o deshabilitar la luz de fondo automática.

La pantalla muestra uno de los siguientes resultados:

- Si está activado, ✓ aparece junto a `Activado`.
- Si se desactiva, ✓ junto a `Activado` desaparece.

7.7.19

Niveles del silenciador

Puede ajustar el nivel del silenciador para eliminar llamadas no deseadas con señales de baja intensidad o canales que tengan un ruido de fondo más alto de lo normal.

Normal
Este es el ajuste predeterminado.

Fuerte
Este ajuste elimina las llamadas no deseadas y el ruido de fondo. Las llamadas desde ubicaciones remotas también pueden eliminarse.

NOTA:
Esta función no se aplica a canales de Banda Ciudadana que estén en la misma frecuencia.

7.7.19.1

Configuración de los niveles del silenciador

Siga el procedimiento para definir los niveles del silenciador en la radio.

1 Lleve a cabo una de las siguientes acciones:
- Pulse el botón **Silenciad.** programado. Omita los pasos siguientes.
- Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Herramientas`.Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a `Config. radio`.Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a Silenciad. Pulse OK para seleccionar.

5 Lleve a cabo una de las siguientes acciones:

- Pulse ▲ o ▼ para ir a Normal. Pulse OK para seleccionar.
  La pantalla muestra ✓ junto a Normal.
- Pulse ▲ o ▼ para ir a Señal fuerte. Pulse OK para seleccionar.
  La pantalla muestra ✓ junto a Señal fuerte.

La pantalla vuelve automáticamente al menú anterior.

7.7.20

Encendido y apagado de los indicadores LED

Siga el procedimiento para activar o desactivar los indicadores LED en la radio.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a Herramientas. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a Config. radio. Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a Indicador LED. Pulse OK para seleccionar.

5 Pulse OK para habilitar o deshabilitar el indicador LED.

La pantalla muestra uno de los siguientes resultados:

- Si está activado, ✓ aparece junto a Activado.
- Si se desactiva, ✓ junto a Activado desaparece.

7.7.21

Configuración de idiomas

Siga el procedimiento para definir los idiomas en la radio.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Herramientas`. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a `Config. radio`.Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a `Idiomas`. Pulse OK para seleccionar.

5 Pulse ▲ o ▼ para ir al idioma que desee. Pulse OK para seleccionar.

La pantalla muestra ✓ junto al idioma seleccionado.

7.7.22

Transmisión activada por voz

La función de transmisión activada por voz (VOX) permite iniciar una llamada de manos libres en un canal programado. La radio transmite automáticamente, durante un periodo de tiempo programado, cuando el micrófono del accesorio VOX detecta la voz.

NOTA:
Esta función no se aplica a canales de Banda Ciudadana que estén en la misma frecuencia.

Para activar o desactivar la función VOX, elija una de las opciones siguientes:

- Apagar la radio y encenderla de nuevo para activar la función VOX.
- Cambiar el canal mediante el botón **selector de canales** para activar la función VOX.
- Activar o desactivar la función VOX a través del botón programado **VOX** o el menú para activar o desactivar la función VOX.
- Pulsar el botón **PTT** mientras la radio está en funcionamiento para desactivar la función VOX.

NOTA:
La activación y desactivación de esta función está limitada a las radios que tengan esta función activada. Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información.

7.7.22.1

Activación o desactivación de la transmisión activada por voz

Siga el procedimiento para activar o desactivar el VOX en la radio.

1 Lleve a cabo una de las siguientes acciones:
   - Pulse el botón **VOX** programado. Omita los pasos que se indican a continuación.
   - Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Herramientas`.Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a `Config. radio`.Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a `VOX`. Pulse OK para seleccionar.

5 Lleve a cabo una de las siguientes acciones:
   - Pulse ▲ o ▼ para ir a `Encendido`. Pulse OK para seleccionar. La pantalla muestra ✓ junto a `Enc.`
   - Pulse ▲ o ▼ para ir a `Apagado`. Pulse OK para seleccionar. La pantalla muestra ✓ junto a `Apagado`.

NOTA:
Si el tono de Permitir hablar está activado, utilice una palabra de activación que inicie la llamada. Espere hasta que acabe el tono de Permitir hablar antes de empezar a hablar con claridad al micrófono. Consulte Activación o desactivación del tono Permiso para hablar en la página 192 para obtener más información.

7.7.23

Activación o desactivación de la tarjeta opcional

Se pueden asignar capacidades para tarjetas opcionales dentro de cada canal a botones programables. Siga el procedimiento para activar o desactivar la tarjeta opcional en la radio.

Pulse el botón programable **Tarjeta opcional**.

7.7.24

Activación o desactivación del indicador de voz

Esta función permite a la radio indicar de forma sonora o mediante la pulsación de botón programable la zona o el canal que el usuario acaba de presionar.
Esto es especialmente útil cuando el usuario tiene dificultades para leer el contenido que se muestra en la pantalla.

Este indicador de audio puede personalizarse según los requisitos del cliente. Siga el procedimiento para activar o desactivar el indicador de voz.

1 Lleve a cabo una de las siguientes acciones:
   - Pulse el botón **Indicador de voz** programado. Omita los pasos siguientes.
   - Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Herramientas`.Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a `Config. radio`.Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a `Indicador de voz`. Pulse OK para seleccionar.

5 Pulse OK para activar o desactivar Indicador de voz.

- Si está activado, ✓ aparece junto a `Activado`.
- Si se desactiva, ✓ junto a `Activado` desaparece.

7.7.25

Activación o desactivación del AGC del micrófono digital

El control automático de ganancia (AGC) del micrófono digital controla automáticamente la ganancia del micrófono de la radio durante la transmisión en un sistema digital. Esta función elimina el audio alto o mejora el audio claro para un valor predeterminado con el fin de ofrecer un nivel de audio constante. Siga el procedimiento para activar o desactivar el AGC del micrófono digital en la radio.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Herramientas`. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a `Config. radio`. Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a `AGC mic digital`. Pulse OK para seleccionar.

5 Pulse OK para activar o desactivar el AGC del micrófono digital.

La pantalla muestra uno de los siguientes resultados:

- Si está activado, ✓ aparece junto a `Activado`.

- Si se desactiva, ✓ junto a Activado desaparece.

7.7.26

Activación o desactivación del AGC del micrófono analógico

El control automático de ganancia (AGC) del micrófono analógico controla automáticamente la ganancia del micrófono de la radio durante la transmisión en un sistema analógico.
Esta función elimina el audio alto o mejora el audio claro para un valor predeterminado con el fin de ofrecer un nivel de audio constante. Siga el procedimiento para activar o desactivar el AGC del micrófono analógico en la radio.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a Herramientas. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a Config. radio. Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a AGC mic analógico.

Pulse OK para seleccionar.

5 Pulse OK para activar o desactivar el AGC del micrófono analógico.

La pantalla muestra uno de los siguientes resultados:

- Si está activado, ✓ aparece junto a Activado.
- Si se desactiva, ✓ junto a Activado desaparece.

7.7.27

Cambio de la salida de audio entre el altavoz interno de la radio y un accesorio con cables

Siga el procedimiento para alternar la salida de audio entre el altavoz interno de la radio y el accesorio con cables.

Puede alternar la salida de audio entre el altavoz interno de la radio y el altavoz de un accesorio con cables siempre que:

- El accesorio con cables con altavoz esté conectado.
- El audio no se dirija a un accesorio externo con Bluetooth.

Pulse el botón programable **Conmutación de audio**.

Suena un tono cuando la ruta de audio ha cambiado.

Si se apaga la radio o se quita el accesorio, se restablece la salida de audio en el altavoz interno de la radio.

7.7.28

Activación o desactivación del audio inteligente

La radio ajusta automáticamente el volumen de audio para superar el ruido de fondo actual del entorno, incluidas las fuentes de ruido estacionarias y no estacionarias. Esta función es de solo recepción y no afecta a la transmisión de audio. Siga el procedimiento para activar o desactivar el audio inteligente en la radio.

NOTA:
Esta función no está disponible durante una sesión Bluetooth.

1 Lleve a cabo una de las siguientes acciones:
   - Pulse el botón programado **Audio inteligente**. Omita los pasos que se indican a continuación.
   - Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Herramientas`. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a `Config. radio`. Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a `Audio inteligente`. Pulse OK para seleccionar.

5 Lleve a cabo una de las siguientes acciones:

- Pulse ▲ o ▼ para ir a `Encendido`. Pulse OK para seleccionar. La pantalla muestra ✓ junto a `Enc.`
- Pulse ▲ o ▼ para ir a `Apagado`. Pulse OK para seleccionar. La pantalla muestra ✓ junto a `Apagado`.

7.7.29

Activación o desactivación de la mejora de la vibración del habla

Puede activar esta función cuando esté hablando en un idioma que contenga muchas palabras con pronunciación alveolar (R vibrante). Siga el procedimiento para activar o desactivar la mejora de la vibración del habla en la radio.

1 Lleve a cabo una de las siguientes acciones:

- Pulse el botón **Mejora de la vibración del habla** programado. Omita los pasos que se indican a continuación.
- Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Herramientas`.Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a `Config. radio`.Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a `Mejora de trino`. Pulse OK para seleccionar.

5 Lleve a cabo una de las siguientes acciones:

- Pulse ▲ o ▼ para ir a Encendido. Pulse OK para seleccionar. La pantalla muestra ✓ junto a Enc.
- Pulse ▲ o ▼ para ir a Apagado. Pulse OK para seleccionar. La pantalla muestra ✓ junto a Apagado.

7.7.30

Activación y desactivación del control de distorsión dinámica del micrófono

Esta función permite que la radio supervise automáticamente la entrada del micrófono y ajuste la ganancia del micrófono para evitar la saturación del audio.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a Herramientas. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a Config. radio. Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a Distorsión del micrófono. Pulse OK para seleccionar.

5 Lleve a cabo una de las siguientes acciones:

- Pulse OK para habilitar el control de distorsión dinámica del micrófono. Si está activado, ✓ aparece junto a Activado.
- Pulse OK para deshabilitar el control de distorsión dinámica del micrófono. Si se desactiva, ✓ junto a Activado desaparece.

7.7.31

Configuración del entorno de audio

Siga el procedimiento para definir el entorno de audio en la radio según el ambiente.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a Herramientas. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a Config. radio. Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a Entorno audio. Pulse OK para seleccionar.

5 Pulse ▲ o ▼ para ir al ajuste que desee. Pulse OK para seleccionar.

La configuración es la siguiente:

- Elija Predeterminado para restablecer la configuración predeterminada de fábrica.
- Elija Alto para aumentar el nivel de sonoridad del altavoz cuando se utiliza en entornos ruidosos.
- Elija Grupo de Trabajo para reducir la respuesta acústica cuando se utiliza con un grupo de radios que están cerca las unas de las otras.

La pantalla muestra ✓ junto al ajuste seleccionado.

7.7.32
Configuración de perfiles de audio

Siga el procedimiento para definir los perfiles de audio en la radio.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a Herramientas. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a Config. radio. Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a `Perfiles de audio`.

Pulse OK para seleccionar.

5 Pulse ▲ o ▼ para ir al ajuste que desee. Pulse OK para seleccionar.

La configuración es la siguiente:

- Elija `Predeterminado` para desactivar el perfil de audio seleccionado anteriormente y volver a la configuración predeterminada de fábrica.
- Elija `Nivel 1`, `Nivel 2` o `Nivel 3` para perfiles de audio destinados a compensar pérdida auditiva provocada por el ruido, algo típico en adultos mayores de 40 años.
- Elija `Aumento de agudos`, `Aumento de medios` o `Aumento de graves` para perfiles de audio que se ajustan a su preferencia de sonidos más metálicos, más nasales o más profundos.

La pantalla muestra ✓ junto al ajuste seleccionado.

7.7.33

Información general de la radio

La radio contiene información sobre varios parámetros generales.

La información general de la radio es la siguiente:

- Información sobre las baterías.
- Alias e ID de radio.
- Versiones de firmware y codeplug.
- Actualización del software.
- Información de GNSS.
- Información del sitio.
- Indicador de intensidad de la señal recibida.

NOTA:

Pulse para volver a la pantalla anterior. Pulse de forma prolongada para volver a la pantalla de inicio. La radio sale de la pantalla actual cuando el temporizador de inactividad se agota.

7.7.33.1

Acceso a la información de la batería

Se muestra la información de la batería de la radio.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Herramientas`. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para acceder a `Info. del radio`Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a `Información de la batería`.Pulse OK para seleccionar. En la pantalla aparece la información de la batería.

NOTA:
Solo para baterías **IMPRES**: Si la batería necesita reacondicionamiento en un cargador IMPRES, en la pantalla se mostrará el mensaje `Reacondic. batería`. Una vez finalizado el proceso de reacondicionamiento, en la pantalla aparece la información de la batería.

7.7.33.2

Verificación de alias e ID de radio

Siga el procedimiento para comprobar el ID y alias de la radio.

1 Lleve a cabo una de las siguientes acciones:

- Pulse el botón programado **Alias e ID de radio**. Omita los pasos siguientes.
  Suena un tono indicador positivo.

  También puede pulsar el botón programado **Alias e ID de radio** para volver a la pantalla anterior.

- Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a Herramientas. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a Info. radio. Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a Mi ID. Pulse OK para seleccionar.

La primera línea de texto muestra el alias de radio. La segunda línea de texto muestra el ID de radio.

7.7.33.3

Verificación de las versiones de firmware y de Codeplug

Siga el procedimiento para comprobar las versiones de firmware y de Codeplug de la radio.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a Herramientas. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a Info. radio. Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a Versiones. Pulse OK para seleccionar.

La pantalla muestra las versiones de firmware y de Codeplug actuales.

7.7.33.4

Verificación de la información de GNSS

Muestra la información de GNSS de la radio, como los valores de:

- Latitud
- Longitud
- Altitud
- Dirección

- Velocidad
- Dilución de precisión horizontal (HDOP)
- Satélites
- Versión

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Herramientas`. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a `Info. del radio`. Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a `Información de GNSS`. Pulse OK para seleccionar.

5 Pulse ▲ o ▼ para ir al elemento deseado. Pulse OK para seleccionar. La pantalla muestra la información de GNSS solicitada.

7.7.33.5

Verificación de la información sobre actualización de software

Esta función muestra la fecha y la hora de la última actualización de software llevada a cabo mediante OTAP o Wi-Fi. Siga el procedimiento para comprobar la información sobre actualización de software de la radio.

1 Pulse OK para acceder al menú.

2 Pulse ▲ o ▼ para ir a `Herramientas`. Pulse OK para seleccionar.

3 Pulse ▲ o ▼ para ir a `Info. radio`. Pulse OK para seleccionar.

4 Pulse ▲ o ▼ para ir a `Actualiz. SW`. Pulse OK para seleccionar.

La pantalla muestra la fecha y la hora de la última actualización de software.

El menú de actualización del software solo está disponible después de que se haya producido al menos una sesión de OTAP o Wi-Fi correcta. Consulte Programación a través del interfaz de aire en la página 457 para obtener más información.

7.7.33.6

Mostrar la información del sitio

Siga el procedimiento para mostrar el nombre del sitio en el que está encendida la radio.

1. Pulse OK para acceder al menú.
2. Pulse ▲ o ▼ para ir a `Herramientas`. Pulse OK para seleccionar.
3. Pulse ▲ o ▼ para ir a `Info. radio`. Pulse OK para seleccionar.
4. Pulse ▲ o ▼ para ir a `Info. sitio`. Pulse OK para seleccionar.

La pantalla muestra el nombre de sitio actual.

7.7.33.7

Indicador de intensidad de la señal recibida

Esta función permite ver los valores del indicador de intensidad de la señal recibida (RSSI).

La pantalla muestra el icono de **RSSI** en la esquina superior derecha. Consulte Iconos de pantalla para obtener más información sobre el icono de **RSSI**.

7.7.33.7.1

Visualización de valores de RSSI

Siga el procedimiento para ver los valores de RSSI en la radio.

Cuando se encuentre en la pantalla de inicio:

1 Pulse ◀ tres veces y pulse inmediatamente ▶, todo ello en cinco segundos.

La pantalla muestra los valores de RSSI actuales.

2 Pulse de forma prolongada para volver a la pantalla de inicio.

Esta página se ha dejado en blanco intencionadamente.

Garantía de las baterías y de los cargadores

Garantía de fabricación

La garantía de fabricación ofrece una garantía contra los defectos de fabricación bajo condiciones normales de uso y servicio.

Todas las baterías MOTOTRBO	24 meses
Cargadores IMPRES (de una unidad y múltiples, sin pantalla)	24 meses
Cargadores IMPRES (múltiples con pantalla)	12 meses
Baterías de níquel-metal (NiMH) o de iones de litio (Li-Ion)	12 meses
Baterías IMPRES, cuando se utilizan exclusivamente con cargadores IMPRES	18 meses

Garantía de capacidad

La garantía de capacidad garantiza el 80 % de la capacidad nominal de la duración de la garantía.

Esta página se ha dejado en blanco intencionadamente.

Garantía limitada

PRODUCTOS DE COMUNICACIÓN DE MOTOROLA SOLUTIONS

I. COBERTURAS Y DURACIÓN DE LA GARANTÍA:

Motorola Solutions Inc. (en adelante, “Motorola Solutions”) garantiza los productos de comunicación fabricados por Motorola Solutions que se indican a continuación (en adelante, el “Producto”) contra defectos de materiales y de fabricación con un uso y servicio normales durante un período a contar a partir de la fecha de compra de acuerdo con las especificaciones siguientes:

Serie DP Radios Digitales Portátiles	24 meses
Accesorios del producto (sin incluir baterías y cargadores)	12 meses

Según lo considere oportuno y sin coste adicional, Motorola Solutions reparará el Producto (con piezas nuevas o reacondicionadas), lo sustituirá (por un Producto nuevo o reacondicionado), o bien reembolsará el precio de compra del mismo durante el periodo de garantía siempre que el producto se devuelva de acuerdo con los términos de esta garantía. Las piezas o tarjetas sustituidas quedan garantizadas durante el periodo restante de garantía original pertinente. Todas las piezas sustituidas del Producto pasarán a ser propiedad de Motorola Solutions.

Motorola Solutions otorga la presente garantía limitada única y expresamente al comprador final y, por lo tanto, no se puede asignar o transferir a ninguna otra parte. Esta es la garantía completa del Producto fabricado por Motorola Solutions. Motorola Solutions no asume ninguna obligación o responsabilidad por las adiciones o modificaciones a la presente garantía a menos que una persona responsable de Motorola Solutions así lo establezca en un documento por escrito y debidamente firmado.

Salvo acuerdo por separado entre Motorola Solutions y el comprador final, Motorola Solutions no garantiza la instalación, el mantenimiento ni el servicio del Producto.

Motorola Solutions no puede responsabilizarse en ningún caso de los equipos auxiliares que no hayan sido suministrados por Motorola Solutions, que estén

conectados o se utilicen en conexión con el Producto, ni del funcionamiento del Producto con cualquier equipo auxiliar y, en consecuencia, se excluyen expresamente de la presente garantía todos los equipos mencionados. Puesto que todos los sistemas que pueden utilizar el Producto son exclusivos, Motorola Solutions renuncia a cualquier responsabilidad relativa al alcance, la cobertura o el funcionamiento del sistema en su conjunto en el marco de la presente garantía.

II. DISPOSICIONES GENERALES

Esta garantía establece el alcance total de la responsabilidad de Motorola Solutions con respecto al Producto. La reparación, la sustitución o el reembolso del precio de compra, a discreción de Motorola Solutions, constituyen las únicas soluciones. LA PRESENTE GARANTÍA PREVALECE DE FORMA EXCLUSIVA SOBRE TODAS LAS DEMÁS GARANTÍAS EXPRESAS. LAS GARANTÍAS IMPLÍCITAS, INCLUIDAS, SIN LIMITACIÓN ALGUNA, LAS GARANTÍAS IMPLÍCITAS DE COMERCIABILIDAD Y ADECUACIÓN PARA CUALQUIER PROPÓSITO EN PARTICULAR SE LIMITAN A LA DURACIÓN DE LA PRESENTE GARANTÍA LIMITADA. EN NINGÚN CASO, MOTOROLA SOLUTIONS SERÁ RESPONSABLE POR DAÑOS QUE EXCEDAN EL IMPORTE DE COMPRA DEL PRODUCTO, PÉRDIDA DE USO, PÉRDIDA DE TIEMPO, MOLESTIAS, PÉRDIDA COMERCIAL, PÉRDIDA DE BENEFICIOS O AHORROS, O CUALQUIER OTRO DAÑO INCIDENTAL, ESPECIAL O CONSECUENTE DERIVADO DEL USO O LA INCAPACIDAD DE UTILIZAR DICHO PRODUCTO, EN LA MEDIDA EN QUE LA LEY PERMITA EXONERAR DICHA RESPONSABILIDAD.

III. DERECHOS DE LEYES ESTATALES:

DETERMINADOS ESTADOS NO PERMITEN LA EXCLUSIÓN O LA LIMITACIÓN POR DAÑOS INCIDENTALES O CONSECUENTES, O LA LIMITACIÓN SOBRE LA DURACIÓN DE UNA GARANTÍA IMPLÍCITA Y, EN CONSECUENCIA, ES POSIBLE QUE NO SE APLIQUEN LA LIMITACIÓN O LAS EXCLUSIONES DESCRITAS ANTERIORMENTE.

La presente garantía proporciona derechos legales específicos y, asimismo, existen otros derechos que pueden variar según el estado.

IV. OBTENCIÓN DEL SERVICIO DE GARANTÍA

Para recibir el servicio de garantía, debe presentar una prueba de compra (que incluya la fecha de compra y el número de serie del componente del Producto), así como remitir o enviar el componente del Producto, el transporte y el seguro prepagado a un centro de servicio de garantía autorizado. Motorola Solutions proporcionará el servicio de garantía mediante uno de sus servicios de garantía autorizados. Para obtener su servicio de garantía, primero puede ponerse en contacto con la empresa a la que adquirió el Producto (por ejemplo, el distribuidor o el proveedor de servicios de comunicación). También puede llamar a Motorola Solutions al 1-800-927-2744 EE. UU./ Canadá.

V. ELEMENTOS NO CUBIERTOS POR LA GARANTÍA

1 Defectos o daños resultantes de la utilización del Producto de forma distinta a su uso normal y habitual.

2 Defectos o daños producidos por un uso incorrecto, accidente, agua o negligencia.

3 Defectos o daños producidos por una prueba, funcionamiento, mantenimiento, instalación, alteración, modificación o ajuste inadecuados.

4 Rotura o daños a las antenas a menos que hayan sido producidos directamente por defectos en el material o mano de obra.

5 Un Producto sujeto a modificaciones, operaciones de desmontaje o reparaciones (incluidas, sin limitaciones, la adición al Producto de equipos no suministrados por Motorola Solutions) que puedan afectar negativamente al rendimiento del Producto o interferir con la inspección y pruebas habituales de la garantía que realiza Motorola Solutions para verificar todas las reclamaciones de garantía.

6 Los productos en los que se haya eliminado el número de serie o este no sea legible.

7 Baterías recargables si:

- alguno de los sellos de la carcasa de la batería está roto o muestra signos de manipulación.
- el daño o defecto está producido por la carga o utilización de la batería en un equipo o servicio distinto al del Producto para el que se ha especificado.

8 Costes de transporte al departamento de reparaciones.

9 Los productos que, debido a una alteración ilegal o no autorizada del software/firmware del Producto, no funcionen de acuerdo con las especificaciones publicadas por Motorola Solutions o al etiquetado de certificado FCC vigente para el Producto en el momento en que Motorola Solutions realizó la distribución inicial del mismo.

10 Los arañazos u otros daños cosméticos en la superficie del producto que no afecten al funcionamiento del mismo.

11 El desgaste normal derivado del uso.

VI. DISPOSICIONES DE PATENTES Y SOFTWARE

Motorola Solutions defenderá, por cuenta propia, cualquier disputa legal en contra del comprador final en la medida en que se fundamente en la reclamación de que el Producto o sus piezas infringen una patente estadounidense; además, Motorola Solutions compensará los costes y daños finalmente imputados al comprador final en el marco de cualquier disputa legal que se pueda atribuir a cualquiera de esas reclamaciones. No obstante, la defensa y los pagos están condicionados a los casos siguientes:

1 El comprador notificará de inmediato a Motorola Solutions de cualquier aviso relacionado con dicha demanda;

2 Motorola Solutions tendrá el control único de la defensa de dicho juicio y todas las negociaciones para su resolución o compromiso; y

3 En caso de que el producto o sus piezas se conviertan, o según Motorola Solutions, puedan convertirse en objeto de alegación de incumplimiento de una patente estadounidense, el comprador permitirá a Motorola Solutions, a su discreción y por cuenta propia, lograr que el comprador ostente el derecho de seguir utilizando el producto o las piezas para su sustitución o modificación de modo que se convierta en no ilegítima, u otorgar al comprador un crédito por el producto o sus piezas en concepto de depreciación y aceptar su restitución. La depreciación corresponderá a una cantidad anual invariable durante la vida útil del Producto o sus piezas, según establezca Motorola Solutions.

Motorola Solutions no será responsable de reclamaciones por el incumplimiento de patentes derivado de la combinación del Producto o piezas suministrados de acuerdo con la presente licencia con software, aparatos o dispositivos que no haya suministrado Motorola Solutions.

Motorola Solutions tampoco acepta ninguna responsabilidad por el uso de equipos auxiliares o software que no haya sido suministrado por Motorola Solutions y que esté conectado o se utilice en conexión con el Producto. Las disposiciones anteriores establecen la plena responsabilidad de Motorola Solutions en relación con el incumplimiento de patentes por el Producto o cualquiera de sus partes.

Las leyes de los Estados Unidos y otros países conceden a Motorola Solutions determinados derechos exclusivos del software con copyright de Motorola Solutions, como los derechos exclusivos para reproducir y distribuir copias de dicho software de Motorola Solutions. El software de Motorola Solutions se puede utilizar exclusivamente en el Producto en el que el software se incluyó originalmente y, por lo tanto, se prohíbe la sustitución, la copia, la distribución y la modificación de cualquier forma de dicho software en ese Producto, así como el uso destinado a producir cualquier Producto derivado. Asimismo, se prohíbe cualquier otro uso, incluidos, sin limitación alguna, la alteración, la modificación, la reproducción, la distribución o la ingeniería inversa del software de Motorola Solutions o el ejercicio de derechos en el software de Motorola Solutions. No se concede ninguna licencia implícitamente, ni por impedimento legal ni de cualquier otra forma, por los derechos de patente o copyright de Motorola Solutions.

VII. LEGISLACIÓN APLICABLE

La presente garantía se rige por las leyes del Estado de Illinois (EE. UU).

Informations de sécurité importantes

Sécurité des produits et exposition aux fréquences radio pour les radios professionnelles portatives

ATTENTION !

Cette radio est réservée à un usage professionnel exclusivement. Avant d'utiliser la radio, lisez le guide Sécurité des produits et exposition aux fréquences radio pour les radios professionnelles portatives. Il contient d'importantes instructions de fonctionnement relatives à la sécurité et à l'exposition aux fréquences radio, ainsi que des informations sur le contrôle de conformité aux normes et réglementations applicables.

Pour consulter la liste des antennes, batteries et autres accessoires agréés par Motorola Solutions, visitez le site Web :

http://www.motorolasolutions.com

Cette page a été laissée vide de manière intentionnelle.

Version logicielle

Toutes les fonctions décrites dans les sections suivantes sont prises en charge par les versions **R02.08.05.0000** ou ultérieures du logiciel.

Consultez la section Vérification des versions de micrologiciel (firmware) et de codeplug à la page 213 pour identifier la version logicielle de votre radio.

Consultez votre fournisseur ou administrateur système pour en savoir plus.

Cette page a été laissée vide de manière intentionnelle.

MOTOROLA, MOTO, MOTOROLA SOLUTIONS et le logo stylisé M sont des marques commerciales ou des marques déposées de Motorola Trademark Holdings, LLC et font l'objet d'une licence. Toutes les autres marques appartiennent à leurs propriétaires respectifs.

Directive relative aux déchets d'équipements électriques et électroniques (DEEE) pour l'Union européenne

La directive DEEE de l'Union européenne stipule que les produits vendus au sein de l'UE doivent présenter le symbole d'une poubelle barrée sur l'étiquette du produit (ou sur l'emballage dans certains cas).

Comme indiqué par la directive DEEE, l'étiquette de la poubelle barrée signifie que les clients et les utilisateurs finaux dans les pays de l'UE ne doivent pas mettre au rebut les équipements et les accessoires électriques et électroniques avec les déchets ménagers.

Les clients ou les utilisateurs finaux des pays de l'UE doivent prendre contact avec le représentant local du fournisseur de leur équipement ou le centre de service pour obtenir des informations sur le système de collecte des déchets dans leur pays.

Copyrights relatifs aux logiciels informatiques

Les produits Motorola Solutions décrits dans ce manuel peuvent inclure des programmes informatiques protégés par copyright de Motorola Solutions et stockés dans des mémoires à semi-conducteurs ou sur tout autre support. La législation des États-Unis, ainsi que celle d'autres pays, réserve à Motorola Solutions certains droits de copyright exclusifs concernant les programmes ainsi protégés, incluant sans limitations, le droit exclusif de copier ou de reproduire, sous quelque forme que ce soit, lesdits programmes. En conséquence, il est interdit de copier, reproduire, modifier, faire de l'ingénierie inverse ou distribuer, de quelque manière que ce soit, les programmes informatiques de Motorola Solutions protégés par copyright contenus dans les produits Motorola Solutions décrits dans ce manuel sans l'autorisation expresse et écrite de Motorola Solutions. En outre, l'acquisition de ces produits Motorola Solutions ne saurait en aucun cas conférer, directement, indirectement ou de toute autre manière, aucune licence, aucun droit d'auteur, brevet ou demande de brevet appartenant à Motorola Solutions, autres que la licence habituelle d'utilisation non exclusive qui découle légalement de la vente du produit.

La technologie de codage vocal AMBE+2™ intégrée à ce produit est protégée par des droits sur la propriété intellectuelle, incluant les droits de brevet, d'auteur et les secrets commerciaux de Digital Voice Systems, Inc.

La licence d'utilisation de cette technologie de codage vocal est uniquement accordée dans les limites d'utilisation de ce dispositif de communication. Il est explicitement interdit à l'utilisateur de cette technologie de tenter de décompiler, de désassembler ou d'appliquer toute technique d'ingénierie inverse ou toute autre méthode pour convertir le code objet en un format lisible.

Précautions d'utilisation

Les radios portatives numériques MOTOTRBO sont conformes aux spécifications IP67 et peuvent donc résister à des conditions d'utilisation exigeantes, incluant l'immersion dans l'eau. Cette section décrit quelques précautions de manipulation de base.

ATTENTION:
Ne tentez jamais de démonter la radio. Toute tentative d'ouverture de la radio peut endommager les joints et compromettre son étanchéité. Toute opération de maintenance doit uniquement être réalisée dans un centre technique qualifié et équipé pour tester et remplacer les joints d'étanchéité de la radio.

- Si la radio a été immergée dans de l'eau, secouez-la suffisamment pour éliminer l'eau piégée dans la grille du haut-parleur et le port du microphone. L'eau piégée peut perturber les performances audio.
- Si des bornes de contact ont été mouillées, elles doivent être nettoyées et séchées sur la radio et sur la batterie avant de remettre une batterie dans la radio. Toute trace d'eau pourrait court-circuiter la radio.
- Si la radio est tombée dans une substance corrosive (par exemple, de l'eau de mer), rincez la radio et la batterie avec de l'eau douce, puis séchez-les.
- Pour nettoyer les surfaces extérieures de la radio, utilisez une solution d'eau douce et de nettoyant vaisselle (par exemple, une cuillère à café de détergent pour 4 litres d'eau).
- N'introduisez jamais rien dans l'orifice situé sous le contact de la batterie sur le châssis de la radio. Il sert à équilibrer la pression atmosphérique dans la radio. En introduisant quelque chose dans cet orifice, vous pourriez créer une fuite qui compromettrait l'étanchéité de la radio.
- Cet orifice ne doit jamais être obstrué ni couvert, même avec une étiquette.
- Il ne doit jamais être mis en contact avec une substance grasse.
- La radio avec une antenne correctement installée est conçue pour résister à une immersion dans l'eau à 1 m de profondeur pendant 30 minutes. Tout dépassement d'une de ces deux limites ou l'absence d'antenne peut sérieusement endommager la radio.
- N'utilisez jamais de l'eau sous pression pour nettoyer une radio. Cette pression sera supérieure à celle d'une

immersion à 1 m de profondeur et peut provoquer l'infiltration d'eau dans la radio.

Introduction

Ce guide de l'utilisateur explique le fonctionnement de vos radios.

Votre revendeur ou administrateur système peut avoir adapté votre radio à vos besoins spécifiques. Consultez votre fournisseur ou administrateur système pour en savoir plus.

Vous pouvez consulter votre fournisseur ou votre administrateur système pour obtenir les réponses aux questions suivantes :

- Votre radio est-elle programmée pour utiliser des canaux conventionnels prédéfinis ?
- Quels boutons ont été programmés pour accéder à d'autres fonctions ?
- Quels accessoires optionnels peuvent répondre à vos besoins ?
- Quelles sont les meilleures pratiques pour utiliser la radio et bénéficier de communications efficaces ?
- Quelles sont les procédures de maintenance qui peuvent contribuer à prolonger la durée de vie de la radio ?

1.1

Informations relatives aux icônes

Dans ce document, les icônes décrites différencient les fonctions disponibles en mode analogique ou numérique conventionnel.

Identifie une fonction uniquement disponible en **mode analogique** conventionnel.

Identifie une fonction uniquement disponible en **mode numérique** conventionnel.

Lorsqu'une fonction est disponible dans les **deux** modes (analogique conventionnel et numérique conventionnel), **aucune** icône n'est affichée.

1.2

Modes conventionnels Numérique et Analogique

Chaque canal de votre radio peut être configuré comme canal analogique conventionnel ou canal numérique conventionnel.

Certaines fonctionnalités ne sont plus disponibles lorsque vous passez du mode numérique au mode analogique. Les icônes des fonctions numériques sont grisées pour refléter ces changements. Les fonctions désactivées ne sont plus affichées dans le menu.

Votre radio offre des fonctions disponibles aussi bien en mode analogique qu'en mode numérique. Les petites différences de fonctionnement entre ces deux modes n'ont **aucune** incidence sur les performances de votre radio.

REMARQUE:
Votre radio bascule entre les modes numérique et analogique pendant un balayage en mode double. Reportez-vous à la section Balayage à la page 404 pour plus d'informations.

1.3

IP Site Connect

Grâce à cette fonction, votre radio peut étendre ses communications conventionnelles au-delà de la couverture assurée par un seul site en lui permettant de se connecter à différents sites disponibles au moyen d'un réseau IP (Internet Protocol). Il s'agit du mode multisite conventionnel.

Lorsque la radio passe de la zone de couverture d'un site à celle d'un autre site, elle se connecte au relais du nouveau site pour envoyer et recevoir des appels ou des données. Cette opération peut s'effectuer automatiquement ou manuellement en fonction de vos paramètres.

Lorsque la recherche de site est configurée en mode automatique, la radio recherche tous les sites disponibles dès que le signal qu'elle reçoit est faible ou lorsqu'elle ne peut plus détecter le signal émis par le site actuel. La radio se connecte alors sur le relais qui fournit la meilleure valeur RSSI (Indicateur de niveau de signal reçu).

Si cette fonction est configurée en mode Manuel, la radio cherche à se connecter au prochain site figurant dans la liste d'itinérance et qui est à sa portée (mais dont le signal n'aura pas nécessairement la valeur la plus élevée) et se verrouille sur ce relais.

REMARQUE:
Le balayage et l'itinérance ne peuvent jamais être activés simultanément sur un même canal.

Les canaux qui utilisent cette fonction peuvent être ajoutés à une liste d'itinérance spécifique. La radio cherche les canaux de la liste d'itinérance pendant l'opération d'itinérance automatique pour identifier le site présentant la plus forte valeur RSSI. Une liste d'itinérance peut contenir jusqu'à 16 canaux, le canal sélectionné compris.

REMARQUE:
Vous ne pouvez pas ajouter ou supprimer manuellement une entrée à la liste d'itinérance. Consultez votre fournisseur ou administrateur système pour en savoir plus.

1.4

Capacity Plus

Capacity Plus est un système à ressources partagées d'entrée de gamme pour les systèmes monosite et multisite. Ce système monosite et multisite à ressources partagées dynamiques permet d'améliorer la capacité et la couverture.

1.4.1

Capacity Plus - Monosite

Capacity Plus - Monosite est une configuration en mode Ressources partagées monosite du système radio MOTOTRBO. Elle utilise un groupe de canaux pour prendre en charge des centaines d'utilisateurs et jusqu'à 254 groupes. Capacity Plus permet à votre radio d'utiliser efficacement les canaux programmés disponibles en mode Relais.

Vous entendrez une tonalité d'indication négative si vous tentez d'utiliser une fonctionnalité non applicable à Capacity Plus - Site unique en appuyant sur un bouton programmable.

Votre radio dispose également de fonctionnalités disponibles à la fois en mode numérique conventionnel et avec IP Site Connect et Capacity Plus. Les petites différences de fonctionnement entre ces deux modes n'ont aucun effet sur les performances de votre radio.

Pour plus d'informations, veuillez consulter votre fournisseur ou votre administrateur système.

1.4.2

Capacity Plus - Multisite

Capacity Plus - Multisite est une configuration multi-canal à ressources partagées du système radio MOTOTRBO, qui combine les meilleures configurations Capacity Plus et IP Site Connect.

Grâce à Capacity Plus - Multisite, votre radio peut étendre ses communications à ressources partagées au-delà de la couverture assurée par un seul site en lui permettant de se connecter à différents sites disponibles connectés à un réseau IP. Cette configuration apporte en outre une augmentation de la capacité en combinant et en utilisant efficacement les canaux programmés disponibles sur les différents sites accessibles.

Lorsque la radio passe de la zone de couverture d'un site à celle d'un autre site, elle se connecte au relais du nouveau site pour envoyer et recevoir des appels/données. Selon la programmation, cette transition est automatique ou manuelle.

Si cette fonction est configurée en mode automatique, la radio recherche tous les sites disponibles dès que le signal qu'elle reçoit est faible ou lorsqu'elle ne peut plus détecter le signal émis par le site actuel. Elle se verrouille alors sur le relais qui fournit la meilleure valeur RSSI.

Si cette fonction est configurée en mode manuel, la radio cherche à se connecter au prochain site figurant dans la liste d'itinérance et qui est à sa portée (mais dont le signal n'aura pas nécessairement la valeur la plus élevée) et se verrouille sur ce site.

Les canaux qui utilisent Capacity Plus - Multisite peuvent être ajoutés à une liste d'itinérance spécifique. La radio explore ces canaux pendant l'opération d'itinérance automatique pour identifier le site ayant la plus forte valeur RSSI.

REMARQUE:
vous ne pouvez pas ajouter ou supprimer manuellement une entrée à la liste d'itinérance. Consultez votre fournisseur ou administrateur système pour en savoir plus.

Comme avec Capacity Plus - Monosite, les icônes des caractéristiques non utilisables avec Capacity Plus - Multisite ne sont pas accessibles dans le menu. Vous entendrez une tonalité d'indication négative si vous tentez d'utiliser une fonctionnalité non applicable à Capacity Plus - Multisite en appuyant sur un bouton programmable.

Fonctionnement de base

Ce chapitre présente les opérations de base pour commencer à utiliser la radio.

2.1
Chargement de la batterie

Votre radio est alimentée par une batterie nickel-hydrure métallique (NiMH) ou lithium-ion (Li-Ion).

- Pour éviter de l'endommager et respecter les conditions de garantie, vous devez utiliser un chargeur Motorola Solutions pour charger la batterie, en suivant exactement les instructions du guide d'utilisation du chargeur.

  Tous les chargeurs ne peuvent charger que les batteries agréées par Motorola Solutions. D'autres batteries peuvent ne pas se charger. Motorola Solutions recommande d'éteindre la radio pendant le chargement.
- Vous devez toujours charger votre batterie IMPRES™ avec un chargeur IMPRES pour bénéficier d'une durée de vie optimale et des données d'utilisation pour leur gestion. Si elles sont exclusivement utilisées avec un chargeur IMPRES, les batteries IMPRES bénéficient d'une garantie étendue de six mois en plus de la garantie standard pour batteries Premium Motorola Solutions.
- Pour obtenir les meilleures performances, une batterie neuve doit être chargée pendant 14 à 16 heures avant sa première utilisation.

2.2
Installation de la batterie

Suivez la procédure ci-après pour fixer la batterie à votre radio.

Cette fonction d'alerte de batterie incorrecte est applicable uniquement pour les batteries IMPRES et non IMPRES dont le numéro de kit est programmé dans la mémoire morte programmable et effaçable électriquement (EPROM).

Lorsque la radio est liée à la mauvaise batterie, une tonalité d'avertissement basse retentit, le voyant devient rouge clignotant, l'écran indique `Batterie incorrecte` et la fonction d'annonce vocale ou de synthèse vocale (si elle a été chargée via le CPS) émet une tonalité indiquant que la batterie est incorrecte.

La certification de la radio est annulée si vous connectez une batterie UL à une radio certifiée FM ou vice versa. Votre radio peut être préprogrammée dans le CPS pour vous avertir lorsque cette batterie ne correspond pas. Consultez votre revendeur ou administrateur système pour déterminer comment la radio a été programmée.

1 Alignez la batterie sur les rainures situées au dos de la radio.

2 Appuyez avec fermeté sur la batterie et faites-la glisser vers le haut jusqu'à ce que le verrou s'enclenche.

3 Mettez le verrou de la batterie en position fermée.

4 Pour retirer la batterie, éteignez votre radio. Placez le verrou de la batterie marqué **A** sur la position ouverte. Maintenez la batterie et faites-la glisser vers le bas pour la sortir des rainures.

2.3

Installation de l'antenne

Suivez la procédure ci-après pour fixer l'antenne à votre radio.

Assurez-vous que la radio est éteinte.

Placez l'antenne dans son réceptacle et tournez-la dans le sens horaire.

REMARQUE:
Pour retirer l'antenne, tournez-la dans le sens antihoraire.

ATTENTION:
S'il s'avère nécessaire de remplacer l'antenne, vous devez uniquement utiliser une antenne MOTOTRBO. Tout autre type d'antenne endommagera votre radio.

2.4

Fixation de l'étui de transport

Suivez la procédure ci-après pour fixer l'étui de transport à votre radio.

1 Alignez les rails de l'étui de transport sur les rainures de la batterie.

2 Appuyez dessus jusqu'à ce que vous entendiez un clic.

2.5

Pose du cache du connecteur universel (protection anti-poussière)

Le connecteur universel se situe sur le côté antenne de la radio. Il permet de brancher des accessoires MOTOTRBO. Suivez la procédure ci-après pour fixer le cache anti-poussière à votre radio.

Remettez le cache en place lorsque vous n'utilisez pas le connecteur universel.

1 Insérez le petit crochet de maintien (qui se trouve à l'extrémité du cache) dans le slot correspondant en haut du connecteur universel.

2 Appuyez sur le cache en poussant vers le bas pour que le cache anti-poussière se positionne correctement sur le connecteur universel.

3 Fixez le cache du connecteur sur la radio en tournant la vis dans le sens horaire.

2.6

Nettoyage du cache du connecteur universel (protection anti-poussière)

Si la radio est exposée à de l'eau, faites sécher le connecteur universel avant de fixer un accessoire ou de remettre le cache en place. Si la radio est exposée à de

l'eau salée ou à des contaminants, suivez la procédure de nettoyage ci-après.

1. Mélangez une cuillère à soupe de liquide vaisselle doux dans 3,5 litres d'eau pour produire une solution à 0,5 %.
2. Nettoyez uniquement les surfaces externes de la radio avec cette solution. Appliquez la solution avec une brosse rigide, non métallique et à poils courts.
3. Séchez parfaitement la radio à l'aide d'un chiffon doux non pelucheux. Assurez-vous que la surface de contact du connecteur universel est propre et sèche.
4. Appliquez le nettoyant/lubrifiant Deoxit Gold (CAIG Labs, référence G100P) sur la surface de contact du connecteur universel.
5. Fixez un accessoire au connecteur universel pour tester la connectivité.

REMARQUE:
Ne plongez jamais la radio dans l'eau. Assurez-vous que l'excédent de détergent ne s'infiltre pas entre le connecteur universel et les commandes ou toute ouverture.

Nettoyez la radio une fois par mois pour maintenance. Dans des environnements plus hostiles, tels que les usines pétrochimiques ou les environnements marins à haute salinité, nettoyez la radio plus souvent.

2.7 Retrait du cache du connecteur universel (protection anti-poussière)

Suivez la procédure ci-après pour retirer le cache anti-poussière de votre radio.

1. Poussez le loquet vers le bas.
2. Soulevez le cache et faites-le glisser vers le bas pour le retirer du connecteur universel.

Remettez le cache en place lorsque vous n'utilisez pas le connecteur universel.

2.8

Mise sous tension de la radio

Suivez la procédure ci-après pour mettre votre radio sous tension.

Tournez le **bouton Marche/Arrêt - Volume** dans le sens horaire jusqu'à ce que vous entendiez un clic.

Si l'opération réussit :

- Une tonalité est émise.
- La LED passe au vert.
- L'écran affiche le texte `MOTOTRBO (TM)`, suivi d'un message ou d'une image d'accueil.
- L'écran d'accueil apparaît.

Si la fonction Tnltés/Avert. est désactivée, aucune tonalité n'est émise lors de la mise sous tension.

REMARQUE:
Lors de la mise sous tension initiale suite à une mise à jour du logiciel vers la version **R02.07.00.0000** ou versions ultérieures, le firmware GNSS est mis à niveau, l'opération durant 20 secondes. Une fois la mise à niveau terminée, la radio se réinitialise et s'allume. La mise à niveau du firmware s'applique uniquement aux modèles portables dotés de la dernière version du logiciel et du matériel.

Si votre radio ne s'allume pas, vérifiez la batterie. Vérifiez qu'elle est chargée et correctement installée. Si votre radio ne s'allume toujours pas, contactez votre fournisseur.

2.9

Mise hors tension de la radio

Suivez la procédure ci-après pour mettre votre radio hors tension.

Tournez le **bouton Marche/Arrêt - Volume** dans le sens antihoraire jusqu'à ce que vous entendiez un clic.

L'écran affiche `Mise hors tension`.

2.10

Réglage du volume

Suivez la procédure ci-après pour régler le volume de votre radio.

Effectuez l'une des opérations suivantes :

- Tournez le **bouton Marche/Arrêt - Volume** dans le sens horaire pour augmenter le volume.
- Tournez le **bouton Marche/Arrêt - Volume** dans le sens antihoraire pour diminuer le volume.

REMARQUE:
Votre radio peut être programmée sur un écart de volume minimal. Dans ce cas, le niveau sonore ne peut pas être baissé au-delà du niveau programmé. Consultez votre fournisseur ou administrateur système pour en savoir plus.

Cette page a été laissée vide de manière intentionnelle.

Commandes radio

Ce chapitre présente les boutons et fonctions permettant de contrôler la radio.

1 Indicateur LED

2 Bouton latéral 1[1]

3 Bouton PTT (Push-to-Talk)

4 Bouton latéral 2[1]

5 Bouton latéral 3[1]

6 Bouton avant P1[1]

7 Bouton Retour/Accueil

8 Bouton avant P2[1]

9 Connecteur universel pour accessoires

10 Bouton d'urgence[1]

11 Antenne

[1] Ces boutons sont programmables.

3.1

Utilisation du bouton de navigation quadridirectionnelle

Vous pouvez utiliser le bouton de navigation quadridirectionnelle pour faire défiler les options, augmenter ou diminuer les valeurs et naviguer vers le haut et le bas.

WAVE

WAVE™ (Wide Area Voice Environment) offre une nouvelle méthode pour passer des appels entre deux radios.

Cette fonction prend également en charge les appels entre des radios et d'autres appareils dotés de fonctionnalités WAVE. Cependant, un canal WAVE doit être configuré pour utiliser cette fonction.

Si la radio est dans un canal WAVE, elle ne peut pas recevoir d'appels provenant d'autres systèmes et peut uniquement recevoir des appels WAVE.

Si la radio est dans un canal WAVE, elle active automatiquement le Wi-Fi et poursuit la procédure de connexion au serveur WAVE. Les appels WAVE sont passés lorsque la radio est connectée à un réseau IP via le Wi-Fi.

REMARQUE:
Cette fonctionnalité s'applique uniquement aux modèles DP4601e.

Tableau 1: Icônes de l'écran WAVE

Les icônes suivantes apparaissent momentanément sur l'écran lorsque WAVE est activé.

	WAVE connecté WAVE est connecté.
	WAVE déconnecté WAVE est déconnecté.

4.1

Définition d'un canal WAVE actif

Les canaux WAVE sont configurés via CPS. Suivez la procédure ci-après pour sélectionner le canal WAVE souhaité.

1. Appuyez sur OK pour accéder au menu.
2. Appuyez sur ▲ ou ▼ pour accéder à l'option `Canaux WAVE`. Appuyez sur OK pour valider la sélection.
3. Appuyez sur ▲ ou ▼ pour accéder au canal WAVE souhaité. Appuyez sur OK pour valider la sélection.

4 Appuyez sur ▲ ou ▼ pour accéder à l'option `Définir actif`. Appuyez sur OK pour valider la sélection.

L'écran affiche le symbole ✓ en regard du canal sélectionné.

4.2

Affichage des informations relatives aux canaux WAVE

Suivez la procédure ci-après pour afficher les informations relatives aux canaux WAVE.

1 Effectuez l'une des opérations suivantes :

- Appuyez sur le bouton programmé **Liste des canaux WAVE**. Ignorez les étapes suivantes.
- Appuyez sur OK pour accéder au menu.

2 Appuyez sur ▲ ou ▼ pour accéder à l'option `Canaux WAVE`. Appuyez sur OK pour valider la sélection.

3 Appuyez sur ▲ ou ▼ pour accéder au canal WAVE souhaité. Appuyez sur OK pour valider la sélection.

4 Appuyez sur ▲ ou sur ▼ pour accéder à l'option `Voir détails`. Appuyez sur OK pour valider la sélection.

L'écran affiche les détails du canal WAVE.

4.3

Affichage des informations relatives aux terminaux WAVE

Suivez la procédure ci-après pour afficher les informations relatives aux terminaux WAVE.

1 Effectuez l'une des opérations suivantes :

- Appuyez sur le bouton **Contact** programmé. Passez à l'étape 3.
- Appuyez sur OK pour accéder au menu.

2 Appuyez sur ▲ ou ▼ pour accéder à l'option `Terminaux`. Appuyez sur OK pour valider la sélection.

3 Appuyez sur ▲ ou ▼ pour accéder au terminal WAVE souhaité. Appuyez sur OK pour valider la sélection.

4 Appuyez sur OK pour sélectionner `Voir détails`.

L'écran affiche les détails du terminal WAVE.

4.4 Émission d'appels de groupe

Suivez la procédure ci-après pour passer des appels de groupe sur un canal WAVE.

1 Sélectionnez le canal WAVE correspondant à l'ID ou à l'alias de groupe requis.

2 Appuyez sur le bouton **PTT** pour lancer l'appel.

La LED passe au vert. La première ligne affiche l'icône **Appel de groupe** et l'alias correspondant. La deuxième ligne affiche l'alias du groupe WAVE.

3 Effectuez l'une des opérations suivantes :

- Attendez la fin de la tonalité d'autorisation de parler (si cette fonction est activée) et parlez distinctement dans le microphone.
- Attendez la fin de la tonalité locale **PTT** (si cette option est activée) et parlez distinctement dans le microphone.

4 Relâchez le bouton **PTT** pour écouter.

La LED passe au vert lorsque la radio cible répond.L'écran affiche l'icône **Appel de groupe**, ainsi que l'alias ou l'ID du groupe et de la radio en émission.

5 Si la fonction d'indication Canal libre est activée, vous entendrez une brève tonalité d'avertissement

lorsque le bouton **PTT** de la radio émettrice est relâché. Cette tonalité confirme que le canal est libre et que vous pouvez parler. Appuyez sur le bouton **PTT** pour répondre à l'appel.

L'appel se termine en l'absence d'activité vocale pendant une période prédéterminée. La radio revient à l'écran affiché avant l'émission de l'appel.

Fonctionnement de Capacity Max

Capacity Max est un système radio à ressources partagées basé sur un canal de contrôle. Les fonctionnalités à disposition des utilisateurs radio dans ce système sont abordées dans ce chapitre.

5.1

Bouton Push-to-Talk

Le bouton **PTT** (Push-to-talk) comprend deux fonctions de base :

- Pendant un appel, le bouton **PTT** permet à la radio d'émettre vers d'autres radios participant à cet appel. Le microphone est activé lorsque vous appuyez sur le bouton **PTT**.
- Lorsqu'il n'y a pas d'appel en cours, le bouton **PTT** sert à effectuer un nouvel appel.

Exercez une pression longue sur le bouton **PTT** pour parler. Relâchez le bouton **PTT** pour écouter.

Si la tonalité Voix autorisée est activée, attendez la fin de la tonalité d'avertissement courte avant de parler.

5.2

Boutons programmables

Votre fournisseur peut programmer les boutons programmables en fonction de la durée de pression, pour vous permettre d'accéder directement à des fonctions radio.

Pression courte
Vous appuyez sur le bouton et relâchez rapidement.

Pression longue
Vous appuyez sur le bouton et vous le maintenez enfoncé pendant la durée programmée.

REMARQUE:
Reportez-vous à Gestion de l'urgence à la page 430 pour plus d'informations sur la durée programmée du bouton **Urgence**.

5.2.1

Fonctions radio attribuables

Les fonctions radio suivantes peuvent être attribuées à des boutons programmables par votre revendeur ou par l'administrateur système.

Profils audio
Permet à l'utilisateur de choisir le profil audio.

Routage audio
Permet de faire basculer le routage audio entre les haut-parleurs internes et les haut-parleurs externes.

Bascule audio
Permet de basculer le routage audio entre le haut-parleur interne de la radio et le haut-parleur d'un accessoire filaire.

Commutateur® audio Bluetooth
Bascule le routage audio entre le haut-parleur interne de la radio et l'accessoire externe Bluetooth.

Connexion Bluetooth
Lance une recherche et établit la connexion Bluetooth.

Déconnexion Bluetooth
Met fin à toutes les connexions Bluetooth établies entre la radio et les périphériques compatibles Bluetooth.

Détection Bluetooth
Active le mode découverte Bluetooth pour votre radio.

Contacts
Fournit un accès direct au répertoire.

Alerte d'appel
Vous donne un accès direct au répertoire pour sélectionner un contact à qui vous souhaitez envoyer un avertissement d'appel.

Journal d'appels
Sélectionne le journal d'appels.

Urgence
Selon la programmation, cette fonction lance ou annule une alarme ou un appel d'urgence.

Localisation en intérieur
Active ou désactive la localisation en intérieur.

Audio intelligent
Active ou désactive l'audio intelligent.

Numérotation manuelle
Lance un appel individuel en saisissant un ID de terminal.

Itinérance de site manuelle
Lance la recherche manuelle de site.

CGA micro
Active ou désactive la commande de gain automatique (CGA) du microphone interne.

Notifications
Permet d'accéder directement à la liste des notifications.

Accès par numérotation rapide
Lance directement un appel de diffusion, individuel, téléphonique ou de groupe prédéfini, un avertissement d'appel prédéfini ou un message texte rapide prédéfini.

Fonction de carte d'option
Active ou désactive les fonctions de la carte d'option sur les canaux qui les utilisent.

Téléphone
Permet d'accéder directement au répertoire téléphonique.

Confidentialité
Active ou désactive la fonction de cryptage.

ID et alias de la radio
Fournit l'ID et l'alias de la radio.

Écoute ambiance
Active le microphone d'une radio sans activer d'indicateur.

Réinitialiser le canal d'accueil
Définit un nouveau canal d'accueil.

Éteindre le rappel de canal d'accueil
Désactive le rappel de canal d'accueil.

Informations du site
Affiche l'ID et le nom du site Capacity Max actuel.

Lit des messages vocaux d'annonce de site pour le site actuel lorsque le mode Annonce vocale est activé.

Verrouillage site
Lorsque cette fonction est activée, la radio effectue une recherche sur le site en cours uniquement. Lorsqu'elle est désactivée, la radio effectue une recherche sur les autres sites en plus du site en cours.

État
Sélectionne le menu Liste d'états.

Contrôle de télémétrie
Contrôle la broche de sortie sur une radio locale ou distante.

Text Message
Sélectionne le menu de message texte.

Amélioration trille
Active ou désactive l'amélioration des sons vibrants.

Act./désact. Annonce vocale
Active ou désactive l'annonce vocale.

Wi-Fi
Active et désactive le Wi-Fi.

Zone Selection
Permet d'effectuer une sélection dans une liste de zones.

5.2.2

Fonctions utilitaires ou paramètres attribuables

Les fonctions utilitaires ou paramètres radio suivants peuvent être attribués à des boutons programmables.

Tones/Alerts
Active ou désactive l'ensemble des tonalités et avertissements.

Rétroéclairage
Active/désactive le rétro-éclairage.

Luminosité rétro-éclairage
Règle le niveau de luminosité.

Niveau de puissance
Passe du niveau d'émission élevé à faible et vice-versa.

5.2.3

Accès aux fonctions préprogrammées

Suivez la procédure ci-après pour accéder aux fonctions préprogrammées de votre radio.

1 Effectuez l'une des opérations suivantes :
- Appuyez sur le bouton programmé. Passez à étape 3.
- Appuyez sur OK pour accéder au menu.

2 Appuyez sur ▲ ou sur ▼ pour accéder à la fonction de menu, puis appuyez sur OK pour sélectionner une fonction ou ouvrir un sous-menu.

3 Effectuez l'une des opérations suivantes :
- Appuyez sur pour revenir à l'écran précédent.

- Exercez une pression longue sur pour revenir à l'écran d'accueil.

Après une période d'inactivité prédéterminée, votre radio ferme automatiquement le menu et revient à l'écran d'accueil.

5.3

Indicateurs d'état

Ce chapitre présente les indicateurs d'état et les tonalités audio utilisés sur la radio.

5.3.1

Icônes

La radio affiche son état, les saisies de texte et les entrées de menu. Les icônes suivantes s'affichent sur l'écran de la radio.

Tableau 2: Icônes de l'écran

Les icônes suivantes apparaissent sur la barre d'état, en haut de l'écran de la radio. Les icônes sont classées sur la gauche par ordre d'apparition ou d'utilisation et sont spécifiques à chaque canal.

	Batterie Le nombre de barres affichées (0 à 4) représente le niveau de charge actuel de la batterie. L'icône clignote lorsque la batterie est faible.
	Bluetooth connecté La fonction Bluetooth est activée. L'icône reste affichée lorsqu'un appareil Bluetooth distant est connecté.
	Bluetooth Non connecté La fonction Bluetooth est activée, mais aucun appareil Bluetooth distant n'est connecté.
	Urgence La radio est en mode Urgence.
	GNSS disponible La fonctionnalité GNSS est activée. L'icône reste allumée lorsqu'une position peut être déterminée.

Tableau (suite)…

	GNSS non disponible La fonctionnalité GNSS est activée, mais votre radio ne reçoit pas de données du satellite.
	Données en volume élevé La radio reçoit des données en volume élevé et le canal est occupé.
	Localisation en intérieur disponible[2] L'état Localisation en intérieur est activé et disponible.
	Localisation en intérieur non disponible[2] L'état Localisation en intérieur est activé, mais il n'est pas disponible en raison de la désactivation du Bluetooth ou d'un balayage de balises suspendu par Bluetooth.
	Mode Muet Le mode Muet est activé et le haut-parleur est désactivé.

Tableau (suite)…

	Notification La liste des notifications contient au moins un événement manqué.
	Carte d'options La carte d'option est activée. (Modèles avec carte d'option uniquement)
	Carte d'option non fonctionnelle La carte d'option est désactivée.
5	**Compteur de programmation par liaison radio (OTAP, Over-the-Air Programming)** Indique le temps restant avant le redémarrage automatique de la radio.
L ou H	**Niveau de puissance** La radio est réglée sur un niveau de puissance Bas ou la radio est réglée sur un niveau de puissance Haut.

Tableau (suite)…

[2] Applicable uniquement aux modèles dotés de la dernière version du logiciel et du matériel.

	Priorité 1 Indique le groupe de parole de priorité 1.
	Priorité 2 Indique le groupe de parole de priorité 2.
	Indication de la puissance du signal reçu (RSSI) Le nombre de barres affichées représente l'intensité du signal de réception. Quatre barres indiquent le niveau maximal du signal. Cette icône est uniquement affichée pendant la réception.
	Suppr. réponse La fonctionnalité Suppr. réponse est activée.
	Sonnerie seulement Le mode Sonnerie est activé.
	Crypté La fonction de cryptage est activée.

Tableau (suite)…

	Silencieux Le mode Silencieux est activé.
	Itinérance de site La fonction d'itinérance de site est activée.
	État Indique un nouveau message d'état.
	Désactivation des tonalités Les tonalités sont désactivées.
	Non crypté La fonction de cryptage est désactivée.
	Vibreur Le mode Vibreur est activé.
	Vibreur et sonnerie Le mode Vibreur et sonnerie est activé.
	Wi-Fi excellent[3] Le signal Wi-Fi est excellent.

Tableau (suite)…

	Wi-Fi bon[3] Le signal Wi-Fi est bon.
	Wi-Fi moyen[3] Le signal Wi-Fi est moyen.
	Wi-Fi faible[3] Le signal Wi-Fi est faible.
	Wi-Fi indisponible[3] Le signal Wi-Fi est indisponible.

Tableau 3: Icônes avancées du menu

Les icônes suivantes sont affichées à côté des éléments du menu qui permettent de choisir entre deux options ou pour signaler l'existence d'un sous-menu contenant deux options.

	Case à cocher (cochée) Indique que l'option correspondante est activée.

Tableau (suite)…

	Case à cocher (non cochée) Indique que l'option correspondante n'est pas activée.
	Case noire Indique le sous-menu de l'option sélectionnée dans le menu.

Tableau 4: Icônes des appareils Bluetooth

Les icônes suivantes s'affichent en regard des éléments de la liste des dispositifs Bluetooth disponibles pour indiquer leur type.

	Dispositif audio Bluetooth Un dispositif d'écoute par connexion Bluetooth, par exemple une oreillette.
	Dispositif de données Bluetooth Un dispositif de transmission de données par connexion Bluetooth, par exemple un scanner.

Tableau (suite)…

[3] Applicable uniquement aux modèles DP4601e

	Dispositif PTT Bluetooth Un dispositif PTT compatible Bluetooth, par exemple un POD.

Tableau 5: Icônes d'appel

En cours d'appel, les icônes suivantes peuvent apparaître sur l'écran de votre radio. Elles peuvent également s'afficher dans le répertoire pour indiquer le type d'alias ou d'ID.

	Appel PC Bluetooth Indique un appel PC Bluetooth en cours. Dans la liste des Contacts, il indique l'alias (nom) ou l'ID (numéro) d'un appel PC Bluetooth.
	Dispatch Call Le type de contact Appel de répartition permet d'envoyer un message texte à un PC répartiteur via un serveur de messagerie texte tiers.

Tableau (suite)…

	Appel de groupe/Appel général Signale un appel de groupe ou un appel général en cours. Dans le répertoire, cette icône indique un ID (numéro) ou un alias (nom) de groupe.
	Appel individuel périphérique non IP Indique qu'un appel individuel périphérique non IP est en cours. Dans le répertoire, cette icône indique un ID (numéro) ou un alias (nom) de terminal radio.
	Appel de groupe périphérique non IP Indique qu'un appel de groupe périphérique non IP est en cours. Dans le répertoire, cette icône indique un ID (numéro) ou un alias (nom) de groupe.
	Appel individuel carte d'option Indique qu'un appel individuel carte d'option est en cours.

Tableau (suite)…

	Dans le répertoire, cette icône indique un ID (numéro) ou un alias (nom) de terminal radio.
	Appel de groupe carte d'option Indique qu'un appel de groupe carte d'option est en cours. Dans le répertoire, cette icône indique un ID (numéro) ou un alias (nom) de groupe.
	Appel téléphonique de groupe/Appel général Indique un appel téléphonique en appel de groupe/général en cours. Dans le répertoire, cette icône indique un ID (numéro) ou un alias (nom) de groupe.
	Appel téléphonique en appel individuel Indique un appel téléphonique en appel individuel en cours. Dans le répertoire, cette icône indique un ID (numéro) ou un alias (nom) de téléphone.
	Appel individuel Signale un appel individuel en cours. Dans le répertoire, cette icône indique un ID (numéro) ou un alias (nom) de terminal radio.

Tableau (suite)…

Tableau 6: Icônes des mini-avis

Les icônes suivantes peuvent apparaître momentanément sur l'écran après le déclenchement d'une tâche par l'utilisateur.

	Échec de transmission (négatif) La tâche n'a pas pu être exécutée correctement.
	Transmission réussie (positif) La tâche a été correctement exécutée.
	Transmission en cours (transition) La radio émet. Ceci s'affiche avant l'indication Transmission réussie ou Échec de transmission.

Tableau 7: Icônes des éléments envoyés

Les icônes suivantes apparaissent dans le coin supérieur droit de l'écran de la radio, dans le dossier Messages envoyés.

ou	**En cours** Le message texte envoyé à un ID ou un alias de terminal radio est en attente de transmission, qui sera suivie par l'attente de l'accusé de réception. Le message texte envoyé à un ID ou un alias de groupe est en attente de transmission.
ou	**Message individuel ou de groupe lu** Le message texte a été lu.
ou	**Message individuel ou de groupe non lu** Le message texte n'a pas été lu.

Tableau (suite)…

ou	**Échec envoi** Le message texte ne peut pas être envoyé.
ou	**Envoi réussi** Le message texte a été envoyé avec succès.

5.3.2

Indicateur LED

Le voyant LED signale le statut opérationnel de votre radio.

Rouge clignotant

La radio a échoué à l'auto-test au moment de l'allumage.

La radio reçoit une émission d'urgence.

La radio émet alors que son état de batterie est faible.

La radio est hors de portée si elle est configurée avec le système de transpondeur à portée automatique (ARTS, Auto-Range Transponder System).

Le mode Muet est activé.

Vert fixe

La radio est en cours d'allumage.

La radio est en cours d'émission.

La radio envoie un avertissement d'appel ou une transmission urgente.

Vert clignotant

La radio reçoit un appel ou des données.

La radio détecte une activité ou récupère des transmissions en programmation par liaison radio.

La radio détecte une activité en liaison radio.

REMARQUE:
Cette activité peut affecter ou non le canal programmé de la radio, en raison de la nature du protocole numérique.

Vert clignotant double

La radio reçoit un appel ou des données cryptés.

Jaune fixe

La radio est en mode Détection Bluetooth.

Jaune clignotant

La radio doit encore répondre à une alerte d'appel.

Jaune clignotant double

L'itinérance automatique est activée sur la radio.

La radio recherche activement un nouveau site.

La radio doit encore répondre à un avertissement d'appel de groupe.

La radio est verrouillée.

5.3.3

Tonalités

Les tonalités émises sur le haut-parleur de la radio sont décrites ci-après.

□

Tonalité aiguë

■

Tonalité grave

5.3.3.1

Tonalités audio

Les tonalités audio vous informent de l'état de la radio ou vous avertissent en cas de réception de données sur celle-ci.

Tonalité continue
Son uniforme. Émise en continu jusqu'à la fin de l'état.

Tonalité périodique
Tonalité périodique selon la durée programmée. La tonalité est répétée à intervalles réguliers.

Tonalité répétitive
Un seul son est répété jusqu'à ce que l'utilisateur le désactive.

Tonalité momentanée
Tonalité émise une fois pendant une courte durée définie par la radio.

5.3.3.2

Tonalités d'indication

Les tonalités d'indication fournissent des indications sonores relatives à l'état de la radio après le déclenchement d'une tâche par l'utilisateur.

Tonalité d'indication positive

Tonalité d'indication négative

5.4

Enregistrement

Vous pouvez recevoir un certain nombre de messages liés à l'enregistrement.

Enregistr.

L'enregistrement est généralement envoyé au système lors de la mise sous tension, de la modification du groupe de parole ou en itinérance. Si l'enregistrement de la radio sur un site échoue, la radio tente automatiquement de se déplacer vers un autre site. La radio supprime temporairement le site où l'enregistrement a échoué de la liste d'itinérance.

Cette indication signifie que la radio est occupée et à la recherche d'un site vers lequel se déplacer ou que la radio a trouvé un site, mais qu'elle est en attente d'une réponse aux messages d'enregistrement de la radio.

Lorsque `Enregistr.` s'affiche sur la radio, une tonalité retentit et l'indicateur LED jaune clignote deux fois pour indiquer une recherche de site.

Si les indications restent affichées, l'utilisateur doit changer d'emplacement ou se déplacer sur un autre site manuellement, s'il y est autorisé.

Hors de portée

Une radio est considérée hors de portée lorsqu'elle ne parvient pas à détecter un signal provenant du système ou du site actuel. En général, cette indication signifie que la radio est en dehors de zone de couverture géographique de radiofréquence (RF) sortante.

Lorsque `Hors de portée` s'affiche sur la radio, une tonalité répétitive est émise et l'indicateur LED rouge clignote.

Contactez votre revendeur ou votre administrateur système si la radio indique hors de portée dans une zone bénéficiant d'une bonne couverture de RF.

Échec de l'affiliation au groupe de parole

Une radio tente une affiliation au groupe de parole spécifié dans les canaux ou l'UKP (Unified Knob Position) au cours de l'enregistrement.

Une radio en échec d'affiliation ne peut pas émettre ni recevoir d'appels dans le groupe de parole avec lequel elle tente une affiliation.

En cas d'échec de l'affiliation d'une radio à un groupe de parole, l'`Alias UKP` s'affiche sur l'écran d'accueil avec un arrière-plan en surbrillance.

Contactez votre revendeur ou votre administrateur système si la radio reçoit des indications d'échec d'affiliation.

Enregistrement refusé

Des indicateurs d'enregistrement refusé s'affichent lorsque l'enregistrement au système n'est pas accepté.

La radio n'indique pas à son utilisateur la raison spécifique du refus de l'enregistrement. En général, un enregistrement est refusé lorsque l'opérateur système a désactivé l'accès de la radio au système.

Lorsque l'enregistrement d'une radio est refusé, `Refus enregistr.` s'affiche sur la radio et l'indicateur LED jaune clignote deux fois pour indiquer une recherche de site.

5.5

Sélection des zones et des canaux

Ce chapitre présente la procédure de sélection d'une zone ou d'un canal sur votre radio.

La radio peut être programmée avec un maximum de 250 zones Capacity Max et un maximum de 160 canaux par zone. Chaque zone Capacity Max contient un maximum de 16 positions attribuables.

5.5.1

Sélection des zones

Suivez la procédure ci-après pour sélectionner une zone sur votre radio.

1 Effectuez l'une des opérations suivantes :

- Appuyez sur le bouton **Sélection de zone** préprogrammé. Passez à étape 3.
- Appuyez sur OK pour accéder au menu.

2 Appuyez sur ▲ ou sur ▼ pour accéder à l'option `Zone`. Appuyez sur OK pour valider la sélection.

L'écran affiche le symbole ✓ ainsi que la zone actuelle.

3 Appuyez sur ▲ ou sur ▼ pour accéder à la zone souhaitée. Appuyez sur OK pour valider la sélection.

L'écran affiche momentanément `<Zone> sélectionnée` avant de revenir à l'écran de la zone sélectionnée.

5.5.2

Sélection d'un type d'appel

Utilisez le bouton de sélection de canal pour sélectionner un type d'appel. Il peut s'agir d'un appel de groupe, d'un appel de diffusion, d'un appel général ou d'un appel individuel, en fonction de la programmation de la radio. Si vous placez le bouton de sélection de canal sur une autre position (affectée à un type de canal), la radio s'enregistre de nouveau sur le système Capacity Max. La radio

s'enregistre avec l'ID du groupe de parole programmé pour la nouvelle position du sélecteur de canal le nouveau type d'appel.

Comme la radio ne fonctionne pas lorsque vous sélectionnez un canal non programmé, utilisez le sélecteur de canal pour sélectionner un canal programmé.

Une fois que la zone requise est affichée (si plusieurs zones sont définies sur la radio), tournez le sélecteur de canal programmé pour sélectionner le type d'appel.

5.5.3

Sélection d'un site

Un site offre une couverture pour une zone spécifique. Dans un réseau multisite, la radio Capacity Max recherche automatiquement un nouveau site lorsque le niveau du signal provenant du site en cours tombe en dessous d'un seuil acceptable.

Le système Capacity Max peut prendre en charge jusqu'à 250 sites.

5.5.4

Demande d’itinérance

Une demande d’itinérance demande à la radio de rechercher un site différent, même si le signal du site en cours est acceptable.

Si aucun site n'est disponible :

- L'écran de la radio affiche `Recherche` et continue à chercher dans la liste de sites.
- La radio revient au site précédent s’il est toujours disponible.

REMARQUE:
cette fonction est programmée par votre revendeur.

Appuyez sur le bouton programmé d'**itinérance de site manuelle**.

Un signal sonore est émis pour indiquer que la radio a changé de site. L'écran affiche `ID du site <numéro du site>`.

5.5.5

Site Lock On/Off

Lorsque cette fonction est activée, la radio effectue une recherche sur le site en cours uniquement. Lorsqu'elle est désactivée, la radio effectue une recherche sur les autres sites en plus du site en cours.

Appuyez sur le bouton programmé **Verrouillage site**.

Si la fonction **Verrou. site** est activée :

- Un signal sonore positif indique que la radio est verrouillée sur le site en cours.
- L'écran indique que le `site est verrouillé`.

Si la fonction **Verrou. site** est désactivée :

- Un signal sonore négatif indique que la radio n'est pas verrouillée.
- L'écran indique que le `site est déverrouillé`.

5.5.6

Restriction sur un site

Dans un système Capacity Max, l'administrateur système de la radio peut sélectionner les canaux que la radio est autorisée à utiliser.

Il n'est pas nécessaire de reprogrammer la radio pour modifier la liste des sites autorisés et non autorisés. Si votre radio tente de s'enregistrer sur un site non autorisé, elle reçoit une indication spécifiant que l'accès au site est refusé. Dans ce cas, la radio recherche un autre site du réseau.

Lorsque vous rencontrez des restrictions sur un site, votre radio affiche `Refus enregistr.` et l'indicateur LED jaune clignote deux fois pour indiquer une recherche de site.

5.5.7

Ressources partagées du site

Un site doit pouvoir communiquer avec le contrôleur à ressources partagées pour être considéré comme un système isolé.

Si le site ne peut pas communiquer avec le contrôleur à ressources partagées du système, la radio passe en mode site isolé. Sur un site isolé, la radio fournit une indication sonore et visuelle périodique à l'utilisateur pour l'informer des fonctionnalités limitées.

Lorsqu'une radio se trouve dans un site isolé, elle affiche `Site isolé` et une tonalité répétitive retentit.

Les radios des sites isolés peuvent toujours passer des appels vocaux individuels et de groupe et envoyer des messages texte à d'autres radios au sein du même site. Les consoles voix, les enregistreurs, les passerelles de téléphone et les applications de données ne peuvent pas communiquer avec les radios sur le site.

Lorsqu'elle se trouve dans un site isolé, une radio impliquée dans des appels sur plusieurs sites pourra uniquement communiquer avec d'autres radios au sein du même site. Les communications en provenance et vers d'autres sites seront perdues.

REMARQUE:
S'il existe plusieurs sites couvrant la position actuelle de la radio et que l'un de ces sites devient site isolé, la radio se déplace vers un autre site disponible dans la zone de couverture.

5.6

Appels

Ce chapitre présente les opérations permettant de recevoir, prendre, passer et arrêter des appels.

Vous pouvez sélectionner un alias ou un ID de terminal radio/de groupe une fois que vous avez sélectionné un canal à l'aide de l'une des fonctions suivantes :

Recherche d'alias
Cette méthode, uniquement disponible avec un microphone à clavier, est employée pour les appels de groupe, les appels individuels et les appels généraux.

Liste des contacts
Cette méthode offre un accès direct au répertoire.

Numérotation manuelle (à l'aide du répertoire)
Cette méthode, uniquement disponible avec un microphone à clavier, est employée pour les appels individuels et téléphoniques.

Touches numériques programmées

Cette méthode, uniquement disponible avec un microphone à clavier, est employée pour les appels de groupe, les appels individuels et les appels généraux.

REMARQUE:
Vous pouvez attribuer un seul alias ou ID à une touche numérique, mais vous pouvez attribuer plus d'une touche numérique à un alias ou ID. Toutes les touches numériques d'un microphone à clavier peuvent être attribuées. Reportez-vous à la section Attribution d'entrées aux touches numériques programmables à la page 410 pour plus d'informations.

Bouton programmé Accès par numérotation rapide

Cette méthode est employée pour les appels de groupe, individuels et téléphoniques uniquement.

Vous ne pouvez attribuer qu'un seul ID à un bouton d'**accès par numérotation rapide** avec une pression courte ou longue sur un bouton programmable. Plusieurs boutons d'**accès par numérotation rapide** peuvent être programmés sur votre radio.

Bouton programmable

Cette méthode est employée pour les appels téléphoniques uniquement.

5.6.1

Appels de groupe

Votre radio doit avoir été configurée pour faire partie d'un groupe afin de pouvoir échanger des appels avec un groupe d'utilisateurs.

5.6.1.1

Émission d'appels de groupe

Suivez la procédure ci-après pour passer des appels de groupe sur votre radio.

1. Effectuez l'une des opérations suivantes :
   - Sélectionnez un canal correspondant à l'alias ou à l'ID du groupe actif. Voir Sélection d'un type d'appel à la page 73.
   - Appuyez sur le bouton **Accès direct** préprogrammé.
2. Appuyez sur le bouton **PTT** pour lancer l'appel.

   La LED passe au vert. La première ligne affiche l'icône **Appel de groupe** et l'alias correspondant.
3. Effectuez l'une des opérations suivantes :

- Attendez la fin de la tonalité d'autorisation de parler (si cette fonction est activée) et parlez distinctement dans le microphone.
- Attendez la fin de la tonalité locale **PTT** (si cette option est activée) et parlez distinctement dans le microphone.

4 Relâchez le bouton **PTT** pour écouter.

La LED passe au vert lorsque la radio cible répond. L'écran affiche l'icône **Appel de groupe**, ainsi que l'alias ou l'ID du groupe et de la radio en émission.

5 Si la fonction d'indication Canal libre est activée, vous entendrez une brève tonalité d'avertissement lorsque le bouton **PTT** de la radio émettrice est relâché. Cette tonalité confirme que le canal est libre et que vous pouvez parler. Appuyez sur le bouton **PTT** pour répondre à l'appel.

L'appel se termine en l'absence d'activité vocale pendant une période prédéterminée.

L'appelant peut appuyer sur pour mettre fin à un appel de groupe.

5.6.1.2

Émission d'appels de groupe à l'aide du répertoire

Suivez la procédure ci-après pour passer des appels de groupe sur votre radio à l'aide du répertoire.

1 Appuyez sur OK pour accéder au menu.

2 Appuyez sur ▲ ou sur ▼ pour accéder au `répertoire`. Appuyez sur OK pour valider la sélection.

3 Appuyez sur ▲ ou sur ▼ pour accéder à l'alias ou à l'ID souhaité. Appuyez sur OK pour valider la sélection.

4 Appuyez sur le bouton **PTT** pour lancer l'appel.

La LED passe au vert.

La première ligne de texte affiche l'alias ou l'ID du terminal. La seconde ligne affiche `Appel de groupe` et l'icône **Appel de groupe**.

5 Effectuez l'une des opérations suivantes :

- Attendez la fin de la tonalité d'autorisation de parler (si cette fonction est activée) et parlez distinctement dans le microphone.
- Attendez la fin de la tonalité locale **PTT** (si cette option est activée) et parlez distinctement dans le microphone.

6 Relâchez le bouton **PTT** pour écouter.

La LED passe au vert lorsque la radio cible répond. L'écran affiche l'icône **Appel de groupe**, ainsi que l'alias ou l'ID du groupe et de la radio en émission.

7 Si la fonction d'indication Canal libre est activée, vous entendrez une brève tonalité d'avertissement lorsque le bouton **PTT** de la radio émettrice est relâché. Cette tonalité confirme que le canal est libre et que vous pouvez parler. Appuyez sur le bouton **PTT** pour répondre à l'appel.

L'appel se termine en l'absence d'activité vocale pendant une période prédéterminée.

L'appelant peut appuyer sur pour mettre fin à l'appel de groupe.

Vous entendez une courte tonalité. L'écran affiche `Appel terminé`.

5.6.1.3 Réponse aux appels de groupe

Suivez la procédure ci-après pour répondre aux appels de groupe sur votre radio.

Lorsque vous recevez un appel de groupe :

- La LED clignote en vert.
- L'icône **Appel de groupe** s'affiche dans le coin supérieur droit de l'écran.
- La première ligne affiche l'alias de l'appelant.
- La deuxième ligne affiche l'alias de l'appel de groupe.
- Votre radio active le son à nouveau et l'appel entrant est audible dans le haut-parleur.

1 Effectuez l'une des opérations suivantes :

- Si la fonction d'indication Canal libre est activée, vous entendrez une brève tonalité d'avertissement lorsque le bouton **PTT** de la radio émettrice est relâché. Cette tonalité confirme que le canal est libre et que vous pouvez parler. Appuyez sur le bouton **PTT** pour répondre à l'appel.
- Si la fonction Interruption vocale est activée, appuyez sur le bouton **PTT** pour couper le son de la radio en émission afin de libérer le canal pour pouvoir répondre.

La LED passe au vert.

2 Effectuez l'une des opérations suivantes :

- Attendez la fin de la tonalité d'autorisation de parler (si cette fonction est activée) et parlez distinctement dans le microphone.
- Attendez la fin de la tonalité locale **PTT** (si cette option est activée) et parlez distinctement dans le microphone.

3 Relâchez le bouton **PTT** pour écouter.

L'appel se termine en l'absence d'activité vocale pendant une période prédéterminée.

5.6.2

Appel de diffusion

Un appel de diffusion est un appel vocal unidirectionnel provenant d'un utilisateur et destiné à l'ensemble d'un groupe de parole.

La fonctionnalité d'appel de diffusion permet uniquement à l'utilisateur à l'origine de l'appel de transmettre au groupe de parole, tandis que les destinataires de l'appel ne peuvent pas répondre.

L'appelant peut également mettre fin à l'appel de diffusion. Pour recevoir un appel provenant d'un groupe d'utilisateurs ou appeler un groupe d'utilisateurs, la radio doit être configurée comme membre de ce groupe.

5.6.2.1

Émission d'appels de diffusion

Suivez la procédure ci-après pour passer des appels de diffusion sur votre radio.

1 Effectuez l'une des opérations suivantes :

- Sélectionnez un canal correspondant à l'alias ou à l'ID du groupe actif. Voir Sélection d'un type d'appel à la page 73.

- Appuyez sur le bouton **Accès direct** préprogrammé.

2 Appuyez sur le bouton **PTT** pour lancer l'appel.

La LED passe au vert.L'écran affiche l'icône **Appel de groupe** et l'alias correspondant.

3 Effectuez l'une des opérations suivantes :

- Attendez la fin de la tonalité d'autorisation de parler (si cette fonction est activée) et parlez distinctement dans le microphone.
- Attendez la fin de la tonalité locale **PTT** (si cette option est activée) et parlez distinctement dans le microphone.

L'appelant peut appuyer sur pour mettre fin à l'appel de diffusion.

5.6.2.2

Émission d'appels de diffusion à l'aide du répertoire

Suivez la procédure ci-après pour passer des appels de diffusion sur votre radio à l'aide du répertoire.

1 Appuyez sur OK pour accéder au menu.

2 Appuyez sur ▲ ou sur ▼ pour accéder au `répertoire`.Appuyez sur OK pour valider la sélection.

3 Appuyez sur ▲ ou sur ▼ pour accéder à l'alias ou à l'ID souhaité.Appuyez sur OK pour valider la sélection.

4 Appuyez sur le bouton **PTT** pour lancer l'appel.

La LED clignote en vert.
La première ligne de texte affiche l'alias ou l'ID du terminal. La seconde ligne affiche `Appel de groupe` et l'icône **Appel de groupe**.

5 Effectuez l'une des opérations suivantes :

- Attendez la fin de la tonalité d'autorisation de parler (si cette fonction est activée) et parlez distinctement dans le microphone.

- Attendez la fin de la tonalité locale **PTT** (si cette option est activée) et parlez distinctement dans le microphone.

L'appelant peut appuyer sur pour mettre fin à l'appel de diffusion.

5.6.2.3

Réception d'appels de diffusion

Suivez la procédure ci-après pour recevoir un appel de diffusion sur votre radio.

Lorsque vous recevez un appel de diffusion :

- La LED clignote en vert.
- L'icône **Appel de groupe** s'affiche dans le coin supérieur droit de l'écran.
- La première ligne affiche l'alias de l'appelant.
- La deuxième ligne affiche l'alias de l'appel de groupe.
- Votre radio active le son à nouveau et l'appel entrant est audible dans le haut-parleur.

REMARQUE:
Les utilisateurs destinataires ne sont pas autorisés à répondre pendant un appel de diffusion. L'écran affiche `Réponse interdite`. La tonalité d'interdiction de réponse retentit momentanément si vous appuyez sur le bouton **PTT** pendant un appel de diffusion.

5.6.3

Appel individuel

Un appel individuel est un appel provenant d'une radio individuelle communiquant avec une autre radio individuelle.

Il existe deux façons d'établir un appel individuel.

- Le premier type d'appel est appelé appel OACSU (Off Air Call Set Up, connexion sans émission). L'appel OACSU permet de configurer l'appel après l'exécution d'une vérification de présence et met automatiquement fin à l'appel.
- Le second type d'appel est appelé appel FOACSU (Full Off Air Call Set Up, connexion avec émission). L'appel FOACSU définit également l'appel après l'exécution d'une vérification de présence. Cependant, les appels FOACSU nécessitent un accusé de réception de

l'utilisateur pour mettre fin à l'appel et permet à l'utilisateur d'accepter ou de refuser un appel.

Le type d'appel est configuré par l'administrateur système.

Si la radio cible n'est pas disponible avant la configuration de l'appel individuel, la situation suivante se produit :

- Une tonalité est émise.
- L'écran affiche un mini-avis négatif.
- La radio revient au menu affiché avant le lancement de la vérification de présence.

REMARQUE:
L'appelant et le destinataire peuvent mettre fin à un appel individuel en cours en appuyant sur .

5.6.3.1

Émission d'appels individuels

Votre radio doit être programmée pour que vous puissiez passer un appel individuel. Si cette fonction n'est pas activée, une tonalité d'indication négative est émise lorsque vous lancez l'appel. Suivez la procédure ci-après pour passer des appels individuels sur votre radio.Si la radio cible n'est pas disponible, une courte tonalité est émise et l'écran affiche `Appelé Non disponible`.

1. Effectuez l'une des opérations suivantes :
   - Sélectionnez un canal correspondant à l'alias ou à l'ID du terminal radio actif. Voir Sélection d'un type d'appel à la page 73.
   - Appuyez sur le bouton **Accès direct** préprogrammé.
2. Appuyez sur le bouton **PTT** pour lancer l'appel.

   La LED passe au vert.L'écran affiche l'icône **Appel individuel** ainsi que l'alias du terminal et l'état de l'appel.
3. Attendez la fin de la tonalité d'autorisation de parler (si cette fonction est activée) et parlez distinctement dans le microphone.
4. Relâchez le bouton **PTT** pour écouter.

   La LED passe au vert lorsque la radio cible répond.

5 L'appel se termine en l'absence d'activité vocale pendant une période prédéterminée.Une brève tonalité est émise. L'écran affiche `Appel terminé`.

L'appelant et le destinataire peuvent mettre fin à un appel individuel en cours en appuyant sur .

5.6.3.2

Lancement d'un appel individuel avec un bouton d'accès direct

La fonction Appel en accès direct permet de lancer aisément un appel individuel vers un alias ou un ID d'appel individuel. Cette fonction peut être attribuée à une pression brève ou prolongée d'un bouton programmable.

Vous ne pouvez affecter qu'un seul alias ou ID à un bouton Appel en accès rapide. Plusieurs boutons peuvent être programmés pour utiliser les boutons Appel en accès direct via une seule touche.

1 Appuyer sur le bouton d'**accès direct** programmé pour lancer un appel individuel vers l'alias ou l'ID d'appel individuel.

2 Appuyez sur le bouton **PTT** pour lancer l'appel.

La LED s'allume en vert fixe.

L'écran affiche l'alias ou l'ID d'appel individuel.

3 Attendez la fin de la tonalité Parler autorisé (si cette option est activée) et parlez distinctement dans le microphone.

4 Relâchez le bouton **PTT** pour écouter.

Lorsque la radio cible répond, la LED clignote en vert.

En l'absence d'activité vocale pendant une durée prédéterminée, la communication est automatiquement interrompue.

L'appelant et le destinataire peuvent mettre fin à un appel individuel en cours en appuyant sur .

5.6.3.3

Émission d'appels individuels à l'aide de la numérotation manuelle

Suivez la procédure ci-après pour passer des appels individuels sur votre radio à l'aide de la numérotation manuelle.

1 Appuyez sur OK pour accéder au menu.

2 Appuyez sur ▲ ou sur ▼ pour accéder au `répertoire`. Appuyez sur OK pour valider la sélection.

3 Appuyez sur ▲ ou sur ▼ pour accéder à l'option `Num. manuelle`. Appuyez sur OK pour valider la sélection.

4 Appuyez sur ▲ ou sur ▼ pour accéder à l'option `Numéro radio`. Appuyez sur OK pour valider la sélection.

5 Effectuez l'une des opérations suivantes :

- Saisissez l'ID du terminal radio, puis appuyez sur OK pour continuer.
- Modifiez l'ID du dernier terminal radio appelé, puis appuyez sur OK pour continuer.

6 Appuyez sur le bouton **PTT** pour lancer l'appel.

La LED passe au vert. L'écran affiche l'alias de destination.

7 Attendez la fin de la tonalité d'autorisation de parler (si cette fonction est activée) et parlez distinctement dans le microphone.

8 Relâchez le bouton **PTT** pour écouter.

La LED passe au vert lorsque la radio cible répond. L'écran affiche l'alias ou l'ID de l'utilisateur émetteur.

9 Si la fonction d'indication Canal libre est activée, vous entendrez une brève tonalité d'avertissement lorsque le bouton **PTT** de la radio émettrice est relâché. Cette tonalité confirme que le canal est libre

et que vous pouvez parler. Appuyez sur le bouton **PTT** pour répondre à l'appel.

L'appel se termine en l'absence d'activité vocale pendant une période prédéterminée.Une tonalité est émise.L'écran affiche `Appel terminé`.

5.6.3.4

Réception d'un appel individuel

Lorsque vous recevez des appels individuels configurés comme OACSU (Off Air Call Set-Up) :

- La LED clignote en vert.
- L'icône **Appel individuel** s'affiche dans le coin supérieur droit.
- La première ligne affiche l'alias de l'appelant.
- Votre radio active le son à nouveau et l'appel entrant est audible dans le haut-parleur.

REMARQUE:
En fonction de la configuration de votre radio, OACSU ou FOACSU (Full Off Air Call Set-Up), un accusé de réception de l'utilisateur peut être requis ou non pour répondre à des appels individuels.

En cas de configuration OACSU, votre radio désactive le mode silencieux et l'appel se connecte automatiquement.

5.6.3.5

Acceptation d'un appel individuel

Lorsque vous recevez des appels individuels configurés comme FOACSU (Full Off Air Call) :

- La LED clignote en vert.
- L'icône **Appel individuel** s'affiche dans le coin supérieur droit.
- La première ligne affiche l'alias de l'appelant.

1. Pour accepter un appel individuel configuré comme FOACSU, effectuez l'une des opérations suivantes :

- Appuyez sur ▲ ou ▼ pour accéder à l'option `Accepter` et appuyez sur OK pour répondre à un appel individuel.
- Appuyez sur le bouton **PTT** d'une entrée.

La LED passe au vert.

2 Attendez la fin de la tonalité d'autorisation de parler (si cette fonction est activée) et parlez distinctement dans le microphone.

3 Relâchez le bouton **PTT** pour écouter.

L'appel se termine en l'absence d'activité vocale pendant une période prédéterminée.Une tonalité est émise. L'écran affiche `Appel terminé`.

REMARQUE:
L'appelant et le destinataire peuvent mettre fin à un appel individuel en cours en appuyant sur ↩.

5.6.3.6

Refus d'un appel individuel

Lorsque vous recevez des appels individuels configurés comme FOACSU (Full Off Air Call) :

- La LED clignote en vert.
- L'icône **Appel individuel** s'affiche dans le coin supérieur droit.
- La première ligne affiche l'alias de l'appelant.

Pour refuser un appel individuel configuré comme FOACSU, effectuez l'une des opérations suivantes :

- Appuyez sur ▲ ou ▼ pour accéder à l'option `Rejeter` et appuyez sur OK pour refuser un appel individuel.
- Appuyez sur ↩ pour refuser un appel individuel.

5.6.4

Appels généraux

Un appel général est un appel passé par une radio individuelle à toutes les radios du site ou toutes les radios d'un groupe de sites, selon la configuration du système.

Un appel général permet de diffuser des annonces importantes dont les utilisateurs doivent tenir compte. Les utilisateurs du système ne peuvent pas répondre à un appel général.

Capacity Max prend en charge l'appel général de site et l'appel général multisite. L'administrateur système peut configurer un ou les deux types d'appels sur votre radio.

REMARQUE:
Les terminaux radio peuvent prendre en charge les appels généraux système, mais l'infrastructure Motorola Solutions ne prend pas en charge les appels généraux système.

5.6.4.1

Émission d'appels généraux

Votre radio doit être programmée pour que vous puissiez lancer un appel général. Suivez la procédure ci-après pour passer des appels généraux sur votre radio.

1 Sélectionnez un canal avec l'alias ou l'ID du groupe Appel général actif. Voir Sélection d'un type d'appel à la page 73.

2 Appuyez sur le bouton **PTT** pour lancer l'appel.

La LED passe au vert.L'écran affiche l'icône **Appel de groupe** et la mention `Appel général`, `Appel général de site` ou `Appel multi-site` en fonction du type de configuration.

3 Effectuez l'une des opérations suivantes :

- Attendez la fin de la tonalité d'autorisation de parler (si cette fonction est activée) et parlez distinctement dans le microphone.
- Attendez la fin de la tonalité locale **PTT** (si cette option est activée) et parlez distinctement dans le microphone.

Les utilisateurs du canal ne peuvent pas répondre à un appel général.

L'appelant peut appuyer sur pour mettre fin à l'appel général.

5.6.4.2

Réception d'appels généraux

Lorsque vous recevez un appel général, les événements suivants se produisent :

- Une tonalité est émise.
- La LED clignote en vert.
- L'icône **Appel de groupe** s'affiche dans le coin supérieur droit de l'écran.
- La première ligne affiche l'ID de l'alias de l'appelant.
- La deuxième ligne affiche la mention `Appel général`, `Appel général de site` ou `Appel multi-site` en fonction du type de configuration.
- Votre radio active le son à nouveau et l'appel entrant est audible dans le haut-parleur.

Une fois l'appel général terminé, la radio revient au menu affiché avant sa réception.

Si la fonction d'indication de canal libre est activée, vous entendrez une brève tonalité d'alerte au moment où le bouton **PTT** de la radio en émission sera relâché. Cette tonalité confirme que le canal est libre et que vous pouvez parler. Vous ne pouvez pas répondre à un appel général.

REMARQUE:
Si vous changez de canal pendant la réception d'un appel général, il sera interrompu. Vous ne pouvez pas naviguer dans les menus, ni apporter de modification, avant la fin d'un appel général.

5.6.5

Appels téléphoniques

Un appel téléphonique est un appel émis depuis une radio individuelle vers un téléphone.

Dans Capacity Max, votre radio est capable de recevoir des appels et des réponses, même si la fonction Appel téléphonique est désactivée.

La fonction Appel téléphonique peut être activée en attribuant et en configurant des numéros de téléphone sur le système. Consultez votre administrateur système pour déterminer comment la radio a été programmée.

5.6.5.1

Émission d'appels téléphoniques à l'aide du bouton programmable Téléphone

Suivez la procédure ci-après pour passer un appel téléphonique à l'aide du bouton programmable Téléphone.

1 Appuyez sur le bouton **Téléphone** préprogrammé pour accéder à la liste d'entrées de téléphone.

2 Appuyez sur ▲ ou sur ▼ pour accéder à l'alias ou à l'ID souhaité.Appuyez sur OK pour valider la sélection.

- La LED passe au vert. L'icône **Appel téléphonique** s'affiche dans le coin supérieur droit. La première ligne affiche l'alias du terminal radio. La deuxième ligne affiche l'état de l'appel.
- Si la configuration s'est effectuée correctement, la tonalité DTMF (multifréquence à deux tonalités) est émise. Vous entendez la tonalité de numérotation de l'utilisateur du téléphone. La première ligne affiche l'alias du terminal radio. L'icône **Appel téléphonique** reste affichée dans le coin supérieur droit. La deuxième ligne affiche l'état de l'appel.
- Si la configuration échoue, une tonalité est émise et l'écran affiche `Appel tél. échoué`. Votre radio revient à l'écran de saisie du code d'accès. Si le code d'accès a été préconfiguré dans le répertoire, la radio revient à l'écran affiché avant de lancer l'appel.

3 Appuyez sur le bouton **PTT** pour parler. Relâchez le bouton **PTT** pour écouter.

4 Appuyez sur pour mettre fin à l'appel.

- La tonalité DTMF (multifréquence à deux tonalités) est émise et l'écran affiche `Fin Appel tél.`
- Si la configuration de la fin d'appel s'est effectuée correctement, une tonalité est émise et l'écran affiche `Appel terminé`.
- Si la configuration de la fin d'appel échoue, votre radio revient à l'écran Appel téléphonique. Répétez étape 3 et étape 4 ou attendez que l'utilisateur du téléphone mette fin à l'appel.

- Si vous appuyez sur le bouton **PTT** lorsque l'écran Contacts téléphonique est affiché, une tonalité est émise et l'écran affiche `Appuyer sur OK pour appeler`.
- lorsque l'utilisateur met fin à l'appel, une tonalité est émise et l'écran affiche `Appel terminé`.

REMARQUE:

pendant l'accès au canal, appuyez sur pour rejeter la tentative d'appel. Une tonalité retentit.

pendant l'appel, si vous appuyez sur la touche **Accès direct** à laquelle est attribué le code de libération ou si vous entrez le code de libération comme chiffres supplémentaires, votre radio tente de mettre fin à l'appel.

5.6.5.2

Réponse aux appels téléphoniques en appels de groupe

Suivez la procédure ci-après pour répondre aux appels téléphoniques en appels de groupe sur votre radio.

Lorsque vous recevez un appel téléphonique en appel de groupe :

- L'icône **Appel téléphonique** s'affiche dans le coin supérieur droit de l'écran.
- L'écran affiche `Appel`.
- La LED clignote en vert.
- Votre radio active le son à nouveau et l'appel entrant est audible dans le haut-parleur.

1. Appuyez sur le bouton **PTT** pour répondre à l'appel.
2. Relâchez le bouton **PTT** pour écouter.
3. Appuyez sur pour mettre fin à l'appel.

   L'écran affiche `Fin Appel tél.`

   REMARQUE:
   Si la fonction Appel téléphonique n'est pas activée sur votre radio, la radio ne parvient pas à terminer un appel téléphonique en appel de groupe. L'utilisateur du téléphone doit mettre fin à l'appel. L'utilisateur destinataire est uniquement autorisé à répondre pendant l'appel.

Si l'appel se termine correctement :

- Une tonalité est émise.
- L'écran affiche `Appel terminé`.

Si la fin d'appel échoue, votre radio revient à l'écran Appel téléphonique. Répétez les étape 3 ou attendez que l'utilisateur du téléphone mette fin à l'appel.

5.6.5.3

Réponse aux appels téléphoniques en appels généraux

Lorsque vous recevez un appel téléphonique en appel général, la radio réceptrice ne parvient pas à émettre ni à répondre. L'utilisateur destinataire n'est également pas autorisé à mettre fin à l'appel général.

Lorsque vous recevez un appel téléphonique en appel général :

- L'icône **Appel téléphonique** s'affiche dans le coin supérieur droit de l'écran.
- L'écran affiche la mention `Appel général`, `Appel général de site` ou `Appel multi-site` en fonction du type de configuration, ainsi que `Appel tél.`
- La LED clignote en vert.
- Votre radio active le son à nouveau et l'appel entrant est audible dans le haut-parleur.

5.6.5.4

Réponse aux appels téléphoniques en appels individuels

Suivez la procédure ci-après pour répondre aux appels téléphoniques en appels individuels sur votre radio.

Lorsque vous recevez un appel téléphonique en appel individuel :

- L'icône **Appel téléphonique** s'affiche dans le coin supérieur droit de l'écran.
- L'écran affiche `Appel`.
- La LED clignote en vert.
- Votre radio active le son à nouveau et l'appel entrant est audible dans le haut-parleur.

1 Appuyez sur le bouton **PTT** pour répondre à l'appel.

2 Relâchez le bouton **PTT** pour écouter.

3 Appuyez sur pour mettre fin à l'appel.

L'écran affiche `Fin Appel tél.`

REMARQUE:
Si la fonction Appel téléphonique n'est pas activée sur votre radio, la radio ne parvient pas à terminer un appel téléphonique en appel individuel. L'utilisateur du téléphone doit mettre fin à l'appel. L'utilisateur destinataire est uniquement autorisé à répondre pendant l'appel.

Si l'appel se termine correctement :

- Une tonalité est émise.
- L'écran affiche `Appel terminé`.

Si la fin d'appel échoue, votre radio revient à l'écran Appel téléphonique. Répétez les étape 3 ou attendez que l'utilisateur du téléphone mette fin à l'appel.

5.6.6

Préemption des appels

La préemption des appels permet à une radio de cesser toute transmission vocale en cours et de lancer une transmission prioritaire.

Avec la fonctionnalité Préemption des appels, le système interrompt et préempte les appels en cours dans les cas où les canaux à ressources partagées sont indisponibles.

Les appels de priorité supérieure comme les appels d'urgence ou les appels généraux préemptent la radio en émission afin de répondre à l'appel de priorité supérieure. Si aucun autre canal de radiofréquence (RF) n'est disponible, un appel d'urgence préempte un appel général également.

5.6.7

Interruption vocale

L'interruption vocale permet à l'utilisateur d'arrêter une transmission vocale en cours.

Cette fonctionnalité utilise la signalisation de canal de retour pour arrêter la transmission vocale en cours d'une radio, si la radio à l'origine de l'interruption est configurée pour l'interruption vocale et si la radio en émission est configurée pour être interrompue en appel vocal. La radio à

l'origine de l'interruption est ensuite autorisée à émettre une transmission vocale vers le participant dont l'appel a été arrêté.

La fonctionnalité d'interruption vocale améliore de façon significative la probabilité de réussite d'une nouvelle transmission aux parties concernées lorsqu'un appel est en cours.

L'interruption vocale est accessible à l'utilisateur uniquement si cette fonctionnalité a été configurée sur la radio. Consultez votre fournisseur ou administrateur système pour en savoir plus.

5.6.7.1

Activation de l'interruption vocale

Suivez la procédure ci-après pour lancer l'interruption vocale sur votre radio.

Vous devez programmer votre radio pour pouvoir utiliser cette fonction. Consultez votre fournisseur ou administrateur système pour en savoir plus.

1 Pour interrompre la transmission lors d'un appel en cours, appuyez sur le bouton **PTT**.

   L'écran de la radio interrompue affiche le texte `Appel interrompu`. La radio émet une tonalité d'indication négative jusqu'à ce que le bouton **PTT** soit relâché.

2 Attendez l'accusé de réception.

   Si l'opération réussit :

   - Une tonalité d'indication positive est émise.

   Si l'opération échoue :

   - Une tonalité d'indication négative est émise.

3 Effectuez l'une des opérations suivantes :

   - Attendez la fin de la tonalité d'autorisation de parler (si cette fonction est activée) et parlez distinctement dans le microphone.
   - Attendez la fin de la tonalité locale **PTT** (si cette option est activée) et parlez distinctement dans le microphone.

5.7

Fonctions avancées

Ce chapitre indique comment utiliser les fonctions disponibles sur votre radio.

Votre revendeur ou administrateur système peut avoir adapté votre radio à vos besoins spécifiques. Consultez votre fournisseur ou administrateur système pour en savoir plus.

5.7.1

File d'attente des appels

Lorsqu'aucune ressource n'est disponible pour traiter un appel, la file d'attente des appels permet de placer la demande d'appel dans la file d'attente du système, pour les prochaines ressources disponibles.

Si vous appuyez sur le bouton **PTT**, vous entendez une tonalité de file d'attente des appels indiquant que la radio est passé à l'état File d'attente des appels. Vous pouvez relâcher le bouton **PTT** lorsque vous entendez la tonalité de file d'attente des appels.

Si la configuration s'est effectuée correctement, la situation suivante se produit :

- La LED clignote en vert.
- Si cette option est activée, la tonalité Parler autorisé retentit.
- L'écran affiche l'icône, l'ID ou l'alias du type d'appel.
- L'utilisateur radio dispose de 4 secondes pour appuyer sur le bouton **PTT** et lancer la transmission vocale.

Si la configuration échoue, la situation suivante se produit :

- Si cette option est activée, la tonalité de rejet retentit.
- L'écran affiche momentanément une notification d'échec.
- L'appel est interrompu et la radio quitte la configuration d'appel.

5.7.2

Balayage de groupe de parole

Cette fonctionnalité permet à votre radio de surveiller et de rejoindre les appels des groupes définis dans une liste de groupes de réception.

Lorsque le balayage est activé, l'icône de balayage apparaît dans la barre d'état et la LED clignote en jaune. Votre radio active le son pour les membres figurant dans sa liste de groupes de réception.

Lorsque le balayage est désactivé, votre radio ne reçoit aucune transmission des membres de la liste de groupes de réception, à l'exception des appels généraux et du groupe de parole sélectionné.

REMARQUE:
Il est possible de configurer le balayage de groupe de parole à l'aide de CPS. Consultez votre administrateur système pour déterminer comment la radio a été programmée.

5.7.2.1

Activation ou désactivation du balayage de groupe de parole

Pour activer ou désactiver le balayage de groupe de parole sur votre radio, procédez comme suit.

1 Appuyez sur OK pour accéder au menu.

2 Appuyez sur ▲ ou sur ▼ pour accéder à l'option `Balayage`. Appuyez sur OK pour valider la sélection.

3 Effectuez l'une des opérations suivantes :

- Appuyez sur ▲ ou sur ▼ pour accéder à l'option `Activer`. Appuyez sur OK pour valider la sélection.
- Appuyez sur ▲ ou sur ▼ pour accéder à l'option `Désactiver`. Appuyez sur OK pour valider la sélection.

Si le balayage est activé :

- L'écran affiche `Scan Activé` ainsi que l'icône **Balayage**.
- La LED clignote en jaune.
- Une tonalité d'indication positive est émise.

Si le balayage est désactivé :

- L'écran affiche `Scan Désactivé`.
- L'icône **Balayage** disparaît.
- La LED s'éteint.
- Une tonalité d'indication négative est émise.

5.7.3

Liste de groupes de réception

La fonctionnalité Liste de groupes de réception vous permet de créer et d'attribuer des membres dans la liste de balayage de groupe de parole.

Cette liste est créée lorsque vous radio est programmée. Elle détermine les groupes pouvant faire l'objet d'un balayage. Votre radio peut prendre en charge un maximum de 16 membres dans cette liste.

Si votre radio a été programmée pour modifier la liste de balayage, vous pouvez :

- Ajouter/supprimer des groupes de parole.
- Ajouter, supprimer et/ou modifier la priorité des groupes de parole. Reportez-vous au Modification de la priorité pour un groupe de discussion à la page 98.
- Ajouter, supprimer et/ou modifier les groupes de parole d'affiliation. Reportez-vous à la Ajout d'une affiliation à un groupe de parole à la page 100 et à la Suppression de l'affiliation d'un groupe de parole à la page 101.
- Remplacer la liste de balayage existante par une autre.

IMPORTANT:
Pour que vous puissiez ajouter un membre à la liste, le groupe de parole doit avoir été configuré dans la radio.

REMARQUE:
La liste de groupes de réception est programmée par l'administrateur système. Consultez votre fournisseur ou administrateur système pour en savoir plus.

5.7.4

Écoute prioritaire

La fonctionnalité Écoute prioritaire permet à la radio de recevoir automatiquement les transmissions des groupes de parole de priorité supérieure, même lorsqu'elle participe à un appel de groupe de parole.

La radio quitte un appel de groupe de parole de priorité inférieure pour un appel de groupe de parole de priorité supérieure.

REMARQUE:
Il est possible d'accéder à cette fonctionnalité uniquement lorsque la fonction Balayage de groupe de parole est activée.

La fonctionnalité Écoute prioritaire s'applique uniquement aux membres de la liste de groupes de réception. Il existe deux groupes de parole prioritaires : Priorité 1 (P1) et Priorité 2 (P2). P1 est prioritaire sur P2. Dans un système Capacity Max, la radio reçoit les transmissions en fonction de l'ordre de priorité ci-dessous :

1. Appel d'urgence pour le groupe de parole P1
2. Appel d'urgence pour le groupe de parole P2
3. Appel d'urgence pour les groupes de parole non prioritaires de la liste de groupes de réception
4. Appel général
5. Appel du groupe de parole P1
6. Appel du groupe de parole P2
7. Groupes de parole non prioritaires de la liste de groupes de réception

Pour plus d'informations sur la procédure à suivre pour ajouter, supprimer et/ou modifier la priorité des groupes de parole de la liste de balayage, reportez-vous à la section Modification de la priorité pour un groupe de discussion à la page 98.

REMARQUE:
Cette fonctionnalité est programmée par l'administrateur système. Consultez votre fournisseur ou administrateur système pour en savoir plus.

5.7.4.1

Modification de la priorité pour un groupe de discussion

Dans le menu Balayage de groupe de parole, vous pouvez afficher ou modifier la priorité d'un groupe de parole.

1. Appuyez sur OK pour accéder au menu.
2. Appuyez sur ▲ ou sur ▼ pour accéder à l'option `Balayage`. Appuyez sur OK pour valider la sélection.
3. Appuyez sur ▲ ou sur ▼ pour accéder à l'option `Voir/Modif liste`. Appuyez sur OK pour valider la sélection.

4 Appuyez sur ▲ ou sur ▼ pour accéder au groupe de parole souhaité. Appuyez sur OK pour valider la sélection.

La priorité actuelle est indiquée par une icône **Priorité 1** ou **Priorité 2** en regard du groupe de parole.

5 Appuyez sur ▲ ou sur ▼ pour accéder à l'option `Modif. priorité`. Appuyez sur OK pour valider la sélection.

6 Appuyez sur ▲ ou sur ▼ pour accéder au niveau de priorité souhaité. Appuyez sur OK pour valider la sélection.

Si l'icône Priorité 1 ou Priorité 2 a été attribuée à un autre groupe de parole, vous pouvez choisir de remplacer la priorité actuelle. Lorsque l'écran affiche `Remplacer existant ?`, appuyez sur ▲ ou sur ▼ pour accéder aux options suivantes :

- `Non` pour revenir à l'étape précédente.
- `Oui` pour confirmer le remplacement.

L'écran affiche un mini-avis positif, puis revient à l'écran précédent. L'icône de priorité apparaît en regard du groupe de parole.

5.7.5

Affiliation à plusieurs groupes de parole

Dans un système Capacity Max, votre radio peut être configurée pour prendre en charge jusqu'à sept groupes de parole sur un site.

Parmi les 16 groupes de parole figurant dans la liste de groupes de réception, il est possible d'attribuer jusqu'à sept groupes de parole comme groupes de parole d'affiliation. Le groupe de parole sélectionné et les groupes de parole prioritaires sont automatiquement affiliés.

REMARQUE:
Cette fonctionnalité est programmée par l'administrateur système. Consultez votre fournisseur ou administrateur système pour en savoir plus.

5.7.5.1

Ajout d'une affiliation à un groupe de parole

Pour ajouter une affiliation à un groupe de parole, procédez comme suit.

1 Appuyez sur OK pour accéder au menu.

2 Appuyez sur ▲ ou sur ▼ pour accéder à l'option Balayage. Appuyez sur OK pour valider la sélection.

3 Appuyez sur ▲ ou sur ▼ pour accéder à l'option Voir/Modif liste. Appuyez sur OK pour valider la sélection.

4 Appuyez sur ▲ ou sur ▼ pour accéder à l'alias ou à l'ID de groupe de parole souhaité. Appuyez sur OK pour valider la sélection.

L'état d'affiliation s'affiche lorsque vous sélectionnez Voir/Modif liste. ● apparaît en regard de l'alias ou de l'ID de groupe de parole sélectionné.

5 Appuyez sur ▲ ou sur ▼ pour accéder à l'option Modifier l'affiliation. Appuyez sur OK pour valider la sélection.

6 Effectuez l'une des opérations suivantes :

- Appuyez sur ▲ ou sur ▼ pour accéder à l'option Activé. Appuyez sur OK pour valider la sélection.
- Appuyez sur ▲ ou sur ▼ pour accéder à l'option Désactivé. Appuyez sur OK pour valider la sélection.

Lorsque l'option Activé est sélectionnée, ● apparaît en regard de l'alias ou de l'ID de groupe de parole.

En cas de réussite de l'affiliation, ✓ apparaît en regard de l'alias ou de l'ID de groupe de parole sélectionné.

En cas d'échec de l'affiliation, ■ reste affiché en regard de l'alias ou de l'ID de groupe de parole.

REMARQUE:
La radio affiche `Liste pleine` lorsque sept groupes de parole au maximum sont sélectionnés pour l'affiliation dans la liste de balayage. Pour sélectionner un nouveau groupe de parole pour l'affiliation, supprimez un groupe de parole affilié existant afin de libérer de la place pour le nouveau groupe. Reportez-vous à la section Suppression de l'affiliation d'un groupe de parole à la page 101 pour plus d'informations.

5.7.5.2

Suppression de l'affiliation d'un groupe de parole

Lorsque la liste d'affiliation est pleine et que vous souhaitez sélectionner un nouveau groupe de parole à affilier, supprimez un groupe de parole affilié existant pour libérer de la place pour le nouveau groupe. Pour supprimer l'affiliation d'un groupe de parole, procédez comme suit.

1. Appuyez sur OK pour accéder au menu.
2. Appuyez sur ▲ ou sur ▼ pour accéder à l'option `Balayage`. Appuyez sur OK pour valider la sélection.
3. Appuyez sur ▲ ou sur ▼ pour accéder à l'option `Voir/Modif liste`. Appuyez sur OK pour valider la sélection.
4. Appuyez sur ▲ ou sur ▼ pour accéder à l'alias ou à l'ID de groupe de parole souhaité. Appuyez sur OK pour valider la sélection.

   L'état d'affiliation s'affiche lorsque vous sélectionnez `Voir/Modif liste`. ■ apparaît en regard de l'alias ou de l'ID de groupe de parole sélectionné.
5. Appuyez sur ▲ ou sur ▼ pour accéder à l'option `Modifier l'affiliation`. Appuyez sur OK pour valider la sélection.

6 Appuyez sur ▲ ou sur ▼ pour accéder à l'option Désactivé. Appuyez sur OK pour valider la sélection.

Lorsque l'option Désactivé est sélectionnée, ● n'apparaît plus en regard de l'alias ou de l'ID de groupe de parole.

5.7.6

Réponse

La fonctionnalité Réponse vous permet de répondre à une émission pendant un balayage.

Si votre radio balaie un appel à partir de la liste de balayage de groupe sélectionnable et si vous appuyez sur le bouton **PTT** pendant le balayage de l'appel, le fonctionnement de la radio varie selon si la fonctionnalité Réponse a été activée ou désactivée pendant la programmation de la radio. Consultez votre fournisseur ou administrateur système pour en savoir plus.

Réponse désactivée

La radio quitte l'appel balayé et tente d'émettre au contact pour la position de canal actuellement sélectionnée. Une fois que le temps de maintien sur le contact actuellement sélectionné expire, la radio revient au canal d'accueil et démarre le compteur de temps de maintien du balayage. La radio reprend le balayage de groupe après l'expiration du compteur de temps de maintien du balayage.

Réponse activée

Si vous appuyez sur le bouton **PTT** pendant le temps de maintien de groupe de l'appel balayé, la radio tente d'émettre au groupe balayé.

REMARQUE:
Si vous balayez un appel pour un groupe qui n'est pas attribué à une position de canal dans la zone actuellement sélectionnée, et si l'appel se termine, basculez vers la zone appropriée, puis sélectionnez la position de canal du groupe pour répondre à ce groupe.

5.7.7

Bluetooth

Cette fonction vous permet d'utiliser votre radio avec un appareil (accessoire) Bluetooth par le biais d'une connexion Bluetooth. Votre radio prend en charge les

dispositifs Bluetooth de marque Motorola Solutions et d'autres marques disponibles sur le marché.

Le Bluetooth offre une portée de 10 m avec une visibilité directe. Pour bénéficier de cette portée, aucun obstacle ne doit gêner la communication entre votre radio et votre appareil Bluetooth. Pour assurer une fiabilité optimale, Motorola Solutions recommande de ne pas séparer la radio et l'accessoire.

Lorsque la limite de réception approche, la voix et la qualité sonore se détériorent et les hachures sont de plus en plus fréquentes. Pour corriger ce problème, rapprochez votre radio et votre appareil Bluetooth (à moins de 10 m) afin de retrouver une bonne réception. La fonction Bluetooth de votre radio présente une puissance maximale de 2,5 mW (4 dBm) sur 10 m.

Votre radio peut prendre en charge jusqu'à trois connexions Bluetooth simultanées avec différents types d'appareils Bluetooth. Par exemple, une oreillette, un scanner et un dispositif PTT. Des connexions avec plusieurs appareils Bluetooth d'un même type ne sont pas possibles.

Reportez-vous au manuel d'utilisation de votre appareil Bluetooth pour obtenir plus de détails sur toutes ses fonctionnalités.

Votre radio se connecte à l'appareil compatible Bluetooth à portée et dont la puissance de signal est la plus forte ou qui a déjà été connecté à la radio dans une session précédente. N'éteignez pas votre appareil compatible Bluetooth ou n'appuyez pas sur le bouton de retour à l'accueil pendant la recherche et la connexion, car cela risque d'annuler l'opération.

5.7.7.1
Activation et désactivation de la radio Bluetooth

Pour activer et désactiver le Bluetooth, procédez comme suit.

1. Appuyez sur OK pour accéder au menu.
2. Appuyez sur ▲ ou ▼ pour accéder à l'option `Bluetooth`. Appuyez sur OK pour valider la sélection.

3 Appuyez sur ▲ ou ▼ pour accéder à l'option Mon état. Appuyez sur OK pour valider la sélection.

L'écran affiche Activé et Désactivé. L'état actuel est indiqué par un symbole ✓ .

4 Sélectionnez l'une des options suivantes :

- Appuyez sur ▲ ou sur ▼ pour accéder à l'option Activé. Appuyez sur OK pour valider la sélection. L'écran affiche ✓ en regard de l'option Activé.
- Appuyez sur ▲ ou sur ▼ pour accéder à l'option Désactivé. Appuyez sur OK pour valider la sélection. L'écran affiche ✓ en regard de l'option Désactivé.

5.7.7.2

Connexion à des appareils Bluetooth

Pour vous connecter à des appareils Bluetooth, procédez comme suit.

Allumez votre appareil Bluetooth et mettez-le en mode Appariement.

1 Appuyez sur OK pour accéder au menu.

2 Appuyez sur ▲ ou ▼ pour accéder à l'option Bluetooth. Appuyez sur OK pour valider la sélection.

3 Appuyez sur ▲ ou ▼ pour accéder à l'option Appareils. Appuyez sur OK pour valider la sélection.

4 Effectuez l'une des opérations suivantes :

- Appuyez sur ▲ ou ▼ pour accéder à l'appareil souhaité. Appuyez sur OK pour valider la sélection.
- Appuyez sur ▲ ou ▼ pour accéder à l'option Trouver des appareils et localiser les appareils disponibles. Appuyez sur ▲ ou ▼

pour accéder à l'appareil souhaité. Appuyez sur OK pour valider la sélection.

5 Appuyez sur ▲ ou ▼ pour accéder à l'option `Connecter`. Appuyez sur OK pour valider la sélection.

D'autres étapes peuvent être nécessaires sur votre appareil Bluetooth pour terminer l'appariement avec votre radio. Reportez-vous au manuel d'utilisation de votre appareil Bluetooth.

L'écran affiche `Connexion à <appareil>`.

Attendez l'accusé de réception.
Si l'opération réussit :

- Une tonalité d'indication positive est émise.
- L'écran affiche `<Appareil> connecté` ainsi que l'icône **Connexion Bluetooth**.
- L'écran affiche ✓ en regard de l'appareil connecté.

Si l'opération échoue :

- Une tonalité d'indication négative est émise.
- L'écran affiche `Connexion échouée`.

5.7.7.3

Connexion à des appareils Bluetooth en mode Détectable

Pour vous connecter à des appareils Bluetooth en mode Détectable, procédez comme suit.

Allumez votre appareil Bluetooth et mettez-le en mode Appariement.

1 Appuyez sur OK pour accéder au menu.

2 Appuyez sur ▲ ou ▼ pour accéder à l'option `Bluetooth`. Appuyez sur OK pour valider la sélection.

3 Appuyez sur ▲ ou ▼ pour accéder à l'option `Trouvez-moi`. Appuyez sur OK pour valider la sélection. Votre radio est détectable par d'autres appareils Bluetooth compatibles pour une durée programmée. Il s'agit du mode Détectable.

Attendez l'accusé de réception.
Si l'opération réussit :

- Une tonalité d'indication positive est émise.
- L'écran affiche `<Appareil> connecté` et l'icône **Bluetooth connecté**.
- L'écran affiche ✓ en regard de l'appareil connecté.

Si l'opération échoue :

- Une tonalité d'indication négative est émise.
- L'écran affiche `Connexion échouée`.

5.7.7.4

Déconnexion d'appareils Bluetooth

Pour vous déconnecter d'appareils Bluetooth, procédez comme suit.

1 Appuyez sur OK pour accéder au menu.

2 Appuyez sur ▲ ou ▼ pour accéder à l'option `Bluetooth`. Appuyez sur OK pour valider la sélection.

3 Appuyez sur ▲ ou ▼ pour accéder à l'option `Appareils`. Appuyez sur OK pour valider la sélection.

4 Appuyez sur ▲ ou ▼ pour accéder à l'appareil souhaité. Appuyez sur OK pour valider la sélection.

5 Appuyez sur ▲ ou ▼ pour accéder à l'option `Déconnecter`. Appuyez sur OK pour valider la sélection.

L'écran affiche `Déconnexion... <Appareil>`.

Attendez l'accusé de réception.

- Une tonalité est émise.
- L'écran affiche `<Appareil> déconnecté` et l'icône **Bluetooth connecté** disparaît.
- Le symbole ✓ disparaît en regard de l'appareil connecté.

5.7.7.5

Basculement du routage audio entre le haut-parleur interne de la radio et l'appareil Bluetooth

Suivez la procédure ci-après pour basculer le routage audio entre le haut-parleur interne de la radio et l'appareil Bluetooth externe.

Appuyez sur le bouton programmé **Commutateur audio Bluetooth**.

L'écran affiche l'un des résultats suivants :

- Une tonalité est émise. L'écran affiche `Acheminer l'audio vers la radio.`
- Une tonalité est émise. L'écran affiche `Acheminer l'audio vers le Bluetooth.`

5.7.7.6

Affichage des détails de l'appareil

Pour afficher les détails de l'appareil sur votre radio, procédez comme suit.

1. Appuyez sur OK pour accéder au menu.
2. Appuyez sur ▲ ou ▼ pour accéder à l'option `Bluetooth`. Appuyez sur OK pour valider la sélection.
3. Appuyez sur ▲ ou ▼ pour accéder à l'option `Appareils`. Appuyez sur OK pour valider la sélection.
4. Appuyez sur ▲ ou ▼ pour accéder à l'appareil souhaité. Appuyez sur OK pour valider la sélection.
5. Appuyez sur ▲ ou ▼ pour accéder à l'option `Voir détails`. Appuyez sur OK pour valider la sélection.

5.7.7.7

Suppression du nom de l'appareil

Vous pouvez supprimer un appareil déconnecté de la liste des appareils Bluetooth.

1 Appuyez sur OK pour accéder au menu.

2 Appuyez sur ▲ ou ▼ pour accéder à l'option `Bluetooth`. Appuyez sur OK pour valider la sélection.

3 Appuyez sur ▲ ou ▼ pour accéder à l'option `Appareils`. Appuyez sur OK pour valider la sélection.

4 Appuyez sur ▲ ou ▼ pour accéder à l'appareil souhaité. Appuyez sur OK pour valider la sélection.

5 Appuyez sur ▲ ou sur ▼ pour accéder à l'option `Supprimer`. Appuyez sur OK pour valider la sélection. L'écran affiche `Appareil supprimé`.

5.7.7.8

Réglage des valeurs de gain du micro Bluetooth

Permet un contrôle de la valeur de gain du microphone des appareils Bluetooth connectés.

1 Appuyez sur OK pour accéder au menu.

2 Appuyez sur ▲ ou ▼ pour accéder à l'option `Bluetooth`. Appuyez sur OK pour valider la sélection.

3 Appuyez sur ▲ ou ▼ pour accéder à l'option `Gain micro BT`. Appuyez sur OK pour valider la sélection.

4 Appuyez sur ▲ ou ▼ pour accéder au type de gain micro BT et aux valeurs actuelles. Pour modifier les valeurs, appuyez sur OK pour effectuer la sélection.

5 Appuyez sur ▲ ou ▼ pour augmenter ou réduire des valeurs. Appuyez sur OK pour valider la sélection.

5.7.7.9

Mode détectable Bluetooth permanent

Le mode détectable Bluetooth permanent doit être activé par le revendeur ou votre administrateur système.

REMARQUE:
Si ce mode est activé, `Bluetooth` ne s'affiche **pas** dans le menu et vous ne pouvez pas utiliser les fonctionnalités du bouton programmable Bluetooth.

D'autres terminaux Bluetooth peuvent localiser votre radio, mais ne peuvent pas se connecter à la radio. Le mode détectable Bluetooth permanent permet aux appareils dédiés d'utiliser la position de votre radio dans le processus de localisation Bluetooth.

5.7.8

Localisation en intérieur

REMARQUE:
La fonctionnalité Localisation en intérieur s'applique pour les modèles dotés de la dernière version du logiciel et du matériel. Consultez votre fournisseur ou administrateur système pour en savoir plus.

La localisation en intérieur permet d'effectuer un suivi de la localisation des utilisateurs radio. Lorsque la localisation en intérieur est activée, la radio est en mode détectable limité. Des balises dédiées sont utilisées pour localiser la radio et déterminer sa position.

5.7.8.1

Activation ou désactivation de la localisation en intérieur

Vous pouvez activer ou désactiver la localisation en intérieur en procédant de l'une des manières suivantes.

- Accédez à cette fonction via le menu.

  a. Appuyez sur OK pour accéder au menu.

b. Appuyez sur ▲ ou ▼ pour accéder à l'option `Bluetooth` et appuyez sur OK pour sélectionner.

c. Appuyez sur ▲ ou ▼ pour accéder à l'option `Localisation en intérieur` et appuyez sur OK pour sélectionner.

d. Appuyez sur OK pour activer la localisation en intérieur.

   L'écran affiche `Localis. intér. activée`. Vous entendez une tonalité d'indication positive. L'un des événements suivants se produit.

   - En cas de réussite, l'icône Localisation en intérieur disponible s'affiche sur l'écran d'accueil.
   - En cas d'échec, l'écran affiche `Échec activation`. Une tonalité d'indication positive retentit.

e. Appuyez sur OK pour désactiver la localisation en intérieur.

   L'écran affiche `Localis. intér. désactivée`. Vous entendez une tonalité d'indication positive. L'un des événements suivants se produit.

   - En cas de réussite, l'icône Localisation en intérieur disponible disparaît de l'écran d'accueil.
   - En cas d'échec, l'écran affiche `Échec désactivation`. Une tonalité d'indication positive retentit.

- Accédez à cette fonctionnalité à l'aide du bouton programmable.

  a. Exercez une pression longue sur le bouton programmé **Localis. intér.** pour activer la localisation en intérieur.

     L'écran affiche `Localis. intér. activée`. Vous entendez une tonalité d'indication positive. L'un des événements suivants se produit.

     - En cas de réussite, l'icône Localisation en intérieur disponible s'affiche sur l'écran d'accueil.

- En cas d'échec, l'écran affiche `Échec activation`. En cas d'échec, une tonalité d'indication négative retentit.

b. Exercez une pression longue sur le bouton programmé **Localis. intér.** pour désactiver la localisation en intérieur.

L'écran affiche `Localis. intér. désactivée`. Vous entendez une tonalité d'indication positive. L'un des événements suivants se produit.

- En cas de réussite, l'icône Localisation en intérieur disponible disparaît de l'écran d'accueil.
- En cas d'échec, l'écran affiche `Échec désactivation`. En cas d'échec, une tonalité d'indication négative retentit.

5.7.8.2

Accès aux informations sur les balises de localisation en intérieur

Suivez la procédure ci-après pour accéder aux informations sur les balises de localisation en intérieur.

1. Appuyez sur OK pour accéder au menu.
2. Appuyez sur ▲ ou ▼ pour accéder à l'option `Bluetooth` et appuyez sur OK pour sélectionner.
3. Appuyez sur ▲ ou ▼ pour accéder à l'option `Localisation en intérieur` et appuyez sur OK pour sélectionner.
4. Appuyez sur ▲ ou ▼ pour accéder à l'option `Balises` et appuyez sur OK pour sélectionner.

L'écran affiche les informations relatives aux balises.

5.7.9

Commandes multisites

Ces fonctionnalités s'appliquent lorsque votre canal radio actuel est configuré sur un système Capacity Max.

5.7.9.1

Lancement d'une recherche de site manuelle

Suivez la procédure ci-après pour lancer une recherche manuelle de site lorsque la puissance du signal reçu est faible, afin d'essayer de trouver un site avec un meilleur signal.

1 Effectuez l'une des opérations suivantes :
   - Appuyez sur le bouton programmé d'**itinérance de site manuelle**. Ignorez les étapes suivantes.
   - Appuyez sur OK pour accéder au menu.

2 Appuyez sur ▲ ou sur ▼ pour accéder à l'option `Config/Infos`.Appuyez sur OK pour valider la sélection.

3 Appuyez sur ▲ ou sur ▼ pour accéder à l'option `Config. radio`.Appuyez sur OK pour valider la sélection.

4 Appuyez sur ▲ ou ▼ pour accéder à l'option `Itinérance de site`. Appuyez sur OK pour valider la sélection.

5 Appuyez sur ▲ ou ▼ pour accéder à l'option `Recherche active`. Appuyez sur OK pour valider la sélection.

   Une tonalité est émise.La LED clignote en vert.L'écran indique `Recherche de site`.

Si la radio détecte un nouveau site :

- Une tonalité d'indication positive est émise.
- La LED s'éteint.
- L'écran affiche `Site <Alias> trouvé`.

Si la radio ne parvient pas à trouver un nouveau site :

- Une tonalité d'indication négative est émise.

- La LED s'éteint.
- L'écran affiche `Hors de portée`.

Si un nouveau site est trouvé, mais que la radio ne parvient pas à s'y connecter :

- Une tonalité d'indication négative est émise.
- La LED s'éteint.
- L'écran affiche `Canal occupé`.

5.7.9.2

Site Lock On/Off

Lorsque cette fonction est activée, la radio effectue une recherche sur le site en cours uniquement. Lorsqu'elle est désactivée, la radio effectue une recherche sur les autres sites en plus du site en cours.

Appuyez sur le bouton programmé **Verrouillage site**.

Si la fonction **Verrou. site** est activée :

- Un signal sonore positif indique que la radio est verrouillée sur le site en cours.
- L'écran indique que le `site est verrouillé`.

Si la fonction **Verrou. site** est désactivée :

- Un signal sonore négatif indique que la radio n'est pas verrouillée.
- L'écran indique que le `site est déverrouillé`.

5.7.9.3

Accès à la liste des sites voisins

Cette fonctionnalité permet à l'utilisateur de vérifier la liste des sites adjacents du site d'accueil actuel. Suivez la procédure ci-après pour accéder à la liste des sites voisins :

1. Appuyez sur OK pour accéder au menu.
2. Appuyez sur ▲ ou sur ▼ pour accéder à l'option `Config/Infos`.Appuyez sur OK pour valider la sélection.

3 Appuyez sur ▲ ou ▼ pour accéder à l'option `Infos radio`. Appuyez sur OK pour valider la sélection.

4 Appuyez sur ▲ ou ▼ pour accéder à l'option `Sites voisins`. Appuyez sur OK pour valider la sélection.

5.7.10

Rappel de canal d'accueil

Cette fonctionnalité fournit un rappel lorsque la radio n'est pas définie sur le canal d'accueil pendant un certain laps de temps.

Si cette fonctionnalité est activée, lorsque votre radio n'est pas définie sur le canal d'accueil pendant un certain laps de temps, les événements suivants se produisent régulièrement :

- L'annonce et la tonalité de rappel de canal d'accueil sont émises.
- La première ligne de l'écran affiche `Non`.
- La deuxième ligne indique `Canal d'accueil`.

5.7.10.1

Désactivation du rappel de canal d'accueil

Lorsque le rappel du canal d'accueil se déclenche, vous pouvez le désactiver temporairement.

Appuyez sur le bouton programmable **Couper le rappel du canal d'accueil**.

La première ligne de l'écran indique `HCR` et la seconde ligne affiche `en sourdine`.

5.7.10.2

Définition de nouveaux canaux d'accueil

Lorsque le rappel de canal d'accueil se déclenche, vous pouvez définir un nouveau canal d'accueil.

1 Effectuez l'une des opérations suivantes :

- Appuyez sur le bouton programmable **Réinitialiser le canal d'accueil** pour définir le canal actuel en tant que nouveau canal d'accueil. Ignorez les étapes suivantes.

La première ligne de l'écran indique l'alias du canal et la seconde ligne affiche `Nouv. canal acc.`

- Appuyez sur OK pour accéder au menu.

2 Appuyez sur ▲ ou sur ▼ pour accéder à l'option `Config/Infos`.Appuyez sur OK pour valider la sélection.

3 Appuyez sur ▲ ou sur ▼ pour accéder à l'option `Config. radio`.Appuyez sur OK pour valider la sélection.

4 Appuyez sur ▲ ou ▼ pour accéder à l'option `Canal d'accueil`. Appuyez sur OK pour valider la sélection.

5 Appuyez sur ▲ ou ▼ pour accéder à l'alias du nouveau canal d'accueil. Appuyez sur OK pour valider la sélection.

L'écran affiche ✓ en regard de l'alias du canal d'accueil sélectionné.

5.7.11
Remote Monitor

Cette fonctionnalité est utilisée pour mettre sous tension le microphone d'une radio cible avec un ID ou un alias de terminal. Vous pouvez utiliser cette fonction pour écouter à distance l'activité dans l'environnement de la radio cible.

La radio et la radio cible doivent être programmées pour pouvoir utiliser cette fonctionnalité.

Si elle est lancée, la LED verte clignote une fois sur la radio cible. L'écoute à distance s'arrête automatiquement après une durée préprogrammée ou lorsque la radio écoutée est utilisée.

5.7.11.1

Déclenchement de l'Écoute ambiance

Suivez la procédure ci-après pour déclencher une écoute à distance sur votre radio.

1 Appuyez sur le bouton préprogrammé **Écoute ambiance**.

2 Appuyez sur ▲ ou sur ▼ pour accéder à l'alias ou à l'ID souhaité.Appuyez sur OK pour valider la sélection.

L'écran affiche un mini-avis de transition, indiquant que la requête est en cours. La LED passe au vert.

3 Attendez l'accusé de réception.

Si l'opération réussit :

- Une tonalité d'indication positive est émise.
- L'écran affiche un mini-avis positif.
- Des signaux audio sont émis sur la radio écoutée à distance pendant une durée préprogrammée, tandis que l'écran affiche `Écoute amb.` Lorsque le délai programmé expire, une tonalité d'avertissement est émise et la LED s'éteint.

Si l'opération échoue :

- Une tonalité d'indication négative est émise.
- L'écran affiche un mini-avis négatif.

5.7.11.2

Déclenchement de l'écoute d'ambiance à l'aide du répertoire

Suivez la procédure ci-après pour déclencher une écoute à distance sur votre radio à l'aide du répertoire.

1 Appuyez sur OK pour accéder au menu.

2 Appuyez sur ▲ ou sur ▼ pour accéder au `répertoire`.Appuyez sur OK pour valider la sélection.

3 Appuyez sur ▲ ou sur ▼ pour accéder à l'alias ou à l'ID souhaité.Appuyez sur OK pour valider la sélection.

4 Appuyez sur ▲ ou sur ▼ pour accéder à l'option `Écoute amb.` Appuyez sur OK pour valider la sélection.

L'écran affiche un mini-avis de transition, indiquant que la requête est en cours. La LED passe au vert.

5 Attendez l'accusé de réception.

Si l'opération réussit :

- Une tonalité d'indication positive est émise.
- L'écran affiche un mini-avis positif.
- Des signaux audio sont émis sur la radio écoutée à distance pendant une durée préprogrammée, tandis que l'écran affiche `Écoute amb.` Lorsque le délai programmé expire, une tonalité d'avertissement est émise et la LED s'éteint.

Si l'opération échoue :

- Une tonalité d'indication négative est émise.
- L'écran affiche un mini-avis négatif.

5.7.11.3 Déclenchement d'écoutes à distance à l'aide de la numérotation manuelle

Suivez la procédure ci-après pour déclencher une écoute à distance sur votre radio à l'aide de la numérotation manuelle.

1 Appuyez sur OK pour accéder au menu.

2 Appuyez sur ▲ ou sur ▼ pour accéder au `répertoire`. Appuyez sur OK pour valider la sélection.

3 Appuyez sur ▲ ou sur ▼ pour accéder à l'option `Num. manuelle`. Appuyez sur OK pour valider la sélection.

4 Appuyez sur ▲ ou sur ▼ pour accéder à l'option `Numéro radio`. Appuyez sur OK pour valider la sélection.

5 Effectuez l'une des opérations suivantes :

- Saisissez l'alias ou l'ID du terminal radio, puis appuyez sur OK pour continuer.
- Modifiez le dernier ID appelé, puis appuyez sur OK pour continuer.

6 Appuyez sur ▲ ou sur ▼ pour accéder à l'option `Écoute amb.` Appuyez sur OK pour valider la sélection.

L'écran affiche un mini-avis de transition, indiquant que la requête est en cours. La LED passe au vert.

7 Attendez l'accusé de réception.

Si l'opération réussit :

- Une tonalité d'indication positive est émise.
- L'écran affiche un mini-avis positif.
- Des signaux audio sont émis sur la radio écoutée à distance pendant une durée préprogrammée, tandis que l'écran affiche `Écoute amb.` Lorsque le délai programmé expire, une tonalité d'avertissement est émise et la LED s'éteint.

Si l'opération échoue :

- Une tonalité d'indication négative est émise.
- L'écran affiche un mini-avis négatif.

5.7.12

Paramètres des contacts

Le menu Contacts fournit une fonction d'annuaire sur votre radio. Chaque entrée correspond à un alias ou ID que vous pouvez utiliser pour lancer un appel. Les entrées sont classées par ordre alphabétique.

Chaque entrée, selon le contexte, est associée aux différents types d'appels suivants : appel de groupe, appel individuel, appel de diffusion, appel général de site, appel général multisite, appel PC ou appel console opérateur.

Les appels PC et dispatch sont des appels de données. Ils sont uniquement disponibles avec certaines applications.

Veuillez consulter la documentation concernant les applications de données.

En outre, le menu Contacts vous permet d'associer chaque entrée à une ou plusieurs touches numériques programmables sur un microphone à clavier. Si une entrée est associée à une touche numérique, votre radio peut appliquer la numérotation rapide à cette entrée.

REMARQUE:
Une coche est affichée devant chaque touche numérique attribuée à une entrée. Si la coche est placée devant une position `Vide`, cela signifie qu'aucune touche numérique n'a été attribuée à cette entrée.

Chaque entrée de chaque liste affiche les informations suivantes :

- Type d'appel
- Alias d'appel
- ID d'appel

REMARQUE:
Si la fonctionnalité Secret est activée sur un canal, vous pouvez utiliser cette fonction pour réaliser un appel de groupe crypté, un appel individuel, un appel général ou un appel téléphonique sur ce canal. Seules les radios cibles disposant de la même clé de confidentialité ou des mêmes valeur et ID de clé que ceux de votre radio sont en mesure de déchiffrer la transmission.

5.7.12.1

Attribution d'entrées aux touches numériques programmables

Suivez la procédure ci-après pour attribuer des entrées aux touches numériques programmables de votre radio.

1. Appuyez sur OK pour accéder au menu.
2. Appuyez sur ▲ ou sur ▼ pour accéder au `répertoire`. Appuyez sur OK pour valider la sélection.

3 Appuyez sur ▲ ou sur ▼ pour accéder à l'alias ou à l'ID souhaité. Appuyez sur OK pour valider la sélection.

4 Appuyez sur ▲ ou sur ▼ pour accéder à l'option `Touche progr.` Appuyez sur OK pour valider la sélection.

5 Effectuez l'une des opérations suivantes :

- Si la touche numérique souhaitée n'a encore été attribuée à aucune entrée, appuyez sur ▲ ou sur ▼ pour y accéder. Appuyez sur OK pour valider la sélection.
- Si la touche numérique en question est actuellement attribuée à une entrée, le message `La clé est déjà attribuée` apparaît, tandis que la première ligne affiche la question `Remplacer ?`. Effectuez l'une des opérations suivantes :
  Appuyez sur ▲ ou sur ▼ pour atteindre `Oui`.
  Appuyez sur OK pour valider la sélection.
  Une tonalité d'indication positive est émise et l'écran affiche `Contact enregistré` et un mini-avis positif.
  Appuyez sur ▲ ou ▼ pour atteindre `Non` et revenir à l'étape précédente.

5.7.12.2

Annulation de l'attribution d'entrées aux touches numériques programmables

Suivez la procédure ci-après pour annuler l'attribution d'entrées aux touches numériques programmables de votre radio.

1 Effectuez l'une des opérations suivantes :

- Exercez une pression longue sur la touche numérique programmée pour accéder à l'alias ou à l'ID souhaité. Passez à étape 4.
- Appuyez sur OK pour accéder au menu.

2 Appuyez sur ▲ ou sur ▼ pour accéder au `répertoire`. Appuyez sur OK pour valider la sélection.

3 Appuyez sur ▲ ou sur ▼ pour accéder à l'alias ou à l'ID souhaité. Appuyez sur OK pour valider la sélection.

4 Appuyez sur ▲ ou sur ▼ pour accéder à l'option `Touche progr.` Appuyez sur OK pour valider la sélection.

5 Appuyez sur ▲ ou sur ▼ pour atteindre `Vide`.

Appuyez sur OK pour valider la sélection.

La première ligne affiche le message `Effacer toutes clés`.

6 Appuyez sur ▲ ou sur ▼ pour atteindre `Oui`.

Appuyez sur OK pour valider la sélection.

REMARQUE:
Lorsque vous supprimez une entrée, toute association de cette entrée avec une ou plusieurs touches numériques programmées est également supprimée.

Une tonalité d'indication positive est émise. L'écran indique `Contact enregistré`.
L'écran revient automatiquement au menu précédent.

5.7.12.3

Ajout de nouveaux contacts

Suivez la procédure ci-après pour ajouter de nouveaux contacts sur votre radio.

1 Appuyez sur OK pour accéder au menu.

2 Appuyez sur ▲ ou sur ▼ pour accéder au `répertoire`.Appuyez sur OK pour valider la sélection.

3 Appuyez sur ▲ ou sur ▼ pour accéder à l'option Nveau contact. Appuyez sur OK pour valider la sélection.

4 Appuyez sur ▲ ou ▼ pour sélectionner le type de contact Contacts radio ou Contacts téléphoniques. Appuyez sur OK pour valider la sélection.

5 Entrez le numéro du contact à l'aide du pavé numérique, puis appuyez sur OK pour continuer.

6 Entrez le nom du contact à l'aide du clavier, puis appuyez sur OK pour continuer.

7 Appuyez sur ▲ ou sur ▼ pour accéder au type de sonnerie souhaité. Appuyez sur OK pour valider la sélection.

Une tonalité d'indication positive est émise.L'écran affiche un mini-avis positif.

5.7.13

Paramètres des indicateurs d'appel

Cette fonction permet aux utilisateurs radio de configurer les sonneries des appels et ou des messages texte.

5.7.13.1

Activation/désactivation des sonneries des appels individuels

Suivez la procédure ci-après pour activer ou désactiver les sonneries des appels individuels sur votre radio.

1 Appuyez sur OK pour accéder au menu.

2 Appuyez sur ▲ ou sur ▼ pour accéder à l'option Config/Infos. Appuyez sur OK pour valider la sélection.

3 Appuyez sur ▲ ou sur ▼ pour accéder à l'option Config. radio. Appuyez sur OK pour valider la sélection.

4 Appuyez sur ▲ ou sur ▼ pour accéder à l'option `Tnltés/Avert.` Appuyez sur OK pour valider la sélection.

5 Appuyez sur ▲ ou sur ▼ pour accéder à l'option `Sonn. d'appels`. Appuyez sur OK pour valider la sélection.

6 Appuyez sur ▲ ou sur ▼ pour accéder à l'option `Appel indiv.` Appuyez sur OK pour valider la sélection.

7 Effectuez l'une des opérations suivantes :

- Appuyez sur ▲ ou sur ▼ pour accéder à la tonalité souhaitée. Appuyez sur OK pour valider la sélection.
  L'écran affiche le symbole ✓ ainsi que la tonalité sélectionnée.
- Appuyez sur ▲ ou sur ▼ pour accéder à l'option `Désactivé`. Appuyez sur OK pour valider la sélection.
  Si les sonneries étaient précédemment activées, l'écran affiche le symbole ✓ en regard de l'option `Désactivé`.

  Si les sonneries étaient précédemment désactivées, le symbole ✓ n'apparaît pas en regard de l'option `Désactivé`.

5.7.13.2

Activation/désactivation des sonneries des messages texte

Suivez la procédure ci-après pour activer ou désactiver les sonneries des messages texte sur votre radio.

1 Appuyez sur OK pour accéder au menu.

2 Appuyez sur ▲ ou sur ▼ pour accéder à l'option `Config/Infos`. Appuyez sur OK pour valider la sélection.

3 Appuyez sur ▲ ou sur ▼ pour accéder à l'option `Config. radio`. Appuyez sur OK pour valider la sélection.

4 Appuyez sur ▲ ou sur ▼ pour accéder à l'option `Tnltés/Avert.` Appuyez sur OK pour valider la sélection.

5 Appuyez sur ▲ ou sur ▼ pour accéder à l'option `Sonn. d'appels`. Appuyez sur OK pour valider la sélection.

6 Appuyez sur ▲ ou ▼ pour accéder à l'option `Message texte`. Appuyez sur OK pour valider la sélection.

L'écran affiche le symbole ✓ ainsi que la tonalité actuelle.

7 Effectuez l'une des opérations suivantes :

- Appuyez sur ▲ ou sur ▼ pour accéder à la tonalité souhaitée. Appuyez sur OK pour valider la sélection.
  L'écran affiche le symbole ✓ ainsi que la tonalité sélectionnée.
- Appuyez sur ▲ ou sur ▼ pour accéder à l'option `Désactivé`. Appuyez sur OK pour valider la sélection.
  Si les sonneries étaient précédemment activées, l'écran affiche le symbole ✓ en regard de l'option `Désactivé`.

Si les sonneries étaient précédemment désactivées, le symbole ✓ n'apparaît pas en regard de l'option Désactivé.

5.7.13.3

Activation/désactivation des sonneries d'avertissements d'appel

Suivez la procédure ci-après pour activer ou désactiver les sonneries d'avertissement d'appel sur votre radio.

1 Appuyez sur OK pour accéder au menu.

2 Appuyez sur ▲ ou sur ▼ pour accéder à l'option Config/Infos.Appuyez sur OK pour valider la sélection.

3 Appuyez sur ▲ ou sur ▼ pour accéder à l'option Config. radio.Appuyez sur OK pour valider la sélection.

4 Appuyez sur ▲ ou ▼ pour accéder à l'option Tonalités/Alertes. Appuyez sur OK pour valider la sélection.

5 Appuyez sur ▲ ou sur ▼ pour accéder à l'option Sonn. d'appels. Appuyez sur OK pour valider la sélection.

6 Appuyez sur ▲ ou sur ▼ pour accéder à l'option Avert. d'appel. Appuyez sur OK pour valider la sélection.

7 Effectuez l'une des opérations suivantes :

- Appuyez sur ▲ ou sur ▼ pour accéder à la tonalité souhaitée. Appuyez sur OK pour valider la sélection.
  L'écran affiche le symbole ✓ ainsi que la tonalité sélectionnée.

- Appuyez sur ▲ ou sur ▼ pour accéder à l'option Désactivé. Appuyez sur OK pour valider la sélection.
  Si les sonneries étaient précédemment activées, l'écran affiche le symbole ✓ en regard de l'option Désactivé.

  Si les sonneries étaient précédemment désactivées, le symbole ✓ n'apparaît pas en regard de l'option Désactivé.

5.7.13.4

Activation/Désactivation des sonneries des États de télémétrie avec texte

Suivez la procédure ci-après pour activer ou désactiver les sonneries d'appel de l'état de télémesure avec texte sur votre radio.

1 Appuyez sur OK pour accéder au menu.

2 Appuyez sur ▲ ou sur ▼ pour accéder à l'option Config/Infos. Appuyez sur OK pour valider la sélection.

3 Appuyez sur ▲ ou sur ▼ pour accéder à l'option Config. radio. Appuyez sur OK pour valider la sélection.

4 Appuyez sur ▲ ou ▼ pour accéder à l'option Tonalités/Alertes. Appuyez sur OK pour valider la sélection.

5 Appuyez sur ▲ ou sur ▼ pour accéder à l'option Sonn. d'appels. Appuyez sur OK pour valider la sélection.

6 Appuyez sur ▲ ou ▼ pour accéder à l'option `Télémesure`. Appuyez sur OK pour valider la sélection.

La tonalité actuelle est indiquée par le symbole ✓ .

7 Effectuez l'une des opérations suivantes :

- Appuyez sur ▲ ou ▼ pour accéder à la tonalité souhaitée. Appuyez sur OK pour valider la sélection.
  L'écran affiche `Tonalité <Numéro> sélectionnée` et un symbole ✓ apparaît à gauche de la tonalité choisie.
- Appuyez sur ▲ ou sur ▼ pour accéder à l'option `Désactiver`. Appuyez sur OK pour valider la sélection.
  L'écran affiche `Sonnerie télém. désactivée` et un symbole ✓ apparaît à gauche de `Désactiver`.

5.7.13.5

Attribution de types de sonnerie

La radio peut être programmée pour émettre l'une des dix sonneries disponibles lorsqu'elle reçoit un avertissement d'appel ou un message texte d'un utilisateur identifié. En faisant défiler la liste, vous entendez successivement chaque sonnerie. Suivez la procédure ci-après pour attribuer des styles de sonneries à votre radio.

1 Appuyez sur OK pour accéder au menu.

2 Appuyez sur ▲ ou sur ▼ pour accéder au `répertoire`. Appuyez sur OK pour valider la sélection.

Les entrées sont classées par ordre alphabétique.

3 Appuyez sur ▲ ou sur ▼ pour accéder à l'alias ou à l'ID souhaité. Appuyez sur OK pour valider la sélection.

4 Appuyez sur ▲ ou ▼ pour accéder à l'option `Modifier`. Appuyez sur OK pour valider la sélection.

5 Appuyez sur OK jusqu'à ce que l'écran affiche le menu `Modifier la sonnerie`.

Le symbole ✓ indique la tonalité actuellement sélectionnée.

6 Appuyez sur ▲ ou ▼ pour accéder à la tonalité souhaitée. Appuyez sur OK pour valider la sélection.

L'écran affiche un mini-avis positif.

5.7.13.6

Sélection d'un type d'alerte sonore

REMARQUE:
Le bouton préprogrammé **Type avert.son.** est attribué par votre revendeur ou par l'administrateur système. Consultez votre revendeur ou administrateur système pour déterminer comment la radio a été programmée.

Vous pouvez programmer votre radio pour qu'elle vibre lors de la réception d'appels. Si l'option Toutes tonalités est désactivée, la radio affiche l'icône Silencieux. Si l'option Toutes tonalités est activée, le type d'alerte par sonnerie associé s'affiche.

La radio vibre une fois s'il s'agit d'un style de sonnerie momentané. La radio vibre plusieurs fois s'il s'agit d'un mode de sonnerie répétitif. Lorsqu'elle est réglée sur Sonnerie & Vibration, la radio émet une tonalité spécifique en cas de transaction radio entrante (par exemple : alerte d'appel ou message). Cette tonalité ressemble à la tonalité d'indication positive ou à celle d'un appel manqué.

Pour les radios équipées de batteries qui prennent en charge la fonction Vibration et fixées à un clip de ceinture à vibration, les options de type d'avertissement sonore disponibles sont Silencieux, Sonnerie, Vibration, et enfin Sonnerie & Vibration.

Pour les radios avec batteries qui ne prennent pas en charge la fonction vibreur et ne sont pas reliées à un clip de ceinture à vibration, l'option Type avert.son. est automatiquement définie sur Sonnerie.Les options du type d'avertissement sonore sont Silencieux et Sonnerie.

Vous pouvez sélectionner un type d'avertissement sonore en effectuant l'une des opérations suivantes.

- Appuyez sur le bouton programmé **Type avert.son.** pour accéder au menu du type d'avertissement sonore.
  a. Appuyez sur ▲ ou ▼ pour accéder à `Sonnerie`, `Vibration`, `Sonnerie & Vibration` ou `Silencieux` et appuyez sur OK pour sélectionner.
- Accédez à cette fonction via le menu.
  a. Appuyez sur OK pour accéder au menu.
  b. Appuyez sur ▲ ou ▼ pour accéder à `Config/Infos` et appuyez sur OK pour sélectionner.
  c. Appuyez sur ▲ ou ▼ pour accéder à `Config. radio` et appuyez sur OK pour sélectionner.
  d. Appuyez sur ▲ ou ▼ pour accéder à `Tnltés/Avert.` et appuyez sur OK pour sélectionner.
  e. Appuyez sur ▲ ou ▼ pour accéder à `Type avert.son.` et appuyez sur OK pour sélectionner.
  f. Appuyez sur ▲ ou ▼ pour accéder à `Sonnerie`, `Vibration`, `Sonnerie & Vibration` ou `Silencieux` et appuyez sur OK pour sélectionner.

5.7.13.7

Configuration du style de vibreur

REMARQUE:
Le bouton préprogrammé **Style de vibreur** est attribué par votre revendeur ou par l'administrateur système. Consultez votre revendeur ou administrateur système pour déterminer comment la radio a été programmée.

Le style de vibreur est activé lorsque le clip de ceinture à vibration est relié à la radio avec une batterie qui prend en charge la fonction Vibreur.

Vous pouvez configurer le style de vibreur en procédant de l'une des manières suivantes.

- Appuyez sur le bouton programmé **Style vibreur** pour accéder au menu Style de vibreur.
  a. Appuyez sur ▲ ou ▼ pour accéder à `Court`, `Moyen` ou `Long` et appuyez sur OK pour sélectionner.
- Accédez à cette fonction via le menu.
  a. Appuyez sur OK pour accéder au menu.
  b. Appuyez sur ▲ ou ▼ pour accéder à `Config/Infos` et appuyez sur OK pour sélectionner.
  c. Appuyez sur ▲ ou ▼ pour accéder à `Config. radio` et appuyez sur OK pour sélectionner.
  d. Appuyez sur ▲ ou ▼ pour accéder à `Tnl tés/Avert.` et appuyez sur OK pour sélectionner.
  e. Appuyez sur ▲ ou ▼ pour accéder à `Style de vibration` et appuyez sur OK pour sélectionner.
  f. Appuyez sur ▲ ou ▼ pour accéder à `Court`, `Moyen` ou `Long` et appuyez sur OK pour sélectionner.

5.7.13.8

Volume croissant de la tonalité des alarmes

La radio peut être programmée pour vous avertir en permanence lorsqu'un appel radio reste sans réponse. Votre radio augmente automatiquement le volume de la tonalité pendant une période prédéterminée. Cette fonction est appelée Avert. croissant. Suivez la procédure ci-après pour régler le volume des tonalités d'alarme de votre radio.

5.7.14

Caractéristiques du journal des appels

Votre radio génère un journal de tous les appels individuels entrants et sortants, répondus ou en absence. Ce journal vous permet d'afficher et de gérer les appels récents.

Les avertissements d'appels manqués peuvent être inclus dans les journaux d'appels, selon la configuration du système de votre radio. Les listes d'appels vous permettent d'effectuer les tâches suivantes :

- Enregistrer les alias ou les ID dans le répertoire
- Supprimer l'appel
- Voir les détails

5.7.14.1

Affichage des appels récents

Suivez la procédure ci-après pour afficher les appels récents sur votre radio.

1 Appuyez sur OK pour accéder au menu.

2 Appuyez sur ▲ ou sur ▼ pour accéder à l'option `Appels`. Appuyez sur OK pour valider la sélection.

3 Appuyez sur ▲ ou sur ▼ pour accéder à la liste souhaitée. Les options sont les suivantes : `Manqués`, `Répondus` et `Sortants`.

Appuyez sur OK pour valider la sélection.

L'écran affiche l'entrée la plus récente.

4 Appuyez sur ▲ ou sur ▼ pour afficher la liste.

Appuyez sur le bouton **PTT** pour lancer un appel individuel à partir de l'alias ou de l'ID actuellement affiché à l'écran.

5.7.14.2

Enregistrement des alias/ID de la liste d'appels

Suivez la procédure ci-après pour enregistrer sur votre radio des alias ou des ID contenus dans la liste d'appels.

1 Appuyez sur OK pour accéder au menu.

2 Appuyez sur ▲ ou sur ▼ pour accéder à l'option `Appels`. Appuyez sur OK pour valider la sélection.

3 Appuyez sur ▲ ou sur ▼ pour accéder à la liste souhaitée. Appuyez sur OK pour valider la sélection.

4 Appuyez sur ▲ ou sur ▼ pour accéder à l'alias ou à l'ID souhaité. Appuyez sur OK pour valider la sélection.

5 Appuyez sur ▲ ou sur ▼ pour accéder à l'option `Stocker`. Appuyez sur OK pour valider la sélection.

L'écran affiche un curseur clignotant.

6 Saisissez le reste des caractères de l'alias souhaité.

Appuyez sur OK pour valider la sélection.

Vous pouvez également enregistrer un ID sans alias.

L'écran affiche un mini-avis positif.

5.7.14.3

Suppression d'appels de la liste d'appels

Suivez la procédure ci-après pour supprimer les appels contenus dans la liste d'appels de votre radio.

1 Appuyez sur OK pour accéder au menu.

2 Appuyez sur ▲ ou sur ▼ pour accéder à l'option `Appels`. Appuyez sur OK pour valider la sélection.

3 Appuyez sur ▲ ou sur ▼ pour accéder à la liste souhaitée. Appuyez sur OK pour valider la sélection.

Si la liste est vide :

- Une tonalité est émise.
- L'écran affiche `Liste Vide`.

4 Appuyez sur ▲ ou sur ▼ pour accéder à l'alias ou à l'ID souhaité. Appuyez sur OK pour valider la sélection.

5 Appuyez sur ▲ ou ▼ pour accéder à l'option `Supprimer l'entrée ?`. Appuyez sur OK pour valider la sélection.

6 Effectuez l'une des opérations suivantes :

- Appuyez sur OK pour sélectionner `Oui` et supprimer l'entrée.
  L'écran affiche `Entrée supprimée`.
- Appuyez sur ▲ ou sur ▼ pour atteindre `Non`.

  Appuyez sur OK pour valider la sélection.
  La radio revient à l'écran précédent.

5.7.14.4

Affichage des détails dans la liste d'appels

Suivez la procédure ci-après pour afficher des informations relatives à votre radio dans la liste d'appels.

1 Appuyez sur OK pour accéder au menu.

2 Appuyez sur ▲ ou sur ▼ pour accéder à l'option `Appels`. Appuyez sur OK pour valider la sélection.

3 Appuyez sur ▲ ou sur ▼ pour accéder à la liste souhaitée. Appuyez sur OK pour valider la sélection.

4 Appuyez sur ▲ ou sur ▼ pour accéder à l'alias ou à l'ID souhaité. Appuyez sur OK pour valider la sélection.

5 Appuyez sur ▲ ou sur ▼ pour accéder à l'option `Voir détails`. Appuyez sur OK pour valider la sélection.

L'écran affiche les détails correspondants.

5.7.15

Fonctionnement de l'avertissement d'appel

La fonction d'avertissement d'appel vous permet de demander à un utilisateur de vous rappeler dès que cela lui sera possible.

Cette fonction est réservée aux alias ou ID de terminaux et est accessible par le menu via Contacts ou via un bouton programmé d'**accès par numérotation rapide**.

Dans Capacity Max, la fonctionnalité d'avertissement d'appel permet à un utilisateur radio ou une console opérateur d'envoyer une alerte à un autre utilisateur radio pour demander à celui-ci de rappeler l'appelant lorsqu'il est disponible. Aucune communication vocale n'est impliquée dans cette fonctionnalité.

L'avertissement d'appel peut être configuré par le revendeur ou l'administrateur système de deux manières :

- La radio est configurée pour permettre à l'utilisateur d'appuyer sur le bouton **PTT** pour répondre directement à l'appelant en réalisant un appel individuel.
- La radio est configurée pour permettre à l'utilisateur d'appuyer sur le bouton **PTT** et de poursuivre d'autres communications avec le groupe de parole. Appuyer sur le bouton **PTT** lors d'un avertissement d'appel ne permet pas à l'utilisateur de répondre à l'appelant. L'utilisateur doit accéder à l'option Journal d'appels manqués du menu Journal d'appels et répondre à l'avertissement d'appel à partir de cette option.

Un appel individuel OACSU permet à l'utilisateur de répondre immédiatement, tandis qu'un appel individuel

FOACSU requiert un accusé de réception de l'utilisateur pour l'appel. Les appels de type OACSU sont par conséquent recommandés pour la fonctionnalité d'avertissement d'appel. Voir Appel individuel à la page 82.

5.7.15.1

Émission d'avertissements d'appel

Suivez la procédure ci-après pour émettre des avertissements d'appel sur votre radio.

1 Appuyez sur le bouton **Accès direct** préprogrammé.

L'écran affiche `Avert. d'appel`, ainsi que l'alias ou l'ID du terminal radio. La LED passe au vert.

2 Attendez l'accusé de réception.

Lorsque l'accusé de réception de l'avertissement d'appel est reçu, un mini-avis positif est affiché.

Si l'accusé de réception de l'avertissement d'appel n'est pas reçu, un mini-avis négatif est affiché.

5.7.15.2

Émission d'avertissements d'appel à l'aide du répertoire

Suivez la procédure ci-après pour émettre des avertissements d'appel sur votre radio à l'aide du répertoire.

1 Appuyez sur OK pour accéder au menu.

2 Appuyez sur ▲ ou sur ▼ pour accéder au `répertoire`. Appuyez sur OK pour valider la sélection.

3 Appuyez sur ▲ ou sur ▼ pour accéder à l'alias ou à l'ID souhaité.Appuyez sur OK pour valider la sélection.

4 Appuyez sur ▲ ou sur ▼ pour accéder à l'option `Avert. d'appel`. Appuyez sur OK pour valider la sélection.

L'écran affiche `Avert. d'appel`, ainsi que l'alias ou l'ID du terminal radio. La LED passe au vert.

5 Attendez l'accusé de réception.

- Lorsque l'accusé de réception de l'avertissement d'appel est reçu, un mini-avis positif est affiché.
